● Mr. D'AMATO. Mr. President, I wish to reiterate my concern over the plight of Dr. Andrei Sakharov, an outspoken advocate of human rights and world peace who has been exiled by Soviet authorities to the closed city of Gorky since January 22, 1980. The Nobel citation, awarded him in 1975, cited Sakharov as a "spokesman for the conscience of mankind." Meanwhile, the Soviet Government has gone to extraordinary lengths to silence him. Despite constant harassment by the secret police, Sakharov continues to champion the cause of human rights as embodied in the Helsinki Final Act and the United Nations Universal Declaration on Human Rights.

Two years ago Jason Robards portrayed Andrei Sakharov in a moving film presentation of the Nobel laureate's struggle for freedom in the Soviet Union. An article by Mr. Robards appearing in the Washington Post provides a good description of Sakharov's travail.

Mr. President, I request that the text of this article be printed in the RECORD.

The article follows:

OUR GREATEST HERO OF THE 20TH CENTURY

(By Jason Robards)

Two years ago I played the role of Soviet human rights activist and Nobel Peace Prize laureate Andrei Sakharov. Glenda Jackson played the role of his wife, Dr. Yelena Bonner. We strained desperately to convey the feeling, the reality, the truth of the Sakharovs' experience as human rights activists and as political prisoners isolated in the closed and cold city of Gorky.

Through the whole process of studying for the part we felt an odd sort of detachment from the experience of Sakharov and Bonner, yet we pushed on.

Last week I was in Washington for the Helen Hayes Awards, special recognition of theater talent in the Washington area. During rehearsal on the afternoon of the awards, I learned that Dr. Bonner herself was in town for a meeting of the National Academy of Sciences and wanted to meet me. I, of course, said yes. She was to come to the awards ceremony.

Dr. Bonner arrived late from a meeting of the National Academy, where her husband was honored. She looked remarkably well for a woman who a few months earlier had undergone complicated surgery. I felt distraught and helpless that soon she would be returning to the Soviet Union with no guarantee of ever seeing her family here again.

She described to me the experience of her cab ride from the academy to the National Theatre. "As we were driving by the White House I had a strange, uneasy phantasmagoric feeling. I have just been to the National Academy of Sciences representing my husband, who was honored there, and now I am on the way to see a man who played the role of my husband, and at the same time, in the back of my mind I am packing my bags to return to the Soviet Union in less than a month. I wonder why I am not crazy."

Academician Sakharov, wherever he is, will celebrate his 65th birthday on May 21. Members of Congress have asked the president to proclaim that a day in honor of Sakharov, to be marked by "appropriate ceremonies and activities." To me, such a celebration—and it must be called a celebration, if we are to bring moral witness to Sakharov's great achievements—will be in part bizarre and in part harsh, cruel and real.

From Sakharov's writings I have learned that he believes that the world can be preserved only with the coexistence of peace and the rights of the individual, essentially what we in the West and so many brave souls in many places the world over call human rights. One of Sakharov's greatest achievements was persuading the Soviet government to sign the 1963 Moscow Treaty, which banned nuclear weapons testing in the atmosphere, in outer space and under water.

While many refer to Sakharov as the father of the Soviet hydrogen bomb, we forget to mention his ideas and efforts on the use of energy for peaceful purposes. He undertook this important work *before* he became a dissident and a spokesman for human rights. His first serious nonscientific work that became known in the West was called "Thoughts on Progress, Peaceful Coexistence and Intellectual Freedom" (1968). By the time of his Nobel Peace Prize lecture, which his wife delivered in Oslo in 1975, his views on human rights were crystallized.

While we as Americans are going to celebrate the 100th anniversary of the Statue of Liberty, we should call to mind Thomas Paine's response to Thomas Jefferson. Said Jefferson: "Where freedom is, there is my country." Paine replied: "Where freedom is not, there is my country."

Any celebration of Dr. Andrei Sakharov's birthday is bound to give rise to our worst fears—and our best hopes. But it must also be a time for us to commemorate with living testimony our greatest hero of the 20th century.

Mr. D'AMATO. Mr. President, as chairman of the Commission on Security and Cooperation in Europe, I can attest to the fact that Sakharov has indeed become a hero, not by choice, but circumstance. Sakharov has not sought attention. The only thing that he has sought are the rights and freedoms we so often take for granted. Rights included in the Helsinki Final Act, freely agreed to by the leaders of the Soviet Union, and promised thereby to the people of the Soviet Union.

As President Thomas Jefferson noted, "The will of the people is the only legitimate foundation of any government." Unfortunately, the Communist Party of the Soviet Union has chained and gagged the will of the Soviet people, while denying the possibility of its existence. Such actions not only raise serious questions regarding the Soviet Government's legitimacy, but also serve to drive them further outside of the community of civilized nations.

Mr. President, I encourage other Members of the Senate to join me in speaking out on behalf of those, like Sakharov, who seek to realize in their own countries those inalienable rights we exercise and cherish, but which remain only a tragically denied potential for human greatness in those nations behind the Iron Curtain.●

AMERICAN PATRIOTISM

● Mr. QUAYLE. Mr. President, today I would like to honor a constituent who exemplifies the very meaning of the word "patriotism." Michael Haverly is an 8-year-old from Shelby County, IN, who for the last 3 years has worked hard raising money to repair the Statue of Liberty.

The son of Robert and Connie Haverly, Michael first became concerned about the fate of the Statue of Liberty when his mother read him a fundraising letter from the Liberty Foundation. Since that time, the second-grader at Trinton Elementary School has raised well over $6,400 and has been honored for his efforts by President Reagan during a Rose Garden ceremony on October 28, 1985.

Later this year, Michael will take part in the Liberty Weekend festivities. He will be on the NBC-TV morning program, "Today," on July 4, and he will also be featured in a CBS-TV spot, "American Portrait," marking the statue's 100th birthday.

Michael, who has undergone numerous operations for multiple physical birth defects, is a prime example of a true American who has real pride in his country and its symbols of freedom. All Americans should take a cue from Michael and his unselfish dedication to repairing the Statue of Liberty. He says that, once completed, "her spirit will smile."

Today I would also like to share a letter dictated by Michael that he asked me to share with my colleagues:

DEAR SENATE PEOPLE: I know the times are rough, but I have run out of ideas, so I decided to write you.

Fixing our Statue of Liberty up has not been going so good. We need more money.

A long time ago she was shiny and pretty. Now she has rust coming down her neck and her arm is weak, and handicapped people in wheelchairs can't get in to see her.

If we don't fix her, people will think we don't care about our country.

You should be proud to be an American, so please donate as much as you possibly can. I don't care if its a dollar or a thousand, and you can send it to me or the Statue people who are fixing it, like Sharyn Kay [a Liberty Foundation worker]. She is real nice.

And, can you please see if the children in Africa can get the food.

Thank you,

MICHAEL.

On the bottom of the letter, Michael has drawn a picture of the Statue of Liberty.

Mr. President, all of us in Indiana are very proud of our patriotic young Hoosier, and I know my colleagues join me in wishing Michael success in the final stretch before the statue is unveiled in July. I think I speak for all of us when I also thank Michael for reminding us that we can and should be proud to be Americans.●

WINNERS AND LOSERS OF TAX REFORM

● Mr. DURENBERGER. Mr. President, since the Finance Committee reported out sweeping tax reform legislation on May 7, Americans have been busy trying to determine how this bill will affect their personal and business tax liabilities, whether they will be one of the "winners" or one of the "losers." Since May 7, I have discussed with industry representatives and with my constituents their specific concerns. I have also read with great interest numerous explanations of the impact of the Finance Committee bill on the U.S. economy. At this time, I would like to share with my colleagues one article I found to be particularly straightforward and objective. I urge those who have not yet done so to read the article which appeared in the May 26, 1986, edition of Business Week entitled, "The Winners and Losers of Tax Reform."

Mr. President, I ask that the text of the article be printed in the RECORD.

The article follows:

THE WINNERS AND LOSERS OF TAX REFORM

The U.S. stands on the brink of a fundamental overhaul of its tax system. To the surprise of almost everyone, the tax bill now awaiting action in the Senate does much of what the reformers hoped to accomplish when President Reagan first proposed comprehensive tax revision in 1984. While a final bill is months away, it looks as though the U.S. will end 1986 with a shiny new tax code that will encourage investment for economic reasons, rather than tax advantages, as well as provide many individuals with more money to spend or save. By narrowing differences in how industries and individuals are taxed, this system would also be more equitable and efficient.

In the short run, some economists fear that the new plan could have a wrenching effect on investment by raising corporate taxes by $100 billion over the next five years. But the transfer of that amount to individuals would largely offset the impact on the economy by fueling consumption. Investment would then be driven by the growth of markets rather than tax breaks. In addition, new constraints on consumer borrowing could lower interest rates, and that would eventually make more investment projects profitable.

POLITICAL MOMENTUM

Still, the bill approved by the Senate Finance Committee on May 7 could create real difficulties. If enacted, it would cause short-term confusion throughout the economy as businesses and individuals adjust to the new system. It threatens to wreck much of the commercial real estate industry, which already is in serious trouble (page 118), and it may radically change the way individuals save and invest. At the same time, it would wean individual taxpayers and companies away from their addiction to tax writeoffs and economically useless shelters and make the allocation of capital among industries more rational.

How does all this sort out for the taxpayer? There is no neat answer for everybody, but one thing is clear: If you pay a high effective tax rate today, you'll love the Finance Committee's version of reform. If you use lots of deductions and shelters to keep your rates low you'll hate it.

"The basic fact is that a trade-off of tax preferences for low rates is good for the economy in the long run," says David A. Berenson, director of tax policy at Ernst & Whinney. "There may be economic dislocations in achieving that, there will be winners and losers, but the macro effect is going to be good."

Because of the political momentum now building for a tax overhaul, the final version of reform is likely to look a lot like the Senate Finance bill, which sharply lowers both individual and corporate tax rates. But there could be changes. The repeal of the preferential treatment for capital gains, the curbs on individual retirement accounts (page 119), and the denial of deductions for sales taxes may face challenges, both on the Senate floor and in the eventual House-Senate conference committee.

In addition, there are key differences between the bill passed by the House last December and the Finance plan. The House measure makes relatively modest changes in individual taxation while greatly altering the treatment of business. It drops the top individual rate to only 38% and pays for most of the cuts by paring corporate deductions.

The Packwood bill takes a very different tack, making radical changes in individual taxation but qualitatively modest shifts in business taxes. It cuts the top individual rate nearly in half, to 27%, but pays for that by eliminating dozens of individual tax breaks. Corporate rates would be cut to 33% from 46%, financed mostly by curbs on corporate write-offs.

The Finance bill does not raise those taxes across the board. Instead, it creates crosscurrents of winners and losers, in some cases both giving to and taking away from the same companies.

SLEDGEHAMMER

The tax shelter industry, including most real-estate syndicators, probably hates the bill the most. It would prohibit taxpayers from using losses generated by limited partnerships to shelter other income, effectively locking out a prime source of real estate investment funds. In addition, lower rates make all tax preferences less valuable. And owners of commercial property would face far slower depreciation write-offs. "This is really a sledgehammer on real estate," declares J. Gregory Ballentine of Peat, Marwick, Mitchell & Co. The natural-resources-oriented Finance Committee could not restrain an urge to protect oil and gas shelters. But those write-offs, too, could be dumped before Congress is through with the package.

Other businesses, including established computer manufacturers, retailers, and wholesalers, stand to be big winners. Executives in these industries are delighted at the prospect of sharply lower tax rates. The Finance bill "really contains all the elements of tax reform that we've been campaigning for for years," says Larry R. Langdon, director of taxes for Hewlett-Packard Co. "It's as if someone here wrote it."

Computer startups, as well as other new ventures, may not fare as well. The proposed taxation of capital gains as ordinary income could discourage individuals from investing in speculative businesses. "It's a disaster for long-term investing," complains Reid W. Dennis, a general partner at Institutional Venture Partners in Menlo Park, Calif.

Although corporations would continue to enjoy a modest capital gains differential, the shift in investment decisions by both individuals and businesses could prove to be among the most far-reaching effects of the Finance bill. "It's going to have some dampening effect on risk-taking," says Byrle M. Abbin, director of federal tax services at Arthur Andersen & Co. "If the [tax] rates are the same, the more conservative investor will say, 'Why should I even bother?' "

But like many of the bill's provisions, the capital gains change has its sweet side. While long-term capital gains rates would increase from a 20% maximum under current law to 27%—the same top rate as ordinary income—the six-month holding period now required to qualify for preferential treatment would disappear. Thus, investors would enjoy a big tax cut for short-term capital gains, which are now taxed at up to 50%. "That's got to be wonderful for Wall Street trading," says John H. Makin of the American Enterprise Institute.

The effect of the bill on autos is tougher to gauge. Auto makers are unhappy about the potential loss of the investment tax credit and the curb on their customers' interest deductions. But they are elated over the proposed $100 billion tax cut for individuals. "Every car buyer would have a maximum 27% tax rate, which means more bucks to buy a car with," says Gerald Greenwald, chairman of Chrysler Motors Corp.

Capital goods manufacturers, and even some companies in the computer industry, may suffer an opposite effect. While the net impact on their taxes may be no worse than a wash, companies may find that their business customers, who could face higher taxes, may be reluctant to make big-ticket purchases. Over the long term, the Packwood bill should have little effect on capital cost recovery. The new depreciation schedules for equipment were designed so that faster write-offs would largely make up for the loss of the investment tax credit over the three- or five-year depreciation period.

FINE PRINT

The Finance bill, says Yolanda K. Henderson, an economist at the Federal Reserve Bank of Boston, "makes for greater efficiency in the allocation of capital. The new bill raises the cost of capital, particularly for debt-financed investment. But it would lower the cost of equity financing, as well as for land and inventories." For business borrowers, the reduction in the corporate tax rate to 33% from 46% sharply lowers the value of their interest deductions. Conversely, the profits on equity are taxed at lower top rates at the corporate level and when distributed as dividends, which should make equity financing cheaper.

Other aspects of this bill may jolt both individuals and corporations as they check the fine print. Many analysts believe that the end to the deductibility of sales taxes, restrictions on tax-exempt bonds, and the likelihood that states will follow Washington in eliminating deductions without making comparable rate cuts will result in higher state and local income taxes.

In fact, the Finance bill itself produces a federal tax increase for 1987. Taxpayers will lose many deductions starting next Jan. 1, but the rate cuts are not scheduled to begin until six months later. "A lot of people who get a rate cut in later years will get a rate increase next year," predicts Gillian M. Spooner, a partner in Touche Ross & Co.

The timing issue is a major concern to Lawrence Chimerine of Chase Economics, at least for the short term. "The stimulation to consumption will phase in slowly, whereas you'll see a sharp, quick cutback in investment projects due to the elimination of the ITC," says Chimerine. The stort-term effects on investment also trouble Robert G. Dederick of Northern Trust Corp., but the former Commerce Dept. official notes: "The structural changes may well encourage more productive kinds of investment."

In addition, some economists worry that the Finance bill is too good to be true and that it could result in the same kind of huge revenue loss that the 1981 tax reduction did. For example, the repeal of the investment tax credit raises a lot of money over the next couple of years, but faster depreciation write-offs will be costly in the future. Similarly, the tax shelter provisions are expected to raise considerable revenue at first, but that could dry up as individuals find creative new ways to shelter their income. "This bill is nowhere near revenue-neutral. In later years it's going to be a hemorrhage," predicts Lee J. Seidler, a managing director at Bear, Sterns & Co.

Despite its problems, the Finance plan is a far better starting point for tax revision than most businesses ever expected. From the beginning of the reform debate, proponents have argued the need for a "level playing field." If the Finance bill doesn't exactly smooth the landscape, at least it's demolished most of the hills.—*By Howard Gleckman in Washington, with Joan Berger, Elizabeth Ehrilch, and Norman Jonas in New York, and bureau reports.*

DON'T CRY FOR THE ACCOUNTANTS

"My first reaction was that they're taking away my livelihood," says an Oregon CPA who just left a national accounting firm to set up his own tax practice. "But I don't think the new tax bill will make things all that simple."

Don't cry for the accountants. Or the tax lawyers. Or the publishers such as Commerce Clearing House Inc. and Prentice-Hall Inc. that produce thousands of pages on taxes every year. Although tax brackets would shrink from 14 to 2 for individuals and most deductions would be eliminated, the proposal creates enough complexity for business taxes to keep the army of tax people gainfully employed through the millennium. "The new alternative minimum-tax provision alone will provide an automatic annuity for the CPA profession," says Lee J. Seidler, a Bear, Stearns & Co. partner and former Price Waterhouse accountant.

MASS CONFUSION

There has never been an income-tax change that actually shrank the number of rules and regulations. This one, despite its billing, is no exception. Tax experts say that the Internal Revenue Code will actually grow from 1,700 to about 2,000 pages, and there will be mass confusion as businesses convert to the new system. "I'll bet there are a lot of corporations calling their accountants right now asking how they can get rid of their tax credits," says Arthur W. Bowman, editor of Public Accounting Report. "Business transactions are still complicated as hell," says Albert B. Ellentuck, national tax partner at Laventhol & Horwath.

To make sure those deals are reported properly, the bill boosts the annual IRS

budget from $4 billion to $6.5 billion over the next five years. And the plan drops 6 million low-income people from the tax rolls. So the government will have more resources to put the squeeze on fewer taxpayers, mostly businesses and wealthy individuals. Since 1966, the percentage of returns audited has slipped from 5% to 1.3%. The government hopes to reverse that trend, which will keep CPAs busy representing the increased number of clients doing battle with the IRS.

NO MORE SHOE BOXES?

True, the small, "boutique" CPA firms that specialize in analyzing aggressive tax shelters will have to diversify. "A client who has a seven-figure income will be less apt to shelter when the rate tops out at 27%," says Stuart Becker, a New York accountant with a cadre of clients in the entertainment field. "And that will hurt my business. But we're trying to expand our practice into personal financial planning and deemphasize the tax-oriented investment."

The hardest hit will be storefront income-tax offices and mass-production houses such as H&R Block Inc. that cater to the average wage earner. Block's stock price has fallen from 45 to 40 since the plan was announced. Company officials say that it is a "great misconception" that reducing the number to tax brackets or deductions will radically simplify the preparation of tax returns. But, if nothing else, people who would have otherwise taken their shoe boxes full of receipts to Block may think twice: The fee is no longer tax-deductible.—*By Stuart Weiss in New York, with Vicky Cahan in Washington and Mark Ivey in Denver.*

REAL ESTATE: SO LONG, SYNDICATORS

It's optimistic and incorrigibly self-promoting, but one thing the real estate industry has never been is speechless. Until now. The tax-reform plan of Senate Finance Committee Chairman Bob Packwood (R-Ore.) has most builders, developers, and syndicators shellshocked. Some deals are being hurried, others scotched, and many are suddenly in limbo. "There is a tremendous amount of confusion and uncertainty. It's very chaotic and frightening to a lot of people," says Stephen Roulac, an industry consultant in San Francisco.

As the industry sifts through the peoposed changes, one thing seems clear: If it is passed intact, Packwood's bill will bludgeon an industry that is already bably bruised. How widespread the damage would be is impossible to calculate, but extraordinary overbuilding in the commercial market has made the industry less equipped to adjust to new rules than at any time in decades.

National vacancy rates for office buildings already have reached a debilitating 20.5%. But commerical space of all sorts now under construction—equal to a quarter of the space that already exists—will push them even higher, according to economist Robert A. Gough of Data Resources Inc. This massive overbuilding, predicts Chicago real estate mogul Samuel Zell, will create losses totaling $60 billion to $80 billion—and that's without considering the tax bill's effects. "There's going to be a lot of blood let," says Laventhol & Horwath partner Michael Amenta.

The $12 billion real estate syndication industry will start bleeding first. Because the bill phases out investors' ability to apply paper losses from real estate against their other income, sponsors may try to combine existing loss-generating deals with income-producing partnerships. That way, the losses wouldn't go entirely to waste. Still, as many as 40% of the country's syndicators—primarily small, private sponsors who devise aggressive tax shelters—could be badly hurt, according to Stanley Ross of accountants Kenneth Leventhal & Co.

"The ones who didn't diversify are going to be in real trouble" because they must continue to syndicate to survive, he says. Believing that even large, diversified sponsors will get stung, Wall Street drove syndicator Integrated Resources Inc.'s stock price down nearly 10 points, to 26¾, in a few days.

Public limited partnerships usually rely less on tax benefits, though the elimination of the 20% capital-gains rate and a longer depreciation schedule will trim their yields. Their sponsors would suffer mainly because the bill limits the deductibility of individual retirement accounts, a prime sales outlet lately.

RADICAL SURGERY

By striking a lethal blow at "abusive" tax shelters with outsize write-offs, the bill hits a choice target. But the fallout will include plummeting commerical property prices, reduced development, and an industry driven by drastically altered incentives. For years, a property's yield has consisted of cash flow from rents, price appreciation, and tax benefits. In knocking out the third leg, the bill completely changes the U.S. real estate market. And not all for the worse. "In the long run buildings will be built because they make sense, and I'm glad to see it," says one large developer.

The silver lining is that demand will have a chance to catch up with supply, says Arthur J. Mirante II, president and CEO of Cushman & Wakefield Inc. But first, commerical property values will fall because, without as many syndicators, there will be fewer buyers. Lower yields will discourage others and drive remaining buyers to lower their bids. "Any property that was valued primarily on the basis of tax benefits will have a material drop in value, perhaps as much as 20%," says Leventhal's Ross.

Texas would have to be declared a real-estate disaster area. Demand for distressed properties would dry up, because tax benefits offer the only persuasive argument for owning buildings that lack a solid cash flow. The real estate debacle could quickly explode into a banking problem. "It has the potential to be very severe," says a banking expert.

Meanwhile, the value of so-called institutional-grade properties with strong cash flows will probably hold up fairly well. Their owners, such as insurance companies and tax-exempt pension funds, have the money and patient to wait out bad times.

New construction, however, will slow dramatically. Already, "the flow of capital has come to a screeching halt," says J. McDonald Williams, managing partner of developer Trammell Crow Co. He says hundreds of development deals are floundering since Packwood's bill was born. While that halt is solely needed in the office-building market, it means many developers and construction workers will be idled.

Eventually, dwindling construction will allow landlords to raise rents some-what, but rents would have to soar before construction begins anew. Says Trammell Crow's Williams: "To get the same net after-tax returns, you'd have to have a 35% increase in rents."

That goes for apartment buildings, too, but single-family homeowners can breathe easy. Most observers believe that those property values will go unscathed. Though a 27% tax rate makes mortgage interest and property-tax deductions less valuable to top-bracket taxpayers, such deductions will be among the few that survive. Chief Executive Michael A. Feiner of MDC Holdings Inc., the third-largest homebuilder, believes that lower interest rates and new stock and bond market wealth will fuel strong housing markets for at least six more months, tax bill or no.

The rest of the industry is anything but blasé. Once real estate regains its voice, you can depend on one thing about Packwood's bill: Congress will never hear the end of it.—*By Ellyn E. Spragins in New York.*

WHY THERE'S NO UPROAR OVER IRAS

Only a month ago, banks, thrifts, and financial service companies pitched individual retirement accounts to millions of taxpayers with an unprecedented barrage of full-page ads, junk mail, and phone calls. Banks and thrifts stayed open until midnight, and workers for some mutual fund companies catnapped at their desks to keep the phones working around the clock. By most counts, the campaigns paid off. Taxpayers added about $40 billion in IRA assets this year, raising the nation's IRA pool to more than $250 billion.

But the tax reform plan approved by the Senate Finance Committee would eliminate the tax deduction for IRA contributions for people covered by pension plans—a move that has already brought individual protests to Capital Hill. Ironically, many companies that pursued IRAs as though their survival depended on them are barely protesting the loss of this potentially enormous business. "You have to look at the big picture," says Rupert H. Johnson Jr., senior vice-president of Franklin Resources, a $22 billion mutual fund giant. "Here's a onetime shot at overhauling the tax system, and you have to consider the benefit for the country as a whole."

HARDLY ALTRUISTIC

Johnson's altruism aside, most financial service companies stand to gain handsomely from the new tax-reform proposal, and that's why protests are only perfunctory. The dramatic slashing of tax rates will more than make up for the loss of the broadly based IRA. Brokerage firms and mutual fund companies pay high taxes, and cutting their top rates will boost profits enormously. Under the new bill, Dreyfus Corp. would clear $7.50 a share next year instead of a projected $6.30, and Franklin's 1987 bottom line could improve from $3 to $3.75 a share, according to John Keefe, financial services analyst for Drexel Burnham Lambert Inc. Stock in Dreyfus and Franklin Resources declined since the tax plan was announced, but those companies' shares had been dropping since February.

Since the new bill allows earnings of existing IRAs and new nondeductible contributions to be tax-deferred, the industry will still push IRAs. Vanguard Group, a mutual fund giant, plans to shift its IRA sales strategy from promoting the tax deduction to highlighting the tax-deferral provision.

In addition, the business the financial service companies lose from managing IRAs could be picked up elsewhere—with interest. Lower taxes for individuals will leave them more dollars to save and invest. And since the new tax proposal quashes many tax-sheltered limited partnerships, more of those dollars are sure to end up in stocks, bonds, mutual funds, and life insurance products such as tax-deferred annuities.

Tax-exempt bonds, an enormous business for Wall Street brokerage houses and mutual funds, should be a likely beneficiary of money that otherwise would have gone into IRAs. "You'll see some securities-industry lobbying for IRAs," says Perrin H. Long, securities industry analyst for Lipper Analytical Securities Corp., "but it won't be very hard."

Banks, with 27% of the IRA funds, and thrift institutions, with 22%, could be expected to rally round this valuable source of deposits. Yet industry leaders praise the overall tax package for preserving favorable treatment for loan-loss reserves and lowering tax rates for individuals far more than they bemoan the loss of the IRAs. "Frankly, none of us ever made money on the IRAs because of the intense competition," confides a New York City banker. Since banks and thrifts pay at least the market interest rate on IRAs, they shouldn't have difficulty replacing those deposits.

LEARNING TO LOVE

Some mutual fund operators are fighting the IRA tax changes. Fidelity Investments, for one, has sent letters to all its customers urging them to write to their senators and congressmen. The Investment Company Institute, the funds' trade association, has launched a major public relations campaign urging taxpayers to do the same.

The biggest problem with defending the IRA, admit its supporters, is a lack of strong evidence that IRAs actually increase national savings. In fact, the savings rate dropped from 6.7% to 4.6% since the introduction of universal IRAs in 1982. David A. Wise, a Harvard University economist, argues that half the IRA contributions is money that otherwise would have been spent, but this view is not widely shared.

The ordinary folks who've grown fond of the IRA as an easy way to shelter $2,000 of income may not give up on IRAs as easily as the industry. If constituents howl loudly enough when their legislators return home for the Memorial Day break, they could force Congress into preserving the deduction in some form. But so far there's been no groundswell of taxpayer protest. It may be that the general public has already learned to love the Packwood package.—*By Jeffrey M. Laderman in New York, with bureau reports.*●

JERRY SCHALLER

● Mr. DURENBERGER. Mr. President, with the other members of the Minnesota delegation and many others in our State and Nation, I have recently mourned the passing of a talented and compassionate man, Jerry Schaller. Many of us knew Jerry Schaller through his professional activities, his work on Capitol Hill as an aide to Congressman Karth, Senator Humphrey, and Senator Mondale. We also knew him through his work for the Minnesota-based 3M Corp. and his presidency of Joint Action in Community Service, Inc. [JACS], an innovative organization devoted to assisting graduates of the Job Corps Program to carry out what they have learned.

However, it is important for all of us who knew and respected Jerry, and he was well known and certainly respected in this town, to look at the personal side of Jerry's life, to understand the energy and commitment that fueled his efforts in his professional life. At Jerry's funeral mass in late March a eulogy was delivered by his friend and colleague, George Spellman, one of Jerry's coworkers at JACS, which I would like to share with all of you. It takes us a step closer to realizing what a great friend we had among us. I ask that following my statement the Spellman eulogy be printed in full.

The statement follows:

EULOGY

Reverend Father Byron, reverend fathers, relatives, distinguished guests, and friends of Jerry Schaller.

When thinking about preparing a eulogy for Jerry Schaller, one must begin by thinking clearly about Jerry and his relationships to organizations and to people. By knowing what Jerry did—can lead us to discover who he was. And as we all know, he did so many things for so many people in the short period of his sixty years.

His litany of organizations included political, charitable, business, educational and professional groups. It was not that Jerry was a "joiner," for he spent a great deal of energy deciding which associations were worthwhile of his time and talents, his gifts, and graces, but it was because he believed in organizations and institutions with noble objectives.

Primarily, Jerry was a very good politician. He loved working "the Hill." He knew that wonderful things could be achieved by the political process and spent most of his adulthood in this arena. He was a very proud Democrat and worked zealously on behalf of his party on both the State and national levels. He served Congressman Karth and both Senators Humphrey and Mondale with distinction.

Jerry was a professional Washington representative of the 3M Co. Not only was he a proud member of the corporate team, he was a founding board member of the Bryce Harlowe Foundation which seeks to promote standards of excellence in lobbying activities.

While at 3M, many of us received the ditty box at Christmas, just in time to use the 3M tapes on our Christmas wrappings—a very thoughtful and practical gift. And although Jerry was a part of 3M management, he remembered being raised in the labor movement and always believed that organized labor played a vital part in our economy to promote free enterprise. What other person do you know who read the great social encyclicals—rerun novarum, quadragesimo anno and pacem in terris?

Jerry spent a lot of time doing things he enjoyed. He loved his flowers and garden; he enjoyed playing golf and strolling down the fairways of the Argyle Country Club. He couldn't hit the ball very far but truly enjoyed winning a $2 Nassau with a very fine putter. He was an avid Redskin fan and loved to attend those brisk Sunday afternoon games which reminded him of Minnesota. One of his favorite activities was talking and debating—once when he had his throat operated on a few years ago, his worse punishment was not being able to talk for a week. All of us welcomed the break. Have mercy on us.

The finest part of his character shone clearly forth as the volunteer president of Joint Action in Community Service [JACS]. JACS helps young people after their job corps training. Jerry wanted to be part of this volunteer program and always talked about JACS and the Job Corps. He served admirably for the past twelve years. That was Jerry Schaller—always helping and caring—getting someone a job; giving money; getting money for worthwhile causes; understanding the relationship between philantrophy and voluntarism. He had a consummate sense of justice and knew that charity could only be practiced after justice was served. He was involved in helping the marginal populations; he cared about race relations; he worked quietly in the women's movement and had a very special place in his heart for the poor and the underprivileged. He believed everybody should have a second chance in our society no matter what their social status. He was so recognized by his alma mater St. Thomas in 1982 as the recipient of their humanitarian award.

Finally, Jerry was a good husband and father and grandfather. With those he loved, he had very high expectations of them and of himself. Oh, there were times when he would yell and give commands. Yet he always made time for those he loved and those who needed him. His good humor and quick smile added to that relationship.

So, when thinking about Jerry and his relationships to organizations and people, we come to placing all his activities within the context of his deep abiding faith in his God and in his church. He was truly a Vatican II Christian.

Over the past several years, Jerry would make his Easter retreat to Loyola on the Potomac to spend a few days in prayer and meditation in preparation for Easter. In fact, today is the day his colleagues would leave for Loyola to pray. Jerry believed in the resurrection and now has experienced the promise of Christ. His life has not ended: It has been changed.

You have taught us much, Jerry Schaller, and we thank you. It is my fervent wish that we will continue to live a life of caring which you showed us how to live.—George F. Spellman, executive vice president, JACS.●

IN REMEMBRANCE OF TERRY REILLY

● Mr. DURENBERGER. Mr. President, I would like to bring to my colleagues' attention an individual who I had the good fortune to know, albeit briefly, and his significant contributions to improving rural health care in this country. Terry Reilly, of Nampa, ID, was tragically killed in a plane crash a few weeks ago. He was traveling throughout the State, campaigning for lieutenant governor, when his plane went down.

Terry testified at a rural health hearing I held in Minneapolis early in April. He impressed me there as an intelligent, caring, and dedicated individual.

Running for lieutenant governor of Idaho was only the most recent example of Terry's commitment to public service. He also made many worthwhile contributions to rural Idaho that deserve mention, Mr. President.

Since 1971, Terry had been the administrator of Community Health Clinics, Inc., in Nampa, ID, a nonprofit

health corporation that operates five family practice medical clinics throughout the State and also is involved with a home health agency, a rural consortium of mountain clinics, a drug store, and two sexual abuse treatment centers. I explain this, Mr. President, to illustrate the fact that through Terry's leadership, Community Health Clinics, Inc., furthered its commitment to providing rural health care in communities where no other health care exists, in a State that has only one city with a population over 50,000.

Terry was also a leader in focusing national attention on rural health care. He offered his experience and expertise to the National Rural Health Care Association, as a founding member and past president of that organization.

Mr. President, Terry Reilly will, of course, be missed very much by his family and friends. His death is also a significant loss to those who have been the beneficiaries of his leadership in rural health care, both in Idaho and throughout our country.●

NAUM AND INNA MEIMAN: 10 YEARS OF STRAIN

● Mr. SIMON. Mr. President, Naum and Inna Meiman are personal friends of mine who reside in the Soviet Union. They have asked to leave the Soviet Union to emigrate to Israel, but they have been refused many times.

Naum is a mathematician by profession and performed calculations for his job 25 years ago. Despite the fact that these calculations are outdated, Naum continues to be told that he possesses state secrets, a ridiculous claim. Inna has been told that she cannot leave to obtain medical treatment because she has lived with Naum, the possessor of state secrets for too long. Naum and Inna have been married for 5 years, 20 years after Naum did his calculations.

The Meimans are an elderly, sick couple whose only desires are to emigrate to Israel and to see their daughter, Olga, who lives in the West.

I strongly urge the Soviets to allow the Meimans to emigrate to Israel.●

HIGHWAY BEAUTIFICATION

● Mr. GORTON. Mr. President, last July I introduced S. 1494, a bill which would amend the 1965 Highway Beautification Act to make it at last an effective mechanism for regulating billboards. Twenty-one years after the enactment of the original act, the visual pollution alongside our Nation's highways has grown steadily worse. State and Federal taxpayers have spent $2 million thus far to be rid of this roadside pollution. All we have gained is an increase in the number of billboards to the point where we have 14 billboards for every 10 miles of Federal highway, and over 150,000 of those billboards are illegal or nonconforming.

I am happy to report that the battle to reform our billboard laws is not being fought by an unusual and broad-based coalition including, the Reagan administration, the Sierra Club, the National Wildlife Federation, the National Audubon Society, the American Institute of Architects, the National Taxpayers Union, the National League of Cities, the American Society of Landscape Architects, the Environmental Defense Fund, the Environmental Policy Institute, the Garden Clubs of America, the Izaak Walton League, the National Parks and Conservation Association, the National Trust for Historic Preservation, the Natural Resources Defense Council, Preservation Action, and the Wilderness Society.

In a recent letter, the Secretary of Transportation, Elizabeth Dole, strongly endorsed the reforms contained in S. 1494 and stated that she "wholeheartedly agrees that the current law is unworkable and in great need of change." Secretary Dole's strong support is indicative of the sentiment across the country that now is the time to make these billboard reforms the law.

Mr. President, I am including a copy of the letter from Secretary Dole which I respectfully request be printed in its entirety in the RECORD after my statement.

S. 1494 will change the present law in several ways. First, the bill would replace a moratorium on the construction of new billboards in urban areas, similar to the present ban on constructing billboards in rural areas. The ban would not apply to the types of signs that are presently exempted in the act, such as directional signs, or on-premise advertising. The bill would also eliminate an enormous loophole that permits billboards to be built in rural unzoned commercial or industrial areas, despite the clear intent of the act to ban the construction of new billboards in rural areas.

The billboard industry has enjoyed the unusual position, as polluters of the Nation's highways, of being paid not to pollute. A 1978 amendment sponsored by the billboard industry requires billboard owners to be compensated in cash for the removal of billboards that are nonconforming because of the act. The General Accounting Office found that often billboard owners do not actually remove the billboards for which compensation has been paid. Additionally, the billboards proposed for compensation are ones that have ceased to be valuable to the billboard owner because of changes in the highway system, and likely would have been abandoned anyway.

This subsidy of the industry is particularly egregious in these times of severe budgetary constraints. S. 1494 will remove the requirement to compensate in cash for the removal of nonconforming signs and will authorize the use of amortization as a means of compensation. The General Accounting Office has estimated that the financial liability for the cash compensation provision could total nearly $1 billion. Additionally, removal of this requirement will return to State and local governments the ability to impose stricter regulations on billboards than they are presently able to.

This Nation spends hundreds of millions of dollars every year to protect natural and scenic areas for their wildlife, recreation, scenic, and other natural resource qualities. We clean up polluted water and air and control obtrusive noise. Yet, billboards remain a virtually unchecked blight on the Nation's highways. I am optimistic that—with the backing of this dedicated coalition—we have a good chance of finally winning the battle against billboards.

The letter follows:

THE SECRETARY OF TRANSPORTATION,
Washington, DC, April 11, 1986.

HON. SLADE GORTON,
U.S. Senate, Washington, DC.

DEAR SLADE: Thank you for your letter concerning reforms to the Highway Beautification Act. I agree with you wholeheartedly that the current law is unworkable and in great need of change.

When I testified before the Senate Committee on Environment and Public works on March 6, I emphasized the importance of reforming the highway beautification program. We must end the federal compensation requirement and allow state amortization laws to control. We must reduce the cost of the program to taxpayers. We must tighten limitations on construction of new billboards in rural areas, where billboards intrude upon natural beauty. Equally important, we must end inappropriate interference with state and local zoning laws and billboard removal programs. We must simplify the program's administration.

The Department supports your efforts to gain enactment of these provisions, as well as other provisions consistent with our approach. Your efforts are even more important in light of changes considered by the House last year which would place additional financial burdens on taxpayers and perpetuate the current unworkable program which adds little to scenic beauty.

I look forward to working with you and other members of the Senate who understand the high cost and small benefit of continuing the current highway beautification program to gain inclusion of mutually acceptable provisions in the Senate's highway bill.

The Office of Management and Budget advises that there is no objection to the submission of these views to the Congress.

With best wishes.

Sincerely,

ELIZABETH HANFORD DOLE.●

● Mr. EVANS. Mr. President, the Highway Beautification Act of 1965, launched with great fanfare and hope

to rid the American highway landscape of billboard blight has become instead a Billboard Protection Act. Drilled full of holes by the billboard industry, the act encourages billboards in zoned and unzoned commerical and industrial areas, and now more billboards are going up than coming down. In 1978, the billboard industry got the Congress to require that all States pay cash compensation to billboard owners for the removal of nonconforming billboards even if it was State or local law that made the signs nonconforming.

Before Congress stopped providing appropriations for this purpose in 1982, over $200 million in Federal and State matching funds were handed over to billboard owners, providing them the opportunity to use these cash payments to put up bigger billboards along the same stretch of highway from which the nonconforming signs were removed. This ingenious recapitalization scheme ended when appropriations were cut off, but the cash compensation requirement remains. As a result, removals of nonconforming signs have ground to a virtual halt. Today, according to the Federal Highway Administration, 112,000 nonconforming signs remain standing 20 years after implementation of the act. Because the law applies this cash compensation requirement to signs declared nonconforming under State and local law, as well as Federal law, State and local land-use powers have been undercut. Both the General Accounting Office and the Department of Transportation's Inspector General have documented the act's deficiencies and failures and pointed the way toward reforms.

Legislation I introduced last year along with Senator GORTON, S. 1494, would produce the reforms that the highway beautification program sorely needs. Its provisions include a ban on the erection of new off-premise billboards along Federal-aid highways. It would repeal the law's cash compensation requirements, turning back to States and localities their authority to regulate billboards. It would also prohibit several outrageous abuses permitted under the law, including the erection of billboards in phony, unzoned commerical and industrial areas and the billboard company practice of making signs more visible by chopping down publicly purchased trees, shrubs, and other landscape materials on the public right of way.

Senator GORTON's and my efforts to stop billboard pollution date back to 1961 when we sheparded a major billboard control law through the Washington State Legislature. Other States have passed billboard control laws since then. Unfortunately, the Federal Government has actually impeded State efforts to remove unsightly billboards.

In recent months, the public has awakened to the fact that the failure of the Highway Beautification Act is turning our highway landscapes into visual slums. The public outcry against this pollution is reflected in the increasing attention that newspaper editors have paid to the problem. In newspapers large and small, editors are calling for an end to the game of billboard shuffleboard that the billboard companies have established in the law. I would like to share with my colleagues a number of editorials that have appeared over the last year or so to demonstrate the growing public support for action to halt billboard blight. I ask that these editorials be printed in the RECORD.

The editorials follow:

[From The Washington Post, May 3, 1986]

BILLBOARD INDUSTRY EYES LOCAL OFFICIALS

Campaign contributions and posh junkets for members of Congress—courtesy of the powerful billboard industry—have been the subject of recent columns. At least one sign company has been discussing how to reward its friends and punish enemies at the local level as well.

Our associate Stewart Harris obtained a copy of tactics discussed by Naegele Outdoor Advertising Co., third largest in the country, during a company seminar in Minneapolis four years ago A Naegele spokesman insists that the ideas were presented only for "discussion purposes" and that Naegele doesn't use them.

Among the suggestions were to give the local mayor free billboard space for his favorite charity. "The mayor (being a politician) will recognize the value of being able to get credit for favors to various civic-minded persons," the agenda explained.

Critics accuse the industry of using variations of this tactic, as when a billboard company fighting a court suit in Des Moines erected a sign saying: "A Shriner never stands so tall as when he stoops to help a crippled child."

The judge presiding over the billboard suit was a Shriner in the neighborhood where the sign was posted, according to the Des Moines city attorney.

During the Naegele seminar, company executives discussed ways to oppose anti-billboard campaigns. The agenda included such things as the number of votes required on a city council, the mayor's and city attorney's ability to help—and a cryptic question: "Bribe suggested?"

The last was on the agenda as a "preventive measure" so company officials would know how to turn down a city official proposing a bribe, the spokesman said.

For the record, a two-year FBI investigation in North Carolina led to the 1985 conviction of a Naegele official there on charges that he ordered company employes to falsify their income tax forms to avoid taxes on bonuses they had passed along to local politicians as campaign contributions.

Footnote: Until last fall, a media conglomerate called Ackerley Communications had been a good friend to the American Heart Association. The company for years had given the association free billboard space for its public service announcements.

But then the Heart Association stepped over the line: It voiced its opposition to billboard advertising of cigarettes. The tobacco industry, along with the liquor and airline industries, is one of the major clients of billboard companies like Ackerley.

In a memo dated Nov. 14, 1985, a top Ackerley official instructed the company's billboard, radio and television subsidiaries to cease the donation of air time or billboard space to the Heart Association.

"Their position on cigarette advertising is not compatible with our company," the memo explained. "Please consider this to be the same as the American Cancer [Society]; we will no longer give either organization any support."

Ackerley rescinded the memo so fast that the Heart Association never noticed any interruption in the posting of their public service announcements on airport billboards.

[From the Durham (NC) Herald, May 4, 1986]

THE BILLBOARD SUBSIDY

Strange, isn't it, how government's solutions turn into costly problems? That has been the legacy of Lady Bird Johnson's highway beautification program.

It began as a beautification program to chase billboards off the sides of federally financed highways. But the billboard industry's lobby has finessed Congress into making beautification as subsidy for the sign-makers.

Here is what has happened. The 1965 law was intended to clear the nation's highways of unsightly signs. The billboard industry has wrangled out of Congress loopholes that allow the federal government to pay for sign removal. So far, the government's cost has been $200 million.

Indeed, signs have been removed—the ones the sign companies didn't want because of location, condition or visibility. While the government has subsidized their removal of unwanted signs, they have continued to put up new ones, often clearing out lovely trees to make them visible.

The result has been no fewer signs. In fact, the twists in the beautification act have made government an accomplice to the visual assault.

It's time to get back to the original intent of the Highway Beautification Act. Sen. Slade Gorton, R-Wash., has introduced legislation that would do that. He would end the federal subsidy for sign removal, ban new billboards along federally subsidized highways and prohibit tree-cutting to make signs more visible. His bill also would give state and local governments more leeway to crack down on unsightly signs.

The billboard industry is fighting the Gorton bill, as one might expect, but the bill is gathering support. One endorsement came from Elizabeth Dole, Secretary of Transportation, who says she would like to end the "perpetual subsidy" and signs that "violate our landscape and assult our senses wherever we turn."

We agree.

END THE BILLBOARD SUBSIDY

It's time to discontinue Lady Bird Johnson's highway beautification program, which has been transformed into a device to subsidize the billboard industry.

The intent of the 1965 law was entirely worthwhile. The legislation was aimed at clearing the nation's highways of unsightly signs. But because of loopholes and amendments pushed through Congress by the billboard lobby, the act simply isn't working as planned.

The federal government has spent nearly $200 million to compensate billboard compa-

nies for removing signs. But almost as fast as the billboards come down, new ones sprout up.

Under the current law, the federal government puts up 75 percent of the cost of compensating companies for sign removal, with states and local governments contributing the other 25 percent. What happens in many cases is that billboard owners take down their least profitable signs and erect new ones at other locations. Sometimes, companies take the money to remove signs and simply leave them standing.

In addition, billboard firms frequently cut trees and other foliage on highway rights of way so their signs can better be seen.

The federal law also is tying the hands of states and municipalities that want to get tougher with billboard owners.

Sen. Slade Gorton, R-Wash., has introduced legislation to change the law. He would end the federal subsidy for sign removal, ban new billboards along federally subsidized highways, prohibit tree cutting to make signs more visible, and give state and local governments more leeway to crack down on unsightly signs.

The billboard industry is fighting the Gorton bill, for good reason. Not only have the sign companies succeeded in defanging Lady Bird Johnson's highway beautification legislation, but they also have so far reaped a $200 million windfall from the federal government.

But Gorton's proposal has just received an endorsement from Secretary of Transportation Elizabeth Dole. Maybe between the two of them, they can end what Gorton calls a "perpetual (federal) subsidy to the billboard industry to remove signs that violate our landscape and assault our senses wherever we turn."

THE NEED TO CONTROL BILLBOARDS

[From the Charleston (S.C.) News & Courier, July 22, 1985]

In defense of the indefensible, people often come up with ridiculous arguments. Defending signs and billboards from reasonable regulation on the grounds that a sign ordinance interferes with freedom of speech is an example of sublime ridiculousness.

It is the equivalent of defending the right of a drunk to yell at passers-by on the grounds of freedom of speech.

The proliferation of monster billboards and signs has finally got the goat of Charleston City Council and at their last meeting, on Tuesday night, they got around to doing something about this blight on our otherwise fair city. Council has been talking about action for a long time now, so it was encouraging to see a unanimous vote—with the inexplicable abstention of Councilman Baker. But the new sign ordinance faces considerable opposition and Tuesday's meeting merely gave it initial approval. Although it would outlaw about half the existing signs in the city, we consider the measure conservative.

For far too long, the city's authorities and its inhabitants have been putting up with ugly, oversized signs and billboards. Although they are silent, they are the visual equivalent of obscene remarks. People should be protected from such assaults on their senses. Far from interfering with freedom of speech, the proposed ordinance would protect our human rights from daily violation.

[From the Baltimore (MD) Sun, May 20, 1985]

NEW FIGHT AGAINST BILLBOARDS

(By Neal R. Peirce)

HOUSTON.—Texas-scale antidote is shaping up for a glaring failure of the Great Society era—the Highway Beautification Act, a proven paper tiger against the thousands of billboards blighting America's highways.

Passed at the behest of Lady Bird Johnson, then First Lady, the 1965 law has turned into a textbook case of how a law can be gutted by the industry it's supposed to regulate.

In 1978, the sign barons pushed through Congress an amendment requiring government compensation for any billboard removed under state and local control laws. That hobbled local controls but escalated costs so drastically that appropriations dried up.

The billboard companies pocketed millions of federal dollars paid them to remove offending signs—probably using the money to erect more signs elsewhere. The number of billboards on federally funded highways has soared to over a half-million. Now we have jumbo signs—up to a house-sized, 2,500-square-feet ones.

Are billboards necessary—as the sign lobby claims—to economic prosperity? Hardly: Hawaii, Vermont and Maine, the three states that banned the boards altogether, have done swimmingly without them. For tourists, small uniform signs with commercial logos are a welcome—and reliable substitute.

Billboards may start toppling elsewhere as a broad-based citizen movement to curb the signs grows. Even heavyweight developers who see their own projects imperiled by the signs have joined.

Texas is in the lead, Houston, first in America in billboards per capita, passed a law in 1980 limiting sign height and size as of 1986. The billboard lobby in 1983 persuaded the Texas Legislature to require cash compensation by cities to owners of banned signs. Governor Mark White vetoed the bill; this spring the billboard lobby is pushing it again in Austin.

But now Houston has more allies. Rita Ellison, the scrappy executive director of Billboards Limited, claims support from an array of Texas cities that have also proclaimed billboard moratoria—Dallas, Fort Worth and Austin among them. San Antonio Mayor Henry Cisneros has organized the Texas Municipal League behind the fight.

Atlantans, worried about an onslaught of billboards (doubled to 3,000 in the last five years), have been stymied by the billboard lobby. But Tulsa homeowners showered Mayor Terry Young with protest signatures bearing 7,000 signatures, and Mr. Young pushed through a billboard moratorium that approved most of the controls a study commission recommended. And Orlando, Fla., has a new city report recommending major stiffening of its sign ordinance.

But when cities put in controls, suburbs rarely show enough sophistication to follow suit. The prospect, as cities reduce the boards and regain control of their vistas, is that they'll be billboard-free islands surrounded by rings of visual pollution.

Not a single victory over the signs has come without a bitter, dragged out fight with the billboard lobby. It's hard to think of a tougher—and more often successful—pressure group than the Outdoor Advertising Association of America. Its political power ranges from Congress to the influence it curries through targeted contributions in city council races.

In one local fight after another, the billboard lobby has packed hearing rooms, intimidated opponents, and when defeated, has litigated nonstop to prevent controls from taking effect. Local media often don't take up the cudgel. They also advertise on billboards, or are tied to parent corporations with billboard subsidiaries.

Polls show a solid majority of Americans for billboard controls. But until the recent citizen revolt, with its critical business allies, got started, their voices have usually gone unheeded. Now a Coalition for Scenic Beauty, its Center for Sign Control headquartered in Washington. Is coordinating anti-billboard efforts nationally.

One senses the billboard gang has reached the zenith of its power, while the anti-forces are just gaining steam. They say that commercial sign controls aren't, as claimed, an illegal "taking" or infringement of free speech, but rather legitimate city action, affirmed by the Supreme Court, to protect citizens from "visual assault"—and add that intrusive, often mammoth, signs are the only users of public highway rights-of-way that don't pay user fees. They say the sign lobby, in states from Tennessee to California even has gained power to chop down trees—in California a beautiful eucalyptus stand was destroyed—to make sure motorists see their signs instead of the scenery.

Victories for the citizen billboard-control groups come painfully, slowly. But it's hard to believe Americans won't soon demand a purge of the unsightly billboards.

[From the Atlanta Constitution Dec. 12, 1983]

BILLBOARD INFESTATION GROWING WORSE

I think that I shall never see
A billboard as lovely as a tree.
Indeed, unless the billboards fall,
I'll never see a tree at all.

Or words to that effect by Ogden Nash. Or maybe it was Samuel Hoffenstein. Somebody like that.

So now comes word—and who is surprised by it?-that the infestation of billboards in Atlanta continues apace; indeed, is accelerating. The suppose billboard-control ordinance enacted by the City Council last year was fabricated from loopholes, written as much by the billboard industry as by the Council. It was a billboard-*adding* law, not a billboard-subtracting one.

Just look around (if you can). City Hall, handed out 470 permits last year. This year, it has issued 701, with the greatest increase in the biggest signs. The number of permits rose by 126 from 1981 to '82. It has jumped by 231 so far this year. Some control.

The Urban Design Commission, with broad support from civic, business and neighborhood groups, has called for a six-month moratorium on billboard construction and for stricter regulations. The moratorium may be impractical, but increased restrictions—and sharply increased at that—are impractical only if the Council remains more solicitous of the billboard lobby than of the city's good looks and the interests of its residents and visitors.

Cobb County is considering strong new regulations, before the situation gets out of hand. Fulton and DeKalb counties allow just five billboards per mile of roadway, and then only on U.S. and state highways. Decatur banned them in 1974.

Atlantans are bear-people. We live in the woods. Our trees are one of the city's great-

est charms and most pleasing (and cost-efficient) amenities. We shouldn't deny ourselves, or others who are visiting us, the pleasures of seeing them.

And if the billboards keep kudzooming,
Growing like weeds and higher looming,
There's something else we soon won't see:
From corner to corner along Peachtree.—
Anonymous.

[From the News-Sentinel, Knoxville, TN, Jan. 11, 1985]

BEAUTIFICATION BACKFIRES

Imagine a federal program that paid a company to stop polluting in one place but allowed it to turn around and do the same nearby.

Now stop imagining and meet the highway beautification program. This legacy of Lady Bird Johnson's initiative may be the best thing that ever happened to the billboard industry, which some regard as being in the business of visual pollution.

While companies have been pocketing millions in federal dollars, thank you, to remove offending signs, they simultaneously have erected even more signs elsewhere. The net effect: Many roads stay cluttered and highway beautification often remains a distant dream.

It wasn't supposed to work that way. Part of the problem lies in sheer neglect to enforce the law. But the law itself is flawed, too, full of loopholes that permit the billboard industry to conduct a shell game: Take one sign down here but put up another there.

Two recent reports, by the Transportation Department and the General Accounting Office, spell out the magnitude of the failure. Nearly $200 million has been spent in compensation for the removal of signs, but nearly half a billion more would be required to take down the remaining billboards officially listed as "non-conforming." And even that wouldn't end the problem.

Fortunately, not all is bleak in the world of billboard pollution. Six states have banned billboards altogether. Others have imposed stringent size and placement standards, or, like Florida, restricted them from some highways.

Many local governments have done their part, too.

In fact, given the confused state of the law, it's wise the Reagan administration hasn't asked for money for the program since 1982. If more is to be spent, a moratorium is needed on highway billboard construction. In addition, billboard operators ought to be denied the privilege to cut down foliage on public land. In states such as Louisiana, stretches of trees as long as 2,000 feet have been clearcut so that motorists can see signs.

The same thing is happening in the Knoxville area and many News-Sentinel readers have complained about it.

Perhaps the best recommendation comes from the Transportation Department: Scrap the compensation program and adjust the law so that states can require the removal of signs after owners have amortized their cost.

Considering the disappointing results of nearly $200 million spent so far, why risk more than twice that much in the future?

[From the Courant, Hartford, CT, Feb. 2, 1985]

HIGHWAY UGLIFICATION

The results of a 20-year government campaign to beautify main U.S. highways by removing billboards are discouraging. Two federal reports show not just disappointing progress, but significant regression. The chief culprits seem to be congressional pliancy and executive branch lethargy (or apathy), but the billboard lobby is a factor, too.

Since passage of the Highway Beautification Act of 1965, nearly $200 million has been spent by the federal government to compensate billboard owners who took down their signs. What's to be shown for the effort and expense? The absence of about 600,000 billboards that once cluttered the landscape along interstate and primary U.S. highways.

Unfortunately, something else is also showing the almost 200,000 illegal and nonconforming billboards that are still standing beside those roads. Also painfully evident are the crews that have been putting up new billboards faster than the old ones could be taken down.

The reports suggest that the federal government, even while trying to control billboard proliferation, has also been stimulating it. The U.S. Department of Transporation's inspector general said compensated billboard owners often used the money to erect new signs, sometimes on the highways where their old ones had stood.

Both the DOT report and a report by the General Accounting Office, an arm of Congress, noted that the law was so feeble that it often allowed billboard companies, in order to make their signs easier to see, to destroy trees and shurbs that had been planted for beautification.

Sometimes state money helped pay for cutting down the plantings.

Loopholes weren't the only problem. The executive branch, the reports indicated, hasn't aggressively monitored state enforcement of the beautification act, and they said too little has been allocated for enforcement during the Reagan administration.

About $500 million would be needed to remove the remaining billboards, the GAO report said, but only $15 million is earmarked for that purpose. Nor does the Reagan administration seem interested in enforcing the law: Since 1982, it hasn't sought any money for the beautification program.

Expecting a new enforcement effort would be naive, but a recommendation in the DOT report could help: Instead of continuing to pay billboard owners for removing signs, the report says, state or local governments should be given the power to simply order billboards taken down after giving owners time to amortize their investment.

Although amortization is a fair and effective approach, the billboard lobby probably would vigorously oppose it, since it could cut into profits. But if such a step can regain some of the ground lost in the war against visual pollution along the nation's highways, it's worth taking.

[From the Times-Union, Rochester, NY, Jan. 14, 1985]

BILLBOARDS OUT OF CONTROL

The Highway Beautification Act of 1965, a pet project of Lyndon and Lady Bird Johnson, was supposed to make the nation's highways more scenic and perhaps safer by removing unsightly billboards. Nearly 600,000 have been removed.

However, say recent reports by the General Accounting Office and the Department of Transportation, some 200,000 illegal billboards still stand, and more signs are going up than down.

Billboard owners have been paid $200 million in compensation for removing their signs. But some never took them down, and some used the money to put up new signs just down the road.

How could this happen?

Partly because federal enforcement has been lagging; partly because many local governments and some states would rather collect a permit fee than turn down a billboard application.

There are exceptions. New York is fairly strict about billboards; six states ban them altogether. But in other states, billboard owners who want unobstructed views of their signs receive state funds to chop down the very trees that were planted with federal beautification money!

A 1978 amendment is especially onerous. Until then, the federal law had applied only to rural roadsides; local governments could enforce local billboard ordinances and remove boards without paying compensation. But billboard lobbyists convinced Congress that cities and towns should also be required to pay for removal.

For cities like Seattle and Portland, Ore., that are trying to clean up their looks, the costs will run into the millions.

Enough! Congress ought to make up its mind. If it wants states and cities to wrestle with the problem, it should repeal the compensation requirements that tie the hands of local officials, and let them choose between clutter and scenery that gives pleasure and attracts tourists.

If Congress wants clutter-free highways—which it should—it ought to pass a tough law. No new billboards, period. Tax billboard owners, who use public highways for free access to a captive audience, to remove nonconforming signs. Penalize states that don't cooperate. And mean business.

[From the Evening Sun, Baltimore, MD, Jan. 11, 1985]

HIGHWAY BLIGHTIFICATION

A sad story of recent days was the one about billboards along U.S. highways. For some while, after passage of the 1965 Highway Beautification Act of Lyndon and Lady Bird Johnson, outdoors really did look better. Shrubs were planted, screens obscured the view of junkyards, the outdoor-advertising industry removed some of its billboards.

How things have changed. Separate reports from the General Accounting Office and the federal Transportation Department indicate that three times as many new billboards are going up as old ones disappear; that the very trees planted to make America beautiful again are being busily cut down, so drivers and passengers will have an uninterrupted view of the ads.

Since 1982, GAO notes, no money has been budgeted for highway beautification.

The cynical will say that the program was doomed from its start, when the outdoor-ad boys backed off the requisite 600 yards or so from the interstates and put up their offensive eyesores all over again, only bigger, to compensate for the distance.

The ingenuous will say that before long billboards won't seem so garish; you'll hardly see them for the air pollution.

[From the Oregonian, Portland, OR, Jan. 26, 1985]

SCENIC ROADS LOSING

Lady Bird Johnson's chief legacy, the beautification of America's highways, is being lost, eroded away by fund shortages,

bureaucratic cynicism and, not least, the 1978 Hyde amendment that made it more difficult to remove signs, even those blighting the views. Starch must be injected into the Federal Highway Administration, charged with enforcment, and the Congress must come up with legislation that is not a prisoner of the billboard industry. Also, greater support is needed for local efforts to clean up the blighted highways and streets of America.

In many states, more signs are going up than are coming down. Local jurisdictions, such as Portland and Multnomah County, are under constant pressure from the billboard owners. Communities are losing more battles than they are winning.

Two federal agencies, the General Accounting Office and the Transportation Department, have issued reports this month indicating that the Highway Beautification Act of 1965 that Mrs. Johnson sponsored, has failed to accomplish its goals of making highways more scenic and safer by removing advertising billboards.

Aesthetic values are being destroyed not only by the signs but by a policy that permits clearing of trees and vegetation along federal highways so nonconforming signs can be seen. non-conforming signs were legal when the law was passed. To get rid of them, the government must buy them, and it has paid for 600,000, while some 200,000 remain. Illegal signs, which can be removed anytime, are also proliferating, and enforcement agencies are ignoring them.

In 1984, Congress and the administration lost their enthusiasm for the program, and no money was appropriated for removal of non-conforming signs. About $427 million is needed to get rid of the remaining non-conforming signs. But money may not be the most important part of the problem. Signs are not always taken down even when they have been purchased.

A group called the Coalition for Scenic Beauty is lobbying for new legislation, it has stated, because the current laws are failing to meet original objectives to remove highway blight and prevent it from spreading.

A combination of legal loopholes, ineffective enforcement and congressional apathy is a greater contributor to the failure of the program than a lack of financing. In some areas, tough local zoning laws were getting the signs down, but passage of the act preempted these laws, so some communities have lost ground under the program.

In addition to pressuring Congress, the public needs to get behind local groups that have been waging the uphill battle. The Oregon Roadside Council has been in the arena since 1932. It fights billboards, monitors enforcement and has pinpointed what it considers about 100 illegal billboards in the Portland area.

[Eugene (OR) Register Guard, Jan. 23, 1985]

SCENIC POLLUTION PERSISTS

Some Oregon cities—Portland, for sure—still have a long way to go in controlling billboards and other forms of visual blight. But, as a state, Oregon has established reasonable controls over roadside advertising in the 20 years that have passed since Lady Bird Johnson pressured Congress into enacting the Highway Beautification Act.

Moreover, Eugene, Springfield and a number of other cities have adopted sign ordinances that contribute to their sightliness while still allowing merchants and other advertisers opportunities to attract the public eye. These cities have simply outlawed garish, contantly escalating sign competitions.

Around the nation, however, highway beautification is in retreat, and new billboard jungles are sprouting in cities and suburbs with a rapidity that would amaze even Jack of the Beanstalk.

While states that fail to police signs along major highways stand to lose allocations of federal highway construction funds, the U.S. inspector general reports that the Transportation Department is "not aggressively pursuing the removal of illegal signs."

Since 1965, the federal government has provided almost $200 million to compensate owners of 600,000 signs ordered removed from highway locations. But that investment is now being rendered next to worthless in parts of the country. The Transportation Department admits that new billboards are going up faster now than old ones are coming down. A General Accounting Office study is even more alarming. That study shows that during 1983 new signs were erected along America's roads and highways three times faster than old ones were torn down or relocated to more suitable sites.

Transportation officials say they haven't funds to deal with the problem. The inspector general and the GAO say that loopholes in the Highway Beautification Act need attention.

Congress should waste no time checking the facts and taking appropriate action. Federal budget problems may not allow aggressive attacks on illegally sited billboards, but the Transportation Department's priorities should be reviewed.

Beyond that, federal law could be changed to provide stiff penalties for owners who fail to meet firm deadlines for removing signs that haven't a legal leg to stand on. Such action would not only cut the costs of enforcing highway beautification. It also would stir interest in restoring and maintaining scenic values in communities were authorities are tolerating excessive signing because the public doesn't seem to care.

[From the San Antonio (TX) Express News, Jan. 14, 1985]

BILLBOARD LAW NEEDS REVISION

Imagine a federal program that paid a company to stop polluting in one place but allowed it to turn around and do the same nearby.

Now stop imagining and meet the highway beautification program. This legacy of Lady Bird Johnson's initiative may be the best thing that ever happened to the billboard industry, which some regard as being in the business of visual pollution.

While companies have been pocketing millions in federal dollars to remove offending signs, they simultaneously have erected even more signs elsewhere.

It wasn't supposed to work that way. Part of the problem lies in sheer neglect to enforce the law. But the law itself is flawed, too. It is full of loopholes that permit the billboard industry to conduct a shell game: Take one sign down here put up another there.

Two recent reports, by the Transportation Department and the General Accounting Office, spell out the magnitude of the failure. Nearly $200 million has been spent in compensation for the removal of signs, but nearly $500 million more would be required to take down the remaining billboards.

Fortunately, not all is bleak in the world of billboard pollution. Six states have banned billboards. Others have imposed stringent size and placement standards. Many local governments have done their part, too.

Given the confused state of the law, it's wise the Reagan administration hasn't asked for money for the program since 1982. If more is to be spent, a moratorium is needed on highway billboard construction.

Perhaps the best recommendation comes from the Transportation Department: Scrap the compensation program and adjust the law so that states can require the removal of signs after owners have amortized their cost.

[From the Lapeer (MI) Press, Sept. 18, 1985]

KEEPING HIGHWAY FREE OF BILLBOARDS

The new I-69 freeway from Lapeer to Port Huron is a beautiful highway of pleasing curves, rolling hills and trim farmland. But already it is being defaced by billboards.

Attica Township is small and rural, but it's fighting this billboard blight. When a sign went up last month, township officials traced its ownership to Gannett Outdoor Advertising and started proceedings. Gannett had failed to get a township building permit.

Gannett is a nationwide advertising firm, a subsidiary of the nation's largest newspaper chain which recently bought the Detroit News. Their failure to get a permit was not the mistake of a small businessman unfamiliar with the law.

It's fair to suspect that Gannett figured that if they moved fast and got the sign up, it would probably stay there. That's how a lot of signs get placed.

We applaud Attica Township for its fast action, as well as Imlay Township where officials are also trying to prevent the blight. Let's save a beautiful highway.

[From the Milwaukee (WI) Journal, Jan. 19, 1985]

LET'S GIVE SCENERY A CHANCE

I think that I shall never see
A billboard lovely as a tree.
Indeed, unless the billboards fall.
I'll never see a tree at all.

—Ogden Nash.

Since Ogden Nash penned his lament more than 50 years ago, the billboard forest has become a jungle in some parts of the country. The advertising sign remains ubiquitous despite the Highway Beautification Act of 1965, which was designed to help the scenery compete with the hype along the nation's roadsides.

Twenty years after passage of the law championed by Lady Bird Johnson, nearly 120,000 "non-conforming" signs still clutter the highways, according to a report from the General Accounting Office. "Non-conforming" is a euphemism for billboards that were legal at the time the law was passed but are no more, because of size, spacing and other restrictions. In order to get rid of those signs, state governments (with 75% federal help) must compensate the owners.

Taxpayers have spent nearly $200 million to vanish about 600,000 such signs, but new billboards have sprouted faster than the old ones have fallen. In some cases, billboard owners simply used the money they received for getting rid of one sign to put up another along the same highway.

In 1972, when Wisconsin began to implement the federal beautification law, our state had about 14,000 non-conforming billboards (more than in many other states).

Only about 2,700 of those have been removed.

What went wrong? For one thing, the federal money for billboard control has dried-up, and an unduly restrictive state law prohibits Wisconsin from buying out old billboards without federal assistance. Thus, the sign control campaign here, as in most states, is at a virtual standstill.

In the present fiscal climate, Congress obviously is not about to appropriate the estimated $427 million it would cost to get rid of offending signs. The lawmakers could at least restore local governments' powers to stem billboard blight through zoning—a right that was effectively denied by a 1978 amendment.

Of course, there are more pressing environmental causes than billboard control. But "visual pollution," in the form of billboards, is one environmental abuse that could be rather easily controlled. Congress should not begrudge local governments the right to deal with the problem.

Tourists, after all, are attracted by scenic vistas, not intrusive billboards.●

ROWNY'S ARMS CONTROL COMMENTS: RIGHT ON TARGET

● Mr. QUAYLE. Mr. President, it is not often that something genuinely new is said or written about arms control. Just such a speech, however, was given April 17 by the Secretary of State's Special Advisor on Arms Control Matters, Ambassador Edward L. Rowny.

In his address, "Strategic Offense-Defense Mixes: The Impact on Arms Control," Ambassador Rowny made several important points that deserve the Senate's close attention. The first is that the West has too often assumed that offensive weapons and tactics can overwhelm defensive technologies. The consequences of this mistaken assumption have been untold suffering and misery.

The second is that technologies of precision guidance and discrmination are now available to make defenses against the most offensive weapons—ballistic missiles—possible and to make the substitution of the most destructive weapons—large-yield nuclear warheads—feasible.

Ambassador Rowny rightly notes that these developments make significant reductions in strategic nuclear weapons systems reasonable. He is quick to note, however, that they will require us to be more innovative in our formulation of arms proposals for conventional arms and space security.

In this regard, I was particularly pleased to see Ambassador Rowny endorse Albert Wohlstetter's space self-defense zones, which could enhance the survivability of our critical satellites.

Mr. President, Ambassador Rowny's speech of April 17, represents truly fresh thinking on arms control. In hopes that wider distribution of his speech will encourage a sounder understanding of these issues in the Senate, I ask that the full text of the speech be printed in RECORD.

The text follows:

STRATEGIC OFFENSE-DEFENSE MIXES: THE IMPACT ON ARMS CONTROL

(Address by Ambassador Edward L. Rowny)

The history of offense-defense mixes in the strategy of warfare has been determined for the most part by technological advances. Moreover, the advent of new technology has tended to determine the strategy at any given time, rather than vice versa. This inevitably occurred at the expense of upsetting an existing mindset, a point often reflected in the notion that we always prepare to fight the last war. In this century, technology has fundamentally overturned prevailing notions about offensive-defensive mixes four times.

The first time occurred in 1914 when the belief in the offense epitomized by the Schlieffen plan died in the trenches in Belgium and Northern France. The promise of a quick and decisive victory with light casualties anticipated by the German general staff ultimately gave way to the more ghastly spectres of flanders, the Somme and Verdun. The gridlock which characterized so much of the war of 1914-1918 was finally broken by new technology in the form of the tank. However, by that time, the heavy casualties had taken their enormous toll.

The second time a fundamental change occurred was in World War II. Horrified by the carnage which had caused virtually a whole generation to be lost in Britian and France during World War I, strategists like Guderian, Hart and Fuller looked for better ways to have a quick and decisive offensive without heavy casualties. The defensive Maginot line was out-flanked by offensie Blitzkrieg forces, using the newly developed mobility and firepower of mechanical vehicles and airplanes. But subsequently, the strategy turned toward attacks against "panacea" targets. It was believed that these vital nerve centers, if destroyed, would cause an entire system to fail castastrophically. Oil refineries, rail heads and ball bearing factories were typical examples of what Hart termed the indirect approach. It was tested first in Spain, then during World War II in Europe, and finally in the campaign against the industrial heartland of Japan. Yet, decisive victory with small losses based on this strategy proved once again to be elusive. Large casualties, mostly as a result of ground-force fighting occurred. The prospect of additional casualties were hanging over us if we were forced to invade Japan.

The third time prevailing beliefs about offense versus defense were overturned by technology occurred in 1945 with the advent of atomic weapons. The atomic bombing of Hiroshima and Nagasaki finally brought about the swift results strategists had been searching for. However, once the U.S. monopoly on the "absolute weapon" was broken, it quickly became apparent that the bomb had limited utility. Indeed, nuclear weapons were kept only to deter. The late Herman Kahn termed this: "The irony of the deterrent kept that it may never be used." Nuclear weapons were simply too destructive to use lest they invite retaliation in kind. Many different theories of deterrence have evolved in the post-World War II era. But central to the most widely-accepted ones is the notion that only nuclear weapons can hold an enemy's counterforce targets at risk.

The fourth technological revolution, which is now taking place, consists of three parts. The first part is the noisy—some would say excessively noisy—revolution being brought about by SDI. The second, and more quiet part, is the one taking place in outer space. The third and equally quiet part of the technological revolution is taking place in conventional weapons.

SDI, if the research being presently undertaken proves feasible and cost-effective, will change our nuclear strategy from a purely offensive one to one of an offensive-defensive mix. Technology has now advanced to such a level that the utility of offensive forces, both nuclear and conventional, will be limited. I term this "pure defense," for as we envision it, it cannot be used offensively. SDI's aim, epitomized by the President's SDI Research Program, is ultimately to use non-nuclear technologies to counter attacking ballistic nuclear missiles at every stage of their flight path. SDI, in my opinion, will work and will prove cost-effective. The momentum of the program is being given impetus by the majority of scientists and industrialists, not only in the United States but in the United Kingdom, Germany, Japan, Italy and Israel. It is an idea whose time has come. It is, for the first time in modern history, an attempt to have strategy drive the use of technology.

However, this first success in modern times to change a mindset will not be easy. Aside from those who are comfortable with the current offensive nuclear strategy and are not convinced that an offensive-defense mix will be more stable, there remain two formidable problems. The first is managing the transition to a new strategy with our NATO allies so that decoupling does not take place. The other is managing the transition through the arms control process. I will have more to say on this last point later.

A relatively quiet technological change is taking place with high-tech in the field of outer space. Satellites have become an integral part of our terrestrial military operations. Moreover, our economic well-being has become increasingly dependent upon satellites. However, we have failed to realize that we must take steps to protect these assets. This could be done by "hardening" the satellites, by giving them "elusive" capabilities or by stationing redundant ones in space. Alternatively, we could plan on quickly replacing our lost satellites, or count on defeating attacks on our satellites with anti-satellites of our own. Satellites might also be protected in part through arms control agreements. But more on this later.

The final technological change now taking place is in the field of improvement of conventional weapons. In the first instance, better target acquisition, smart bombs, precision terrain-guided munitions, shaped charges, fuel-air explosives, kinetic energy and stealth, etc., will improve the effectiveness of current conventional forces. The improvement in tactical weapons will bring about changes in the offense-defense mix which are as yet highly unpredictable. The new SDI technologies related to pure defense, supplementing the technologies which apply to the sensible atmosphere (for purposes here defined as those under 300,000 feet), may lead to tactical missile defense in Europe. Along with other defensive changes the new technology may bring about, there will be transition in the strategy of defending Europe, quite aside from the transition which will be brought about through SDI.

Secondly, the advent of these new technologies further promises that current nu-

clear weapons can be replaced by strategic non-nuclear weapons. Non-nuclear weapons are less escalatory than nuclear weapons because they avoid the spread of radiation and collateral damage. Accordingly, strategic offensive forces may, in the future, include non-nuclear "strategic" weapons. Finally, the same technology which applies to non-nuclear strategic weapons can be applied to defense suppression.

Defense suppression is an area where conventional non-SDI-related high technology has much to offer. However, it is also the area that is driving the development of non-nuclear offensive strategic weapons. And herein lies the key. The same high technology can contribute to either pure offense or defense suppression. Indeed, it is possible to have conventional weapons which approximate "zero CEP" nuclear weapons, thus becoming counterforce-capable. This may well have been why Gorbachev expressed such anxiety in his January 15 statement about the development of conventional weapons of mass destruction. Let me reiterate that this includes smart bombs, PGMS, cruise missiles, Stealth and the like. Much different technology is involved in pure defense against a ballistic attack. Indeed, SDI is being deliberately structured so that it will examine technologies which have absolutely no offensive potential.

Defense suppression becomes of central importance in the offense-defense relationship because its effectiveness determines whether offensive forces become first-strike or second-strike capable. Moreover, we can envision how this will take place. Defenses can be overcome by speed, by saturation or by Stealth. These involve different high technologies, but all ones that we now know to be feasible and all ones that operate under 300,000 feet. In a world of both offenses and defenses, suppression of defenses below 300,000 feet would be necessary to assure the success of a second strike.

What are the implications of these technological changes for arms control? Agreements reducing strategic nuclear forces can be reached if only the political will is manifested. Agreements aimed at the protection of our satellites such as Wohlstetter's "self defense zones" would facilitate defense of space assets. However, there is little prospect that any agreement envisioned could, in the ultimate analysis, guarantee their protection. If research proves SDI feasible, there will be a need to jointly manage, through negotiations, the transition from the current offensive strategy to one based on an offense-defense mix. If agreements lead to the drastic reduction of offensive nuclear weapons, it will put greater demand on the need to negotiate conventional arms control agreements, lest the world be made "safe for conventional warfare." At the same time, agreements in conventional forces will become more complex. In this connection, the lack of success in MBFR, after a decade of negotiations, does little to inspire confidence that the arms control process can assist in the solution of this problem. But beyond this, the technological revolution in conventional arms will also require arms control negotiations to handle strategic non-nuclear forces and defense suppression forces. Otherwise, we will have done nothing to prevent what some analysts term a "strategic free market," at least for offenses and defenses under 300,000 feet.

Let me sum up the impact of the above on arms control. The problem of reducing strategic nuclear offensive forces, although up until now largely unsuccessful, is relatively manageable. While the protection of our space assets might be assisted by arms control, agreements may never be able to fully guarantee their protection. This field of arms control needs to be developed. The nature of managing the transition from an offensive nuclear to an SDI environment is currently being formulated. Finally, the nature of the arms control problem of jointly managing and controlling newly emerging high-tech conventional forces will be very complex and difficult. Thinking on how to deal with this problem has yet to begin.

In the final analysis, one is naturally tempted to step back and ask if a world—not much unlike that of today—without defenses, wouldn't be more stable. Indeed, wouldn't it be nice to return to the "idyllic" days of the 1950s and 1960s? The answer is "perhaps," but only if we believe we could disinvent knowledge. However, technology itself suspends belief. This, however, need not work against arms control. On the contrary the technological "marketplace" will demand dialogue to efficiently allocate offensive-defense resources over the long haul. Thus, for the first time, we have the prospect of making technology our servant in the evolution of offense and defense, not our master.●

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

□ 1730

The PRESIDING OFFICER. The Chair in his capacity as the Senator from Kentucky asks unanimous consent that the order for the quorum call be rescinded.

Without objection, it is so ordered.

APPOINTMENTS IN BEHALF OF THE VICE PRESIDENT

The PRESIDING OFFICER (Mr. MCCONNELL).

The Chair on behalf of the Vice President, in accordance with 22 U.S.C. 276h-276k, as amended, appoints the following Senators members of the Senate delegation to the Mexico-United States Interparliamentary Group Meeting during the 2d session of the 99th Congress to be held in Colorado Springs, CO, May 29 to June 2, 1986:

The Senator from Wyoming [Mr. SIMPSON] and the Senator from California [Mr. WILSON].

The Chair suggests the absence of a quorum. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

□ 1740

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXPLOSIVE MONETARY AND FISCAL POLICIES SURE TO BRING ON INFLATION

Mr. PROXMIRE. Mr. President, in the judgment of this Senator the Federal Reserve Board has been following a highly inflationary monetary policy since 1982. Now, but wait a moment. How can that be? Inflation has moderated spectacularly since 1982, and in recent months producer prices have fallen and even consumer prices have started to actually come down in March and they are still falling. So how can any sane person look at the results and claim the Federal Reserve Board has followed inflationary policies? It is ridiculous.

What do I mean by inflationary policies followed by the Federal Reserve Board? I mean that the Fed has for the first time since we started keeping statistics in the present form increased the money supply far faster than the increase in the nominal gross national product. Now, why is that inflationary? It is inflationary because as the GNP increases in actual dollar terms, it requires a somewhat lower rate of increase in the supply of currency and checking accounts to finance that GNP dollar growth.

Now, since 1960, the money supply growth actually exceeded the dollar growth in the GNP in only 1 year, 1967. Even in that year the growth in money supply only slightly exceeded the rate of dollar GNP growth up until 1982. Now consider the 1982 through 1985 period. What a change. From 1982 through 1985, the money supply increase exceeded dollar GNP growth in 3 out of those years and in very, very large proportions.

So is this increase in the supply of money, an increase which is wholly within the control of the Federal Reserve Board, an inflationary policy? Well, it certainly is. There is, indeed, one crucial difference between the makeup of the money supply since late 1982 and the makeup of the money supply before that.

In December 1982, so-called NOW accounts or negotiated order of withdrawal checking accounts became legal nationally. What are NOW accounts? They are checking accounts that bear interest. Now, before the advent of NOW accounts, interest-bearing accounts were not counted as part of M1 or the prime measure of the money supply. Since 1982, NOW accounts have been. So what happens if we go back to the old system and omit all interest-bearing accounts from M1? What happens is that the relationship between the money supply and the gross national product goes right back to normal.

If we do that, the growth in dollar GNP continues to exceed the growth in the money supply. So if we exclude NOW accounts, it looks as if the Fed

has not been pursuing an inflationary monetary policy after all. If that is the way it looks, take another look. Ask yourself, when the Congress authorized NOW accounts and super NOW accounts so that all of us could earn interest on our checking accounts, did we simply convert our interest-bearing savings accounts into checking accounts that paid interest or did we convert our checking accounts into interest-bearing, check-writing NOW accounts? Which did most Americans do? No one knows; no one has made a study of it. But does it not make obvious good sense to reason that the checking account customer, particularly if that checking customer is at least a half-awake businessman, converted his checking account into an interest-bearing NOW account? Of course it does. And here is why. Most Americans have good sense especially when it comes to money. So most Americans with a checking account have likely put that idle checking account to work where it could both earn good hard cash and still serve as a handy deposit for paying bills. Except for those checking accounts that had been kept at a bare minimum and therefore did not add up to much of a sum, it seems logical that over the 3- to 4-year period since 1982 most of the fat checking accounts sitting around would have gone happily to work earning interest as well as providing a checking service.

On the other hand, why should a saver who has his money tucked away in a noncheck-writing savings account rush to move those savings over to a NOW or interest-paying checking account? Oh, sure, it might provide for a little more convenience, but surely the incentive to move noninterest-bearing checking account money into interest-bearing NOW accounts should greatly exceed the incentive to write checks on the savings account.

Now, having gone through all this, what does it all mean? It means that the present measure of the money supply including NOW accounts as checking accounts as part of M1 is right. And that means that the measure of the money supply reported by the Federal Reserve as M1 does accurately show the Fed has been pursuing an inflationary monetary policy for the past 4 years.

Now, that brings us right back to the initial contradiction. If this policy is so inflationary, why is it that it coincides precisely with the period of falling inflation culminating most recently in at least a short period of actual deflation, prices actually going down?

The answer is that for the past 4 years there has been a growing glut of commodities including food, oil, and virtually all other raw commodities. This has coincided with an excess of labor, with an unprecedented explosion of entrants into the labor market in our country. This enormous increase in the supply of goods and the principal material for services, that is, labor, will run its course. Indeed, the falling oil prices may be ending already. Meanwhile, the unique, soaring rise of the money supply will eventually in a year or two begin a corresponding period of skyrocketing inflation. That reaction has always, always, in the experience of all countries, accompanies the kind of grossly irresponsible inflationary fiscal and monetary policy that this country has pursued for the past 4 years. It will just take a little patience to see it happen again.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BOSCHWITZ). Without objection, it is so ordered.

SENATE CONCURRENT RESOLUTION 140 HELD AT THE DESK

Mr. SIMPSON. Mr. President, after conferring with the Democratic leader, I ask unanimous consent that Senate Concurrent Resolution 140, designating June 6 as William C. Lee day, be held at the desk until close of business, Tuesday, May 20, 1986.

The PRESIDING OFFICER. Without objection, it is so ordered.

VIOLENCE IN SOUTH AFRICA

Mr. SIMON. Mr. President, I am just passing along a suggestion after talking to two or three of my colleagues. I think there is a feeling that with the violence that is taking place in South Africa and neighboring countries that somehow this body ought to be responding with something more than just words saying, "Naughty, naughty, this is not nice;" that we ought to be saying in concrete words to South Africa, "Your policy of institutional discrimination has to change." Not from a pious "we have all the answers and we have solved all our problems," as we know we have not solved all our problems.

The reality is we ought to be doing something a little more firmly and we are not doing it. I pass that along to the majority whip. Perhaps he can discuss it with the majority leader and with the chairman of the Senate Foreign Relations Committee. I will do the same with Senator PELL and Senator BYRD. It just seems to me we ought to be sending a message more briskly than we are now sending.

Mr. SIMPSON. Mr. President, knowing the Senator from Illinois, as I do, I sense his deep sensitivity and his degree of social consciousness. All of us are offended and appalled by that situation. Indeed, his remarks, I believe, will perhaps galvanize us into some kind of method to work with the chairman of the Foreign Relations Committee, Senator LUGAR, who has provided fine guidance in the past with issues from South Africa, along with Senator BYRD, who has worked hard in that area. I am sure they will direct that to the attention of the majority leader for action.

Mr. SIMON. I thank the Senator for that. I do not mean my remarks to be critical of the Foreign Relations Committee or anyone else, but I think what we see now as escalating violence will continue to escalate unless we can somehow get a peaceful resolution over there. I thank my colleague.

Mr. SIMPSON. I thank my friend from Illionis very much.

ORDERS FOR TUESDAY

RECESS UNTIL 10 A.M.

Mr. SIMPSON. Mr. President, I ask unanimous consent that once the Senate completes its business today, it stand in recess until the hour of 10 a.m., on Tuesday, May 20, 1986.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF CERTAIN SENATORS

Mr. SIMPSON. Mr. President, following recognition of the two leaders under the standing order, I ask unanimous consent that the following Senators be recognized for not to exceed 5 minutes each for special orders: Senator HAWKINS, Senator GORTON, Senator CHAFEE, and Senator PROXMIRE.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. SIMPSON. Mr. President, following the special orders just identified, I ask unanimous consent that there be a period for the transaction of routine morning business for not to exceed beyond the hour of 10:30 a.m. with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. Mr. President, at the conclusion of routine morning business, it is the intention of the majority leader to begin consideration of the supplemental appropriations bill.

ORDER FOR RECESS BETWEEN 12 NOON AND 2 P.M.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate stand in recess between the hours of 12 noon and 2 p.m. in order for the weekly party caucuses to meet on Tuesday, May 20, 1986.

Mr. BYRD. Mr. President, reserving the right to object, and I will not object, the distinguished acting Republican leader did not intend, I am

sure, to have as a part of the unanimous-consent request the expression of intention as to the consideration of the supplemental appropriations bill.

Mr. SIMPSON. Mr. President, that is known as part of the evening "rattling," and it was not my intention to do that. That was for information only. The Democratic leader is quite correct.

Mr. BYRD. I thank the distinguished Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. SIMPSON. Mr. President, rollcall votes can be expected throughout the day, and the Senate could be asked to remain in session into the evening in order to make substantial progress on the supplemental appropriations, bill.

At 2 p.m. it is the hope of the majority leader to lay aside the supplemental appropriation to resume S. 2180, and a vote is expected in relation to the Gorton amendment at approximately 2:30 p.m.

□ 1820

Mr. President, I believe that is the schedule, basically, for tomorrow.

I will ask the Democratic leader if he has further business.

Mr. BYRD. Mr. President, I thank the distinguished Senator from Wyoming [Mr. SIMPSON] the acting Republican leader. I have nothing further.

RECESS UNTIL TOMORROW AT 10 A.M.

Mr. SIMPSON. Mr. President, after conferring with the Democratic leader, there being no further business, I move, in accordance with the previous order, that the Senate stand in recess until 10 a.m., Tuesday, May 20, 1986.

The motion was agreed to and the Senate, at 6:18 p.m., recessed until Tuesday, May 20, 1986, at 10 a.m.

NOMINATIONS

Executive nominations received by the Secretary of the Senate May 16, 1986, under authority of the order of the Senate of January 3, 1985:

DEPARTMENT OF STATE

Cynthia Shepard Perry, of Texas, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Sierra Leone.

NATIONAL FOUNDATION OF THE ARTS AND THE HUMANITIES

David Lowenthal, of Massachusetts, to be a member of the National Council on the Humanities for a term expiring January 26, 1992, vice Marcus Cohn, term expired.

U.S. POSTAL SERVICE

Crocker Nevin, of New York, to be a Governor of the U.S. Postal Service for the remainder of the term expiring December 8, 1992, vice Frieda Waldman.

IN THE MARINE CORPS

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. David M. Twomey, xxx-xx-xxxx U.S. Marine Corps.

Executive nominations received by the Senate May 19, 1986:

DEPARTMENT OF AGRICULTURE

George S. Dunlop, of North Carolina, to be an Assistant Secretary of Agriculture, vice Peter C. Myers.

DEPARTMENT OF JUSTICE

John W. Roberts, of Arizona, to be U.S. Marshal for the district of Arizona for the term of 4 years, reappointment.

EXTENSIONS OF REMARKS

ADDRESS BY SECRETARY GENERAL OF U.N. AT UNIVERSITY OF MICHIGAN COMMENCEMENT

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. PURSELL. Mr. Speaker, millions of college and high school students are completing an important part of their lives this spring. They are celebrating their commencements. For them, it is the beginning of a new chapter in their lives, and a new chapter for our Nation, as well. For these fine young men and women embody the future of our Nation, and hence, the world. For today, our increasingly complex world is bringing home the point that we all are interdependent on one another, and must be, for our survival.

That was the point made a couple of weeks ago in my congressional district by the Secretary General of the United Nations, Mr. Javier Perez de Cuellar, who currently is completing his 5-year term as the head of the United Nations. The University of Michigan, the city of Ann Arbor, and my entire district were honored to have Secretary General Perez de Cuellar speak at the spring commencement exercises at the university, where the Secretary General was awarded an honorary doctorate. His address is worth the attention not only of those University of Michigan students who were graduating and their parents, friends, university faculty and staff, but of all Americans.

The Secretary General pointed out that the ever-increasing population of the world and advances in technology demand greater coordination between nations. Just as no man is an island, now—and especially in the future—no country will be able to be a world unto itself. Therefore, international cooperation is critical.

The Secretary General made the point that American statesmen were among those who took the lead in creation of the United Nations. Since that time, the United Nations has been striving for international cooperation and advocacy of the rights of all people. Although the United Nations has its detractors and at times has not functioned as many would like, there have been instances where, because of a common goal shared by nations often at odds with one another, such as the Soviet Union and the United States, countries have worked together.

Secretary General Perez de Cuellar warned of the perilous nature of treating international cooperation as an option. As the Secretary General put it, "to deny the possibility of greater cooperation among nations would be a poor start for a safe road ahead."

Those students who are graduating this year, as Secretary General Perez de Cuellar stated, are "the custodians of hope," those who must carry forward human aspirations for the preservation of peace.

I commend the U.N. Secretary General's address to my colleagues and all Americans.

STATEMENT OF SECRETARY-GENERAL PEREZ DE CUELLAR AT THE SPRING COMMENCEMENT EXERCISES AT THE UNIVERSITY OF MICHIGAN, MAY 3, 1986

SETTING A SAFE COURSE FOR THE 21ST CENTURY

President Shapiro, Members of the Faculty, Graduates, Ladies and Gentlemen: Thank you for your kind remarks. I greatly value the doctorate conferred on me. I regard it as a recognition of the services to the cause of peace rendered by all those who have worked in the United Nations over the last four decades.

Looking at this large assembly of young people, I am reminded of the determination expressed in the UN Charter "to save succeeding generations from the scourge of war". 40 years have passed since the United Nations began its work, and you are the first of the succeeding generations the founders hoped to save. You have escaped the horrors of a world war and it is peace which has brought to you the privileges and opportunities that you enjoy. To an audience as young as yours, I would be inclined to speak not of the grim problems of our world but of its golden promise.

However, millions in other parts of the world are not as happily provided as you are. They include people in your age-group who are trapped in absolute poverty and whose misery has been compounded over the last four decades by scores of local wars and festering conflicts. We must speak of them today because their world is part of your present and your future. Their suffering is not only a rebuke to human conscience; it can be a breeding ground of strife and violence and of dangers which will not remain confined.

We live today, as we have for several decades now, in a state of fragile peace among the great powers, shadowed by regional conflicts, and haunted by the possibility of nuclear disaster. In addition, the last few years have seen an infective growth of international terrorism and frequent use of violence. You may well inherit the responsibility for finding solutions to these problems. Let me, therefore, highlight some of the issues that must be of urgent concern.

Ours is an age of unparalleled and increasing complexity. We are caught in demographic, technological, economic and political change that has already altered to a dramatic degree the equations of power at the national and international levels and has ramifications in every area of human activity. International relations will certainly feel the impact of the vast changes now underway.

Early in the new century, for example, world population will be double what it was at the beginning of this decade, and its global distribution will be significantly different. Technological developments, while never entirely predictable, will certainly affect existing global patterns of agriculture, industry, and services. This will have an impact on the content and direction of trade, and necessitate major adjustments within countries and internationally. So will the need to manage scarce resources and protect the global environment.

The point to note about all this is that no single state, however powerful, can unilaterally control any of these processes. We face a period when internationally co-ordinated action will be critically important to both the welfare and the security of nations. Paradoxically, however, a trend has grown recently in the opposite direction. There seems to be an increasing reliance by governments on unilateral action. Where could such a trend lead us? For answers, we must look to the lessons of modern history. The most relevant example is the demise of the League of Nations and the eruption of the Second World War.

The creation of the League of Nations at the conclusion of the First World War, in which some ten million people had died, was an acknowledgement by the great powers of the day that international conflict had become intolerable because of a vastly enlarged dimension of destructiveness. However, the recognition was not strong enough to influence governments to place the common interests of the community of nations above national ambitions and national concerns. They tended increasingly to rely on unilateral action, rather than common action in the League, which the United States, of course, never joined. In economic relations, especially, they adopted short-sighted trade policies which contributed to the Great Depression. Admidst the mass unemployment and despair of the depression years, policies of moderation were frequently overwhelmed. Aggressive fascist regimes rose to power, riding the waves of vehement nationalism and discontent in their countries. The Leagues's inability to restrain them caused it a fatal loss of credibility. The Second World War followed soon.

Could timely multilateral actions and preventive diplomacy have kept the peace? The people who created the United Nations—and I must remind you, American statesmen were among the prime movers—who have said "Yes". It was that belief which led them to endow the post-war system of international organization with a wide-ranging and activist mandate. Over the last four decades, the United Nations has responded to that mandate more effectively than is often recognized. I will mention here the cardinal points:

The process of decolonization led to the establishment, for the first time in history, of an international system representative of virtually all the peoples of the world.

Although far too many wars have occurred in the last 40 years, the Organization has had success in defusing a number of major crises which could have led to greater wars otherwise. It has developed techniques of conflict control, by which in several areas, hostile forces are kept apart, providing room for negotiations. In situations such as those relating to Afghanistan, Cyprus and the Iran-Iraq conflict, the UN Secretary-General has often provided the only

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

means for the adversaries to remain in contact.

The United Nations has codified and formulated more international law than was done in all previous history

It has made the matter of human rights, again for the first time in history, a legitimate international concern. For example, it has kept the racist policy of apartheid in South Africa, which denies the majority of the population their very basic rights, constantly before the world's attention. In so doing, it reflects the human conscience evidenced so widely by young people across this country. Focus has also been maintained on the rights of such hitherto disadvantaged groups as women, children, the aging and the handicapped.

The living standards of vast numbers of people around the world have been improved by the work of UN agencies. UNICEF has saved the lives of literally millions of children and the UN High Commissioner for Refugees has provided protection and relief to homeless millions.

And, finally, it is through the United Nations that the world has inventoried its people and resources, analyzed trends, planned and initiated action to deal with matters ranging from environmental protection and shelter for the homeless to the use of outer space and global population planning.

Four decades after the creation of the Organization, the demands of international co-operation seem to have outpaced the willingness of governments to make adequate use of the potential of multilateral endeavour. They are reluctant to move towards new concepts and structures of co-operation. Though millions of people around the world have been politically awakened to the terrible peril inherent in war, national and international politics continue to be predicated to a degree on the use of force in one guise or another.

Changes in the international economy have overtaken many of the global systems that worked so well in the post-war period. Serious symptoms of disorder have persisted now for years. The tremendous burden of debt on many countries, the volatility of currency values, high unemployment and low growth rates, all point to the need for change. However, governments have made little progress towards negotiating a more responsive system of economic relations.

In almost every area of international affairs, whether it be the control of terrorism or the illicit flow of drugs, the need for much greater co-operation between nations has become very clear. Recent actions by the General Assembly and the Security Council in both these areas are a recognition of this need. The United Nations can certainly serve as the instrument for this co-operation, especially if the most influential governments participate fully in the process.

However, precisely when nations should focus on the limitless possibilities in diverse spheres of human existence which are latent in multilateral co-operation, the machinery needed to realize this potential is often by-passed, rebuffed or disdained. There are disturbing signs of a disregard by states of their obligations under the United Nations Charter. This weakens the whole multilateral approach to dealing with global problems. Further, it ignores the basic lesson driven home so brutally by two world wars: that international co-operation is a functional response to the complex inter-dependence of the modern world. To treat it as an optional matter is a deadly mistake.

Yet the first truly universal organization, formed by human vision and reflecting human aspirations, to preserve peace exists. It is a functioning instrumentality. No Member State has ever withdrawn permanently from it. If there is grave warning to be taken from some of its 40 year history, there is great promise to be seen in its achievements. For the achievements of the United Nations are the proof that even while ideological differences and economic disparities exist, nations *can* work together when a common goal is recognized. The proposal to eradicate smallpox through international co-operation was Soviet: the resources that made its accomplishment possible were heavily American.

In charting a wise course toward the next millenium the first task is to identify the many goals which most countries, including the most powerful, have in common. No country can be harmed by the eradication of hunger. All countries will gain from advancing global development. All countries, I am certain, will gain from a reduction in armaments, especially nuclear arms. All countries require peace. These are goals that transcend purely national interests while in no sense contravening them. They must be given priority in international relations as was not done in the years before the Second World War. We have the competence, the technological skill to ensure a world safe from nuclear annihilation and environmental disaster, provided governments perceive the necessity of working together, of sharing their resources and their experience.

It is an idealistic vision, no doubt, but to deny the possibility of greater co-operation among nations would be a poor start for a safe road ahead. You, as a new generation, have the enormous advantage of an unprecedented range of knowledge, including the whole history of human error. You have what the previous generation created—a Charter of the United Nations in which the principles which can guide us to a safer and better world are already defined. You can bring the renewed will and enthusiasm necessary to assure that these principles are honoured.

My friends, 1986 is the International Year of Peace. In designating it so, the UN General Assembly did not expect that all conflict would be ended. What it did hope for was that people everywhere would focus on the requirements for peace and the causes of current conflicts.

In this endeavour, you, the young, educated people of today, have an important role: You can look with fresh unprejudiced eyes for solutions to the great problems of our time. Governments can build the structures of peace only with your commitment and support. You are the custodians of the hope that the objectives for which the United Nations was founded will be achieved.

THE MIDGETMAN MISSILE

HON. DOUG BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. BEREUTER. Mr. Speaker, I rise to observe that once again the mischief makers are at work on the Midgetman missile. It should not be necessary, but I will do so anyway, to remind those who now seek to meddle, that Midgetman was recommended by the Scowcroft Commission, enthusiastically supported by the Congress, despite its high price tag, and accepted by the administration.

The theory which underpins Midgetman is that by dispersing a sufficiently large number of them, perhaps 500, over a large geographical area, it would not be possible for the Soviet Union to eliminate all of them except by expending an unaffordable number of their own warheads in the process. Doing so would leave the U.S.S.R. entirely vulnerable to retaliation from this country. Since this clearly would be an unacceptable alternative, the Soviets would be far less likely to launch a first strike.

The key to Midgetman's survivability is to keep it small. That's why the Scowcroft Commission recommended a single warhead, and why the missile's weight was envisioned to be in the 30,000 pound range. It's weight must be kept down so that its launch vehicle can be kept small and maneuverable.

Recently, Pentagon critics have begun to charge that Midgetman is not cost effective. They propose to add two more warheads, and in the process to more than double its weight. In addition to making the Midgetman heavier and less mobile, and thus less survivable, these changes also would require redesign of the missile, thus delaying deployment for 2 years.

Although we must be attentive to every possibility for cost savings in these difficult times, I am concerned that there may be an ulterior motive in this case. If we send Midgetman back to the drawing board, eventually to reemerge in a heavier, MIRV'd form, how long will it be before someone has the bright idea that since we are going with a MIRV'd missile, wouldn't 10 warheads be better than 3? In other words, why not the MX? Well that particular battle has been fought, and this particular Member believes it is not in the interest of this country to either build more MX missiles; nor is it in the best interest of this country to delay or abandon an effort to deploy a nontargetable system like the Midgetman. The MX is vulnerable to a first strike in a way that Midgetman is not, and to rely on it as the sole land-based missile for the Nation's defense is to flirt with catastrophe.

As the attached New York Times editorial, which I commend to my colleagues, points out, the Pentagon argument, that three warheads rather than one would halve the cost, sounds good. But if that does sound persuasive, try, as the Times urges, "to think of the last time the Pentagon criticized any weapon on grounds of cost".

[From the New York Times, Apr. 21, 1986]

THE SALVATION OF LAND-BASED MISSILES

How many warheads can dance on the head of a Midgetman missile?

One, said the Scowcroft Commission, a Presidential panel that urged a single-warhead missile in 1983 to escape the decade-long debate over the multi-warheaded MX: In singularity lies stability.

Three, says the Pentagon: A trinity of warheads per missile would be far more cost effective.

None, says the Administration, which last October tried to trade away Midgetman to the Russians with a proposal to ban all

mobile missiles: Mobility is no virtue because it makes missiles harder to target and to count.

Behind this sectarian hairsplitting lie deep doctrinal divisions. How can land-based missiles be assured of survival as Soviet missiles become more accurate? In particular, should Star Wars be their salvation?

President Reagan says he intends his Strategic Defense Initiative to defend cities, not missile silos. The Pentagon, paying lip service to this vision, knows that while defense of cities is probably not possible, silo defense is. It sees the practical part of Star Wars as a silo defense system that will protect the land-based missile force from even the most accurate Soviet missiles.

But Midgetman would do the same more cheaply and without abrogating the 1972 treaty with the Soviet Union that bans antimissile defense systems. Instead of sitting in an easily targeted silo, Midgetman would be trucked around military reservations in a carrier made quite resistant to nuclear blasts. A Soviet attack would have to barrage the whole reservation. This would consume an unaffordable number of warheads, however accurate they become. Midgetman, as is noted by Senator Gore, one of its original advocates, is an earnest rival to the Pentagon edition of Star Wars:

The Pentagon has two plans for deep-sixing Midgetman. One is straightforward: Have the Administration sell it to the Russians at Geneva by agreeing to ban mobile missiles. The more elaborate scheme is to entrammel it in the same paralyzing debate that snared the 10-warhead MX. Pentagon spokesmen have begun to criticize the cost per warhead of deploying Midgetman. They contend it could be halved by putting three warheads on each missile instead of one.

If that sounds persuasive, try to think of the last time the Pentagon criticized any weapon on grounds of cost.

Putting three warheads on Midgetman would require redesign and postponing deployment by two years, a delay that might well crucify Midgetman and prompt full resurrection of the MX. A three-warhead Midgetman would be much heavier than the single-headed version, hence less mobile and less survivable. According to a study by Representative Les Aspin, its cost per surviving warhead would actually be greater.

In retrospect, MIRVing—the technique of putting multiple warheads on missiles—was a titanic error. The United States invented it, to assure penetration of the antimissile defenses around Moscow. The Russians foolishly followed, building MIRVed missiles that threaten American missiles yet are themselves vulnerable—the quintessence of a tempting target. The United States compounded the error with the MX.

Midgetman is the egress from error. With a single warhead, it does not tempt or reward a first strike. Russian targeteers would need form 3 to 17 warheads to kill each Midgetman; thus protected, it need not be used pre-emptively, and so lacks the menace of its MIRVed cousins.

The path to a stabler world lies in the un-MIRVed missiles, agreements to limit their numbers, and no missile defenses. Those who prefer nuclear dominance to stability like no part of that trinity. It is they who foster worship of the MIRVed Migetman.

POPE JOHN PAUL II MAKES HISTORIC VISIT TO ROME SYNAGOGUE

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. SOLARZ. Mr. Speaker, on April 13 His Holiness Pope John Paul II made a historic journey to the Central Synagogue of Rome. This visit, marking the first time in almost 2,000 years that a Pope had visited a Jewish synagogue, has elevated relations between Catholics and Jews to a new plain. The holy father has also paved the way for closer cooperation between two of the world's major religious groups by his symbolic visit and participation in a prayer service in the Central Synagogue of Rome.

The Pope, who has traveled further than any of his predecessors in celebration of the brotherhood of man and in pursuit of peace, accepted an invitation from Rabbi Elio Toaff to visit the Central Synagogue of Rome. He used this journey to the oldest Jewish community in Italy to give a ringing denunciation of anti-Semitism at any time and by anyone.

Highlighting the common ties between Judaism and Catholicism, particularly the shared commitment to the Ten Commandments and the Scripture, the Pontiff called Jews "our dearly beloved brothers, and in a certain way, it could be said that you are our elder brothers." The Pontiff asked his audience for a "rediscovered brotherhood" between Christians and Jews that would end centuries of estrangement and recognize the unique identity of each religion.

I believe that the holy father's visit and reading of the Psalms with Rabbi Toaff at the Central Synagogue accomplished more to improve relations between Catholics and Jews than hundreds of sermons, official pronouncements or learned conferences. Despite other efforts, including that of the most beloved Pope John XXIII in the Vatican council's decree, "Nostra Aetate," the canker of anti-Semitism continued in many places.

The holy father clearly and irrefutably marked out his church's strong rejection of anti-Semitism and its abhorrence to the centuries of persecution and hatred inflicted on the Jewish community. Recalling the horrors of the Holocaust and the murder of 6 million Jews because of their beliefs and ancestry, the Pope paid tribute to those brave Christians who opened their hearts and their doors to help Jews fleeing the Nazis.

The address given by Pope John Paul II at the Central Synagogue is a milestone in the effort to bridge the differences between two major religious traditions. But it is also a major call for a rediscovered brotherhood that would lead to greater collaborative efforts by Christians and Jews to ease the suffering of all of God's children and to bring a just and lasting peace to our world.

Mr. Speaker, because of the historical significance of Pope John Paul's message, I include it to be reprinted in its entirety in today's CONGRESSIONAL RECORD.

[From the New York Times, Apr. 14, 1986]

YOU ARE OUR ELDER BROTHERS

Dear Chief Rabbi of the Jewish community in Rome; dear president of the Union of Italian Jewish Communities; dear president of the community in Rome; dear rabbis, dear Jewish and Christian friends and brethren taking part in this historic celebration:

First of all, I would like, together with you, to give thanks and praise to the Lord who stretched out the heavens and laid the foundations of the earth and who chose Abraham in order to make him father of a multitude of children, as numerous "as the stars of heaven and as the sand which is on the seashore," to give thanks and praise to Him because it has been His good pleasure, in the mystery of His providence, that this evening there should be a meeting in this your "major temple" between the Jewish community that has been living in this city since the times of the ancient Romans and the Bishop of Rome and universal pastor of the Catholic Church.

I likewise feel it is my duty to thank the Chief Rabbi, Prof. Elio Toaff, who from the first moment accepted with joy the idea that I should make this visit, and who is now receiving me with great openness of heart and a profound sense of hospitality, and in addition to him I also thank all those members of the Jewish community in Rome who have made this meeting possible and who in so many ways have worked to insure that it should be at one and the same time a reality and symbol.

REFLECTING ON SIGNIFICANCE

Many thanks therefore to you all.

Toda rabba [Herbrew for "Many thanks"].

In the light of the word of God that has just been proclaimed and that lives forever, I would like us to reflect together, in the presence of the Holy One—may he be blessed!—on the fact and the significance of this meeting between the Bishop of Rome, the Pope, and the Jewish community that lives and works in this city, which is so dear to you and to me.

I had been thinking of the visit for a long time. In fact, the Chief Rabbi was kind enough to come and see me in February 1981 when I paid a pastoral visit to the nearby parish of San Carlo at Catenari. In addition, a number of your have been more than once to the Vatican on the occasion of the numerous audiences that I have been able to have with representatives of Italian and would Jewry, and still earlier, in the time of my predecessors Paul VI, John XXIII and Pius XII.

I am likewise well aware that the Chief Rabbi, on the night before the death of Pope John, did not hesitate to go to St. Peter's Square, and, accompanied by members of the Jewish faithful, he mingled with the crowd of Catholics and other Christians in order to pray and keep vigil, as it were, bearing witness in a silent but very effective way, to the greatness of the soul of that Pontiff, who was open to all people without distinction and in particular to the Jewish brethen.

HERITAGE OF POPE JOHN

The heritage that I would now like to take up is precisely that of Pope John, who on one occasion as he passed by here—as the Chief Rabbi has just mentioned—stopped the car so that he could bless the crowd of Jews who were coming out of this very temple. And I would like to take up his her-

itage at this very moment when I find myself not just outside but, thanks to your generous hospitality, inside, the synagogue of Rome.

This gathering in a way brings to a close, after the pontificate of John XXIII and the Second Vatican Council, a long period which we must not tire of reflecting upon in order to draw from it the appropriate lessons. Certainly, we cannot and should not forget that the historical circumstances of the past were very different from those that have laboriously matured over the centuries. The general acceptance of a legitimate plurality on the social, civil and religious levels has been arrived at with great difficulty.

Nevertheless, a consideration of centuries-long cultural conditioning could not prevent us from recognizing that the acts of discrimination, unjustified limitation of religious freedom, oppression, also on the level of civil freedom, in regard to the Jews were, from an objective point of view, gravely deplorable manifestations. Yes, once again, through myself, the church, in the words of the well-known declaration "Nostra Aetate," "deplores the hatred, persecutions, and displays of anti-Semitism directed against the Jews at any time and by anyone." I repeat, "By anyone,"

ABHORRENCE OF GENOCIDE

I would like once more to express a word of abhorrence for the genocide decreed against the Jewish people during the last war, which led to the holocaust of millions of innocent victims.

When I visited on June 7, 1979 the concentration camp at Auschwitz and prayed for the many victims from various nations, I paused in particular before the memorial stone with the inscription in Hebrew and thus manifested the sentiments of my heart: "This inscription stirs the memory of the people whose sons and daughters were destined to total extermination. This people has its origin in Abraham, who is our father in faith, as Paul of Tarsus expressed it. Precisely this people, which received from God the commandment, "Thou shalt not kill," has experienced in itself to a particular degree what killing means. Before this inscription it is not permissible for anyone to pass by with indifference,"

The Jewish community of Rome, too, paid a high price in blood.

CHURCH OFFERED REFUGE

And it was surely a signifciant gesture that in those dark years of racial persecution the doors of our religious houses of our churches, of the Roman Seminary, of buildings belonging to the Holy See and of Vatican City itself were thrown open to offer refuge and safety to so many Jews of Rome being hunted by their persecutors.

Today's visit is meant to make a decisive contribution to the consolidation of the good relations between our two communities, in imitation of the example of so many men and women who have worked and who are still working today, on both sides, to overcome old prejudices and to secure even wider and fuller recognition of that "bond" and that "common spiritual patrimony" that exists between Jews and Christians.

This is the hope expressed in the fourth paragraph of the council's declaration "Nostra Aetate," which I have just mentioned, on the relationship of the church to non-Christian religions. The decisive turning-point in relations between the Catholic Church and Judaism, and with individual Jews, was occasioned by this brief but incisive paragraph.

We are all aware that, among the riches of this paragraph No. 4 of "Nostra Aetate," three points are especially relevant. I would like to underline them here before you in this truly unique circumstance.

The first is that the church of Christ discovers her "bond" with Judaism by "searching into her own mystery." The Jewish religion is not "extrinsic" to us, but in a certain way is "intrinsic" to our own religion. With Judaism, therefore, we have a relationship which we do not have with any other religion. You are our dearly beloved brothers, and in a certain way, it could be said that you are our elder brothers."

The second point noted by the Council is that no ancestral or collective blame can be imputed to the Jews as a people for "what happened in Christ's passion." Not indiscriminately to the Jews of that time nor to those who came afterward nor to those of today. So any alleged theological justification for discriminatory measures or, worse still, for acts of persecution is unfounded. The Lord will judge each one "according to his own works," Jews and Christians alike.

The third point that I would like to emphasize in the Council's declaration is a consequence of the second. Notwithstanding the church's awareness of her own identity, it is not lawful to say that the Jews are "repudiated or cursed," as if this were taught or could be deduced from the sacred Scriptures of the Old or the New Testament. Indeed, the Council had already said in this same text of "Nostra Aetate," but also in the dogmatic Constitution Lumen Gentium referring to St. Paul in the Letter to the Romans, that the Jews are beloved of God, who has called them with an irrevocable calling.

On these convictions rest our present relations. On the occasion of this visit to your synagogue, I wish to reaffirm them and to proclaim them in their perennial value.

For this is the meaning which is to be attributed to my visit to you, the Jews of Rome.

It is not, of course, because the differences between us have now been overcome that I have come among you. We know well that this is not so.

First of all, each of our religions, in the full awareness of the many bonds which unite them to each other, and in the first place that "bond" which the council spoke of, wishes to be recognized and respected in its own identity, beyond any syncretism and any ambiguous appropriation.

PATH IS AT ITS BEGINNING

Furthermore, it is necessary to say that the path undertaken is still at the beginning and, therefore, a considerable amount of time will still be needed, notwithstanding the great efforts already made on both sides, to remove all forms of prejudice, even subtle ones, to readjust every manner of self-expression and, therefore, to present always and everywhere, to ourselves and to others, the true face of the Jews and Judaism as likewise of Christians and of Christianity and this at every level of outlook, teaching and communication.

In this regard, I would like to remind my brothers and sisters of the Catholic Church, also those living in Rome, of the fact that the guidelines for implementing the Council in this precise field are already available to everyone in the two documents published respectively in 1974 and 1985 by the Holy See's Commission for Religious Relations with Judaism. It is only a question of studying them carefully, of immersing oneself in their teachings and of putting them into practice.

Perhaps there still remain between us difficulties of the practical order waiting to be overcome on the level of fraternal relations. These are the result of centuries of mutual misunderstanding and also of different positions and attitudes, not easily settled, in complex and important matters.

JESUS A SON OF YOUR PEOPLE

No one is unaware that the fundamental difference from the very beginning has been the attachment of us Catholics to the person and teaching of Jesus of Nazareth, a son of your people, from which were also born the Virgin Mary, the Apostles who were the "foundations and pillars of the church" and the greater part of the first Christian community. But this attachment is located in the order of faith, that is to say, in the free assent of the mind and heart guided by the spirit, and it can never be the object of exterior pressure in one sense or the other. This is the reason why we wish to deepen dialogue in loyalty and friendship, in respect for one another's intimate convictions, taking as a fundamental basis the elements of the revelation which we have in common as a "great spirtual patrimony."

It must be said, then, that the ways opened for our collaboration in the light of our common heritage, drawn from the law and the prophets, are various and important. We wish to recall first of all a collaboration in favor of man, his life from conception until natural death, his dignity, his freedom, his rights, his self-development in a society which is not hostile but friendly and favorable, where justice reigns and where, in this nation, on the various continents and throughout the world, it is peace that rules, the shalom hoped for by there lawmakers, prophets and wise men of Israel.

More in general, there is the problem of morality, the great field of individual and social ethics. We are all aware of how acute the crisis is on this point in the age in which we are living. In a society which is often lost in agnosticism and individualism and which is suffering the bitter consequences of selfishness and violence, Jews and Christians are the trustees and witnesses of an ethic marked by the Ten Commandments, in the observance of which man finds his truth and freedom. To promote a common reflection and collaboration on this point is one of the great duties of the hour.

And finally, I wish to address a thought to this city in which there live side by side the Catholic community with its Bishop and the Jewish community with its authorities and its Chief Rabbi.

Let this not be a mere "co-existence," a kind of juxtaposition, interspersed with limited and occasional meetings, but let it be animated by fraternal love.

The problems of Rome are many. You know this well. Each one of us, in the light of that blessed heritage to which I alluded earlier, is conscious of an obligation to work together, at least to some degree, for their solution. Let us seek, as far as possible, to do so together. From this visit of mine and from the harmony and serenity which we have attained may there flow forth a fresh and health-giving spring like the river that Ezekiel saw gushing from the eastern gate of the Temple of Jerusalem, which will help to heal the wounds from which Rome is suffering.

In doing this, I venture to say, we shall each be faithful to our most sacred commitments and also to that which most pro-

foundly unites and gathers us together: faith in the one God who "loves strangers" and "renders justice to the orphan and the wise," commanding us too to love and help them. Christians have learned this desire of the Lord from the Torah, which you here venerate, and from Jesus, who took to its extrem consequences the love demanded by the Torah.

REDISCOVERED BROTHERHOOD

All that remains for me now, as at the beginning of my address, is to turn my eyes and my mind to the Lord, to thank him and praise him for this joyful meeting and for the good things which are already flowing from it, for the rediscovered brotherhood and for the new and more profound understanding between us here in Rome and between the church and Judaism everywhere, in every country, for the benefit of all.

Therefore I would like to say with the Psalmist, in his original language which is also your own inheritance:

Hodu la Adonai Ki tob
Ki le olam hasdo
Yomar-na Yisrael
Ki le olam hasdo
Yomeru-na yire Adonai
Ki le olam hasdo.

O give thanks to the Lord for He is good,
His steadfast love endures forever!
Let Israel say,
"His steadfast love endures forever."
Let those who fear the Lord say,
"His steadfast love endures forever."
Amen.

TERRORISM ARTICLE BY REPRESENTATIVE GEORGE "BUDDY" DARDEN

HON. WYCHE FOWLER JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. FOWLER. Mr. Speaker, transnational terrorism is one of the most serious threats faced by our country and all civilized nations today. Our struggle against terrorism will not be an easy or short one. But, it is one that we must make if we want to prevent international anarchy and protect the lives of U.S. citizens.

Our distinguished colleague, Congressman GEORGE "BUDDY" DARDEN of Georgia, has authored a fine discussion of this important issue. In his column, Congressman DARDEN discusses recent events involving Libya and reviews some features of an effective counter-terrorism policy.

I am therefore submitting his column for your review and I hope that all Members will take the time to read it:

[From the Dade County (FL) Sentinel, Apr. 23, 1986]

U.S. WON'T TOLERATE LIBYAN LAWLESSNESS

(By "Buddy" Darden)

Almost two centuries ago, international commerce was threatened by outlaws . . . the Barbary Pirates . . . based at Tripoli, on the north African coast.

They raged across the Mediterranean, demanding "tribute" . . . extortion payments . . . from American and European ships in return for the "privilege" of operating freely and safely.

European governments tolerated the piracy, but the United States drew the line. In 1804, U.S. Navy forces under Stephen Decatur staged a pre-emptive strike; the outlaws of Tripoli were tamed and free commerce was restored.

Last week's American airstrike against terrorist strongholds in Tripoli, now capital of Libya, came against a similar backdrop of international lawlessness . . . this time the handiwork of Muammar Qadhafi.

As in 1804, the United States took decisive action while Europeans, for the most part, showed no interest in halting the reign of terror.

President Reagan ordered the raid on the basis of clear and decisive evidence that Qadhafi masterminded the bombing a week earlier of a Berlin disco, in which an American serviceman was killed.

That tragedy was only the latest in the Libyan madman's long strike of brutal, unprovoked attacks against Americans and Europeans.

As a member of the House Armed Services Committee, I was especially impressed by the skill with which our Navy and Air Force pilots carried out the nighttime raid.

Of course, the loss of one Air Force F-111 bomber points up the danger of any military undertaking, and we extend our sumpathy to the families of its crew . . . Capt. Fernando L. Ribas-Dominicci and Capt. Paul F. Lorence.

That plane's loss apparently was not related to the attack itself, and might have been prevented had the F-111's not been flying a circuitous 5,600-mile round trip to Tripoli from American bases in Great Britain.

Their journey around the western tip of Europe . . . including several dangerous mid-air-refuelings . . . was made necessary when France and Spain refused to let the bombers cross their territory en route to Libya (Britain, to its credit, approved the departure from its soil).

France's lack of support, particularly, was a slap in the face to the United States, which twice in this century has saved France from destruction.

The French repeatedly neglected their cooperative defense commitments as a member of the North Atlantic Treaty Organization (NATO); their cool reception to the Tripoli raid was the latest example of their arrogance and lack of regard for the United States.

If the French remain unwilling to help combat worldwide terrorism, we should refuse to take up their causes around the world . . . including their opposition to the South Pacific Nuclear-Free Zone Treaty, which is proposed by Australia, New Zealand and others in the region and would bar further French nuclear weapons testing in the South Pacific.

The people in Europe are as vulnerable as Americans to terrorist attack; they must join us in the fight against Qadhafi and his fanatical followers or lose our support in other endeavors.

The Tripoli raid will not end the terror campaign controlled by Libya and its friends, such as Syria and Iran. More likely, it will be only the beginning of a long struggle against the terrorists and their sponsors.

We must be vigilant against increasingly frequent terrorist onslaughts both here in the United States and abroad. Extraordinary security measures may have to be adopted . . . such as Congressman Wyche Fowler's suggestion that airline tickets carry an implied consent to full-scale baggage and personal searches.

And, we must be prepared to launch more strikes like the one last week to knock out terrorists command posts, training centers and supply depots . . . whether other nations support us or not.

The Tripoli raid should signal terrorist leaders that the United States has reached the breaking point with their ruthless tactics . . . that our long period of tolerance has ended and that political gain will not be achieved with guns and bombs.

ELLIOT ABRAMS SPEAKS FOR THE NICARAGUAN RESISTANCE

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. COURTER. Mr. Speaker, "while we are talking, the Soviets, Cubans, and Sandinistas are acting." So concludes Assistant Secretary of State for Inter-American Affairs Elliot Abrams in a powerful rebuttal to a number of arguments against helping the democratic resistance in Nicaragua. Amidst all the articles we see on the Central America debate, few go as far as Mr. Abrams in carefully extending arguments and directly answering opponents. His reasoning and conclusions alike commend themselves to the attentions of all Members, and for that reason I am including the essay in today's RECORD.

[From the Miami Herald, May 4, 1986]

THESE ARE TOUGH TIMES FOR FOES OF CONTRA AID

(By Elliott Abrams, assistnt secretary of state for inter-American affairs)

Aid to Nicaragua's democratic resistance may be stalled in Congress, but these are tough times nonetheless for opponents of administration policy. Far from gratitute or support from Managua, their reward is a series of Sandinista actions that demonstrate that instead of being benevolent social reformers, the Sandinistas are indeed a threat to Central America and to Western interests generally.

Once it was claimed that the administration misread the character of Nicaragua's government. Today, after years of consorship and repression, it is no longer possible to argue credibly that the Sandinistas are even latent democrats. The true Sandinista intentions have been revealed with each act of repression of their own people and each new act of terrorism and aggression against their neighbors. The latest wave of over 10,000 Miskito refugees fleeing Sandinista attacks attests to the regime's viciousness.

One result is that Congress is no longer debating what the Sandinistas are; it is debating what the United States should do to prevent them from consolidating a Communist system in Nicaragua. There is general agreement that diplomatic pressure should be used, but there is deep disagreement over whether the Sandinistas will respond to diplomatic initiatives in the absence of the military pressure the resistance can provide. Again, the Sandinistas have answered the question for us.

In 1984, after Congress ended U.S. military aid to resistance forces, the Sandinistas did not negotiate—they kept their leading political opponents out of elections and brought in Soviet helicopter gunships in an attempt to shut off any further armed resistance. This spring, after the House of Representatives again voted down aid to the

contras, Nicaragua struck into Honduras, then rejected all attempts to develop a comprehensive settlement at the Contadora talks in Panama. Those in attendance at the negotiations had no doubt that the Sandinistas, not the United States, were responsible for the Contadora passe.

All of this may leave opponents of aid to the resistance dispirited, but it apparently hasn't left them discouraged. Having exhausted all defenses of the Sandinistas, they have shifted the focus of their attack.

First comes the accusation that the contras are not broadly representative of the Nicaraguan nation. This charge is already several years out of date. With each passing month of Sandinista repression and economic malpractice, the resistance gains more recruits—it is now over 20,000 strong, with a rank and file that reflects the broad spectrum of Nicaraguan society. Today's resistance has more fighters than did the Sandinistas when Somoza fled in 1979. That they haven't yet won is a reflection of the Soviet and Cuban arming and training of a Sandinista army at least six times larger than anything Somaza ever had.

A second charge is that the contra forces are made up of Somocista guardsmen. In fact, the former national guardsmen participating in the resistance are far outnumbered, both in the leadership and in the ranks, by fighters with no past connection to the National Guard. Indeed, most are too young to have served in the National Guard before the Sandinista accession to power.

A more recent tactic of administration critics is to charge that the resistance is embezzling money. Unsubstantiated charges have been made that privately raised funds have been misspent. It has also been asserted that humanitarian assistance provided by the U.S. government has been abused. This canard found absolutely no support from the congressional General Accounting Office (GAO), which located no evidence of misuse of funds. GAO did find that the system Congress designed to administer the humanitarian assistance is not ideally suited to thorough monitoring of all transactions, especially in Central America, but this is hardly the fault of the resistance.

Then there are charges of drug trafficking. It is known that the resistance's lack of adequate supplies led to a search for alternative money sources. But we have no evidence that contra leaders whom we support are involved in drug trafficking. In fact, we know that they oppose it, and they know that the administration and Congress will stop aid to any resistance group that tolerates it.

The final recourse has been to smear the political leadership of the resistance. One leader, Adolfo Calero, has been accused of disloyalty to the goal of democracy in Nicaragua. This charge, leveled by Sen. Harkin on the Senate floor, is a particular irresponsible one to make against a man whose political career was forged in opposition to the Somoza dictatorship, who was one jailed for anti-Somoza activities and who has kept at arm's length by the Sandinistas precisely because he is a democrat.

Other top contra leaders such as Arturo Cruz and Alfonso Robelo proved their allegiance to democracy by leaving prestigious posts in the Sandinista government when it turned toward totalitarian rule and Soviet bloc alignment.

Scurrilous personal attacks do more than defame good people: They also distract attention from the solid political and organizational progress the resistance has made in recent months. This process began when the United Nicaraguan Opposition (UNO) was formed last June and continues today as all elements of UNO negotiate new democratic decision-making procedures that will clearly subordinate military forces to a representative civilian leadership. The continued cooperation of leaders such as Calero, Cruz and Robelo bodes well for the future and gives hope that still more opposition groups will join UNO, expand its political base and help shape its political program.

In this effort, and in the effort to address charges of human rights abuses and drug trafficking activity, UNO receives support from the administration and a bipartisan group of members of Congress. This quiet bipartisan cooperation, a significant development, has been all but overshadowed by the heated legislative battles over the aid itself. It is clear to all concerned that for Nicaragua's resistance movement to succeed it must be as united and as democratic as the new Nicaragua it hopes to create.

As our debate continues, shifting from issue to issue and from charge to charge, we should remind ourselves that our deliberations may one day become academic. While we are talking, the Soviets, Cubans and Sandinistas are acting. Their strategy to destroy Nicaragua's civil and military opposition proceeds apace. That was the reason for the raid into Honduras, and it is the reason for continued internal repression such as the closing of the Catholic Church radio station and the censorship of La Prensa, two independent media of communication that once reached a large segment of the population.

Politically and militarily, the Nicaraguan freedom fighters can exert immense pressure on the Sandinista regime. Given the lack of any American military aid for two years, their progress has been remarkable. But the latent strength of the resistance cannot materialize without substantial and timely U.S. aid. It will be a tragedy for our Nicaraguan neighbors and for the hemisphere's democratic ideal if the prolonged indecision of the United States denies the resistance of Nicaragua the chance to bring a just peace to its long-suffering, repressed people.

THE NEW GI BILL: A CHANCE FOR SOMETHING BETTER

HON. G.V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. MONTGOMERY. Mr. Speaker, in the 5 years since we first began to develop the new GI bill, we have attempted to explore every corner, examine every technicality, and gather every point of view related to this important Education Assistance Program. However, there is always something new and personal and good that can be said of the program.

No one understands the GI bill better than the people who use it. I continue to receive success stories from former GI bill participants nationwide who have benefited and are still benefiting from the program. Their letters provide us with new and revealing information, though their conclusions are the same—the new GI bill is good for America and good for America's people.

I would like to share with my colleagues the following letter—another of the GI bill's success stories:

CHARLOTTESVILLE, VA,
April 9, 1986.

G.V. MONTGOMERY,
House of Representatives, House Office Building, Washington, DC.

DEAR MR. MONTGOMERY: I agree with your statement about attempts to kill the GI Bill that ". . . the decision is severely flawed." In particular I am bothered by Administration argument that ". . . it may be a disincentive for retention". I believe the quality and energy levels of enlisted men in a military unit are just as important as the retention rate.

I grew up on a low income farm in the 1940's with excellent parents who had just 12 years of elementary education between them. But I was bright and eager and my teachers encouraged me to go to college.

So the GI Bill became my way out of that tiny high school and into the University of Iowa. While the Air Force did not retain me it did gain an active person with energy and goals. During my four years I advanced to A/1C as a radio operator while serving at Keesler Air Force Base, Patrick Air Force Base and K-6 in Korea.

I think it is unfortunate that the administration is missing two other key points such as contribution to the nation after graduation in service given and taxes paid. As a teacher in a federally designated rural poverty area from 1964 to 1974 I received the following recognition for my work with rural youth.

1. *The Nations Schools,* 1967—Description of an innovative program I developed.
2. Iowa's outstanding young educator, 1968—by the Iowa Jaycees.
3. Iowa's Teacher of the Year, 1971—by the Iowa Department of Education.
4. National Teacher of the Year (Final Five), 1971—by the National Council of Chief State School Officials.
5. "Master Teacher" with the Iowa Mobile Instructional Lab, 1971-74.

In my current position with the Virginia Department of Mental Health I will pay 1985 income taxes equal to the entire amount of GI Bill funds I received from 1959-63.

The point is that for less than $8,000 the federal government obtained a commitment from me for four years of service, changed my life and placed me in a position to provide more service and pay more taxes.

Please do not give up your fight for the GI Bill. There are too many poor but sharp young men and women who will serve just to get a chance at something better.

Sincerely,

JOHN D. BEGHTOL.

TRADE REPRESENTATIVE CLAYTON YEUTTER'S ANALYSIS OF TRADE BILL

HON. DOUG BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. BEREUTER. Mr. Speaker, a number of the provisions of the trade bill that comes to the floor of the House this week could be especially damaging to agricultural trade. Special Trade Representative Clayton Yeutter's analy-

sis of these provisions appeared in the May 18, 1986 edition of the Washington Post. Ambassador Yeutter's concerns are the same concerns being raised by all of the major agricultural groups, and they are concerns which are shared by this member. I commend this article to the attention of my colleagues.

IT'S SO BAD, THE SPONSORS MUST WANT IT VETOED

(By Clayton Yeutter)

Every once in a while, legislation comes along that is so bad even the sponsors want the president to veto it.

Of course, they cannot admit it publicly, but the sponsors of the trade bill going to the House floor this week secretly must be counting on a veto. They have not tried to conceal their desire to win votes this fall by voting for a trade bill that "gets tough" with our trading partners. But they must know their short-term gain would be offset by massive American job losses down the road.

There are many things the administration doesn't like about the House trade bill. But the worst is that it breaks so many rules of international trade that our trading partners would close overseas markets to U.S. products, costing American jobs.

Some have suggested Congress is simply trying to send the administration a message, but that message was sent and received—loud and clear—a year ago. And that is a mighty poor way to rationalize bad legislation in any case.

The administration agrees that the U.S. trade deficit is a serious problem. President Reagan has an aggressive program to fight unfair trade practices abroad, to negotiate market-opening agreements with other nations and to address the underlying economic fundamentals that have distorted trade flows. We have initiated or accelerated cases challenging the unfair trading practices of Japan, the European Community, South Korea, Taiwan and Brazil. We have made important strides toward negotiations to strengthen the General Agreement on Tariffs and trade (GATT), which governs international trade. And we have seen the dollar decline against other major currencies, so U.S. products are now priced far more competitively in world markets.

This is not to say we have solved the trade deficit; that will require a lot more hard work. And it will require time. Businessmen do not change their order books overnight just because exchange rates have moved.

It is also not to say the trade laws cannot be improved. But any changes should be responsible ones aimed at opening markets to U.S. exports, not at closing markets in the United States. And they should be passed with a bipartisan consensus.

Unfortunately, the bill pending before the House is neither bipartisan nor responsible. It was rammed through a number of House committees without addressing the concerns of Republican members. It is festooned with special-interest provisions, measures that are pure protectionism, and enough GATT-illegal actions to start a dozen trade wars.

For example, the bill would require an annual 10 percent reduction in our bilateral trade deficits with Japan, Taiwan and West Germany, through unilateral tariffs or quotas if necessary. This is superficially appealing, but as a real world solution it is dead wrong. Because it would violate our international obligations, other nations simply would respond by impeding our exports to the same degree that we impede theirs. As a consequence, our trade deficit would not improve. Our unwise action would only have reduced trade in both directions, costing us lost jobs and gaining nothing in the process.

The bill also would require the president to bring an unfair trade practice case against any nation that does not meet so-called "international" standards for worker rights. This would be impossible to implement fairly and might make the United States itself the target of similar complaints by nations that have more comprehensive labor laws. Though worker rights are a legitimate issue for negotiations, it is arrogant to attempt unilaterally to impose standards—of any kind—on the rest of the world.

Another provision would change the law concerning temporary relief for industries that cannot compete with imports so that an industry could receive relief even before it was shown that imports had damaged that industry. Such import relief should not be given so cavalierly, because it has a cost. Nations whose trade is injured because of our action have a legal right to "compensation." That means some of our most efficient industries—those that are internationally competitive—would pay the price for protecting less efficient ones.

There are other provisions in the bill that are equally troublesome. Most of them reflect a lack of confidence in America's ability to compete. Many have a thin market-opening veneer, but their timetables and procedures are so impractical that the real effect would be to turn America into a protectionist fortress.

America did not grow strong by erecting trade barriers and reneging on international obligations. We grew strong through competition. Our trade deficit is a major problem, but we can overcome it by making the right policy moves, not the wrong ones. To "save" jobs today by passing legislation that will assuredly cost us far more jobs in the future is sheer folly.

With jobs already at record levels, inflation under control, interest rates declining, oil prices at reasonable levels and America respected throughout the world, some in Congress see trade as their last remaining political issue in the November elections. They think they've got to "do something" about trade, regardless of how irresponsible it is.

If those who vote for the House trade bill really are hoping the President will save them from embarrassment by vetoing it, they're likely to get their wish.

OUR NATIONAL SECURITY DEMANDS A STRONG MERCHANT MARINE

HON. THOMAS J. MANTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. MANTON. Mr. Speaker, the Committee on Merchant Marine and Fisheries will soon consider H.R. 4136, a bill to establish a permanent building program of militarily-useful cargo ships. The effect of this legislation would be to increase significantly the number of U.S. flag vessels.

Under this build and charter program, the Government would contract to have vessels built in American shipyards. Private operators would then purchase or charter these ships. However, in the event of a national emergency or of war, they could be made readily available to serve the country as naval and military auxiliaries. A "military auxiliary revolving fund," administered by the Secretary of the Navy, would be set up for this program.

Mr. Speaker, the United States has long had a need for the type of build and charter program provided for in H.R. 4136. Our national security and the viability of our ailing merchant marine depend upon such a program. There are many very persuasive reasons for increasing the number of U.S. flag vessels. I will not reiterate these now, because they will be spelled out when H.R. 4136 is debated on the floor.

However, I would like to draw to the attention of my colleagues an eye-opening opinion piece entitled, "U.S. Can't Bow to Merchant-Marine Blitz," printed in Tuesday's Wall Street Journal. This piece, which was authored by retired Rear Adm. Robert J. Hanks, describes the Soviet Union's tremendous build-up of merchant vessels. This build-up has occurred while our merchant marine fleet has rapidly shrunk to a point where the United States has far fewer ships capable of serving us during a crisis period than has the U.S.S.R.

Mr. Speaker, we are not without a solution to this problem. The existing discrepancy between the merchant marine fleets of the United States and the Soviet Union would be eliminated if the Congress will enact H.R. 4136 into law. If our colleagues will simply read the following Wall Street Journal opinion piece, I am certain the acute problems posed by our dwindling merchant marine will receive immediate national attention and congressional action.

Mr. Speaker, I submit the Wall Street Journal article to be reprinted in its entirety.

[From the Wall Street Journal, May 13, 1986]

U.S. CAN'T BOW TO MERCHANT-MARINE BLITZ

(By Robert J. Hanks)

A war at sea is being waged against Western nations by the Soviet Union. The principal participants are not men-o'-war but mundane merchant ships and the rates being charged for commercial cargoes.

Unfortunately, this struggle has attracted scant attention in the U.S. While there have been Western casualties—shipping companies forced out of business and shipbuilding and repair yards closes—precious little is being done about them. The tragedy is the U.S., today, is as dependent on the sea as was England at the outset of World War II, for economic and military reasons. Yet the matter's generally greeted in Washington with a yawn.

The facts are these. From a tiny fleet in 1945—mostly U.S. lend-lease Liberty ships—the Soviet merchant marine had grown by 1984 to an astounding 2,457 ships (1,000 gross tons or over) totaling more than 23 million deadweight tons. In the world, it ranked second to Panama in numbers of ships and seventh in tonnage. By contrast, the U.S. could boast fewer than 500 merchantment. Moreover, cut-throat competition from Soviet ships has produced significant reductions in the fleets of America's European and Japanese allies.

Troublesome portents are embedded in these statistics, NATO, being a maritime alliance, would critically depend on seaborne transport of reinforcements and logistic supplies from North America in the event of a war in Europe. A continuous flow of food

and raw materials from overseas would also be required to sustain any war effort. At the same time, scores of merchant ships would be needed as auxiliaries to support NATO navies. The Falkland Islands war underlined the latter requirement. Allied capability to meet these commitments, however, steadily shrinks.

Why are the Soviets waging this non-shotting war? The answer is in a book. "The Sea Power of the State," by a former head of the Soviet navy, Admiral S.G. Gorshkov. He says the peacetime employment of merchant fleets is an integral part of the political and economic struggle between "antagonistic social systems."

The Soviet strategy in this war is simple: rate-cutting. The Soviet merchant fleet is a wholly subsidized creature of Moscow and can set cargo haulage rates well below market profitability floors. Offering carriage fees ranging from 10% to 40% below those floors. Soviet ships have made massive inroads in trade, not only to Third World countries, but along crucial Atlantic and Pacific Ocean routes as well. Obviously, Free World shipping companies cannot offer such rates and remain in business. Further, along those trade routes where the Soviet merchant fleet is not present in strength, ships from the U.S.S.R.'s East European satellites—also operating with government assistance—pursue identical policies.

How successful have the Soviets been? In a word: very. Two major U.S. shipping carriers—Pacific Far East Line Inc. and States Steamship Lines—have been bankrupted because U.S. free-market policies ask American shippers to compete against the Soviet government. In the Pacific, for example, the Soviet Far East Shipping Company and its Polish counterpart slashed rates to capture trade. When other low cost operators such as the Taiwanese followed suit, the American carriers simply could not longer compete for cargoes. Similar effects have been felt in strong maritime nations such as Britain, Sweden, West Germany, and Japan.

What, then, should be done about this economic war at sea? Some West European countries have taken steps to halt the decline of their merchant fleets. But Washington remains indifferent.

Several things can be done. First, more than lip service needs to be accorded the Merchant Marine Act of 1936, which emphasized the importance of a healthy merchant fleet to the security of this country. Next, Washington can insure that all government cargoes are carried in U.S. ships. (This includes food aid being sent to needy nations.) Negotiation of bilateral accords must be relentlessly pressed to reserve reasonable cargo percentages for American shipping companies. The U.S. would, in a pinch, need guaranteed access to container ship to carry military equipment.

The West can ignore the Soviet war on commercial shipping only at its peril.

(Mr. Hanks, a retired rear admiral, was director of strategic plans and policy in the Navy Department, 1976-77. He is author of a 1985 monograph, "American Sea Power and Global Strategy.")

BUSINESS ROUNDTABLE AND ECAT OPPOSE TRADE BILL

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. FRENZEL. Mr. Speaker, printed below are letters from two distinguished business groups, the Business Roundtable and the Emergency Committee for American Trade [ECAT], which vigorously oppose H.R. 4800, the trade package that will come up this week.

Both letters indicate that they could have supported legislation that was not so extreme. However, on balance, these groups view this legislation as contracting rather than expanding U.S. trade and economic activity.

I hope that my colleagues will review the sound advice given by these two groups.

The letters follow:

THE BUSINESS ROUNDTABLE, TASK FORCE ON INTERNATIONAL TRADE AND INVESTMENT,
New York, NY, May 7, 1986.

Hon. BILL FRENZEL,
U.S. House of Representatives,
Washington, DC.

DEAR REPRESENTATIVE FRENZEL: The Business Roundtable has worked with Congress for over a year in support of trade legislation. While we continue to believe that additional trade legislation is needed, we must oppose the trade bill recently approved by the Ways and Means Committee. In its current form the bill would adversely affect U.S. competitiveness. We urge you to vote against this bill unless it is substantially improved.

The Business Roundtable does support several provisions in the bill which would strengthen U.S. trade policy. These provisions include: the grant of negotiating authority for the next round of trade negotiations; the requirements for mandatory retaliation when there have been violations of international trade agreements; and the section permitting a more effective response to intellectual property rights violations.

Nevertheless, the good which these provisions might accomplish would be outweighed by other provisions, most of which were added to the bill as amendments during committee consideration.

One provision of the bill would, for example, permit U.S. companies to be sued retroactively for damages in dumping cases. Other harmful provisions would require unilateral action under U.S. trade laws against industrial targeting, and would permit unilateral action against countries which violate workers rights. Actions under either provision could well lead to action against the U.S. under international trade agreements as well as retaliation against U.S. exports.

Finally, the bill establishes an arbitrary formula to determine which countries have an "excessive trade surplus" on a bilateral basis with the United States. Under this provision, quotas could eventually be required against "trade surplus" countries. This protectionist provision would have little impact on the overall U.S. trade deficit, and could subject U.S. exporters to retaliation.

It is critical that Congress carefully evaluate this trade bill on the basis of facts, not emotions. If the goal is to increase U.S. competitiveness, as the Roundtable believes it must be, then the country needs aggressive use of present trade laws and carefully crafted amendments to improve those laws. In its current form, the Ways and Means trade bill would adversely affect U.S. competitiveness and should be modified or rejected.

Sincerely,

E.W. SPENSER,
Chairman.

PFIZER INC.,
New York, NY, May 12, 1986.

Hon. BILL FRENZEL,
U.S. House of Representatives,
Washington, DC.

DEAR MR. FRENZEL: While the trade reform bill reported out of the Ways and Means Committee, H.R. 4750, contains many desirable features, we in the Emergency Committee for American Trade (ECAT), of which I am chairman, urge that you vote against it. ECAT is an organization of the leaders of 60 large U.S. international firms with annual worldwide sales of about $700 billion and with over 5 million employees. We, therefore, have a keen interest in foreign trade legislation since both our businesses and the jobs of our workers are affected.

We believe that on balance the trade reform bill would contract rather than expand U.S. trade and economic activity. Since many of the bill's provisions are of questionable international legality and would require the imposition of U.S. import restrictions based on arithmetic and other arbitrary criteria, we think it reasonable to expect our trading partners to retaliate against U.S.exports and other economic interests. This will lower domestic economic activity with consequent job losses and lowered profitability of U.S. firms. What are needed are such steps as those reported out by the Foreign Affairs Committee that would amend the Foreign Corrupt Practices Act and export control legislation in a manner that will facilitate U.S. export control legislation in a manner that will facilitate U.S. exports.

We regret having to oppose the trade reform bill since we believe that appropriate reform will enhance the international trade posture of the United States. Last year's recommendations of both the House Democratic Trade Task Force and the House Republican leadership offered many sound reform proposals that we believe could be crafted into a trade reform bill that would be supported by the overall U.S. business community. It is regrettable that H.R. 4750 so substantially departs from the above proposals for trade reform.

The prospective new round of trade negotiations offers another opportunity to improve the international trading system and to develop new rules in the areas of investment, services, and the protection of intellectual property rights. International agreement seems to us to offer a significant opportunity for improving the international competitiveness of the United States.

Sincerely,

EDMUND T. PRATT, Jr.,
Chairman of the Board.

TRIBUTE TO WALTER R. McALLESTER, DEDICATED PUBLIC SERVANT AND PROTECTOR OF THE ENVIRONMENT

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. CONTE. Mr. Speaker, earlier this year, a good friend and a dedicated public servant retired from a long and successful career with the U.S. Department of the Interior.

During his career with the U.S. Fish and Wildlife Service, Walt McAllester had a lasting and positive impact on the Nation's wildlife resources, particularly migratory birds. As a major player in the Interior Department's realty operation, Walt McAllester participated in the acquisition of millions and millions of acres of wildlife and waterfowl habitat, and during his career, the number of National Wildlife Refuge System Units nearly doubled to its present 556 units. His work to preserve vital habitat for our wildlife resources will have lasting benefits for many future generations who will enjoy the beauty of this country.

After graduating from New York State College of Forestry in Syracuse, NY, with a BSF degree, Walter R. McAllester began his service as an appraiser in the regional office of the Fish and Wildlife Service in Atlanta on July 3, 1950. After 2 years, he transferred to the Boston regional office as a realty assistant and served there for 10 years, advancing to realty officer and finally to assistant regional supervisor.

In 1962, he accepted a post as a supervisory realty officer in the Office of the Chief, Division of Realty, in Washington, DC. After 3 years, he was selected as Assistant Division Chief, serving in that capacity for 6 years. In 1971, he was promoted to Division Chief, the position from which he recently retired. In all, this amounts to 35 years of steadily advancing responsibility and authority. Using his creative talents and with a determined commitment to preserve our natural resources, Walt produced results, especially during his tenure as Chief of the Realty Division.

Between 1970 and his recent retirment, 176 new acquisition projects were approved in Fish and Wildlife Service programs. These projects protected 1.7 million acres of wildlife habitat around the country. In the State of Alaska alone, since 1970, National Wildlife Refuge acreage jumped from about 20 million acres to over 77 million acres today. Since Walt McAllester became Division Chief, over 57 million acres of vital wildlife habitat were protected in Alaska alone.

In the lower 48 States, other significant refuges were added to the system during this time period. In California, the Grasslands area was identified as vital habitat, and an aggressive easement and acquisition program was developed to presserve this important migratory bird area. Likewise in Texas, the Lower Rio Grande Valley area was designated as a priority within the refuge system.

Although I worked with him on many of the Department's acquisition projects, my close association with Walt began many years ago when he was appointed the Secretary of the Migratory Bird Conservation Commission. As a 20-year veteran of the Commission, I worked closely with Walt McAllester, relying many times on his judgment and expertise in the realty area. His knowledge of land acquisition methods, Federal laws and regulations governing acquisition, disposal, and utilization of real estate is unsurpassed. His talents are recognized by his peers in other agencies, by Members of Congress, and by leadership of the private fish and wildlife resource groups.

Throughout his career, Walt McAllester was identified as an innovator and an expediter without sacrifice of principle. His abilities as an astute manager were utilized by the Fish and Wildlife Service on a daily basis. Over the years, top management in the Interior Department consistently relied on his counsel for both realty issues and broader policy matters.

Mr. Speaker, Walt McAllester was a dedicated public servant who worked hard to protect our precious natural resources. As a friend, he will be missed on the Washington scene, but more importantly, his work with land acquisition programs will leave a void in the Department's operation.

As a longtime friend, I wish Walt the best of luck and happiness as he begins a well-deserved retirement.

KEEP THE PRESSURE ON PINOCHET

HON. DOUG BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. BEREUTER. Mr. Speaker, recent press reports detail on ominous new development in Chile, where an expensive series of military raids through Santiago's poorer neighborhoods is said to be underway. Ostensibly antiterrorist sweeps, the raids, some observers believe, are meant to convey a not-so-subtle message to civilian groups calling for an early return to democracy.

It may be that this interpretation does an injustice to the Chilean Government. But things have come to such a pass in that country, and suspicions run so high, that even legitimate Government actions are likely to be interpreted in the manner most unfavorable to the Pinochet regime.

Mr. Speaker, less than 2 months ago in remarks on this floor, I urged free elections for Chile by 1989 or sooner. Today I renew that call, and I urge my colleagues in the House and in the other body, as well as the administration, which has made some heartening moves in this direction, to join me. The principle by which we should operate until such a time as the Chilean people are once again free to exercise the democratic freedoms which are such a cherished part of their history is the title of a Christian Science Monitor Editorial headline, which I commend to my collegues. The headline is: "Keep the Pressure on Pinochet."

KEEP THE PRESSURE ON PINOCHET

In the past two years a dominant political theme throughout Latin America has been the replacement of military rule by popularly elected governments—from Argentina, in the extreme south, to Guatemala and El Salvador.

By contrast, in one Latin American country—Chile—authoritarian government remains in control despite three years of alternately rising and falling popular pressure for democracy.

Now the Chilean political opposition has again served notice on President Augusto Pinochet, in charge of the nation since 1966, that it wants firm steps taken toward democracy—this time, with somewhat brighter prospects for success.

For one thing, the Reagan administration in recent months has pressured General Pinochet—correctly—to move toward democracy. For another, in a break from the past all but the extreme elements of Chile's previously fragmented opposition have managed to agree not only on what they want—inclusion in the political process—but on how they intend to press for it. An assemblage of opposition groups threatened a general strike in 30 days if Pinochet does not move to provide public participation in politics, which he is unlikely to do; previously, opposition parties on the right had been unwilling to take to the streets. The ultimatum is likely to reinvigorate the demand for reform toward democracy issued last August in an accord signed by non-Marxist opposition parties.

The big unknown is the military. At year's end Pinochet reorganized its top command, in a move apparently designed to reduce opposition. Although the Army is believed to be loyal to Pinochet, other branches of the military may be restless; if the military decides to pressure Pinochet to step down, an important new element will be introduced.

Time is a factor. The opposition seeks to have the next president chosen by open and popular election, at present, Pinochet's successor is to be nominated in 1989 by the four military commanders, and only then presented to the public for its approval in a one-candidate referendum, and for a term of eight years. If such a referendum takes place, the political opposition fears that a truly democratic election will not be scheduled until 1997.

The opposition wants a return to democracy by 1989, which seems a reasonable goal. But such a change would require the Chilean government to take steps shortly to legalize political parties and to restore freedom of the press—elemental moves which ought to be made.

FRED FREDERICK AWARDED JOURNAL TROPHY

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. HOYER. Mr. Speaker, on Tuesday, May 20, 1986, Mr. Fred Frederick of Laurel, MD, will be awarded the Journal Trophy by the Prince Georges Civic Federation in conjunction with the Prince Georges Journal newspaper. For many years, the trophy was sponsored by the Washington Star. Awarded nearly every year since 1939, recipients number some of the most distinguished civic activists in the history of Prince Georges County.

Mr. Frederick is the recipient of this prestigious award in recognition of a lifetime of civic activity. Most recently, he served as vice

chairman of the community hospital and health care system, the leasee of the Prince Georges hospital system. When confronted with evidence of mismanagement which was leading to rapid decay in the hospital system, Mr. Frederick resigned on principle to call attention to these serious problems. His courageous action led to a recommitment to quality health care on the part of an all new board.

We are now on our way to returning our county hospital system to the quality it has known in the past. Once this mission has been accomplished, one person the citizens of our county will have to thank is Mr. Fred Frederick, who had the courage of conviction to take a positive action, when remaining silent might have been the easier course to follow.

This latest example of civic activism and concern is but one mark in a 34-year career of success in business and involvement in community activities. A former U.S. Marine, Mr. Frederick started his own automobile dealership at the age of 27. He is now so respected that he serves as chairman of the National Chrysler Corp. Dealer Council. At one time or another, he has served as president of the Laurel Board of Trade, the Laurel Chamber of Commerce, the Laurel Lions Club. As an alumnus of the University of Maryland, I am especially proud to note that Mr. Frederick has served as president of the Maryland Terrapin Club.

Mr. Speaker, I am sure that you and our colleagues will agree that Fred Frederick represents the best of the thousands of citizens who give their time, energy and commitment to our communities without financial reward. Without them, community life in our country would be sorely lacking. I am sure you will all join in offering congratulations and thanks to Mr. Frederick, a man of principle.

HONORING SCHMIDT'S SAUSAGE HAUS RESTAURANTS

HON. CHALMERS P. WYLIE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. WYLIE. Mr. Speaker, this year marks the 100th anniversary of Schmidt's in Columbus, which started with the J. Fred Schmidt Packing Co. in 1886, and evolved into Schmidt's Sausage Haus Restaurants. Schmidt's restaurants are famous for their homemade meats, sausages, and pastries. In addition to producing fine food, the Schmidt family is known for its tradition of civic and community involvement spanning five generations.

Today, Schmidt's has grown to four restaurants serving its culinary delights to thousands of Columbus area residents—certainly an American success story given Schmidt's beginnings back in 1886 when the J. Fred Schmidt Packing Co. was founded at 253 East Kossuth Street. This meat packing plant was the brainchild of a new partnership formed between a young German immigrant, J. Fred Schmidt and Lew Barnhart. Soon thereafter, J. Fred bought out his new partner and became sole owner of the J. Fred Schmidt Packing Co.

When Fred passed away at a young age, his wife Lena took over the business while rearing five children. One of their sons, George L., assumed the management operation of the J. Fred Schmidt Packing Co. at age 15 and ran the packing company until his retirement in 1941 at age 51. He said he had worked long enough and turned the business over to his oldest son, Fred, who ran the company until he passed away at the age of 37 in 1952. His brothers, George F. and Grover, continued the family tradition. George L. kept his hand in the business as an adviser to his sons and passed away in 1972 at the age of 81.

Although Schmidt's produced and distributed only pork products in the beginning, they eventually supplied a full line of meat products, frozen foods, and margarine.

Growing with the demand for Schmidt's quality products, the size of the operation expanded to distributing its products to grocers within a 130-mile radius of Columbus.

During the 1960's, large grocery chain price wars and city ordinances against slaughtering livestock within city limits led to the closing of the beef packing plant in 1964 and the pork packing plant closed 2 years later.

The closing of the packing plants marked the end of a proud era for the family. But with it came the advent of a remarkable new era for the Schmidt family. This new era, for which countless Columbus families and residents are thankful, was the beginning of their restaurant business.

Going into the restaurant business was a logical progression for the Schmidt family since George L. Schmidt had cooked and sold his products at the Ohio State Fair since 1915. May I say an annual tradition with our family is a stop at the Schmidt's tent during the Ohio State Fair for bratwurst and sauerkraut, or a Bahama Mama and one of their delicious cream puffs. In 1967, George F. and Grover Schmidt decided to open a combination restaurant and retail meat store in a renovated building where the packing house once stood.

Within weeks after opening, the new restaurant became extremely popular and the dining areas had to be enlarged. In 1970, the restaurant operation was expanded once again when George and Grover purchased a building just around the corner from the original meat packing house, which became known as the Fudge Haus.

Since 1967, Schmidt's restaurants have become a phenomenal growth and success story. In 1971, a second restaurant was opened. Then in 1979, Grover sold out to his brother George and moved to Florida. George F. and his wife Betty, produced three fine sons and two wonderful daughters who are active in the business. The Schmidt's restaurants are indeed a real family affair.

Throughout their splended history in Columbus, the Schmidts have been a family who have also been deeply involved with the city. Their participation ranges from coownership of the old Columbus Bulls professional football team to active support for the arts. In fact, the Schmidt's patronage for the arts today has resulted in George Schmidt's possessing one of the largest collections of art painted by German Village artists.

For 100 years, the Schmidt family has worked on behalf of Columbus and its people. In addition to their numerous contributions to the city through an active role in many civic and cultural events, they also are active supporters of charitable organizations such as the March of Dimes, Children's Hospital, Multiple Sclerosis, and Charity Newsies.

It is this proud heritage that has been the hallmark of the Schmidt family and has left an invaluable imprint on the quality of life in Columbus. As Schmidt's heads toward its second century serving the people of Columbus, I think it is most appropriate that we look back upon its proud history and salute the many accomplishments of this fine family. Their contributions to the city of Columbus have enriched the lives of us all and for that, we say thank you.

CONGRESSIONAL SALUTE TO THE REVEREND WALTER M. PRUSCHOWITZ UPON THE 25TH ANNIVERSARY OF HIS ORDINATION

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. ROE. Mr. Speaker, on Sunday, May 25, the residents of my congressional district and State of New Jersey will join with the members of the congregation of Holy Trinity Roman Catholic Church, Passaic, NJ, to give testimony to an exemplary clergyman and good friend, the Reverend Walter M. Pruschowitz, as we celebrate the 25th anniversary of his consecration into the Sacrament of Holy Orders.

Mr. Speaker, the faith and devotion of our people in a full communion of understanding, ever caring and respecting the individual religious beliefs of his or her fellowman has been the lifeline of our democracy—ever inspiring our people with hope and urging the individual on to great achievements and purpose in pursuing the fulfillment of his or her dreams and ambitions. The exemplary leadership and outstanding efforts of our citizens so important to our quality of life are in the vanguard of the American dream and today we express our appreciation to Father Pruschowitz whose dedication and unselfish devotion in promulgating spiritual guidance, goodwill, fellowship, and brotherhood in service to God have truly enriched our community, State, and Nation.

Father Pruschowitz has maintained the highest standards of excellence throughout his lifetime and we are pleased to share the pride of his many, many friends and parishioners in his distinguished achievements, so unselfishly dedicated to the betterment of mankind. There is so much that can be said of the love, affection, and reverence with which Father Walter is held by all who have had the good fortune to know him.

It is interesting to note that he was born in Schwaz, Czechoslovakia, the son of the late Anton and Olga Brunner Pruschowitz. He attended high school in Benediktbeuern, Germany and completed his undergraduate studies at Don Bosco College, Newton, NJ. He

joined the teaching faculty at Don Bosco High School in Ramsey, NJ and subsequently decided to expand his career as an educator through theological studies for the priesthood. In 1957 he enrolled at the Immaculate Conception Seminary, Darlington, NJ, and completed his studies for the priesthood in 1961. On May 27, 1961, he was ordained a priest at St. John the Baptist Cathedral, Paterson by the Most Reverend Bishop James A. McNulty.

On August 27, 1961, Father Pruschowitz was assigned to Holy Trinity Church, Passaic, as assistant pastor. On August 27, 1968 he became associate pastor at Immaculate Conception Church, Franklin, NJ, and in December 1971 he returned to Holy Trinity Church. He was named copastor of Holy Trinity Church on March 22, 1977. In 1984 he became national associate praeses of the Catholic Kolping Society of America.

Mr. Speaker, I appreciate the opportunity to present this brief profile of a distinguished man of God who has dedicated his life's purpose and fulfillment to helping others and guiding them in their pathway of life. The quality of his leadership is mirrored in the security and dignity that his parishioners have found in the comfort and aid he unselfishly and willingly gives to those in need and those who seek his helping hand and spiritual guidance.

Mr. Speaker, as Father Walter celebrates the 25th anniversary of his ordination to the priesthood I know that you and all of our colleagues here in the Congress will want to join with me in extending our warmest greetings and felicitations for the excellence of his service to his church, our Nation, and all mankind. We do indeed salute an esteemed clergyman upon the celebration of the silver jubilee of his ordination to the priesthood—the Reverend Walter M. Pruschowitz of Holy Trinity Roman Catholic Church, Passaic, NJ.

CONGRATULATING MICHAEL KITTREDGE ON BEING NAMED MASSACHUSETTS SMALL BUSINESS PERSON OF THE YEAR

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. CONTE. Mr. Speaker, I rise today to congratulate Mr. Michael Kittredge, president of Yankee Candle Co., Inc. of South Deerfield, MA, on being named the 1986 Massachusetts Small Business Person of the Year by the U.S. Small Business Administration.

Michael Kittredge exemplifies the American entrepreneurial spirit. In fact, one might say that his candle factory fits the mold of the successful small business. Mr. Kittredge began his business as a high school senior nearly 20 years ago in the kitchen of his family's home with a pound of canning wax, four crayons, and a milk carton. Mr. Kittredge invested the money that he received from the sale of his first batch of candles to finance his first business expansion: he purchased a larger supply of canning wax and two tin molds. Since that time, Yankee Candle has grown rapidly, often faster than Mr. Kittredge might have wished.

In 1971, Yankee Candle was moved into 2,000 square feet of commercial space in Holyoke, MA. Although only 2 years old, the company had already posted an annual sales mark of $10,000, and its inventory had filled the family garage. The new location, known only as "the factory," at first had no electricity, heat, or water. With a constantly growing staff and inventory, however, the factory was steadily expanded to over 14,000 square feet over the next decade. In 1983, Yankee Candle employed a staff of 30 and produced an annual sales intake of $921,000. By hiring a private advertising firm and producing an annual catalog, Kittredge extended his market for decorative candles throughout New England and nationwide. Through his initiative, Yankee Candle is now the largest handcrafted candle company in the United States.

By 1983, it had become obvious that Yankee Candle had outgrown "the factory." With the aid of a Small Business Administration loan, Mr. Kittredge purchased a parcel of land in South Deerfield, MA, with ample room for development and ready highway access. Today, Yankee Candle has already undergone one expansion and is in the process of another. An attractive factory outlet store on the premises has drawn thousands of customers from across the Northeast. Mr. Kittredge's phenomenal success shows no sign of slowing down.

Michael Kittredge has neither sought his goals with blind adverturism nor has he shied away from adversity. Instead, he has simply pursued his market with a product and a plan. With determination, foresight, and a keen knowledge of his consumers' tastes, Mr. Kittredge has transformed a vision born on the backburners of a kitchen stove into the largest handcrafted candle operation in the United States. His vital combination of sound business sense and planning for the future has earned Michael Kittredge the respect and admiration of small businessmen in Massachusetts and throughout the Nation.

THE JAPANESE CULTURAL AND COMMUNITY CENTER OF NORTHERN CALIFORNIA [JCCCNC]

HON. SALA BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mrs. BURTON of California. Mr. Speaker, it gives me great pleasure to tell my colleagues of the completion of the Japanese Cultural and Community Center of Northern California [JCCCNC].

Since the early 1970's, the members of the JCCCNC have been working toward the formation of a community facility. The redevelopment initiative of the western addition/Japantown area of San Francisco forced many of the established businesses and residents to relocate out of this location and thus, a concern to reestablish and foster the growth of a cultural and social institution, and to preserve and carry on the programs and activities for future generations became a major concern for the members of JCCCNC and other supporters and members of the Japantown community.

After years of dedicated planning and research, the JCCCNC members conducted a community-wide campaign in the spring of 1983 for the construction of a $3 million facility. Under the leadership of Yori Wada as the chair of the Center's Vision 80's Capital Campaign along with 150 volunteers, JCCCNC successfully raised close to $2 million in contributions, pledges, and foundation and public moneys.

The long awaited opening of the JCCCNC facility opened to the public during the annual cherry blossom festival last month. The facility is a two story building located on Sutter Street that houses various human service organizations such as billingual legal assistance, special services for seniors and immigrants and cultural and performing arts organizations. Their future plans are to complete the facility by creating a community hall/gymnasium for community meetings, recreational afterschool and summer programs for children and youth.

In continuation with their fundraising efforts, the JCCCNC will sponsor a Community Awards Dinner on May 17 honoring community leaders of all generations of Japanese ancestry. The honorees will be: Mr. Yasuo Abiko, former vice-president and english editor of the Nichi Bei Times; Archbishop Nitten Ishida, president of the Japanese American Religious Federation; Mr. Steve Nakajo, executive director of Kimochi, Inc.; Ms. Kay Okamoto, director of the Hamilton Senior Center Program; and Mr. Yukio Sekino, president of the Nichi Bei Kei.

I would personally like to congratulate and add my support for these individuals who will be honored at the JCCCNC dinner and to also commend the staff and the many volunteers and supporters of the JCCCNC project for their years of dedicated and committed service to preserve the unique history and heritage of Japanese Americans.

TRIBUTE TO JULIA AND NED R. ARNOLD

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. ACKERMAN. Mr. Speaker, I rise today in tribute to Julia and Ned R. Arnold, who will be honored at a reception on May 22, 1986, for their support of Booth Memorial Medical Center of Flushing, NY.

Julia and Ned have served as community leaders in New York for over 40 years. Ned's civic involvement goes back to his participation in the Office of Price Administration during World War II, when he was one of only 12 representatives from the rubber industry. Since then, his actions have vividly demonstrated his belief that it is the responsibility of businessmen and all American citizens to take an active civic role.

Ned Arnold's achievements over the decades are too numerous to mention. He was a six-term president of the Queens Chamber of Commerce; he chaired the Queens Chapter of the Red Cross, and was on the executive

board of the New York City Red Cross; and he has been on the New York State Business Council. Throughout these and other activities, Ned Arnold has shown a remarkable conviction that one person can make a substantial difference to a community, city, or the great State of New York.

Julia and Ned will be honored this week not just for these accomplishments, but for all that they have done for Booth Memorial Medical Center. The Arnolds have been actively involved in the growth and success of Booth Memorial since its opening in 1957. Ned has worked on the advisory council since that year, and has served as president of that council. He has also taken part in many of the other day-to-day activities that have made Booth Memorial such a well-regarded medical center.

Julia has been active in the women's auxiliary, and has taken part in much of her husband's excellent work on behalf of Booth Memorial. Most recently, the Julia and Ned R. Arnold Health Education Fund, established by the family to further the hospital's growth, is sponsoring an exciting lecture program called, "The Broadcast Series," which features members of the media speaking on health-related topics.

Mr. Speaker, it is men and women such as Ned and Julia Arnold who make our open, participatory society work. Without them, we would be faced with a choice of a big brother-like governmental control and anarchy. The Julia and Ned Arnolds of this world are the people to reach out and make certain that our communities work.

Mr. Speaker, I call now on all of my colleagues in the U.S. House of Representatives to join me in wishing the best of luck to Julia and Ned Arnold, as they are honored for their contributions to Booth Memorial Medical Center and the Greater Queens Community.

TRIBUTE TO DR. ERNST KATZ

HON. HOWARD L. BERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. BERMAN. Mr. Speaker, I rise today to pay tribute to an outstanding member of my community, Dr. Ernst Katz. Dr. Katz is the conductor and founder of the Junior Philharmonic Orchestra of California. Dr. Katz's motto, since he founded this group in 1937, has been "Give Youth a Chance To Be Heard." Each year, young musicians from all areas in southern California audition for the opportunity to be one of its 110 members. On May 28, 1986, the Junior Philharmonic will be celebrating its 49th anniversary and the 100th anniversary of the Statue of Liberty with a concert gala.

The Junior Philharmonic is unique in that it is the only orchestra in the world which is completely noncommercial, not subsidized by the Government, does not solicit contributions, does not charge audition or membership fees, and has volunteered hundreds of performances raising more than $9 million for charities. The orchestra is supported entirely by its founder-conductor, Dr. Katz, who has dedicated himself to the youth and music of America. For these reasons, and because of his work in the training and development of young musicians, Dr. Katz and the Junior Philharmonic have been honored by Presidents of the United States, Members of Congress, Governors of California, the California Legislature, and the county and city of Los Angeles.

Many world-famous composers and musicians have appeared with the Junior Philharmonic and are honorary members of the orchestra. They include Jerome Kern, Oscar Straus, Sigmund Romberg, David Rose, Meredith Willson, Ernest Gold, Ferde Grofe, Frederick Loewe, Richard and Robert Sherman, Alan and Marilyn Bergman, Dimitri Tiomkin, Rudolf Friml, Jose Iturbi, and Isaac Stern.

A number of alumni of the Junior Philharmonic Orchestra have become professional musicians and are now members of symphony orchestras throughout the world. Others have chosen different fields of endeavor and have raised families and built careers in law, medicine, business, and education. All, however, have had a unique experience because of their membership in the Junior Philharmonic, an experience which shaped and enriched their lives.

It is my honor to join with my colleagues and the Junior Philharmonic Orchestra in saluting Dr. Ernst Katz, an invaluable resource to his community and a truly remarkable human being.

KILDEE HONORS FLINT NORTHERN HIGH SCHOOL DISTINGUISHED FELLOW AWARD WINNERS

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. KILDEE. Mr. Speaker, I rise today to bring to the attention of my colleagues and the Nation a special recognition ceremony that will be held Wednesday, May 21, 1986, in Flint, MI, honoring several Flint Northern High School Distinguished Fellow award winners. These gifted and multitalented honorees have been selected from Northern alumni as a result of their many and significant achievements. Augustus Calloway, Jr., Sidney Davidson, Barbara Forker, Fred Henny, Roy Sandstrom, and Birney Van Benschoten will be the first recipients of this highly coveted award.

Over the years, these graduates of Northern have consistently and brilliantly demonstrated their skilled proficiency in their chosen careers. The late Augustus Calloway, Jr. was a member of the first graduating class of Flint Northern in 1929 and enjoyed great success in his career with Michigan Bell. His many titles and awards attest to his benevolent spirit of giving to help those less fortunate then himself. Prof. Sidney Davidson's illustrious career personifies the goals of even the most ambitious of aspiring accountants. His rich and diverse involvement in accounting, economics, and finance has propelled him to the forefront of American business, education, and government. At the top of the health, physical education, and recreation fields, Dr. Barbara E. Forker has succeeded in continually meeting and surpassing her ambitious career objectives. She is currently the distinguished professor and head of physical education and leisure studies at Iowa State University. Dr. Fred Henny has greatly distinguished himself in the field of oral surgery. Now residing in Birmingham, MI, Dr. Henny's thirst for excellence brought him to the pinnacle of success as an oral surgeon. His outstanding career culminated with his position as associate chairman of oral and maxillofacial surgery at Sinai Hospital in Detroit. As the product engineer for the X-1 supersonic airplane, Mr. Roy Sandstrom became part of aviation history when Chuck Yeager piloted the Sandstrom-engineered aircraft and broke the sound barrier in 1947. A first class engineer, Roy Sandstrom never listened to those who said it could not be done. Professor Birney Van Benschoten's preeminent career in the field of law has brought forth many honors and a long trail of great success. Professor Van Benschoten is currently serving as the adjunct professor of International law at Amherst.

Mr. Speaker, the collective success of this highly distinguished group of Americans is astounding. These Distinguished Fellow award winners of Flint Northern High School have set the highest of standards for their fellow alumni to follow. I take great pride and I am extremely honored to have had the opportunity to pay tribute to these awe-inspiring graduates of Flint Northern High School.

RETIREMENT OF GEN. WILLIAM R. RICHARDSON

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. SKELTON. Mr. Speaker, I take the floor today to pay tribute and announce to my colleagues the retirement of an outstanding military officer, Gen. William R. Richardson, who is stepping down as the commanding general of the U.S. Army Training and Doctrine Command [TRADOC].

He has held a wide variety of important command and staff positions culminating in his current assignment in Fort Monroe, VA. Other key posts held recently include dual responsibility as deputy commanding general of TRADOC and the commanding general of the U.S. Army Combined Arms Center at Fort Leavenworth, KS; and deputy chief of staff for operations and plans at Army Headquarters, Washington, DC.

After graduation from the U.S. Military Academy in 1951, General Richardson was commissioned as a second lieutenant. His military education includes completion of the infantry basic and advanced officer courses, the U.S. Army Command and General Staff College, and the Industrial College of the Armed Forces.

Awards and decorations which General Richardson has received include the Distinguished Service Medal, the Silver Star (with one Oak Leaf Cluster), the Legion of Merit (with two Oak Leaf Clusters), and the Distin-

guished Flying Cross. He has also been awarded the Bronze Star Medal (with three Oak Leaf Clusters), several Air Medals, the Army Commendation Medal (with two Oak Leaf Clusters), and the Purple Heart.

Mr. Speaker, I feel certain that all the Members join me in praising this distinguished American soldier for his many years of dedicated service to his country, and in wishing General Richardson and his wife, the former Mary Bailey, and their three sons, William, Jr., David, and John all the best in the many years to come.

TRIBUTE TO DR. WILLIAM T. CARTY

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. LAGOMARSINO. Mr. Speaker, it is a privilege for me to pay tribute today to a distinguished citizen from my district, Dr. William T. Carty. As a scholar, educator, and administrator, Dr. Carty has dedicated his entire adult life insuring that thousands of students received quality educations to equip them with the skills necessary to lead successful lives.

Thirty-six years ago Dr. Carty received his doctor of education degree and began working as a teacher. Since then he has served the education field as an instructor, a principal, and he will retire this year from 25 years as the Superintendent of the Carpinteria Unified School District.

Throughout his carreer he has set an example as an educational leader by vigorously continuing his own education. After receiving his doctorate he returned to the university 6 years later to do postgraduate work in the field of psychology and pupil personnel services. In 1981 he returned to take computer literacy courses.

As a young, man Dr. Carty was a volunteer in the U.S. Navy and fought in the Pacific Theater. He was awarded a one battle star and a commendation for bravery. Within the educational field he has received awards for administrative and academic excellence, and is a member of various academic boards.

Dr. Carty has been a leading member in a Carpinteria community. He has worked with the Red Cross, United Way, Crippled Children's Fund. He has also been in the local chamber of commerce and a church member. His outstanding participation in the community illustrates his sincere concern for its growth and prosperty.

The retirement of this distinguished citizen, dedicated family man and educational role model is a loss to Carpinteria. He will be missed by all who have been touched by his professionalism, leadership and personal involvement. He leaves behind a legacy of excellence that will provide a challenge and an example to his successor.

HONORING CHRIS GELLEPIS OF THE UNITED STEELWORKERS OF AMERICA, DISTRICT 39

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 19, 1986

Mr. TORRES. Mr. Speaker, I ask my colleagues in Congress to join me in honoring the service and dedication of Chris Gellepis.

On June 1, 1986, Mr. Gellepis will be retiring as a key staff representative for the United Steelworkers of America. He has served for over 39 years in the labor movement. As an advocate for workers rights, Mr. Gellepis has firmly represented unions in contract negotiations, grievance procedures, arbitration conflicts, and organizing drives. He was appointed legislative coordinator to represent the steelworkers in the Greater Los Angeles area until his retirement this year.

Mr. Gellepis is a native of South San Francisco and attended the University of California, Berkeley for 3½ years. He worked as a shift chemist for Bethlehem Steel for 6 years and was appointed to the staff of the Steelworkers of America, AFL–CIO, in 1947.

As the legislative coordinator for the steelworkers, Mr. Gellepis worked hard to promote civil and workers rights. His efforts helped produce legislation protecting and benefiting all the citizens of California. He also improved techniques for voter registration, voter education and get-out-the-vote drives. He is recognized as a leader in coordinating labor and community groups for voter education and registration drives.

Mr. Speaker, I want to commend the dedication and commitment Mr. Chris Gellepis has given to the labor movement. He has been an unselfish trade unionist and involved citizen. His leadership has furthered economic and social justice for all working Americans and their families. I wish him all the best on his well-deserved retirement.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, May 20, 1986, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

MAY 21

9:00 a.m.

Special on Aging

To hold hearings to review nursing home care services.

SD-628

9:30 a.m.

Appropriations

Commerce, Justice, State, the Judiciary, and Related Agencies Subcommittee

To hold hearings on proposed budget estimates for fiscal year 1987 for the U.S. Information Agency, and the National Endowment for Democracy.

S-146, Capitol

Armed Services

Strategic and Theater Nuclear Forces Subcommittee

To resume hearings on S. 2199, authorizing funds for fiscal year 1987 for the Department of Defense, focusing on the Federal Emergency Management Agency, and to discuss nuclear reactor safety issues.

SR-222

Banking, Housing, and Urban Affairs

Financial Institutions and Consumer Affairs Subcommittee

To hold hearings on S. 2421, proposed Fair Credit Card Act of 1986.

SD-538

Judiciary

Patents, Copyrights and Trademarks Subcommittee

Business meeting, to mark up S. 1739, to legalize the home taping of copyrighted music and other audio material in exchange for a royalty on audio recording equipment.

SR-485

Select on Intelligence

To hold closed hearings on intelligence matters.

SH-219

10:00 a.m.

Agriculture, Nutrition, and Forestry

To hold hearings on the nominations of Peter C. Myers, of Missouri, to be Deputy Secretary of Agriculture, and Christopher Hicks, of Maryland, to be General Counsel, Department of Agriculture.

SR-332

Energy and Natural Resources

Business meeting, to resume markup of S. 2427, to improve the administration of the Federal coal leasing program.

SD-366

Judiciary

To resume hearings on S. 2160 and S. 2022, bills to clarify and improve the analysis of mergers under the antitrust laws.

SD-226

Labor and Human Resources

To hold oversight hearings on strategies to reduce hunger in America.

SD-430

Small Business

Business meeting, to mark up S. 2147, to extend the authorization for nonprofit organizations operated in the interest of handicapped and blind individuals to receive procurement contracts under the Small Business Act, and H.R. 2787, to extend through fiscal year 1988 SBA Pilot Programs under section 8 of the Small Business Act.

SR-428A

Joint Economic
Economic Resources, Competitiveness, and Security Economics Subcommittee
To hold hearings to review the effects of legal and illegal immigration on the U.S. economy.
2220 Rayburn Building

11:00 a.m.
Foreign Relations
Business meeting, to consider pending calendar business.
SD-419

2:00 p.m.
Judiciary
To hold hearings on pending nominations.
SD-226

Rules and Administration
Business meeting, to consider pending calendar business.
SR-301

MAY 22

10:00 a.m.
Joint Economic
Economic Resources, Competitiveness, and Security Economics Subcommittee
To continue hearings to review the effects of legal and illegal immigration on the U.S. economy.
2220 Rayburn Building

MAY 29

9:30 a.m.
Joint Economic
Economic Resources, Competitiveness, and Security Economics Subcommittee
To resume hearings to review the effects of legal and illegal immigration on the U.S. economy.
2359 Rayburn Building

JUNE 3

9:30 a.m.
Commerce, Science, and Transportation
Business meeting, to consider pending calendar business.
SR-253

Energy and Natural Resources
To hold oversight hearings on the implementation of the Public Utility Regulatory Policies Act (P.L. 95-617).
SD-366

Finance
To hold hearings on S. 2331, to assure the quality of inpatient hospital services and post-hospital services furnished under the Medicare program, and related matters.
SD-215

10:00 a.m.
Environment and Public Works
To hold hearings on the expansion of the Pavilion at the Old Post Office Building in the District of Columbia.
SD-406

Governmental Affairs
Energy, Nuclear Proliferation and Government Processes Subcommittee
To hold joint hearings with the Committee on Labor and Human Resources' Subcommittee on Aging on statistical policy with regard to older Americans.
SD-430

Labor and Human Resources
Aging Subcommittee
To hold joint hearings with the Committee on Governmental Affairs' Subcommittee on Energy, Nuclear Proliferation and Government Processes on statistical policy with regard to older Americans.
SD-430

2:00 p.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1987 for fossil energy and clean coal technology.
SD-192

JUNE 4

9:30 a.m.
Appropriations
Commerce, Justice, State, the Judiciary, and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1987 for the Departments of Commerce, Justice, and State, the Judiciary, and certain related agencies.

10:00 a.m.
Commerce, Science, and Transportation
Merchant Marine Subcommittee
To hold hearings on S. 1935, to provide for certain vessels to be documented under the laws of the United States to entitle them to engage in domestic coastwise trade.
SR-253

Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Labor and Human Resources
To hold oversight hearings to review the imposition of user fees in FDA approval procedures for new drugs.
SD-430

JUNE 5

9:30 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To hold hearings on S. 2256, to remove certain requirements relating to reservations of funds for special alternative instructional programs and transitional bilingual educational programs.
SD-430

10:00 a.m.
Energy and Natural Resources
To resume oversight hearings on the implementation of the Public Utility Regulatory Policies Act (P.L. 95-617).
SD-366

2:00 p.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1987 for the National Edowment for the Arts, and the Institute of Museum Services.
SD-192

JUNE 9

10:00 a.m.
Energy and Natural Resources
To hold oversight hearings on clean coal technology development and strategies of acid rain control
SD-366

JUNE 10

9:30 a.m.
Environment and Public Works
Environmental Pollution Subcommittee
To hold oversight hearings on ozone depletion, the greenhouse effect, and climate change.
SD-406

10:00 a.m.
Energy and Natural Resources
To continue oversight hearings on clean coal technology development and strategies for acid rain control.
SD-366

2:00 p.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1987 for the Office of the Secretary and Office of the Solicitor, Department of the Interior.
SD-192

JUNE 11

9:30 a.m.
Environment and Public Works
Environmental Pollution Subcommittee
To continue oversight hearings on ozone depletion, the greenhouse effect, and climate change.
SD-406

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Labor and Human Resources
To hold hearings on efforts to improve the health status of children.
SD-430

JUNE 12

9:30 a.m.
Energy and Natural Resources
Public Lands, Reserved Water and Resource Conservation Subcommittee
To hold hearings on S. 2204, to permit the use of park entrance, admission, and recreation use fees for the operation of the National Park System, and S. 2130, to preserve, protect and revitalize the National Park System.
SD-366

Select on Indian Affairs
To hold hearings on S. 830, to expand Indian education programs to include Native Hawaiians.
SR-485

10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume joint oversight hearings with the House Committee on Education and Labor's Subcommittee on Elementary, Secondary and Vocational Education on illiteracy in America.
2175 Rayburn Building

JUNE 16

1:00 p.m.
Energy and Natural Resources
Energy Research and Development Subcommittee
To hold oversight hearings on the second waste repository site selection under the Department of Energy's Office of Civilian Radioactive Waste Management.
SD-366

JUNE 17

9:00 a.m.
Environment and Public Works
Nuclear Regulation Subcommittee
To hold hearings on S. 1235 and S. 2291, bills to promote more effective and ef-

ficient nuclear licensing and regulation.
SD-406

9:30 a.m.
Energy and Natural Resources
Public Lands, Reserved Water and Resource Conservation Subcommittee
To hold hearings on S. 2055, to establish the Columbia Gorge National Scenic Area.
SD-366

10:00 a.m.
Governmental Affairs
Energy, Nuclear Proliferation and Government Processes Subcommittee
To hold hearings on S. 525, to provide the Secretary of Health and Human Services the authority of conduct epidemiological studies of the health effects of radiation in places of employment.
SD-342

Labor and Human Resources
To resume hearings on S. 1804, to establish a program to provide development and incentive grants to States for enacting medical malpractice liability reforms.
SD-430

Select on Indian Affairs
To resume hearings on S. 902, to establish Federal standards for gaming activities on Indian lands.
SD-106

JUNE 18

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Governmental Affairs
Civil Service, Post Office, and General Services Subcommittee
To hold joint hearings with the House Committee on Post Office and Civil Service on a Postal Rate Commission report on the use and abuse of the preferred mail rate.
SD-342

Labor and Human Resources
Business meeting, to consider pending calendar business.
SD-430

9:30 a.m.
Energy and Natural Resources
To hold oversight hearings to review the impact of the explosion of the Soviet nuclear powerplant at Chernobyl on the domestic nuclear industry.
SD-366

10:00 a.m.
Small Business
To hold oversight hearings on the implementation of the Prompt Payment Act (P.L. 97-177).
SR-428A

JUNE 23

2:00 p.m.
Energy and Natural Resources
Energy Research and Development Subcommittee
To hold oversight hearings to review budget requests for the Department of Energy's Office of Energy Research and the Office of Environment, Health and Safety.
SD-366

JUNE 25

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Labor and Human Resources
To hold hearings on the administration of the Mine Safety and Health Review Commission.
SD-430

JULY 17

9:30 a.m.
Finance
Social Security and Income Maintenance Programs Subcommittee
To hold joint hearings with the Committee on Labor and Human Resources' Subcommittee on Employment and Productivity on work and welfare issues.
SD-430

Labor and Human Resources
Employment and Productivity Subcommittee
To hold joint hearings with the Committee on Finance's Subcommittee on Social Security and Income Maintenance Programs on work and welfare issues
SD-430

10:00 a.m.
Energy and Natural Resources
Public Lands, Reserved Water and Resource Conservation Subcommittee
To hold hearings on S. 2412, to withdraw and reserve certain public lands.
SD-366

JULY 22

9:30 a.m.
Finance
Social Security and Income Maintenance Programs Subcommittee
To resume joint hearings with the Committee on Labor and Human Resources' Subcommittee on Employment and Productivity on work and welfare issues.
SD-430

Labor and Human Resources
Employment and Productivity Subcommittee
To resume joint hearings with the Committee on Finance's Subcommittee on Social Security and Income Maintenance Programs on work and welfare issues.
SD-430

JULY 29

10:00 a.m.
Labor and Human Resources
Employment and Productivity Subcommittee
To hold hearings to review the response for home health care services.
SD-430

JULY 30

10:00 a.m.
Labor and Human Resources
Business meeting, to consider pending calendar business.
SD-430

AUGUST 13

10:00 a.m.
Labor and Human Resources
To hold hearings to review the private sector initiatives in human services.
SD-430

SEPTEMBER 10

10:00 a.m.
Labor and Human Resources
To hold hearings to review the human resources impact on drug research and space technology.
SD-430

SEPTEMBER 16

10:00 a.m.
Labor and Human Resources
To hold hearings on pending nominations.
SD-430

SEPTEMBER 24

10:00 a.m.
Labor and Human Resources
Business meeting, to consider pending calendar business.
SD-430

CANCELLATIONS

MAY 20

9:30 a.m.
Judiciary
To hold hearings to examine the constitutionality of certain penalties imposed on individuals or companies which submit false claims to the Government.
SD-226

MAY 21

9:30 a.m.
Select on Intelligence
To hold closed hearings on intelligence matters.
SH-219

10:00 a.m.
Select on Indian Affairs
To hold oversight hearings on certain issues resulting from a decision of the 10th Circuit Court of Appeals in the case of the Ute Indian Tribe v. the State of Utah.
SD-562

2:00 p.m.
Labor and Human Resources
To hold hearings on the organ transplant task force report.
SD-430

JUNE 12

9:30 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold hearings on proposed legislation authorizing funds for programs of the Hazardous Materials Transportation Act.
SR-253

SENATE—*Tuesday, May 20, 1986*

(Legislative day of Monday, May 19, 1986)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the Honorable TED STEVENS, a Senator from the State of Alaska.

The PRESIDING OFFICER. Our prayer today will be offered by Lt. Stephen A. Hulsey, a Navy chaplain stationed at Cape May, NJ, who has been sponsored by Senator JOHN EAST.

PRAYER

Lt. Stephen A. Hulsey, Chaplain Corps, U.S. Naval Reserve, U.S. Coast Guard Training Center, Cape May, NJ, offered the following prayer:

Let us pray.

O Lord, grant us freedom with discipline, motivation with understanding, and determination with compassion.

O Lord, give us the will for self-preservation, and the strength and power to help those who are willing to help themselves.

O Lord, give us insight and patience, wisdom along with a sense of duty, and ability coupled with restraint to adjust to the changes in nature and men.

O Lord, show us Your ways, and never deliver us into the hands of any enemy.

Bless us with Your heavenly and earthly bounties, and never let us be in want.

Instill in us faith and knowledge, and let all of us have the ability to live at peace within ourselves.

O Lord, show the leaders of our Nation the right way to serve and guard the sacredness of all orderly freedoms. Let us realize that You have given us riches not given to any other nation under the Sun, let us be ever grateful, and accept the responsibilities which they entail. You are our God, and to You we would ascribe glory and honor, now and forever. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore [Mr. THURMOND].

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, May 20, 1986.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable TED STEVENS, a Senator from the State of Alaska, to perform the duties of the Chair.

STROM THURMOND,
President pro tempore.

Mr. STEVENS thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. Under the standing order, the majority leader is recognized.

Mr. DOLE. Mr. President, I thank the distinguished Presiding Officer, Senator STEVENS.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, the leaders have 10 minutes each, followed by special orders for Senators CHAFEE, GORE, HAWKINS, and PROXMIRE for not to exceed 5 minutes each. Senator HAWKINS' statement will be read by Senator CHAFEE.

Following special orders, there will be a period for routine morning business not to extend beyond the hour of 10:30 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

Following that action it is the intention of the majority leader to turn to the consideration of H.R. 4515, the supplemental appropriations bill. I am hopeful we can do that and it will be discussed until about noon, at which time, we shall have a 2-hour recess so we can have our weekly party caucuses and Democrats and Republicans can meet.

At 2 o'clock, it is the intention of the majority leader temporarily to lay aside the supplemental appropriations measure and resume consideration of S. 2180, the vehicle to which the Senator from Washington [Mr. GORTON] has offered his daylight saving time amendment. A vote is expected in relation to the Gorton amendment at approximately 2:30 p.m.; perhaps there will be a motion to table an amendment. I hope we can complete action on S. 2180 shortly after the vote on either the motion to table or up or down. I think it will be a motion to table.

Then we shall go back to the supplemental, I hope. I would guess if we are able to proceed on the supplemental, it will take some time, probably well into the evening. So I caution my colleagues that there will be votes, and it could be a late evening.

We shall be in tomorrow. As everyone knows, the Memorial Day recess starts at the close of business tomorrow evening.

BUDGET CONFERENCE

It is my hope that the budget conferees can be appointed this morning and that we can start the budget conference. I have had a discussion with the distinguished chairman of the committee, Mr. DOMENICI. I believe he planned to meet with Senator CHILES yesterday afternoon, so it is my hope—we are about 30 days behind on the budget schedule—that conferees can be appointed and that we can start meeting with House conferees even today. It seems to me that the differences are there but there may be some way to resolve the differences very quickly. Whether or not we have a budget becomes rather important to a number of issues, for example, the appropriations bills, and the tax bill. I hope that the chairman of the Budget Committee, Mr. DOMENICI, and the ranking Democratic member, Mr. CHILES, will be in a position to appoint conferees this morning.

SALUTE TO CARE

Mr. DOLE. Mr. President, it gives me great pleasure to offer my congratulations to CARE, the international relief and development organization, on the occasion of its 40th birthday. In saluting CARE, however, I should like to extend my sincere congratulations also to those millions of generous Americans who have supported CARE over the past 40 years. It is to me extraordinary, and indicative of the compassion and concern that is characteristic of our people, that at a time of chaos, as the Second World War came to a close, we were able to reach out, immediately, to lend a hand to our brothers and sisters in Europe whose lives had been so devastated by that conflict.

The birth of CARE, in 1946, coincides with the birth of our largest current demographic population—the baby boomers. It is this generation, now come to maturity and beginning to assume responsibility for guiding our country into the next millenium, that needs to be reminded of an organization like CARE, and its long history of people-to-people support to some 86 nations around the world. As this new generation plans and prepares for the future, it would be appropriate for them to remember that there is a vast

reservoir of generosity and good will that resides, almost as a cultural tradition, among our American people. That heart and spirit was demonstrated most poignantly in the last 2 years, as Americans of all generations rallied to support relief efforts in Colombia following a volcano, in Mexico City after a devastating earthquake, and in famine-stricken Africa.

It is a source of considerable pride to me that wheat from my own home State of Kansas was part of the life-giving "CARE packages" that were sent to Africa. It is, in fact, a source of continuing wonder to me to contemplate the miracle of how the exceptional bounty of our fruited plains is transported to the far corners of the planet, to sustain life in places so remote that sometimes God alone is the only comprehending witness to that gesture of national compassion.

I am pleased to say that rural America and U.S. farmers have supported CARE's efforts throughout the past 40 years. Key farm organizations and cooperatives, such as the Grange, the Farmers Union, the National Cooperative Business Association, the National Rural Electric Association, and the Credit Union National Association also support CARE's humanitarian and developmental efforts overseas and are represented on the CARE board.

CARE was organized as a cooperative and its members represent a variety of organizations. One of CARE's founders, and current president of CARE, Wally Campbell, has served CARE for 40 years and represents the National Cooperative Business Association on CARE's board.

CARE's mission goes far beyond the delivery of food to aid the victims of disaster. CARE's role in each country varies according to the dynamics of the particular circumstances. The flexibility, timeliness, and independent perspective that CARE brings to its response to development problems are important factors in its ability to facilitate successes. CARE works to fill major gaps in country development strategies, and to create and implement realistic programming at the grassroots level.

While CARE is a catalyst, it would never claim to be more than a partner in the development process. CARE, working directly with the people and taking its lead from them, brings technical know-how, or tools, or project and program ideas that will encourage growth toward self-sufficieny. CARE adheres to the maxim that guides many such helping agencies: "Give a man a fish and you feed him for 1 day; help him to fish and you feed him for a lifetime."

CARE has another maxim that it is fond of quoting as well. They say, "We're in business to put ourselves out of business." Meaning, of course, that one day, all the nations of the world will have reached that state where they are self-reliant and where organizations like CARE will not be necessary. We look forward with great enthusiasm to that day. But until then, we look to CARE to continue its work, confident in the support, respect, and admiration of the American people.

As majority leader of the Senate, I want to say, "Happy birthday, CARE. May your successes multiply in the years to come."

McCLURE-VOLKMER GUN BILL

Mr. DOLE. Mr. President, this week, the President signed S. 49, the Firearms Owners Protection Act, into law. When the Senate passed this bill earlier this month, and then passed the package of amendments offered by our distinguished colleague, Senator THURMOND, we met two very important responsibilities.

First, we lifted an almost 20-year onus from law-abiding gun owners and reestablished a basic tenet of our country, the principle of individual freedom and responsibility. The second amendment to our Constitution is clearly an emblem of the trust between the Government and the governed that is the core of our free society.

We also met our responsibility, as lawmakers, to work within the framework of the Constitution to keep in place and strengthen proven law enforcement tools against criminals.

I am proud to count myself among those who support the right of our citizens to "keep and bear arms," while at the same time supporting effective law enforcement efforts to disarm and apprehend criminals and to punish offenders. I am not one who believes there is an inherent conflict between our citizens' second amendment rights and public safety. Nor do I believe that the millions of law-abiding citizens who own guns and the Nation's police officers think there is such a conflict.

But I guess there are some people who do, who think, on the one hand, that any law or regulation pertaining to firearms is too much, or, on the other hand, that unless we totally restrict gun ownership, criminals will flourish. I also guess that as with any controversial issue, there are those who hold sincere opinions and those who simply want to stir up controversy, hoping to be seen in the spotlight.

A month or so ago, a person purporting to speak for gun owners circulated a letter which contained vicious and false allegations about my position on issues affecting gun owners. I think my record speaks for itself, but I was gratified that people like Senator ORRIN HATCH and J.E. Reinke, the president of the National Rifle Association which has represented American hunters and sportsmen for over a century, defended my record and forcefully responded to those allegations.

Now, I have been advised that this same individual is at it again. The April edition of a publication he is responsible for, wrongfully characterizes the positions and actions of the Attorney General and of a fellow Kansan, Stephen Higgins, the Director of the Bureau of Alcohol, Tobacco and Firearms, with regard to S. 49.

Both Attorney General Meese and Director Higgins publicly supported our efforts to reform the Gun Control Act of 1968. In doing so, they supported the policy of the President. In debate, both here and in the House, we heard much evidence of past abuses by ATF in enforcing the 1968 Gun Control Act. We also heard that Steve Higgins was getting ATF back on the right track and focusing on the activities of criminals, not hunters, sportsmen, and hobbyists.

As a consequence, I was surprised to read in this newsletter that the Attorney General did not support our efforts and that the ATF director had "leaked internal documents to embarrass President Reagan." Although I must say, I was less surprised than I might have been if my own efforts had not been entirely misrepresented by the same person.

All of us in Congress expect to get, and depend upon, the insight we receive from experts in the executive branch who are responsible for carrying out the laws we write. So as we worked on the firearms legislation, we expected to receive—and did receive—candid input from both Treasury and Justice, and from the principal enforcement agency in this area, ATF.

I don't know of any point in our deliberations where we didn't have access to their input and I don't know of any point where any agency exceeded its responsibility and got involved in the issue from a policy point of view. What we heard from them were technical and administrative comments that were necessary and helpful to the Congress in shaping the bill we acted on.

Steve Higgins did not "leak documents to embarrass the President." He acted like a professional throughout the process, as did all of the administration's authorized representatives on this issue. All documents and statements made by them were designed to give Congress the benefit of their expertise and experience and bring credit to the administration they serve.

Mr. President, I deeply regret this mischaracterization of the role Attorney General Meese and ATF Director Higgins played during Congress' consideration of S. 49. As one who was also the subject of false allegations, I

am pleased to help set the record straight.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. HUMPHREY). Under the previous order, the Democratic leader is recognized.

URGENT SUPPLEMENTAL APPROPRIATION

Mr. BYRD. Mr. President, I thank the distinguished majority leader for laying out the program for today as he has. I, too, hope that the Senate will be able to take up the supplemental appropriations bill. I support the bill and I think it is a much needed bill. But I must say at this point that we still have not cleared all the way around.

Mr. DOLE. We have not, either.

Mr. BYRD. I guess we have problems on both sides. I hope the problems will clear up in time.

WORLD TRADE WEEK: NO CAUSE FOR CELEBRATION

Mr. BYRD. Mr. President, this is World Trade Week in the United States. However, some of my colleagues and their constituents—I know this is true in my State of West Virginia where an estimated one out of every seven jobs is dependent upon the world market—may not feel like celebrating. From unemployed computer chip manufacturers in California to unemployed shoe and textile workers in Maine to unemployed steelworkers and coal miners in my own State, American workers are becoming less able to compete in world markets. The United States is the world's largest exporter, but the margin of our leadership is declining. This country, of course, is also the world's largest importer.

We see our exports—manufactured goods and agricultural products—decreasing as foreign control over our own market increases. In the first quarter of 1986, our trade deficit exceeded $43 billion, more than $10 billion more than the comparable period last year. Foreign steel dominated nearly one-quarter of the American market in the first 3 months of this year. Some industries were hit even harder.

The ferroalloy industry, which provides an important ingredient in steel production and is vital to our national defense, saw imports jump to 70 percent of our domestic market in the first quarter.

Increasingly, American workers find that they are competing against foreign governments, not just against foreign workers and products. The lack of a coherent trade policy is costing us tens of billions of dollars and many American jobs. The Department of Commerce estimates that unfair trade restraints by Japan alone are costing us $10 billion a year.

These unfair trade practices are not the only problem, but they account for a significant share of our trade deficit—and the national trade estimates report by the U.S. Trade Representative suggests that the problem is growing.

What has been the response? Many of my colleagues and I have introduced legislation and urged the President to take action under existing law to encourage our trading partners to play by the rules. Our colleagues in the House are preparing comprehensive trade reform legislation this week. But the administration refuses to acknowledge that there is a crisis. Despite last year's record $148.5 billion trade deficit and predictions of a 1986 shortfall that could exceed $160 billion, the administration seemingly can come up with only one response; it has labeled those who urge realism and a strategic approach to trade as protectionists—while it continues to turn a blind eye to the challenge of trade policy. But if that is to be the only administration response, Mr. President, I believe that President Reagan can expect to see the Congress send trade legislation to his desk this year.

□ 1010

Mr. President, I ask unanimous consent that extraneous but relevant material be included in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MAY 20, 1986.

THE REPUBLICAN PROMISE TO END UNFAIR TRADE PRACTICES

"A Republican Administration will emphasize a policy of free trade, but will expect our trading partners to do so as well."—1980 Republican Party Platform.

"We will insist that our trading partners play fair."—Treasury Secretary James Baker III, Associated Press, April 30, 1986.

FIRST QUARTER TRADE DEFICIT WAS $43.5 BILLION

During the 1980 presidential campaign, the Republican Party assailed the previous Democratic Administration for a failure to eliminate unfair trade practices. The Republican Party, under the leadership of President Reagan, has now had more than five years to take effective action against the unfair trade policies which it bitterly condemned. Yet, American industries and workers are still forced today to compete against foreign governments in a world where mercantilism has become a fact of life.

The merchandise trade deficit has risen every year under the Reagan Administration, and the United States has set new record trade deficits in each of the past four years:

In 1981, the merchandise trade deficit rose to $39.7 billion.

In 1982, the merchandise trade deficit rose to $42.7 billion—a new record.

In 1983, the merchandise trade deficit rose to $69.4 billion—a new record.

In 1984, the merchandise trade deficit rose to $123.3 billion—a new record.

In 1985, the merchandise trade deficit rose to $148.5 billion—yet another all-time record.

While the 1986 trade deficit may not reach another new record since the falling dollar is sure to improve the U.S. trade balance relative to what it otherwise would have been, it is certain to be another dismal year with a trade deficit far higher than any incurred prior to the Reagan Administration.

Pointing inescapably in this direction is the fact that, in March, the merchandise trade deficit was $14.5 billion. This means that the merchandise trade deficit for the first quarter of 1986 was $43.5 billion—an increase of more than $10 billion over the same period in 1985. Furthermore, the huge March trade deficit included a record $5.5 billion trade imbalance with Japan, and occurred despite sharp decreases in the price of oil.

Unfair trade practices certainly are not the only, or even the major, cause of the intolerable trade deficits this nation has incurred under the Reagan Administration. The Administration's staggering and unprecedented budget deficits, which have resulted in continuous high interest rates and an overvalued dollar, are, without doubt, the principal culprits. Nevertheless, unfair trade practices do contribute to the trade deficit, handicap America's competitive ability in the international marketplace, and threaten this Nation's manufacturing base.

In the face of this knowledge, the Reagan Administration has failed for more than five years to fulfill its repeated promises to develop a trade policy to eliminate those unfair practices.

Despite the usual rhetoric prior to the Tokyo Economic Summit, that meeting produced no specific program for reductions in unfair trading practices—only a general reaffirmation of the importance of "dismantling trade restrictions" without any promises of how that would be achieved. In fact, even as the Summit participants agreed to support the "early launching of the new round of multilateral trade negotiations," they made no commitment to use new global trade negotiations as an opportunity to reduce current unfairness in the trading system.

RHETORIC VS. REALITY

(Or "Speak Loudly, But Leave Your Stick at Home")

The following quotes and facts demonstrate how the Reagan Administration's performance on unfair trade practices has failed to match its promises. Since 1981, there has been an amazing gap between the Administration's rhetoric and the realities of the international marketplace. But it is worse than just a failure of effort or policy; in general, the Administration has invested only a minimal effort to reduce trade barriers, and in the case of many traded goods and services, and many trading partners, it has no discernible policy.

Rhetoric

"We are committed to free trade and believe free trade benefits all nations concerned. In observing the principles of free trade, however, we expect our trading partners to do so, as well."—President Reagan, Statement on Assistance for Domestic Automobile Industry, April 6, 1981.

Reality

"Taiwan imposes 50 percent local content requirements on color television sets, 55 percent for video recorders, 70 percent for heavy sedans and 90 percent for motorcycles."—"National Trade Estimate," [1] Office of the U.S. Trade Representative.

Rhetoric

"World markets must be freed of trade barriers and unfair trade practices. . . . All nations, particularly our friends in Europe and Japan, must be made to understand that trade is a two-way proposition."—President Reagan, Remarks at Werries Family Farm, October 20, 1982.

Reality

"The Commerce Department has estimated that if Japan eliminated all its unfair barriers, American exports might rise about $10 billion annually."—New York Times, October 31, 1985.

Rhetoric

"[We] are pressuring our trading partners to lift unfair export subsidies."—President Reagan, Remarks at Annual Convention of National League of Cities, November 29, 1982.

Reality

"The EC [European Community] grants export subsidies (restitutions) on many products . . . Export subsidies result in an export price lower than the domestic sale price and sometimes lower than the prevailing world market price . . . Products for which this EC export assistance has caused major problems for the U.S. producers in third country markets include poultry, wheat, wheat flour and barley. EC exports of these products totaled some $3 billion in 1984."—"National Trade Estimate," Office of the U.S. Trade Representative.

Rhetoric

"Free trade can only survive if all parties play by the same rules. But we're determined to ensure equity in our markets. Defending workers in industries from unfair and predatory trade practices is not protectionism, it's legitimate action under U.S. and international law."—President Reagan, Remarks to Commonwealth Club of California, March 4, 1983.

Reality

"It is illegal for Korean citizens to possess foreign cigarettes."—"National Trade Estimate," Office of the U.S. Trade Representative.

Rhetoric

"We believe in free trade, but we're no longer going to play patsy for those who would use this commitment as a leverage against us."—President Reagan, Remarks to Department of Agriculture Employees, March 21, 1983.

Reality

"The current position of Japan's machine tool industry (as a world leader) is in part the result of Japanese government involvement in promotion of the industry through laws, guidance to the industry, preferential loans, subsidies and tax incentives."—U.S. International Trade Commission, September, 1983.

Rhetoric

"Free trade must be fair trade . . . We will review existing trade agreements and vigorously enforce trade laws including assurance of access to all markets for our service industries."—1984 Republican Party Platform

Realty

"Italy has established a screen time quota to limit the number of American television programs to 25 percent of the total air time. There is also an EC [European Community] project to subsidize European films, and the television industry."—"National Trade Estimate," Office of the U.S. Trade Representative.

Rhetoric

"Free trade must also be fair trade."—President Reagan, Remarks at "Choosing a Future" Conference, September 5, 1984.

Reality

"A combination of import restrictions [and] export promotions, particularly during the present difficult financial environment, has enabled Brazil to shift its global trade balance from a $2.6 billion deficit in 1979 to a $13.1 billion surplus in 1984."—"National Trade Estimate," Office of the U.S. Trade Rpresentative.

Rhetoric

"The Department of Commerce will continue to rigorously enforce our unfair trade laws."—President Reagan, Memorandum on Steel Import Relief, September 18, 1984.

Reality

"Increasingly, trade considerations have become a part of Government strategies for ensuring social welfare and encouraging growth. Such 'managed trade' reflects the results of negotiated markets or national industrial policies that may 'target' selected industries for development, while protecting home markets from competition and subsequently aggressively promoting exports."—President's Commission on Industrial Competitiveness (PCIC).

Rhetoric

"Free trade also means fair trade. We will move, vigorously against unfair trading practices."—President Reagan, Radio Address on Protectionism, August 31, 1985.

Reality

"In a number of East Asian countries, restrictive import licensing and even outright import bans on certain products are barriers to foreign goods. The restrictions often occur in high tech areas into which the LDCs hope to move (e.g., Korean computer decree, Indonesian Aircraft decree). All of these examples are products in which the United States has a very strong comparative advantage.—U.S. Trade Representative William Brock, February 26, 1985.

Rhetoric

"Our trading partners should not doubt our determination to see international trade conducted fairly with the same rules applicable to all. I'm committed to and will continue to fight for fair trade."—President Reagan, Radio Address on International Trade, September 7, 1985.

Reality

"Since 1983, beer imports have been banned [in Taiwan]."—"National Trade Estimate," Office of the U.S. Trade Representative.

Rhetoric

"If trade is not fair for all, then trade is free in name only. I will not stand by and watch American businesses fail because of unfair trading practices abroad. I will not stand by and watch American workers lose their jobs because other nations do not play by the same rules . . . Let no one mistake our resolve to oppose any and all unfair trading practices. It is wrong for the American worker and American businessman to continue to bear the burden imposed by those who abuse the world trading system."—President Reagan, Remarks to Business Leaders and Members of the President's Export Council and the Advisory Committee for Trade Negotiations, September 23, 1985.

Reality

"Often ranging from 50 to 75 percent, Taiwan's high tariffs impede imports of goods in which the United States is competitive . . . [And] Import bans are in effect for edible offals, poultry livers, other meat products, groundnuts and selected chemicals."—"National Trade Estimates," Office of the U.S. Trade Representative.

Rhetoric

"To remain free, trade must also be fair. Many of our industries face unfair trade practices by other nations. Unless our trading partners stop these practices, support in the United States for free trade will be undercut."—President Reagan, Interview with *Le Figaro*, September 26, 1985.

Reality

"A review of 40 recent trade studies comes up with 28 ways in which governments intervene in trade. Japan makes use of 25 of the 28 types of intervention. The U.S. uses six."—Senator Lloyd Bentsen, Testimony Before House Ways and Means Subcommittee on Trade, September 17, 1985.

Rhetoric

"Our trading partners must be put on notice that we will not allow unfair trading practices to continue."—President Reagan, Veto of Textile Bill (H.R. 1562); December 17, 1985.

Reality

" 'Our domestic textile and apparel industry cannot sustain the damage it is facing. We are going to see more layoffs, more plant shutdowns and more long-term economic damage to an industry that is crucial to this nation,' President Pro Tempore Thurmond said, noting that the [textile] bill would have assured the continued competitiveness against unfairly subsidized foreign imports."—News Item inserted by Senator Strom Thurmond, Congressional Record, December 18, 1985.

Rhetoric

"We must redouble our efforts for freer and fairer trade. . . . If the United States can trade with other nations on a level playing field, we can out-produce, out-compete, and out-sell anybody, anywhere in the world."—President Reagan, State of the Union Address, February 4, 1986.

Reality

"Indonesia's ban has severely affected U.S. fresh fruit exports. They declined from $9.2 million before the ban in 1982 to $48,000 in 1984."—"National Trade Estimate," Office of the U.S. Trade Representative.

ALL TALK + NO ACTION = PUBLIC DISSATISFACTION

That President Reagan is aware of continued unfair trade practices by our overseas trading partners is not at question. On several occasions, the President has directly acknowledged that unfair trade practices con-

[1] The "National Trade Estimate" is an annual report by the Office of the U.S. Trade Representative which lists more than 200 foreign trade barriers that impede American exports. The report was required under the 1984 Trade and Tariff Act. The cited edition, the first ever published and the most recent available, contains data current through October 31, 1985.

tinue to be used against American farmers and American industries.

"Because of foreign subsidies and protections, our farmers are being pitted against the economic strength of the national treasuries of other countries."—President Reagan, Remarks at the Werries Family Farm, October 20, 1982.

"Many of our industries face unfair trade practices by other nations. Unless our trading partners stop these practices, support in the United States for free trade will be undercut."—President Reagan, Interview with *Le Figaro*, September 26, 1985.

Despite the President's awareness of these unfair trade practices, the Reagan Administration has failed, for five years, to act against them. As the Administration has failed to act, poll after poll and survey after survey have revealed that the American people are becoming more and more dissatisfied with the Administration's inaction. Today, the American people are demanding a trade policy that will reduce or eliminate the unfair trade policies which result in much harm to them personally and to the U.S. economy overall. International trade seems to be just one more areas in which the Reagan Administration has failed to understand that actions speak louder than words.

LONG-TERM EFFECTS OF U.S. ACTION IN LIBYA

Mr. BYRD. Mr. President, recently our colleague, Senator PAUL SIMON, wrote a most thoughtful and sobering column analyzing the long-term effects of this Nation's recent military action in Libya. I recommend the column to anyone seriously concerned about the problem of world terrorism—and I would think that is most everybody—and our Nation's ability to adequately and realistically address that problem.

I ask unanimous consent that the column be inserted in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LIBYA: THE CONSEQUENCES OF MILITARY ACTION

(By U.S. Senator Paul Simon of Illinois)

No recent U.S. involvement in foreign affairs has so focused the nation as our bombing raids on Libya. And I sense among the public some unease about it all, an unease that I share.

Here are the main questions I hear, and my answers on the basis of information at this time:

Was Khadafy really responsible for the Berlin terrorist bombing?

The proof that the Libyan government was involved is overwhelming. And since Libya has been a one-man show, with a harsh dictatorship, there is no doubt about Khadafy's direct responsibility not only for the Berlin bombing but for other planned terrorist activities.

Does that make what we did right?

Not necessarily, though our government has both the right and responsibility to protect our citizens. Those who promote terrorism cannot piously pretend that the United States has no basis for responding. But whether we pursued every other option before trying military action is less clear.

Our Western friends did not cooperate with an economic boycott. However, those friends have argued—with some reason—that while the U.S. was having an economic boycott, at the same time we are permitting U.S. oil companies to provide about one-third of the income for the Khadafy government. But we could have tried to get our friends to cut off all trade credits (not trade) and stop all sales of weapons to Libya. Sometimes our government has been too quick with the trigger, and sometimes the trigger is not effective.

Will our actions slow down terrorism?

From Libya, I doubt it. From two other sources of terrorism—Syria and Iran—the bombing may cause second thoughts. Whether our actions will slow terrorism or increase it overall, we will know with time, it is a close call.

What is the big danger of the Libyan raids?

There are a few dangers:

(1) We could become so preoccupied with Libya that we ignore the big problem in the Middle East and the ultimate cause of our current problems: the Palestinian issue. If getting distracted in Libya keeps us from getting Israel and Jordan together to work out the basic problems, our involvement in Libya will have been a failure and a victory for the Khadafy regime. An action like that against Libya should fit into a grand strategy, not simply be a knee-jerk reaction to one tin-horn dictator. Former Secretary of Defense James Schesinger has called the Libya attack "more visceral impulse than strategy."

(2) It is unclear whether we will strengthen Khadafy or weaken him. I asked Secretary of State George Shultz what he felt and he replied our action will weaken Khadafy. I hope he is right. Some experts on that country believe our action may have rescued him, rather than toppled him. Two days after the attack, I talked to high-ranking officials of a neighboring country hostile to Khadafy. Their feeling: The intent of the raid was good, but it was probably a mistake in the long run.

(3) There is the possibility—no one can know this answer—that the raids will cause more terrorism. (There is also the possibility that they will reduce it.)

(4) The raids unfortunately underscore an image the United States now has in most of the world of being trigger-happy, inclined to use military muscle rather than diplomacy to solve problems.

There is also bipartisan concern that the President failed to adequately consult with Congress as is required by the War Powers Act. The War Powers Act requires that the President consult with Congress in "every possible instance" before sending U.S. forces into situations where hostilities are clearly imminent. President Reagan consulted Congress only two hours before the bombs were dropped. Senators Samm Nunn and Robert Byrd characterized it as "notification" rather than consultation.

What has been the reaction of our friends?

Great Britain has been with us, as has Israel. But they are almost alone. Even the leadership of the Afghan freedom fighters let it be known they felt it was a mistake. But it should be added that France and the others who disapproved our conduct did strikingly little to assist in non-military pressure on Khadafy.

Should the United States never use military force?

Every nation, great or small, should be willing to use armed forces if necessary. The difficulty is that we have sometimes used the military option too quickly.

Do we know what will happen next?

The Libyan raids have increased some uncertainties. We cannot know how nations will respond.

If we had not sent our Navy into the Gulf of Sidra, would we have this mess today?

It is doubtful, but no one can know for sure. We had the legal right to be there, however.

How will history judge this raid?

Ask me ten years from now!

RESERVATION OF THE MINORITY LEADER'S TIME

Mr. BYRD. Mr. President, I ask unanimous consent that I may reserve my remaining time under the order throughout the day.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. I thank the Chair and I yield the floor.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. CHAFEE. Mr. President, I ask that further proceedings under the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR CHAFEE

The PRESIDING OFFICER. Under the previous order, the Senator from Rhode Island [Mr. CHAFEE] is recognized for not to exceed 5 minutes.

□ 1020

THE COMMUNITY AND FAMILY LIVING AMENDMENTS OF 1985

Mr. CHAFEE. Mr. President, S. 873, legislation I have introduced, would reform the Medicaid Program as it relates to those with developmental disabilities. To date, my legislation has eight cosponsors—Senators STAFFORD, LEAHY, PELL, INOUYE, BINGAMAN, SASSER, HATCH, and NUNN.

The goal of this legislation is simple: To replace policies which increase dependency and break up families with policies that allow dignity, that encourage families to remain intact, and that recognize individual potential by helping it to grow and flourish.

Medicaid is the Federal program which provides States with the bulk of funding for long-term care services for the disabled. Currently, these funds flow primarily toward large facilities. The reason for this has more to do with what Medicaid will pay for than what system of care and services is best for each individual.

We know, however, that because of the passage of the Education for All Handicapped Children's Act of 1975—Public Law 94-142—more and more parents are deciding to keep their disabled children at home and send them to school. But as disabled children graduate at age 18 or 21, they are offered few options for remaining in their own communities—with their families and friends. As they become young adults, our system of funding the services they need wrenches them away from their own communities and into residential programs they do not want because there are no other options available.

It is because of this funding bias and lack of alternative services that I introduced S. 873.

This bill stands for the proposition that there should be a range of services available for those with mental and physical impairments. It recognizes that the number of disabled individuals who require institution-based services is far smaller than those who need community-based services.

My bill will allow Medicaid expenditures to support people in a wide variety of settings; Natural family homes, foster homes, adoptive homes, independent living arrangements, new community residences of up to about 12 people, and existing clusters of up to three homes. In addition, S. 873 would allow 15 percent of a State's total Medicaid budget to be used to support institutional placements.

Thus, the proposal offers the potential for a State to provide a range of residential options from independent living to institutionalization.

S. 873 mandates four services: Respite care, personal attendant care as appropriate, case management, and protection and advocacy services. It also lists a wide variety of other services which can be provided through the Medicaid program.

Each person must have an individual written plan of assistance which must be developed by an interdisciplinary team. Family members, guardians, or, in some cases, the disabled person himself, can participate on that team.

The bill requires that anyone who is to be moved out of an institution must be given 60 days written notice, opportunity for a due process appeal, and that the services specified in the written plan must be in place before the individual is moved.

My bill requires that community residences be certified, licensed, or accredited, and that the staff be trained. It requires States to develop a plan of action for the next 15 years—a plan which must be approved by the Secretary of Health and Human Services. S. 873 provides the mechanism to move people into residential settings where they can live safely—with the security and services they need along with the opportunity to grow and develop as individuals.

One of the questions that is frequently raised about my legislation is how the services outlined in S. 873 will be monitored. Specifically, there is a great deal of concern about the monitoring of the care and services provided in small community group homes. The concern about monitoring is easy to understand—for the last two decades we have heard again and again about the widespread abuse of those with disabilities while they resided in institutional settings. No one wants to see those abuses duplicated in the group homes that would be funded through my legislation.

There are many possible methods to monitor group homes. One of the most important involved the direct participation of the parents of those with disabilities who reside in group homes. An example of this can be seen in Michigan at the Macomb-Oakland Regional Center's community placement program which created the parent monitoring committee.

The Macomb-Oakland Parent Monitoring Committee is made up of over 30 members. The members are divided into teams and assigned to particular group homes in their area. Visits are made by the teams about every 2 months. This monitoring program supplements the existing monitoring requirements under State and Federal law.

Mr. President, I have an article which appeared in the "Exceptional Parent" about the Macomb-Oakland Parent Monitoring Committee, and I ask unanimous consent that it be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. CHAFEE. Mr. President, the past 2 years have proven that any proposal to phase down Medicaid support for institutions and increase such support for community-based services is a highly charged issue.

Even so, most of us believe that there are problems in our system of care for those with disabilities. We may not all agree on the extent of those problems or how they are best solved, but most of us agree that it is time for change. We must engage in constructive discussions to reach some agreements about what that change should look like and we must remember that these should be discussions which will help us move closer toward a resolution of issues that affect the lives of our severely disabled children and friends.

We are in an era of changing technology and experience. Our understanding of the capabilities of those with disabilities is changing quickly. We have made tremendous strides in our ability to help those with disabil-

ities to learn and to participate in many different facets of life.

No one wants to see any individual with severe disabilities who needs assistance forced into an inappropriate environment. Our challenge is to ensure that this does not happen.

I urge my colleagues in the Senate to join the nine sponsors of this legislation in our efforts to develop a solution that most of us can agree upon, and to work to get that solution enacted.

Mr. President, the principal thrust of this legislation is to make sure that every disabled individual has the opportunity to reach his or her fullest potential. We believe that this is not true currently in the institutional settings that so many people are forced into because that is the only setting for which Medicaid will pay.

EXHIBIT 1

SECURITY FOR PARENTS: MONITORING OF GROUP HOMES BY CONSUMERS

(By Gerald Provencal and Ruth Taylor)

The adequacy of supervision of group and foster homes is one of the most anxiety provoking uncertainties for parents considering community placement for their child. When community based residential programs are advocated for people with developmental disabilities, there is one question which can always be anticipated, "How can you monitor homes scattered all over the city?" This issue is raised, not only by the critics of group homes, but also by those who support them.

The concern over monitoring is legitimate. It cannot be dismissed with a plea to "have faith." Professionals cannot expect parents to feel even modest security with placements unless they are tied to a comprehensive service network which assures adequate staff, sound training, relevant standards, accessible support systems, ample funding, accountability, and more.

It would benefit agencies to recognize that there is an important oversight role to be played by the "candid consumer." And when encouraged, this role can lead to improved programs which parents may come to trust more fully.

Consumer candor has a significant place in human service systems. Although individuals within organizations might be conscientious personally, and safeguards might exist in policy, the organizations themselves are not inherently empathetic. They cannot be expected automatically to maintain procedures which are sensitive to the needs of their clients. Unless they are monitored carefully, even social service agencies can become indifferent to the very people they exist to serve.

Parents, guardians, and other "candid consumers" utilized in a group home monitoring capacity have enhanced one agency's ability to provide services, and quieted much of the distress aroused by the question, "How can you monitor homes scattered . . .?"

A PROGRAM FOR MONITORING HOMES

By the spring of 1979, the Macomb-Oakland Regional Center's community placement program for people with developmental disabilities had grown to include over three hundred individuals living in small group homes. The staff and providers of these homes had received numerous awards and accolades, and the program was receiving widespread recognition for quality.

The Regional Center staff, representing a wide range of disciplines, regularly monitored each placement. Nevertheless, the Regional Center and its placement providers were occasionally criticized by parents about things which had escaped the scrutiny of the professionals. A broken shutter, a staff member cooking in his or her bare feet, or the beginnings of an institutional atmosphere might clearly evade the glance of the group home social worker looking for improvement in an individual client. These concerns never failed the attention of family members visiting on Sundays, however.

There was tremendous potential for the client's relatives to offer a contribution to the group home system.

A series of meetings were held between Regional Center administration, group home providers, and key members of the local Association for Retarded Citizens in an effort to incorporate this perspective into the program. The objective was to create a formal (yet workable) oversight role for parents and guardians. The result of these meetings was the creation of the Macomb-Oakland Regional Center's Parent Monitoring Committee.

DESCRIPTION OF MODEL

A. Structure and Assignments: The Parent Monitoring Committee is made up of over thirty members—comprised of parents or guardians who volunteered and were chosen by the Regional Center who felt they could be "counted on" to be responsible to the program. There is a core group whose specific duties are to establish committee policy, hold monthly meetings, write critiques of each home visited, train new monitors, and carry out their own monitoring assignments. Companion monitors—non-core members—perform the same observational tasks, but have less administrative responsibility when the visit has been completed.

Teams comprised of one core member and one companion monitor are given an assignment for each group home. Monitors do not visit homes where there relatives or wards reside, nor are they permitted to be employed in the group home program. This policy was developed in order to prevent the charge that the monitor's suggestions were emotionally based, and need not be taken seriously. Visits are made approximately every two months.

B. Home Evaluation: The monitor's primary responsibility is to evaluate the "feel" of each home; its appearance, atmosphere, warmth and overall sensitivity to important areas in the home's operation and the resident's well-being. Quote deliberately, monitors do not assess individual client programs, procedure compliance, or performance toward standards that are to be reviewed by other agencies.

The monitors are expected to look at each house and, in effect, ask themselves how it compares with their own, homes in the surrounding neighborhood, and their personal notion of what a group home should offer its residents.

The expression of varied tastes, values and curiosities between monitors is encouraged. This subjectivity could be a problem if one were seeking a "clinical" critique of each home. It has been our experience, however, that a range of perspectives is very helpful. In fact, the viewpoint most lacking in standard evaluation efforts is one which reflects the attitudes of the local community.

For this reason, the criteria used to evaluate the homes was established by the core members. It is a composite of expectations rooted loosely in normalization principles and middle class values.

Specific areas are given attention to each visit: home appearance, meals, security, laundry, general environment, staff, support services, and resident rights. The monitors' guidelines include suggested questions which the team members might ask themselves. The following are sample questions in three of the categories:

RESIDENTS RIGHTS

"To what extent do residents have the choice to govern their own lives when it comes to the selection of their room, roommate, meals, and daily routine?"

"Do you think it would be difficult for the people in this home to maintain a sense of dignity about themselves and feelings of self-worth?"

GENERAL ENVIRONMENT

"Overall, is the home and yard clean, well-maintained, cluttered, barren, up to the standards of the neighborhood?"

"Is there sufficient space for an individual to pursue a quiet activity in the home?"

STAFF

"Did the staff appear interested, pleasant, or indifferent to their jobs?"

"Did the staff seem to respect the privacy and dignity of the residents?"

The monitors prepare a written report after completing each visit. They make a careful point of accentuating areas they feel are outstanding, either in a positive regard or those in need of attention. The reports are discussed at the monitor's monthly meetings, with recommendations for action decided on that time.

C. Monitoring Aids: In an effort to show support for the project and to facilitate the committee's undertaking, the Regional Center supplies many necessary items.

1. All core monitors receive photo identification cards.

2. Mileage costs are reimbursed at the State approved rate per mile.

3. Private office space, furnishings, locked files, and telephones are provided, as well as ample stationery, photocopying, and postage privileges.

4. Maps, photographs and directions to all homes are given.

RESULTS

Since its inception, the parent monitors have made over fifteen hundred group home visits, and filed as many reports. They have recommended an average of five improvements for each home per year, and report that a vast majority of their suggestions have been implemented.

The program has been welcomed by individual parents, copied and improved upon by several local chapters of the Association for Retarded Citizens, and adopted by the State office of the ARC.

Although group home providers were skeptical in the beginning, they are now fully accepting. Some point out that the parent monitors have been able to get things for their homes that they have been unsuccessful in obtaining.

DIFFICULTIES

While the monitoring efforts have been successful, there have also been points of friction. The monitors, Regional Center, and group home staff will occasionally clash over described conditions and recommendations. There seems to be no clear way to

eliminate disagreement on what constitutes an "unkempt" recreation room, a yard needing "better" landscaping, or a worker who appears to have an "attitude" problem. The most successful way of dealing with these differences of opinion has been to talk them out. The goal of the discussions is to attempt to separate contrasting values and personal taste from matters of necessity.

Also, those responsible for managing the homes being monitored often feel a general defensiveness. It is hard for staff to take criticism impersonally, as it ultimately is a reflection on them, a reflection of inadequacy or in attention. For this reason, monitors are encouraged to point out positive qualities as well as negative ones. By tempering the fault-finding with complimentary recognition and by treating the staff respectfully, the defensiveness is minimized.

CONFIDENTIALITY

There is the ever-present issue of confidentiality in group homes. Although monitors do not read home records, they do enter the private world of citizens whose confidentiality must be protected. Monitors are cautioned to keep in mind that what begins as an honest attempt to protect clients can easily slide into infringement. Just by entering a home, they are being given access to information about people's lives, and must be responsible about not abusing that trust. Understandably, many clients are reluctant to have people coming into their homes—looking into their bedrooms while evaluating cleanliness standards for example. For this reason, monitors only come to homes where all the residents and or guardians have approved of the visits. Additional safeguards have been incorporated to keep rights from being trampled on in the name of "good intentions."

THE EFFECT OF MONITORING

When the monitoring project was launched, it was acknowledged that it might be challenged as unnecessary. The professional community could see it as duplicating their work. But, there were potential benefits that made the experiment worthwhile.

Greater trust in community placement staff and the programs could occur for families and guardians. It was hoped that this would materialize from the staff being seen as having "nothing to hide" and being open to suggestions. The more frequently consumer representatives (monitors) visited homes, the more likely they would be to gain respect and understanding for the difficulty of group home work, and the sincerity of staff who followed through on monitor recommendations. This would, in turn, be passed along through the ARC membership, and shared with other family members.

Increased trust and respect has resulted. Parent monitors report that they are, in fact, more aware of the complexity and the rigor of the work done, and the conscientiousness of the workers than they were prior to the project. This increased regard is communicated to the ARC membership. Indeed, the local Association for Retarded Citizens has gone so far as to say that "the monitoring project is the very best thing we have ever done."

Monitors often serve as intermediaries. Relatives of group home residents contact them on occasion and ask for confidential assistance on matters they feel reluctant to bring to staff attention. For example, when visiting her child, one parent noticed that there was little food in the refrigerator of the home. She did not want to confront the staff about it, afraid to sound like a "complainer." She was also worried that her child's treatment might be affected if she made the staff angry.

The women made a call to the monitoring committee, and asked them to examine the situation the next time they monitored the home. The committee did find, in fact, that the staff was not doing adequate shopping, and recommended that they buy more food in the future. Monitors are being viewed in a helpful capacity by the residents of group homes and their guardians. More and more often, they are entrusted with problems and concerns, and their ability to change conditions is gaining respect.

Community liaison workers report positive reactions to the program ranging from placement opponents having one less thing to complain about, to being openly relieved that the monitors will be watching over the group homes. The community can see that the monitors genuinely care about the quality of the homes and the treatment the residents receive.

It was apparent that families were going to "monitor" the homes their members were living in, regardless of what any agency did. It seemed wise to take advantage of the point of view of family members who care both about the personal care their relatives receive and the quality of the home in which they live. Their perspective was different enough from a professional's for them to notice areas needing attention that might otherwise be overlooked or considered irrelevant. Further, these otherwise neglected areas could well be the ones which could anger the neighbor or casual observer. For example, an over-worked staff person might be too busy caring for a client to notice peeling paint or an overgrown lawn. Neglect of external conditions might make the neighbors feel that they do not want group homes in thier area.

The formal monitoring process has resulted in scores of home repairs and other physical improvements. Windows, carpets, storm doors, and shrubbery, for example, have been replaced. In some cases, schedules for meals and bedtime have become more personalized because of monitor suggestions. Likewise, questions asked about leisure and social pursuits for particular individuals have sometimes led to more satisfactory arrangements for the client.

Monitors now have an accepted role and platform, and their observations have been taken more seriously than otherwise might have been the case. Requests for correction have been received more agreeably—less as "overprotective" or highly personal complaints—than they would be coming from a single family or an individual professional.

While the monitors have brought about many improvements in individual homes, perhaps their largest contribution is simply one of presence. Families with relatives in placement report that they feel greater security in the program knowing that in addition to professionals, the toughest critics in the world will have a formal say in what goes on.

SENATOR HAWKINS' SPECIAL ORDER

The PRESIDING OFFICER. Under the previous order, the Senator from Florida [Mrs. HAWKINS] is recognized for not to exceed 5 minutes.

The distinguished Senator from Rhode Island is recognized to read Senator HAWKINS' statement.

Mr. CHAFEE. Mr. President, on behalf of Senator HAWKINS, I wish to present the following statement:

MEXICAN DRUG TRAFFICKING: A SERIOUS PROBLEM OF CRISIS PROPORTION

Mrs. HAWKINS. Mr. President, there is an old chestnut that goes this way: "Nothing succeeds like success." There's a great deal of truth in that saying when applied to drug trafficking. The combined agency task force under the overall command of Vice President Bush has been a dramatic success. When created, 80 percent of the illicit drugs entering the United States came through south Florida. But smugglers have learned that it is tough to unload their insidious cargo in my home state without a high risk of detection and seizure. Their first step was to move farther north, moving narcotics by boat and plane into North Carolina, Tennessee and Georgia. From those points drugs would be transshipped to the large consuming cities. However, law enforcement agencies have cracked down there also and traffickers have learned that the southeastern United States is no longer an easy access route to narco-dollars. The offshoot is that many drug smuggling operations have been shifted to the southwestern border of the U.S., creating an altogether new set of problems.

Customs Commissioner William von Raab described the southwestern border as "a serious problem of crisis proportion." In recent months, U.S. agents responsible for narcotics enforcement have made 35 seizures of drugs from vessels and 31 seizures from airborne penetrations. They have detected 132 stashhouses, warehouses for storage of drugs, ranging in size from modest huts to plush haciendas. And they have charted 472 clandestine air strips, north and south of the U.S.-Mexican border.

One might be tempted to suggest building a high wall between the U.S. and Mexico with the aim of solving the drug and immigration problems at one fell swoop. But this is hardly practical along a 2,000-mile border and not particularly desirable either. But it is obvious to me that we must commit more resources to that trouble spot—more Customs agents, more border patrolmen, more immigration officers. And those agents must have state-of-the-art technology with which to match wits with narcotics smugglers. One thing they need expeditiously is more detection aircraft and improved radar. The radar in general usage detects planes flying at 14,000 feet and above, but not at the 5,000 feet preferred by smugglers. All the traffickers have to do is fly low across the border, drop off their nefarious cargo and then sally back to safe haven in Mexico. We need radar with the capability of detecting low flying aircraft and radar balloons of the kind that help protect the Florida border from encroachment by drug-carrying aircraft. Improved radar and radar-equipped balloons, with the capacity to look up and down as well as sideways, it seems to me, could be valuable weapons in the war against drugs if installed on the southwestern border. Also tighter restrictions might be applied to the corridors that incoming planes could use, limiting access points which would give our drug fighters a better chance of monitoring the flight patterns of suspicious aircraft.

Drug trafficking always brings with it a certain amount of corruption, which already has become a major problem in Mexico, and money laundering. This money churning has already spilled over the border into the

United States and has resulted in a strange breed of currency manipulation. In Texas, the money paid into and received from four Federal Reserve banks indicates significant growth and currency surpluses. In 1985, for example, the surplus doubled in the San Antonio Federal Reserve bank to nearly $1 billion. San Antonio, Texas' third largest city with a 1982 population of 768,000 people, was one of only four Federal Reserve banks in the country to have a billion dollar surplus. The Federal Reserve bank in El Paso, a prime border crossing community and Texas' fourth largest city with a population of 425,259 (1982 census projection), had a negative cash flow in 1981 and 1982. However, in 1984, when the drug traffic started rolling in a big way, the bank showed a whopping $600 million surplus. Also suspicious is the situation in the lower Rio Grande Valley, one of the poorest sections of the country. Local banks in that area chalked up a $720 million increase in deposits within one year. Obviously, these are currency conditions that bear not only looking into but going over with a fine tooth comb.

The only way to combat narcotics trafficking effectively is to throw those who are involved in it into jail and to confiscate their assets, hit them where it hurts most, the pocketbook. As long as it is profitable to smuggle drugs, people are going to do it. We must do everything possible to remove the profit incentive from trafficking. Then and only then will we be making significant headway in the war against drugs.

□ 1030

Mr. CHAFEE. This, then, Mr. President, is the statement of Senator HAWKINS, who is unable to be here personally. I do not think anyone else in this Senate has taken a deeper interest in the problems of drug smuggling and drug trafficking. Her effort to do something about it is a great tribute to her.

RECOGNITION OF SENATOR GORE

The PRESIDING OFFICER. Under the previous order, the Senator from Tennessee is recognized for not to exceed 5 minutes.

Mr. GORE. Thank you, Mr. President.

I have been making a series of speeches about the strategic defense initiative. On yesterday I was not able to be present so I plan to make two speeches today.

SDI IMPACT ON NATIONAL SECURITY

Mr. GORE. Mr. President, in the third of this series of speeches on SDI last Thursday I continued a discussion of the program's implications for arms control.

Today, I intend to broaden the discussion by introducing some thoughts about the impact of the strategic defense initiative on our national security in its military dimension. Specifically, I want to discuss SDI's effect on the doctrine of deterrence.

The purpose of arms control is to reduce the risk of nuclear war by allaying fears—mainly, the fear of a first strike—which might cause governments to behave irrationally. The purpose of our military power is to induce other countries to be very rational indeed, when considering actions that affect our security.

Ideally, therefore, arms control creates conditions in which going to war is the most unnecessary step a country needs to consider in its dealings with us. Military power exists to make sure that going to war against us is also the most foolish of choices, because it would be followed by devastating retaliation.

What this implies is simply that the ability to deter is an important element of a policy aimed at keeping the peace. Certainly, that was one of the most indelible lessons of the Second World War, and it is a concept which has been at the core of all American thought about the prevention of nuclear war.

The notion that we must preserve peace by maintaining the ability to make war—especially nuclear war—is disconcerting to many people. Until now, however, it has been reluctantly accepted by the mainstream in American political life as a harsh necessity, without which the world would be much more dangerous. Until now, the only radical challenge to the concept of deterrence had come from the far left as a call for unilateral nuclear disarmament.

Now, however, the far right has its own radical proposal for escaping the necessity of deterrence, and that is the strategic defense initiative in its most extreme form. Even though some of its proponents argue that SDI is intended to enhance deterrence, most argue that it is intended to replace deterrence through threat of retaliation.

From the beginning, the President has made it clear that he looks to SDI as the means by which defense displaces offense as the mainstay of our strategy.

Just how this transition is supposed to occur is very obscure. One approach, consistent with the President's descriptions of SDI, is that although nuclear weapons may continue to exist, they will be neutralized by defensive technologies, and become useless. Another approach, consistent with other things the President has said, is that once SDI technology has been demonstrated, the nuclear powers will clear the way for it by getting rid of their weapons in advance.

Either way, this amounts to making policy by hoping for miracles. And that is fair enough, but with one caveat: until the miracles occur, it would be wise not to undermine the real-world arrangements upon which our survival and security depend.

How then, shall we explain the attacks made by officials such as the Secretary of Defense on the concept of deterrence, as both immoral and lacking in credibility? How shall we explain reckless administration comments regarding ICBM modernization, to the effect that the money would be better spent on SDI? And how shall we explain efforts to entice our allies into the hope that they, too, can be made immune to nuclear attack?

What it means is that the administration, dazzled by the glow of its own promises, no longer esteems our strategic doctrine enough to take care of it, and to assure its continuity. On the contrary, the administration already seems to hold that doctrine in contempt, and is taking steps to weaken its influence, even before there is any certainty of an adequate successor.

This is the same contempt for the past, the same impatience with present forms, and the same blind faith in a future prescribed by dogma that have always been the hallmark of zealots. It explains the untiring efforts we experience on the part of those who want the President to cashier SALT II; it explains their efforts to decompose the ABM Treaty; and it explains their mischevious assault upon our fragile concensus regarding ICBM modernization.

Because they blindly believe that science can produce the President's perfect defense, they do not feel it necessary to wait to find out what the facts will show. Rather, they feel compelled—in advance—to destroy all competing options for the country, so that only their preferred course remains.

Now, of course, there is an entirely different projection about SDI—coming so far not from the President, but from the technologists and pragmatists out there working on the problem. That is the version of space-based defenses which concedes that perfection is a matter for the distant future; and which aims instead for no more than a level of performance which would complicate a Soviet first-strike.

This approach, they tell us, is—unlike the President's dream—not an attack on the concept of deterrence, but an effort to powerfully reinforce it. Perhaps. But before conceding that point, there are a few questions that need to be answered. I plan to raise those questions in my next speech.

□ 1040

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin is recognized for not to exceed 5 minutes.

COMMENDING SENATOR GORE ON SDI REMARKS

Mr. PROXMIRE. Mr. President, I wish to commend my good friend, the Senator from Tennessee, on the speeches he is making on SDI. I had an opportunity to read the first speech he gave and it was a real blockbuster. If Senators would read any one speech given this year, in my view, they could learn more from the speech given by the Senator from Tennessee about SDI than any other. I think the speech he gave this morning is an excellent followup.

THE FEDERAL BUDGET AND THE ARMS RACE

Mr. PROXMIRE. Mr. President, what force in American life today has the power to persuade American leaders that it is time to stop the nuclear arms race? Is it the desire for peace? No. Love of our fellow man? No. Fear of a nuclear holocaust that might end all life on Earth including our own? No. In the judgment of this Senator, it is none of these cosmic forces. Our best hope for the end of the nuclear arms race is the simple, prosaic, commonsense realization that we just plain cannot afford it. If President Reagan stands by his resolve to veto any proposed tax increase the struggle to stop the arms race is half won. What will the other half require? That should be easy. It requires that our top national leadership recognize the colossal, stunning cost of the arms race.

Critics might say we will stop the arms race because we are too cheap to pay for it. That does not bother this Senator at all. I can think of more insulting reasons, such as the charge that we lack courage. We do not really believe in the sanctity of freedom. We put our own safety above love we owe our country. Let it be said this generation of leaders refused to fight and win the nuclear arms race with the U.S.S.R. not because we lacked patriotism, not because we did not love our country, not because we did not oppose Godless communism, not because we did not cherish freedom but simply because we were too cheap, too stingy, too Scroogelike. We just did not want to pay more taxes.

Mr. President, if anyone thinks this Senator is being coy or sarcastic they are wrong. I mean it. We should stop this runaway nuclear arms race because we do not want to pay higher and higher taxes. And how should we stop it? Gramm, Rudman, Hollings, that is how. The Gramm-Rudman-Hollings Deficit Reduction Act forces this Congress to eliminate the present $200 billion budget deficit in 5 years. Now PHIL GRAMM, WARREN RUDMAN, and FRITZ HOLLINGS are three Senators who are each and all earnestly committed to a strong American military force. Each of those three Senators has a strong and consistent record of working and speaking and voting to pour more resources into building up America's military capability. But each favors cutting the deficit by $40 billion every year for the next 5 years. And each proposes a tax increase.

So how do we comply with the mandated and drastic cuts in spending while still pouring hundreds of billions in the increasingly costly arms race? How do we do it without a tax increase? How? There is a simple certain answer. We stop the arms race. How?

How do we stop the arms race? Answer: arms control. Comprehensive, verifiable, vigorously enforced arms control. But does not that require negotiations and an agreement with the Soviet Union? Sure it does. Can we trust the Soviets to honor their word? Under a single condition we can. We can only trust the Soviets to honor their word to the extent that doing so is in the clear interest of the Soviet Union. Is compliance with an arms control treaty that would stop the production or deployment of new Soviet or American nuclear weapons be in the clear interest of the Soviet Union? You bet your life. It sure is. Why? Because the Soviet Union faces the same economic problem we do, only more so. The arms race is choking off the development of their economy. It is doing even more harm in Russia than to America. Why? Two reasons. First, the Russian economy is only 55 percent as productive as the American economy. They produce about half as much as we do. So an equal economic effort by the Soviet Union is about twice as costly for their economy as it is for ours. Second, the Russian economy is far behind the United States in technology. The Defense Department reported to the Congress this year that in the 20 most important military technologies the United States leads in 14. The two superpowers are tied in six. The U.S.S.R. leads in none. This Soviet shortcoming makes the economic task of competition with the United States in the arms race even more difficult

But why won't the Soviets continue to take whatever resources they need from their industrial economy and pour those resources into the military? The answer is that they cannot. Their future military power depends on their economic power. They know that. So will the Soviet Union keep an agreement to stop the arms race that is so clearly in their interest to keep? They will. The end of the arms race means greater growing security from a nuclear war for both superpowers. And, of course, it also means a stronger, more productive economy for both. Sometimes it pays to be cheap, and this is one of those times.

THE MYTH OF THE DAY: PHYSICIAN PAYMENT REFORM CAN BE ACCOMPLISHED PAINLESSLY

Mr. PROXMIRE. Mr. President, the myth of the day is that a move by Medicare to begin paying physicians based upon their resource costs in performing procedures will be a painless way to reform Medicare.

Ever since the administration indicated its concern regarding a congressional proposal for a physician payment commission to develop a fee schedule for physicians based upon their resource costs—often referred to as a relative value scale—physician groups and others critical of Medicare's payment system have attempted to portray a fee schedule based upon such a resource base as an incremental change in Medicare's payment policy.

Advocates tend to minimize the economic dislocation such an RVS system may produce for certain groups of physicians, arguing that it will simply increase payment somewhat for so-called cognitive services—time spent interviewing, counseling and educating a patient—and decrease payment somewhat for surgical or technological procedures.

While I do not quarrel with moving in that direction, advocates have downplayed the changes in reimbursement that might result.

Consider these charts adapted from the recent Congressional Budget Office report on physician payment reform options. Using the resource cost estimates developed so far by the Harvard School of Public Health, CBO concluded that:

Medicare would cut the payment opthalmologists now receive for cataract extraction—an average $1,000—by a whopping 86 percent to $150.

Suregons implanting pacemakers would be reduced 76 percent from the present average of $1,060 to $256.

And a coronary artery bypass operation would be reimbursed 60 percent less—$1,200 instead of the going rate, $3,000.

If such reductions were implemented, CBO notes, Medicare's payments for these services would be about 20 percent of current payment levels.

Congress may eventually choose to move in this direction. It may be the right direction to go. But the current commentary in Washington that such a step is either incremental or painless is simply wrong. There will be significant redistributions of income that will accompany any major reform of Medicare's current payment system for physicians and we need to go into this policy debate with no illusions that there are any easy answers on the horizon.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business with statements limited therein to 5 minutes each.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GORE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MILITARY IMPLICATIONS OF SDI

Mr. GORE. Mr. President, this is the fifth in a series of speeches on the strategic defense initiative, and, of that series, the second to deal with the military implications of SDI.

In my earlier comments, I concentrated on the deleterious effect that the President's vision of a near-perfect defense has already had on the credibility of our deterrent. Certainly, administration statements that characterize deterrence as immoral and implausible have not done much good. On the contrary, such criticisms have weakened support for existing nuclear strategy and doctrine, the better to prepare the way for a transition to something radically new.

The problem is, of course, that we are not at all likely to have a defensive system with capabilities in line with the advance rhetoric. What we will have, at most, is a system capable only of complicating, rather than thwarting, a Soviet attack. Its advocates concede that the purpose of such a defensive system would be to reinforce, rather than to supersede, a strategy based on deterrence.

But even this more modest assertion needs close scrutiny. Those who are pushing the idea of a limited space-based defense tell us that the case for it is simple and intuitively understandable. Some defense is better than no defense, they assert. And anything that adds to a potential attacker's uncertainty is likely to help deter him from undertaking a first strike. It is, however, more complicated than that.

For example, let us suppose that the Soviet Union decides to construct defenses of its own, on a very broad scale—not necessarily space based, like SDI, but as is more likely, one that is based on technologies that the Soviets have well in hand. Among other things, we might expect them to deploy that kind of system sooner, and with less impact on other military projects, than we could deploy an early SDI system.

That development in itself would put us behind the eight ball, by creating an interval during which the Soviet Union would possess extensive defenses, while we did not. Bear in mind, moreover, that while the Soviet defense could be counted upon to perform at some level of effectiveness, our system—because based on novel technologies developed at breakneck speed—might or might not turn out to be useful.

At any rate, what are the consequences of this development? One of our great fears has been that a Soviet first strike could destroy a very large portion of our ICBM force, if not now, then later, as Soviet missile accuracies improve. Our ace in the hole against such an attack is the U.S. submarine based missile force. Right now, those missiles would have a free ride to their targets in the Soviet Union, because all of them—except those located in or around Moscow—are undefended.

But if the Soviets were to set up an area defense, then our second-strike retaliatory forces at sea could be discounted by whatever effectiveness the Soviet defenses achieve. Would such a situation be tolerable? Almost certainly not, because it would deprive us of the ability to ensure deterrance. And what would our response be? Possibly, we would try to increase the number of strategic missiles in our arsenal The Secretary of Defense, when asked about this hypothetical development, responded unhesitatingly that our immediate response would be to greatly increase the number of offensive missiles that we deploy. But, we would also modify our existing types of missiles to carry all sorts of devices for penetrating Soviet defenses.

Some of these devices are pretty simple and easy to carry. But if you have to contend with sophisticated defenses, you will need sophisiticated penetration aids. These could be heavy enough to rival the weight of real warheads, which they might well have to replace. And all of them would add complexity, which is to say, they increase the risk of mechanical failure.

Moreover, as we all know United States and Soviet ballistic missile forces are far from being equal or symmetrical. Historically, we have relied more heavily than they on manned bombers. The Soviet, by contrast, have invested a great deal in heavy ICBM's. As a result, there are inequalities or assymetries in the area of ballistic missiles, assymetries which have to be taken into account when considering the effect of deploying defensive systems.

The effect of these asymmetries is such that if both superpowers begin to deploy defenses, then the United States must deploy a defensive capability superior at any given time to that of the Soviet Union, in order to remain in a condition of approximate balance with them. Now, it might conceivably turn out that our untested SDI technologies can be put up faster, and perform better, than Soviet defenses based on ABM technology. But that is unlikely. But it flies in the face of prudence to stake our national security on it.

All in all, the fact is that a little bit of defense may, indeed, be worse, not better, than no defense at all. With that conclusion in mind, we would have to look at the idea of partial defenses in a new light: We would have to see them as a venture full of risk for the United States, which ought not to be undertaken without very compelling motives.

Well, if the system we get is admittedly not able to protect the populace, what is it supposed to do? As I said before, the answer to that is, typically, to "complicate a Soviet attack." But an attack against what?

Possibly, against cities, of course. Although that seems to be a losing game, since, if the first warhead does not do the job, the second, or the third, or the fourth will. If the target were New York or Moscow, one might deliberately expend 100 warheads if that is what it took to get through—and considering the value of such targets, that would not be much of a price to pay, if that was the target.

The only real purpose of SDI in its limited form, therefore, is to protect what are loosely termed our "strategic assets." These, in turn, break down into a relatively small set of command and control targets, a somewhat larger set of airfields, and so on. But the central meaning of the term "strategic asset" is more concretely expressed by the phrase "ICBM silo." And so, we finally come down to brass tacks. The ultimate purpose of limited space-based defenses is the defense of ballistic missiles.

But do we actually need to defend these missiles? Is it wise? And, if so, is SDI the right way to do it? I will address these questions in a subsequent speech.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

□ 1110

Mr. MELCHER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MELCHER. Mr. President, may I inquire, are we still in morning business?

The PRESIDING OFFICER. The Senator is correct. We are in morning business.

PRESIDENT REAGAN'S POLICIES

Mr. MELCHER. Mr. President, I am sad to say that much of what President Reagan does in developing his policies for this administration I find to be quite reckless—sometimes careless, sometimes entirely out of context with reality. Let me explain some of my concerns with President Reagan and his policies.

First of all, with the deficits—both the Treasury deficits and the trade imbalance deficit—I think the policies of the President are taking chances that are unnecessary and are quite reckless by not moving directly to develop policies that will clear up these deficits. It is one thing to say to us in Congress, "Well, don't spend so much," while at the same time sending us a budget which requires more spending on both foreign aid and defense.

I think these requests border on recklessness, because Congress might agree to them. The Senate did not agree to them; the House did not agree to them. But that is what the President proposed; both in his request for national defense and for foreign aid. His budget requests in both areas were for a great deal more money than was spent last year, and I believe that is carelessness and reckless on the part of the President.

As to the trade imbalance, it does not do much good for the White House to just say, well, any trade bill—the latest one is one that the House committee has approved and will soon consider—that any trade bill devised by Congress is necessarily bad news and immediately label it as protectionism. There should be corrections in our trade policy. We should move wisely and prudently with the leadership of the President. But again I believe the President has been careless about developing a trade policy that makes needed corrections.

I want to speak very clearly on this one point of the President and the Trade Ambassador and the Secretary of State and the entire administration labeling almost any Democratic proposal for trade policy correction as being protectionism. As one Democrat, I want to state quite clearly that I believe what we need in corrections in trade policy is reciprocal agreements between countries—not protectionism but reciprocal agreements, one trading partner with another: The United States with Japan, the United States with Canada, Canada with the United States, Japan with the United States, the United States with Latin American countries, Latin American countries with the United States; the United States with the European Community—we need reciprocal agreements to work out whatever the inequities and friction points exist. I believe that can be done and I believe correction in trade policy is absolutely essential.

I do not believe President Reagan is leading the country in the right direction by simply saying our trade deficit is going to disappear. The trade imbalance is not disappearing. Indeed, it looks like it might be increasing for this year.

The third point I would like to make is that I think the President's policy on air travel has been, to some extent, reckless for the past several years, beginning with the PATCO strike. I still am not comfortable, and I do not believe the air travelers in our airliners should be too comfortable, either, with the condition of air traffic controllers at this time. We tried to work our way out of that. The administration said the PATCO situation could be corrected by hiring and training new air traffic controllers. Now we are finding out there is some indication that air traffic controllers, either for lack of sufficient training or because they are working too many hours are taking some chances with our airline traffic.

I would like to make this note with the idea that we make some corrections. If we need to have more air traffic controllers, more personnel or better training, whatever it takes, it is a small amount of money. I think trying to be saving a few pennies in this particular area is not very wise and is reckless.

With regard to the space program, I think it was reckless for the administration to push so strongly for so many shuttle flights in 1 calendar year, in one 12-month period. It was almost inviting disaster. I find no reason not to take that into account. Granted that we will have no space shuttles attempting to orbit the Earth during the next several months; but I think during our review of what went wrong with the space program we should also question why it was so important for the President and the administration to encourage NASA to have so many shuttle launchings in 1 calendar year. Ten to twelve space shuttle launchings in the calendar year 1986 as was planned was entirely too many. What was the reason for that?

□ 1120

I also believe President Reagan's policies have been very reckless, careless and neglectful for the farm economy and the farm credit situation. The necessary requirement for the farm economy is improvement of commodity prices. Unfortunately, that has not happened. Unfortunately, commodity prices so far in calendar year 1986 appear to be even weaker than they were a year ago. That is bad news for farmers. It is bad news for their creditors. It is bad news for rural America. It is bad news for all of us who want to see the most basic industry in the United States make an economic recovery and regain some strength. That is not happening, and I believe the President's program in this regard is entirely reckless and careless. What is needed is some cooperation, Democrat with Republican, to see whether we can improve our agricultural policies.

Part of a sounder agriculture policy would be correcting the trade imbalance. Part of it would be better lines of credit, lower interest rates for farmers and ranch producers. This is where we need cooperation.

Speaking of cooperation, I was very much surprised to see that in the bill before us, hopefully to come up in the next few hours, H.R. 4515, the urgent supplemental appropriations for this year, there is a section dealing with the Philippines, which would now receive some attention from us, which is not very well planned. It is not very well stated and certainly is not adequate.

If there is going to be cooperation between the administration and those of us seeking to cooperate with it, there has to be some notification of when they would like to have legislation addressed by the House and the Senate. I have over the past several months worked as diligently as I could with the State Department, with the Department of Agriculture, particularly with the Agency for International Development [AID], to make sure that when recommendations for the Philippines were presented to Congress we could agree on quantities of aid that are meaningful. The aid request for the Philippines unfortunately is not very wise. It is not adequate. It is entirely inadequate. I see that the urgent supplemental seeks to accept the administration's request, however inadequate it is; and incorporate it into this supplemental appropriation bill. This has been done without allowing for much discussion. Nevertheless, I will try to work with the administration and with the Appropriations Committee to see if we can come up with a logical section for the Philippines, and I would like to enlarge upon that right now.

When I say the administration's request for the Philippines is totally inadequate, that does not necessarily mean I am asking for a lot of new money for the Philippines. But, the administration has moved to satisfy the Philippines' urgent need for economic assistance and some military assistance and some food assistance in an inadequate way. Let me explain why it is inadequate.

First of all, they are asking for $150 million in new money, just for economic aid. Well, I think there is some merit in that. It is not a large request considering the size of the Philippines. There are 55 million people living there. There are thousands of islands that form the country itself; 420 of

those islands are inhabited, which makes for quite a large country with quite a large number of people and some economic assistance is merited. But the administration's request for assistance for economic recovery does not even cover what is very essential for the Philippines, and that is some increase in the sugar quota. That is not in the administration's request. That must be addressed. The administration has had 6 or 8 months in which to look this over because not only have Philippine officials been making that request but some of us in Congress have been making that request, particularly myself and Senator INOUYE in the Senate.

The administration should address the urgent need for increasing the sugar quota to the Philippines. That is basic to economic recovery for them.

That is No. 1. No. 2, there is a great need among the unemployed families in the Philippines for food assistance. I earlier mentioned that there are 55 million people in the Philippines. Consider this. Out of those 55 million people, 40 percent of the families are either unemployed or underemployed. That says in and of itself that there is a great need for some assistance, both medical and food but principally food. The Philippines is a country that has during ordinary times quite good agriculture production. However, they do not produce any milk in quantity. Dairy cows are not successful there because of climatic conditions. They cannot produce wheat because of climatic conditions. It just so happens that in the United States our two greatest surpluses right now are wheat and dairy products. They can use it. They should have it. But the administration's request for food assistance is so skimpy that I have earlier compared it to providing one glass of milk and a good, generous serving of nutritious American wheat for each person once a year in the Philippines. Now, their food needs are greater than that, much greater than that. And so the administration's suggestion for food assistance is totally inadequate.

I earlier said I am not necessarily saying let us send the Philippines a lot more money. I am saying let us send them a lot more food, particularly wheat and milk at this particular time. We can do that because we already have the products. They are in Federal storage. It will do us a great deal of good in the long range in trade development and is certainly what the Philippine hungry families now need.

□ 1130

Mr. President, I mention these facts because, while I have been trying to cooperate with the administration in developing whatever package they want for the Philippines for the past several months, we find that the request, strangely enough, now ends up with a few lines in this urgent supplemental.

I hope to work it out with the administration and work it out with members of the committee, so we can have a good package for the Philippines, involving a sugar quota increase, involving assistance in food needs for the unemployed or underemployed families who are suffering from hunger, malnutrition, or undernutrition.

There is a third point: Economic development is significantly part of what everybody talks about in regard to the Philippines and assistance right now. Unfortunately, nothing in this package does anything about economic development. I have mentioned the need for increasing the sugar quota. That is true economic redevelopment, because their sugar quota, reduced in the early 1980's, at the whim of the State Department, has put them in a desperate plight in terms of sugar workers and sugar mills, both in raising and processing the sugarcane to develop sugar. That is No. 1.

No. 2 in economic redevelopment is, where does the capital come from? In the Philippines, it should start on the land. They are very much an agrarian type of society, across the main part of the country. They live in rural areas.

So I am suggesting as a third part of this economic aid package for the Philippines a type of program which I would call a bank for cooperatives—some people like to call it a foundation—working with cooperatives.

I suggest that of the money that has been programmed for various purposes in the Philippines, about $10 million be used to capitalize this bank for the cooperatives, this foundation, and that it annually get more cash infusion by using some of our surplus commodities, wheat and dairy products—wheat and milk, primarily—to be monetized in the Philippines to raise $50 million a year for 3 years.

That type of operation has been carried out in other countries successfully. We should utilize what we have. We have the wheat and the milk sitting in Federal storage. It can be shipped there, donated to the Philippines, monetized there, and the money can form the capital for this bank for the cooperatives.

Mr. President, we need this type of economic help for the Philippines; that is the type of package we need. If the administration can address these points and Senators are agreeable to them, then I think we can act upon them in this urgent supplemental. But to just act upon a few lines that do very little for the Philippines is carelessness on the part of the administration and reckless on the part of the administration, in not coming up with a package that is meaningful.

Why do I say it is reckless? The situation in the Philippines, at best, is sort of in a flux. The new government of Carazon Aquino, the President of the Philippines, is trying to take off. It must take off. There will be a new constitution drafted. There will be election of all the mayors and all the governors. There will be an election for their whole Parliament. That will occur over the next 6, 7, or 8 months. In the meantime there is a state of flux.

The economy of the Philippines is still sinking. It has been in disrepair, in bad shape, for the last several years, and it is not getting any better. We do have a stake in terms of national defense, because the Subic Naval Base and Clark Air Force Base are important to our national security interests, but we also have a vital interest in trade. Trade with the Philippines has been significant for us in the past and has dwindled in the past 5 years. It should be renewed again, should be invigorated again, should take off with greater strength and greater continuity again. This is our opportunity to do that. It is extremely important that this package be put together within the next couple of weeks in the Philippines. I have been working with the administration for months on this, and now I find, all of a sudden, it is just a few lines in an urgent supplemental bill.

For that reason, Mr. President, I think it would be unwise to pass it that way. We might open a dialog on this today. I have taken this time in morning business to express some of my concerns.

At this time of unrest—not violent unrest, but uncertainty—in the Philippines because of their economy, and during the months that they prepare the countryside and all citizens there to adopt a new constitution and elect officials at every level of government, I think a meaningful package for the Philippines is absolutely in order.

I do not wish to draw down more out of the funds in the Treasury. What I wish to do is to provide practical means by increasing the sugar quota and by utilization of the surpluses we have in both wheat and milk, to capitalize a bank for the cooperatives, for economic redevelopment in a meaningful way.

I think the potential for doing that is upon us; it would be reckless and unwise and careless not to address the situation in that way. We do have a stake in the Philippines with respect to our national defense in Southeast Asia. We have a stake in the Philippines for a basis of trade which I would like to see renewed and reinvigorated.

Mr. President, I think it is wise that we pay attention to these needs now. I hope the administration, under President Reagan, can recognize the seriousness of that situation and deal

more cooperatively with us on these matters.

Mr. President, I yield the floor.

DENY YASSER ARAFAT A VISA TO THE UNITED STATES

Mr. DENTON. Mr. President, today, Senator FRANK R. LAUTENBERG and I are circulating a letter requesting that the Secretary of State deny Yasser Arafat a visa to enter the United States. The Chairman of the Palestine Liberation Organization may be seeking this visa to attend and address the Security Council of the United Nations. Arafat is widely recognized as a kingpin of world terror; we cannot and we must not again open our doors to him.

On April 8, 1986, Attorney General Edwin Meese declared that: "Various elements of the PLO are in the thick of world terrorism and the leader of the PLO, Yasser Arafat, must ultimately be held responsible for their action." Intelligence reports link Arafat and the PLO with terrorist and guerrilla organizations around the world.

Moreover, Arafat has intentionally directed his terror against the United States. On November 13, he proudly stated: "We are on the threshold of a fierce battle—not an Israeli-Palestinian battle but a Palestinian-United States battle." Arafat's aggression toward the United States is so clear that his stated policy is to "defy the Americans and resist their policies." According to public record, Arafat's wing of the PLO, el-Fatah, has been responsible for murdering at least 32 Americans and wounding an additional 38. Evidence would also indicate that Yasser Arafat is possibly directly involved, through his top aides, in atrocities like the murder of U.S. Ambassador Cleo Noel, Chargé d'Affaires G. Thomas Moore, Belgian Ambassador Guy Eid in Khartoum, Sudan, 1973, and the campaign of terror waged by the Black September organization.

That this terrorist leader can be denied entry to our country is not in dispute. The Department of State possesses the right to deny visas to individuals imperiling our country's security. Section 6 of Public Law 80-357 gives the United States the right to "safeguard its own security and completely control the entrance of aliens * * *." Paragraph 29 of the Immigration and Nationality Act permits the exclusion of those who "engage in Activities * * * subversive to the national security." Charles Redman, of the Department of State, affirmed this authority on January 15, 1986, by saying: "We will exclude individuals who personally advocate terrorism or who we believe have participated in or supported terrorist activities."

Not only does the United States reserve this right to exclude aliens, but the Department of State has exercised this right regularly since 1947. For example, on April 9, 1953, the Department of State denied visa requests by Mrs. Margarette Rae Luckock and Mr. Jan Dessau who sought to represent certain nongovernment organization at sessions of the U.N. Economic and Social Council.

On October 6, 1972, despite strenuous opposition by Syria, then U.S. Ambassador George Bush notified the U.N. Secretary that the United States would bar Dia-Allah El-Fattal, head of the International Organizations Department in the Syrian Foreign Ministery, from joining the Syrian delegation (in the General Assembly). The following day, the New York Times observed that the practice of denying people entrance to the United Nations "is not normal, but is not unique either * * * and it is believed that the practice has not been challenged." Arafat himself conceded that the United States holds the power to deny him a visa. On October 25, 1985, he lamented that even if he had been invited to the 40th anniversary events of the United Nations, "Reagan would never have granted me a visa to enter the United States."

Clearly, the United States is authorized to control the entrance of individuals threatening national security. And a visit by Yasser Arafat—a catalyst for world terror—would certainly jeopardize our country's interests. Admitting Arafat into the United States provides him with a forum for increased communications between the PLO and its terrorist allies. A visit by Arafat can work against the administration's efforts to fight terrorism. Even more importantly, by admitting him into the United States, we recognize Arafat's terrorist activity rather than condemning it. Attorney General Meese commented on the "degrading spectacle of terrorists holding press conferences like they were heads of state." We should therefore not raise Arafat to a level of importance he does not deserve.

Mr. President, on April 23, 1986, the Subcommittee on Security and Terrorism, of the Committee on the Judiciary, which I chair, held a hearing on the question of whether the Department of Justice should seek an indictment for Arafat for the murders of Noel and Moore in 1973. We have not yet reached a final determination of that hearing, although the Justice Department has indicated that they believe an indictment would violate the ex-post-facto clause of the Constitution. However, no such constitutional impediment exists that would prevent either the Secretary of State or the Attorney General from denying Arafat the terrorist the privileges of our shores.

In the battle against terrorism, we must confront the terrorist at every opportunity. The power of the United States to exclude individuals from the United Nations Headquarters District is absolute. But the responsibility to take such action is an even greater duty of a moral and just country.

Having said this, I want to emphasize that just as the PLO has attempted to usurp the Palestinian cause from the Palestinian people and to pursue its grievances against Israel and its principal ally, the United States, with terrorism, there remains the legitimate issue of the Palestinian question which must be addressed. This is because its outcome directly affects the future of several million Palestinians who have not followed Arafat and his cohorts in their rampage of violence and carnage. It is these people with whom we must be concerned and whose future must be considered if a lasting peace in the Middle East is ever to be achieved.

Mr. President, the time to act is now. A decision on granting a visa to Yasser Arafat will be made in the next few days. If the Senate is to speak, we muct act prior to the start of the Memorial Day recess.

I urge my colleagues to join Senator LAUTENBERG and me by signing the letter we are circulating requesting the Secretary of State to deny Yasser Arafat this visa.

NATIONAL TOURISM WEEK, MAY 18-24, 1986

Mr. HOLLINGS. Mr. President, Congress has designated the week beginning May 18, as "National Tourism Week," and the President has issued a proclamation to that effect.

The national theme for tourism week is "Tourism Work$ for America." Some of the economic statistics from my own State of South Carolina illustrate how appropriate that slogan is. In 1985, travel and tourism generated more than $3 billion in direct visitor expenditures. Those expenditures provided jobs for 80,521 South Carolinians. Travelers also accounted for $179 million in tax revenue, $52 million of which went to the State, and $27 million for local governments. That $179 million in taxes went to build facilities such as schools and hospitals and to provide services for all the residents of South Carolina. It also means that our State personal income tax bill was, on average, $174 less than it would have been without those visitors.

Statistics on international travel for 1984 show that 29,300 tourists from Europe visited South Carolina and spend $6.6 million. This resulted in a cost/benefit ratio of $66.27 for each dollar invested by the State.

These impressive economic statistics did not happen by accident. They are the consequence of an awareness of tourism's importance and a willingness

to capitalize on the industry's potential.

Twenty-six years ago, when I was Governor of South Carolina, I first realized the vital role tourism plays in our economy. According to a study I read back then, Myrtle Beach had a large budget for tourism and was reaping huge dividends from its wise investment. Meanwhile, my hometown of Charleston was spending very little on tourism promotion and, as you might expect, was receiving very few tourism dollars.

I discovered then that many communities across South Carolina—a State so rich in history and natural beauty—could profit from a statewide effort to promote tourism. So, in the early 1960's, we established the Legislative Committee on Tourism and Trade. In 1965, we launched the first Governor's conference on tourism and trade. And later, the State instituted the department of parks, recreation and Tourism. That effort by the State and local government and the industry has continued:

The Governor has proclaimed May as South Carolina's special month for tourism and travel.

"Tourism Works for South Carolina" was the theme of the 1986 Governor's conference on tourism and Travel held at Myrtle Beach last February.

During National Tourism Week, there is a special ceremony at the South Carolina State House with participants dressed in costumes from their tourism region.

A special information booth has been set up in the statehouse and will be staffed during National Tourism Week to promote South Carolina's tourism industry.

The 10 South Carolina welcome centers are working closely with local motels, restaurants, and attractions to offer discounted rooms, meals and admission prices and sponsors will offer refreshments for travelers. Thousands of "smiling faces, beautiful places" stickers will be given away at the centers.

Mr. President, the same kind of economically important story can be told by nearly every 1 of our 50 States and the Federal Government. With some exceptions, all came late to a realization of tourism's potential. But once they started to capitalize on that potential they discovered that the economic yield was tremendous. At the national level, tourism is our third ranking industry, and generates over $240 billion in expenditures annually.

The goal of National Tourism Week is to make Government officials and consumers aware of just how important tourism is to the economic, social, and cultural welfare of the United States. The administration's efforts to eliminate the modest but absolutely vital Federal tourism effort indicate how important this week is. I wish to commend the millions of Americans who are the U.S. tourism industry, and urge them to redouble their efforts to make sure that everyone in official Washington gets the word this week.

NATIONAL TOURISM WEEK

Mr. PRESSLER. Mr. President, I would like to take this opportunity to encourage my colleagues to join me, in recognizing May 18 to 25, 1986 as National Tourism Week.

Many people are surprised to learn that travel and tourism is the third largest retail or service industry in the United States, exceeded only by automobile and food sales. Tourism is a $220 billion industry which employs almost 5 million people in our country. At the State level, travel and tourism is the first, second, or third largest employer in 41 States.

The impact of this activity is accentuated by the fact that the industry is still rapidly growing—the 2.9 million new travel and tourism related jobs created in the past 10 years represent 18 percent of the total increase in employment. For every two jobs added in the travel and tourism industry, another job is created in businesses supplying related goods and services. It is clear that the breadth and variety of businesses involved in the travel and tourism industry is enormous.

Primary travel-related businesses include intercity bus, rail passenger and air passenger carriers; eating and drinking establishments, hotels and motels, campgrounds and trailer parks, car rental firms, oceangoing cruise lines, amusement and recreation services, and others.

However, the volume of goods and services required by these primary travel and tourism enterprises creates a vast interrelated constituency. People who travel need a mode of transportation, a place to visit, shelter and food. They seek entertainment, recreation, and souvenirs. They require a wide variety of other kinds of assistance along their way: Automotive repairs, services for the handicapped, medical attention, security, and so forth.

In order to fully realize the contribution the travel and tourism industry can make to a State or National economy, I believe more cooperation and coordination is necessary. Kay Steuerwald, a member of my U.S. Senate Travel and Tourism Industry Advisory Council, and president of the Mountain Co. at Mount Rushmore National Memorial in South Dakota, issued a relevant challenge recently. She told local travel and tourism promoters to "get political" or miss the economic boat.

I challenge my colleagues today to get political about travel and tourism as well. This enormous and expanding industry, and the goods and services industries that complement it, arguably comprise one of the most important and influential economic forces in nearly every one of our home States. I believe no one in the Congress can afford to ignore this fact.

I challenge each of my colleagues to embark upon a timely expedition to discover the full extent of the travel and tourism industry and its related support industries in their own home States.

As chairman of the Business, Trade, and Tourism Subcommittee, I welcome the opportunity to assist you in this endeavor through any of the following services:

First, the coordination of a statewide Tourism/Business Conference to explore the interrelationships between travel and tourism and other businesses in your State;

Second, information on possibilities for growth or other assistance that is available through the U.S. Travel and Tourism Administration [USTTA] and private national travel and tourism organizations;

Third, suggestions of industry experts who are available to address local travel and tourism related groups; and

Fourth, other travel and tourism related activities.

By supporting the continuation of USTTA, we stand to multiply the fiscal impacts of international tourism and to ensure that "have not" States are given an opportunity to share the wealth with those States that can afford impressive promotional budgets.

In addition, USTTA provides us with the ability to compete for the international visitor's dollar in a world where each nation is increasingly anxious to improve its own balance of trade. Developing countries especially recognize the importance of earning foreign exchange, and competition between developed nations is also escalating. Canada alone will spend $40 million, or $1.62 per capita, on national tourism promotion in 1986. We will spend a little over $11 million in the United States—less than 3 cents per capita.

How important is the export of travel and tourism to the U.S. balance of payments? The Office of the U.S. Trade Representative and the Department of Commerce note that, in 1985, tourism exports represented 25 percent of the $45 billion generated by all services experts. This percentage has been higher, however, and it can be improved if we allow USTTA to continue its efforts.

USTTA is striving to increase the United States' world market share from its present level of 11 percent to at least 13 or 14 percent. No other agency is in a position to accomplish what USTTA does through its interna-

tional negotiations to break down travel barriers, and through the sophisticated cooperative advertising marketing initiatives carried out by its 10 overseas offices.

I recently introduced S. 2307, along with 17 cosponsors, to reauthorize funding for this important agency for 1987, 1988, and 1989. During this 1986 National Tourism Week, I invite my colleagues to join me in cosponsoring this legislation.

In summary, I say that time is of the essence. The competition for the travel and tourism dollar is fierce. You can help your State reap the economic benefits of travel and tourism by providing it with all the relevant information and assistance that is available. You can help the United States reap the benefits from increasing its share in the world travel and tourism market by supporting the continued authorization of funding for USTTA.

I look forward to working with you in seeking to accomplish both of these objectives as we observe this year's National Tourism Week and look to the days that follow.

TRIBUTE TO THE LATE SPEAKER EMERITUS OF THE HOUSE OF REPRESENTATIVES, SOLOMON BLATT

Mr. THURMOND. Mr. President, the State of South Carolina mourns the loss of one of its most distinguished and beloved leaders, Speaker Emeritus Solomon Blatt of Barnwell, who died Wednesday at the age of 91. To his family, including U.S. District Judge Solomon Blatt, Jr., whom I had the pleasure of recommending to the Federal bench, I extend my deepest sympathy at his passing.

A 54-year veteran member of the South Carolina House of Representatives, Sol Blatt had the great distinction of being this Nation's longest serving State legislator. First elected speaker of the house in 1937, he was reelected to that post in 1939 and every 2 years thereafter until 1945. In 1945 and 1947, he chose not to offer himself as a candidate for speaker, but ran again in 1951 for the post and was elected. He served as speaker continuously until 1973, when he was honored by his colleagues with his election as speaker emeritus. He was considered a shrewd parliamentarian and known affectionately as "Mr. Speaker." He will always be remembered as one of our State's greatest speakers of the house.

The son of Russian Jewish immigrants, Sol was born in 1896. After graduating from the Blackville public schools and the University of South Carolina Law School, Blatt served 11 months in the U.S. Army during World War I. After the war, he began practice of law in Barnwell and quickly established his reputation as a fine lawyer. He had not only convincing oratory skills, but a generous and compassionate heart as well, and he often represented poor clients who were unable to pay him for his services.

He served our State during the most transitional time of its history. He watched a rural, agrarian economy become more urban and industrialized and saw paved interstates replace dirt roadways. Yet through the changes of his lifetime, he was not a stagnant reminder of the past, but a prophet of the future, a moving force in the growth and development of South Carolina.

His death is a great personal loss for me, since he was my friend and a man for whom I had the greatest respect and admiration. His life personified the qualities of leadership: courage, capacity, courtesy, character, and compassion. During his tenure in the statehouse, he wielded great power and influence, but never abused his position. A humble man, Sol was guided by the philosophy that public service is a public trust, and he was always mindful of the responsibilities he carried as a legislator.

Mr. President, I know of no one who was more revered and respected by his colleagues than Sol Blatt. He was loved for his sense of duty; his integrity; his humor; his willingness to help others; and his love of life. He gave his State and his fellow legislators his all, and they returned to him their unswerving loyalty and respect.

He was honored in many ways, the highway between Barnwell and Columbia is named the Solomon Blatt Highway. His portrait hangs in the Barnwell County Courthouse and the house chamber. In 1982, the house dedicated its entire legislative session to him. Most visible among his honors is the Soloman Blatt Building, which currently houses the offices of all State house members and is located directly across from the statehouse itself.

Last week, I was pleased to join with my distinguished colleague, Senator HOLLINGS, in bestowing yet another honor upon him. Legislation we cosponsored would name a new post office in Barnwell as the Solomon Blatt Post Office.

Mr. President, I rise today to pay tribute to the life of Solomon Blatt—to his public service, but equally as important, to the man himself. His life was a textbook example of leadership as a soldier, as citizen, and as a distinguished State legislator.

In order that I might share more about the remarkable life and accomplishments of this man with my colleagues, I have compiled a number of newspaper articles and editorials about Sol Blatt. I ask unanimous consent that these articles be included in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Charleston (SC) Evening Post, May 14, 1986]

SOLOMON BLATT DIES AT AGE 91

South Carolina Speaker Emeritus Solomon Blatt, the country's longest serving state legislator, died this morning after battling heart and respiratory problems for the past few months, his personal physician said.

The 91-year-old Democratic lawmaker was admitted to Barnwell County Hospital at 7:45 p.m. Tuesday and died at 3:10 a.m. today, said Dr. Henry Gibson.

Gibson confirmed Blatt's death, but didn't cite the cause.

"He has had recurrent difficulties with his cardiac and respiratory systems in the last three to four months," Gibson said. "He was just wearing out, but his mind was still sharp."

Graveside services were set for 11 a.m. Thursday next to Holy Apostle Episcopal Church in Barnwell.

Blatt's desk in the House chamber was draped this morning with a black cloth, and a white vase with a single white carnation was placed on top. House members went along with a suggestion by House Speaker Ramon Schwartz Jr. that they meet briefly today then recess for the week out of respect to Blatt.

Schwartz praised Blatt's years in the House.

"I temporarily hold the office of speaker, but he will always be known as the 'Speaker of South Carolina,'" said Schwartz.

Gov. Richard W. Riley immediately ordered the flags atop the Statehouse flown at half staff.

Blatt's last day at the Statehouse was May 6. He was hospitalized several times in the past few months, including a recent stay at Medical University Hospital in Charleston.

Blatt was recognized by the Council of State Governments in Lexington, Ky., as the country's longest-serving state legislator.

"I'm deeply saddened about the death of Solomon Blatt," Riley said today. "South Carolina has lost a true leader. He led a long and productive life, and South Carolina's state government will always carry his mark."

Born of Jewish immigrants, Nathan and Mollie Blatt, in Blackville on Feb. 27, 1895, Blatt, a Barnwell lawyer, served 53 of his 91 years in the House.

His parents arrived penniless in Charleston. Carrying a heavy peddler's sack, Blatt's father walked to Barnwell County, where he became a merchant. The long-time legislator began his working career in his father's store, but became interested in the legal profession after taking longhand trial testimony for a local magistrate.

Moving from the magistrate's courtroom to the University of South Carolina campus, Blatt graduated from law school in 1917. Because of his professed trouble with mathematics, Blatt never received a bachelor's degree from the university.

As he was later to say, "I plead guilty to being a pretty darn good country lawyer." He was considered a master at begging for leniency for his clients, often using tearful pleas to sway a jury or judge.

"I'm glad to help people when I can," he once said.

After receiving a law degree, Blatt served in the Army from 1918-1919. In 1930 he made an unsuccessful bid for a House seat and vowed never to run again. However, two years later he was back in the race and won.

Blatt began his service in the House in 1933 and was elected speaker pro tempore in 1935.

Thirty-two years of his service was as House speaker—another national legislative record. He first served as speaker from 1937-1947 and again from 1951-1973. Called by some "King Sol," Blatt chose not to run during the 1947-51 gubernatorial term of Strom Thurmond against the governor's candidate, C. Bruce Littlejohn, who later became Supreme Court chief justice.

Retiring as speaker in 1973 on the advice of his doctor, Blatt that year was elected speaker emeritus—a ceremonial postion. Interviewed during his final year as House speaker, Blatt said of his service, "I believe I have worked harder at this job of being speaker than anyone I have ever known."

Blatt roamed the Statehouse for more than 50 years, overseeing all of the House activities. During that time, Blatt said he just tried to do the best for South Carolina.

"If . . . I could say that I am satisifed with what I have done for my people, I'd die a happy man," Blatt said recently.

The House dedicated the legislative session to Blatt in 1982, and other legislators commended him for his distinguished career in the Legislature. Blatt earned the respect and love of his colleagues.

The governor said today that Blatt "brought this state strong legislative leadership . . . guided by fairness. He worked for a balanced budget and sound fiscal management of state government."

Rep. Clyde M. Dangerfield, D-Charleston, who now becomes the senior member in the House, recalled Blatt's years' at the speaker's rostrum.

"Sol was great leader, everyone respected him. He knew how to get things done. He knew the spirit of compromise and he taught me a lot," Dangerfield said today.

"Sol and Mrs. Ethel (Blatt's wife, who died recently) were very dear friends of the family. All my children, he sent them a gift when they were born. And he sent them a gift when they married," Dangerfield said.

"Both he and Mrs. Ethel were great friends of the family. We loved him and we're going to miss him."

Not one to mince words, Blatt made his position clear on major issues. A strong opponent of the proposed equal rights amendment, Blatt said of the measure: "I totally oppose it and intend to fight it for all it's worth. I have got to do something to help save the women from themselves.

"God made men and women different, and now some women and some organizations are trying to change women to men, that which God never intended. No group should try to undo that which God has done."

Although a Democrat, Blatt, then speaker in 1972, threw his suport behind Republican Richard Nixon in his presidential race against Democratic opponent George McGovern.

"A politician has got no business holding public office—he should be a statesman," Blatt once said. "But," he added, "politics has been in government ever since there has been a government and it always will be."

He advised young people to get involved and seek public office. However, he cautioned, I would want a man with dedication. Not a man seeking public office hoping the salaries would be raised so the General Assembly would become a job rather than a responsibility on the shoulders of a citizen to make his state a better place in which to live."

His longevity of service was celebrated in the House Feb. 27, 1986, Blatt's 91st birthday. A telegram from President Ronald Reagan citing the legislator's distinguished career was read as Blatt received congratulations from his colleagues.

Speaking before an audience in 1979, Blatt said his career goal was "to leave this state a little better place than I found it."

[From the State, Columbia, SC, May 16, 1986]

SOLOMON BLATT EARNED PLACE IN OUR HISTORY

The death Wednesday of Solomon Blatt of Barnwell at age 91 will be lamented by older generations throughout South Carolina. A political giant of their time is gone now, only to be known to the young from history books and their elders' cherished anecdotes of the Barnwell Ring.

Sol Blatt has a unique place in our state and national records of public service, having been a legislator for more than 50 years and the Speaker of the S.C. House of Representatives for 33 years—a presiding officer longer than any other in the country's history.

The people of his constituency had abiding confidence in him. Barnwell County voters elected him 27 consecutive times to the Legislature, and the House of Representatives chose him to preside over their deliberations for more than three decades. He was still called Mr. Speaker long after he put down the gavel, and at the time of his death, he was seeking another term in the House.

The long tenure was a source of his great political power, but his sure-handed parliamentary ability, and a deeply felt responsibility for his state generated his accomplishments. As Speaker, he put close colleagues into commanding committee positions, which enabled him to influence the course of legislation. No governor could be successful with a legislative program without Blatt support.

He was a master of parliamentary and political maneuvering, and as House members sought his help with favorite bills he piled up the chips to be used in later tradeoffs for causes he was interested in. But there is a paradox: The late James F. Byrnes remarked once that a student researching Mr. Blatt's authorship of monumental legislation would be disappointed. He consistently supported public education, law enforcement, and his beloved University of South Carolina—but he got others to offer his choice legislation.

Mr. Blatt's lasting impact on South Carolina was not any single piece of legislation or cause. He and his fellow Barnwell lawmaker, the late Sen. Edgar A. Brown, who dominated the Senate for decades, and who were often called the Barnwell Ring, made the Legislature the controlling branch of state government.

Mr. Speaker left another legacy South Carolinians must cherish. He was innately a financial conservative. His Jewish parents arrived in America and Barnwell County almost penniless in 1893 as refugees from Russia. They spoke no English. But among the qualities they instilled in him were caution, thrift, an eagerness for education, and a will to work hard at any task.

It is no wonder, then, that Mr. Blatt installed in the House rules a requirement that all state budget bills must be balanced with anticipated revenue—the House would pass no budgets with deficits. This rule has assured South Carolina's excellent credit rating in the nation's money markets.

Another dimension of Mr. Blatt is little known. In the Great Depression, a young man from Denmark, S.C., who had worked his way through USC, decided he wanted to go to law school but had no money.

He recalls now that he'd read that Nathan Blatt, Solomon Blatt's father, had made a loan to Bamberg County, so the ambitious young man went to see him, figuring he might get a loan, too. He found Sol, instead, and explained how he borrowed money to go to USC and paid it back, and needed $100 to go to law school. Mr. Blatt sized the young stranger up, and told him $100 wouldn't go far enough—and offered him $500 on condition he make good grades and pay it back when he could.

Nine years later, after World War II, the debt was repaid, but Mr. Blatt refused to take any interest. "I would never have been a lawyer. I would not have been a state senator. I would not have become a circuit judge. And I would not have been on the Supreme Court if it weren't for Mr. Blatt," said Chief Justice Julius B. "Bubba" Ness.

Sol Blatt, like his father before him, believed in the fulfillment of the American dream of opportunity for everyone. He showed his appreciation in devoted service to a state he loved dearly.

[From the Columbia Record, Columbia, SC, May 14, 1986]

A LEGEND DIES

The booming voice of the nation's longest-serving legislator was stilled early today with the death of Solomon Blatt, speaker emeritus of the South Carolina House of Representatives. Taken in the aggregate, his accomplishments during 53 legislative sessions—33 as speaker—place him among the most influential lawmakers in the history of the General Assembly. Blatt loved his state with unabashed emotion and left an indelible mark on her institutions and her laws.

The son of Russian Jewish immigrants, Blatt was born and related in Barnwell County, which raised his home for a 91-year lifespan. A University of South Carolina Law School graduate, Blatt was elected to the House in 1933 and to the speaker's job in 1937 by a membership which was almost exclusively gentile. "I am a living example of the tolerance of the people of South Carolina," he proclaimed with tears in his eyes after his victory. Perhaps. But until the advent of single-member districts in 1970, no blacks served with him.

During his tenure, "Mr. Speaker" wielded power, according to one wag, "with an iron hand encased in a velvet glove." He advocated shorter legislative sessions and had a legendary ability to expedite the processing of bills—sometimes cutting off debate or refusing to recognize those lawmakers who wanted to make a verbose, or opposing, point.

When Blatt felt strongly about an issue, he was unabashedly partisan. He was a fierce supporter of nuclear energy (and the Barnwell Nuclear Fuels Plant in his home county), improving the state's highways and its industrial development. He also was a big USC booster and served for a time on its board of trustees. But he was a vociferous opponent of the state's mandatory school attendance law as well as the single-member

redistricting of the House. The latter, he said in 1980, had created parochialism and "a deterioration in statesmanship."

Blatt's political alliances changed over time, but he is perhaps best remembered as one of the fabled "Barnwell Ring," which reached its zenith of power in the 1940s. The other members, all deceased, included Senate Judiciary Chairman Edgar A. Brown, House Ways and Means Committee Chairman Winchester Smith and Gov. Emile Harley.

Blatt's talents as a trial lawyer were also legendary. Famous for his ability to rattle the rafters with glowing oratory or to summon a tear at a moment's notice. Blatt practiced law in Barnwell for 69 years and headed one of the most successful law firms in the state.

He saw South Carolina move from a rural, agrarian economy to a more urban, industrialized one. He witnessed the highways change from mostly dirt roads to the massive interstate system of today. His career began at a time when the Ku Klux Klan was a voice to be reckoned with but spanned so many decades of change that, at its end, he witnessed the emergence of South Carolina's black citizens as a potent political force.

Like all strong-willed leaders, Blatt had his share of detractors and fans. But, in the end, the latter far outnumbered the former. He received honorary doctoral degrees from Augusta Law College, Lander and his alma mater. The highway between Barnwell and Columbia, which he traveled for 53 years to and from the State House, was renamed the Solomon Blatt Highway. The House office building in the Capitol complex was named in his honor, and a bronze bust of Blatt stands in the lobby. His portraits hang in the House chamber and in the Barnwell County Courthouse.

In recent years, Blatt's failing health sometimes kept him away from the floor of the House which he loved so well. But whenever his health permitted, he could be seen sitting at his desk in the back of the chamber or chatting with fellow lawmakers in his office. Three months ago, he donned his gold ceremonial robe to introduce his close friend, state Supreme Court Chief Justice Julius B. "Bubba" Ness, who delivered his "State of the Judiciary" speech to a joint session of the General Assembly.

The era of personal politics is fast disappearing in South Carolina. The powerful individuals who all but ruled the General Assembly—the Edger Browns, Marion Gressettes and Solomon Blatts—are gone. Coalitions—often shifting and changing with the issues—now dominate the legislative process instead of a few dynamic men. Sol Blatt's time has passed. But for half a century he served his state with a single-minded devotion that his younger colleagues would do well to remember . . . and emulate.

[From the Evening Post, Charleston, SC, May 15, 1986]

A FINAL TRIBUTE TO "MR. SPEAKER"

Of the 7,600 state legislators in this nation, no other had served longer than South Carolina's Speaker Emeritus Solomon Blatt when he died Wednesday at the age of 91. But Sol Blatt's contribution to the state went far beyond the records he held in longevity, both as the speaker and a member of the House. It was a rare piece of legislation that became law in this state without the blessing of Sol Blatt during his 31-year reign over the House, where he spent a total of 53 years. He was a "legislator's legislator"—a master of parliamentary procedure with an incisive mind, who relished the governmental process that gave this son of a Jewish peddler such an enviable place in the state's history.

Sol Blatt talked often, in fact, of his parents and their struggle, and of the good fortune that had come his way. He had strong loyalties, not only to his family and friends, but to institutions such as the University of South Carolina where he got his law degree in 1917, and to Barnwell County whose voters kept sending him to Columbia. There was a time in the state's history when that small, rural county was the epicenter of political power. Not only was native son Blatt the speaker of the House but the senator from Barnwell, the late Edgar Brown, was the president pro tempore of the Senate. In those days, not even a governor was so foolish as to needlessly antagonize the "Barnwell Ring" if he hoped to accomplish very much during his term.

While Sol Blatt may first have won the speakership four years after he got to the House by being in the right place at the right time, his long tenure at the podium had little to do with luck. It had to do with skill and hard work. In the old days, it wasn't all that unusual to find Speaker Blatt literally "opening up" the Statehouse, ready to begin work even before the security guards arrived.

While staying on top of things doubtless contributed to his long reign in the House, so did the force of the Blatt personality. He was a tough presiding officer who brooked no nonsense and kept the process moving. He also was an unashamed sentimentalist who could make a tearful plea for a favorite cause in the Statehouse much as he was renowned for doing when he pleaded for leniency for a client in the courtroom.

But as the years passed, the power of the speaker and the resulting domination of the rural counties over the urban areas began to set less well with many of the members. When it became clear after the reapportionment of the early 1970s that Greenville Rep. Rex Carter might well have the votes to topple "King Sol," a compromise was reached that allowed the speaker to serve another term without challenge with the agreement that he would step down in 1973.

Sol Blatt stuck to his word, although he insisted when he announced his retirement that he could have been re-elected by an overwhelming vote. He was just ready, he said, to lighten the load. The fact is that the speaker emeritus adjusted to the role of elder statesman better than many anticipated. He chose to sit in the back row and while he had his own office just off the floor, he never interfered with the way his successors ran the show. He obviously mellowed after stepping down, but his mind remained quick and he was regarded by his colleagues not only with affection but also with great respect.

He did, however, seriously consider retiring in 1983, a year that marked 50 years of legislative service. In fact, he worked periodically for several months on a farewell address that finally he simply couldn't bring himself to make. The last few years did have their traumatic moments. He was pained by the 1984 single-member district reapportionment of the state Senate that resulted in putting portions of Barnwell County in three separate senatorial districts. "Now in my old age," he said in a poignant address to the House, "Barnwell is without representation and no chance of having a voice in what goes on in the Senate of South Carolina. If you want to see them (the senators) you might have to ride as far as 45 miles to beg a crumb of bread."

Although that show of his old eloquence couldn't stem the single-member district tide, the speaker emeritus still was able to use his powers or persuasion to bring the House to its senses from time to time. One of the last times was when the House was deadlocked over the budget last year. Not only was his legislative career nearing an end but so was his life he told his colleagues in an emotional appeal to "put aside petty differences." They did—at least for the moment.

Sol Blatt's failing health had become increasingly apparent in recent years. What's more, the death last year of Ethel Blatt, his wife of 65 years, after a long illness seemed to have crumpled his spirit. While he had one more birthday anniversary after his 90th celebration last year, it was on that occasion that he talked at length about that of which he was most proud.

"If I were going to pick out one thing that I am right happy about, (it would be) the fact that I tried my best to live the life of an honest legislator, trying to do something for the welfare of his people." Sol Blatt had a constituency that extended far beyond the boundaries of Barnwell County and he did "his people" proud.

[From the News and Courier, Charleston, SC, May 15, 1986]

SOLOMON BLATT

A man of high principles, Solomon Blatt served 53 years in the House of Representatives of the State of South Carolina. For 33 of those years he was Speaker of the House. Both statistics are national records for longevity. In addition to length of service, Speaker Emeritus Blatt made high marks for quality of leadership. In 1985, at a celebration of Blatt's 90th birthday, Speaker Ramon Schwartz summed up Blatt's career by saying,"What he has done for South Carolina will live long after all of us are gone."

Earlier that year, Blatt achieved the longest record of service in a state legislature when state Sen. Dave Manning resigned from the Montana legislature. Manning was 87 at the time. He had been sworn in eight days before Blatt became a legislator in South Carolina, Jan. 10, 1933.

In 1985, Blatt also said:

"If I was going to pick out one thing that I am right happy about is the fact that I tried my best to live the life of an honest legislator, trying to do something for the welfare of his people. Included in that would be education, roads and other things. If I had to close my eyes and my master called me now . . . I could just say that I am satisfied with what I have done for my people. I'd die a happy man."

Born Feb. 27, 1895, at Blackville, Blatt was a son of Nathan and Mollie Blatt. They migrated to America from Russia. Sol Blatt was proud of his Jewish heritage, and quick to defend it against slurs of any kind. Though courteous, he was not one to dodge a contest. Blatt was in military service in World War I. He was a practicing lawyer for many years. At a period when several others from Barnwell County, including the late State Sen. Edgar A. Brown, were prominent in South Carolina politics, some people made reference to the political power of "the Barnwell Ring." Blatt denied the existence of any such coalition. He proved in many ways that he was his own man.

Many honors came his way, among them honorary degrees from The Citadel and the Medical University of South Carolina. A state office building in Columbia was named for him. So was the stretch of S.C. Highway 3 from Barnwell to Columbia, which he traveled so many times on state business.

At age 83, Blatt said he would continue to run for a house seat "as long as God gives me the strength." He received the strength. In 1979 he said he hoped to be remembered as a man who has brought a little sunshine where there was darkness." His light will continue to shine.

[From the Greenville News, Greenville, SC, May 16, 1986]

SOL BLATT, LEGISLATOR

When Solomon Blatt first came to the General Assembly in 1933, he sumitted a biographical sketch for publication in that year's *South Carolina Legislative Manual.* He altered it very little in the course of the next 53 editions.

When Sol Blatt died Wednesday, he was the nation's oldest active legislator. And his biographical portrait necessarily had been enlarged to reflect his 33 years service as House speaker and unanimous election in 1973 as speaker emeritus.

Although he accumulated honors, power and prestige, Blatt chose to add to his sketch only his 12 years as a trustee of the University of South Carolina—a position he loved, but one that he gave up in 1948 when the constitutionality of this dual office holding was questioned. He also resigned from the Barnwell County school board after 34 years.

But from 1933 to the day he died, besides the standard references to parents and spouse, the biography of one of South Carolina's most powerful political figures—who would easily have become governor—referred to his service on the staff of Gov. Ibra C. Blackwood of Spartanburg, who is remembered for little more than a 1931-35 term.

One deletion came in 1963, when Blatt dropped reference to his 1917 move from Blackville to Barnwell, a distance of 10 miles.

All this tells of his steadfastness, sensitivity and belief that continuing success was an outgrowth of the past. If it had been an honor to serve Gov. Blackwood in 1931, time dimmed neither the accolade nor Blatt's appreciation of the distinction.

[From the Barnwell People-Sentinel Barnwell, SC, May 15, 1986]

SOLOMON BLATT, 1895-1986

The nation's longest serving legislator is dead at 91.

Speaker Emeritus Solomon Blatt, the representative from Barnwell and Allendale counties, died Wednesday shortly after 3 a.m. at the Barnwell County Hospital.

First elected to the South Carolina House of Representatives from Barnwell county in 1933, Blatt was offering for reelection to a 28th term at the time of his death.

Blatt was elected Speaker Pro Tempore of the House of Representatives on January 8, 1935 without opposition. On January 12, 1937, he was elected Speaker of that body over one opponent. He was reelected in 1937-45 and did not offer for Speaker in 1947 or 1949. Blatt again sought the post of Speaker in 1951 and continued in that office without opposition until his resignation in 1973.

Shortly thereafter, Blatt was elected Speaker Emeritus of the South Carolina House of Representatives by unanimous vote.

Born in Blackville on February 27, 1985, Blatt was the son of Nathan and Mollie Blatt who had immigrated to the United States from Russia some years before his birth.

He was a veteran of World War I, a graduate of the University of South Carolina and the University of South Carolina Law School in 1917.

A self-styled country lawyer, Blatt practiced law in Barnwell for over 65 years. His keen mind and dedication to law made the firm of Blatt and Fales, later to become The Blatt Firm, one of the most successful in the state.

Blatt was married to the late Ethel Green of Sumter. Her death on December 25, 1985 came only months before the couple would have marked their 66th wedding anniversary.

His loyalty to the University of South Carolina continued throughout his life. A member of the board of trustees of the University for 12 years, the Blatt-Barnwell Scholarship Foundation established several years ago was one of his greatest interests.

Surviving are one son, Judge Solomon Blatt, Jr. of Charleston; a sister, Mrs. Rebecca Mirmow of Orangeburg; three grandchildren, and four great-grandchildren.

Funeral services will be held today (Thursday) at the graveside in the churchyard of The Episcopal Church of the Holy Apostles in Barnwell at 11 a.m.

The Rev. Posey Belcher of First Baptist church, Walterboro, the Rev. Alton C. Clark, Chaplain of the South Carolina House of Representatives and Rabbi Norman Goldburg of Augusta will officiate.

In lieu of flowers, donations may be made to the Blatt-Barnwell Scholarship Foundation or the Barnwell County Ministerial association.

The family will be at the Blatt residence until the hour of service.

HERB BOWDEN, SOUTH DAKOTA'S SMALL BUSINESS PERSON OF THE YEAR

Mr. PRESSLER. Mr. President, President Reagan has proclaimed May 18-25, 1986, as U.S. Small Business Week, and I wish to take this opportunity to commend South Dakota's Small Business Person of the Year, Herb Bowden, president of Sencore, Inc., Sioux Falls, SD.

Herb exemplifies all of the criteria required for this award. Sencore started as a dream. After serving his country in the Navy during World War II, Herb returned and went to work for a television manufacturing company. During this stage of his career, he developed ideas for vastly improving TV testing equipment. From these concepts, he created instruments that could speed TV repair and decided to build a business around his ideas and inventions.

In the truest form of the entrepreneurial spirit, he founded Sencore in 1951 with $800. Today, Sencore, which manufactures various kinds of electronic test equipment, has more than $15 million in annual sales and employs more than 250 persons. Bowden and Sencore now hold 23 patents. Sencore has become one of the leaders in its field and is the only known test equipment company in the United States to sell all of its products exclusively through telemarketing.

Herb has been a great help to me in my work as a member of the Senate Small Business Committee. For the past several years he has accepted my appointment to the Committee's National Advisory Committee. Herb takes time from his busy schedule to come to Washington to participate in advisory committee meetings which establishes its positions through resolutions which are officially recorded and presented to the Small Business Committee. These resolutions are extremely important to the committee in formulating its legislative priorities and I am very appreciate of Herb's service to me and the entire small business community in this capacity.

Again, I congratulate Herb Bowen, South Dakota's Small Business Person of the Year, and I urge all my colleagues to do the same for the individuals in their States who represent the brightest and best members of the most important segment of America's economy—small business.

Mr. SIMPSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. GARN). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

□ 1200

Mr. SIMPSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. Mr. President, I ask unanimous consent that morning business be extended for an additional period of 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCURRENT RESOLUTION ON THE BUDGET, FISCAL YEAR 1987

Mr. SIMPSON. Mr. President, after conferring with the Democratic leader on various issues, I ask that the Chair lay before the Senate a message from the House of Representatives on Senate Concurrent Resolution 120.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A message from the House that the concurrent resolution (S. Con. Res. 120) entitled "Concurrent Resolution Setting Forth The Congressional Budget For The United States Government For The Fiscal Years 1987, 1988, and 1989," do pass with an amendment.

Mr. SIMPSON. Mr. President, I move that the Senate disagree to the amendment of the House to Senate Concurrent Resolution 120, the con-

current resolution on the budget for fiscal year 1987, and I further move that the Senate request a conference with the House on the disagreeing votes of the two Houses, and that the Chair be authorized to appoint conferees.

The PRESIDING OFFICER. The question is on the motion.

Mr. MELCHER. Reserving the right to object.

Mr. SIMPSON. Mr. President, apparently the Democratic leader has indicated that he cannot clear the request and the motion that I have just made. Therefore, under the circumstances, at the present time, I withdraw that motion.

AUTHORITY FOR THE SUBCOMMITTEE ON DEFENSE ACQUISITION OF THE COMMITTEE ON ARMED SERVICES TO MEET

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Subcommittee on Defense Acquisition of the Committee on Armed Services be authorized to meet during the session of the Senate on Tuesday, May 20, 1986, to hold hearings to discuss recommendations from the President's Blue Ribbon Commission on Defense Management.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

AUTHORITY FOR THE COMMITTEE ON ARMED SERVICES TO MEET

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Tuesday, May 20, 1986, in order to conduct a business meeting on nominations and on home porting.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

RECESS UNTIL 2 P.M.

Mr. SIMPSON. Mr. President, according to a previous order, I ask that the Senate now stand in recess until the hour of 2 p.m.

The PRESIDING OFFICER. Under the previous order, the hour of 12 noon having arrived, the Senate will now stand in recess until the hour of 2 p.m.

Thereupon, at 12:05 p.m., the Senate recessed until 2 p.m.; whereupon the Senate reassembled when called to order by the Presiding Officer (Mr. COHEN).

FEDERAL FIRE PREVENTION AND CONTROL ACT AUTHORIZATION

The Senate resumed consideration of the bill (S. 2180).

Pending: Gordon amendment No. 1967, to begin daylight saving time on the first Sunday of April, instead of the last Sunday of April.

□ 1400

The PRESIDING OFFICER. The Senator from Washington.

Mr. GORTON. Mr. President, under at least an informal arrangement, we will debate on the present amendment—which would begin daylight saving time on the first Sunday rather than the last Sunday in April—for approximately 30 minutes at which point the majority leader or someone on his behalf—or someone on behalf of the distinguished Senator from Kentucky—will move to table the amendment. There will be a vote on that motion. I hope that will dispose not only of the amendment but also the bill.

Mr. FORD. Mr. President, will the distinguished Senator from Washington yield?

Mr. GORTON. He will.

Mr. FORD. Why do not we ask unanimous consent, if it is all right with the Senator's leader, that we have 30 minutes of debate, 15 minutes equally divided, and then a vote at the end of that time on the tabling motion.

Mr. GORTON. I would be delighted to make that request. I understand however that last night the minority leader was not willing to enter into such a unanimous consent.

Mr. FORD. That is fine. I do not know anything about that.

Mr. GORTON. I am sure the majority leader would be agreeable. But if the Senator is authorizing——

Mr. FORD. We will have an informal agreement then that at the end of 30 minutes we will expect a motion to table. We will see what happens from there.

Mr. GORTON. I will be delighted to enter such a unanimous-consent request for an informal agreement.

Mr. President, I urge my colleagues to defeat the motion which will be made shortly to table the daylight saving time amendment sponsored by myself and the distinguished Senator from Maine, Mr. MITCHELL. I hope that the Senate will defeat that motion, and then proceed to adopt the amendment, and pass the bill, S. 2180, as amended. I should like to discuss briefly the amendment, and some of the benefits which would result from extended daylight saving time. The amendment is a simple one.

The amendment would change the beginning date of daylight saving time each year from the last Sunday in April to the first Sunday in April. It is not year-round daylight saving time; it is not daylight saving time in November. The amendment affects April and only April, and only that month.

The purpose of daylight saving time, Mr. President, is and always has been to make the hours of daylight coincide with the hours in which most people are awake and active. I think that all Senators, even those who oppose this amendment, agree that daylight saving time in the summer is beneficial. On the other hand, most would agree that daylight saving time in the winter, when the sunrises are late under standard time, would not be beneficial. The question before us is whether daylight saving time in April would create benefits by making the hours of daylight coincide with our lives.

Under the current law, April has the earliest sunrises of the year. I want to repeat that, Mr. President. April has the earliest sunrises in the year—earlier under standard time than sunrise is in mid-June under daylight saving time. April sunrises are earlier by as much as 30 minutes than sunrise on June 21, the day with more daylight than any other. Clearly, our present system of daylight saving time is imbalanced.

This amendment would not create sunrises as late as those in winter—April sunrises under daylight saving time would be equivalent to sunrises from early August through mid-September. The amendment would transfer an hour of early morning daylight—the earliest hour of daylight of the year—from 5 or 6 o'clock in the morning to the early evening. Clearly, the amendment would make daylight in April coincide more closely with our lives, as most of us travel to work in April several hours after sunrise, and many return home in darkness.

Daylight saving time in April would enable us to make better use of daylight hours, and would result in many substantial benefits. One major benefit is energy savings. Energy consumption is greater in darkness than in daylight. Transferring an hour of daylight from the morning to the evening increases the demand for energy in the early morning and decreases demand in the evening. Because many more people are awake and active around 7 p.m. than around 5:30 a.m., more energy is saved by transferring the hour of daylight to the evening. The early evening is the peak period of energy consumption, and a reduction of the peak load also creates more efficient usage of energy.

The Federal Energy Office estimated for the Department of Transportation that extended daylight saving time would provide energy savings equivalent to 100,000 barrels of oil per day.

The amendment also would provide substantial revenue and employment in several industries, including the nursery industry, sporting goods, the barbecue industry, candy manufacturers, and travel and tourism. The additional revenues are estimated to be several billion dollars per year, which would increase employment and tax revenue at no cost to the Federal Government.

Finally, the amendment will save lives and property by enhancing traffic safety and by reducing violent crime.

Elizabeth Hanford Dole, the Secretary of Transportation, has, in writing to Senators in support of this amendment, estimated that this amendment will save at least 22 lives, 1,525 injuries, and $28 million per year in economic damage from traffic accidents alone. That by itself would justify passage of this amendment.

Opponents of this amendment have argued that the Department's study of extended daylight saving time was not controlled for the 55-mph speed limit, and that observed reductions in traffic fatalities were due to the lower 55-mph limit. In reality, the study examined periods just before and after time changes, periods during which the speed limit laws were constant.

Opponents of the amendment also have argued that the National Bureau of Standards questioned the effects of daylight saving time on traffic safety, and that the amendment would endanger schoolchildren in the darker mornings. These opponents failed to mention, however, that the National Bureau of Standards found no evidence of danger to schoolchildren from observance of daylight saving time in April or in March. Further, the National Safety Council found that traffic fatalities in April in 1974 under daylight saving time decreased by 24 percent, over 500 lives, from the previous April under standard time. With respect to children, the National Safety Council concluded that there was "no appreciable difference between the 2 months (April 1974 and April 1973) in the number of early morning pedestrian and pedalcycle fatalities experienced by children 4 through 18 years old." This amendment does not create a hazard; it enhances safety.

Studies have shown that daylight saving time reduces violent crime by 10 to 13 percent. Most violent crime is committed outdoors in darkness, and many more people are outdoors during the early evening than during the early morning. Opponents of the amendment argue that criminals wait until darkness regardless of the clock. This is true, but under daylight saving time, many potential victims are able to return home at 6 or 7 p.m. in daylight and the result is a dramatic reduction in violent crime.

In closing, Mr. President, I would like to point out that the most adamant opposition to this amendment comes from Senators whose States are on the western edges of time zones. Many of those States have created, in effect, year-round daylight saving time by moving their time lines westward and placing themselves one time zone east of where geography places them. The State of Kentucky, for example, has moved its time line westward on four occasions, and much of Kentucky observes eastern standard time, which is in reality central daylight time. Kentucky is not alone in its desire to move clocks forward, as time lines in the United States have been moved westward 32 times and eastward only 3 times since 1918.

States which have advanced their clocks permanently have done so for convenience and economic benefit, yet Senators from these States admonish supporters of this amendment for seeking these benefits an additional 3 weeks of the year. These Senators warn that advancing the clocks will endanger schoolchildren and inconvenience farmers, yet these concerns have not prevented their States from seeking to advance the clock. These Senators lament the late sunrise in their States as if someone else has burdened their States with permanent daylight saving time, yet the States have chosen to move the time line and advance the clocks. The arguments against the amendment do not jell.

I submit to my colleagues that this amendment will save energy, enhance traffic safety, reduce violent crime, create employment and tax revenue, and at no cost to the Federal Government. The amendment will make the daylight hours in April coincide more closely with the hours of human activity, which is the purpose not only of daylight saving time but of the convenience of rational time systems. I urge my colleagues to reject the motion to table and to adopt the amendment and pass S. 2180.

Mr. FORD addressed the Chair.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. FORD. Mr. President, we hear a lot of technical explanations of the minute the Sun comes up, the second the Sun goes down, and the rehashing of all of the National Bureau of Standards discussions:

I would like to try to give us some reality today, and talk about mothers, children, farmers, and small business people—those small radio people out there that are on daylight to dark. They are vehemently opposed to this extension because they lose some extra hour of drive time, and that is the bulk of their advertising. There are over 450 small radio stations out there that lose under this legislation.

□ 1410

I do not think it is fair by any stretch of the imagination to take care of the charcoal people so they can burn more briquets in the early part of April, when we had snow that was 12 to 18 inches deep in the early part of April when we want daylight saving time. School is closed, transportation is in trouble, and we are going out in the backyard to charcoal some hamburgers.

I oppose the amendment, and oppose it vigorously, of the Senators from Washington and Maine. After yesterday's debate, my views on this amendment are well known, but I would like to summarize, if I may, Mr. President, the arguments against daylight saving time for those early weeks in April.

The coalition of business interests formed to promote daylight saving time is composed of convenience stores, fast food operations, sporting goods manufacturers, nurseries, the barbecue industry, and the RP foundation. Other than the RP foundation, I do not believe any of the arguments have merit. Who is to say that 1 extra hour of daylight for 3 weeks will increase sales by billions of dollars?

That is what the distinguished Senator from Washington just said—extend it 3 weeks and we shall have billions of dollars in increased sales. He must have some different figures than I have, Mr. President.

I cannot imagine any increase in beef consumption due to more barbecuing which is being promoted by the coalition to stimulate more support among farm State Senators. Think about the weather in your State this spring. How many barbecues do you think occurred in Salt Lake City or Pennsylvania or New Jersey when those States experienced major snowstorms of 6 to 8 inches in those first 3 weeks of April?

I believe that the statistics of the daylight saving time issue really add nothing to this debate. This is an issue of lifestyles and not economics. Citizens on the east and west coasts want more daylight for leisure activities in April. I would like to allow those citizens more daylight, but unfortunately, due to the harm which this amendment would cause my State and other Midwest States, I must oppose this amendment.

Daylight saving time is a regional issue. The effects of extended daylight saving time are exceedingly small and, therefore, hard to assess. The reports that were cited in the debate on this issue yesterday promoted extended daylight saving time because it will save energy, prevent traffic fatalities, and deter crime. I must remind my colleagues that this study, prepared by the Department of Transportation—not this Department of Transportation, but the Department of Transpor-

tation over 11 years ago—was greeted with mixed reviews when it was originally published. Yet, the results of this study, much like information on Conrail and National and Dulles Airports which have been released lately by the Department of Transportation, were compiled by a branch of Government very much in favor of extending daylight saving time. I do not think the Department of Transportation was objective in its review and the report, at best, only cites modest overall benefits to limited parts of the country.

After the Department of Transportation report was issued, the National Bureau of Standards was requested by the chairman of the House Committee on Interstate and Foreign Commerce in 1975 to perform a technical evaluation of the DOT report. The NBS evaluation, using a corrected data base, found no conclusive evidence of a daylight saving time effect on the saving of electrical energy. The NBS found that corrections to the DOT data and changes due to mathematical error changed the 1 percent estimated electricity savings which the DOT estimated is equivalent to 100,000 barrels of oil per day to an inclusive result. You still see the DOT 100,000 barrels of oil figure, but you never see the NBS evaluation. I am sure that my colleagues would agree that the Government experts on statistics reside at the National Bureau of Standards and not the Department of Transportation.

The Department of Transportation in 1975 further distorted the traffic fatalities argument in their effort to promote an extension of daylight saving time. The DOT did not take into account—think about this: When they came in with this big survey, they did not take into account that the country was experiencing a gas crisis at the time of the study which caused gas rationing and citizens seeking other forms of transportation. During this same period of the study, the 55-mile-per-hour speed limit was enacted in order to save gas. The 55-mile-per-hour speed limit also had another effect in that it has saved lives, but DOT did not give this major nationwide policy change credit for saving lives in its review of the benefits of daylight saving time on traffic fatalities. This review, in my opinion, was flared. The less miles driven at a slower speed probably did more to the traffic statistics than extended DST. The DOT has testified before the House of Representatives that they did not take any of these factors into account in determining that there would be reduced traffic fatalities under extended DST.

We know that the extended daylight saving time will benefit some businesses and residents living on the easternmost portion of a time zone. The residents on the westernmost fringe of a time zone will be the citizens asked to sacrifice on this issue. They will be the ones who will be subsidizing the other parts of the country. The positive results for citizens on the east and west coasts are not balanced by the number of children waiting for an early schoolbus in Midwestern States, nor does the benefit of extended DST help any occupation which depends on daylight for its work hours. Farm and rural groups oppose the daylight saving time extension because they believe it penalizes farmers who are basically very community spirited and would like to participate in community work or other activities in the evening but will be prevented from doing that under this amendment. Mr. President, what about the approximately 450 daylight only radio stations which will lose their revenue from the early morning drive time? I suggest that there are as many economic arguments against the extension of daylight saving time as there are for the extension.

When you really take a close look at this amendment, you realize that the benefits of extending daylight saving time are outweighed by its liabilities. If we pass the amendment by the Senator from Washington, we are sending the citizens of rural America another message that we have given up on them. A simple review of the issue proves that this amendment would cause undue hardships for farmers and the agricultural community which require natural light. We are saying to the farmers, here is another blow to your efforts to get out from under your economic problems. Asphalt and construction companies, moving and storage companies, and warehouses also depend on the natural light of day for their work.

I keep reading that America is becoming a nation of service industries. If my colleagues approve this amendment, you are in essence saying that the small benefits to service industries, if there are any at all, outweigh the needs of rural America. By allowing another month of daylight saving time for the benefit of the east and west coast, we will create more hardships for citizens in the Midwest—the rural areas of this country. Times are already hard enough in agricultural States and by passing this amendment, which is so opposed in the Midwestern States, we will cause another blow to rural America.

□ 1420

Mr. President, the benefits are there in minute detail, very small, if any at all. One life, the loss of one life as a result of this amendment could not be repaid by an economic gain by that small, selfish coalition that is trying to extend daylight saving time, and I want to see them barbecue in the back yard in 12 inches of snow in the early part of April.

Mr. MITCHELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MITCHELL. Mr. President, I urge my colleagues to support the amendment to extend daylight saving time offered by the Senator from Washington and myself. The Presiding Officer and I represent a State which is predominantly rural, in which there are many farmers, and in which the overwhelming majority of schoolchildren are bussed to school. We are, therefore, particularly sensitive to the concerns which have been raised here today, and yet after careful study, after analysis of the arguments offered in opposition to this modest but sensible proposal, I am convinced that an extension of daylight saving time to take in the entire month of April makes sense not only for the people of Maine but for the people of this Nation.

As we have heard during the debate yesterday and today, the Department of Transportation has conducted a detailed study on the effects of extending daylight saving time contained in a report to Congress. That study documents that there will be substantial energy savings for the Nation amounting to as much as a savings of 2 million barrels of oil a year through the extension of daylight saving time.

The study found that traffic safety will be enhanced; that traffic fatalities will be reduced by as much as 1.5 percent in April because more people will travel home from work in daylight in the evening, and correspondingly there is no increase in early morning fatality rates in the months of March and April.

The Department study found that violent crime in the areas studied was reduced by as much as 13 percent through the extension of daylight saving time.

The extension will benefit the 400,000 Americans who suffer from night blindness. It would provide benefits for a whole range of American industries whose capacity for doing business will be enhanced, and, most importantly, it will provide for all Americans an extra hour of daylight in the evening in the month of April.

Yesterday, I inserted into the RECORD a letter from the Secretary of Transportation dated just a few days ago in which the Department reaffirmed its strong support for this legislation, demonstrating that there are no substantial disadvantages to offset the significant social advantages that will result from this extension.

It is not surprising that in every survey taken a substantial majority of the American people have expressed their preference for an extension of daylight saving time but have been prevented from enjoying that benefit

because of Federal law. And so it is significant that we now here have the opportunity to act in a manner that will provide substantial social benefits in this country; that will be in accordance with the wishes of the overwhelming majority of the American people; that will not cost the Federal Government 1 cent and that has few, if any, disadvantages. Votes in which all of those factors are present here in the Senate are rare indeed.

I will not attempt to repeat the very eloquent and sensible, commonsense arguments set forth by the distinguished Senator from Washington, with whom it has been my pleasure to work on this matter. I will simply close by saying this is a modest, sensible step in the right direction, that most Americans want and will benefit from, and I urge all the Members of the Senate to support the extension of daylight saving time.

Mr. FORD. Mr. President, will the distinguished Senator from Maine yield for a question?

Mr. MITCHELL. Certainly.

Mr. FORD. The Senator referred to a report that said it would save 2 million barrels of oil per year and save lives, reduce fatalities. What year was that report written?

Mr. MITCHELL. The report was dated July 1975, and the——

Mr. FORD. I thank the Senator.

Mr. MITCHELL. Do I still have the floor, Mr. President?

The PRESIDING OFFICER. The Senator still has the floor.

Mr. MITCHELL. And I would note the Department of Transportation has recently reported that upon reexamination of the issue the conclusions are still valid. Indeed, I think if it were saving 2 million barrels of oil a day as of 1975, it would be possible to conclude that the number of barrels saved now would be in excess of that.

I would also point out that with respect to traffic safety the statement of the Secretary of Transportation is based upon 1983 figures. According to the letter of the Secretary of Transportation to the majority leader dated May 7, 1986:

> On the basis of 1983 figures, daylight saving time in April would reduce traffic deaths nationwide by a minimum of 22, injuries by a minimum of 1,525, and societal costs from auto accidents by a minimum of $28 million. I emphasize that each of these figures is a minimum with possible savings being as much as twice as large.

Mr. President, I yield the floor.

□ 1430

Mr. FORD. Mr. President, let me just make a point that the distinguished Senator from Maine failed to bring into this equation: that in testimony before the House, the Department of Transportation said that they did not factor into these figures the gasoline rationing, the price of gasoline. We are now driving automobiles that get more miles per gallon. All these things have never been factored in. No one has ever talked about the 55-mile-an-hour speed limit that will save lives and has saved lives. They never factored that in to offset.

They have given all the credit to daylight saving time. Not only is it going to bring in billions of dollars in 3 weeks, but also, it is going to save 22 lives, thousands of injuries, and all that—just for daylight saving time.

It is somewhat ironic to me that in making these statements, they leave out major important factors. One of the major factors they leave out is the consideration of the children as they go to school. I am reminded of the small child walking to school in the dark who fell in a manhole. That was in the darkness, and that was in the morning, and there is no replacement and no way to figure the economic loss.

● Mr. MATHIAS. Mr. President, I support the amendment to extend daylight saving time. The amendment would change the Uniform Time Act of 1966 to provide that daylight saving time start each year on the first Sunday in April rather in the last Sunday in April. Many Americans and many industries feel the need for additional hours of sunlight during the early springtime.

In addition, I have a particular reason to support this amendment. The national headquarters for the National Retinitis Pigmentosa Foundation Fighting Blindness is maintained in Baltimore, MD. Victims of RP suffer from night blindness, a condition which robs them of the ability to see after the sun sets. More than 400,000 RP sufferers are forced to postpone the simplest outdoor activities until the Sun rises again. Daylight saving time grants extra hours of productivity to these people.

This is a good amendment with a good purpose. People in all parts of the Untied States will experience the benefits of expanded daylight saving time in many forms, including lessened crime and increased energy savings. It is for these and other reasons that I add my voice of support to the amendment and urge my colleagues to do likewise.●

● Mr. CRANSTON. Mr. President, I am pleased to support Senator GORTON'S compromise amendment to extend daylight saving time by commencing it each year on the first—instead of the last—Sunday of April.

My distinguished colleague from Rhode Island [Mr. PELL] and I long ago introduced legislation (S. 240) into the present Congress to provide for a 2-month extension of daylight saving time, by commencing it each year on the first Sunday in March instead of the last Sunday in April. I have offered similar legislation in each of the two preceding Congresses without success.

While the Gorton amendment is very cautious, it is a major improvement over the inaction of the Commerce Committee on this legislation for so many years.

I am pleased that this amendment eliminates the 1-week extension at the end of October included in the House-passed version. The October extension would occur at a time when evening light is diminishing by 2 minutes each day, and dawn comes that much later each day. I prefer the springtime extension, which takes advantage of the same light conditions in the spring that we now use for daylight saving time in the fall.

Extending daylight saving time will enable us to take advantage of the light available in April, just as present law uses the light available in September.

In April, dawn arrives at least as early as in September, and under daylight saving time children would leave for school under light conditions at least as good as those they now have in September. The light available in March is also safe, with light conditions as good as those in October. But I will be satisfied if this compromise results in enactment of this significant extension of daylight saving time, given the stubborn resistance any extension legislation has encountered.

While some farm State Senators have expressed concern about the effect that extending daylight saving time will have on the harvest season—since many farmers harvest from sunrise to sunset—this proposed extension of daylight saving time does not alter the clock during the harvest season; and during planting season, the adjustment is very minor.

The effect on cows that some dairy farmers are reported to fear is present under any form of daylight saving time. It is not exacerbated by this amendment. On the day, whenever it is, that daylight saving time goes into effect, a single adjustment in schedule is required of animals as well as humans. But is is not an unfamiliar adjustment. Under any time system, dawn comes at a different hour every day.

Some legitimate concerns arose in 1974 from the enactment of the Emergency Daylight Saving Time Energy Conservation Act which provided for year-round daylight saving time. But no such proposal is presently pending and those concerns do not properly apply to this amendment.

Moreover, if any State has citizens adversely affected by daylight saving time, the State may choose to be exempt from daylight saving time, as a few States presently do.

November through February are the months that are troublesome because

of diminished available light in the early morning hours. Nothing in the pending amendment alters the time during that period.

I do not recommend extending daylight saving time during these months.

Many of the expressed concerns about an extension of daylight saving time are unrealistic. But the benefits to be gained from extending daylight saving time to provide an additional hour of useful daylight are very real for many, many people. There are many advantages to extending daylight saving time in the spring.

This proposed extension can save Americans the equivalent of 100,000 barrels of oil each day of extended daylight saving time. Though the present world "oil glut" had diminished the attention we pay to the need for conservation, oil remains a finite resource of which our supply is limited and diminishing.

Additional benefits are clear. Department of Transportation studies show that traffic fatalities and accidents as well as street crimes would decline with the extra hours of evening daylight in April.

Though I prefer the full extension of daylight saving time to 8 months, and believe it is more logical, given our use of identical light conditions in the fall, I believe enactment of this amendment is a significant improvement over the current 6-month daylight saving time situation, and urge my colleagues to support it.●

Mr. DOLE. Mr. President, I oppose Senator GORTON's amendment to extend daylight saving time by 3 weeks. Its effect, in my State of Kansas, would be to further exacerbate the problems farmers already have with daylight saving time.

I realize it may be difficult for some of my colleagues from urban areas to understand why anyone would be opposed to reallocating an hour of daylight from morning to evening. At first glance, it seems like a logical step. Supporters claim that extending daylight saving time would conserve energy, reduce traffic accidents, reduce crime and create untold economic benefits for the sporting goods firms, travel industry, and convenience stores.

However, farm States and rural areas in general have special problems.

FARM CONCERNS

This amendment will undoubtedly make it more difficult to manage a farm on a day-to-day basis. During the harvest season, farmers must wait until the Sun comes up before they can begin work in the morning. This especially applies to combining small grain crops, soybeans, and making hay. If farmers are to have any type of church or community life, they will have to quit work an hour earlier each day. Farmers cannot afford to lose an hour of their work day.

Parents of farm families worry about their children waiting for a school bus or walking to school on a darkened rural road. With reports of increased crime in rural areas and increases in the incidence of child abuse, it is obvious that rural families have some legitimate concerns.

My final point is an obvious one. In today's economic environment, many farmers have had to turn to jobs away from their farms to make ends meet. Farmers have enough to worry about because of our current agricultural economy, where time is money and every dollar counts. This amendment would force them to do their morning farm chores in the dark, which would increase the hazards of an occupation with the potential for serious accidents.

CONCLUSION

Mr. President, in conclusion, I would state that, while intended to help some industries and areas of the United States, this amendment would have serious economic, safety and social implications for rural Americans—especially farm families.

Mr. GORTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, in order to expedite the action on this measure, as an opponent of the Gorton amendment, I move to table the amendment, and I ask for the yeas and the nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment of the Senator from Washington. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Florida [Mrs. HAWKINS], the Senator from Maryland [Mr. MATHIAS], the Senator from Alaska [Mr. MURKOWSKI], and the Senator from Oregon [Mr. PACKWOOD] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Missouri [Mr. EAGLETON] and the Senator from New York [Mr. MOYNIHAN] are necessarily absent.

The PRESIDING OFFICER (Mr. ARMSTRONG). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 36, nays 58, as follows:

[Rollcall Vote No. 104 Leg.]

YEAS—36

Abdnor	Exon	Matsunaga
Andrews	Ford	Mattingly
Baucus	Gore	McConnell
Boren	Gramm	Nickles
Bumpers	Grassley	Nunn
Burdick	Heflin	Pressler
Byrd	Helms	Proxmire
Cochran	Hollings	Pryor
DeConcini	Inouye	Rockefeller
Dole	Kassebaum	Sasser
Durenberger	Kasten	Wallop
East	Long	Zorinsky

NAYS—58

Armstrong	Gorton	Pell
Bentsen	Harkin	Quayle
Biden	Hart	Riegle
Bingaman	Hatch	Roth
Boschwitz	Hatfield	Rudman
Bradley	Hecht	Sarbanes
Chafee	Heinz	Simon
Chiles	Humphrey	Simpson
Cohen	Johnston	Specter
Cranston	Kennedy	Stafford
D'Amato	Kerry	Stennis
Danforth	Lautenberg	Stevens
Denton	Laxalt	Symms
Dixon	Leahy	Thurmond
Dodd	Levin	Trible
Domenici	Lugar	Warner
Evans	McClure	Weicker
Garn	Melcher	Wilson
Glenn	Metzenbaum	
Goldwater	Mitchell	

NOT VOTING—6

Eagleton	Mathias	Murkowski
Hawkins	Moynihan	Packwood

So the motion to lay on the table amendment No. 1967 was rejected.

□ 1500

Mr. GORTON. Mr. President, I move to consider the vote by which the motion to table was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, if I can have the attention of my colleagues——

The PRESIDING OFFICER. The Senate will be in order. The majority leader is recognized.

Mr. DOLE. Mr. President, I was going to propose a unanimous-consent request. But I am advised that we need about 5 additional minutes to clear it. So I will withhold that. Perhaps we can go back to the pending business.

Mr. FORD. Mr. President, will the majority leader yield?

Mr. DOLE. I am happy to yield.

Mr. FORD. Mr. President, from the vote, I am willing to forego any rollcall vote on the amendment. I still have time, and still can talk about this for a while. But if the distinguished Senator from Washington will assure me he will hold fast on only 3 weeks additional in April, I will yield to him, and we can pass this amendment by voice vote. But I will not accept that unless he agrees.

Mr. GORTON. The Senator from Michigan is happy to make that assurance to the Senator.

Mr. FORD. Mr. President, with that assurance from the distinguished Senator from Washington, who will be on the conference committee if there is one—and he will be working with the House directly as it relates to the acceptance of this legislation should it wind up in that legislative posture—I accept that. And I am now willing to accept the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Washington.

The amendment (No. 1967) was agreed to.

Mr. GORTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BIDEN. Mr. President, today we are voting on a 1-year reauthorization of the U.S. Fire Administration and the Fire Academy. Congress recognizes the lifesaving role our Nation's firefighters have every day in every area of the country. There is no question that the training and education provided through the Fire Administration and the Fire Academy have improved the capabilities of our Nation's volunteer and professional firemen—training that is put to the test, unfortunately, thousands of times each day.

In my own State of Delaware, we have one of the Nation's leading training and education programs. But the challenges to Delaware's firefighters—most of whom are on the job as volunteers—are still imposing. The sources of fires, the individual hazards which must be taken into account in every fire, constantly change. Firefighters in Delaware recognize that resting on their laurels will lead to tragic results, if not for themselves, then for their neighbors.

The need for further training and progress in firefighting techniques is as vital today as it was at the time of the original establishment of the national fire programs in 1974. While fire deaths have declined 30 percent since the creation of the Federal fire programs, no one believes the threat has been eliminated or that we have finally conquered the serious national problem of fire. The recent wildfires in North Carolina that have ravaged thousands of acres are proof that even with the best training and equipment, fire remains an unpredictable and deadly force.

Volunteer and professional firefighters across our country make sacrifices every day in their efforts to protect the rest of us from the ravages of fire. It is a demanding job that carries a high price for failure to pay attention to detail. Congress recognizes the risk firefighters face in service to others, and through this reauthorization restates its commitment to reducing this risk as much as possible through education and training.

However, while Congress' commitment is unmistakeable, there is concern in the fire community that this attitude is not shared by the management of the Federal Emergency Management Agency [FEMA].

Mr. President, several years ago, under a reorganization plan put forward by President Carter, the Fire Administration and the Fire Academy were moved from the Commerce Department and placed under the control of FEMA. At that time I feared this action would be a mistake because it would lower the visibility of the fire programs and might lead to their eventual downgrading.

This possibility may be approaching reality as the management of FEMA appears to be taking the first tentative steps toward implementing a plan to restructure the National Fire Program. A proposal is shaping up that would lead to the operation of the fire programs through the structure of FEMA's civil defense programs, an inappropriate step that would destroy the current well-functioning education and training system. Mr. President, pursuing this effort would be a tragic mistake, both for the National Fire Service Education and Training Programs and, more importantly, the quality of fire control efforts in this country.

The effect of these potential changes, as I understand them, would be to turn education and training programs over to the field staff of FEMA's Civil Defense Program. The Fire Academy would no longer be the topnotch training facility for our Nation's best firefighters. Instead it would become more of a resource center for materials that would be used in classes at institutions not solely dedicated to fire prevention and control. I would expect that under these conditions, the quality and effectiveness of training could only decline.

Mr. President, the reauthorization bill is obviously an important step to take in assuring the future of a progressive fire service. But at the same time, we must look behind the scenes to make sure our intent is being carried out.

It is important for the Fire Academy and Fire Administration to continually review improvements that can be made in existing programs, to build upon the experience developed over the years. But before changes are made that would overturn the system Congress established, FEMA should make every effort to work with the fire community—the ones who will clearly lose out if the wrong reforms were made—to assure that their views and recommendations are also given full consideration.

The steps I mentioned earlier are still in the preliminary stages, and may never develop into the full fledged reform that would appear to be counterproductive for fire control efforts. But it is important from the outset that FEMA understands the seriousness with which we view the possible reforms. I would certainly expect that FEMA will consult with Congress before taking any substantive steps toward making major changes in the Fire Academy programs and their delivery.

● Mr. SARBANES. Mr. President, I strongly support S. 2180, to reauthorize activities under the Federal Fire Prevention and Control Act of 1974. As a cosponsor of this measure and as one who believes that fire prevention and control is a problem of significant national importance, I am deeply concerned about the President's fiscal 1987 budget which proposes to abolish the U.S. Fire Administration [USFA] and to decrease by 23 percent funding for the National Fire Academy. In my view, these proposed reductions would cause a serious and possibly disastrous setback to our efforts in preventing and controlling loss of life and property due to fires.

The U.S. Fire Administration and the National Fire Academy in Emmitsburg, MD, have contributed significantly to the abilities of fire departments across the Nation to combat and prevent fires. Annual national fire death statistics have shown a steady reduction in loss of life by fire in the United States, owing in large part to these programs. Through public education, arson prevention, technology development and firefighter training and outreach programs, fire deaths have declined 30 percent since our National Fire Program began in 1974. Equally important, firefighter deaths in the line of duty have also been decreasing, although unfortunately, at a slower rate.

Contrary to the President's budget proposal, there is no reason to believe that the National Fire Program has outlived its usefulness or is no longer needed. Fire continues to be a major problem in the United States. Nationally, some 8,000 people die and 300,000 more are injured in fires each year. The annual death toll is nearly 20 times the number of deaths caused by all the other kinds of natural disasters combined. The financial loss—$5 billion a year in property damage—is also staggering.

Congress has a serious responsibility to support and encourage a strong Federal fire prevention and control effort. Career and volunteer firefighters risk their lives daily in order to protect our health, safety, and proper-

ty from the devastation of fire. We must not abandon them in their efforts to deal with a problem of this magnitude. The measure we are considering today would ensure that the USFA and the National Fire Academy can continue to play a vital role in preventing and controlling loss of life and property due to fires. The $18.3 million authorized will also ensure that travel stipends and lodging costs will continue to be provided for firefighters attending training sessions at the National Fire Academy. In my view, continued funding is a small price to pay for the tremendous service that these programs provide to our country.

I would urge my colleagues to join me in supporting this measure.●

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. GORTON addressed the Chair.

The PRESIDING OFFICER. The Senator from Washington is recognized.

Mr. GORTON. We are ready for third reading, Mr. President.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 2180

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 17(f) of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2216(f)) is amended—

(1) by striking "is" and inserting in lieu thereof "are"; and

(2) by inserting immediately before the period the following: "and $18,300,000 for the fiscal year ending September 30, 1987".

SEC. 2. (a) The Congress finds—

(1) that various studies of governmental and nongovernmental agencies indicate that daylight saving time over an expanded period would produce a significant energy savings in electrical power consumption;

(2) that daylight saving time may yield energy savings in other areas besides electrical power consumption;

(3) that daylight saving time over an expanded period could serve as an incentive for further energy conservation by individuals, companies, and the various governmental entities at all levels of government, and that such energy conservation efforts could lead to greatly expanded energy savings; and

(4) that the use of daylight saving time over an expanded period could have other beneficial effects on the public interest, including the reduction of crime, improved traffic safety, more daylight outdoor playtime for the children and youth of our Nation, greater utilization of parks and recreation areas, expanded economic opportunity through extension of daylight hours to peak shopping hours and through extension of domestic office hours to periods of greater overlap with the European Economic Community.

(b) Section 3(a) of the Uniform Time Act of 1966 (15 U.S.C. 260a(a)) is amended by striking "last Sunday of April" and inserting in lieu thereof "first Sunday of April".

(c) Any law in effect on the date of the enactment of this Act—

(1) adopted pursuant to section 3(a)(2) of the Uniform Time Act of 1966 by a State with parts thereof in more than one time zone, or

(2) adopted pursuant to section 3(a)(1) of such Act by a State that lies entirely within one time zone,

shall be held and considered to remain in effect as the exercise by that State of the exemption permitted by such Act unless that State, by law, provides that such exemption shall not apply.

(d)(1) Notwithstanding any other law or any regulation issued under any such law, the Federal Communications Commission shall, consistent with any existing treaty or other agreement, make such adjustment by general rules, or by interim action pending such general rules, with respect to hours of operation of daytime standard amplitude modulation broadcast stations, as may be consistent with the public interest, including the public's interest in receiving interference-free service.

(2) Such general rules, or interim action, may include variances with respect to operating power and other technical operating characteristics.

(3) Subsequent to the adoption of such general rules, they may be varied with respect to particular stations and areas because of the exigencies in each case.

(e) This section shall take effect 60 days after the date of enactment of this Act, except that if such effective date occurs in any calendar year after March 1, this section shall take effect on the first day of the following calendar year.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill, as amended, was passed.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

URGENT SUPPLEMENTAL APPROPRIATIONS

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. DOLE. Mr. President, I would like to indicate that I hope now we can move to the supplemental appropriations, if I could have the attention of my colleagues.

The PRESIDING OFFICER. If the Senator will suspend, the Chair will attempt to win the Senate floor.

The Chair regrets to note that the Senate is not in order, and asks those who are conducting conversations to retire to the cloakroom or another appropriate place.

Mr. DOLE. Mr. President, I will not propound the request until the distinguished minority leader is able to be on the floor. But I will soon. And I have discussed this with the chairman of the Appropriations Committee.

I will ask unanimous consent that the Senate turn to the consideration of H.R. 4515. But I will not do that until the distinguished minority leader is here.

CONCURRENT RESOLUTION ON THE BUDGET, FISCAL YEAR 1987

Mr. DOLE. Mr. President, before I propound the request on the supplemental, first let me ask the Chair to lay before the Senate a message from the House of Representatives on Senate Concurrent Resolution 120.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the resolution from the Senate (S. Con. Res. 120) entitled "Concurrent resolution setting forth the congressional budget for the United States Government for the fiscal years 1987, 1988, and 1989", do pass with the following amendment:

Strike out all after the resolving clause, and insert:

That the Congress hereby determines and declares that the concurrent resolution on the budget for fiscal year 1987 is established and the appropriate budgetary levels for fiscal years 1988 and 1989 are set forth.

(a) The following levels and amounts are set forth for purposes of determining, in accordance with section 301(i) of the Congressional Budget and Impoundment Control Act of 1974, as amended by the Balanced Budget and Emergency Deficit Control Act of 1985, whether the maximum deficit amount for a fiscal year has been exceeded:

(1) The recommended levels of Federal revenues are as follows:

Fiscal year 1987: $857,200,000,000.
Fiscal year 1988: $941,200,000,000.
Fiscal year 1989: $1,011,900,000,000.

(2) The appropriate levels of total new budget authority are as follows:

Fiscal year 1987: $1,086,350,000,000.
Fiscal year 1988: $1,159,650,000,000.
Fiscal year 1989: $1,205,350,000,000.

(3) The appropriate levels of total budget outlays are as follows:

Fiscal year 1987: $994,250,000,000.
Fiscal year 1988: $1,047,050,000,000.
Fiscal year 1989: $1,076,150,000,000.

(4) The amounts of the deficits are as follows:

Fiscal year 1987: $137,050,000,000.
Fiscal year 1988: $105,850,000,000.
Fiscal year 1989: $64,250,000,000.

(b) The following budgetary levels are appropriate for the fiscal years beginning on October 1, 1986, October 1, 1987, and October 1, 1988:

(1) The recommended levels of Federal revenues are as follows:

Fiscal year 1987: $643,850,000,000.
Fiscal year 1988: $700,550,000,000.
Fiscal year 1989: $750,750,000,000.

and the amounts by which the aggregate levels of Federal revenues should be increased are as follows:

Fiscal year 1987: $10,700,000,000.
Fiscal year 1988: $17,400,000,000.
Fiscal year 1989: $17,700,000,000.

and of those amounts by which revenues should be increased, the following amounts shall be used solely for the purpose of reducing the deficits below the maximum deficit amounts:

Fiscal year 1987: $4,700,000,000.
Fiscal year 1988: $11,200,000,000.
Fiscal year 1989: $10,500,000,000.

and the amounts for Federal Insurance Contributions Act revenues for hospital insurance within the recommended levels of Federal revenues are as follows:

Fiscal year 1987: $55,700,000,000.
Fiscal year 1988: $60,150,000,000.
Fiscal year 1989: $64,250,000,000.

(2) The appropriate levels of total new budget authority are as follows:

Fiscal year 1987: $873,000,000,000.
Fiscal year 1988: $918,950,000,000.
Fiscal year 1989: $944,050,000,000.

(3) The appropriate levels of total budget outlays are as follows:

Fiscal year 1987: $798,200,000,000.
Fiscal year 1988: $840,150,000,000.
Fiscal year 1989: $857,650,000,000.

(4) The amounts of the deficits in the budget which are appropriate in the light of economic conditions and all other relevant factors are as follows:

Fiscal year 1987: $154,350,000,000.
Fiscal year 1988: $139,600,000,000.
Fiscal year 1989: $106,900,000,000.

(5) The appropriate levels of the public debt are as follows:

Fiscal year 1987: $2,319,600,000,000.
Fiscal year 1988: $2,516,900,000,000.
Fiscal year 1989: $2,685,100,000,000.

(6) The appropriate levels of total Federal credit activity for the fiscal years beginning on October 1, 1986, October 1, 1987, and October 1, 1988, are as follows:

Fiscal year 1987:
(A) New direct loan obligations, $34,250,000,000.
(B) New primary loan guarantee commitments, $85,400,000,000.
Fiscal year 1988:
(A) New direct loan obligations, $32,250,000,000.
(B) New primary loan guarantee commitments, $87,300,000,000.
Fiscal year 1989:
(A) New direct loan obligations, $30,600,000,000.
(B) New primary loan guarantee commitments, $87,650,000,000.

(c) The Congress hereby determines and declares the appropriate levels of budget authority and budget outlays, and the appropriate levels of new direct loan obligations, and new primary loan guarantee commitments for fiscal years 1987 through 1989 for each major functional category are:

(1) National Defense (050):
Fiscal year 1987:
(A) New budget authority, $285,000,000,000.
(B) Outlays, $276,200,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $295,500,000,000.
(B) Outlays, $281,400,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $306,500,000,000.
(B) Outlays, $290,500,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.

(2) International Affairs (150):
Fiscal year 1987:
(A) New budget authority, $17,000,000,000.
(B) Outlays, $13,800,000,000.
(C) New direct loan obligations, $7,150,000,000.
(D) New primary loan guarantee commitments, $11,400,000,000.
Fiscal year 1988:
(A) New budget authority, $17,300,000,000.
(B) Outlays, $13,550,000,000.
(C) New direct loan obligations, $7,100,000,000.
(D) New primary loan guarantee commitments, $11,400,000,000.
Fiscal year 1989:
(A) New budget authority, $15,900,000,000.
(B) Outlays, $12,850,000,000.
(C) New direct loan obligations, $7,100,000,000.
(D) New primary loan guarantee commitments, $11,400,000,000.

(3) General Science, Space, and Technology (250):
Fiscal year 1987:
(A) New budget authority, $8,800,000,000.
(B) Outlays, $8,750,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $8,750,000,000.
(B) Outlays, $8,750,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $8,800,000,000.
(B) Outlays, $8,650,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.

(4) Energy (270):
Fiscal year 1987:
(A) New budget authority, $4,900,000,000.
(B) Outlays, $4,850,000,000.
(C) New direct loan obligations, $1,950,000,000.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $4,650,000,000.
(B) Outlays, $4,150,000,000.
(C) New direct loan obligations, $1,950,000,000.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $4,800,000,000.
(B) Outlays, $3,750,000,000.
(C) New direct loan obligations, $1,950,000,000.
(D) New primary loan guarantee commitments, $0.

(5) Natural Resources and Environment (300):
Fiscal year 1987:
(A) New budget authority, $11,950,000,000.
(B) Outlays, $12,250,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $12,000,000,000.
(B) Outlays, $12,150,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $11,800,000,000.
(B) Outlays, $12,200,000,000.
(C) New direct loan obligations, $50,000,000.
(D) New primary loan guarantee commitments, $0.

(6) Agriculture (350):
Fiscal year 1987:
(A) New budget authority, $23,800,000,000.
(B) Outlays, $23,550,000,000.
(C) New direct loan obligations, $14,300,000,000.
(D) New primary loan guarantee commitments, $8,000,000,000.
Fiscal year 1988:
(A) New budget authority, $26,000,000,000.
(B) Outlays, $24,800,000,000.
(C) New direct loan obligations, $12,100,000,000.
(D) New primary loan guarantee commitments, $8,500,000,000.
Fiscal year 1989:
(A) New budget authority, $25,300,000,000.
(B) Outlays, $21,550,000,000.
(C) New direct loan obligations, $11,350,000,000.
(D) New primary loan guarantee commitments, $8,650,000,000.

(7) Commerce and Housing Credit (370):
Fiscal year 1987:
(A) New budget authority, $9,800,000,000.
(B) Outlays, $2,200,000,000.
(C) New direct loan obligations, $4,450,000,000.
(D) New primary loan guarantee commitments, $38,750,000,000.
Fiscal year 1988:
(A) New budget authority, $9,350,000,000.
(B) Outlays, $5,100,000,000.
(C) New direct loan obligations, $4,600,000,000.
(D) New primary loan guarantee commitments, $39,100,000,000.
Fiscal year 1989:
(A) New budget authority, $7,550,000,000.
(B) Outlays, $1,300,000,000.
(C) New direct loan obligations, $4,850,000,000.
(D) New primary loan guarantee commitments, $38,450,000,000.

(8) Transportation (400):
Fiscal year 1987:
(A) New budget authority, $24,600,000,000.
(B) Outlays, $25,500,000,000.
(C) New direct loan obligations, $500,000,000.
(D) New primary loan guarantee commitments, $50,000,000.
Fiscal year 1988:
(A) New budget authority, $26,350,000,000.
(B) Outlays, $26,450,000,000.
(C) New direct loan obligations, $400,000,000.
(D) New primary loan guarantee commitments, $50,000,000.
Fiscal year 1989:
(A) New budget authority, $26,300,000,000.
(B) Outlays, $26,350,000,000.
(C) New direct loan obligations, $200,000,000.
(D) New primary loan guarantee commitments, $50,000,000.

(9) Community and Regional Development (450):
Fiscal year 1987:
(A) New budget authority, $6,300,000,000.
(B) Outlays, $7,000,000,000.
(C) New direct loan obligations, $950,000,000.
(D) New primary loan guarantee commitments, $300,000,000.
Fiscal year 1988:
(A) New budget authority, $6,450,000,000.
(B) Outlays, $7,050,000,000.
(C) New direct loan obligations, $1,200,000,000.
(D) New primary loan guarantee commitments, $300,000,000.
Fiscal year 1989:
(A) New budget authority, $6,500,000,000.
(B) Outlays, $6,600,000,000.
(C) New direct loan obligations, $1,050,000,000.
(D) New primary loan guarantee commitments, $300,000,000.

(10) Education, Training, Employment, and Social Services (500):
Fiscal year 1987:
(A) New budget authority, $33,750,000,000.
(B) Outlays, $30,600,000,000.
(C) New direct loan obligations, $1,500,000,000.
(D) New primary loan guarantee commitments, $10,300,000,000.
Fiscal year 1988:
(A) New budget authority, $32,850,000,000.
(B) Outlays, $32,300,000,000.
(C) New direct loan obligations, $1,400,000,000.
(D) New primary loan guarantee commitments, $10,700,000,000.
Fiscal year 1989:
(A) New budget authority, $33,800,000,000.
(B) Outlays, $33,100,000,000.
(C) New direct loan obligations, $1,250,000,000.
(D) New primary loan guarantee commitments, $10,950,000,000.
(11) Health (550):
Fiscal year 1987:
(A) New budget authority, $38,650,000,000.
(B) Outlays, $38,350,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $300,000,000.
Fiscal year 1988:
(A) New budget authority, $40,500,000,000.
(B) Outlays, $40,700,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $300,000,000.
Fiscal year 1989:
(A) New budget authority, $42,700,000,000.
(B) Outlays, $42,800,000,000.
(C) New direct loan obligations, $50,000,000.
(D) New primary loan guarantee commitments, $300,000,000.
(12) Medicare (570):
Fiscal year 1987:
(A) New budget authority, $83,000,000,000.
(B) Outlays, $73,400,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $91,400,000,000.
(B) Outlays, $81,850,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $101,450,000,000.
(B) Outlays, $91,350,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(13) Income Security (600):
Fiscal year 1987:
(A) New budget authority, $165,250,000,000.
(B) Outlays, $121,400,000,000.
(C) New direct loan obligations, $1,800,000,000.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $172,900,000,000.
(B) Outlays, $127,200,000,000.
(C) New direct loan obligations, $1,900,000,000.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $176,500,000,000.
(B) Outlays, $130,600,000,000.
(C) New direct loan obligations, $1,450,000,000.
(D) New primary loan guarantee commitments, $0.
(14) Social Security (650):
Fiscal year 1987:
(A) New budget authority, $5,500,000,000.
(B) Outlays, $5,500,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $6,150,000,000.
(B) Outlays, $6,150,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $6,900,000,000.
(B) Outlays, $6,850,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(15) Veterans Benefits and Services (700):
Fiscal year 1987:
(A) New budget authority, $27,050,000,000.
(B) Outlays, $26,700,000,000.
(C) New direct loan obligations, $1,550,000,000.
(D) New primary loan guarantee commitments, $16,300,000,000.
Fiscal year 1988:
(A) New budget authority, $27,450,000,000.
(B) Outlays, $27,050,000,000.
(C) New direct loan obligations, $1,500,000,000.
(D) New primary loan guarantee commitments, $16,950,000,000.
Fiscal year 1989:
(A) New budget authority, $27,300,000,000.
(B) Outlays, $26,900,000,000.
(C) New direct loan obligations, $1,300,000,000.

(16) Administration of Justice (750):
Fiscal year 1987:
(A) New budget authority, $7,200,000,000.
(B) Outlays, $7,150,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $7,150,000,000.
(B) Outlays, $7,250,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $7,250,000,000.
(B) Outlays, $7,350,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(17) General Government (800):
Fiscal year 1987:
(A) New budget authority, $5,750,000,000.
(B) Outlays, $5,650,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $6,150,000,000.
(B) Outlays, $6,050,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $6,150,000,000.
(B) Outlays, $6,200,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(18) General Purpose Fiscal Assistance (850):
Fiscal year 1987:
(A) New budget authority, $1,850,000,000.
(B) Outlays, $2,650,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $1,900,000,000.
(B) Outlays, $1,900,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $2,000,000,000.
(B) Outlays, $2,000,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(19) Net Interest (900):
Fiscal year 1987:
(A) New budget authority, $148,150,000,000.
(B) Outlays, $148,150,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $157,950,000,000.
(B) Outlays, $157,950,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $158,050,000,000.
(B) Outlays, $158,050,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(20) Allowances (920):
Fiscal year 1987:
(A) New budget authority, $550,000,000.
(B) Outlays, $600,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, $1,600,000,000.
(B) Outlays, $1,700,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, $2,650,000,000.
(B) Outlays, $2,850,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(21) Undistributed Offsetting Receipts (950):
Fiscal year 1987:
(A) New budget authority, −$35,850,000,000.
(B) Outlays, −$36,050,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1988:
(A) New budget authority, −$33,400,000,000.
(B) Outlays, −$33,400,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
Fiscal year 1989:
(A) New budget authority, −$34,150,000,000.
(B) Outlays, −$34,150,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.

RECONCILIATION

SEC. 2. (a) Not later than June 5, 1986, the committees named in subsections (b) through (u) of this section shall submit their recommendations to the Committees on the Budget of their respective Houses. After receiving those recommendations, the Committees on the Budget shall report to the House and Senate a reconciliation bill or resolution or both carrying out all such recommendations without any substantive revision.

HOUSE COMMITTEES

(b) The House Committee on Agriculture shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $80,000,000 and outlays by $79,000,000 in fiscal year 1987; decrease budget authority by $83,000,000 and outlays by $83,000,000 in fiscal year 1988; and decrease budget authority by $84,000,000 and outlays by $84,000,000 in fiscal year 1989.

(c) The House Committee on Banking, Finance, and Urban Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: increase budget authority by $642,000,000 and decrease outlays by $1,158,000,000 in fiscal year 1987; decrease budget authority by $0 and outlays by $23,000,000 in fiscal year 1988; and increase budget authority by $164,000,000 and decrease outlays by $46,000,000 in fiscal year 1989.

(d)(1) The House Committee on Education and Labor shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $25,000,000 and outlays by $25,000,000 in fiscal year 1987; decrease budget authority by $150,000,000 and outlays by $135,000,000 in fiscal year 1988; and decrease budget authority by $250,000,000 and outlays by $235,000,000 in fiscal year 1989.

(2) The House Committee on Education and Labor shall report changes in laws within its jurisdiction which provide credit authority as defined in section 3(10) of the Congressional Budget and Impoundment Control Act of 1974, sufficient to reduce direct loan obligations by $0 in fiscal year 1987, $18,000,000 in fiscal year 1988, and $97,000,000 in fiscal year 1989; and to reduce primary loan guarantees by $235,000,000 in fiscal year 1987, $15,000,000 in fiscal year 1988, and increase primary loan guarantees by $55,000,000 in fiscal year 1989.

(e) The House Committee on Energy and Commerce shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $2,713,000,000 and outlays by $2,955,000,000 in fiscal year 1987; decrease budget authority by $415,000,000 and outlays by $886,000,000 in fiscal year 1988; and decrease budget authority by $402,000,000 and outlays by $1,114,000,000 in fiscal year 1989.

(f) The House Committee on Interior and Insular Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $448,000,000 and outlays by $448,000,000 in fiscal year 1987; decrease budget authority by $383,000,000 and outlays by $383,000,000 in fiscal year 1988; and decrease budget authority by $374,000,000 and outlays by $374,000,000 in fiscal year 1989.

(g) The House Committee on Merchant Marine and Fisheries shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $170,000,000 and outlays by $170,000,000 in fiscal year 1987; decrease budget authority by $180,000,000 and outlays by $180,000,000 in fiscal year 1988; and decrease budget authority by $200,000,000 and outlays by $200,000,000 in fiscal year 1989.

(h) The House Committee on Post Office and Civil Service shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: increase budget authority by $950,000,000 and decrease outlays by $700,000,000 in fiscal year 1987; increase budget authority by $1,500,000,000 and decrease outlays by $950,000,000 in fiscal year 1988; and increase budget authority by $850,000,000 and decrease outlays by $2,150,000,000 in fiscal year 1989.

(i) The House Committee on Public Works and Transportation shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $836,000,000 and outlays by $119,000,000 in fiscal year 1987; decrease budget authority by $836,000,000 and outlays by $479,000,000 in fiscal year 1988; and decrease budget authority by $836,000,000 and outlays by $544,000,000 in fiscal year 1989.

(j) The House Committee on Science and Technology shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $50,000,000 and outlays by $50,000,000 in fiscal year 1987; decrease budget authority by $0 and outlays by $0 in fiscal year 1988; and decrease budget authority by $0 and outlays by $0 in fiscal year 1989.

(k) The House Committee on Small Business shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $438,000,000 and outlays by $343,000,000 in fiscal year 1987; decrease budget authority by $399,000,000 and outlays by $55,000,000 in fiscal year 1988; and decrease budget authority by $223,000,000 and outlays by $14,000,000 in fiscal year 1989.

(l) The House Committee on Ways and Means shall report changes in law within the jurisdiction of that committee sufficient to reduce the budget deficit by $4,200,000,000 in fiscal year 1987; to reduce the budget deficit by $3,695,000,000 in fiscal year 1988; and to reduce the budget deficit by $3,740,000,000 in fiscal year 1989.

SENATE COMMITTEES

(m) The Senate Committee on Agriculture, Nutrition, and Forestry shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $80,000,000 and outlays by $79,000,000 in fiscal year 1987; decrease budget authority by $83,000,000 and outlays by $83,000,000 in fiscal year 1988; and decrease budget authority by $84,000,000 and outlays by $84,000,000 in fiscal year 1989.

(n) The Senate Committee on Banking, Housing, and Urban Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congres-

sional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: increase budget authority by $642,000,000 and decrease outlays by $1,158,000,000 in fiscal year 1987; decrease budget authority by $0 and outlays by $23,000,000 in fiscal year 1988; and increase budget authority by $164,000,000 and decrease outlays by $46,000,000 in fiscal year 1989.

(o) The Senate Committee on Commerce, Science, and Transportation shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $170,000,000 and outlays by $170,000,000 in fiscal year 1987; decrease budget authority by $180,000,000 and outlays by $180,000,000 in fiscal year 1988; and decrease budget authority by $200,000,000 and outlays by $200,000,000 in fiscal year 1989.

(p) The Senate Committee on Energy and Natural Resources shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $2,185,000,000 and outlays by $2,377,000,000 in fiscal year 1987; increase budget authority by $82,000,000 and outlays by $61,000,000 in fiscal year 1988; and increase budget authority by $78,000,000 and outlays by $66,000,000 in fiscal year 1989.

(q) The Senate Committee on Environment and Public Works shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $1,124,000,000 and outlays by $407,000,000 in fiscal year 1987; decrease budget authority by $1,101,000,000 and outlays by $744,000,000 in fiscal year 1988; and decrease budget authority by $1,088,000,000 and outlays by $796,000,000 in fiscal year 1989.

(r) The Senate Committee on Finance shall report changes in law within the jurisdiction of that committee sufficient to reduce the budget deficit by $4,200,000,000 in fiscal year 1987; to reduce the budget deficit by $3,695,000,000 in fiscal year 1988; and to reduce the budget deficit by $3,740,000,000 in fiscal year 1989.

(s) The Senate Committee on Governmental Affairs shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: increase budget authority by $950,000,000 and decreased outlays by $700,000,000 in fiscal year 1987; increase budget authority by $1,500,000,000 and decrease outlays by $950,000,000 in fiscal year 1988; and increase budget authority by $850,000,000 and decrease outlays by $2,150,000,000 in fiscal year 1989.

(t)(1) The Senate Committee on Labor and Human Resources shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $25,000,000 and outlays by $25,000,000 in fiscal year 1987; decrease budget authority by $150,000,000 and outlays by $135,000,000 in fiscal year 1988; and decrease budget authority by $250,000,000 and outlays by $235,000,000 in fiscal year 1989.

(2) The Senate Committee on Labor and Human Resources shall report changes in laws within its jurisdiction which provide credit authority as defined in section 3(10) of the Congressional Budget and Impoundment Control Act of 1974, sufficient to reduce direct loan obligations by $0 in fiscal year 1987, $18,000,000 in fiscal year 1988, and $97,000,000 in fiscal year 1989; to reduce primary loan guarantees by $235,000,000 in fiscal year 1987, $15,000,000 in fiscal year 1988; and increase primary loan guarantees by $55,000,000 in fiscal year 1989.

(u) The Senate Committee on Small Business shall report (1) changes in laws within its jurisdiction which provide spending authority, as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays; (2) changes in laws within its jurisdiction other than those which provide spending authority as defined in section 401(c)(2)(C) of the Act, sufficient to achieve savings in budget authority and outlays; or (3) any combination thereof, as follows: decrease budget authority by $438,000,000 and outlays by $343,000,000 in fiscal year 1987; decrease budget authority by $399,000,000 and outlays by $55,000,000 in fiscal year 1988; and decrease budget authority by $223,000,000 and outlays by $14,000,000 in fiscal year 1989.

ESTABLISHMENT OF DEFICIT REDUCTION ACCOUNT

SEC. 3. (a) Revenues increased through legislative action above $6,000,000,000 in fiscal year 1987, $6,200,000,000 in fiscal year 1988, and $7,200,000,000 in fiscal year 1989, shall be used solely for the purpose of reducing the Federal deficit.

(b) These additional revenues shall be set forth separately in the congressional budget and clearly identified as for the purpose of deficit reduction only.

(c) The President shall immediately take such steps as are necessary to establish a separate account in the Treasury into which revenues referred to in subsection (a) shall be deposited. The account shall be administered in such a way as to insure that moneys deposited in the fund are available solely for the purpose of deficit reduction. The President shall report on an annual basis to the Congress on the financial condition of the fund and the extent to which the fund has reduced the Federal deficit.

RESERVATION OF DEFENSE BUDGET AUTHORITY

SEC. 4. (a) Of the recommended level of fiscal year 1987 budget authority set forth in section 1 of this resolution for Function 050 (National Defense), $3,000,000,000 is hereby reserved from allocation to the Committee on Appropriations under section 302(a) of the Congressional Budget Act of 1974.

(b) The Secretary of Defense is directed to transmit a report to the Speaker of the House of Representatives and the President pro tempore of the Senate setting forth a full and complete accounting of all moneys appropriated to the Department of Defense for fiscal year 1986 in excess of sums needed to cover inflation. Such report shall be referred to the Committee on Appropriations and Committee on Armed Services of each House. The Committee on the Budget of each House shall be notified upon the transmittal of such report.

(c) The report described in subsection (b) shall also be submitted to the General Accounting Office which shall report to the Congress within a period of fourteen days on its findings as to that report.

(d) After the date on which the report of the General Accounting Office described in subsection (c) is transmitted, the Committee on the Budget of each House is authorized and directed to report to its respective House within five legislative days a revised allocation pursuant to section 302(a) of the Congressional Budget Act of 1974 of new budget authority to the Committee on Appropriations reflecting the full amount of budget authority described in subsection (a).

(e) For fiscal years 1988 and 1989, the Secretary of Defense shall, within ninety days of the close of each such fiscal year, issue to the Speaker of the House of Representatives and the President pro tempore of the Senate, a report accounting for any moneys appropriated for each respective prior fiscal year to cover inflation, which have not been obligated for such purposes.

GNP DEFLATOR

SEC. 5. The Committees on Armed Services of the House and Senate shall report legislation prohibiting the Department of Defense from using an arbitrary deflator (one not based on historical or factual data) for major weapons systems which would provide funding for major weapons systems inflation in excess of the GNP deflator.

SHUTTLE ORBITER REPLACEMENT

SEC. 6. Notwithstanding the spending levels contained in section 1 of this resolution, funding for a shuttle orbiter to replace NASA's Challenger, lost on January 28, 1986, would be appropriate if an authorization for such funding is enacted into law.

GENERAL REVENUE SHARING

SEC. 7. The spending levels contained in section 1 of this resolution would not preclude funding for an extension of general revenue sharing under the State and Local Assistance Act of 1972 through the end of fiscal year 1989 if an authorization for such funding is enacted into law.

STRATEGIC PETROLEUM RESERVE

SEC. 8. It is the sense of the Congress that the policy to fill the Strategic Petroleum Re-

serve to an ultimate capacity of 750 million barrels be reaffirmed. It is also recommended that the Federal Government purchase oil for the Reserve in a way designed to help domestic stripper oil well producers so as to minimize the shutting-in of stripper production.

COOPERATIVE EXTENSION SERVICE

SEC. 9. It is the sense of the Congress that Federal funds for the Cooperative Extension Service of the Department of Agriculture should be maintained at a level sufficient to carry out fully the vital services it is providing to rural America during a time of extreme stress. It is further assumed that this funding will be used especially to support and strengthen such core programs as 4-H Youth Development, Home Economics and Family Living, Natural Resources and Community Development, and services that provide agricultural financial analysis and farm management instruction.

FOREIGN AGRICULTURAL INVESTMENT REFORM

SEC. 10. It is the sense of the Congress that the use of foreign aid funds for financing the foreign production for export use of agricultural commodities already in surplus on world markets is a counter-productive use of American tax dollars as well as devastating to the American farmer who loses export markets from the unfairly subsidized competition.

Mr. DOLE. Mr. President, I move that the Senate disagree to the amendment of the House to Senate Concurrent Resolution 120, the concurrent resolution on the budget for fiscal year 1987, and I further move that the Senate request a conference with the House on the disagreeing votes of the two Houses, and that the Chair be authorized to appoint conferees.

The motion was agreed to, and the Presiding Officer (Mr. ARMSTRONG) appointed Mr. DOMENICI, Mrs. KASSEBAUM, Mr. BOSCHWITZ, Mr. ANDREWS, Mr. QUAYLE, Mr. GORTON, Mr. CHILES, Mr. HOLLINGS, Mr. JOHNSTON, Mr. SASSER, and Mr. METZENBAUM conferees on the part of the Senate.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. GRAMM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I want to wish the conferees well, as they go into their first meeting this afternoon. It would be my hope that they can conclude their work on the budget resolution soon, if not today.

UNANIMOUS CONSENT 7-DAY RULE FOR BUDGET RESOLUTION CONFERENCE

Mr. DOLE. Mr. President, I ask unanimous consent that the days during which the Senate will be in adjournment for the upcoming Memorial Day recess, including June 2, not be counted for the purposes of the 7-day limitation contained in section 305(d) of the Congressional Budget Act, as it relates to the conference on Senate Concurrent Resolution 120, the concurrent resolution on the budget for fiscal year 1987.

Mr. BYRD. Mr. President, reserving the right to object, I will not object. I wish to state at this point that there was an early clearance on that request. Just after, or as Senator SIMPSON was making the request, there was an objection that came to me from a Senator.

I want to publicly state my appreciation to the distinguished acting Republican leader, Mr. SIMPSON, who at that time vitiated the request.

The Senator has been since contacted. There is no objection.

I thank the majority leader.

Mr. DOLE. I thank the distinguished minority leader.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

URGENT SUPPLEMENTAL APPROPRIATIONS

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate turn to Calendar No. 853, H.R. 4515, the supplemental appropriations bill.

The PRESIDING OFFICER. Is there objection?

Mr. MELCHER. Reserving the right to object, Mr. President.

The PRESIDING OFFICER. Is there objection?

Mr. MELCHER. I am reserving the right to object, Mr. President.

Will the majority leader yield to me? Does he have the floor?

Mr. DOLE. Yes, I have the floor.

Mr. MELCHER. I have noted earlier today that the urgent supplemental comes to the floor with one section in it dealing with the Philippines. While I am aware of what the administration is requesting for the Philippines that appears in the urgent supplemental, I have had to point out to my colleagues that this is not the complete package.

So rather than letting this one section go, it could be dropped out, and we could call up the urgent supplemental and deal with the Philippines later on, or we could get some accommodation with the State Department and AID to broaden out some of the opportunities for agricultural trade that is in the recently passed farm bill which we thought was going to be part of the package dealing with the Philippines.

So it is on that basis that I have been working with the State Department and AID for over the last 2 years doing what could have been done 2 months ago, if they would come, tell us frankly that they want to move their package, and in what form they want to move it.

So I am going to object at this time, and encourage the State Department and AID to make some serious discussions with those of us who would like to use the agricultural trade programs that are available, and the recently passed farm bill using it in the Philippines as part of their package of assistance for the Philippines this summer.

□ 1510

The PRESIDING OFFICER. The Senator objects.

Mr. DOLE. Mr. President, I thank the distinguished chairman of the committee [Mr. HATFIELD]. He is prepared to move forward on this. I hope that the Senator from Montana would remove his objection fairly soon. This is a rather important piece of legislation, on which we would like to complete action before the Memorial Day recess.

I yield the floor.

Mr. HATFIELD. Mr. President, the issue is not at this point because of the objection raised by the Senator from Montana, but I would like to make one or two brief comments concerning the situation of the supplemental.

No. 1, there is $100 million in this supplemental for economic aid to the Philippines; there is $50 million for military aid. The administration has taken the position that they want to phase the aid in as best it can be utilized to meet the situation as it evolves. That is a policy decision made by the administration. I think it is a reasonable one.

No. 2, there is the sugar issue that is involved in this, we know, beyond the military and the economic aid questions.

No. 3, we cannot delete this one section of the bill and subject the whole bill to deletions because we have carefully crafted this bill in conformity with the Gramm-Rudman requirements. That means simply that any amendment to the committee amendments or the other amendments that are to this bill have to be offset by funds so it remains deficit neutral. We have done this through a very comprehensive system so that eliminating any one part of the bill puts us into a very difficult, if not impossible, situation because we have not been able to get a unanimous-consent agreement to the committee amendments en bloc. That means simply that every one of those amendments is subject to a point of order under Gramm-Rudman until we get to page 35. On page 35 of the bill is where we have all the offset, all the offset that has been agreed to by the committee and signed off by the administration. So it puts the committee into a whole new situation.

So, as much as I would like to accommodate the Senator from Montana, I have to report that I cannot do so under the straitjacket of Gramm-Rudman that has been imposed upon the Senate committee. We are doing our very best to comply with it. That is the situation.

I want to add one point. That is, when we take up the bill, it is going to necessitate a full 2 days of debate. I anticipate that on the basis that there are issues that involve the Armed Services Committee, the Appropriations Committee. That is a policy question. We have controversial issues that relate to the REA. We have many other issues that relate to WIC. So this is not a simple supplemental bill.

So, with the timeframe that we are operating under, where we want to be out late tomorrow afternoon, we just do not have 2 full days ahead of us before the recess. I do not want to leave the bill out here dangling in the wind. Once we take up the bill, I want to proceed to finish the bill in an orderly fashion. To have a 10-day recess intervening between the time we take up the bill and the time we finish the bill is not an orderly procedure.

I can really only say to the Senator from Montana that time has already been running out on us so, regardless of his objection, it does not in any way violate the strategy to handle this bill related to my desire to see it completed once it is brought up—in case the Senator from Montana is suffering from a pang of conscience or any guilt for objecting.

Mr. MELCHER. Mr. President, would the distinguished chairman of the Appropriations Committee yield?

Mr. HATFIELD. Yes; I yield.

Mr. MELCHER. I have no pang of guilt on this matter. I do recognize that the distinguished Senator, the chairman of the committee [Mr. HATFIELD], has made a very practical point: to consider this bill, it should be considered all in one 2-day period. It takes longer than 1 day and it takes a day that is a little bit longer than starting at 3 or 3:30 in the afternoon, the second day—tomorrow—being a day in which Senators are striving to conclude action so they can depart or whatever their plans are for the recess.

I do want to point out that on the question of the Philippines assistance, while $150 million is part of the package that the administration has been talking about for the past 2 months, a part of the package that the administration has been talking about is not in this urgent supplemental.

That has to do with section 416 of food assistance. Those commodities for the Philippines are wheat and milk, both of which are in huge surplus here and in Federal storage and which we cannot properly use in the Philippines until that part is in the package, along with some recognition of the sugar quota issue. I think we would be wise to hold off. But we do have time before the urgent supplemental will be taken up later on in June, when we come back from the recess, hopefully to work this out with the Department of State and with the Agency for International Development. Because it is something that those of us who are familiar with the Philippines and are familiar with the agricultural trade programs that we placed in the recently passed farm bill do expect and do anticipate fully, that the implementation of some of those programs will come about in the Philippine package because that is the type of friendly country that I think we can rely on to give us a good opportunity for great expansion with them.

I thank the distinguished chairman for yielding. I hope we will have this matter cleared up soon, within the next week or two, and will not have any problem with this bill later.

Mr. COCHRAN addressed the Chair.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. COCHRAN. Mr. President, it probably should be pointed out that in connection with the assistance program for the Philippines, the committee did incorporate language stating that the goods that were purchased with these AID funds by the Philippines should be American-produced goods and services. This was not legislative language, as the Senator from Montana probably knows, but at the request of this Senator, the committee did agree to include that language.

It is my thinking that if we are going to make these extra sums available, the money ought not to be used by the new Government of the Philippines to buy things from Japan or any other foreign supplier but, rather, should look to the United States or reduce the existing indebtedness. If they need the funds for debt service, that is a matter that apparently has strong support, at least in the Appropriations Committee.

□ 1520

But I agree with the Senator that we do need to take advantage of these opportunities to expand our sales, to expand our trade base. I do not know the details of the Senator's proposal. I heard part of the conversation he was having with the chairman of our full Committee on Appropriations. But I wanted to make that point because he may want to try to use that to reach the same goal that he is now describing to the Senate.

Mr. MELCHER. Will the distinguished Senator from Mississippi yield?

Mr. COCHRAN. I am happy to yield to the Senator, Mr. President.

Mr. MELCHER. I am pleased that the Senator from Mississippi incorporated that type of language and requirement in the urgent supplemental regarding the trade package dealing with the Philippines because I think that is absolutely the kind of reciprocity we need between the United States and the Philippines. There are some other significant steps that have been discussed by some of us with some members of the State Department and with the Philippines Government, and we believe that now, if we are going to have this $150 million for economic and military assistance, $100 million for economic and $50 million for military, typing these broader trade programs to that package would be more in keeping with what we have been thinking in the Senate Agriculture Committee over the past 4 or 5 months.

The distinguished Senator from Mississippi is one of our best members on that committee, I might say. I hope that we can work this language situation out, this intent situation out with the Philippines during the next week or 10 days and that we can put the whole package together in this urgent supplemental since that is the route which has been started, the administration making the request of the Senate Appropriations Committee to include this $150 million in this supplemental.

Mr. COCHRAN. Mr. President, I appreciate the comments of the Senator from Montana. We also have, as the Senator and others know, a requirement for additional funds to reimburse the Commodity Credit Corporation for net realized losses. The amount of that reimbursement is over $5 billion. We are told that funds are going to be exhausted by the first week of June if the matter is not solved by putting some money in this urgent supplemental bill. So this is a matter of real urgency and of tremendous importance to the Nation's farmers and to the country as a whole.

CALL OF THE ROLL

Mr. COCHRAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

□ 1600

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. SASSER. I object.

The PRESIDING OFFICER (Mr. EVANS). Objection is heard. The clerk will resume the call of the roll.

The assistant legislative clerk resumed the call of the roll.

□ 1610

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection?

Mr. SASSER. I object.

The PRESIDING OFFICER. Objection is heard. The clerk will call the roll.

The assistant legislative clerk resumed and completed the call of the roll.

During the call of the roll the following Senators answered to their names:

[Quorum No. 8 Leg.]

Present:

Armstrong	Byrd	Melcher
Boren	Evans	Sasser
Boschwitz	McClure	

The PRESIDING OFFICER. A quorum is not present.

Mr. McCLURE. Mr. President, I move that the Sergeant at Arms be instructed to request the attendance of absent Senators.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Idaho.

Mr. SASSER. Mr. President, I ask for the yeas and nays on the motion.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Idaho.

The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Arizona [Mr. GOLDWATER], the Senator from Florida [Mrs. HAWKINS], the Senator from Nevada [Mr. LAXALT], the Senator from Maryland [Mr. MATHIAS], the Senator from Alaska [Mr. MURKOWSKI], and the Senator from Oregon [Mr. PACKWOOD] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey [Mr. BRADLEY], the Senator from Missouri [Mr. EAGLETON], the Senator from New York [Mr. MOYNIHAN], and the Senator from Mississippi [Mr. STENNIS] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 86, nays 4, as follows:

[Rollcall Vote No. 105 Leg.]

YEAS—86

Abdnor	Dixon	Helms
Andrews	Dodd	Hollings
Armstrong	Dole	Humphrey
Baucus	Domenici	Inouye
Bentsen	Durenberger	Johnston
Biden	East	Kassebaum
Bingaman	Evans	Kasten
Boren	Exon	Kennedy
Boschwitz	Ford	Kerry
Bumpers	Glenn	Lautenberg
Burdick	Gore	Leahy
Byrd	Gorton	Levin
Chafee	Gramm	Long
Chiles	Grassley	Lugar
Cochran	Harkin	Matsunaga
Cohen	Hart	Mattingly
Cranston	Hatch	McClure
D'Amato	Hatfield	McConnell
Danforth	Hecht	Melcher
DeConcini	Heflin	Metzenbaum
Denton	Heinz	Mitchell
Nickles	Rudman	Symms
Nunn	Sarbanes	Thurmond
Pell	Sasser	Trible
Pressler	Simon	Wallop
Pryor	Simpson	Warner
Riegle	Specter	Wilson
Rockefeller	Stafford	Zorinsky
Roth	Stevens	

NAYS—4

Garn	Quayle
Proxmire	Weicker

NOT VOTING—10

Bradley	Laxalt	Packwood
Eagleton	Mathias	Stennis
Goldwater	Moynihan	
Hawkins	Murkowski	

So the motion was agreed to.

The PRESIDING OFFICER. With the addition of Senators voting who did not answer the quorum call, a quorum is now present.

□ 1640

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senate is not in order. Will those conversing in the aisles please return to their seats or retire to the cloakroom.

We cannot continue until the Senate is in order.

The majority leader.

EXECUTIVE SESSION

Mr. DOLE. Mr. President, I move that the Senate go into executive session to consider Executive Calendar Item No. 734, the nomination of Jed Christensen, of Virginia, to be Director of Surface Mining Reclamation and Enforcement.

The PRESIDING OFFICER. The question is on the motion.

All those in favor say "aye." Opposed.

The motion is adopted.

The Senator from Tennessee.

Mr. SASSER. Mr. President, I rise today to object to the nomination of Jed Christensen——

Mr. BYRD. Mr. President, I am not questioning the Chair. Would the Chair put the question and announce the vote just for the sake of the RECORD.

The PRESIDING OFFICER. The Chair did announce the motion was carried.

Mr. BYRD. But did the Chair state "the yeas appear to have it"?

The PRESIDING OFFICER. The clerk will report the nomination.

Mr. BYRD. No. Mr. President, Senators who may wish to have a vote by division or a vote by rollcall have a right to make either of those requests and if the Chair would first say the yeas have it or appear to have it thus protecting that right if any Senator should desire to so request, then I would have no objection.

The PRESIDING OFFICER. We shall return to the yeas appear to have it. The yeas do have it.

Mr. BYRD. I thank the Chair.

The PRESIDING OFFICER. I thank the Democratic leader.

The clerk will report the nomination.

The Senate proceeded to the consideration of executive business.

DEPARTMENT OF THE INTERIOR

The assistant legislative clerk read the nomination of Jed Dean Christensen, of Virginia, to be Director of the Office of Surface Mining Reclamation and Enforcement.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. SASSER. Mr. President, I rise today to object to the nomination of Jed Christensen to become the Director of the Office of Surface Mining. I object to Mr. Christensen's nomination due to longstanding problems with the operations of the Office of Surface Mining in my home State of Tennessee. These problems have led to a situation where there is very little Federal reclamation of abandoned mine sites in Tennessee. As a result, the health and safety of literally thousands of Tennesseans have been placed in jeopardy. In short, Mr. President, we have in Tennessee a situation where the Office of Surface Mining has failed to live up to both the spirit and the letter of the Surface Mining Control and Reclamation Act of 1977.

Our problems in Tennessee are the result of a bureaucratic squabble between the Department of the Interior and the State of Tennessee. This dispute has dragged on for over 2 years, during which time little or no reclamation has occurred on Tennessee's abandoned mine lands. Indeed, the Office of Surface Mining has authorized only one emergency reclamation project in Tennessee in nearly 2 years.

Mr. President, may we have order?

The PRESIDING OFFICER. The Senate is not in order.

The Senator from Tennessee.

Mr. SASSER. Mr. President, along with Congressman JIM COOPER, I have interjected myself in this dispute for a very simple reason. As long as the State and Federal Government continue this standoff, Tennessee's lands suffer, the health and safety of our citizens is threatened, and the objectives of the Surface Mining Act are ignored. I greatly feared that it would take a major calamity involving serious harm or perhaps even loss of life before attention was focused on the lack of reclamation activity in Tennessee. In short, we are attempting to defuse what we see is a disaster waiting to happen.

A prime example of these problems was set forth in the Knoxville News Sentinal, in a May 5, 1986, column entitled "Mine Tailings Open Shafts Endanger Public Environmental Protection Agency Warnings." Those are the headlines on the story. It is written by a very distinguished writer and report-

er who has produced some exceptional journalism dealing with the problems of those who live in Appalachia. I quote from this story written by this able journalist, Mr. Fred Brown:

In 1975, Steve Leming, the 21-month-old son of Irene Leming of Soddy, Tenn., was playing near his home on an old abandoned mine site.

Bear in mind this is a little boy less than 2 years of age—

He tumbled from an embankment in his yard into a pool formed in Little Soddy Creek by silt coal tailings that had washed into the stream. When his mother reached Steve, he was floating, dead, in four feet of water.

Leming says her son would not have died if the abandoned strip mines in the area had not caused the silt to run off the hills above them into the creek.

This is the mother of a 20-month-old son who died unnecessarily. A son to be sure of a poor, poverty-stricken Appalachian family, but loved and valued by his mother nevertheless.

Returning to this dispatch, the reporter writes about Mrs. Leming's son:

Her son is just one of the documented deaths in East Tennessee from abandoned mines. Others have been crushed by large rocks falling out of the mine sites, and others have drowned in pools of water on old sites.

In addition, East Tennessee's coal counties are pocked with more than 400 hazardous mine openings, according to the Labor Department's Mine Safety and Health Administration (MSHA).

The Washington agency, responsible for overseeing mine safety in the nation's coal mines, issued a warning today to hikers and campers who frequent areas where mining activities have been heavy.

"Every year, abandoned mines and quarries claim the lives of teenagers, adults and children. These hazardous sites have caused suffocations, drownings, and head, neck and back injuries or fatalities in accidents involving trespassers at abandoned or intermittently idle mining properties," said Mary Wells of the Labor Department.

David Hughes, a mining specialist with the Tennessee Department of Land Reclamation in Knoxville, said one of the real problems with open portals—the entrances to old mines—is that campers and backpackers at times mistake them for caves.

"People will actually go down inside of these old mines. It is very dangerous. What they are walking on may be the old roof of the mine. You can imagine how dangerous these things are."

□ 1650

"People actually go down inside these old mines. It is very dangerous. What they are walking on may be the old roof of the mine. You can imagine how dangerous these things are," so says David Hughes, a mine inspector with the Tennessee Department of Land Reclamation in Knoxville.

Continuing on, Mr. Hughes said, and I am quoting the article:

He said that some of the abandoned mines are so well-camouflaged by trees and bushes that unsuspecting hikers could easily fall into a portal and then have rocks and soil fall in on them.

He cited one 12-foot-wide shaft in Monterey near Cookeville in Putnam County. The shaft drops 40 feet to a pool of water about 200 feet deep. The opening served as an air shaft for a deep mine, he said.

David A. Zegeer, assistant secretary for mine safety and health with the Labor Department, said it is important that families, hikers and campers become familiar with the potential dangers that lurk on old mining property before they go trekking.

There are six open portals in Big South Fork National River and Recreation Area near Oneida.

Parenthetically, I might say, Mr. President, that these sites are in the home county of our distinguished former majority leader and our friend, Howard Baker, Jr. It was not too long ago that Senator Baker and others appeared at a ceremony to celebrate the opening of the Big South Fork National River and Recreation Area.

But continuing on in the article:

The recreation area offers more than 200 miles of trails, some near the portals.

Zegeer said abandoned underground mines are not the place to explore because they may have oxygen-deficient air, an explosive atmosphere or poor roof conditions.

In East Tennessee there are 12,000 critical acres of abandoned mines. In that acreage, there are 444 open portals, according, to figures from the reclamation office. In addition there are 11 open vertical shafts such as the one at Monterey.

So concludes the article written by the respected journalist, Fred Brown.

Interestingly enough—perhaps I should say tragically enough—there is a Federal program reclaiming these abandoned mine areas. As a matter of fact, this program collects money from coal operators and has collected the money from coal operators in my native State of Tennessee.

In a letter addressed to my distinguished colleague, Senator ALBERT GORE, JR., dated May 16, 1986, the Acting Director of the Office of Surface Mining, Mr. Jed Christensen, stated to my distinguished colleague that the abandoned mine land program of the Federal Government has collected $15.4 million from Tennessee coal operators over the life of the Abandoned Mine Land Program. Of this amount, 50 percent, according to Mr. Christensen, or $7.7 million, represents the State's share. Only $12 million has been returned to the State of Tennessee through grants prior to the State's relinquishing primacy, says Mr. Christensen in his letter.

I submit, Mr. President, that if the Office of Surface Mining, acting pursuant to the Abandoned Mine Land Program, had done what it was supposed to do under the statute, had fulfilled its responsibility for claiming these abandoned mines, perhaps families such as the Lemings would not live with the fear of losing their loved ones.

But this has not been done because of bureaucratic infighting and irresponsibility. Reclamation funds were not given to the State of Tennessee to reclaim these mines. Mr. President, I submit that that is unconscionable.

So that there be no mistake about it, let me read into the RECORD a letter written to my distinguished colleague dated May 16, 1986, on a letterhead of the U.S. Department of the Interior, Office of Surface Mining, Reclamation and Enforcement, Washington, DC 20240, to the Honorable ALBERT GORE, JR., U.S. Senate, Washington, DC 20510:

DEAR SENATOR GORE: Thank you for your letter of January 24, 1986, to Secretary Hodel, transmitting a petition from citizens concerned about coal mining in Tennessee and the policies and programs of the Office of Surface Mining Reclamation and Enforcement (OSMRE).

In carrying out a Federal regulatory program in Tennessee, OSMRE's objectives are to implement the Surface Mining Control and Reclamation Act (SMCRA) and regulations with consistency and to ensure that coal mining operators receive fair and even-handed treatment. OSMRE believes its objectives are being achieved.

If I could depart from the letter a moment, I would note the irony in the Acting Director sending a letter to a U.S. Senator saying that the objectives of the Office of Surface Mining Reclamation and Enforcement are being achieved.

What does this man who sits in the chair of Acting Director think the taxpayers of this country are paying him to do? They are paying him to follow the strictures of the statute.

Continuing on with this letter, the Acting Director says:

You also expressed concern about funds collected from Tennessee coal miners which remain unused in the abandoned mine land program.

Our records indicate that $15.4 million have been collected from Tennessee coal operators over the life of the Abandoned Mine Land Program. Of this amount, 50 percent, or $7.7 million, represents the State's share. Two million dollars have been returned to Tennessee through grants prior to the State's relinquishing primacy.

□ 1700

So he clearly admits on the face of this letter that Tennessee's contributions to the Abandoned Mine Land Program, some $5.7 million, are sitting idle in the fund. He continues on in the letter by saying, "We are concerned about the Abandoned Mine Land problems in Tennessee. * * *" Again, I note the irony, Mr. President. If he is concerned about it, why does he not do something about it?

But he says in the letter:

In the absence of an Abandoned Mine Land Program administered by the State, the Office of Surface Mining, Reclamation, and Enforcement will continue to undertake emergency projects in the State, using moneys from the Secretary's discretionary share of reclamation funds.

Then he ends it with the bureaucratic catch-all:

If we may be of further assistance, please let me know. Sincerely, Jed Christensen, Acting Director.

(Mr. McCONNELL assumed the Chair.)

Mr. President, let me add a few words about Congressman COOPER who has worked so dilgently on this. Congressman JIM COOPER is a very distinguished Congressman. At the time he came to the House of Representatives in January 1983, Congressman COOPER was the youngest Member of that distinguished body. He comes from a distinguished political lineage—his father, Prentice Cooper, served as Governor of the State of Tennessee during the 1940's.

Congressman COOPER and I working together have made numerous efforts to elicit from Mr. Christensen a commitment that the problems in Tennessee would be rectified. We have met with Mr. Christensen directly, and asked him to examine the total lack of reclamation in Tennessee, and to work with us in shaping a plan to remove this looming threat.

We have not really asked all that much, Mr. President. We have simply asked that the Office of Surface Mining live up to its obligations by performing at least limited reclamation efforts in the State of Tennessee.

Well, unfortunately, Mr. Christensen has not been of much assistance. He has failed to come forward with either a plan for a limited reclamation activity in Tennessee or with a commitment to develop such a plan for Tennessee.

In effect, he is telling the citizens of Tennessee that the mandate of the Surface Mining Act applies to all States except Tennessee. He is telling us that the act's directive to protect the public health, safety, and general welfare from the adverse effects of coal mining practices do not apply in Tennessee.

Many of my colleagues may be wondering how this can be the case. Let me provide some background information which will shed some light on Tennessee's unique standing.

Our problems in Tennessee center on the abandoned mine reclamation fund. As my colleagues from mining States know, the abandoned mine reclamation fund is financed in part through the collection of a reclamation fee on coal mining operations; 50 percent of the funds collected annually in a State are returned to that State for approved abandoned mine reclamation efforts. The remaining 50 percent goes into discretionary programs, and funds in this program may be expended in any State at the discretion of the Secretary of the Interior.

There are certain strings attached to the State's share of the reclamation fund. To remain eligible for these funds a State must retain primacy over the mining industry in its State. That is, the State must exert primary statutory and regulatory oversight in the mining industry within its borders. The Surface Mining Act is very clear on this point. Once a State gives up primacy, the Secretary of the Interior shall not approve, fund, or continue to fund an abandoned mine reclamation program in that State.

This statutory mandate marks the beginning of Tennessee's difficulties. After initial approval of Tennessee's regulatory program for the mining industry, Federal officials begin to spot what they viewed as problem areas.

In April and again in August 1983 the Director of the Office of Surface Mining notified the Governor of Tennessee of problems identified in the State's implementation, maintenance, and enforcement of its mining regulatory program. This touched off a period of negotiating back and forth between the State of Tennessee and the Department of the Interior over regulating the mining industry in Tennessee.

A reading of the correspondence from the Governor's office suggests a growing level of frustration in attempting to resolve this problem.

Finally, on June 13, 1984, Tennessee's Governor Lamar Alexander wrote the then Secretary of the Interior William Clark as follows. I quote from the letter:

At my request the Tennessee General Assembly has repealed legislation authorizing the State regulation of surface mining. We are working with the Office of Surface Mining in an orderly way to return that responsibility to the Federal Government on October 1, 1984. To put it simply, this decision arose because of difference of opinion between Federal and State regulators.

So here we have a situation where there is an argument between Federal bureaucrats and State bureaucrats. It reminds me very much of a minor child in a divorce case.

I practiced law for many years, Mr. President, before coming to this distinguished body. But the minor child in a divorce case has no control over the hostilities or the squabbles that might develop between two parents. Yet that minor child certainly suffers the consequences of their inability to resolve their differences.

□ 1710

In this particular situation, Mr. President, the State of Tennessee is the one that is suffering the consequences of the inability or the unwillingness for State or Federal regulators to resolve their difficulties.

Although abandoning control of mine regulation in Tennessee, the State government expressed a strong desire to retain its abandoned mine reclamation program.

Acting Director of the Office of Surface Mining John Ward responded to the State's request in an October 5, 1984, letter:

It is with considerable regret that I must inform you of the proposed suspension of Tennessee's abandoned mine land plan. This action, although unavoidably due to recent passage of legislation by the State of Tennessee, is particularly unfortunate since the Tennessee plan and reclamation program have exemplified the degree of professionalism needed throughout the country to effectively address the many problems associated with abandoned mine lands. Nevertheless, the State's decisions has left me no option in this matter.

To continue with the letter:

Section 405(c) of the Surface Mine Control and Reclamation Act of 1977, Public Law 95-87, provides that the Secretary of Interior shall not approve, fund, or continue to fund a State abandoned mine land reclamation program unless the State has an approved regulatory program.

Let me point out, Mr. President, that I do not quarrel with officials at the Office of Surface Mining on this particular point. They simply followed the letter of the law in denying Tennessee the State's share of funds in the reclamation fund. The law is very clear on this point. If you give up primacy, you give up your right to these reclamation funds.

I have indicated to Mr. Christensen that I have no problem with any actions by the Office of Surface Mining on this point. In fact, the Federal Register of October 1, 1984, set forth the consequences of Tennessee's forfeiting primacy rather succinctly. As noted on page 38875 of that issue:

Formal suspension of a State's reclamation plan will have the following consequences: (1) The State will no longer be eligible to receive its 50-percent allocation of the abandoned mine land funds collected within the State; (2) funds which have been allocated to the State but remain unexpended for 3 years ma, be withdrawn by the Director and used in any eligible area in the country; and (3) the Office of Surface Mining will conduct only limited reclamation efforts in the State addressing only the highest priority problems which threaten the public health and safety.

It is this last point which has caused me great problems, Mr. President. For despite this clear directive that limited reclamation efforts would continue in Tennessee even though the State lacked primacy, this has simply not happened. The sad truth is that only one emergency project has been authorized for mine land reclamation in Tennessee in almost 2 years.

Let me make it clear, Mr. President, that there are quite a few projects which meet the definition of "highest priority problems which threaten the public health and safety."

This regulatory pronouncement and the mandate of the Surface Mining Act call for some Federal role in mine reclamation efforts in Tennessee.

Congressman COOPER and I contacted Mr. Christensen on January 31 of this year to propose a compromise which would allow such limited reclamation efforts to go forward in Ten-

nessee while avoiding intanglement in the dispute over the State's lack of primacy.

I pointed out to the Acting Director, Mr. Christensen, at that time, that it was a very easy thing to go to rules and regulations to cite reasons as to why something could not be done, why some one could not act. That is known as bureaucratic inertia.

But I pointed out to the Acting Director at that time that our challenge, indeed our responsibility, as public officials—appointed and elected—was to act in the public interest and to find ways in which these funds, collected pursuant to statute, could be used for the reclamation of Tennessee mine lands, to find ways that these funds could be used to further the public welfare and safety.

I pointed out to him that he did have the authority to use funds to deal with emergencies or to use funds, to some extent, at his discretion or that, ultimately, of the Secretary of the Interior.

It seemed to have some impact on him, and he said he would return to his office and study the proposition.

But, alas, I think he went back and got all involved again in the old bureaucratic question of why something cannot be done.

Well, we proposed that the Office of Surface Mining make use of the services of the Soil Conservation Service to work on abandoned mine sites. As many of my colleagues know, in the western part of Tennessee we have some of the worst soil erosion of all the 50 States. You have only to fly over the western part of Tennessee and you can see the river turn yellow as a result of the soil entering into it. The Soil Conservation Service has done yeoman service over the years in trying to alleviate this very serious problem.

They are a dedicated Federal agency. They have skilled and competent workers.

I suggested that the services of the Soil Conservation Service be used to implement the ends of the Abandoned Mine Land Reclamation Act.

In the Soil Conservation Service at least some officials had indicated informally that if they were called upon to do this and if the Office of Surface Mining furnished the appropriate funds, that in the public interest and in furtherance of public safety they would undertake to reclaim these abandoned mine lands.

That is the proper spirit, I suggest, of public service. I contrast that with the attitude of the Office of Surface Mining.

I also suggested that if the Office of Surface Mining Reclamation and Enforcement did not wish to avail themselves of the services of the Soil Conservation Service, perhaps we could contact the Tennessee Valley Authority and ask them to perform the necessary reclamation work on high priority projects in the State of Tennessee. The Tennessee Valley Authority has compiled an excellent record in seeking to deal with many of the problems of soil erosion, of rectifying manmade environmental damage and other environmental damage to the whole Tennessee Valley area.

Here again, when informal contacts were made with the Tennessee Valley Authority, they indicated unofficially that they were not seeking this job but if the Office of Surface Mining would furnish the necessary funds under the abandoned mine reclamation program, the Tennessee Valley Authority would undertake, in furtherance of public health and safety and in an effort to diminish any further damage to the environment, to perform the reclamation work on the high priority projects in the State of Tennessee.

Mr. President, I know my colleagues want to completely understand this issue, so I shall read the letter that Representative JIM COOPER sent to Mr. Christensen. I think it is very informative and will give my colleagues some flavor of the problem facing us. The letter begins:

DEAR MR. CHRISTENSEN: We are gravely concerned with the continued standoff between your office and the State of Tennessee over the expenditure of abandoned mine reclamation funds in Tennessee. We understand that by giving up all regulatory powers over surface mining, the State of Tennessee forfeited its right to funds available under the abandoned mine reclamation fund. Tennessee is the only State which cannot receive its share of reclamation funds, a unique situation with agonizing results.

Said Representative COOPER.

Continuing with his letter:

We understand that your office is contemplating funding for one emergency work site in Scott County.

This was the one authorized site for reclamation that I referred to earlier in my statement.

Continuing with the letter:

There are many other priority sites in Tennessee which deserve immediate reclamation. Since the Office of Surface Mining has shown a willingness to undertake a reclamation project with discretionary funds, we request greater use of the discretionary fund. The simple truth is the dearth of reclamation funds created by the stalemate in Tennessee hurts our land and threatens the health and welfare of thousands of Tennesseeans.

Moreover, the confusion and uncertainty surrounding the mining industry in Tennessee is taking its full toll in lost jobs. Faced with continuing uncertainty, many Tennessee mining interests are opting to cease operations or to relocate. This aggravates the already dismal employment picture in many mining communities throughout Tennessee.

As you well know, many abandoned mine sites are disasters waiting to happen. A few grim examples illustrate the severity of the problems in Tennessee. In Campbell County,

Again, Mr. President, an Appalachian county—

the Ollic Creek Watershed, which provides drinking water for the community of La Follette, is being polluted by acid runoff from an abandoned mine site.

In Campbell and Fentress Counties—

I might say Fentress County has one of the lowest per capita incomes of almost any county in the United States.

abandoned mine sites are causing massive mud slides onto heavily traveled State and county roads. The siltation generated by runoff from mine sites throughout much of the Tennessee has created an ominous flooding threat for many communities.

Representative COOPER continues in his letter to Acting Director Christensen:

We understand your desire to use land reclamation funds as an incentive for the State of Tennessee to regain primacy. But while this dispute drags on, our scarred land continues to expose Tennesseans to health and safety risks. Like a child in a divorce case, our land is an innocent victim. We believe this unique problem demands a unique solution which removes health and safety risks and puts our miners back to work.

There are presently two Federal agencies which can provide much needed reclamation services in Tennessee. Both the Soil Conservation Service and the Tennessee Valley Authority possess the necessary expertise and experience to address priority reclamation sites in Tennessee.

Under title 30 of the United States Code, section 1232(g)(3), the Secretary of the Interior has the authority to work in conjunction with either the SCS or TVA to tackle at least a portion of Tennessee's mine reclamation needs.

Indeed, using either of these agencies to work on priority reclamation sites ensures that the objectives that the Abandoned Mine Reclamation Fund would be complete and that our constituents would be protected.

Relying on either of these two agencies in a limited manner to provide reclamation services in Tennessee would in no way undermine your negotiations with State government officials but would guarantee that the health and safety needs of Tennesseeans are no longer ignored.

We believe using a portion of the Secretary's discretionary reclamation funds either through the SCS or TVA presents a very attractive alternative to the present stalemate. We would like to discuss this proposal with you in more detail and request a meeting to explore this suggestion. We look forward to meeting with you in the near future to work out a solution to this troubled situation.

□ 1730

Well, Mr. Christensen was kind enough to meet with Congressman COOPER and I to discuss the situation in Tennessee. Now, let me add, Mr. President, from a personal point of view I found Mr. Christensen to be a rather likeable individual. He gave the impression of being genuinely concerned about the programs overseen by the Office of Surface Mining.

As we discussed the problems in Tennessee, Mr. Christensen generally recounted how we got into the situation in which we find ourselves. Unfortunately, we were unable to reach any agreement on moving ahead with reclamation efforts in Tennessee.

Mr. Christensen's sticking point was simple enough. As he saw it, the Office of Surface Mining has very little to entice the State of Tennessee to regain primacy, and having the State take regulatory control of the mining industry in Tennessee remains a top priority for Department of the Interior officials.

In short, money for reclamation efforts was the only carrot available to Mr. Christensen. As long as the State refused to take primacy, he would refuse to turn loose any reclamation money. The reclamation funds stood as an enticement for Tennessee to retake primacy over the mining industry.

Now, such a policy might hold a measure of appeal in a political environment, I suppose, but it totally ignores the regulatory guidelines the Office of Surface Mining set forth itself in October 1984. Let me just reiterate what was contained in that publishing of a final rule for reclamation operation under a Federal program for Tennessee:

The Office of Surface Mining "will conduct only limited reclamation efforts in the State addressing only the highest priority problems which threaten the public health and safety."

Thus it appears that the Office of Surface Mining is following two policies with regard to Tennessee, one published in the Federal Register in October 1984 which makes it clear that reclamation activity would continue in Tennessee despite the lack of primacy.

The second policy is not grounded in any regulation or law but is purely political in nature. The Office of Surface Mining views the Abandoned Mine Reclamation Fund as leverage to persuade Tennessee to regain primacy.

Now, it is clear that this second policy, this leverage policy, is the one that is operational in the State of Tennessee.

I have very serious reservations about an agency of the Federal Government publishing a policy in the Federal Register and then completely abandoning it to engage in political maneuvering. When the Office of Surface Mining stated on October 1, 1984, that "The Office of Surface Mining will conduct only limited reclamation efforts in the State addressing only the highest priorities which threaten the public health and safety," they committed themselves to a course of action on which the people of Tennessee should have been able to rely. This commitment has proved to be very shallow, indeed.

Now, some of my colleagues might be wondering if there are sites in Tennessee which meet the regulatory directive of highest priority problems. We will have plenty of time to fully catalog the wide spectrum of abandoned mine sites in Tennessee, I suspect, Mr. President. I will say at this point there are quite a few priority 1 abandoned sites throughout Tennessee. There are an even greater number of priority 2 sites.

Now, priority 1 sites are the highest priority sites except for sites that are declared emergency sites, and I note that the Federal Register does not stipulate that only emergency sites be acted upon. Indeed, I take the policy statement of October 1, 1984, to mean that priority 1 sites and perhaps even priority 2 sites could be acted upon if they are threatening the public health and safety. But I suppose I am getting ahead of myself, Mr. President. I have noted that the decision of the Office of Surface Mining to pursue a policy of no Federal reclamation activity in Tennessee violates the letter and the spirit of the policy set forth in the Federal Register on October 1, 1984.

This policy of inactivity also violates the letter and the spirit of the Surface Mining Act. Indeed, Mr. President, the very title of that act, the Surface Mining Control and Reclamation Act, underscores the importance of reclamation efforts. The findings of that act are worth noting as we consider the mandate of the Office of Surface Mining.

Section 201 of title 30 of the United States Code sets forth the congressional findings on this very important point. Among these findings are the following:

Section C. Many surface mining operations result in disturbances of surface areas that burden and adversely affect commerce and the public welfare by destroying or diminishing the utility of land for commercial, industrial, residential, recreational, agricultural and forestry purposes by causing erosion and landslides, by contributing to floods, by polluting the water—

as it has done in Campbell County, TN, where the people in La Follette have had their drinking water polluted by acid runoff from an abandoned mine site.

—by destroying fish and widlife habitats, by impairing natural beauty, by damaging the property of citizens, by creating hazards dangerous to life and property, by degrading the quality of life in local communities, and by counteracting governmental programs and efforts to conserve soil, water, and other natural resources.

Mr. President, if these abandoned sites in Tennessee do not qualify under this criteria, I do not know what does qualify.

Continuing on quoting the statute, the same code section, section 1201, title 30 of the United States Code, paragraph D:

The expansion of coal mining to meet the Nation's energy needs makes even more urgent the establishment of appropriate standards to minimize the damage to the environment and to productivity of the soil and to protect the health and safety of the public.

□ 1740

Again, in section 1202, paragraph 8, of title 30, setting forth the statement of purpose of the act, we find that the purpose of this chapter is to "establish a nationwide program to protect society and the environment from the adverse effects of surface coal mining operations."

Paragraph 8 of the same code section:

Promote the reclamation of mined areas left without adequate reclamation prior to August 3, 1977, and which continue in their unreclaimed condition, to substantially degrade the quality of the environment, prevent or damage the beneficial use of land or water resources, or endanger the health or safety of the public;

Mr. Christensen has decided that these findings and purposes, for some reason, do not apply to the State of Tennessee. I do not know why this distinguished State—the home of three Presidents of the United States, one of the first States to be admitted to the Union after the Original 13 Colonies—would not be entitled to the same protection of the law as the other 49 States.

Somehow, his actions suggest that the paramount concern in Tennessee is pressuring the State into retaking primacy. I might note that such a purpose is nowhere mentioned in the Surface Mining Act.

Let us take a look at the statutory guidelines for the Abandoned Mine Reclamation Fund for more specific insight into just what the Office of Surface Mining is supposed to be doing.

Section 1233 of title 30 sets forth the objectives of the abandoned mine reclamation fund as follows:

Expenditures of moneys from the fund on lands and water, eligible pursuant to section 1234 of this title, for the purposes of this subchapter shall reflect the following priorities in the order stated:

(1) The protection of public health, safety, general welfare and property from extreme danger of adverse effects of coal mining practices.

That is the No. 1 priority of the abandoned mine reclamation fund. It is "the protection of public health, safety, and general welfare."

How can you be cognizant of protecting the public health and ignore the fact that the people of LaFollette, TN, are having their drinking water polluted by acid runoff from mines which have not been adequately reclaimed? How can you sit in the Office of Surface Mining Reclamation Enforce-

ment, or how can the Secretary of the Interior sit in his office, and ignore this clear mandate of the statute? The purpose of the Abandoned Mine Land Act is, No. 1, the protection of public health, safety, and general welfare from the extreme danger of adverse effects of coal mining practices is abundantly clear. It appears to me that they ought to be coming forward voluntarily in trying to deal with these emergency situations.

The second paragraph of the act, setting forth the general purposes of the Abandoned Mine Land Act, states:

The protection of public health, safety, general welfare and property from adverse effects of coal mining practices.

Paragraph 3, setting forth the intent of the act:

The restoration of land and water resources and the environment previously degraded by the adverse effects of coal mining practices including measures for the conservation and development of soil, water, woodland, fish and wildlife, recreation resources and agricultural productivity.

I ask my colleagues: Are you adequately protecting fish and wildlife when you allow acid runoff from surface mines that have been abandoned, to pollute streams with acid, killing fish, killing wildlife, diriving it away?

Are you adequately conserving soil when you allow it to wash away, to erode, by refusing to take the appropriate reclamation measures following the surface mining operation?

Are you protecting the recreation resources when you allow surface mines that are eyesores, in addition to being dangerous, to exist adjacent to national recreation areas like the Big South Fork National Park, adjacent to the trails in that beautiful park?

Are you fulfilling your obligation under the act to restore agricultural productivity when you stand idly by and hide behind bureaucratic rules and regulations and allow the soil to wash away, to allow tailings and rocks from open surface mines to clog beautiful creeks in one of the most scenic areas of this beautiful United States of ours?

I submit that you are not doing your job, that you are not fulfilling your responsibility under the act, when you allow these degradations of our environment to occur.

□ 1750

Continuing on in the act, paragraph 4:

Research and demonstration projects relating to the development of surface mining reclamation and water quality control programs, methods, and techniques.

Oh, how we would like to have in Tennessee a research and demonstration project that would demonstrate to our people and our coal operators the proper development of surface mining reclamation and demonstrate ways and means that water quality control programs could be instituted, the methods and techniques for so doing. If we had it, there would be literally hundreds, of Tennesseans who live in Appalachia who would not be drinking polluted water today, much of it polluted as a result of surface mining operations.

Continuing on the reason for being of the Abandoned Mine Land Act in paragraph 5, it says:

The protection, repair, replacement, construction or enhancement of public facilities such as utilities, roads, recreation and conservation facilities adversely affected by coal mining practices.

Let me tell you a little story, Mr. President, that my colleagues might like to share. There is one road that leads through a portion of Fentress County to the county hospital. This is a road chiseled out of hilly terrain. Erosion caused by an abandoned surface mine, caused a massive mudslide down the mountainside with great force which knocked this road off the side of this small mountain.

The county, because of adverse financial circumstances, does not have the financial wherewithal to replace this road, to repair it adequately. So there are people who live in this Appalachian country who now cannot get to the hospital, if they need to go in a hurry because the ambulance or their automobiles, what few of them have automobiles, cannot traverse this road to the general hospital.

Would it not be marvelous if the Acting Director of the Office of Surface Mining would come forward and say to these individuals "This is an emergency, this is an emergency that qualifies and, fulfilling my responsibility as an appointed Federal official sworn to carry out the Constitution and the laws of the United States of America, I want to use these funds that we have taken from coal mining operators in the State of Tennessee, to come to your county and rebuild this road." This would mean that at least the folks in a portion of this county can get to town in an adequate period of time, can get to the hospital and not have to zigzag many, many miles over inadequate roads, some of which cannot be traversed in bad weather to try to get to the county hospital.

Well, continuing on with the Abandoned Mine Land Act, paragraph 6 reads:

The development of publicly-owned land adversely affected by coal mining practices including land acquired as provided in this subchapter for recreation and historic purposes, conservation, and reclamation purposes and open space benefits.

Section 1234 further defines eligible lands and waters as follows, beginning with the quote from section 1234 which further defines eligible lands and waters:

Lands and water eligible for reclamation or drainage abatement expenditures under this subchapter are those which were mined for coal or which were affected by such mine, wastebanks, coal processing or other coal mining processes, and abandoned or left in an adequate reclamation status prior to August 3, 1977, and for which there is no continuing reclamation responsibility under State or other Federal laws.

Now, as I pointed out earlier, this situation changes somewhat when a State loses primacy. However, after Tennessee gave up primacy, the Office of Surface Mining issued regulations on reclamation activities in Tennessee. Again, as pointed out earlier, these regulations are clearly designed with one objective in mind: meeting the objectives set forth in the Surface Mining Act. Although only limited reclamation activities are called for, it is clear from both the statutory language and the regulatory language that some reclamation is supposed to be going on in Tennessee.

Well, there is not any surface mining reclamation going on in the State of Tennessee at all. All we have are open sores and scars on the land left as a result of surface mining. All we have is the debris and tailings from these surface minings clogging our streams and our creeks and killing our fish and fouling our water.

(Mr. GRAMM assumed the chair.)

Mr. SASSER. We do not have any reclamation going on in my State of Tennessee. We have the Office of Surface Mining dangling a carrot in front of a sovereign State.

Mr. President, the founders of this country and those who wrote this Constitution held firmly to the convictions that States have certain rights as against the Federal Government. One reason the U.S. Senate was created by the framers of the Constitution, was so that each State, no matter what its size, no matter what its population, no matter what its wealth, would have two representatives to come into this national legislature and to protect the rights of that State and the rights of its citizens against abuse or against neglect by a Federal Government or coalition of other States.

And that is precisely, Mr. President, what I have the honor to be doing today for the State of Tennessee, to expose to my colleagues what I perceive to be the arbitrary actions of the Office of Surface Mining. This neglect of duty, if you will, is an effort to politisize a well-intentioned piece of legislation, the Abandoned Mine Land Act, which was designed by its framers, many of whom sit in this body today, to erase the scars of surface mining from our land and to provide adequate safeguards for the public health and the safety of our citizens in those areas where surface mining has taken place.

And in furtherance of this, funds, collected from coal mine operators by the Federal Government, 50 percent

of which to be reimbursed to the States. I submit, Mr. President, that the citizens of the State of Tennessee have paid this tariff or tax, indirect though it may be, on the coal being extracted from our State, their State, by virtue of higher electrical rates, as this same coal is used to power steam-fired electrical-generating facilities in the State of Tennessee and indeed the entire Tennessee Valley area.

□ 1800

And miners have labored at lower wages because funds have been taken from the profit that the operators make in selling the coal to fulfill their obligation under the law to fully fund the Abandoned Mine Land Act. And here we are today in the almost incomprehensible situation of over $5 million of funds that were owing to the State of Tennessee and collected from the coal operators of Tennesee. Indeed, over $14 million was collected from the coal operators, that we admit, and under the statute we were holding 50 percent and we got $2 million 2 years ago.

And here we are with our land being washed away, with our streams being polluted, with our roads being destroyed, mothers worrying about their children playing around the abandoned mine sites, and water being dammed up and suddenly rushing downstream.

After one severe rainfall near one of these abandoned mine sites, the dam broke and the water came rushing down, narrowly missing the house of an old gentleman who lived in this area all of his life, a man of humble means. But it did destroy his barn, knocked it flat, and destroyed many of his farm implements on this little hill farm where this man had worked, an elderly man who had worked as a strong yeoman in that region, tilling his land. He lost his barn, endangering his livelihood, because of a bureaucratic squabble between bureaucrats in the State government and in the Federal Government.

And because of the efforts of the Office of Surface Mining's Acting Director to try to dangle this carrot in front of the State of Tennessee, saying, "If you will back down, if you will concede, if you will retake primacy, then we will let you have what you are morally and legally entitled to in the first place."

Quite frankly, Mr. President, this is a carrot that has not worked and will not work. And the citizens of eastern Tennessee are paying the price for it on a daily basis.

Returning to this meeting between Congressman COOPER and the Acting Director, Mr. Christensen, and myself, Mr. Christensen feared that by authorizing any Federal reclamation efforts in Tennessee the State government would have no incentive to retake primacy.

How effective has this incentive to take primacy been over the past 2 years? If anything, there has been a hardening of attitudes on both sides, more determination by the State that it will not take primacy. The State claims it cannot work with these Federal bureaucrats. And we see more determination on the part of the Office of Surface Mining. They are not going to release any funds until the State takes primacy and until the State bureaucrats back down and do what the Federal bureaucrats want them to do.

So, the incentive has not worked to force the State to take primacy. Indeed, it has worked just in the reverse. Positions have become more hardened, attitudes have become more hostile, and still the State of Tennessee—again, using the example of a child in a divorce case—the State of Tennessee and its citizens continue to suffer through no fault of their own as a result of this quarrel between two rivaling sets of Government officials.

It is true that early on in this dispute the State of Tennessee did hold out hope that it would retake primacy. In a December 20, 1984, letter to the then Secretary of the Interior, Mr. Clark, Governor Alexander noted in that letter:

> Frankly, I see no gain whatsover in linking the resumption of funding of the Abandoned Mine Land Program to our progress with regaining primacy for the inspection and enforcement responsibility. Progress will be made quite independently of the status of the Abandoned Mine Land Program. I have stated that we intend to regain primacy as expeditiously as possible. I believe we have already demonstrated a good faith effort in this regard.

□ 1810

The Governor says in that letter that he sees no reason for linking the resumption of payments for land reclamation to the State regaining primacy—he just does not see any reason for that—and that the State is probably going to go ahead and regain primacy anyway.

That was at a time when there was obviously some hope that this whole matter would be resolved in a manner that was acceptable to the State, but since that occasion attitudes have hardened. And that chance has evaporated.

Well, similar signals were sent in 1985 as the State continued to move toward retaking primacy, exhorting the Office of Surface Mining to resume reclamation efforts in Tennessee. But as the State moved toward taking primacy, questions arose as to whether the Federal Government would allow the State to administer its own program. I thought we had an election in 1980, and in 1984. And one of the principal platforms of the party that won those Presidential elections is we want to return more responsibility back to the State government. We want to have a new partnership. We want a new federalism. And we do not want the Federal bureaucracy telling everybody how to run its business. This was the same administration that was going to do away with the Department of Energy and the Department of Education.

Yet, we find today that both of these agencies are still in being, going full blast, and we find here an example of the same arrogance by the Federal bureaucracy that this administration campaigned against so vigorously in 1980, and in 1984. Yet we have the Federal Government saying to the State of Tennessee, a sovereign State, "Yes, we are going to exact this tribute from your coal mine operators. We are going to bring it here to Washington. And if you do precisely what we tell you to do, we will let you have 50 percent of it back. But do not deviate one jot and tittle from our instructions because if you do, you do not get a dime's worth of your money back. We will just continue to take it."

That, in essence, is what we have here. Make no mistake about it. In 1985, the State of Tennessee moved toward retaking primacy in an effort to try to comply with Federal dictates, and questions arose as to whether the Federal Government would allow the State to administer its own program. This is the administration that is going to get Government off your backs. I wonder if my colleagues who are listening to this, and there may be a few, would agree with the administration in this instance has taken Government off the backs of the people in the coal mining areas of the State of Tennessee.

Even though this State was moving in the direction that it thought the Federal Government wanted to, questions began to arise as to whether the Federal Government would even allow the State to administer its own program. Many State officials feared they would be right back where they were at the time the Governor requested a restitution of the State's statutory control over the mining industry. The prospect of continued Federal involvement in the State's management of the mining industry dampened, diminished, killed, and finally extinguished any enthusiasm which may have existed for retaining primacy.

So the State of Tennessee did not retake primacy in 1984 or 1985. It was my impression, and that of the distinguished Congressman from the State of Tennessee, the Honorable JIM COOPER, that the State would again fail to retake primacy in 1986.

We conveyed this to Mr. Christensen in our meeting with him in my office. I said:

Mr. Acting Director, quite frankly, I do not see any hope that the State is going to take primacy here. That is out of my hands, Mr. Acting Director, and quite frankly it is out of yours. But I do think we have an obligation as public officials between us to try to fashion some arrangement, and some method whereby we could curtail the ravages of the land that is taking place in the eastern part of Tennessee.

Well, I suppose, hope springs eternal in the human breast. He replied he was still hoping for action by the Governor, and by the State legislature on the question of primacy, even though every signal we were getting was that the State would not retake primacy. Well, Mr. Christensen did get some action, but it was not what he was looking for. On March 5, of this year, Governor Alexander wrote Secretary Hodel the following letter. He said:

DEAR DON: I'm writing to let you know that State government will not try to take back from the Federal Government the responsibility for regulating surface mining in the State of Tennessee. That is not the result that I had hoped for, nor is it the solution you want. But after struggling with the issue for a year, it is the only sensible solution.

Governor Alexander went on to tell the Secretary of the Interior this, and it is amusing. He said:

There is a single obstacle with our taking over the program. It is Federal oversight. It is a case of too many cooks stirring the pot. Even if we take over the regulation of surface mining, Federal officials still look over our shoulder, and in effect redo what we have done.

Well, so much for getting the Government off the backs of the people, and so much for the new federalism as this Republican Governor throws up his hands and says I give up.

He continues on in his letter talking about the Federal Government redoing what the State government would do. He says:

That is a waste of money. It is inefficient. It delays the legitimate mining operations.

The Governor continues in his letter to the Secretary of the Interior:

If Tennessee could assume the responsibility, and really assume it as we do with the regulation of air pollution, for example, then we would much prefer to have a State program instead of a Federal program.

But as long as the Federal Government insists on running the program while we are running the program, there is no need for us to try to take it over.

□ 1820

That is a communication between the Governor of Tennessee and the Secretary of the Interior on the whole question of who is going to have the responsibility for reclaiming land devastated by surface mining in the State of Tennessee.

Well, what is exactly going on in Tennessee with regard to primacy? We know what is going on with regard to land that was washed away. We know what is going on with regard to water, which continues to be polluted. We know what is going on with wildlife and fish. They are continuing to be poisoned. We know what is going on with the citizens. They continue to live in jeopardy as their houses are washed away, their small children facing the risk of falling into the abandoned mine sites, being seriously injured or worse.

But what else is going on? The Knoxville Journal reports on May 7, 1986, a headline story: "State Sues Interior To Free Up Mine Reclamation Fund." The byline is by Phil Jurik, with the dateline of Nashville, TN.

The State sued the United States Department of Interior Tuesday for money snagged in the long-running suit over who should protect Tennessee's environment against abandoned mine contaminants. Citing four examples of dire need in East Tennessee, State Attorney General Mike Cody alleged the Department is breaking the law and asked that a Federal judge force—

Talking about the Department of Interior—

Federal judge force it to free up coal mine reclamation money.

The attorney general for the State of Tennessee, Mr. Cody, is, I might say, Mr. President, a very distinguished attorney with a distinguished career in private practice in Memphis, TN, for a great number of years; a distinguished career as U.S. attorney for the western district of Tennessee, and selected by the Tennessee Supreme Court to serve as attorney general for the State of Tennessee. Mr. Cody is quoted as having said in this news article:

We allege the Interior Secretary is abusing his discretion by treating Tennessee in an arbitrary fashion that contravenes congressional requirements.

Continuing the story:

Congress provided that the Interior Department, when disbursing funds, should consider need and where the money came from, Cody said, adding that Tennessee coal mine operators sunk $15 million into the reclamation fund. As for need, he said, the Department itself has classified three Tennessee projects as priority 1, and 184 as priority 2. Cody listed four critical projects that remain unfunded. They are, Morgan County, heavy sediment runoff from abandoned mines has caused previous flooding and poses an imminent flash flood hazard for the residents of the Petros community.

I might add, Mr. President, Petros is also the location of the Brushy Mountain maximum security penitentiary. It is rugged territory. Very few individuals ever escape from that penitentiary. But there are worthy citizens living in that vicinity who do not need to be exposed to the imminent flash flood hazards described in this newspaper article.

To continue on with the article naming the counties where there are four critical projects.

Scott County: runoff from coal mine site, contaminates the wells providing drinking water for two Anderson Mountain families.

I wonder what those mountain families do when that coal mine water poisons their wells. It would be interesting to know how far those people have to go on Anderson Mountain to get clean, wholesome water as a result of these mine sites contaminating their well water.

Continuing on:

Fentress County: a landslide in Double Top has destroyed portions of the country road, requiring residents of a Pickett County community to detour 30 miles in order to reach the nearest hospital.

Well, I certainly hope nobody has a coronary in that community and needs to get to the hospital quickly. I certainly hope no child has a serious, life-threatening accident in which time is of the essence in seeking medical treatment. Since the landslide destroyed the road there in Double Top, it is going to take additional time to get to the hospital. So we certainly wish them good health there in that community, because they cannot count on speedy access to medical treatment.

The county government in that county does not have the funds to repair it.

To continue on with the article:

Campbell County: a toxic spoil area contains two reservoirs supplying utility water to the sites in the city of LaFollette.

I do not remember precisely, Mr. President, the population of the city of LaFollette. I have been there many, many times. I have many dear friends in that community. They are sturdy, self-reliant people who ask for no help from anyone.

But they are entitled to some help to see that they get wholesome drinking water because the funds do not exist in that county to restructure that reservoir in such a way that the utility water will be wholesome and not dangerous to health.

□ 1830

Continuing with the news article:

Tennessee lost its mine regulatory program in 1984 when the Interior Department cited inspection and enforcement problems and withdrew its approval.

Governor Lamar Alexander announced in March that he would not try to regain that responsibility, complaining of too much Federal oversight.

Interior officials contend they can withhold the funds—even those collected from Tennessee coal operators—unless the State has an approved program, which requires regulatory duties.

Mr. President, is that the philosophy of this administration? I thought we were talking about a new federalism. I thought we were talking about returning responsibility back to the grassroots. I thought we were talking about moving away from rules and regula-

tions, put together in reams of volumes by a dictatorial and insensitive and arbitrary Federal bureaucracy.

I thought I heard those issues discussed in the campaigns of 1980 and 1984 by the present occupant of the White House. I thought I heard that discussed by many of my distinguished colleagues, whom I respect and whose friendship I value, from the other side of the aisle during the campaigns of the last few years.

But here we have a newspaper account, written by a respected journalist in a distinguished newspaper, which reports that:

Interior officials contend they can withhold funds—even those collected from Tennessee coal operators—unless the State had an approved program, which requires regulatory duties.

Why, my word. That smacks of the bureaucracy of Great Society days. I thought we were going to repeal all that. I thought we were going to move away from all that. It appears that we are right back where we started, that there has been no change at all. If anything, the bureaucracy appears to be becoming more arbitrary, more dictatorial. Well, so much for the campaign rhetoric and campaign promises of recent years.

Returning to the newspaper article, it quotes George Miller, of the Department of the Interior's Knoxville Office of Surface Mining. It says:

George Miller of the Interior's Knoxville Office of Surface Mining said Tuesday, "This is stated clearly in the law. I am not going to comment on the merits of the (suit)."

What he is saying is stated clearly in the law is that Interior officials can withhold mine reclamation funds from the State of Tennessee unless the State of Tennessee complies explicitly with what the Office of Surface Mining wants them to do.

The article goes on to quote the attorney general of the State of Tennessee further:

Cody argued that Interior officials have arbitrarily spent discretionary funds in at least eight States that don't have approved programs.

Well, now, Mr. President, if that contention is true—and I do not know if it is, but I do know that the official and the distinguished attorney general who has quoted him would not utter those words if he did not think they were true. If that is the case, why would the State of Tennessee be discriminated against? Why would eight other States have access to discretionary funds and the State of Tennessee not have them?

What have we done in the State of Tennessee to offend these czars who sit in the Office of Surface Mining? It must have been a grievous affront indeed for them to arbitrarily withhold funds from the State of Tennessee when they had spent discretionary funds for at least eight States that do not have approved programs.

Well, continuing with the newspaper acticle, it says:

Environmental groups expressed concern when the State dropped its enforcement program, but have been more critical of Interior officials. "We support the suit," Mayo Taylor of the Tennessee Environmental Council said. "I think it's reprehensible that a Federal agency is holding funds hostage to coerce the State to take over a program."

That is how the citizens of the State of Tennessee view this whole controversy. The Governor of the State of Tennessee, cannot be accused of being any enemy of this administration—he supported this administration with all of his might in 1980 and 1984 when this President was campaigning for election and reelection. The former U.S. attorney, who is now the State attorney general of the State of Tennessee, cannot be accused of being an enemy of this administration. And certainly, the Tennessee Environmental Council has no ax to grind except wishing to see corrected the damage that is occurring on a daily basis in the beautiful hills and mountains and rolling valleys of eastern Tennessee. The head of the Tennessee Environmental Council says:

I think it's reprehensible that a Federal agency is holding funds hostage to coerce the State to take over a program.

Is that not shocking, that a responsible citizen heading a responsible group would believe that an agency of his Government is seeking to coerce his State government by holding hostage funds taken from the citizens of his State?

Finally, finishing the article, Mr. President:

Tennessee has 42,462 acres of unreclaimed surface coal mining land, the suit said, including eight clogged streams and six cases of polluted water for human consumption.

I must confess that this continued refusal of the Office of Surface Mining to give the State of Tennessee any relief at all is completely baffling. It is baffling to me to know what the real policy of the Office of Surface Mining is. I have been led to believe that the refusal to spend reclamation funds in Tennessee reflected a desire to force the State to retake primacy. What policy is at work now that it is clear that Tennessee will not retake primacy.

□ 1840

What good is served if that individual seeking to be enticed had indicated it is no enticement whatsoever. And whatever new labels are patched on to this approach, it is clear that what is being pursued in Tennessee is a policy of neglect, a policy of continuing to allow our land to be destroyed—some 42,462 acres of unreclaimed surface mining land are in the State of Tennessee. These sites bring all the acid and filth and trailings filling up streams and killing fish abandoned mines entail.

Mr. President, I have spent some time discussing how we came to this policy of neglect in the State of Tennessee. I would like now to shift my focus—and I have discussed it briefly, but I am going to discuss it at considerable length—to the effects of this policy of neglect on my State and its people. My primary concern in this whole debate is for the people of my State and for the land in our State. If this situation were reversed and the distinguished manager of this nomination were standing in my shoes and were this situation to be present in his native State of Idaho, I have no doubt that he would be standing here this evening just as I stand seeking to defend the rights and interests of his State and of his constituents.

We in the State of Tennessee have been placed in a terrible predicament by the inactivity of the Office of Surface Mining. But to completely understand this situation, we must first explore the nature of the mineral and mining industry in our great State. I say to my distinguished friend from Idaho that Tennessee is a State blessed with many mineral resources. The Tennessee Statistical Abstract for 1984-85 provides a very good overview of the mineral riches of the great Volunteer State.

Among the minerals found in Tennessee are barite, common clay, coal, copper ore, limestone, beautiful Tennessee marble, petroleum, natural gas, phosphate rock, silica sand, zinc ore, sand and gravel. We have been greatly blessed with the resources available in our State. Indeed, the country is blessed by these resources.

And in addition to these minerals, we have facilities in Tennessee for aluminum production brought there by the enormous electrical-generating capability of the Tennessee Valley Authority, which has been such a boon to the whole Tennessee Valley region for now almost 50 years. We have facilities for cement production, copper plants, glass plants, lime plants, petroleum production, titanium plants, and zinc plants.

These minerals have played an increasingly important role in Tennessee's economy. The value of production of certain nonfuel minerals in Tennessee stood at $88 million in 1950. By 1981, the production value of these same minerals increased by $417 million. But of interest to us here today is the coal industry.

Now, coal mining has long been central to the health of the Tennessee economy, and that is true of a number of other States adjacent to Tennessee, through which the Appalachian Mountains run. Coal mining is essential to portions of the State of Ken-

tucky; coal mining is important in some areas of Virginia. But many Tennessee counties are now or at one time were totally dependent on the coal mining industry.

Interestingly enough, Mr. President, even though we have seen a drop in the number of coal mines in Tennessee over the past 20 years, the overall production, while going through ups and downs, has tended to increase. For example, in 1960 there were 332 underground coal mines and 83 surface mines in Tennessee. They were mining bituminous coal. Now, these 415 mines produced a total of 5,932,000 tons of coal. That is a lot of coal. Of this amount, 3,939,000 tons came from underground production while 1,892,000 tons came from surface mines. In 1982 the number of underground coal mines in Tennessee had dropped to 51, but these 51 mines produced over 4.5 million tons of coal. And the number of surface mines dropped to 54 in 1982. But conversely, production increased to 2,769,000 tons. So thus, overall production of coal in Tennessee stood at 7,287,000 tons for 1982.

The average value per ton for coal mined in Tennessee has also increased. For example, in 1960, the average value per ton stood at $3.57, but by 1982 the average value per ton was $29.49. Now, this price increase was driven to some extent by inflation. These dollars are nominal dollars. They are not dollars corrected for inflation. And they were driven also by energy prices as we went through the two oil shocks of the 1970's.

As we realized that our oil resources were not infinite, we then began to turn to coal as an alternative fuel. And well we should have, because although our oil capacity is limited to decades, our coal capacity is measured in centuries. Coal and new technology for extracting the energy from coal is in large measure I think the wave of the future. Some would say that with oil prices declining precipitously as they are that the bloom is off of coal at least temporarily.

□ 1850

However, I might say for the benefit of the distinguished occupant of the chair (Mr. GRAMM) that, in my view, this decline in oil prices is short lived. In the not too distant future, I think we will see an upturn in oil prices. Perhaps not within 6 months, but within the year, certainly 2 years, I would not be surprised to see oil prices return to their previous levels.

So there is hope for the distressed financial institutions that operate in the oil patch. I hope that those who explore for oil, can hold on or will hold on until prices turn around. I think it would be most unfortunate if we in this country once again became hooked on Middle Eastern oil as a result of what I perceive to be a short-run turndown in oil prices.

The coal mine industry in Tennessee has been producing more coal over the years. The price for the average ton of coal has gone up. But I would not conclude from that that the coal industry in Tennessee is robust.

In fact, quite the contrary is the case.

As I noted earlier in my statement, many mine operations in Tennessee have shut down and many miners are out of work. I referred a moment ago to Campbell County, TN, and Scott County, TN. These counties are traditionally running unemployment rates at 20 percent. Maybe 1 month it will be 18 percent, the next month 21 percent. But unemployment rates are staggering in these counties.

As recently as 1972, we had some 211 coal mines in Tennessee, producing over 11 million tons of coal.

So, as my colleagues can see, we have been going through some tough times in our coal mining communities in Tennessee.

I can sympathize with the distinguished occupant of the chair over trials and travails of those who work in the oil patch of Texas and other petroleum-producing States. The roughnecks are out of work. Drillers are going bankrupt. The banks are in distress. We have seen that in our coal country in Tennessee heretofore. Thus, as my colleagues can see, we have been having tough times in the coal mining country for a while.

Again using the Tennessee Statistical Abstract, we can get a good overview of how important coal mining is to select counties in Tennessee.

In Anderson County, TN, in 1982, there were some 23 coal mines—16 underground mines and 7 surface mines. These mines in Anderson County produced about 1.3 million tons of coal.

In Campbell County, TN, there are 23 coal mines. Here we had 12 underground mines and 11 surface mines in 1982. These mines produced some 1.6 million tons of coal in 1982.

Claiborne County, TN, had three underground mines in 1982 and four surface mines. These were particularly productive mines, from which 1.3 million tons of coal were extracted.

Also in 1982 there were 19 mines in Scott County—4 underground mines and 15 surface mines. Scott County, as I indicated previously, is the home county of our distinguished former majority leader, Howard Baker, who we all hold in high esteem. In total, these Scott County mines produced about 1 million tons of coal. To be precise, 802,000 tons of coal came out of Scott County mines.

These mines represent just a sample of the areas in Tennessee which are dependent upon coal for their livelihood. The pattern in Tennessee is repeated throughout many Southeastern States.

Yet, to be candid about it, Tennessee ranks behind many of its neighboring Southeastern States in coal mining activity

The State of Kentucky, as our distinguished friends representing that State will point out, is the leading producer of coal in our region—based on 1982 figures. The 1,340 mines in Kentucky produced nearly 150 million tons of coal in that year.

West Virginia runs a very close second, as its 784 mines produced nearly 130 million tons of coal in 1982.

Throughout the Southeast, these mining operations mean jobs. They mean jobs for the miners. They mean prosperity for the little mining towns. The average number of coal miners working daily in the State of Tennessee was slightly over 2,000 in 1982. But, by comparison, almost 16,500 miners worked daily in the Commonwealth of Kentucky in 1982; and in West Virginia—wild, wonderful West Virginia—the average number of miners working daily stood at 7,371 for that year.

□ 1900

So it is no wonder that the distinguished Senators from West Virginia take this floor with such vigor to protect the interests and the health not only of the miners who work these mines but also the economic health of the coal mine operators themselves.

In looking at all the Southeastern States active in coal mining in 1982, we see a total of 75,870 miners were employed on a daily basis.

Now, Mr. President, mining has meant so much to the citizens of Tennessee and other Southeastern States. The coal industry has brought jobs to many areas where employment opportunities are limited.

But I would say to my colleagues, who I know are hanging on my every word here, that mining is not without its problems. Often companies would finish mining an area and simply move out of the mine site. The land would be left scarred, barren, exposed to the ravages of nature. And, Mr. President, these lands came to be known as abandoned or orphaned mine sites.

The Tennessee Valley Authority has prepared an excellent status report on abandoned mine sites in Tennessee entitled "Orphans of the Valley."

Mr. President, if time permits, later on I intend to read this excellent publication prepared by the Tennessee Valley Authority because I am confident that many would benefit substantially from the information contained in there. It is an excellent overview, but I will withhold from reading this excellent publication at the present time.

Suffice to say that these abandoned mine sites pose serious health and safety risks as well as environmental risks.

The greatest environmental problem on exposed unvegetated mine sites is erosion. According to an Environmental Protection Agency study, annual sediment load from abandoned mine lands is about 2,400 tons per square mile per year. This is roughly 100 times higher yield of sediment than from an unmined forest watershed.

This runoff leads to many problems. Silt and sediment alters the chemical balance of the water and buries aquatic organisms, alters feeding and spawning habits and suffocates fish by coating their gills, according to a 1980 study on coal mining and water quality conducted by the Tennessee Valley Authority.

A moment ago when I was discussing the danger to fish and wildlife of the pollution from the open surface mines running into the streams, I suspect some of my colleagues wondered then how in the world could water or runoff from the coal mine kill fish. Very simple: it buries the aquatic organisms that the fish feed on and the runoff in what a chemist would call a colloidal state attaches itself to the coating of the gills of the fish. There is such a strong biochemical attraction that the gills are incapable of intaking the dissolved oxygen in the water. As a result, those fish that do not die of starvation, as a result of aquatic organisms being buried, are suffocated.

Now, the sediment poses a serious flooding threat for many rural Tennessee counties. You might ask how could this happen. It is simple enough, Mr. President. As the sediment is carried off the abandoned sites by rainfall it tends to eventually flow into existing stream systems. The sediment and the silt then begin to settle to the bottom of the existing stream. As this process is repeated, over time, you gradually see it filling in a stream bed. You might call it, Mr. President, arteriosclerosis of a mountain stream because they fill and clog such as the arteries of an aged individual.

As a stream bed fills in, the tendency for the creek to overflow its banks increases dramatically.

As I will discuss in a few moments, Mr. President, precisely this condition is occurring throughout many counties in the State of Tennessee. Sediment damage also extends to hydroelectric units and water supply systems. Operating such systems is hampered as treatment costs increase to handle the added sediment in the water supply.

Furthermore, the presence of silt causes excessive wear on equipment, through abrasion, clogging, and covering of intake pipes.

□ 1910

Mr. McCLURE. Mr. President, will the Senator yield for a question?

Mr. SASSER. Mr. President, I will yield to the distinguished Senator from Idaho only on the condition that I do not lose my right to the floor and that the resumption of my remarks will not be considered a second speech for the purposes of the two-speech rule; if the Senator is agreeable to that.

Mr. McCLURE. I have no objection.

The PRESIDING OFFICER (Mr. MATTINGLY). Without objection, it is so ordered.

The Senator from Idaho.

Mr. McCLURE. Mr. President, I was going to suggest to the Senator from Tennessee that we have a very brief quorum call, during which we can discuss the matter and the Senator can make whatever contacts he needs to make with respect to that discussion.

I ask unanimous consent that it be in order to have a quorum call for not to exceed 15 minutes and, at the end of that quorum call, the Senator from Tennessee would be recognized for the resumption of his discussion without losing his right to the floor and without it being considered a second speech.

The PRESIDING OFFICER. The Chair would advise that it is impossible to have a quorum call limited to a time.

Mr. McCLURE. Mr. President, let me ask the Senator from Tennessee, then, if we have a quorum call under the conditions outlined without the time limit, if the Senator would not object to the lifting of the quorum call 15 minutes from the beginning of the quorum call.

Mr. SASSER. It would be perfectly agreeable to me. I would not object to lifting the quorum call at the end of 15 minutes.

Mr. McCLURE. Mr. President, I make that request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

□ 1930

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SASSER. Mr. President, I think under the previous agreement I will be recognized.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. SASSER. Mr. President, I have been discussing this very vexing problem with the distinguished chairman of the committee. We have discussed this at some length. The chairman has indicated a willingness, for which I am very grateful, to attempt to reach an accommodation which will be in the best interest of all parties, the State of Tennessee, the citizens of Tennessee, and the Office of Surface Mining.

As I understand it, the chairman, the distinguished manager, has indicated that the Office of Surface Mining will commit to $1 million in discretionary funds for mine reclamation in Tennessee in 1986 that will match $1 million that the State of Tennessee has already appropriated for a mine reclamation program.

Second, the Office of Surface Mining will commit to match dollar for dollar any funds appropriated by the State of Tennessee in mine reclamation efforts in 1987.

The distinguished manager of the bill has indicated that a letter from the Acting Director of the Office of Surface Mining, Mr. Christensen, will be forthcoming tomorrow, outlining this agreement.

May we have order, Mr. President?

The PRESIDING OFFICER. The Senate will be in order.

Mr. SASSER. That letter will outline this agreement and indicating that the Office of Surface Mining will effectively carry it out.

The distinguished manager has also indicated, and for this I am most grateful, that in the event, which we both, I think, agree is unlikely, that the Office of Surface Mining should fail to meet these obligations, that the distinguished manager in his capacity as chairman of the Interior Subcommittee on Appropriations and as chairman of the Energy Committee, would earmark sufficient funds to carry out the agreement that has been reached here this evening.

I yield to my distinguished friend from Idaho, without losing my right to the floor, as to the consummation of this agreement or as to a restatement.

Mr. McCLURE. Mr. President, I thank the Senator for yielding.

The Senator does state it correctly. Let me, if I may, without abusing the conditions under which the Senator yielded to me, express the concern that Mr. Christensen and the Department of the Interior had that the State of Tennessee has elected not to resume primacy under the program, and certainly under the statute neither the Secretary nor we have the right to require that the State resume primacy. But the problem that we confront right now, under the law that governs this program, is the State is not entitled to the State's share of the funds unless they are administering directly the program, and that the only moneys that are available are in the discretionary funds of the Secretary under the statute.

I do have what I think is a binding commitment from Mr. Christensen to use of those discretionary funds the amount that would be necessary to meet the commitment as outlined by the distinguished Senator from Tennessee.

□ 1940

I am confident that Mr. Christensen will carry out that commitment, but I am very happy to say that that confidence makes it very easy for me to give the assurance that, indeed, we shall get a letter from him that says that. We shall make it a matter of record when we receive it, and in the very unlikely event that we should fail either to get the letter of follow through on that commitment, I shall indeed do my utmost as chairman of the Interior related subcommittee to carry forth the commitment as outlined: $1 million to match $1 million that has already been appropriated by the State of Tennessee and a one-for-one, dollar-for-dollar matching during next year of that same source of funds for an appropriate program, for the expenditure on an appropriate program within the State of Tennessee.

I think that is the best we can do. I hope in that period of time that the State will have been able to work out its questions with respect to whether or not they can administer a program. I know the Senator from Tennessee may have his own opinion about whether that is good or bad, and I do not mean to make that statement in any way to prejudice the Senator's position. I am stating my own.

I think the State of Tennessee would be better able ultimately in carrying out the statute, to qualify for the State's share of the reclamation fund, which under the statute is possible only if they are administering that program.

I am very happy to respond very affirmatively to my friend from Tennessee that indeed, we will carry out that agreement as outlined.

Mr. SASSER. Mr. President, I thank my able friend from Idaho. Let me say to my distinguished friend that we have no disagreement as to the unfortunate circumstances that occurred by the State of Tennessee relinquishing primacy. It is my view that that was an unfortunate and a perhaps unwise decision on the part of the State of Tennessee. I quite frankly am at a loss as to why that situation occurred.

As a result of the State's surrendering primacy, what we see here is 1 million dollars' worth of State funds being used to do the work that Federal funds were available to do, had the State of Tennessee assumed its obligation to take primacy. What we have done here in a meeting of the minds with the distinguished manager is try to put together a program to repair the damage done to the State of Tennessee. We are doing as much as can be done under the present strictures of the law.

So, as far as I am concerned, Mr. President, I say to my distinguished friend from Idaho, that settles the matter this evening. I thank him for his courtesy and his forbearance and I know that he understands this is a matter about which I feel very strongly. It is a matter that affects the environment of my State and, indeed, the public health and safety of its citizens.

For that reason, I discommoded the distinguished manager and, I am sure, many of my colleagues who are sitting in their offices this evening listening to this over their boxes. For that I apologize, but it was necessary.

I yield the floor to the distinguished manager.

Mr. McCLURE. Mr. President, I strongly support the nomination of Jed D. Christensen to be the Director for the Office of Surface Mining Reclamation and Enforcement [OSMRE]. This is an outstanding nomination by the President which will bring a man of demonstrated abilities to one of the most difficult and thankless positions in the Department. Mr. Christensen has complied with all requirements of the Senate and the Committee on Energy and Natural Resources. He appeared before the committee on March 7, 1986, and responded fully and forthrightly to all questions asked of him. The committee considered his nomination in an open business meeting on March 26, 1986, and ordered the nomination favorably reported to the Senate.

Mr. President, there has been an enormous amount of controversy surrounding the activities of the Office of Surface Mining Reclamation and Enforcement. Mr. Christensen has, I believe, done an outstanding job during his tenure as acting Director of that office. He has worked with Congress and has always been responsive to its questions and concerns. I deeply regret, however, that some wish to vent their frustrations at the almost impossible task of managing that office. Nevertheless, I believe he is far and away our best hope of achieving improvements.

Mr. President, all is not well with the OSMRE but I believe that progress is being made and I believe that further progress is assured under the leadership of Mr. Christensen. Therefore, Mr. President, I urge my colleagues to join me in supporting the confirmation of his nomination.

I ask unanimous consent that two letters in support of Mr. Christensen be printed at this point in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

PUBLIC SERVICE COMMISSION,
STATE OF NORTH DAKOTA,
Bismarck, ND, February 5, 1986.

Hon. JAMES MCCLURE,
Chairman, Senate Energy Committee, Washington, DC.

DEAR SENATOR MCCLURE: The Public Service Commission is the State Regulatory Authority for North Dakota with respect to regulating the surface coal mining industry and reclaiming abandoned mine sites as required by Public Law 95-87 (The Surface Mine Control and Reclamation Act of 1977). We wish to support the nomination of Jed D. Christensen as Director of the Office of Surface Mining Reclamation and Enforcement.

Three of OSM's most pressing needs are leadership stability, the development of a sound management structure, and implementation of those structural reforms. Our experience with Mr. Christensen over the last several months in his capacity as Acting Director is that he is bringing leadership to the Agency and is currently refining a Management Action Plan which, when implemented, should bring about substantial improvements in OSM's performance and effectiveness.

We hope the Senate will take timely action on Mr. Christensen's nomination.

Sincerely,

LEO M. REINBOLD,
President.
DALE V. SANDSTROM,
Commissioner.
BRUCE HAGEN,
Commissioner.

INTERSTATE MINING COMPACT,
Lexington, KY, February 13, 1986.

Hon. JAMES A. MCCLURE,
Senate Dirksen Office Building, Washington, DC.

DEAR SENATOR MCCLURE: In the near future Mr. Jed Christensen will come before the Senate Committee on Energy and Natural Resources for confirmation as Director of the Office of Surface Mining (OSM).

Since Richard Harris left the directorship in March 1984, OSM has had a succession of acting directors; a total of five. In the absence of a permanent director, OSM has been unable to develop a program that gives the states a clear and evenhanded direction.

For the past few months, Jed Christensen has been Acting Director and in that capacity has demonstrated an extraordinary understanding of the problems within the Agency. Jed is dedicated to the task of developing a federal program that will vigorously follow the Congressional mandate in Public Law 95-87, of a sound and effective state enforcement program and an evenhanded federal oversight policy.

The Interstate Mining Compact Commission (IMCC) is composed of the governors of 17 states, 15 of which mine approximately eighty-five percent of this nations' coal and within their borders have over ninety-five percent of the abandoned mine lands. The IMCC unanimously requests an early confirmation of Jed Christensen as Director of OSM. Such a move will help stabilize the state/federal reclamation program, and will allow the states to continue their work in an orderly manner.

Sincerely,

KENES C. BOWLING,
Executive Director.

Mr. McCLURE. Mr. President, I know of no others who wish to speak on this nomination and I know of no

request for a rollcall with respect to the nomination. In order that people might be advised, before we call for the vote, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

□ 1945

Mr. McCLURE. Mr. President, I ask unanimous consent that further proceedings under the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, a quick check indicates that there are no requests for others to come and speak on this nomination. I, therefore, ask the Chair to put the question.

The PRESIDING OFFICER. The question is on agreeing to the nomination.

Without objection, the nomination is confirmed.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, I ask unanimous consent that the President be immediately notified of the action of the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. McCLURE. Mr. President, I ask unanimous consent that the Senate now return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that further proceedings under the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. DOLE. Mr. President, I think I am prepared to announce there will be no more votes this evening. There could be rollcall votes tomorrow. There could be a vote on the veto, if the President vetoes the disapproval resolution on the Saudi arms sale. There could be votes on the safe drinking water conference report and maybe other rollcall votes tomorrow, so there will be rollcall votes tomorrow.

It would still be my hope that we could at least start the supplemental tomorrow, if the distinguished Senator from Montana [Mr. MELCHER] will let us proceed on that, assuming we could satisfy many of the concerns he and other Senators have in regard to the supplemental appropriations bill. So we will also try to do that tomorrow.

BUDGET ACT WAIVER

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate now turn to Senate Resolution 410, the budget waiver to accompany the conference report on H.R. 2672.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The legislative clerk read as follows:

A resolution (S. Res. 410) waiving section 303(a) of the Congressional Budget Act of 1974 with respect to consideration of the conference report on H.R. 2672.

The Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the Budget Act waiver.

The resolution (S. Res. 410) was agreed to as follows:

S. RES. 410

Resolved, That, pursuant to section 303(a) of the Congressional Budget Act of 1974, section 303(a) of that Act be waived with respect to the consideration of the Conference Report on H.R. 2672, the Federal Employee's Retirement System Act of 1986, a bill to provide supplemental retirement benefits for employees of the federal civilian service who are covered by Social Security as mandated by the Social Security Amendments of 1983.

H.R. 2672 would violate section 303(a) of the Congressional Budget Act of 1974 because the bill provides new entitlement authority to become effective during fiscal year 1987 and would result in a change in revenues effective during fiscal year 1987, before the first concurrent resolution on the budget for fiscal year 1987 has been agreed to.

The budget authority provided in H.R. 2672 authorizes contributions from the employee and the employing agency to the pension system to fund future retirement benefits and authorizes the payment of entitlement benefits to individuals qualifying for such benefits under the provisions of H.R. 2672.

FEDERAL EMPLOYEES RETIREMENT SYSTEM ACT OF 1986—CONFERENCE REPORT

Mr. DOLE. Mr. President, I ask unanimous consent the Senate now turn to the conference report to accompany H.R. 2672, the Federal Employees Retirement System Act of 1986.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2672) to redesignate the New York International and Bulk Mail Center in Jersey City, New Jersey, as the "New Jersey International and Bulk Mail Center," and to honor the memory of a former postal employee by dedicating a portion of a street at the New York International and Bulk Mail Center in Jersey City, New Jersey, as "Michael McDermott Place," having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of May 19, 1986.)

Mr. ROTH. Mr. President, it has been 7 years since the Senate first began hearings on a new retirement system to replace the expensive and outdated pension plan that has existed since 1920. Today, I am pleased to bring before the Senate, the conference report on H.R. 2672, the Federal Employees' Retirement Act of 1986 which enjoys the full support of the House and Senate conferees and the administration.

It is crucial that the Congress move to adopt this legislation swiftly. Time has run out for the interim legislation that was enacted after Social Security began covering new employees hired beginning January 1984. As of April 30, some individuals have had an additional 5.7 percent taken from their paychecks to pay for the unnecessary double coverage of Social Security and the current civil service retirement plan. This conference report will end that double coverage and refund the 5.7 percent back to the employees.

On November 7 of last year, the Senate voted 99-1 for a three-tier retirement plan developed by the Governmental Affairs Committee. That structure has been preserved in the conference report at a cost far below the outdated current system and in addition results in an immediate reduction in the fiscal year 1987 deficit of $300 million.

The new Federal employees' retirement system is composed of a Social Security benefit, a defined benefit plan structured after the current pension plan, and an employer-matched, tax deferral thrift savings fund that allows employees career flexibility and planning that private sector and State employees have enjoyed for years. H.R. 2672 does not alter that current retirement system benefits, but does allow enrollees of the present system to invest up to 5 percent of their incomes into Federal Government securities, but without any matching contribution by the employing agency.

Mr. President, even if the Social Security Amendments of 1983 had not mandated a new retirement system for

workers hired after January 1, 1984, I believe it was time for Congress to design a modern pension system for Federal employees like the one before the Senate today. Why should the civil servant be locked into an archaic retirement plan while his counterpart in the private sector or State government participates in plans that provide both retirement security and career flexibility? The Federal worker competes in the job market with the rest of the labor force, and the U.S. Government, as any employer, must hire bright young workers by offering attractive retirement benefits. It is unfair to the employee to have his or her career opportunities limited by the current system and it handicaps the U.S. Government when attempting to recruit needed talent.

The Federal Employees Retirement Act of 1986 covers employees that will retire in any year. That is why we have tried to make the bill as forward thinking as possible. However, we think our new system will be so attractive to Federal workers that we have included a transfer provision allowing individuals in the current system to enter the new plan.

In addition to the regular civilian employees, the bill has benefits, tailored in the same manner as the current pension plan, for certain classes of employees that hold jobs with age and service patterns different than the most employment. Among those categories are firefighters, law enforcement officers, air traffic controllers, foreign service officers, the CIA, Members of Congress, and congressional staff. The decision to include Members and staff into this special group was decided years ago when it was realized that these jobs did not lend themselves to the usual long-term retirement formula. In this bill, like the current plan, the Members and other special classes will pay one-half percent more for their plan and in return accrue benefits at a higher rate.

The COLA, for all participants is the same: No COLA until after age 62 and then at a CPI–1 rate when inflation is about 3 percent. The cost to the taxpayer will be much less than it is now—a change the Congress has urgently needed to make for years.

In closing, I wish to acknowledge the superb leadership to Senator STEVENS, the chairman of the Subcommittee on Civil Service, Post Office, and General Services. Without him, I am sure we would not have come to such a successful conclusion. I want to thank him and Chairman BILL FORD of the House Post Office and Civil Service Committee for their cooperation.

In the next few weeks, the committee will produce a section-by-section analysis of this legislation in a committee print to provide Members with more details on this legislation.

The new Federal Employees' Retirement Act reforms an outdated entitlement program, protects the worker, saves the taxpayer money, and strengthens the Federal Government's Job Recruitment Program. It is not often the Congress has an opportunity to satisfy so many policy needs correctly. I urge the Senate to adopt the conference report.

Mr. STEVENS. Mr. President, I would like to speak in support of the conference agreement on H.R. 2672, the Federal Employees' Retirement Act of 1986. This bill sets up a new retirement system for Federal employees hired beginning in 1984 who are covered under Social Security.

First of all, I want to express my deep appreciation to Senator ROTH, the chairman of the Governmental Affairs Committee, for his tireless efforts in developing and moving this most complex piece of legislation through the entire process. I also want to pass along a special thanks to my good friend and distinguished colleague, Senator EAGLETON, for his leadership, abiding interest and longtime support in setting up this retirement plan. I would like to commend these two gentlemen, and the other members of the Governmental Affairs Committee, as well as the large number of other Senators without whose support getting this bill moved would have not been possible. And, of course, I want to acknowledge Representative BILL FORD, chairman of the counterpart House committee, for his superior leadership in the House in designing a new retirement system and for the unparalleled spirit of cooperation he has fostered during this conference which was so necessary for the Senate and House to reach final agreement on this bill.

Finally, and certainly most importantly, I want to commend the Chief Counsel of our subcommittee, Jamie Cowan. Jamie has worked with me through this whole period. We have spent many hours in meetings, at night, on weekends, at early morning breakfasts and at dinners in my home to confer with leaders of various segments of our national community interested in this legislation. Jamie delayed his departure from Senate employment with a commitment that he would stay until this bill became law. He will now enter the ministry on almost a full-time basis, although I believe he will be besieged by those who will implement this bill or fashion the entities to assure its success, for Jamie Cowan understands this legislation better than any person involved. I give him my heartfelt thanks for the effort he has made to bring this to a successful conclusion, and I readily admit I could not have brought this bill to the final conclusion without his advice, counsel, and commitment.

Final agreement in the case of this conference bill would not have been possible without the administration and I would like to recognize OMB, OPM, and members of the White House staff for their invaluable contributions and participation in this effort.

The bill before us was most certainly not put together in haste. As a matter of fact, work on this retirement system has spanned four Congresses, with my involvement beginning 7 years ago. Since that time, we have had study upon study, untold hours of testimony on retirement system benefits and design from top pension experts in the public and private sector, and considerable input from employee and management groups. Hearings were first held about 5 years ago. It was during that time that the Congressional Research Service conducted a major study of alternative designs for Federal retirement programs and in December 1981, issued a report describing four options for coordinating Federal retirement with Social Security. Based on the CRS report, I introduced a bill in the fall of 1982 to set up a three-tiered retirement plan with Social Security as the base although Federal employees were not yet covered under Social Security. The bill was not acted upon during that Congress, but the Social Security Amendments of 1983, a few months later, created the immediate need for a new retirement system. We held a series of five pensions forums in 1984 which led to the introduction of S. 1527 and subsequent passage of a new Federal retirement system in the Senate in November 1985.

When I consider how long this has taken, the tremendous amount of time and energy required of so many people, and the various frustrations along the way, I can honestly say it was all worth it. I say that because of the result—a top notch, economical retirement system for the Federal workforce which is on par with the best in the private sector.

This bill provides for a three-tiered system—Social Security, a basic annuity plan, and a voluntary thrift savings plan, following a proven and popular private sector model. The plan provides solid retirement benefits which coordinate well with Social Security, offering financial security to Federal retirees, protection in the event of disability, and sound coverage for survivors. It offers the Federal employee for the first time, an opportunity to participate in a tax deferred thrift savings plan with a generous employee match, something previously available to private sector employees.

This new system encourages employee participation in retirement planning, provides greater portability of benefits enabling greater movement in

and out of Government service at all levels, encourages career services, offers employee options for retirement planning and provides a financially sound and fully funded retirement system.

The new system provides for a gradual move to age 57 for a minimum retirement age, allowing many current employees to continue to retire at 55. It allows payment of an annuity supplement until age 62, subject to an earnings test similar to Social Security practice. COLA's will be equal to CPI minus 1 after 62 with no COLA's before. Even with these few changes from the current system, I believe Federal employees will be very pleased with this new system and I suspect that many employees in the current system will find the new one attractive enough to transfer.

With this new retirement plan, everyone is a winner—the Federal employees because of the benefits and opportunities it offers, the Government because of the positive influence on the makeup of the work force, and the taxpayer because it costs considerably less than the current system. I, too, think we have come up with a winner and urge that we adopt the conference agreement for H.R. 2672.

Mr. EAGLETON. Mr. President, It has been 66 years since Congress first enacted a retirement system for Federal civilian employees. That system, the civil service retirement system, created what is known as a defined benefit plan and set pension standards for both the private sector and State and local governments for decades.

While CSRS was amended and modified many times over the years, its basic structure and philosophy never changed. The Federal Government made a commitment to its employees that if they retire from government after a significant number of years of service to their country, then the Government would guarantee them a lifetime annuity. The annuity was specifically defined: The employee would receive an annual amount equal to the average of his high 3 years salary, times his number of years of service, times 2 percent thus, the term "defined benefit." The employee had to contribute a percentage of his salary, but if the employee decided to leave government and withdraw from the plan, his contributions would be refunded. Basically, the Federal Government, as an employer, was taking care of its long-term employees by providing deferred compensation for years of performance.

Between 1920 and 1986 pension philosophy, pension needs, pension law, and pension design underwent marked changes. What did not change, however, and what became a widespread employee right, was the CSRS philosophy that an employer should provide an annuity to employees upon cessation of full service careers.

Following enactment of the Civil Service Retirement System in 1920, the next major historic change in pensions came in 1935 when Congress established the Social Security Program. That program, originally designed as a pension foundation to be supplemented by personal savings and small pension plans for certain categories of workers, quickly, as we all know, became nearly universal.

Since the Civil Service Retirement System predated Social Security, there was no reason to restructure the CSRS, and consequently Federal employees were not covered by the Social Security Program. Although Social Security coverage of Federal civilian employees was frequently suggested, it wasn't until 48 years after Social Security began that the Federal workforce was included. In a major overhaul of Social Security in 1983, Federal employees hired after January 1, 1984, were included in the Social Security Program. Since it was readily apparent that the Federal Government could not ask its employees to contribute to two retirement plans, the 1983 law provided an interim arrangement for new employees until a new Federal employees retirement plan could be enacted. The deadline for completion of the new plan was December 31, 1985. We didn't quite make it, so last December Congress extended the deadline until May 1, 1986. We have not extended the deadline again, and until this conference report before us becomes law, Federal employees hired after January 1, 1984, will be paying into both the Civil Service Retirement System and Social Security.

It fell to the jurisdiction of the Senate Governmental Affairs Committee to design the new retirement plan. Luckily for the committee, my good friend and colleague from Alaska, Senator TED STEVENS, had seen as far back as 1979 the inevitability of Federal employees joining Social Security, and through his position on the Civil Service Subcommittee, he had already commenced what for the rest of us on the committee became a long and tortuous journey.

In 1982 TED STEVENS introduced S. 2905, the Civil Service Pension Reform Act of 1982. In preparation for his bill, Senator STEVENS had spent 3 years tapping the resources of the Congressional Research Service of the Library of Congress, as well as the thoughts and services of other pension experts. His 1982 bill went nowhere, but when Congress placed new Federal employees in Social Security in 1983, Senator STEVENS and his staff were ready.

We have a conference report today enacting a new Federal employees retirement system because of the foresight, guidance, dedication, and plain hard work of Senator TED STEVENS and his dedicated staffer of this project, Mr. Jamie Cowen. Thousands of hours have been spent on this legislation by many others, and we owe them all our gratitude and thanks, but when history equates this massive change in Federal retirement with the original plan enacted 66 years ago, it will be TED STEVENS whose name will be remembered.

Senator STEVENS knew the Government would not be the philosophical leader and pension pioneer, as it has been in 1920. Rather, in drafting new legislation, Congress would have to copy from those plans based on Social Security coverage. In S. 2905, Senator STEVENS had proposed a three-tiered retirement plan, using Social Security as the first tier. For his second tier, he added on a defined benefit plan, similar to the civil service retirement plan but less generous, and for his third tier he provided for a "thrift," or capital accumulation plan. The "CAP" plan, which is much like an IRA or 401(k) in the private sector, allowed employees to contribute to their retirement, have that contribution matched by the employer, and then allow the total sum to be invested at the employee's direction in either government securities or the private markets. Retirement plans based solely on thrift or CAP plans are known in the trade as defined contribution plans.

It is the STEVENS' three-tiered concept that we have before us today in the conference report on H.R. 2672. Despite Senator STEVENS' foresight, it took awhile to reach agreement that a three-tiered system was desirable for a Federal Government plan.

During what I call the educational process, the Senate Governmental Affairs Committee held a series of five forums where experts from the private sector, State and local governments, the Federal Government, and the Federal employees' unions met to learn about pensions. That was back in late 1983 and early 1984. My reaction after that experience was that there would never be a bill. The Federal unions wanted a pure "defined benefit" plan; the administration thought a pure "defined contribution" plan was the way to go, and State and local experts who had switched plans (such as New York and Maryland) were full of horror stories about transition problems.

Senator STEVENS persevered. He went back to the drawing boards, revised his 1982 plan, and in late 1984 brought forth another proposal. This proposal was never introduced in bill form, but it provided the structural basis for H.R. 2672. In this 1984 draft plan Senator STEVENS incorporated many of the suggestions made in the forums and took special cognizance of studies conducted on pensions for the committee by the General Accounting

Office, the Congressional Budget Office, and, again, the Congressional Research Service. He also made it perfectly clear that there would have to be a law by the end of the 99th Congress or his participation would cease. Now that got some action.

Under the able direction of Governmental Affairs Committee Chairman ROTH; with the help of Senator GORE, the ranking member of the Civil Service Subcommittee; with the commitment to a final bill from Senator MATHIAS, another member of the subcommittee with particularly impressive constituent concerns, and with the blessing and good wishes of Congressman WILLIAM FORD, chairman of the House Committee on Post Office and Civil Service, the Senate committee set out anew to write and pass a bipartisan retirement bill. It succeeded. On November 7, 1985, the Senate passed the committee bill by a vote of 96 to 1. It was an hour of great triumph, but there was still a long way to go.

The House, too, had been working 3 years on a bill, and their plan, while still in committee, had far more support from the Federal unions. However, the House agreed to conference on the Senate bill, and the now, long-suffering staff was sent back once again to come up with an acceptable, bipartisan package.

The results of those final efforts are before us today. The Federal unions, who exhibited statesmanship throughout the entire process, receded on some highly important points, such as a cost equivalent to the civil service retirement system and a guaranteed full COLA for retirees. The unions fully support today's conference report. The administration, which had hoped for a lower overall cost than the bill achieved, an increase in the Federal retirement age, and an accrual formula based on high-5 salary, rather than high-3, also swallowed hard and it, too, fully supports the report. The House and Senate conferees fully support the bill, and my reading from staffers and colleagues is they can't wait to join the new system.

Mr. President, I hope history recognizes the importance of this achievement, and I hope we have provided Federal employees a retirement system that holds up for another 66 years.

Mr. GLENN. Mr. President, H.R. 2672, the Federal Retirement Reform Act, would establish a civil service pension program for Government workers hired after December 31, 1983, who were brought under Social Security as part of the Social Security Amendments of 1983.

The need for action on this legislation is real and urgent. The Social Security Act Amendments of 1983 assumed that the Congress and the administration would be able to agree upon and enact a supplemental civil service retirement plan for Federal employees covered by Social Security. Moreover, it provided that if such a plan was not enacted within 2 years, Government wage earners hired after January 1, 1984, would be required to pay both the full Social Security and civil service payroll tax.

During Senate debate on the 1983 bill, I cosponsored an amendment by Senator LONG to delay Social Security coverage of Government workers until this supplemental plan was enacted. I felt that it was unfair to include new employees under Social Security without spelling out in advance how their civil service pension and disability benefits would be provided. Regrettably, that amendment was defeated and Social Security coverage took effect on January 1, 1984.

As I noted previously, the original deadline for enactment of a supplemental civil service retirement for workers covered under Social Security was last December. Congress voted to extend that time limit once. The extension expired on April 30, 1986, and Federal agencies around that country have now begun to deduct the "double whammy" of the full payroll tax deductions for both Social Security and civil service retirement from the paychecks of Federal employees.

I regret that we have lost time in deliberating legislation to enact a responsible plan for workers entering Government service. However, I am pleased that the White House and the Congress were finally able to reach agreement on a compromise proposal. The Federal Retirement Reform Act, H.R. 2672, provides Government employees with a three-part program which is comparable to plans widely used in private industry. Workers' basic Social Security benefits would be augmented by an "add-on" Government pension and a tax-deferred savings plan.

Under the bill, retirees would receive full Social Security benefits. Civil service employees who retired before they reached Social Security's eligibility age could receive special pension benefits until they reached the official retirement age of 62. The Government pension would be a defined benefits arrangement, with increasing payments based upon length of Government service. The tax-deferred savings plan would operate along the lines of private sector 401 K programs with "first dollar" Government matching of the employees' tax-sheltered earnings. Neither the contribution or earnings would be taxed until they are withdrawn. Finally, the legislation provides that any Government worker hit with the double whammy of full payroll tax deductions for Social Security and civil service—during this interim period before the bill's enactment—shall receive a retroactive refund.

I have always been supportive of legislation to strengthen the retirement system of civil service employees. I believe that the Government has a responsibility to provide an adequate and fair pension program for its employees, and one that helps to recruit and maintain an excellent and skilled work force. We have a commitment to provide present and future Federal retirees with the benefits they have earned and they deserve. I believe that the Federal Retirement Reform Act can meet the needs of both long-term career service employees and short-term Government employees.

The House and Senate conferees on this measure have worked very hard to produce a fair and balanced package, and what's more, they have succeeded. Without question, they deserve our recognition and appreciation for their efforts. Mr. President, H.R. 2672 has earned my support and I hope my colleagues will join me in voting for its passage.

Mr. GORE. Mr. President, I am probably newer to the issue of Federal retirement reform than any other member of the conference committee. But when I was assigned the ranking minority slot on the Senate Governmental Affairs Civil Service Subcommittee, I dug in to try to learn the intricacies of this issue as quickly as I could. It has been a great pleasure to work on this. I truly have enjoyed it. I wondered a year ago whether I would, but I have learned a lot, and it certainly is very satisfying to be a part of this successful effort. Through considerable effort, we have developed a product that is fair and responsible, and meets virtually everyone's criteria.

I want to express my gratitude for all those who helped on these issues, including the Senate and House committee staff members, for the tireless efforts of the Library of Congress Congressional Research Service, and for the careful assistance provided by Hay-Huggins Associates.

In particular, I wish to reiterate the praise that I have expressed in the past for the chairman of the subcommittee, Senator STEVENS, the chairman of the full committee, Senator ROTH, and the ranking minority member of the full committee, Senator EAGLETON. I have learned a lot from these three senior Senators and I thank them for allowing me to be a part of such an enjoyable, deliberative process. Similarly, the efforts of Chairman FORD and Representatives TAYLOR and OAKAR in the other body have left unmistakable, positive marks on this product. Finally, I think the employee groups and the administration displayed considerable statesmanship, if I may use the word, throughout the entire enterprise. This product would not have been possible without that.

Mr. President, the 1983 decision to extend Social Security coverage to Federal employees left Congress with the difficult task of redesigning the Civil Service Retirement System. The manner in which we have addressed this issue will recast the basic Federal retirement structure and its pattern of payments for decades to come. Our resolution of these issues will directly influence the kind of Federal work force that we should have.

Our final product reflects the fact that our focus has been to ensure that Federal employees, during their careers and during their retirement, receive fair and reasonable compensation for their service. The retirement compensation which we have provided in this conference agreement walks a narrow line, balancing the needs of Federal workers as well as the taxpayers.

The retirement system which we have developed employs a three-tier design that combines Social Security with a defined benefit tier that focuses on providing a reliable base pension benefit, and a defined contribution tier that adds elements of portability and flexibility to the retirement package. Like the application of Social Security, the creation of a defined contribution tier is a significant departure from the current Federal retirement system. Unlike Social Security, however, defined contribution or capital accumulation plans have varying structures and benefits. Accordingly, I will ask unanimous consent to include at the conclusion of my remarks a copy of an excellent analysis of this issue prepared by the Congressional Research Service.

Just as the conference agreement reflects the best of the current private and public sector pension designs, it also reflects the best components of the House and Senate bills. I cosponsored the Senate bipartisan bill because it addressed the critical concerns that I chose to focus on when the original bill was introduced in the Senate last July. I endorse the conference product because it fairly and responsibly resolves the issues that have been important to me since the outset of my involvement over a year ago: the COLA to protect against benefit erosion in the face of inflation; unreduced early retirement; the mix between defined benefit and defined contribution; and benefits for disabled workers and survivors, with particular emphasis upon displaced homemakers and young two-earner couples. Although some of these provisions are not as generous as those provided in the Senate bill that I cosponsored, others are strikingly similar or, in some instances, markedly improved.

Before concluding, I would like to take a moment to remind my colleagues of the full context in which this conference agreement is presented. During our hearings on this legislation, those of us on the committee were reminded that of the main areas of comparison between Federal and private sector employment, retirement benefits is the only category where Federal employees begin to compare favorably. By adopting a less expensive retirement system, we increase this imbalance. Despite repeated efforts to rectify this situation, Federal pay has lagged far behind the private sector. Concerted efforts are underway in both Houses of Congress on this issue. I would hope that Congress' commitment to reform the Federal retirement system can now be turned to the issue of Federal pay.

In closing, Mr. President, this conference agreement combines compassion with confidence and good fiscal sense. I wholeheartedly urge its adoption.

I ask unanimous consent to have printed in the RECORD the analysis prepared by the Congressional Research Service.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

CIVIL SERVICE RETIREMENT: CAPITAL ACCUMULATION PLANS FOR FEDERAL EMPLOYEES

By Richard A. Hobbie

ABSTRACT

In the first session of the 99th Congress, the Senate and House considered civil service retirement reform bills (S. 1527 and H.R. 3660) that would authorize a supplemental pension plan called a "capital accumulation plan" (CAP). These bills are currently in conference committee. A CAP would allow employees hired after 1983 to contribute additional amounts voluntarily toward their retirement to supplement benefits available to them under a social security and a scaled-down mandatory civil service pension plan. This paper discusses and analyzes CAPs, particularly in light of proposed changes in the tax treatment of these plans made by the Administration and contained in the House-passed tax reform bill (H.R. 3838).

[Graphs and charts mentioned in text of article not reproducible in the RECORD].

INTRODUCTION

During the recent debate on civil service retirement reform, some have advocated a type of supplement pension plan often called a "capital accumulation plan" (CAP). This type of plan would allow Federal employees hired after 1983 to contribute additional amounts voluntarily toward their retirement to supplement benefits available to them under social security and a scaled-down mandatory civil service pension plan. This paper analyzes this type of plan.

I. WHAT ARE CAPITAL ACCUMULATION PLANS (CAPS)?

A. Definition

There is no universally accepted definition of a CAP. McGill includes in his discussion of "asset or capital accumulation employee benefit plans" such varied deferred compensation arrangements as profit-sharing plans, pension plans, and thrift or savings plans, regardless of whether they have qualified for favorable tax treatment under the Internal Revenue Code of 1954 (IRC).[1] This paper uses a more restrictive definition: a CAP is a deferred compensation arrangement in which an employee can contribute before-tax or after-tax compensation to an individual account maintained in his behalf that might also receive matching employer contributions at some specified rate up to a maximum. Analysts usually discuss three types of CAPs:

1. Cash or Deferred Arrangements (CODAs)

Section 401(k) of the IRC authorizes these plans. A typical CODA permits employees to make before-tax contributions up to six percent of compensation with employers matching 50 cents on the dollar. Employees can make additional unmatched before-tax contributions, usually up to 10 percent of compensation. Under present law, their total annual contribution, including contributions to other tax-favored plans, may not exceed 25 percent of their pay or $30,000 (indexed to inflation after 1987), whichever is lower.[2]

2. Thrift or Savings Plans

Thrift or savings plans are similar to CODAs except that the employee contributions are after-taxes. These plans generally have employer matching contributions. Many CODAs were thrift or savings plans before the Revenue Act of 1978 authorized 401(k) plans. Since the before-tax contributions to CODAs are more advantageous to the employee than after-tax contributions, many employers subsequently changed their thrift plans to CODAs.

3. Salary Reduction Plans

Salary reduction plans, such as those authorized under section 457 of the IRC, allow employees to contribute compensation before taxes. They do not have employer contributions. Most tax-sheltered annuities authorized under section 403(b) of the IRC are salary reduction plans.

B. Present law and reform proposals

1. Present Law

Present law covers current Federal employees under either the old Civil Service Retirement System (CSRS), or a temporary arrangement that covers employees hired after 1983 under social security and CSRS that provides benefits roughly comparable to the old CSRS. CAPs are not available to Federal employees and the bill does not mention the Federal CSRS in this regard. In fact, the Administration proposed in 1985 to repeal section 401(k) of the IRC, which it asserted was originally intended for profit-making employers only.[3] However, the House-passed tax reform bill (H.R. 3838) would retain section 401(k) plans for profit-making firms, but would prohibit State and local governments and tax-exempt organizations from establishing such plans.

2. Civil Service Retirement Reform Bills (S. 1527 and H.R. 3660)

The Senate civil service retirement reform bill (S. 1527) would provide employees with optional CAPS. Under option A, the Federal Government would match employee contributions dollar-for-dollar up to five percent of an employee's pay, and the employee could contribute up to an additional five percent of his pay with a carryover unused contribution credit into the next taxable year. The employee contribution would vest immediately, and the employer contribution would vest in fifths each year over five years. There would be no hardship withdrawals, and loans would be available to the extent that tax permits. Contributions would be invested in at least three funds: (1) a government securities investment fund, (2) a fixed income investment fund, or (3) a common stock index fund. Authorization to invest the contributions outside the government would be phased in from 1988 to 1998. Option B would be the same as option A except that: (1) the matching rate for employer contributions would be dollar-for-dollar for the first one percent of pay, 50 cents for more than one percent to three percent of pay and 25 cents for more than three percent through six percent of pay, and (2) employees could contribute up to an additional four percent of pay.

The House civil service retirement reform bill (H.R. 3660) would provide an employer match of 50 cents on a dollar of employee contributions up to six percent of the employee's pay. Employees could make unmatched contributions up to an additional four percent of pay. All contributions would be vested immediately. Hardship withdrawals and loan would be permitted to the extent allowed in tax law. Six investment options would be available and government contributions would be invested in U.S. Treasury securities only in the first five years, and then all funds would be invested in any of the authorized funds thereafter. Employees participating in the old CSRS would be allowed to make unmatched contributions to the CAP.

3. Tax Reform Proposals

The Administration's tax reform proposal would maintain the current tax treatment of tax-favored plans while simplifying and making more uniform certain general pension plan rules. The section 457 salary reduction plans for State and local government employees and certain "tax-sheltered annuities" under section 403(b) of IRC for educators and certain nonprofit organization employees would remain available. Perhaps the most significant changes aims to discourage early distributions of pension plan assets. Such distributions have been used by some individuals for preretirement consumption instead of retirement consumption. This change would apply a 20 percent excise tax on most early distributions, which would recapture some of the lost Federal income tax revenue that the Administration asserted should not subsidize consumption before retirement. The House-passed tax reform bill contains many of the Administration's proposals, including an excise tax on early withdrawals set at 15 rather than 20 percent.

II. DESIGNING CAPITAL ACCUMULATION PLANS (CAPS)

A. *Two components*

The CAPs have two basic components: contributions and distributions. The contribution side deals with the conditions under which employers or employees contribute to a CAP and the rate at which these funds accumulate in an individual's account. The conditions under which a CAP disburses accumulated funds to the beneficiaries affect the distribution side. These include the income tax treatment of such distributions.

The annual cost to the Federal Government of a CAP would be largely determined by plan design and would consist of: (1) the matching employer contribution, (2) interest paid on contributions, and (3) the lost income tax revenue that plan participants would have paid to the Federal Government on the before-tax contributions and interest if they had been paid when earned. The lost income tax revenue attributable to a CAP is not unique, however, since benefits in many pension plans, including the employer-financed share of civil service retirement benefits for employees hired before 1984, are not taxed until received.[4]

B. Contributions

1. Coverage, Eligibility, and Participation

In the private sector, employers generally cover all employees under their pensions unless a collective bargaining agreement excludes some workers. The ERISA requires that covered employees must be eligible to participate at age 21 with one year of service.[5] Since employee contributions are voluntary in CAPs, the variables that influence participation are important. These include the employer matching rate, the maximum on additional unmatched employee contributions, and the ability to withdraw funds for reasons other than reaching a specific age, retirement, death, disability, or separation of service. They also include individual preferences for current versus future consumption, which are affected by many factors, such as age, salary level, family income, and the availability of other tax-favored savings mechanisms.

2. Employer Contributions

The employer matching rate in a CODA or thrift plan is usually the most attractive financial incentive for employee participation. It provides an immediate and substantial return on the employee investments. If the employer contributes 50 cents for each dollar contributed by employees, the employees receive an immediate 50 percent return on their investment. Under a CODA, income taxes on all contributions and interest are deferred until receipt. This is more attractive than any other tax-favored retirement savings plan. Under a section 457 salary reduction plan, for example, the investor gets the advantages of tax deferral, but no employer matching contribution. Under a thrift plan, the employee gets a tax-favored employer matching contribution, but no tax deferral on his own contribution.

Employer contributions must satisfy certain general rules that aim to limit discrimination in favor of stockholders, officers, and highly compensated employees in pension, profit-sharing, and stock bonus plans. However, specific discrimination rules in 401(k) plans also apply to employee contributions. Under section 401(k), the Administration's tax reform proposal noted that under certain conditions employer contributions might be counted as employee contributions for this additional discrimination test.[6] The House-passed tax bill would add a specific test for employer and employee contributions, and it would require the Secretary of Treasury to report on how the Internal Revenue Service administers these tests. The next section discusses this test.

3. Employee Contributions [7]

The Federal income tax, in general, taxes compensation as it is earned. There are exceptions, however, under certain tax-qualified pension, stock bonus, and profit-sharing plans, where taxes are deferred until income is received. CODAs represent one type of tax-qualified plan. Under these plans, the employee may elect to defer his compensation instead of receiving it in cash, hence the name "cash or deferred arrangement" (CODA). This allows him to avoid current income taxes on the deferred amounts, including the earnings on the deferred compensation.

The CODAs qualify for tax-favored treatment if they have:

(1) voluntary employee contributions that are immediately vested;

(2) voluntary contributions that may not be distributed before the earlier of age 59½, separation of service, death, disability, or "hardship;"

(3) coverage that meets the requirements for qualified pension plans in general; and

(4) voluntary contributions that meet a test called the actual deferral percentage test, or "ADP test." The applicable ADP is a simple average of all eligible employee actual deferral ratios, including zeros, where each employee's actual deferral ratio for a year is his voluntary contributions divided by his compensation.

The ADP test aims to limit the proportion of benefits that flow to the "highly compensated employees," who are defined as the highest paid one-third of eligible employees. If this test were not applied, the benefits probably would shift in favor of the highest paid one-third because they have higher incomes and greater discretion to save higher proportions of their current incomes. A plan meets the ADP test if:

(1) the ADP for the higher-paid one-third of employees is no more than 150 percent of the ADP for lower-paid two-thirds of employees, or

(2) the ADP for the higher-paid one-third of employees is no more than 250 percent of the ADP for the lower-paid two-thirds of employees and no more than three percentage points higher than the ADP for the lower-paid employees.

For example, suppose four employers, A, B, C, and D, have the following ADPs for the lower-paid two-thirds of employees and the higher-paid one-third of employees:

Employer	ADP for lower-paid two-thirds of employees (percent)	ADP for lower-paid one-third of employees (percent)	Ratio of higher- to lower-paid ADP (percent)	Higher-paid ADP minus lower-paid ADP
A	3	4	133	1
B	3	6	200	3
C	3	9	300	6
D	6	9	150	3

[4] U.S. Library of Congress. Congressional Research Service. Are There Tax Advantages Associated with the Stevens-Roth Bill (S. 1527)? Typed Report, by Richard Hobbie, Sept. 27, 1985. Washington, 1985.

[5] U.S. Library Of Congress. Congressional Research Service. Private Pension Plan Standards: A Summary of the Employee Retirement Income Security Act of 1974 (ERISA), As Amended. Report No. 84-234 EPW, by Ray Schmitt. Washington, 1985. p. 7.

[6] The President's Tax Proposals to the Congress for Fairness, Growth and Simplicity, p. 364.

[7] Ibid., p. 363-364.

Employer A would pass the ADP test on condition (1) because the ADP for the higher-paid one-third of employees is lower than 150 percent of the ADP for the lower-paid two-thirds of employees. Employer B would pass on condition (2) because the ADP for the higher-paid one-third of employees is less than 250 percent and the difference between the two is not more than three percentage points. Employer C would fail because the ADP for the higher-paid one-third of employees exceeds 250 percent and the difference between the ADPs exceeds three percentage points. Employer D would pass because the ADP for the higher-paid one-third of employees is not more than 150 percent of the ADP for the lower-paid two-thirds.

4. Investment Earnings

Investment earnings on contributions are not taxed until received. ERISA requires a separate accounting of the employee's contributions and earnings, which are 100 percent vested immediately. Employer contributions and associated earnings often vest after five years.[8]

The CODAs are usually part of either profit-sharing or stock bonus plans.[9] Stock bonus plans channel the contributions into employer stock. This increases the employee's stake in the firm, but it also links the goals of employer profitability and employee job security with the goal of retirement income security, which some analysts argue should be separate. Although CAPs might allow for investment in employer securities, they usually provide a choice of investments among diversified investment funds, guaranteed income contracts, or fixed income securities. If the contributions are invested in diversified investment funds, employees often own shares of the diversified portfolio, not individual stocks, bonds, and other securities. In this way, their individual risk is lowered. Under guaranteed income contracts, the principal and a minimum yield are guaranteed. Fixed income investments offer minimal risk from a relatively default-free portfolio of investments, such as U.S. Treasury securities.

c. Distributions

A distribution occurs when part or all of the CAP's funds are paid to a participant. This can occur only after a minimal holding period for the contribution, which in practice is two years. A normal distribution may not occur before the age of 59½, separation of service, death, disability, or "hardship." Employees can also obtain the use of these funds through loans.

1. Tax Treatment of Normal Distributions

The participant might receive a normal distribution in the form of an annuity or a lump sum distribution. Since the contributions and associated earnings were not taxed previously, all of the distributions are subject to Federal income tax. The annuity income would be taxed as received, but they would be eligible also for 10-year income averaging, which substantially reduces the total tax liability.

Lump sum distributions may be rolled over into an Individual Retirement Arrangement (IRA) within 60 days. In the case of the IRA rollover, the beneficiary could defer taxes on the distribution if he does not withdraw any funds from the IRA. Distributions from an IRA must begin, however, after the individual reaches 70½ years old. Because the favorable tax treatment of IRA rollovers is available for lump sum distributions, the Administration proposed to repeal the 10-year income averaging. It noted that the original purpose of 10-year averaging was to moderate the effect of the progressive income tax on lump sum distributions, a purpose now served by the tax-free IRA rollover. The House-passed tax reform bill would substitute under certain conditions a one-time five-year income averaging for the 10-year provision.

2. Hardship Withdrawals

In the case of "hardship" withdrawals, the distribution must meet certain conditions that are often determined by an employer committee. Before the Administration proposed to repeal 401(k) plans, it had proposed to eliminate "hardship" as a legitimate normal distribution.[10] The Administration argued that this provision allowed participants to take advantage of the tax-deferred savings to build up funds for use before retirement that were intended for use after retirement. Thus, the Administration proposed a 20 percent excise tax on most distributions in an attempt to regain part of the lost tax revenue that the Administration asserted should subsidize retirement savings only. The proposal also would have allowed early "hardship" distributions to pay for college expenses of a dependent, purchase of a first principal home, or replacement of exhausted unemployment compensation with a lesser exicse tax of 10 percent. The House-passed tax reform bill would apply a 15 percent excise tax to early distributions, but it would allow the Administration-proposed "hardship" distributions without an excise tax.

3. Loans

Loans also can be obtained, but they must: (1) be available without discrimination in favor of stockholders, officers, or highly compensated employees, (2) carry a reasonable rate of interest, (3) have a repayment schedule, and (4) comply with ERISA fiduciary standards. Otherwise, the employee risks having to pay taxes currently on what might be considered a withdrawal. Employees sometimes object to paying interest on the use of their "own money," but if they did not pay interest, their accounts would be lower by the amount of forgone interest. Thus, interest-free loans could reduce the accumulated capital for retirement, the main objective of a CAP. The House-passed tax reform bill would tighten restrictions on loans. In particular, participants could not deduct the interest paid currently on the loans, but they would not have to pay taxes again on the interest paid on the loans when they received it later.

III. ISSUE ANALYSIS

A. Should the Federal Government provide CAPs for Federal workers?

Proponents of CAPs for Federal workers assert that Congress should model Federal retirement after private sector retirement practices. Many non-Federal employers have CAPs authorized under sections 401(k), 403(b), or 457 of IRC. Therefore, they conclude Congress should offer CAPs to Federal workers.

This argument conflicts with the Administration's position on 401(k) plans and the House-passed tax reform bill. The Administration's original tax reform proposal for 401(k) plans asserted that they were not intended for nonprofit or government employees.[11] The House-passed tax reform bill would prohibit State and local government and tax-exempt organizations from establishing 401(k) plans, but H.R. 3660 and S. 1527 would authorize CAPs for Federal civil servants that strongly resemble 401(k) plans.

If one accepts this view, then Federal employees should not have a 401(k) plan. However, they still could have a thrift plan or a section 457 salary reduction-type plan. The thrift plan could be similar to a 401(k) plan except that the employee contributions would be made with already-taxed compensation. The section 457-tupe plan could be similar to a CODA with before-tax contributions, except that it would have no employer matching contributions.

B. Which employees benefit most from CAPs?

High-paid employees benefit more than low-paid employees from CAPs. This occurs because: (1) high-paid employees are likely to contribute a higher percent of their pay than low-paid employees; (2) at a given rate of contribution, high-paid employees contribute more money than low-paid employees; and (3) for a given amount contributed, high-paid employees benefit more from deferred taxes on the contributions and earnings than low-paid employees.

Data on the relationship between salary and the rate of contribution are weak. However, Hay/Huggins Company, Inc. has constructed a table that illustrates the relationship. Table 1 shows that the estimated rate of contribution increases not only with salary, but also with the age of the participant for a CAP with an employer match of 50 cents on a dollar up to six percent of pay. For example, the estimated average contribution rate for workers in their 30s increases from 1.9 percent for those earning $15,000 or less to 3.7 percent for those earning above $45,000. Moreover, 1.9 percent of $15,000 is only $285, while 3.7 percent of $45,000 is $1,665, or 5.8 times as much.

TABLE 1.—ESTIMATED AVERAGE EMPLOYEE CONTRIBUTIONS AS A PERCENT OF PAY

Pay	Age			
	15 to 29	30 to 39	40 to 49	50 plus
$0 to $15,000	1.5	1.9	2.4	2.8
$15,001 to $30,000	1.8	2.3	2.8	3.3
$30,001 to $45,000	2.3	3.0	3.6	4.3
$45,001 to $60,000	2.8	3.7	4.5	5.3

Source: Hay/Huggins Company, Inc. extrapolations from data contained in Survey of Plan Design and Experience in 401(k) Salary Reduction Plans. Hewitt Associates, 1985. 35 p.

A high-paid employee benefits more than a low-paid employee from deferred taxes on contributions because of the progressive structure of the Federal personal income tax. As taxable income increases, the tax rate applied to additional taxable income, the "marginal tax rate," increases from one tax bracket to another. For example, the marginal tax rates for single taxpayers in 1984 are shown in table 2.

[8] Congressional Research Service, Section 401(k) Deferred Compensation Plans, p. 3.

[9] Korczyk, Sophie M. Retirement Security and Tax Policy. Washington, Employee Benefit Research Institute, 1984. p. 29.

[10] The President's Tax Proposals to the Congress for Fairness, Growth and Simplicity, p. 342-349.

[11] Ibid., p. 366.

TABLE 2.—MARGINAL TAX RATES FOR SINGLE PERSONS IN 1984

[Taxable income dollars was:]

Over	But not over	Marginal tax rate (percent)
$0	$2,300	0
2,300	3,400	11
3,400	4,400	12
4,400	6,500	14
6,500	8,500	15
8,500	10,800	16
10,800	12,900	18
12,900	15,000	20
15,000	18,200	23
18,200	23,500	26
23,500	28,800	30
28,800	34,100	34
34,100	41,500	38
41,500	55,300	42
55,300	81,800	48
81,800		50

Given that marginal tax rates increase with taxable income, it follows that an exclusion from taxable income is more valuable in absolute dollars to a higher income person. In other words, the benefits derived from the exclusion are "regressive." For example, a dollar excluded from the income of a single person with a taxable income of $45,000 is worth 42 cents in foregone taxes, but to a single person with a taxable income of $15,000 it is worth only 23 cents in foregone taxes.

A CAP allows a worker to earn compensation that is excluded from current income taxation until it is received. Thus, if an employer matches a dollar contributed by an employee with 50 cents, the employee excludes $1.50 from his current taxable income and associated earnings until he receives it in benefits. Under certain simplifying assumptions, table 3 depicts the future value of this tax exclusion for low-, middle-, and high-paid workers. In general, it shows that the future value of the tax exclusion increases with taxable income.[12]

Consider a low-paid worker and a high-paid worker under a plan that has a 50 percent employer matching rate on a contribution of $1,000 per year for 10 years. The bottom line in table 3 shows that the future value of the tax exclusion for the high-paid workers at $2,533 is twice as high as that for the low-paid worker at $1,259. Assuming the marginal tax rates during retirement would drop to 16 and 38 percent for the low- and high-paid workers, respectively, the advantage would decline to the high-paid worker, but still it would be substantial at 1.5 times that of the low-paid worker.

TABLE 3.—THE FUTURE VALUE OF THE PERSONAL INCOME TAX EXCLUSION OF CONTRIBUTIONS TO A CODA FOR LOW-, MIDDLE-, AND HIGH-PAID WORKERS UNDER AN ASSUMED NOMINAL INTEREST RATE OF 6.1 PERCENT

Item	Low paid [1]	(MTR equal 23 percent) [4]	Middle paid [2]	(MTR equal 34 percent) [4]	High paid [3]	(MTR equal 48 percent) [4]
Employee contributions per year	$1,000	$1,000	$1,000	$1,000	$1,000	$1,000
Number of years for contributions	10	10	10	10	10	10
Total employee contributions	$10,000	$10,000	$10,000	$10,000	$10,000	$10,000
Employer matching rate (percent)	50	100	50	100	50	100
Total employer contributions	$5,000	$10,000	$5,000	$10,000	$5,000	$10,000
Total contributions	15,000	20,000	15,000	20,000	15,000	20,000
Effective after-tax interest rate (percent)	4.70	4.70	4.03	4.03	3.17	3.17
Total future value if nontaxable	$19,864	$26,486	$19,864,	$26,486	$19,864	$26,486
Employee contributions	13,243	13,243	13,243	13,243	13,243	13,243
Employer contributions	6,621	13,243	6,621	13,243	6,621	13,243
Total future value if taxable	18,605	24,806	18,034	24,046	17,331	23,108
Future value of tax exclusion at retirement	1,259,	1,680	1,830	2,440	2,533	3,378

[1] Low-paid worker equal GS–5 with taxable income between $15,000 to $18,200 in 1984.
[2] Middle-paid worker equal GS–11 with taxable income between $28,800 to $34,100 in 1984.
[3] High-paid worker equal GS–15 or above with taxable income between $55,300 to $81,800 in 1984. Note that $81,800 exceeds the salary cap in 1984, but the individual could have received additional income from other sources.
[4] MTR equal marginal tax rate during work life for single taxpayers in 1984.

C. Would federal workers earn a higher rate of return on their funds if they invested in comon stocks instead of U.S. Treasury securities?

If the future resembles the past, Federal workers could on average earn a higher rate of return on their individual capital accumulation accounts in common stocks than in U.S. Treasury securities. However, because common stocks are riskier than relatively default-free U.S. Treasury securities, some workers would earn less, some workers would earn about the same, and some workers would earn more in common stocks than the would U.S. Treasury securities. Therefore, if Congress should want to offer Federal workers the opportunity to invest their individual CAP funds in a diversified portfolio of private securities, it would have to accept the chance that some workers would earn less if they invested in U.S. Treasury securities.

In the debate on how to invest CAP funds, the following argument has been made in support of investing in a diversified portfolio of common stocks:[13]

(1) Retirement plans have long-term investment perspectives.

(2) Contributions are made to a CAP over many years and employees receive benefits over many years.

(3) Despite short-term volatility, the Standard and Poor's Index of 500 common stocks has outperformed less risky securities, such as long-term corporate or government bonds.

(4) Moreover, even when one selects the best and worst 20 years for each type of investment, common stocks have outperformed other securities.

(5) Therefore, despite the short-tem volatility of common stocks, all employees can realize a higher yield from a diversified portfolio of common stocks than from less risky investments.

The data presented to support this argument initially appear overwhelming. For example, the value of a dollar invested in common stocks at the end of 1925 would have grown in nominal terms to $248.25 by June 30, 1985 compared to only $14.51 for long-term corporate bonds, $9.68 for long-tem government bonds, and $7.20 for Treasury bills.[14] Granted, annual returns to common stocks fluctuated widely from −43 percent to +53 percent, but over the long-term grew phenomenally (see appendix A, table A–1). Moreover, even in the worst 20 years for common stocks (1929–1948), the real rate of return was 0.8 percent, which was not as bad as the worst 20 years for long-term government bonds at −3.1 percent (1962–1981).[15]

The main problem with this argument is that the data do not reflect a realistic pattern of individual contributions to a CAP. Assuming that the growth of one dollar contributed at the beginning of a long holding period reflects what would happen to the growth of an individual CAP fund is tantamount to assuming that all contributions for the worker's career are made in the first year. This is unrealistic, and it leads to an erroneous conclusion that short-term market fluctuations in the value of common stocks do not matter.

Short-term fluctuations are much more important than portrayed in this argument because they can dramatically affect the total value of a fund in the last few years before retirement. This would occur because not only do workers tend to contribute more in later years, but even for a constant dollar contribution the annual returns on contributions compound dramatically in the last few years. Consider a simple example in which a worker contributes a dollar per year

[12] The future value of the tax exclusion is the difference between the future values of the total contributions if they were not taxed versus if they were taxed. The capital accumulation is assumed to reflect $1,000 contributed to a fund each year for 10 years by the employee with an assumed employer matching rate of either 50 percent or 100 percent. The total annual contribution was compounded annually at a rate of 6.1 percent.

[13] Fossel, Jon S. Investment Implications of S. 1527 Thrift Savings Plan. Alliance Capital Management Corporation, Sept. 9, 1985. 16 p.

[14] Ibid., p. 7.

[15] Ibid., slide IV.

for 20 years and earns 6.1 percent per year. At the end of 20 years he would have accumulated $20 in contributions and $17.18 in interest for a total future value of $37.18. Half of the interest would have been earned, however, in the last five years. Therefore, the annual returns in the last few years are critical to the final value of a CAP.

Recognizing that short-term market fluctuations make a significant difference in the final value of the fund allows one to see why some workers might be worse off if they invested in common stocks. Consider figure 1. It shows how a dollar would have grown if it has been invested in a portfolio of common stocks reflecting the returns to the Standard and Poor's Index of 500 stocks, long-term government bonds, or a fund that would have replicated the interest earned in the Civil Service Retirement System (CSRS) trust fund.[16] At the end of 1980, common stocks would have yielded $2.25. This compares to only $1.47 for long-term government bonds and $1.90 for the CSRS-type fund. thus, after 10 years it would appear that the common stocks would outperform long-term government bonds and the CSRS trust fund.

A different picture emerges when one examines shorter time periods. Granted, the funds would not have the same value in 1971 if they had been invested differently in earlier years, but it is the last few years that make the big differences. Therefore, assume for illustration that the three funds start at $1.00 in 1971 and the worker has, say, four years left until retirement. Also, assume that he makes no more contributions. This is as unrealistic as the implicit assumption in the argument for investment in common stocks tantamount to all contributions being made in the first year of work, but including additional contributions would only exaggerate fluctuations in these data. It would not alter the conclusion.

If a worker had invested in the CSRS-type fund, his account would have grown to $1.25 at the end of 1974. The comparable figure in long-term government bonds would have been $1.23, but for common stocks it would have been only $0.85. In other words, his investment in common stocks would have depreciated by 15 percent from its initial value and by 32 percent from what it could have earned in the CSRS-type fund. Moreover, it would have taken the common stocks two years to recover to the same value as an investment in the CSRS-type fund and a total of six years to exceed it substantially. Therefore, only if the worker could have afforded to wait six years after retirement to withdraw his funds, would he have been clearly better off investing in common stocks.

This demonstrates how critical a drop in the stock market could be if it happens in the year of retirement. If the worker needs the annuity that he thought he could buy with the value of his fund before the stock market decline, then he faces three choices. First, he could delay retirement. Second, he could temporarily live at a lower level of consumptions during retirement until the stock market recovers, enabling him to buy an annuity at least equal to that available from riskless investments. Third, he could accept a permanently lowered standard-of-living during retirement by buying an annuity with the depressed value of his fund.

D. In the short run, how would contributions affect the unified budget deficit?

The effect of contributions to a CAP in the short run on the unified budget deficit depends on whether the Federal Government holds the funds internally or allows them to be invested outside. In the short run, internal investing would increase revenues and external investing would increase outlays. In the long run, the year-by-year effects on the unified budget deficit would balance, leaving no practical difference between internal and external accounting for investments.

A breakdown of the short-run affects follows:

(1) If the funds were held internally, there would be a short-run increase in revenue:

(a) Employee contributions would increase revenues;

(b) interest on employee contributions would not have to be paid out until later, which would reduce in the short run the cost of borrowing or enable the Federal Government to spend more or cut taxes by equivalent amounts; and

(c) employer contributions and associated interest would have no effect because they would be intrabudgetary transactions until benefits were paid out.

(2) If the funds were treated externally, there would be a short-run increase in outlays:

(a) Employee contributions would have no effect;

(b) employer contributions would increase outlays; and

(c) interest associated with the borrowing that the Federal Government would have to do in order to finance the employer contribution would increase outlays. This cost could be covered also by increased taxes or reduced outlays.

E. under what circumstances might Congress allow early distributions?

Before the Administration proposed the repeal of 401(k) plans, it proposed to tighten the rules under which employees could withdraw funds from 401(k) plans before retirement without a substantial penalty. It argued that the plans were receiving substantial tax subsidies for short-term savings, rather than for retirement savings. As noted before, the House-passed tax reform bill incorporated many of these proposals.

Congress might consider the Administration's 401(k) proposals or the provisions in the House-passed tax reform bill as a way to promote mainly retirement savings in a CAP for Federal workers. These include increased excise taxes on early withdrawals, and restrictions on loans and hardship withdrawals. The Administration proposed to limit hardship withdrawals to college expenses for a dependent, purchase of a first principal home, or replacement of exhausted unemployment compensation. Loans would have had to meet certain conditions also, such as a definite repayment schedule and a reasonable interest rate.

IV. CONCLUSION

As the conference committee on S. 1527 and H.R. 3660 considers a CAP for Federal employees, it might want to consider the major changes in the provisions dealing with these plans in the House-passed tax reform bill (H.R. 3838). In particular, it might want to address the apparent inconsistency between the House-passed tax reform bill's prohibition against the creation of 401(k) plans in State and local governments with the prospective establishment of a 401(k)-type plan in the Federal Government by H.R. 3660 or S. 1527. To the extent that the House-passed tax reform bill wuld place new limits on CAPs in general, Congress might consider applying the same restrictions to a new CAP for Federal employees.

APPENDIX A

TABLE A–1.—TOTAL ANNUAL RETURNS IN PERCENTS FOR SELECTED INVESTMENTS, 1926–81 [1]

[In percent]

Year [2]	Common stocks	Long-term corporate bonds	Long-term Government bonds	U.S. Treasury bills	CSRS trust fund
1925					
1926	11.62	7.37	7.77	3.27	4.56
1927	37.49	7.44	8.93	3.12	4.69
1928	43.61	2.84	.10	3.24	4.11
1929	−8.42	3.27	3.42	4.75	4.08
1930	−24.90	7.98	4.66	2.41	4.05

The PRESIDING OFFICER. Is there objection to the report?

Without objection, the report is agreed to.

Mr. DOLE. I move to reconsider the vote on the conference report.

□ 2000

Mr. President, I ask unanimous consent that I may be permitted to move to reconsider all the actions previously taken en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I do so move to reconsider.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TECHNICAL CORRECTION IN H.R. 2672

Mr. DOLE. Mr. President, I send a concurrent resolution to the desk making a technical change in H.R. 2672 and ask for its immediate consideration.

The PRESIDING OFFICER. The concurrent resolution will be stated by title.

The legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 142) authorizing a technical correction to be made in the enrollment of H.R. 2672.

The PRESIDING OFFICER. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the concurrent resolution was considered and agreed to, as follows:

S. CON. RES. 142

Resolved by the Senate (the House of Representatives concurring), That, in the enrollment of the bill (H.R. 2672) to amend title 5, United States Code, to establish a new retirement and disability plan for Federal employees, postal employees, and Members of Congress, and for other purposes, the Clerk of the House of Representatives shall make the following corrections:

(a) At the end of section 8432(b) of title 5, United States Code (as added by section 101(a) of the bill) insert the following new paragraph (4):

"(4) Notwithstanding paragraph (2)(A), an employee or member who is an employee or Member on January 1, 1987, and has creditable service described in section 8411(b)(2) of this title may make the first election for the purpose of subsection (a) during the election period prescribed for such purpose by the Executive Director. The Executive Director shall prescribe an election period for such purpose which shall commence on January 1, 1987. An election by such an employee or Member during that election period shall be effective on the first day of the employee's or Member's first pay period which begins after the last day of that election period.

(b) In section 702(b)(4) of the bill, strike "401" and insert in lieu thereof "701".

Mr. DOLE. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZATION FOR S. 740 TO BE REFERRED TO COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. DOLE. Mr. President, I ask unanimous consent that when the Committee on Environment and Public Works reports to the Senate S. 740, it be referred to the Committee on Energy and Natural Resources for a period not to exceed 60 calendar days.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. DOLE. Mr. President, I ask the distinguished minority leader if he is in a position to confirm any or all of the following nominations on the Executive Calendar: Calendar No. 779, Michael P.W. Stone; Calendar No. 780, Eugene R. Sullivan; Calendar Nos. 781 and 782, under the Marine Corps; all nominations placed on the Secretary's desk, with the exception of the nomination of Edwin Corr; nominations reported today by the Committee on Armed Services.

Mr. BYRD. Mr. President, all the nominations identified by the majority leader have been cleared on this side, and we are ready to proceed.

Mr. DOLE. I thank the distinguished minority leader.

Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nominations just identified, and that they be considered en bloc and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered en bloc and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

DEPARTMENT OF THE INTERIOR

Jed Dean Christensen, of Virginia, to be Director of the Office of Surface Mining Reclamation and Enforcement.

DEPARTMENT OF DEFENSE

Michael P.W. Stone, of California, to be an Assistant Secretary of the Army.

THE JUDICIARY

Eugene R. Sullivan, of Maryland, to be a judge of the U.S. Court of Military Appeals for a term of 15 years.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

IN THE MARINE CORPS

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

TO BE LIEUTENANT GENERAL

Maj. Gen. Frank E. Petersen, Jr., xxx-xx-x... xxx-... U.S. Marine Corps.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

TO BE LIEUTENANT GENERAL

Maj. Gen. John Phillips, xxx-xx-xxxx, U.S. Marine Corps.

IN THE NAVY

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370.

TO BE VICE ADMIRAL

Vice Adm. Robert E. Kirksey, xxx-xx-xxxx xxx-.../1310, U.S. Navy.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

TO BE VICE ADMIRAL

Vice Adm. John M. Poindexter, xxx-xx-xx... xxx-.../1110, U.S. Navy.

IN THE MARINE CORPS

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by

the President under title 10, United States Code, section 601:

TO BE LIEUTENANT GENERAL

Maj. Gen. Clyde D. Dean, xxx-xx-xxxx U.S. Marine Corps.

IN THE AIR FORCE

Air Force nominations beginning Maj. Archie D. Barnes, xxx-xx-xxxx and ending Maj. Paul Rebek, xxx-xx-xxxx, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on April 24, 1986.

Air Force nominations beginning Pedro R. Cruz-Jimenez, and ending John W. Hofman, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on May 12, 1986.

Air Force nominations beginning Warren L. Griffin, Jr., and ending Frank L. Smith, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on May 12, 1986.

Air Force nominations beginning Maj. Joseph M. Bauer, xxx-xx-xxxx and ending Maj. Susan J. Troyer xxx-xx-xxxx, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on May 12, 1986.

IN THE ARMY

Army nominations beginning Philip J. Biondi, and ending Claude K. Smith, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on April 28, 1986.

IN THE MARINE CORPS

Marine Corps nomination of Capt. Timothy W. Foley, which was received by the Senate on April 25, 1986, and appeared in the CONGRESSIONAL RECORD on April 28, 1986.

Marine Corps nominations beginning Joseph P. Davis, and ending Walter O. McClenney, which nominations were received by the Senate on April 25, 1986, and appeared in the CONGRESSIONAL RECORD of April 28, 1986.

Marine Corps nominations beginning Robert G. Acosta, and ending Gover L. Wright, Jr., which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on May 12, 1986.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

MEASURES HELD AT THE DESK

The following concurrent resolution was ordered held at the desk by unanimous consent until the close of business on May 21, 1986:

S. Con. Res. 140. A concurrent resolution to pay tribute to the late William C. Lee and to designate June 6, 1986, as "William C. Lee Day."

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-3173. A communication from the Administrator of Veterans' Affairs, transmitting a draft of proposed legislation to amend title 38, United States Code, to make certain improvements in the educational assistance programs for veterans and eligible persons; to repeal the education loan programs; and for other purposes; to the Committee on Veterans' Affairs.

EC-3174. A communication from the Secretary of Agriculture, transmitting, pursuant to law, the third quarterly commodity and country allocation table for fiscal year 1986; to the Committee on Agriculture, Nutrition, and Forestry.

EC-3175. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on the President's fifth special message for fiscal year 1986; pursuant to the order of January 30, 1974, referred jointly to the Committee on Appropriations, the Committee on the Budget, the Committee on Commerce, Science, and Transportation, the Committee on Energy and Natural Resources, the Committee on Foreign Relations, and the Committee on the Judiciary.

EC-3176. A communication from the Assistant Secretary of the Army (Installations and Logistics), transmitting, pursuant to law, a report on the conversion of the transportation motor pool service at Fort Polk, LA, to performance by contract; to the Committee on Armed Services.

EC-3177. A communication from the Assistant Secretary of the Army (Installations and Logistics), transmitting, pursuant to law, a report with respect to the conversion of the laundry and dry cleaning service at Fort Jackson, SC, to performance by contract; to the Committee on Armed Services.

EC-3178. A communication from the Assistant Secretary of the Army Installations and Logistics, transmitting, pursuant to law, a report on the conversion of the dining facilities at Fort Dix, NJ, to performance by contract; to the Committee on Armed Services.

EC-3179. A communication from the Assistant Secretary of the Army (Installations and Logistics), transmitting, pursuant to law, a report on the conversion of the commissary shelf stocking function at Fort Leavenworth, KS, to performance by contract; to the Committee on Armed Services.

EC-3180. A communication from the Secretary of Commerce, transmitting, pursuant to law, the annual report of the U.S. Travel and Tourism Administration for fiscal year 1985; to the Committee on Commerce, Science, and Transportation.

EC-3181. A communication from the Secretary of Transportation, transmitting, pursuant to law, the 1986 annual report on Highway Safety Improvement Programs; to the Committee on Commerce, Science, and Transportation.

EC-3182. A communication from the Administrator of the National Oceanic and Atmospheric Administration, transmitting, pursuant to law, the Ocean Thermal Energy Conversion Report for fiscal year 1985; to the Committee on Energy and Natural Resources.

EC-3183. A communication from the Chairwoman of the United States International Trade Commission, transmitting, a draft of proposed legislation to provide authorization of appropriations for the U.S. International Trade Commission for fiscal year 1988; to the Committee on Finance.

EC-3184. A communication from the Administrator of General Services, transmitting a draft of proposed legislation to amend 31 U.S.C. 3726, payment for transportation, to permit prepayment audits for selected transportation bills, to permanently authorize payment of transportation audit contractors from carrier overpayments collected, and to authorize net overpayments collected to be transferred to the Treasury; to the Committee on Governmental Affairs.

EC-3185. A communication from the Secretary of Education, transmitting, pursuant to law, notice of final funding priorities for Postsecondary Education Programs for Handicapped Persons—Regional Centers for Deaf Individuals; to the Committee on Labor and Human Resources.

EC-3186. A communication from the Secretary of Education, transmitting, pursuant to law, final regulations for the Assistance to States for Education of Handicapped Children—State Plan Disapproval; to the Committee on Labor and Human Resources.

EC-3187. A communication from the Administrator of Veterans' Affairs, transmitting a draft of proposed legislation to amend title 38, United States Code, to repeal provisions relating to setting the interest rates on guaranteed or insured housing loans to veterans and inspecting manufactured homes purchased by veterans, to increase the VA loan fee, to authorize direct appropriations to the loan guaranty revolving fund, and for other purposes; to the Committee on Veterans' Affairs.

EC-3188. A communication from the Director of the Administrative Office of the U.S. Courts, transmitting pursuant to law, a report expressing concern over the impact of budget reductions on security and safety of the Federal judiciary; to the Committee on Appropriations.

EC-3189. A communication from the Administrator of Veterans' Affairs, transmitting a draft of proposed legislation to amend title 38, United States Code, to eliminate or modify statutory requirements for the Veterans' Administration (VA) to prepare reports which no longer serve their original purposes; to the Committee on Veterans' Affairs.

EC-3190. A communication from the Deputy Association Director for Royalty Management, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain overpayments of offshore lease revenues; to the Committee on Energy and Natural Resources.

EC-3191. A communication from the Deputy Association Director for Royalty Management, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain overpayments of certain offshore lease revenues; to the Committee on Energy and Natural Resources.

EC-3192. A communication from the Deputy Association Director for Royalty

Management, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain offshore lease revenues; to the Committee on Energy and Natural Resources.

EC-3192. A communication from the Deputy Association Director for Royalty Management, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain overpayment of certain offshore lease revenues; to the Committee on Energy and Natural Resources.

EC-3194. A communication from the Secretary of Energy, transmitting, pursuant to law, the Fifth Annual Revised Comprehensive Program Management Plan under section 4 of the Wind Energy Systems Act of 1980; to the Committee on Energy and Natural Resources.

EC-3195. A communication from the Chairman of Nuclear Regulatory Commission, transmitting, pursuant to law, the report of the nondisclosure of safeguards information by the Commission for the quarter ended March 31, 1986; to the Committee on Environment and Public Works.

EC-3196. A communication from the Chairman of the Foreign Claims Settlement Commission of the United States, transmitting, pursuant to law, the annual report of the Commission for calendar year 1985; to the Committee on Foreign Relations.

EC-3197. A communication from the Assistant Legal Advisor for Treaty Affairs, Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the 60-day period prior to May 16, 1986; to the Committee on Foreign Relations.

EC-3198. A communication from the District of Columbia Auditor, transmitting, pursuant to law, a report entitled "Review of Agency Fund 814—Securities Held by D.C. Treasury for the Fiscal Year Ended September 30, 1985"; to the Committee on Governmental Affairs.

EC-3199. A communication from the Special Counsel, Merit Systems Protection Board, transmitting, pursuant to law, a report on the investigation of the Secretary of Transportation setting forth findings and conclusions into allegations of violations of law, mismanagement, gross waste of funds, and substantial and specific danger to public safety in the air collision avoidance program of the Federal Aviation Administration.

EC-3200. A communication from the Executive Director of the National Arthritis Advisory Board, transmitting, pursuant to law, the annual report of the Board for 1985-86; to the Committee on Labor and Human Resources.

EC-3201. A communication from the Secretary of Education, transmitting, pursuant to law, the Director's Report on the National Assessment of Education Progress; to the Committee on Labor and Human Resources.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-716. A joint resolution adopted by the Legislature of the State of California; to the Committee on Agriculture, Nutrition, and Forestry.

"SENATE RESOLUTION No. 35

"Whereas, California agriculture is deeply buried in its worst financial crisis since the Great Depression; and

"Whereas, The beef cattle industry in this state is one of the segments of California agriculture that can least afford price instability at this time; and

"Whereas, The California beef cattle industry represents a $2 billion industry, consisting of approximately 3,500,000 head of beef cattle; and

"Whereas, The beef cattle market is governed by the supply and demand concept based on an orderly marketing process and has never received any governmental subsidies or price supports; and

"Whereas, It is the intent of a portion of the Food Security Act of 1985's Milk Price Support and Producer-Supported Dairy Program, commonly referred to as the dairy herd buy-out program, to avoid the creation of burdensome excess supplies of milk or milk products; and

"Whereas, It is difficult to adjust the number of dairy cows without impacting the red meat market; and

"Whereas, The dairy herd buy-out program, which has critically impaired this orderly process, will place an estimated 115,000 dairy cows in California on the market, resulting in a severely depressed market price to all beef cattle producers; and

"Whereas, Preliminary estimates indicate that the California beef cattle industry alone can anticipate to lose over the next six months approximately $250,000,000 in reduced beef price sales; and

"Whereas, The Food Security Act of 1985 gave the United States Secretary of Agriculture broad powers to carry out the dairy herd buy-out program over an 18-month period, beginning April 1, 1986; and

"Whereas, Sixty-five percent of the dairy herd buy-out program is scheduled to occur within the next five months; and

"Whereas, The Food Security Act of 1985 furthermore requires that the United States Secretary of Agriculture, in determining the conditions of this program, minimize the adverse effect of the dairy herd buy-out program on beef, pork, lamb, and poultry producers; now, therefore, be it

"Resolved by the Senate of the State of California, That the Members memorialize the United States Secretary of Agriculture to exercise the secretary's authority under the Food Security Act of 1985 to restore price stability for the beef cattle producers, in particular; and be it further

"Resolved, That the secretary is requested to reallocate the dairy herd purchases as evenly as possible over the three six-month periods of the Milk Price Support and Producer-Supported Dairy Program; and be it further

"Resolved, That the secretary is requested to allocate as evenly as possible its purchases of dairy cows on an equal daily basis within each six-month period; and be it further

"Resolved, That the secretary is requested to immediately commence purchasing red meat on a daily basis in direct proportion to the amount of dairy cows slaughtered each day; and be it further

"Resolved, That the secretary is requested to distribute the red meat purchases into new market channels that will not compete with previously existing markets; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the United States Secretary of Agriculture and to each Senator and Representative from California in the Congress of the United States."

POM-717. A petition from the Manager of the Port of Skamania County, Washington relative to certain Federal development money; to the Committee on Energy and Natural Resources.

POM-718. A concurrent resolution adopted by the Legislature of the State of New Hampshire; to the Committee on Energy and Natural Resource.

"A RESOLUTION IN SUPPORT OF KOREAN WAR VETERANS

"Whereas, the general court of New Hampshire recognizes and desires to memorilize the courageous sacrifices of the Korean War veterans during the Korean War; and

"Whereas, S. 1223, introduced in the United States Congress by Senator William L. Armstrong of Colorado, provides for commemoration of the Korean War veterans; now, therefore, be it

"Resolved by the House of Representatives, the Senate concurring: That the general court of New Hampshire supports S. 1223 and urges the members of the New Hampshire congressional delegation to do so also; and

"That copies of this resolution be transmitted to the Speaker of the United States House of Representatives, the President of the United States Senate, and each member of the New Hampshire congressional delegation."

POM-719. A joint resolution adopted by the Legislature of the State of Maine; to the Committee on Energy and Natural Resources:

"JOINT RESOLUTION MEMORIALIZING THE PRESIDENT OF THE UNITED STATES, THE VICE PRESIDENT OF THE UNITED STATES, MEMBERS OF THE UNITED STATES CONGRESS AND THE SECRETARY OF THE UNITED STATES DEPARTMENT OF ENERGY TO OPPOSE POLICIES TO BOLSTER THE PRICE OF OIL

"We, your Memorialists, the Senate and House of Representatives of the State of Maine in the One Hundred and Twelfth Legislative Session, now assembled, most respectfully request and petition the President of the United States, the Vice President of the United States, Members of the United States Congress and the Secretary of the United States Department of Energy as follows:

"Whereas, the Maine Legislature has learned of efforts by the Federal Government to artificially bolster the price of oil; and

"Whereas, these efforts by the administration have an adverse impact on the northeastern states which are dependent upon this source of energy; and

"Whereas, it was the northeast that helped support the oil producing states during the high priced energy crisis of the seventies; and

"Whereas, the northeast has paid its dues and should not be called upon again now that prices are more affordable through some artificial policy; now, therefore, be it

Resolved: That we, your Memorialists, do hereby respectfully urge and petition the President of the United States, Vice President of the United States, Members of the United States Congress and the Secretary of the United States Department of Energy to oppose any policy which will artificially bol-

ster the price of oil to the detriment of the northeastern states; and be it further

Resolved: That copies of this Memorial, duly authenticated by the Secretary of State, be transmitted to the President of the United States and Vice President of the United States, the President of the Senate and the Speaker of the House of Representatives in the United States Congress, the Secretary of the United States Department of Energy and to each Member of the Maine Congressional Delegation."

POM-720. A resolution adopted by the Board of Trustees of the Town of Griffith, Indiana, opposing certain provisions of H.R. 3838; to the Committee on Finance.

POM-721. A joint resolution adopted by the Legislature of the State of California; to the Committee on Finance.

"SENATE RESOLUTION No. 27

"Whereas, The California State Senate is on record in support of a federal tax reform plan which promotes "fairness, simplicity, and growth," but many of the revisions in the federal "Tax Reform Act of 1985" do not promote these objectives; and

"Whereas, California's cities, counties, special districts, and redevelopment agencies issued $18 billion in long-term, tax-exempt debt in 1985 to promote such valuable public purposes as affordable housing, schools, hospitals, sewers, water lines, and public power facilities; and

"Whereas, The United States House of Representatives has passed the "Tax Reform Act of 1985" to reduce the volume of tax-exempt debt issued by state and local governments and the United States Senate Finance Committee has begun hearings on these federal tax code revisions; and

"Whereas, The California Senate Committee on Local Government held a special hearing on how the Tax Reform Act of 1985 would affect California's local governments; and

"Whereas, The loss of tax-exempt financing will increase California's borrowing costs by an estimated $4 billion while federal revenues will increase by just $3 billion over the next five years; and

"Whereas, The uniform volume limit in the proposed act will force local governments to compete to finance worthwhile public projects with fewer dollars, pitting hospitals against housing for senior citizens; and

"Whereas, The uniform volume limit will specifically reduce multifamily mortgage revenue bonds by more than 90% and single-family mortgage revenue bonds by nearly 70%, thus seriously undercutting California's efforts to produce more affordable housing; and

"Whereas, Because the proposed requirement in the act that bond proceeds be spent within 30 days is unrealistic and proposed new definitions in the act for qualified bonds are unclear, many bonds for needed public works will become taxable, thereby boosting local borowing costs; and

"Whereas, The January 1, 1986, effective date of the "Tax Reform Act" places an unfair and unreasonable burden on California's local governments and taxpayers of complying with the fundamental changes in the proposed act even before it is enacted; and

"Whereas, The January 1, 1986, effective date has brought the California tax-exempt bond market nearly to a halt, with only two local tax-exempt financings worth $60 million having been completed in California and filed with the California Debt Advisory Commission since January 1, 1986, as compared with 35 financings worth $300 million in January 1985; and

"Whereas, Tax-exempt bonds issued in 1986 could become retroactively taxable to January 1, 1986, if the proposed act becomes law; now threfore, be it

"Resolved by the Senate of the State of California, That the Members of the Senate of the State of California respectfully memorialize the President and the Congress of the United States to carefully consider how the loss of tax-exempt financing for California outweighs the expected increase in federal revenues, particularly at a time when California's local governments will lose substantial revenues from the end of federal General Revenue Sharing and from the federal Gramm-Rudman-Hollings Law; and be it further

"Resolved, That the Members of the Senate respectfully request the California congressional delegation to pursue postponement of the effective date in revisions to the tax exempt bond provisions of the tax code to either the date of its enactment or a date certain in 1987; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-722. A resolution adopted by the Senate of the State of Pennsylvania; to the Committee on Foreign Relations:

"RESOLUTION

"Whereas, Recent acts of terrorism in Europe have served to highlight the dramatic increase during the past few years in terrorist activity around the world; and

"Whereas, During the 1980's one-third of the international terrorist incidents have been aimed at United States citizens and property, many have been targeted for American diplomats, military personnel and embassies; and

"Whereas, American businessmen and their firms have become frequent victims of international terrorist attacks; in 1985, 67 terrorist attacks involved United States business personnel and facilities overseas; and

"Whereas, Many Americans are canceling vacation plans for trips overseas because of the risks presented by unpredictable and indiscriminate terrorist attacks at and aboard transportation facilities, as well as at tourist attractions and entertainment spots; therefore be it

"Resolved, That the Senate of Pennsylvania condemn terrorism and urge the United States, its European allies and all concerned nations throughout the world to take strong action to combat terrorism and make international travel safe; and be it further

"Resolved, That copies of this resolution be transmitted to the President of the United States, to the presiding officers of each house of Congress and to each member of Congress from Pennsylvania."

POM-723. A resolution adopted by the Senate of the State of Pennsylvania; to the Committee on Foreign Relations:

"RESOLUTION

"Whereas, Zionism is the movement of Jewish peoplehood, dedicated to the Jewish people's right to self-determination, and of its aspiration to live in freedom and political independence in its ancient homeland; and

"Whereas, Zionism is committed to liberal humanistic and democratic values and represents Jewish liberation, achievement and pride; and

"Whereas, From its conception, Zionism has always endeavored, by negotiation and compromise, to reconcile its aims with the rights and national aspirations of its Arab neighbors; and

"Whereas, In 1975, the nation members of the United Nations passed Resolution No. 3379; and

"Whereas, Resolution No. 3379, originally meant to decry racism, is being used as a pretext to incite hatred against the Jewish people, to subvert the power of resistance of nations upholding human liberty and national freedom and to eliminate the sovereign existence of Israel; therefore be it

"Resolved, That the Senate of the Commonwealth of Pennsylvania respectfully petitions the nation members of the United Nations to repudiate Resolution No. 3379, which defames the essence and practice of Zionism and libels the Jewish people; and be it further

"Resolved, That copies of this resolution be transmitted to the presiding officers of each house of Congress and to each member of Congress from Pennsylvania."

POM-724. A resolution adopted by the City Council of New Orleans, Louisiana supporting the President's strike on Libya; to the Committee on Foreign Relations.

POM-725. A resolution adopted by the City Council of New Orleans, Louisiana deploring the decision of the French Government forbidding the use of French airspace by American pilots engaged in fighting international terrorism; to the Committee on Foreign Relations.

POM-726. A resolution adopted by the Board of Directors of the Greater Lorain Chamber of Commerce, Lorain, Ohio, endorsing the designation of June 21, 1986 as Save American Jobs/Industry Day; to the Committee on the Judiciary.

POM-727. A resolution adopted by Local 5644, United Steelworkers of America, Toronto, Ohio, endorsing the designation of June 21, 1986 as Save American Jobs/Industry Day; to the Committee on the Judiciary.

POM-728. A resolution adopted by the Legislature of the State of Maine; to the Committee on Labor and Human Resources.

"JOINT RESOLUTION MEMORIALIZING CONGRESS TO EVALUATE FURTHER THE HEALTH RISK FROM THE PRESENCE OF METHYLENE CHLORIDE AS A RESIDUE FROM ITS USE AS A SOLVENT IN THE EXTRACTION OF CAFFEINE

"We, your Memorialists, the Senate and House of Representatives of the State of Maine, in the One Hundred and Twelfth Legislative Session assembled, most respectfully request and petition the Congress of the United States, as follows:

"Whereas, certain brands of coffee are decaffeinated by a method which uses methylene chloride as a solvent, leaving a residue of methylene chloride in the dry coffee product; and

"Whereas, the United States Food and Drug Administration has determined that methylene chloride is carcinogenic when used in aerosol products such as hair sprays; and

"Whereas, the United States and Drug Administration has determined that methylene chloride may be present in coffee as a residue from its use as a solvent in the extraction of caffeine from green coffee beans

at a level not to exceed 10 parts per million; and

"Whereas, the methodologies used by the Environmental Protection Agency to evaluate cancer risks from methylene chloride have projected a risk that is 26 times greater than the United States Food and Drug Administration projections; now, therefore, be it

"*Resolved:* That We, your Memorialists, respectfully urge and request the Congress of the United States to take immediate action to request further testing and evaluation of the safety and advisability of the acceptable level, if any, of methylene chloride allowed in coffee as a residue from its use as a solvent in the extraction of caffeine from green coffee beans; and be it further

"*Resolved:* That the disparity between safe levels of methylene chloride as recognized by the United States Food and Drug Administration and the Environmental Protection Agency be reevaluated and explained; and be it further

"*Resolved:* That copies of this Memorial, duly authenticated by the Secretary of State, be immediately transmitted by the Secretary of State to the Congress of the United States.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. LUGAR, from the Committee on Foreign Relations, with an amendment in the nature of a substitute:

H.R. 4151. An act to provide enahanced diplomatic security and combat international terrorism, and for other purposes (Rept. No. 99-304).

By Mr. THURMOND, from the Committee on the Judiciary, with amendments:

H.R. 2434. An act to authorize appropriations for the Patent and Trademark Office in the Department of Commerce, and for other purposes (with additional views) (Rept. No. 99-305).

By Mr. DOMENICI, from the Committee on the Budget, without amendment:

S. Res. 410. A resolution waiving section 303(a) of the Congressional Budget Act of 1974 with respect to the consideration of the conference report on H.R. 2672.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry:

Marvin Duncan, of Missouri, to be a member of the Farm Credit Administration Board, Farm Credit Administration, for a term of 4 years; and

Frank W. Naylor, Jr., of Virginia, to be a member of the Farm Credit Administration Board, Farm Credit Administration, for a term of 6 years.

By Mr. HATCH, from the Committee on Labor and Human Resources:

Judith D. Moss, of Ohio, to be a member of the National Advisory Council on Women's Educational Programs for a term expiring May 8, 1987;

Helen J. Valerio, of Massachusetts, to be a member of the National Advisory Council on Women's Educational Programs for a term expiring May 8, 1987;

Elizabeth Helms Adams, of California, to be a member of the National Advisory Council on Women's Educational Programs for a term expiring May 8, 1987;

Mary Jo Arndt, of Illinois, to be a member of the National Advisory Council on Women's Educational Programs for a term expiring May 8, 1987;

Esther Kratzer Everett, of New York, to be a member of the National Advisory Council on Women's Educational Programs for a term expiring May 8, 1987;

Della M. Newman, of Washington, to be a member of the National Advisory Council on Women's Educational Programs for a term expiring May 8, 1987;

John O. Laird, of Wisconsin, to be a member of the National Advisory Council on Women's Educational Programs for a term expiring May 8, 1988;

Hazel M. Richardson, of California, to be a member of the National Advisory Council on Women's Educational Programs for a term expiring May 8, 1988;

Betty Ann Gault Cordoba, of California, to be a member of the National Advisory Council on Women's Educational Programs for a term expiring May 8, 1988;

Irene Renee Robinson, of the District of Columbia, to be a member of the National Advisory Council on Women's Educational Programs for a term expiring May 8, 1988;

Judy F. Rolfe, of Montana, to be a member of the National Advisory Council on Women's Educational Programs for a term expiring May 8, 1988;

Diana Powers Evans, of Oregon, to be a member of the National Advisory Council on Women's Educational Programs for a term expiring May 8, 1988;

Naomi Brummond, of Nebraska, to be a member of the National Advisory Council on Women's Educational Programs for a term expiring May 8, 1989;

Lilli K. Dollinger Hausenfluck, of Virginia, to be a member of the National Advisory Council on Women's Educational Programs for a term expiring May 8, 1989;

Marcilyn D. Leier, of Minnesota, to be a member of the National Advisory Council on Women's Educational Programs for a term expiring May 8, 1989;

Virginia Gillham Tinsley, of Arizona, to be a member of the National Advisory Council on Women's Educational Programs for a term expiring May 8, 1989;

Marge Bodwell, of New Mexico, to be a member of the National Advisory Council on Women's Educational Programs for a term expiring May 8, 1989;

Nanette Fabray MacDougall, of California, to be a member of the National Council on the Handicapped for a term expiring September 17, 1987;

John F. Mills, of Virginia, to be a member of the National Council on the Handicapped for a term expiring September 17, 1988;

Robert S. Muller, of Michigan to be a member of the National Council on the Handicapped for a term expiring September 17, 1988;

Brenda Premo, of California, to be a member of the National Council on the Handicapped for a term expiring September 17, 1988;

Phyllis D. Zlotnick, of Connecticut, to be a member of the National Council on the Handicapped for a term expiring September 17, 1988;

Paula V. Smith, of Missouri, to be Administrator of the Wage and Hour Division, Department of Labor;

John A. Pendergrass, of Minnesota, to be an Assistant Secretary of Labor;

Salvatore R. Martoche, of New York, to be an Assistant Secretary of Labor;

Charles J. Chamberlain, of Illinois, to be a member of the Railroad Retirement Board for the term of 5 years from August 29, 1984;

Morris I. Liebman, of Illinois, to be a member of the Board of Directors of the United States Institute of Peace for a term of 2 years expiring January 19, 1987;

Phyllis P. Berney, of Wisconsin, to be a member of the National Council on the Arts for a term expiring September 3, 1990;

Lynne Vincent Cheney, of Wyoming, to be Chairperson of the National Endowment for the Humanities for a term of 4 years;

Richard J. Fitzgerald, of Illinois, to be a member of the Board of Trustees of the Harry S Truman Scholarship Foundation for a term expiring December 10, 1991.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to appear and testify before any duly constituted committee of the Senate.)

By Mr. DANFORTH, from the Committee on Commerce, Science, and Transportation:

Vice Admiral Paul A. Yost, Jr., U.S. Coast Guard, to be Commandant, U.S. Coast Guard, for a term of 4 years with the grade of admiral while so serving;

Rear Admiral James C. Irwin, U.S. Coast Guard, to be Vice Commandant, U.S. Coast Guard, with the grade of vice admiral while so serving;

Rear Admiral Donald C. Thompson, U.S. Coast Guard, to be the Commander, U.S. Coast Guard Atlantic Area, with the grade of vice admiral while so serving.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to appear and testify before any duly constituted committee of the Senate.)

Mr. DANFORTH. Mr. President, for the Committee on Commerce, Science, and Transportation, I also report favorably a nomination list in the Coast Guard which appeared in full in the CONGRESSIONAL RECORD of May 12, 1986, and, to save the expense of reprinting them on the Executive Calendar, I ask that these nominations lie at the Secretary's desk for the information of Senators.

By Mr. GOLDWATER, from the Committee on Armed Services:

Mr. GOLDWATER. Mr. President, from the Committee on Armed Services, I report favorably the attached listing of nominations:

Michael P.W. Stone, of California, to be an Assistant Secretary of the Army; and

Eugene R. Sullivan, of Maryland, to be a judge of the U.S. Court of Military Appeals for a term of 15 years.

(The above nominations were reported from the Committee on Armed Services with recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. GOLDWATER. Mr. President, from the Committee on Armed Serv-

ices, I report favorably the attached listing of nominations.

Those identified with a single asterisk (*) are to be placed on the Executive Calendar. Those identified with a double asterisk (**) are to lie on the Secretary's desk for the information of any Senator since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of April 28, 1986, at the end of the Senate proceedings.)

*1. Maj. Gen. Frank E. Petersen, Jr., U.S. Marine Corps to be lieutenant general. (Ref. No. 1040)

*2. Maj. Gen. John Phillips, U.S. Marine Corps to be lieutenant general. (Ref. No. 1041)

**3. In the Army National Guard there are 68 promotions to colonel and below (list begins with Philip J. Biondi). (Ref. No. 1043)

**4. Capt. Timothy W. Foley, U.S. Marine Corps, for appointment to the grade of major. (Ref. No. 1044)

**5. In the Marine Corps there are two appointments to the grade of second lieutenant (list begins with Joseph P. Davis). (Ref. No. 1045)

Total: 73.

Also reported by Mr. GOLDWATER, from the Committee on Armed Services:

Vice Adm. Robert B. Kirksey, U.S. Navy, to be vice admiral on the retired list;

Vice Adm. John M. Poindexter, U.S. Navy, to be vice admiral in a position of importance and responsibility designated by the President; and

Maj. Gen. Clyde D. Dean, U.S. Marine Corps, to be lieutenant general.

Mr. GOLDWATER. For the committee on Armed Services, I also report favorably three nomination lists in the Air Force and one nomination list in the Marine Corps which were printed in full in the CONGRESSIONAL RECORD of May 12, 1986, and, to save the expense of reprinting them on the Executive Calendar, I ask unanimous consent that these nominations lie at the Secretary's desk for the information of Senators.

By Mr. LUGAR, from the Committee on Foreign Relations:

Morton I. Abramowitz, of Massachusetts, a career member of the Senior Foreign Service, class of Career Minister, to be an Assistant Secretary of State (Executive Report 99-14).

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HART (for himself and Mr. BOREN):

S. 2465. A bill to amend section 207(e) of title 18, United States Code, to require that the Executive Office of the President be treated as a single agency or department; to the Committee on the Judiciary.

By Mr. JOHNSTON:

S. 2466. A bill to designate a segment of the Saline Bayou in Louisiana as a component of the National Wild and Scenic Rivers System; to the Committee on Energy and Natural Resources.

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S. 2467. A bill to approve an interstate highway project in Hawaii; to the Committee on Environment and Public Works.

By Mr. DENTON:

S. 2468. A bill to amend the Federal Aviation Act of 1958 to strengthen aviation security programs, deter acts of terrorism in airports, and provide for the security of U.S. citizens traveling by air; to the Committee on Commerce, Science, and Transportation.

By Mr. BRADLEY:

S. 2469. A bill to amend the Immigration and Nationality Act to restrict the examination of children who apply for naturalization; to the Committee on the Judiciary.

By Mr. THURMOND:

S. 2470. A bill to amend the Tariff Schedules of the United States to continue the suspension of duty on menthol feedstocks; to the Committee on Finance.

By Mr. D'AMATO:

S. 2471. A bill to establish an Office of Inspector General in the Nuclear Regulatory Commission, and for other purposes; to the Committee on Environment and Public Works.

By Mr. CRANSTON:

S. 2472. A bill to amend the Export Administration Act of 1979 to require the establishment and operation of the Western regional export licensing office; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. RIEGLE (for himself and Mr. HOLLINGS):

S. 2473. A bill to amend the National Aeronautics and Space Act of 1958 regarding the National Aeronautics and Space Council established by that act; to the Committee on Commerce, Science, and Transportation.

By Mr. DURENBERGER (for himself and Mr. BENTSEN):

S. 2474. A bill to amend title XVIII of the Social Security Act to encourage the availability of new technologies and new procedures which are not recognized by the Medicare prospective payment system, to collect data to determine whether such technologies and procedures should be so recognized on a permanent basis, to provide for annual recalibration of diagnosis-related groups, and for other purposes; to the Committee on Finance.

By Mr. SIMON:

S. 2475. A bill to amend title 38, United States Code, to provide limited authority to the Veterans' Administration to guarantee a home loan made to a veteran for the purpose of refinancing a home loan guaranteed, insured, or made by the Veterans' Administration and secured by a home owned but not occupied by the veteran; to the Committee on Veterans' Affairs.

By Mr. HUMPHREY (for himself, Mr. LUGAR, Mr. HATCH, Mr. NICKLES, Mr. LEAHY, Mr. SIMON, Mr. GRASSLEY, Mr. METZENBAUM, and Mr. MOYNIHAN):

S. 2476. A bill to amend part E of title IV of the Social Security Act to require States to furnish, and the Secretary of Health and Human Services to publish, statistical data relating to the incidence of adoptions; to the Committee on Finance.

By Mr. SYMMS (for himself, Mr. STAFFORD, Mr. BENTSEN, Mr. BURDICK, Mr. DOLE, Mr. ABDNOR, Mr. BAUCUS, Mr. BUMPERS, Mr. CHAFEE, Mr. CHILES, Mr. DENTON, Mr. DOMENICI, Mr. DURENBERGER, Mr. EVANS, Mr. HUMPHREY, Mr. INOUYE, Mr. JOHNSTON, Mr. KERRY, Mr. LAUTENBERG, Mr. LONG, Mr. MATSUNAGA, Mr. MCCLURE, Mr. MITCHELL, Mr. MOYNIHAN, Mr. QUAYLE, Mr. SIMON, and Mr. WEICKER):

S.J. Res. 351. Joint resolution to designate June 26, 1986, as "National Interstate Highway Day"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. DECONCINI:

S. Con. Res. 141. A concurrent resolution expressing the sense of Congress for full representation by American ethnic groups in the awarding of Statue of Liberty medals; to the Committee on the Judiciary.

By Mr. DOLE (for Mr. ROTH (for himself, Mr. STEVENS, and Mr. EAGLETON)):

S. Con. Res. 142. A concurrent resolution authorizing a technical correction to be made in the enrollment of the bill H.R. 2672; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HART (for himself and Mr. BOREN):

S. 2465. A bill to amend section 207(e) of title 18, United States Code, to require that the Executive Office of the President be treated as a single agency or department; to the Committee on the Judiciary.

ETHICAL TREATMENT OF THE EXECUTIVE OFFICE OF THE PRESIDENT

Mr. HART. Mr. President, over the last 5 years, the American people have learned that ethical impropriety is no stranger to this administration. From the Superfund scandals at EPA to charges of insider trading and apparent cronyism at the highest levels, the administration's message about government ethics has been clear: Ask not what you can do for your country, ask rather what personal interest lies in public service. Rather than avoiding any appearance of impropriety, this mentality says: If Caesar's wife is going shopping, let her use the "limo" from the motor pool.

The most recent use of public office for private gain involves the President's former image maker, Michael K. Deaver.

Mr. Deaver, who last year emerged from three decades of service to the Reagan family, lost little time in parlaying his friendship with the First Family into a lucrative lobbying business. There is not now, and there should never be, a law against being successful. But investigations by the General Accounting Office, two House committees, the Senate Judiciary Commitee, and others are concluding that Mr. Deaver's activities crossed the line from purely private enterprise to personal indiscretions and possible violations of the law.

As my colleagues know, Mr. Deaver, whose lobbying firm won the right to represent Canada, has been tied to White House decisions on naming a special acid rain envoy to the Canadian Government and subsequent talks on this issue. Some of these activities may have taken place during his White House service; others apparently occurred within 1 year of his separation from the Executive. Other potential abuses are being pursued regarding a steel tariff decision to which a Korean client of Mr. Deaver was a party. The investigations could culminate in criminal charges against Mr. Deaver. Whatever the outcome, existing law seems sufficient with respect to determining Mr. Deaver's future.

At the same time, the Deaver revelations suggest that the Ethics in Government Act contains a loophole which permits former officials to evade the law in ways Congress never contemplated. The legislation I am introducing today, with Senator DAVID BOREN, and sponsored in the House by Congressman GERRY SIKORSKI, will close that loophole immediately.

The Ethics in Government Act permanently bars former officials from influencing decisions by agencies, bureaus, or departments to which they were attached on issues in which they were personally and substantially involved. It further prohibits such activities on other issues, in which former officials were not directly involved, for 1 year.

The act empowers the Director of the Office of Government Ethics to determine how the act applies to Federal agencies and bureaus. Under those regulations, integral parts of the White House operation have been deemed independent entities. Under the rules, the Office of Management and Budget, the National Security Council, the Council of Economic Advisers, the Council on Environmental Quality, the Office of Science and Technology, the United States Trade Representative, and the Office of Policy Development are identified as separate from the White House.

Mr. President, this strains credulity. We are talking about executive branch offices responsible to the President of the United States. On whose behalf is the National Security Council making decisions? Whose budget does the Office of Management and Budget prepare? Whom is the CEA advising about the economy? It's obvious; these offices house policy servants of the President of the United States.

This issue is relevant to the Deaver affair. As Mr. William Safire noted recently in the New York Times:

> Mr. Deaver—who represented Rockwell's B-1 bomber in 1980—attended NSC meetings airing the controversy of B-1 versus Stealth, and was rehired by Rockwell; he has since visited the head of OMB on the same manner.

By the rules established by the Ethics Office, Mr. Deaver, who spent more than 4 years in the White House, can claim that he lobbied a separate agency when he spoke with OMB Director Miller about the B-1.

Mr. President, most Americans lament the fact that national security decisions, such as whether to build more B-1's, can become subjects for arm twisting by corporate lobbyists. Even if Mr. Deaver had never been associated with the White House, meetings like this are of questionable propriety. But his clearly established relations with the White House and the contractor raise serious questions. And existing law, at present, seems inadequate to respond.

My legislation amends the act to ensure the roof of the White House extends over offices directly responsible to the President. The Ethics Act appropriately bars retired officials from lobbying their own agencies, particularly when they've been involved in key decisions affecting their new corporate interests. While this needed correction cannot affect the outcome of the Deaver investigations, it will considerably narrow the wiggle room for future staffers turned lobbyists.

Mr. President, I am pleased that Congressman GERRY SIKORSKI has decided to sponsor the companion measure to ths bill in the House. Congressman SIKORSKI has been an active participant in the Deaver investigations as chairman of the House Post Office Investigations Subcommittee, and as a leading member of the Energy and Commerce investigations panel.

Mr. President, even with enactment of this legislation, larger issues will remain. Senators BOREN and PRYOR have introduced legislation to curb instances where former officials improperly lobby the administration on behalf of foreign governments and clients. Senator BOREN is also a leader to enact long overdue reforms to curtail abuses by PAC's. Some have criticized these efforts as remnants from an overly ethics-conscious Watergate age. But those of us who believe that public service is an honor, and not a means for personal and corporate self-aggrandizement, are not satisfied with the status quo. The best government money can buy remains the worst government America can have.

● Mr. BOREN. Mr. President, I am pleased to join my colleague, Senator HART, in cosponsoring a bill to tighten the provisions of current ethics laws dealing with the executive branch staff.

Current ethics laws have been interpreted to read that the relationships between the Office of Management and Budget, the internal White House staff, the Council of Economic Advisers, and other entities of the Executive Office of the President have no relationship for the purpose of violations under the Ethics in Government Act.

It is unrealistic to believe that the Executive Office of the President is meant to be a divided and separately administered in terms of policy development. It is likewise unrealistic to believe that one arm of the White House has no input, oversight, or relationship with another. Therefore, it is unwise to allow our ethics laws to be potentially abused by those who can exploit a loophole in our statutes and personally profit from it.

Let us consider this scenario. Today, it is illegal for you to leave a policy recommending position in the Office of the Trade Representative, take a consulting job, and directly lobby your previous peers at the OTR on a matter which you have expertise from your previous position. However, due to the way the law is written, you may take your lobby effort directly to the White House staff—or vice versa, and not be subject to a violation of the Ethics in Government Act.

To think of the executive branch—which is under the direction of one President of the United States—as an independent array of offices, as our ethics statutes would suggest, rubs hard against the grain of a responsible government. President Truman's quote—the "buck stops here"—holds no meaning if the Office of the President has no coordinated, central responsibility.

I commend my friend and colleague from Colorado for his activity in this area. I urge the careful consideration of my colleagues in support of this legislation.●

By Mr. JOHNSTON:

S. 2466. A bill to designate a segment of the Saline Bayou in Louisiana as a component of the National Wild and Scenic Rivers System; to the Committee on Energy and Natural Resources.

SALINE BAYOU, LA

● Mr. JOHNSTON. Mr. President, today I am introducting legislation to designate a segment of the Saline Bayou in Louisiana as a component of the national Wild and Scenic Rivers System.

Saline Bayou is located in central Louisiana and, for the most part, is within the boundary of the Kisatchie National Forest.

Saline Bayou is generally considered one of Louisiana's most scenic and unique streams. During the 1960's as canoeing increased in popularity, the Forest Service designated and maintained the segment of the bayou between Cloud Crossing recreation area and State Highway 156 as a river float trip area. The bayou, with its placid moving flow, meandering route, black water and moss-draped cypress trees, is very picturesque. The upper section is characterized by towering pines and bottomland hardwoods, while the lower area is dotted with bald cypress. There is diverse wildlife population in the area. Deer and raccoon are common. Beaver are found along the lower segments of the bayou, and bobcat and grey fox are frequently seen. Turkey, cormorant, several species of woodpecker and wood duck, and the blue heron are common along the entire length of the bayou.

The 19-mile segment of Saline Bayou would be administered by the Secretary of Agriculture.

Mr. President, the Saline Bayou legislation was originally introduced in the House by Congressman JERRY HUCKABY. It passed the House as a part of H.R. 4350, an omnibus bill that deals with some eight rivers or river segments all over the country. Senator WALLOP, chairman of the Subcommittee on Public Lands, Reserved Water and Resource Conservation, has indicated that he would prefer to hold hearings on individual wild and scenic rivers bills rather than pursue the omnibus approach adopted by the House. That is why I am introducing the Saline Bayou bill at this time.

I am hopeful that the Committee on Energy and Natural Resources and the Congress will act expeditiously on this legislation.●

By Mr. DENTON:

S. 2468. A bill to amend the Federal Aviation Act of 1958 to strengthen aviation security programs, deter acts of terrorism in airports, and provide for the security of U.S. citizens traveling by air; to the Committee on Commerce, Science, and Transportation.

ANTITERRORISM AND AIR SECURITY ACT

Mr. DENTON. Mr. President, I rise today to introduce the Antiterrorism and Air Security Act of 1986. The purpose of the bill is to strengthen aviation security programs, deter acts of terrorism in airports and provide for the security of U.S. citizens traveling by air.

Mr. President, the shocking hijacking of TWA flight 847, EgyptAir 648, the airport massacres in Rome and Vienna and the bombing of TWA flight 840 underscores the necessity for effective security at airports in this country as well as abroad. The aftermath of these bloody terrorist episodes demonstrated that lax airport security may have provided the opportunity for terrorists to carry out their grim mission of vengeance and death.

Mr. President, the United States must take a lead in securing its airports from access by terrorists and must also work with the international community to prevent the loss of lives of innocent air travelers at the hands of terrorists. The bill which I am introducing today will allow this Nation to take such a lead.

The Antiterrorism and Air Security Act of 1986 will require that a criminal history check be conducted on any airline or airport employee whose duties permit them access to secured areas of airports or to commercial aircrafts. The bill also proposes to make it a Federal crime to enter airport secured areas without authority. The latter provision is intended to deter the unlawful circumvention of airport security systems as well as the unauthorized penetration of secure areas on airports. Such activity must be forcefully proscribed by Federal law to combat any threat of terrorist activity against civil aviation in this country.

This bill is drafted to dovetail with the existing security requirements of sections 315 and 316 of the Federal Aviation Act of 1958, as amended. Notably, security requirements would be imposed, after notice and comment, through the current regulatory structure on air carriers and airport operators, as appropriate. As is the case currently in the banking and securities trading industries, the employing entity would directly request background investigations. FBI centralized criminal records could be reviewed, as appropriate, but information would only be available to authorized personnel, and only for employment screening purposes. Background information would not thereby become available to the public under the Freedom of Information Act (5 U.S.C. 552).

Mr. President, this bill is molded from S. 274, the Nuclear Power Plant Security and Antiterrorism Act, which passed the Senate on October 3, 1985. As such, the bill contains specific language to protect the civil liberties of the individuals to be fingerprinted. That is, the bill specifically directs the Administrator to prescribe regulations for the taking of fingerprints and for establishing the conditions for both using the information and limiting the redissemination of the information provided by the record check in a manner limited to the purposes contained in the act. The legislation gives discretion to the Administrator to implement a practical program, through regulation, for carrying out the purposes of the act. Because of the important due process and privacy interests of prospective employees, it is my belief that the regulations prescribed by the Commission shall contain the following minimum requirements:

First. Individuals who are asked to submit fingerprints under the program will be notified that the fingerprints will be used to run a criminal history records check through the FBI;

Second. Individuals who are subject to fingerprinting will be provided with an opportunity to complete and correct the information contained in the FBI's criminal history records prior to any adverse job action being taken; and

Third. The administration will establish procedures to ensure that the information provided will only be used to determine whether the person is fit to be given access to airport secured areas, and for no other purpose.

Finally, the bill includes sense of the Congress language that the President should undertake discussions with any nation which U.S. air carriers service and U.S. citizens travel to and from by air, to encourage such nations to implement similar security measures as provided for in this act to combat terrorism and provide security for air travel; and that the President should encourage U.S. air carriers not to service any nation that does not cooperate in increasing airport and air carrier security.

Mr. President, we must have international cooperation if we are to prevent the growth and coordination of the international terrorist network. International cooperation in increasing airport and air carrier security is particularly important in light of a shocking development which recently came to the attention of the Judiciary Subcommittee on Security and Terrorists, which I chair.

Apparently, the Palestine Liberation Organization has embarked on the acquisition of East African duty-free shops. Intelligence sources have confirmed separately that the PLO has invested $500,000 in a duty-free shop in the Dar es Salaam airport in Tanzania. As these shops are normally located "airside," the goods are supplied by trucks, which are not usually searched. By the time passengers can buy duty-free items, they have already passed through security screening and they are given their purchases in sealed bags, which are not searched before embarkation.

I believe that these developments could have a profound negative impact on international airport security, an impact which could be countered by adoption of this bill.

Mr. President, this bill, which is endorsed by the administration, will help to ensure that only individuals who are reliable and trustworthy will have access to the secured areas of our airports. It will safeguard the security of

the United States and the welfare of the American people by protecting our airports from infiltration by terrorists.

I urge my colleagues to support this necessary measure.

Mr. President, I ask unanimous consent that the full text of the bill and a letter from Secretary Elizabeth Dole be printed at the conclusion of my statement.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2468

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Antiterrorism and Air Security Act of 1986".

PRE-EMPLOYMENT INVESTIGATIONS

SEC. 2. Section 316 of the Federal Aviation Act of 1958 (hereinafter referred to as the "Act") (49 U.S.C. 1357), is amended by redesignating subsection (f) as subsection (g) and inserting after subsection (e) the following new subsection:

"PRE-EMPLOYMENT INVESTIGATIONS

"(f)(1) In order to ensure the security of aircraft and the passengers, crew, and cargo of such aircraft, the Administrator shall require by regulation that any person employed, or to be employed, in a position in which such person is authorized, or may authorize others, access to air carrier or foreign air carrier aircraft, or to secured areas of United States airports serving air carriers or foreign air carriers, be subjected to any investigation, including fingerprinting, as the Administrator determines necessary. Any air carrier, foreign air carrier, or airport operator who employs such persons, or authorizes or contracts for the services of such persons, shall take actions necessary to ensure that any investigation required by the Administrator is performed.

"(2)(A) If the Administrator requires fingerprinting to conduct a criminal history records check, such fingerprints shall be submitted to the Attorney General of the United States through any person designated by the Administrator in consultation with the Attorney General for identification and a criminal history records check. The costs of any identification and records check conducted pursuant to this paragraph shall be paid by the employer. Notwithstanding any other provision of law, the Attorney General may provide all the results of the records check to any person designated by the Administrator in consultation with the Attorney General.

"(B) For purposes of administering this subsection, the Administrator shall prescribe regulations to—

"(i) implement procedures for the taking of fingerprints;

"(ii) establish the conditions for use of information received from the Attorney General to limit the dissemination of such information, and ensure that such information is used solely for the purposes provided in this subsection; and

"(iii) provide individuals subject to fingerprinting the right to complete and correct information contained in the criminal history records prior to any final adverse action.

"(C) Notwithstanding any other provision of law, disclosure of information under authority of this subsection shall be considered to be authorized under section 552a of title 5, United States Code, and is not a waiver of the right not to comply with a request for such information under section 552 of such title.

"(3)(A) Except as provided in subparagraph (B) of this paragraph, no air carrier, foreign air carrier, or airport operator shall employ, or authorize or contract for the services of, any person in duties for which a pre-employment investigation is required by the Administrator and which include access to air carrier aircraft or foreign air carrier aircraft or secured areas of United States airports serving air carriers or foreign air carriers, either in the absence of such an investigation or if the results of such investigation indicate the existence of a factor the Administrator has determined to warrant exclusion from access to such aircraft or secured areas.

"(B) It shall not be a violation of subparagraph (A) of this paragraph for an air carrier, foreign air carrier, or airport operator to employ in duties, or authorize or contract for employment in duties, that include access to air carrier or foreign air carrier aircraft, or secured areas of United States airports serving air carriers or foreign air carriers, a person for whom an investigation under this subsection has not been conducted, if such access is carried out pursuant to a plan approved by the Administrator providing for escort or monitoring of such person, while so temporarily employed on such aircraft or in such secured areas.

"(4) The Administrator and the Attorney General shall jointly establish reasonable fees and charges to recover the costs of the United States in administering this subsection, and shall proportionately credit to the appropriations affected any moneys collected under this subsection.".

CRIMINAL PENALTIES

SEC. 3. Section 902 of the Act (49 U.S.C. 1472), is amended—

(1) in subsection (c) by inserting "and subsection (r)" after "inclusive,"; and

(2) by adding at the end thereof the following new subsection:

"SECURED AREAS OF AIRPORTS

"(r)(1) It shall be unlawful for any person knowingly and willfully to enter an aircraft or an airport area that serves air carriers or foreign air carriers contrary to security requirements established pursuant to section 315 or 316 of this Act. Upon conviction thereof, such person shall be subject to imprisonment for a term not to exceed one year or a fine not to exceed $1,000, or both.

"(2) If any person violates paragraph (1) of this subsection with the intent to commit in the aircraft or secured area an act punishable as a felony under Federal or State law, such person shall be subject to imprisonment for a term not to exceed ten years or a fine not to exceed $10,000, or both.".

TECHNICAL AMENDMENTS

SEC. 4. (a) The table of contents of the Act is amended under the heading "Sec. 316. Air Transportation Security" by striking out "(f) Definition." and inserting in lieu thereof:

"(f) Pre-employment investigations.

"(g) Definition.".

(b) The table of contents of the Act is amended under the heading "Sec. 902. Criminal penalties" by inserting after the item "(a) Transporting controlled substances without airman certificate." the following:

"(r) Secured areas of airports.".

INTERNATIONAL COOPERATION

SEC. 5. It is the sense of the Congress that—

(1) the President should undertake discussions with any nation which United States air carriers service and United States citizens travel to and from by air, to encourage such nation to implement similar security measures as provided for in this Act to combat terrorism and provide security for air travel; and

(2) the President should encourage United States air carriers not to service any nation that does not cooperate in increasing airport and air carrier security pursuant to discussions initiated under paragraph (1).

THE SECRETARY OF TRANSPORTATION,
Washington, DC, February 19, 1986.

HON. GEORGE BUSH,
President of the Senate,
Washington, DC.

DEAR MR. PRESIDENT: Enclosed for introduction and referral to the appropriate committee is a draft bill "To amend the Federal Aviation Act of 1958, as amended, to strengthen aviation security programs."

The proposed legislation would provide the Department's Federal Aviation Administration (FAA) with added authority and capabilities to conduct aviation security programs. The United States' aviation security program has provided a high level of security to the traveling public over the past two decades and continues to do so. It serves as a model for nations throughout the world that are seeking to deal with increasing terrorist threats. As good as this system is, however, we continue to seek improvements.

We have concluded that additional protection could be provided the traveling public by requiring employee background investigations by the Department of Justice of airline and airport employees whose duties permit them access to secured areas on airports or to commercial aircraft. This is consistent with House Report No. 99-299, issued by the Committee on Government Operations last October. We also propose to make it a federal crime to enter airport secured areas without authority.

Our proposal is drafted to dovetail with the existing security requirements of Sections 315 and 316 of the Federal Aviation Act of 1958, as amended (the FAAct). Notably, security requirements would be imposed, after notice and comment, through the current regulatory structure on air carriers and airport operators, as appropriate. As is the case currently in the banking and securities trading industries, the employing entity would request background investigations directly. FBI centralized criminal records could be reviewed, as appropriate, but information would only be available to authorized personnel, and only for employment screening purposes. Background information would not thereby become available to the public under the Freedom of Information Act (5 U.S.C. 552).

We have made every effort to minimize the costs of this proposal on the industry and the federal agencies conducting investigations. A query with the FBI involving a fingerprint check, for example, costs about $14.00, and we propose to make actual costs reimbursable to the appropriations account of the federal agency incurring costs of investigation and reporting. To reduce these charges to the industry, we have included authority to permit use of an "escort system" that would allow properly cleared personnel to oversee and supervise access of

uncleared personnel to secured areas or aircraft in controlled circumstances. The actual numbers of employees involved and the degree of investigation needed cannot be known with certainty until rulemaking is undertaken and comment has been received from affected parties.

In the case of our proposal to make unauthorized access to airport secure areas a federal criminal offense, this prohibition would be effective upon enactment without rulemaking. We propose to make entry a misdemeanor, except that entry with intent to commit a federal or state felony would then constitute a felony. This provision is intended to deter the unlawful circumvention of airport screening systems as well as the unauthorized penetration of secure areas on airports. Such activity should be forcefully proscribed by federal law to combat any threat of terrorist activity against civil aviation in this country.

In regard to enforcement of the new aviation security regulations which will result from this legislation, I would stress the importance of scheduling hearings and taking action on my September 5, 1985, proposal to increase civil penalty authority underlying the non-economic titles of the FAAct (introduced as S. 1750 in the Senate by Senator Kassebaum). The proposal would increase from $1,000 to $10,000 per violation the civil penalty for most violations of the FAAct by commercial operators. The existing penalties are outdated, and it is particularly important to update them now to make enforcement of the new security provisions I propose as effective as possible.

I urge you to act promptly on this proposal. The Office of Management and Budget advises that there is no objection, from the standpoint of the Administration's program, to the enactment of the proposed legislation.

With best wishes.

Sincerely,

ELIZABETH HANFORD DOLE.

By Mr. BRADLEY:

S. 2469. A bill to amend the Immigration and Nationality Act to restrict the examination of children who apply for naturalization; to the Committee on the Judiciary.

STREAMLINING THE NATURALIZATION PROCESS

Mr. BRADLEY. Mr. President, today I am introducing legislation which would amend the Immigration and Nationality Act in order to prevent the traditional practice of the Immigration and Naturalization Service of holding preliminary hearings or examinations for alien children whose parents are United States citizens.

Mr. President, more and more Americans want to adopt a child. The reasons for this choice are legion. The effect is that the adoption process in this country is usually long and grueling. Given the increasing number of couples who have not been able to adopt an American born child, an increasing number of couples, anxious to experience the pleasures of raising a child, are choosing to adopt a child born in a foreign country.

Once these children are adopted, they are due all the rights and privileges of an American born child. Of course, because they were born in a foreign country, these adopted children must be naturalized as United States citizens.

The naturalization process for minor children, Mr. President, is meant as a formality only. According to current law, adopted children are eligible for naturalization immediately following their adoption and lawful admission to the United States. They are not required to establish any particular period of residence. And, if they are of "tender years," they may be presumed to be of "good moral character, attached to the principles of the Constitution, and well disposed to the good order and happiness of the United States."

Unfortunately, the INS is not adhering to these polices. These adopted children—frequently infants—and their parents are forced to go through a lengthy, demanding naturalization process, which includes preliminary hearings, or examinations, which are supposed to be used to determine their character. Imagine the hardship these hearings cause both parents and children: The parents, who only want to accept these new children into their homes and make them feel welcome; the children, strangers in a new land and a new family, who only want to be accepted in both.

Mr. President, I learned of this hearing process from several of my constitutents, who told repeated tales of delayed, anguishing proceedings. One such constituent received her baby in December, 1981. She filed Application to File a Petition for Naturalization on Behalf of a Child (Form N402) in February, 1983, had a preliminary hearing on April 18, 1984. She is still waiting for the final hearing. In other words, her child has been in the United States for more than 4 years and is still not a citizen. Others have waited even longer. All describe the difficulties of commuting with their small children to distant locations.

On behalf of these constituents, members of my staff investigated the relevant section of the Code in order to find the basis for these preliminary hearings for children, Mr. President, my staff could find no specific requirement for these preliminary examinations, because, of course, there is none. As I mentioned earlier, children of tender years who are adopted by American parents are already presumed in the law to be of suitable character to be naturalized. The preliminary hearings are therefore superfluous.

Mr. President, it is beyond me what the INS hopes to determine from these hearings. It is clearly not to determine if an infant or a minor child is of good moral character or adheres to the principles of the Constitution. Frequently these children are not even old enough to talk—at least when the process starts.

Mr. President, I contacted the Immigration and Naturalization Service with this information and asked them to explain the reasons for the preliminary naturalization hearing requirement for adopted children. In their response, the INS indicated that there are two reasons. First, these hearings were not held to fulfill any specific requirement in the law, but rather to fill a perceived need to ensure the identity of the child being naturalized. They stated, however, that this could be accompanied at the final naturalization hearing and that they were reevaluating this policy with an eye toward limiting it.

According to the INS, the second reason why these interviews are being held is that many parents want their children to observe the manner in which the Government works and would be disappointed if no preliminary appearance was required. But from the experience of my constituents, Mr. President, these procedures are having just the opposite result. The interminable delays and appearances make the Government look like a cold and impervious bureaucracy, rather than an institution responsive to the needs of the citizenry.

Mr. President, it makes no sense to me to require these hearings for all adopted children. I believe they cause undue hardship to parents and children alike, and the agonizing delays aggravate what is surely a very traumatic period of adjustment. I agree with the Immigration and Naturalization Service that the preliminary hearings should be severely limited. The legislation which I am introducing today will do so. This bill will exempt from interview all parents and children where the children are age 14 or under, except in those cases where the INS believes that fraud is a likelihood. And in cases where the children are between the ages of 15 and 18, interviews would be required only in cases where the Attorney General has directed that they be held.

In summary, Mr. President, my bill amends the Immigration and Naturalization Act in order to correct a quirk in the naturalization process. It will benefit many Americans by facilitating the adoption of foreign children, and it will hurt no one. I urge my colleagues to join me in this worthwhile effort.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2469

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 332(a) of the Immigration and Nationality Act is amended—

(1) by striking out "(a) The" and inserting in lieu therof "(a)(1) Except as provided in paragraph (2), the"; and

(2) by adding at the end thereof the following new paragraph:

"(2) Notwithstanding the provisions of paragraph (1), no examination under this subsection may be made of a child under 18 years of age unless—

"(A) the Attorney General determines that without such examination there is a likelihood of fraud; or

"(B) in the case of a child 15 years of age or older, but under 18 years of age, the Attorney General specifically requires such examination.".

By Mr. THURMOND:

S. 2470. A bill to amend the Tariff Schedules of the United States to continue the suspension of duty on menthol feedstocks; to the Committee on Finance.

SUSPENSION OF DUTY ON MENTHOL FEEDSTOCKS

Mr. THURMOND. Mr. President, today I am introducing a bill which would further extend the temporary suspension of the duty on certain menthol feedstocks. These feedstocks are utilized by domestic manufacturers to produce synthetic menthol. A duty is imposed on these chemicals when they are imported to the United States from West Germany. Since there are no domestic industries that produce these particular feedstocks, this duty affords no protection to any chemical manufacturer in the United States. To the contrary, it imposes an unnecessary economic burden on the United States menthol industry by increasing production costs.

To relieve this unnecessary burden, I introduced a bill in 1983 to temporarily suspend the duty on menthol chemicals. That legislation was ultimately incorporated into the Miscellaneous Tariff Act of 1984 which became law in October 1984. It provided for the suspension of this duty until December 31, 1987.

Unfortunately, the situation facing our domestic menthol industry, has worsened since 1984. There are stil no American producers of menthol feedstocks. The American menthol industry must import crucial raw materials, and compete with highly subsidized, cheaply produced menthol products in domestic and foreign markets. In 1984, the market price for the finished menthol product was $10.70 per pound. The projected market price for the second quarter of 1986 is less than $6 per pound. The decline in market prices is due to foreign countries which subsidize and protect their menthol producers. This decline in prices has had a severe impact on our domestic industry. The United States only has one domestic manufacturer of menthol. This producer has suffered a 40 percent drop in operating profits from 1985 to 1986. Despite eroding profits, this company has managed to maintain its market share over the past few years. However, if the suspension of this duty is not extended, the future of domestic menthol production looks bleak.

This bill would simply extend the suspension of the duty on menthol feedstocks for 5 more years, until December 31, 1992. It would permit the continued receipt of the particular feedstocks necessary to produce menthol without paying a duty.

Mr. President, I realize this bill will not solve all the numerous trade difficulties faced by our domestic producers. However, it would allow at least one domestic industry the opportunity to compete against foreign manufacturers. It will help preserve the American menthol industry and many American jobs. For these reasons, I urge the prompt passage of this important legislation.

By Mr. D'AMATO:

S. 2471. A bill to establish an Office of Inspector General in the Nuclear Regulatory Commission, and for other purposes; to the Committee on Environment and Public Works.

IMPROVED NUCLEAR STANDARDS ACT

● Mr. D'AMATO. Mr. President, I rise today to introduce the Improved Nuclear Standards Act. This legislation addresses concerns vital to the health and safety of every American living near a nuclear facility.

The accident at the Chernobyl Nuclear Power Station has shown us that the possiblity of a serious radioactive release at a nuclear facility is not theoretical. It has underscored the need to look for ways to ensure that nuclear powerplants use the safest possible design, construction methods, operating techniques, and evacuation plans. This includes assurances that laws currently on the books are adhered to, and modifications to the law which can further assure our citizens the safety to which they are entitled are made as soon as new information or improved methods become available.

The Soviet Union flatly ignored the right of its citizens to live in a free and safe society. We must be sure that this never happens here.

The legislation which I am introducing today, contains five main provisions:

First, it creates the position of inspector general at the Nuclear Regulatory Commission. This position will be appointed by the President and confirmed by the Senate. The President will be required to appoint a candidate with expertise in nuclear safety issues. It combines functions currently performed by two offices at the NRC: the Office of Inspector and Auditor, and the Office of Investigations. In addition to the customary authority provided all other inspectors general, such as management and efficiency audit responsibilities, the NRC inspector general also will have the authority and responsibility to review all safety procedures at the NRC to ensure that the best available standards are being met. The inspector general will make an annual report to Congress regarding the adequacy of these standards. He/she also will be authorized to propose new regulations and modifications to existing regulations for the purpose of ensuring the public safety.

Second, it expands the role of the inspector general currently at the Federal Emergency Management Agency to allow him to review standards and procedures regarding emergency evacuation plans for nuclear power facilities, and for both the inspector general and the Director of FEMA to make recommendations directly to Congress regarding the adequacy of these standards and procedures and their implementation.

Third, it requires FEMA to conduct an annual test of the evacuation plan for each operating nuclear power facility in the United States. Currently, these tests are conducted once every 2 years, even though once-a-year tests were the standard until last year.

Fourth, it requires that, as part of the licensing procedure for any commercial nuclear facility, FEMA must make a finding that the public safety can be assured by the evacuation plan. This finding also will be required after each annual test. If FEMA cannot make this finding, then the plant must cease operation until corrective measures have been taken, until a new test has been conducted, and until the finding that public safety can be assured has been made. This provision is particularly applicable to Shoreham, the controversial nuclear powerplant on Long Island in New York, where FEMA's report contains no such finding, and for which the NRC will be making its licensing decision without a recommendation from FEMA.

Fifth, it requires that utilities bear all non-Federal costs associated with the annual testing of emergency evacuation plans. Currently, large costs are often borne by State and local governments.

Mr. President, many of our citizens live in fear. Unfortunately, this is a justified fear. Americans question whether what happened at Chernobyl could happen here. By passage of this act, we can take a major step toward reassuring our citizens. I urge my colleagues to join in passage of this legislation and I ask unanimous consent that the full text of the Improved Nuclear Standards Act be printed in the RECORD at the conclusion of my remarks.

Thank you, Mr. President.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2471

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Improved Nuclear Standards Act".

ESTABLISHMENT OF AN OFFICE OF INSPECTOR GENERAL IN THE NUCLEAR REGULATORY COMMISSION

SEC. 2. (a) The Inspector General Act of 1978 is amended—

(1) by inserting "the Nuclear Regulatory Commission," before "the Small Business Administration" in section 2(1);

(2) by redesignating subparagraphs (M) and (N) of section 9(a)(1) as subparagraphs (N) and (O), respectively;

(3) by inserting after subparagraph (L) of such section the following new subparagraph:

"(N) of the Nuclear Regulatory Commission, the offices of that agency referred to as the 'Office of Inspector and Auditor' and the 'Office of Investigations';";

(4) by striking out "or" after "Transportation" in section 11(1) and inserting in lieu thereof a comma;

(5) by inserting "or the Chairman of the Nuclear Regulatory Commission," before "as the case" in such section;

(6) by inserting "the Nuclear Regulatory Commission," before "the Small Business Administration" in section 11(2); and

(7) by inserting after section 8A the following new section:

"SPECIAL PROVISIONS RELATING TO THE INSPECTOR GENERAL OF THE NUCLEAR REGULATORY COMMISSION

"SEC. 8B. (a) Each individual appointed to the position of Inspector General of the Nuclear Regulatory Commission shall, in addition to having the qualifications specified in the first section of 3(a), have expertise in nuclear safety.

"(b) The Inspector General of the Nuclear Regulatory Commission shall, in addition to the authority provided by the other provisions of this Act, have the authority and responsibility to—

"(1) review all nuclear safety procedures carried out by the Nuclear Regulatory Commission to ensure that the best available nuclear safety standards are used;

"(2) propose regulations to the Nuclear Regulatory Commission for the purpose of ensuring the public safety; and

"(3) prepare and transmit an annual report to the Congress concerning the adquacy of nuclear safety procedures used in the United States.".

ADDITIONAL DUTIES FOR THE INSPECTOR GENERAL OF THE FEDERAL EMERGENCY MANAGEMENT AGENCY

SEC. 3. The Inspector General of the Federal Emergency Management Agency shall review standards and procedures for emergency evacuation plans for nuclear power facilities, and both the FEMA Inspector General and the Diretor of FEMA shall make recommendations directly to the Congress concerning the adequacy of, and the implementation of, such standards and procedures.

TESTS OF FEDERAL EMERGENCY MANAGEMENT AGENCY NUCLEAR ACCIDENT EVACUATION PLANS AND SUSPENSION OF LICENSE BY THE NUCLEAR REGULATORY COMMISSION FOR COMMERCIAL NUCLEAR FACILITIES WITH UNSAFE EVACUATION PLANS

SEC. 4. (a)(1) The Federal Emergency Management Agency shall conduct an annual test of the evacuation plan for each operating nuclear power facility in the United States, including facilities not licensed by the Nuclear Regulatory Commission.

(2) As a part of the annual test under paragraph (1) for each operating commercial nuclear power facility licensed under chapter 10 of the Atomic Energy Act of 1954, the Federal Emergency Management Agency shall submit a report to the Nuclear Regulatory Commission which shall—

(A) certify to the Nuclear Regulatory Commission that the evacuation plan for such facility assures public safety; or

(B) report findings to the Nuclear Regulatory Commission that the evacuation plan for such facility does not assure public safety.

(3) The Nuclear Regulatory Commission shall suspend the license of any facility subject to a report under paragraph (2)(B) until such time as the facility can certify that the evacuation plan for such facility assures public safety. A facility subject to a suspended license under paragraph (2)(B) may request a retest from the Federal Emergency Management Agency for purposes of certification of public safety at any time after suspension of the license.

(b)(1) Prior to the grant of a license required for any commercial nuclear power facility licensed pursuant to chapter 10 of the Atomic Energy Act of 1954, the Federal Emergency Management Agency shall certify to the Nuclear Regulatory Commission that the evacuation plan for such commercial nuclear power facility assures public safety.

(2) A license shall not be granted by the Nuclear Regulatory Commission such facility receives a certification as provided in paragraph (1).

(c) The owner of a commercial nuclear power facility subject to the provisions of this section shall be responsible for the payment of any non-Federal costs associated with any test of the evacuation plan for such facility carried out under this section.●

By Mr. CRANSTON:

S. 2472. A bill to amend the Export Administration Act of 1979 to require the establishment and operation of the western regional export licensing office; to the Committee on Banking, Housing, and Urban Affairs.

WESTERN REGIONAL EXPORT LICENSING OFFICE

Mr. CRANSTON. Mr. President, I am introducing today a bill to create a western regional office of Export Administration. At present, there is one office, located in Washington, DC, that is responsible for issuing all export licenses. I am proposing that a second export office be established in the western region that will also operate under the jurisdiction of the U.S. Department of Commerce and will have the authority to issue export licenses for all controlled products and commodities for export as designated by the Export Administration Act.

I am introducing this measure to alleviate the enormous administrative burdens the current licensing system places upon American businesses. This proposal deals with only part of the problem: The administrative procedures businesses must contend with to obtain an export license. The source of many licensing problems stem from U.S. export control policy—the statutes and regulations that govern U.S. products for export. Export control policy has a major impact on U.S. competitiveness. Over the past decade, the Federal Government has increased the administrative and competitive burden on exporters through stricter licensing requirements, export controls, and total embargoes. I support export controls on commercial goods and technologies when these items have critical military significance and are not otherwise available to controlled countries. But I vigorously oppose controls that impair our ability to compete in worldwide markets and do not provide a comparable national security benefit. I am currently exploring changes to the Export Administration Act that will address the substantive concerns of U.S. exporters. I will be seeking the advice and suggestions of those most knowledgeable about the situation and intend to embody the results in subsequent legislation.

The administrative burdens we place upon U.S. exporters is substantial. In fiscal year 1985, the Department of Commerce's Office of Export Administration received 125,000 license requests. Twenty-five percent came from my home State of California. The fastest growing markets for high-technology products are the newly industrializing economies on the Pacific rim. California and other Western States can be expected to be on the leading edge of capturing those markets. The export potential in this area is enormous. Demand from the modernizing Asian countries for electronic technology is expected to grow for the foreseeable future. These facts alone justify a Department of Commerce export licensing presence on the west coast.

The President's Commission on Industrial Competitiveness estimated that the combined export licensing costs of the Departments of Commerce, Defense, State, and Energy was $30 million in 1984. It estimated that industry's annual expenditure was $35 to $40 million. One-third of this expenditure was due to controls imposed upon United States business with respect to our COCOM partners—a group of 15 countries that cooperate in restricting strategic exports to the Soviet Union and other Eastern bloc or controlled countries. The Commission also noted that licensing delays for exports of generally allowable technology to non-COCOM nations averaged 4 to 6 months in the United States. That delay was 2 months in France and the United Kingdom, and 1 month in Japan. As these numbers show, the competitive disadvantage to the United States is clear.

With a staff of only 280 individuals, we require the Office of Export Ad-

ministration to handle not only tens of thousands of licensing requests—a number that is steadily increasing—but, in addition, require that it issue and monitor multiple-transaction licenses, issue commodity classification rulings, and provide interpretive advice on a complex regulatory scheme. Although the staffing level has increased at the Office of Export Administration, I do not believe it is adequate to meet the demands we have placed upon it.

The Department of Commerce is aware of many of the deficiencies in the licensing process and has made considerable improvements in the processing time for license applications—even in the wake of Gramm-Rudman budget cuts. In testimony before the House Foreign Affairs Subcommittee on International Economic Policy and Trade Administration, Dr. Paul Freedenberg, Assistant Secretary of Commerce for Trade Administration, testified that in the second quarter of fiscal year 1986, the average processing time for a free world case was 21 days. For exports to COCOM member countries, the cases are being processed on average in 2 weeks. I note, however, that these time periods do not reflect either the time to log in an application or the time to mail a license after it has been validated. This adds days—even weeks—to the total processing time. If a referral to the Department of Defense is required or there are questions about the classification of an item, for example, this can add months to the processing time. My intent in pointing this out is not to undercut the achievements and real improvements at the Department of Commerce, but to emphasize that the improvements may be overstated and highlights the need to make further inroads in expediting the licensing process. Although it is true that we have reduced the time it takes for businesses to obtain a routine license, we still must compete with nations like Japan, Canada, France, or Great Britain that have virtually no waiting period.

Other hidden delays arise when applications are returned for incomplete information. When licensing personnel determine a license application is deficient in any respect, for example, that a form lacks one or more required details, the license is not held until the applicant is notified and asked to submit corrected documentation. Instead, the entire license application is returned without action to the applicant by mail. The application may have been lodged at the Office of Export Administration for weeks before any review, and it may take several more weeks for the rejected application to be processed, mailed, and received by an applicant in the United States. The situation for a foreign application for a reexport request can be much worse. Licensing documents destined for foreign applicants generally are sent by diplomatic pouch to the U.S. Embassy, which then mails them to the applicant—a process that can take an additional 5 or 6 weeks.

Unfortunately, these delays occur all too frequently. In fiscal year 1986, for example, the Department of Commerce returned without action 20,673 licenses—or in one out of seven cases. We often fail to recognize the costs involved in handling incomplete applications in this way—costs accrue to both the exporter and to the Commerce Department. The loss of several months time to a business in this rejection process can create a commercial emergency where one did not otherwise exist. And since the Office of Export Licensing treats the resubmitted license as a new license, it must incur startup costs for that application all over again. Better communication and better access to licensing officials could help improve efficiency.

There are many other cases in which the exporter is often unable to establish meaninful contact with the reviewing agency to obtain guidance about either the prospects for a favorable licensing decision or the manner in which an application should be prepared.

I believe a west coast licensing office could improve public access to licensing officials so that businesses that want to export can receive timely advice on whether an item can be exported. As a general policy, the Office of Export Administration does not issue what it calls "hunting licenses." By this it means a license to export based "merely" on a business inquiry or a person's desire to obtain foreign business. There must be an "order" from a foreign person or firm for a particular product or technical data before the export licensing office will consider any business' application. I find this attitude astounding. We should be welcoming potential exporters with open arms and make it convenient for U.S. businesses that want to make money overseas. Yet, we ask business to spend considerable time and resources to obtain orders overseas when they do not even know if they will be permitted to export their goods.

Mr. President, I sympathize with the limited resources of the Commerce Department, but I find this lack of access unacceptable. The Federal Government should be aggressively helping our exporters. We must recognize how much we hurt U.S. exporters by these actions and the numerous ways we undermine our own competitiveness. I am talking about an attitude. I am talking about providing a disincentive to U.S. exporters that want to do business overseas. I am talking about making it almost impossible for small- and medium-sized high-technology businesses to export. In the long run, Mr. President, we are talking about the global competitiveness of the U.S. high-technology industries.

In part, the Commerce Department's closed-door policy represents an attempt to preserve the scare time of its limited number of licensing officers and other policy personnel for actual review of license applications. The end result of this policy, however, is often inefficiency and delay. Exporters have difficulty in negotiating satisfactory conditions for approval of a license and in determining what supporting technical or other information is required for speedy evaluation of an application. If we would foster communication and a front door approach to the problems, we could reduce these delays.

All of the difficulties I have described are aggravated by an overloaded licensing system that creates problems for applicants and licensing officials alike. I believe that maintaining a west coast Office of Export Licensing would improve the office's review function for western exporters. It would certainly improve public access to licensing officials so that businesses that want to export can receive timely advice on whether an item can be exported.

The Federal Government's attitude toward its exporters and potential exporters is inexcusable. We should be doing everything possible to help our exporters produce wealth. But we constantly throw obstacles before our competitive businesses when they try to export overseas. Mr. President, we shoot ourselves in the foot every step of the way. We are strangling exporters with redtape, bureaucracies, inconsistent policies, and a stubborn unwillingness to support our own people. We tell businesses they must fill out numerous forms, get the approval of the Department of Commerce, that may, in turn, need the approval of the Department of Defense, the Department of State, or the Department of Energy. Not only that, but should the company that received the U.S. product want to export to another company, it must ask the permission of the U.S. Government. We are the only Cocom member that legally enforces export controls over a licensed item after it has been exported.

Because trade has never been a central part of our domestic economic policy, we do not look at the problems from the viewpoint of the exporter; we do not look at the problems from the vantage point of the competitor. More often than not, trade takes a backseat behind every other consideration.

My proposal is straightforward: Tell our businesses that we are with them. Provide them with the bare essentials—decent access to a licensing process that the U.S. Government requires

of them. We can send business a message that we want them to succeed and that we will help in any way possible.

To a California business executive the message is just the opposite. Washington is light years away. Not only does it often fail to recognize that the Pacific has surpassed the Atlantic in terms of trade, but it must be forced to respond to the business needs of the west coast. Last year, for example, as part of the Export Administration Act update, we had to require that the Office of Export Licensing remain open to accommodate the time difference between the east and the west coasts. We should not have to legislate these changes. The Federal Government should work for the good of the entire Nation.

When an eastern-based business runs into a licensing snag, it takes half a day to fly down to Washington to resolve it. Well, that is often prohibitive for someone from California. It is expensive, it is time consuming, and it is unfair. It particularly hurts small- and medium-size businesses that cannot afford to hire a Washington attorney to resovle those snags.

I believe a western regional office can be established using existing resources and the existing Commerce regional office structure. In fact, I believe many time-saving efficiencies could be implemented now to decrease processing times for licenses. As world leaders in the field of technology, we should use some of this technology for our own good. When a license has been granted, for example, a Commerce district office could be notified electronically within minutes and the paperwork released at the other end. This could save days of delay and thousands of dollars for the business involved. Unfortunately, the Federal Government does not think of the bottom line in this way.

I urge other Senators to join me in cosponsoring this initiative to create an export licensing office in the western region. It is a step we can take to reverse a closed-door export policy and one that could make a real difference in the way Americans do business overseas.

By Mr. RIEGLE (for himself and Mr. HOLLINGS):

S. 2473. A bill to amend the National Aeronautics and Space Act of 1958 regarding the National Aeronautics and Space Council established by that Act; to the Committee on Commerce, Science, and Transportation.

REESTABLISHING THE NATIONAL AERONAUTICS AND SPACE COUNCIL

● Mr. RIEGLE. Mr. President, today I am introducing a measure with Senator HOLLINGS, that would reestablish a National Aeronautics and Space Council under the authority of the Vice President of the United States.

From 1958 to 1973, the National Aeronautics and Space Council planned and coordinated U.S. space activities. The Council centered responsibility, provided continuity and consistency of advice, and established a recognized procedure for considering the views of affected government agencies. More importantly, the Council developed a comprehensive space program and fixed responsibility so that there was a clear understanding by each agency as to where its authority began and ended and also how the sum of the agency programs added up to a total U.S. Space Program.

One would hope that the present system of policymaking within the Senior Interagency Group on Space [SIG Space], a Cabinet level council made up of representatives from government agencies dealing with space matters, would be effective. Unfortunately, the membership—NASA, Commerce, State, Transportation, Office of Science and Technology Policy, DOD, and the National Security Council—this group does not seem to be able to accomplish what we had hoped for.

In light of the serious situation that currently exists as a result of the failures of the *Challenger*, Titan 34D, and Delta launch systems, timely decisions are required, decisions that will have a direct bearing on the future of the U.S. Space Program and the leadership position of the United States. At this critical juncture, national space policy formulation needs to be conducted at the highest levels of government. Interagency mechanisms such as SIG Space, which has been ineffective in the past, are inappropriate in the present. The challenges to the space program in 1986 are as critical as they were in 1958; and as was the case in 1958, a National Aeronautics and Space Council should be reestablished in 1986.

Mr. President, the bill that I am introducing today in the Senate would reinstate the National Aeronautics and Space Council in the Office of the President under the direction of the Vice President. Members of the Council would consist of representatives from the Departments of State, Defense, Transportation, Commerce, and NASA. Alternates to these principals only would be allowed if the individual were approved to serve with the advice and consent of the Senate or if the individual already held a position that required the Senate's advice and consent.

It is obvious from the nature of the responsibilities of the Council and other obligations of its members that continuous staff work will be required for a well coordinated space program in much the same way work is required by the National Security Council. To that end, this measure permits the President to employ a professional staff of not more than seven persons to perform the duties of the Council. Those duties include advising and assisting the President in the aeronautics and space field. In particular, the Council would:

First, survey all significant aeronautical and space activities, including the policies, plans, programs, and accomplishments of the United States, including all departments and agencies of the United States engaged in such activities, and other nations;

Second, develop a comprehensive program of aeronautical and space activities to be conduced by departments and agencies of the United States;

Third, designate and fix responsibility for the direction of major aeronautical and space activities;

Fourth, provide for effective cooperation among all departments and agencies of the United States engaged in aeronautical and space activities of the United States engaged in aeronautical and space activities and specify, in any case in which primary responsiblity for any category of aeronautical and space activities has been assigned to any department or agency, which of those activities may be carried on concurrently by other departments or agencies; and

Fifth, resolve differences arising among departments and agencies of the United States with respect to aeronautical and space activities under this act, including differences as to whether a particular project is an aeronautical and space activity.

Mr. President, these are truly difficult times for our Nation's space program. It is critical that we establish a policymaking body with the ability and authority to develop space policies and ensure that those policies are implemented. We cannot afford to let the space program continue to drift without central leadership, guidance or direction. This legislation will reverse that drift and will take our space program into the next century.

I ask unanimous consent that the bill be printed in the RECORD at his point, along with section 201 of the National Aeronautics and Space Act of 1958 as it would be amended by this legislation.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2473

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 201 of the National Aeronautics and Space Act of 1958 is amended by striking subsection (c), and by redesignating subsections (d) through (f) as subsections (c) through (e), respectively.

(b) Section 201(a) of such Act is amended—

(1) by striking paragraph (6);

(2) by redesignating paragraph (5) as paragraph (6);

(3) by inserting immediately after paragraph (4) the following:

"(5) the Secretary of Commerce; and";

and

(4) in paragraph (6), as so redesignated, by striking "; and" and inserting in lieu thereof a period.

(c) Section 201(c) of such Act, as so redesignated, is amended—

(1) by striking "(c)" and inserting in lieu thereof "(b)";

(2) by striking "his" and inserting in lieu thereof "such member's"; and

(3) by striking "he" wherever it appears and inserting in lieu therof "the member's".

(d) Section 201(d) of such Act, as so redesignated, is amended—

(1) by striking "he" and inserting in lieu thereof "the President"; and

(2) in paragraph (1), (A) by inserting "the United States, including" immediately before "all departments", and (B) by inserting ", and other nations" immediately before the semi-colon.

(e) Section 201(e) of such Act, as so redesignated, is amended—

(1) by striking all after "persons" through "amended";

(2) by striking "203(b)(2)" and inserting in lieu thereof "203(c)(2)";

(3) by striking "(except those relating to pay and retirement)";

(4) by striking "council employees" and inserting in lieu thereof "employees of the Council"; and

(5) by striking "chairman" and inserting in lieu thereof "Chairman".

SECTION 201 OF THE NATIONAL AERONAUTICS AND SPACE ACT OF 1958

SEC. 201. (a) There is hereby established, in the Executive Office of the President, the National Aeronautics and Space Council (hereinafter called the "Council") which shall be composed of—

(1) the Vice President, who shall be Chairman of the Council;

(2) the Secretary of State;

(3) the Secretary of Defense;

(4) the Secretary of Transportation;

(5) the Secretary of Commerce; and

(6) the Administrator of the National Aeronautics and Space Administration.

(b) The President shall from time to time designate one of the members of the Council to preside over meetings of the Council during the absence, disability, or unavailability of the Chairman.

(c) Each alternate member designated under subsection (b) of this section shall be designated to serve as such by and with the advice and consent of the Senate unless at the time of such member's designation the member holds an office in the Federal Government to which the member was appointed by and with the advice and consent of the Senate.

(d) It shall be the function of the Council to advise and assist the President, as the President may request, with respect to the performance of functions in the aeronautics and space field, including the following functions:

(1) survey all significant aeronautical and space activities, including the policies, plans, programs, and accomplishments of the United States, including all departments and agencies of the United States engaged in such activities, and other nations;

(2) develop a comprehensive program of aeronautical and space activities to be conducted by departments and agencies of the United States;

(3) designate and fix responsibility for the direction of major aeronautical and space activities;

(4) provide for effective cooperation among all departments and agencies of the United States engaged in aeronautical and space activities, and specify, in any case in which primary responsibility for any category of aeronautical and space activities has been assigned to any department or agency, which of those activities may be carried on concurrently by other departments or agencies; and

(5) resolve differences arising among departments and agencies of the United States with respect to aeronautical and space activities under this Act, including differences as to whether a particular project is an aeronautical and space activity.

(e) The Council may employ a staff to be headed by a civilian executive secretary who shall be appointed by the President by and with the advice and consent of the Senate. The executive secretary, subject to the direction of the Council, is authorized to appoint and fix the compensation of such personnel, including not more than seven persons, as may be necessary to perform such duties as may be prescribed by the Council in connection with the performance of its functions. Each appointment under this subsection shall be subject to the same security requirements as those established for personnel of the National Aeronautics and Space Administration appointed under section 203(c)(2) of this Act. Other provisions of law or regulations relating to Government employment shall apply to employees of the Council reporting directly to the Chairman to the extent that such provisions are applicable to employees in the Office of the Vice President.

● Mr. HOLLINGS. Mr. President, we are at a critical juncture in the history of the Nation's Space Program, yet we are ill-prepared institutionally to resolve space policy issues. The current Senior Interagency Group on Space [SIG Space] is unable to make critical decisions in a timely manner and too often puts the best interests of the involved agencies above the best interests of the Nation.

In light of this situation, I think it is absolutely essential that the National Aeronautics and Space Council be reestablished immediately. The SIG Space process might be able to muddle through the current policy debate, but it is clear to this Member of Congress that a new institution is required to tackle the difficult issues concerning the future scope and direction of the Nation's space program.

I am pleased, therefore, to join with the distinguished ranking member of the Senate Commerce Committee's Subcommittee on Science, Technology, and Space in introducing this measure because I believe reestablishment of the National Aeronautics and Space Council will greatly assist the formulation of a coherent, pragmatic, national space policy in a timely manner.

Mr. President, for 15 years 1958–73, the National Aeronautics and Space Council was the principal space policymaking forum for the United States. In 1973, the Council was phased out, as were many other Government institutions, with the Nixon reorganization of the Federal Government. Traditionally, I am not one for turning back the clock of time. However, I feel that the situation today is analogous to the situation in 1958 and that the Council is the appropriate space policymaking apparatus for the challenge of 1986. Situated in the Office of the President, the Council would be chaired by the Vice President and would have a permanent staff of five to seven people. The membership on the Council would be limited to the Secretaries of the Departments of State, Transportation, Commerce, and Defense and the Administrator of NASA; and space policy would finally be resolved at the appropriate level.

During the course of the last few years, it became quite apparent that national space policy was not given the attention that it deserved. Our National Space Program is a critical element of our national and economic security and our public safety; and space policy formulation; therefore, should not be subjected to bureaucratic squabbling or interagency disputes. The Nation's Space Program requires our constant care and attention, or the United States will forfeit its leadership in space.

I might suggest that even prior to the tragic events of January 28's shuttle disaster it was becoming clear that the United States lead in space was being threatened by the Soviet Union, Europe, and Japan because of our lack of resolve and a pragmatic national space policy. According to a new report issued by the American Council on Education, "Space: America's New Competitive Frontier," the U.S. lead in space was being threatened by foreign competition much as the steel, auto, consumer electronics, and clothing industries were victimized by foreign competition. According to the report, the irony was that the Nation that had made the greatest contribution in space technology to the world, the United States, was now in danger of losing its lead.

I believe that the United States should maintain its leadership in space, and I believe that reestablishment of the National Aeronautics and Space Council will assist in that effort. I strongly endorse this measure and hope that it will be enacted during this session of Congress.●

By Mr. DURENBERGER (for himself and Mr. BENTSEN):

S. 2474. A bill to amend title XVIII of the Social Security Act to encourage the availability of new technologies and new procedures which are not recognized by the Medicare prospective payment system, to collect data to determine whether such technologies and procedures should be so

recognized on a permanent basis, to provide for annual recalibration of diagnosis related groups, and for other purposes; to the Committee on Finance.

HEALTH CARE INNOVATION ACT

Mr. DURENBERGER. Mr. President, I rise to introduce today the Health Care Innovation Act of 1986. I am joined in introducing this proposal by my distinguished colleague the Senator from Texas [Mr. BENTSEN].

The Health Care Innovation Act of 1986 amends title 18 of the Social Security Act to encourage the continued diffusion of new medical technologies and procedures not now recognized under the Medicare prospective payment system, to collect data to determine whether such technologies and procedures are useful and should be paid for by Medicare on a permanent basis, and to require the Secretary of Health and Human Services to adjust annually the Medicare prices set by diagnosis related groups to advance medical technology and procedures.

Mr. President, last Sunday I had the privilege of spending Mother's Day with my parents at their home in Avon, just west of St. Cloud, MN.

I consider myself incredibly lucky—at almost 52 years of age—to have two living parents.

And, because I have a 75-year-old mother and an 80-year-old father, I have a very personal interest in the subject I'm discussing here today.

STRETCHING OUT THE LIFESPAN

A lot of us don't want to admit it, but America is an aging nation. We're living longer, but also fuller lives.

I like to think one reason we're all living longer stems from the fact that we're taking better care of ourselves—jogging more, smoking less, and all the rest. I can't imagine in Minneapolis and St. Paul, MN how there could be anyone left who drinks and drives, or rides in a car without a seatbelt, after the media deluge we've had from "Project Lifesaver" over the past couple of weeks.

But, we're living longer due to more than healthier habits. We are also living longer because medical science has continued to provide new and better ways of keeping us going, new procedures and technologies that extend lives and improve the quality of lives for millions of Americans.

Pacemakers represent one such example.

Something like a half-million Americans—more than the total population of St. Paul—are now walking around, leading relatively normal lives with pacemakers implanted in their chest. Medical experts tell us that as many as 5 percent, or 25,000 people, would die within minutes without them.

Thousands of other Americans have had their lives extended by innovations in surgical procedures, like bypass operations, for example. While all of these new technologies and procedures are subject to abuse and overuse, the fact is that they have contributed immeasurably to extending and improving the quality of our lives.

The kind of emphasis on quality and innovation in our health care system which has produced the pacemaker, heart by-pass surgery, and other examples of new technology and procedures does not exist everywhere in the world.

Last summer I had the privilege of visiting relatives in Poland. I went to a well-respected children's hospital in Cracow and spent some time there with the physicians and medical director. And, I heard them wish over and over again that they had access to the kind of advances in medical science many of us in this country simply take for granted. The kind of technology which would bring those Polish doctors past a point at which they now seem almost frozen in time—a time which resembled this country when my parents were my age.

TECHNOLOGY AND HEALTH SYSTEM REFORM

Over the years, Americans have taken the lead in pushing out the frontiers of medical science and extending and improving our lives in the process. But now, while we are in the midst of a very necessary effort to contain the health care cost explosion which threatens to bankrupt us all, we need to stop, look around, and make sure the kinds of technological advances we've seen take place in the past are encouraged to continue.

I say this as one of those who has argued most often and most forcefully in behalf of the marketplace reforms in health care which are now sweeping this country.

In fact, I've published a new book on the subject—"Prescription For Change," which I commend to my colleagues.

Those reforms have been necessary, and they are working largely as intended to halt the dramatic increases in health care costs we had been experiencing while, at the same time, retaining the kind of quality which Americans demand and deserve.

But, despite generally favorable reviews, there are some troubling side effects of health care reform which need to be addressed.

And, S. 2474 I am introducing today in the Senate is one of the midcourse corrections which now needs to be made.

A key part of recent reforms in health care has been the new Medicare hospital prospective payment system which Congress set in place in 1983. This new payment system encourages more conservative practices in hospitals by setting prices in advance for some 468 different categories of illness.

Hospitals are no longer paid, in other words, for each test or procedure they perform on Medicare patients—regardless of price. They are rewarded for staying within the predetermined prices set on each illness or injury.

While this new payment system is an important step forward in controlling costs, it will discourage the use and development of many advanced medical treatments or technologies—it will unless it permits a normal market for new product research and development to function.

Because the new Medicare payment system pays a set price for each illness, for example, it encourages hospitals to use the lowest cost or efficient treatment available. This means that two types of technologies are at a disadvantage; those that improve quality, but cost more; and those that have a higher price up front but may actually save money in the long run by reducing the need for return visits to the hospital.

Mr. President, this problem with the prospective payment system must be rectified. I am introducing S. 2474 to provide medical technology researchers and manufacturers with proper market incentives to continue the kind of work which has made possible an ever longer and better quality life for millions of Americans.

This is particularly relevant in a State like Minnesota which has spawned medical technology geniuses like Lloyd Cherne, the developer of the Cherne coronary artery disease detector, and others to continue the kind of breakthroughs in medical science we have come to expect and depend on.

In fact, I've made the point of highlighting the leading role Minnesota has assumed in the health technology field as well as starting the health care policy revolution now sweeping the country, by yesterday announcing the introduction of this bill in my home State of Minnesota.

I should also note that this legislation is part of a series of mid-course adjustments which I and my colleagues in the Congress have or will make in this health policy revolution.

Before the health policy revolution, before competition and consumer choice took hold on the health care system, hospital charity care, physician training, and medical research were subsidized with the surplus revenue generated from patients who paid for services. In the new environment consumers and third-party payers have little incentive to pay for anything more than they receive in direct services, and they, therefore, balk at paying for the old cross-subsidies.

My colleagues on the Senate Finance Committee, particularly the Senators from Kansas [Mr. DOLE] and Texas [Mr. BENTSEN], share this concern that explicit policy needs to be

set concerning the cross-subsidies. The reform of payment for health services by Medicare and other payers must continue. But, at the same time the indigent care, physician training, and medical technology advancement should not be left out.

Last year Senators DOLE and BENTSEN joined me in promoting changes in Medicare payments to teaching hospitals. Those initiatives were incorporated in the fiscal year 1986 reconciliation bill which passed the Congress. Those changes made a clear commitment from Medicare to fund appropriate physician training which enhances the care for Medicare beneficiaries.

In the area of indigent care, care for those who lack health insurance and cannot pay for services, I have also made a number of proposals. With my colleague the Senator from Massachusetts [Mr. KENNEDY] and others, I introduced the Alleys to Health Care Act of 1986, S. 2403, and I will introduce other measures to refine the tax code to provide incentives for all Americans to obtain health insurance coverage.

These measures will not help all of the 37 million Americans who lack health insurance. But, should enable many to obtain a health plan and reduce the financial pressure on hospitals from those who cannot pay.

Today, however, my purpose is to focus on assuring Americans, continuing access to the best medical care we can offer. Senator BENTSEN is joining me today in an important next step in this process. In proposing S. 2474, the Health Care Innovation Act of 1986, we are providing explicit Medicare policy on the development and diffusion of new medical advances. The bill is consistent with Medicare's prospective pricing system, and it reflects our commitment to continue reform while adjusting it to assure the American people that they will receive quality as well as efficient health care services.

Briefly, S. 2774:

First, requires Medicare to pick up a part of the extra cost of new technologies or procedures prior to their full approval. Only technologies and procedures which have been approved by the Food and Drug Administration as safe and effective would qualify. Under this provision of S. 2474 Medicare would agree to share the risk for the early introduction of new technologies and procedures with hospitals. Only part of the marginal cost above the per case payment would be covered.

In the old cost-based environment, innovators in medical technologies and procedures could afford to wait until Medicare decided to cover a medical advance because they knew they could recover their full cost. Today, under the per case, diagnosis related group [DRG], payment system even if Medicare decides to cover a new technology or procedure, the innovator cannot be assured that the payment structure will be adjusted to meet their full costs. The risk is increased so innovators will shy away from marketing a medical advance for which costs are greater than the respective DRG that advance would fall into.

S. 2474 provides a financial bridge in which Medicare shares the risk with the hospital and innovator for the medical advance while it decides whether or not to permanently cover an advance and how much to pay for it.

Second, requires hospitals which use this provision to cooperate with Medicare in collecting data on the medical advance. In the past, Medicare has frequently had to make decisions on covering medical advances based on scanty data. Also, cost information, so important to setting the right price, is hard to come by. This provision would enable Medicare the flexibility to collect the information needed to decide whether or not an advance is truly useful and what the price should be.

Third, requires Medicare to recalibrate the DRG's annually rather than every 4 years as now required by law. Changes in medical practice should be reflected in the DRG prices as fast as possible. The current 4-year lag time freezes medical practice in time for no medical or scientific reason. The 4-year period for adjusting the price was set arbitrarily and does not reflect the capacity of Medicare to adjust more rapidly.

Mr. President, older Americans deserve access to the best quality and most up-to-date health care treatments available. And, they deserve assurance that the health care industry will continue to seek out new and better ways of treating illnesses such as cancer, heart disease, and Alzheimer's disease.

These kinds of advances cannot only extend the length and qualilty of life for older Americans, but also continue the strong role which this country's advances in medical technology have played in improving the quality of health care worldwide.

S. 2474 moves us in that direction.

Mr. President, I ask unanimous consent that the text of S. 2474 be printed in the RECORD at this point, followed by the bill summary, steps in approving and paying for projects and procedures, and example technologies inhibited by Medicare.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2474

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Health Care Innovation Act of 1986".

SEC. 2. INTERIM FINANCING AND DATA COLLECTION.

(a) IN GENERAL.—Section 1886 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(i)(1)(A) Notwithstanding sections 1813 and 1814(b), the Secretary shall make payment under this subsection to a subsection (d) hospital (as defined in subsection (d)(1)(B)) for the qualified new technology or procedure costs incurred with respect to an inpatient hospital discharge.

"(B) Payments made under this subsection shall be in addition to payments made under subsection (d).

"(2) The Secretary shall make payments for qualified new technology or procedure costs as follows:

"(A) DETERMINING QUALIFIED NEW TECHNOLOGY OR PROCEDURE COSTS.—A 'Qualified new technology or procedure cost', as used in this subsection, is the incremental operating cost associated with the use of a new technological advance or a new procedure (as determined in accordance with paragraph (3)) with respect to a hospital discharge.

"(B) DETERMINING INCREMENTAL OPERATING COSTS.—'Incremental operating cost', as used in this subsection, is the amount by which charges, adjusted to cost, with respect to a hospital discharge, exceed 110 percent of the amount payable under subsection (d) with respect to such discharge (as determined prior to the adjustment under subsection (d)(5)(B) for indirect costs of medical education).

"(C) PAYMENT AMOUNT.—The Secretary shall pay to a subsection (d) hospital, with respect to a hospital discharge, an amount equal to 60 percent of the qualified technology or procedure costs for which the requirements of this subsection are satisfied and for which the hospital submits a claim for payment.

"(3) The new technological advances and new procedures with respect to which payment may be made under this subsection shall be determined as follows:

"(A) DETERMINING NEW TECHNOLOGICAL ADVANCES AND NEW PROCEDURES.—

"(i) A 'new technological advance', as used in this subsection, is a medical device (as defined in subparagraph (F)(i))—

"(I) for which the Food and Drug Administration has approved a premarket approval application under section 515(a) of the Federal Food, Drug, and Cosmetic Act (other than a device which is or may be subject to section 515(a)(1) of such Act);

"(II) which is used during the interim data collection period (as determined under subparagraph (B)) for such device; and

"(III) which is not a capital technology (as defined in subparagraph (C)).

"(ii) A 'new procedure', as used in this section, is a medical or surgical procedure (as limited by subparagraph (F)(ii)) which is used during the interim data collection period (as determined under subparagraph (B)) for such procedure.

"(B) DETERMINING INTERIM DATA COLLECTION PERIODS.—With respect to a medical device or a medical or surgical procedure, the 'interim data collection period', as used in this subsection, is the period which—

"(i) begins on—

"(I) in the case of a medical device, the date such medical device receives approval of a premarket approval application under section 515(a) of the Federal Food, Drug, and Cosmetic Act; and

"(II) in the case of a medical or surgical procedure, the date that is the earlier of the date on which an ICD-9-CM code is assigned to the procedure or the date on which the Secretary makes a final determination (as defined in subparagraph (F)(iii)), that the procedure is not excluded under section 1862(a); and

"(ii) ends on the date, subject to subparagraph (D), that is the earliest of—

"(I) the first October 1 which occurs at least 24 months after the date on which such period begins;

"(II) the effective date of a reweighting (as defined in subsection (d)(4)(C)(iv)(II)) or a classification adjustment (as described in subsection (d)(4)(C)(i)) which directly affects a diagnosis related group with respect to which such medical device or procedure is used; or

"(III) the effective date of a final determination (as defined in subparagraph (F)(iii)) by the Secretary that such medical device or procedure (or a service employing such medical device or procedure) is excluded under section 1862(a).

"(C) EXCLUDING CAPITAL TECHNOLOGIES.—A capital technology, as used in this subsection, is a medical device, the costs of which (in whole or in part) are capital related costs as defined by the Secretary under subsection (a)(4).

"(D) LIMITING FOR SPECIFIC USES.—In determining the date on which an interim data collection period ends under subparagraph (B)(ii)(II) or (III), a reweighting, classification adjustment, or final determination which applies with respect to a specific use of a medical device or procedure operates to end such period only with respect to such use.

"(E) EXEMPTIONS FROM COVERAGE REQUIREMENT.—Notwithstanding section 1862(a), and except as provided in subparagraph (B)(ii)(III), payment may not be denied by reason of section 1862(a)—

"(i) if such payment is under this subsection and is for qualified new technology or procedure costs; or

"(ii) if such payment is under subsection (d) and is for expenses incurred for items or services for a discharge with respect to which an amount is payable under this subsection.

"(F) DEFINITIONS.—The term—

"(i) 'medical device', as used in this subsection, means a medical device as defined in section 201(h) of the Federal Food, Drug, and Cosmetic Act;

"(ii) 'procedure', as used in this subsection, does not include a procedure using a medical device for which an investigational exemption under section 520(g) of the Federal Food, Drug, and Cosmetic Act is in effect; and

"(iii) 'final determination', as used in subparagraphs (B)(i)(II) and (B)(ii)(III), means a determination which—

"(I) applies with respect to all subsection (d) hospitals; and

"(II) in the case of a determination described in subparagraph (B)(ii)(II) is not based, in whole or in part, on insufficiency of data with respect to a medical device or procedure or a service employing such medical device or procedure.

"(4) The Secretary shall collect data on new technological advances and new procedures and use such data as follows:

"(A) DATA COLLECTION AND REPORTING.—A subsection (d) hospital which elects to claim a payment under paragraph (2)(C) with respect to an inpatient hospital discharge shall report, in such form and in accordance with such procedures as the Secretary may prescribe—

"(i) the amount of reasonable operating costs of inpatient hospital services (as defined in subsection (a)(4)); and

"(ii) such other financial or clinical data as the Secretary determines to be necessary to carry out subparagraph (B).

"(B) USE OF DATA FOR REWEIGHTING AND RECLASSIFICATION.—The data reported under subparagraph (A)—

"(i) shall be used by the Secretary to carry out clauses (i) and (ii) of subsection (d)(4)(C);

"(ii) shall be made available by the Secretary to the Prospective Payment Assessment Commission and used by such Commission to carry out subsection (d)(4)(D); and

"(iii) shall be made available by the Secretary, upon request, to the National Institutes of Health, National Center for Health Services Research and Health Care Technology Assessment, Office of Technology Assessment, Food and Drug Administration, Veterans' Administration, and Department of Defense.

"(5) In addition to the limitations imposed by paragraphs (2) and (3), the Secretary shall limit payments under this subsection as follows:

"(A) EXCLUDING OUTLIER PAYMENTS.—No payment may be made under this subsection for a cost or charge which qualifies for an additional payment under subsection (d)(5)(A).

"(B) LIMITING ANNUAL PAYMENTS TO INDIVIDUAL HOSPITALS.—The amount of payments available under this subsection to a subsection (d) hospital for a fiscal year shall not exceed a share of the total amount available under this subsection for such fiscal year (as determined under subparagraphs (D) and (E)). Such share for any hospital shall be a fraction of the total amount available, equal to—

"(i) 40 percent of a fraction—

"(I) the numerator of which is the amount of payments to such hospital under part A of this title for operating costs of inpatient hospital services (as defined in subsection (a)(4)), as estimated by the Secretary for the immediately preceding fiscal year; and

"(II) the denominator of which is the amount of all payments under part A of this title for operating costs of inpatient hospital services (as defined in subsection (a)(4)), as estimated by the Secretary for the immediately preceding fiscal year; plus

"(ii) 60 percent of a fraction—

"(I) the numerator of which is the amount of payments to such hospital under subsection (d)(5)(B) for indirect costs of medical education, as estimated by the Secretary for the immediately preceding fiscal year; and

"(II) the denominator of which is the amount of all payments under subsection (d)(5)(B) for indirect costs of medical education, as estimated by the Secretary for the immediately preceding fiscal year.

"(C) LIMITING CARRY FORWARD OF PAYMENTS.—Payments available to a subsection (d) hospital under subparagraph (B) for a fiscal year, but not claimed under paragraph (2)(C) with respect to a qualified new technology or procedure costs incurred in such year, may not be claimed for a succeeding fiscal year.

"(D) LIMITING AGGREGATE ANNUAL PAYMENTS.—Subject to subparagraphs (E) and (F), the total amount available under this subsection for all hospitals for any fiscal year shall be the amount equal to 1 percent of the total payments made under subsection (d) for the immediately preceding fiscal year, as estimated by the Secretary.

"(E) ADJUSTMENT FOR EXCESS AGGREGATE ANNUAL PAYMENTS.—The amount determined under subparagraph (D) for any fiscal year shall be reduced by the amount (if any) by which the total payments made under this subsection for the preceding fiscal year exceeded the amount determined under such subparagraph for such preceding fiscal year.

"(F) REQUIREMENT OF TRUST FUND BALANCE.—Payments under this subsection for any fiscal year—

"(i) shall be payable from the Federal Hospital Insurance Trust Fund (and shall not be subject to appropriations); and

"(ii) shall be available under subparagraph (D) only to the extent an asset balance (as described in the 'Annual Report of the Board of Trustees of the Federal Housing Insurance Trust Fund') exists in such Fund at the beginning of such fiscal year, as estimated by the Secretary after consulting with the other Trustees for such Fund.".

(b) REPORT.—The Secretary of Health and Human Services shall report to Congress not later than one year after the date of the enactment of this Act on methods by which payments could be made under section 1885(i) of the Social Security Act (as added by this Act) to any health maintenance organization or competitive medical plan that has a risk-sharing contract under section 1876 of the Social Security Act.

(c) CONFORMING AMENDMENTS.—(1) Section 1862(a)(1)(A) of the Social Security Act is amended by inserting "or which are new technologies or procedures to which section 1886(i) applies," after "(C), or (D),".

(2) Section 1886(d)(5)(B) of such Act is amended by adding at the end thereof the following: "The adjustment under this subparagraph shall be made on the basis of the payment amount to such hospital without taking into account any payments under subsection (i) for qualified new technology or procedure costs.".

(d) EFFECTIVE DATE.—(1) The amendments made by this section shall apply with respect to qualified new technology or procedure costs (as defined in section 1886(i)(2)(A) of the Social Security Act) made after the date of the enactment of this Act.

(2) Notwithstanding section 1886(i)(3)(A) of the Social Security Act, a medical device (as defined in section 201(h) of the Federal Food, Drug, and Cosmetic Act) or procedure shall not be a new technological advance or procedure for purposes of such section 1886(i)(3)(A) if, before the date of the enactment of this Act, there occurs with respect to such device or procedure or a specific use thereof—

(A) a reweighting or classification adjustment (as described in section 1886(i)(3)(B)(ii)(II) of the Social Security Act and as limited by section 1886(i)(3)(D) of such Act); or

(B) a final determination (as described in section 1886(i)(3)(B)(ii)(III) of the Social Security Act, as defined in section 1886(i)(3)(F)(iii) of such Act, and as limited by section 1886(i)(3)(D) of such Act).

SEC. 3. ANNUAL RECALIBRATION.

(a) ADJUSTMENTS OF DRG CLASSIFICATIONS AND WEIGHTING FACTORS.—Section 1886(d)(4)(C) of the Social Security Act is amended to read as follows:

"(C)(i) The Secretary shall adjust the classifications established under subparagraph (A) for discharges in fiscal year 1986

and at least once every four fiscal years thereafter.

"(ii) The Secretary shall adjust the weighting factors established under subparagraph (B)—

"(I) through a recalibration for discharges in fiscal year 1986 and once every fiscal year thereafter; and

"(II) through reweighting for discharges in any fiscal year.

"(iii) The Secretary shall make the adjustments under clauses (i) and (ii) to reflect changes in treatment patterns, technology, and other factors which may change the relative use of hospital resources.

"(iv) As used in this subparagraph, the term—

"(I) 'recalibration' means a weighting factor adjustment which is based on a methodology applied uniformly to all weighting factors, which reflects the relative hospital resources used for each weighting factor compared to all other weighting factors, and which becomes effective with respect to all weighting factors simultaneously; and

"(II) 'reweighting' means a weighting factor adjustment which reflects the relative hospital resources used for a weighting factor compared to all other weighting factors, but which does not apply to all weighting factors.".

(b) PUBLICATION.—(1) Section 1886(e)(5)(A) of the Social Security Act is amended by inserting "and proposed recalibration under subsection (d)(4)(C)(ii)(I)" after "paragraph (4)".

(2) Section 1886(e)(5)(B) of such Act is amended by striking out "proposal" and inserting in lieu thereof "proposals" and by inserting "(4) and final recalibration under subsection (d)(4)(C)(ii)(I)" after "such paragraph".

(c) EFFECTIVE DATE.—The amendments made by this section shall become effective on the date of the enactment of this Act.

BILL SUMMARY: HEALTH CARE INNOVATION ACT OF 1986

1. Why do we need this legislation?

In 1983, Medicare's hospital payment system was changed to a DRG—or "diagnosis-related group"—system. Now, each illness is placed in a DRG that has a flat payment rate. A hospital treating a patient gets the DRG rate for the patient's illness, regardless of the treatment used, the length of the hospital visit or the expense to the hospital. This system encourages only treatments that lower costs per hospital visit. Many treatments do that.

Others, however, raise today's costs, but either decrease costs over time or greatly improve care at a higher cost. These treatments often face long delays—even after safety and effectiveness approval from the Food and Drug Administration—in being fully incorporated into the DRG system. Thus, Medicare patients lack access to some of the most promising new technologies, and manufacturers are discouraged from developing them.

2. What does the legislation do?

It provides partial funding for certain cost-increasing medical treatments used for Medicare patients until Medicare makes necessary DRG adjustments. In addition, the DRG rate would be adjusted annually, rather than every four years.

3. What qualifies?

New products and procedures would qualify if they increase costs at least 10 percent above the price of the Medicare DRG. In addition, new products must have premarket approval for safety and effectiveness by the Food and Drug Administration, while new procedures must have already started to enter the DRG system. Specifically, that means when Medicare has decided which DRG seems most appropriate for the new procedure.

4. How long do payments last?

The legislation would provide funding only until Medicare adjusted the individual DRG price. Payment for a technology could never last more than two years.

5. Why was this length of time for funding chosen?

It permits enough time to generate data to help Medicare decide whether to incorporate the treatment into the DRGs on a permanent basis.

6. How would the payments work?

Medicare would pay the hospital part of the cost of using a product or procedure that's covered by the bill. Medicare's share would be the DRG rate, plus 60 percent of the amount that exceeds 110 percent of the DRG level. The hospital would pay the extra 40 percent above that level.

For example, a profoundly deaf patient could not currently receive a cochlear implant under Medicare, since it is not covered. With this bill a hospital could install an implant that has FDA approval in a Medicare patient. The DRG for ear surgery pays only $1,835. If the cochlear implant cost $20,000, the hospital would receive $12,624. Here's how:

Cost of implant	$20,000
110 percent of $1,800, which is the DRG payment for surgey	−2,028
Amount by which implant exceeds 110 percent of DRG	17,982
The percent that the bill will pay above 110 percent of the DRG price	×.60
60 percent of amount exceeding 110 percent	10,789
DRG payment level	+1,835
Amount Medicare pays	12,624

7. Do any other limits apply?

Limits would be set each year on the amount of funding each hospital could receive. The limit would be based on a formula which reflects, in part, the percentage of Medicare payments a hospital receives overall.

8. Once a technology qualifies, how does the legislation actually work?

A hospital will be paid for any technology which qualifies. As it does with any other technology, it must merely charge Medicare for repayment.

9. What else is required of hospitals that offer technologies paid for under the bill?

A hospital offering a product or procedure eligible under the bill would be required to provide data which Medicare needs to assess the usefulness of the product or procedure and to establish an appropriate DRG rate for the new treatment.

STEPS IN APPROVING AND PAYING FOR PRODUCTS AND PROCEDURE

Current law	Changes resulting from Health Care Innovation Act of 1986
1. Investigational device exemption for products: Food and Drug Administration approves clinical tests of device in humans.	
2. (a) Premarket approval for products: FDA finds device safe and effective and approves for general use. or (b) Classification of new procedures: The procedure is placed in the payment category that best fits the new treatment.	3. Once steps 2(a) or 2(b) occur, Medicare will pay for the use of a technology on patients. This legislation pays part and the hospital pays part. Payment lasts for two years or until step 5, whichever comes first.
4. Medicare approval: Medicare agrees to pay for the product or procedure. Without this, patients would not receive Medicare payment for their treatment and, thus, would not be candidates for the technology. For the cochlear implant, the lag from FDA to Medicare approval has already been over one and one-half years.	Payment would also end it Medicare reviewed the technology and decided it is not approved (step 4).
5. Medicare adjusts prices to account for new products and procedures. This often takes several months after Medicare approves the technology.	

EXAMPLE OF TECHNOLOGIES INHIBITED BY MEDICARE

COCHLEAR IMPLANT

A sophisticated electronic device that gives a sense of hearing to people whose deafness is caused by damage to the cochlea (inner ear). Some people who have been told that they have "nerve deafness' may benefit from a cochlear implant.

In the normal hearing process, sound waves enter the ear and strike the eardrum, setting off a chain of vibrations that pass from tiny bones in the middle ear to the cochlea. In the cochlea, hair cells convert the vibrations into electrical impulses that travel along the hearing nerve to the brain. The brain, decoding these impulses, "hears" the sound.

In contrast, the cochlear implant bypasses the eardrum and tiny bones and sends electrical signals directly into the cochlea. Then, as in normal hearing, the signals go from the cochlea to the hearing nerve and then to the brain, which provides meaningful sound.

Status: The cochlear implant was approved as safe and effective by the Food and Drug Administration in November 1984. As yet, Medicare has not agreed to pay for its use by Medicare patients.

DRUG ADMINISTRATION DEVICE

The drug administration device (DAD) is a pump and reservoir implanted into the body to dispense a drug. The pump can be programmed without surgery via radio signals to dispense a drug to a specific point with precise timing and dosage.

It is under clinical study for delivery of analgesics for pain control, chemotherapy for cancer, agents for controlling spasticity and medications for treating congestive heart failure. Since the pump can direct drugs to the brain, it can have uniquely valuable uses—for example, it is already being tested as a method of administering a drug to control Alzheimer's Disease, if such a drug were developed. Since the pump is completely implanted, the patient's daily activities are not affected and a high quality of life can be maintained.

Status: The pump was approved by FDA in 1982, but was not made available to Medicare patients until 1984. The Medicare payment rate has yet to be increased to cover the cost of this technology.

VENTRICULAR ASSIST PUMP

A device designed to help people with certain types of severe heart problems, implanted temporarily to supplement the pumping action of a weak heart. The device is used only when other, more conventional treatments do not work. For example, it can be used with patients who are awaiting a heart transplant, or to boost the pumping power of a heart after open-heart surgery (such as bypass surgery) or a heart attack. It is placed outside the body and powered by bursts of air generated by compressor.

Status: The device is still in the experimental stage, but has been implanted during clinical trials in dozens of patients. Once the device receives FDA approval, it appears that the Medicare payment rate will be insufficient to cover its cost.

● Mr. BENTSEN. Mr. President, I am pleased to join my distinguished colleague, Senator DURENBERGER, in introducing S. 2474, the Medical Equal Access to Technology Act. The purpose of this legislation is to amend title XVIII of the Social Security Act to ensure that Medicare beneficiaries have access to new medical devices and procedures.

Introduction of the Prospective Payment System [PPS] in 1983 has resulted in significant reform of the health delivery system used by hospitals across this country. Dramatic changes in length of stay, use of outpatient surgery, and increased competition among providers of care have helped curb major increases in the cost of services. However, as my colleagues know, PPS uses the Diagnostic Related Group, or DRG, to determine rates of hospital reimbursement. DRG's are based on national averages associated with the delivery of care or services. In order to obtain average rates of payment, a service must already be available and accessible to patients.

A system based strictly on DRG's is therefore inherently dependent on existing technologies and procedures for which there is a history of payments and for which an average rate can be derived. But what of new technologies and procedures? PPS is, by definition, biased against introducing the most advanced, state-of-the-art health services. This bill, Mr. President, is designed to overcome the disincentives built into the DRG system and thereby ensure that elderly and disabled beneficiaries have access to the full range of devices and technologies needed to improve their health status.

Specifically, the bill provides partial funding for certain costly medical treatments until DRG's are recalibrated to account for those costs. New devices and procedures would qualify for coverage if they increase Medicare costs at least 10 percent above the payment rate of the DRG that most nearly approximates the diagnosis. In addition, new products must have approval for safety and efficacy by the Food and Drug Administration, and new procedures must have received a recommendation for coverage under the International Classification of Diseases [ICD9-CM].

This bill provides funding only until such time as the Health Care Financing Administration adjusts the DRG's to accommodate the new technology. Moreover, Medicare's share of the payment would be the closest DRG rate plus 60 percent of the amount that exceeds 110 percent of the DRG level—the hospital would be liable for the remaining 40 percent. Requiring that institutions share in the cost of the new technology is designed to ensure that the hospital has a sufficient stake in the cost of the device or technology to make a prudent coverage decision.

Total expenditures for the implementation of this proposal may not exceed 1 percent of the trust funds, and funds may only be expended in years when the trust fund has a surplus. This year, the amount that could be utilized would therefore amount to approximately $400 million; however, preliminary projections place this year's cost at no more than $100 million.

Mr. President, I should like to take a moment to highlight an example of the type of procedure that could be made more widely available to the elderly and disabled with enactment of this bill. Dr. Stanley Crawford, a heart surgeon who practices at the Methodist Hospital in Houston, pioneered a complex resection and graft replacement known as a thoraco-abdominal aortic aneurysm resection (Thoraco-AAA). Half of the procedures performed annually are done at the Methodist Hospital, and the remainder are carried out at fewer than six other institutions.

Prior to the development of this technique, nearly 60 percent of the persons with the medical problems leading to a Thoraco-AAA died within 2 years, and 80 percent died within 5 years. Today, Dr. Crawford's innovative approach to treating these patients has turned those statistics around, making a longer more normal life possible for dozens of heart patients and their families.

The clinical efficacy of the procedure was established after the most recent modifications to the ICD-9CM, yet the PPS structure does not capture this new surgical technique, which has resulted in a loss of nearly $2½ million to the Methodist Hospital over the last year.

Because of a commitment to clinical research and a firm desire to maintain the hospital's reputation as a world class institution, the president and members of the Methodist Hospital board have allowed Dr. Crawford to operate while they awaited recalibration of the DRG's. Not all institutions have the financial resources to enable them to carry out such a decision. More importantly, elderly and disabled persons in communities across this country are being denied access to a lifesaving technique, simply because of a lag in recoding.

Mr. President, our bill is not designed to pay for all the costs of new technology, but rather to recognize the incremental costs associated with that technology. We do not propose to eliminate all losses, but to reduce them. We do not intend to create Medicare financial incentives for new medical advances, but rather to remove what, in this budget-driven environment, is a powerful financial disincentive which works against our common interest in pushing back the frontiers of medical science for the benefit of all.

I urge my colleagues to join with us in support of this modest, but necessary, modification of the Prospective Payment System.●

By Mr. HUMPHREY (for himself, Mr. LUGAR, Mr. HATCH, Mr. NICKLES, Mr. LEAHY, Mr. SIMON, Mr. GRASSLEY, Mr. METZENBAUM, and Mr. MOYNIHAN):

S. 2476. A bill to amend part E of title IV of the Social Security Act to require States to furnish, and the Secretary of Health and Human Services to publish, statistical data relating to the incidence of adoption; to the Committee on Finance.

REQUIREMENT FOR CERTAIN STATISTICAL DATA RELATIVE TO ADOPTION

● Mr. HUMPHREY. Mr. President, today I am introducing legislation to require the States to furnish, and the Secretary of Health and Human Services to publish, statistical data relating to the incidence of adoptions. I am pleased that Senator LUGAR, Senator HATCH, Senator NICKLES, Senator LEAHY, Senator SIMON, Senator GRASSLEY, Senator METZENBAUM, and Senator MOYNIHAN are joining me in this effort.

During the 1950's and 1960's, and up until 1975, the Federal Government collected statistics from the States on the number and characteristics of children adopted each year. Since 1975, no Federal report on adoption in the United States has been issued.

The States have primary jurisdiction over adoption, but a number of Federal programs and laws relate to adoption in various ways. Chief among these are the adoption opportunities program established by the Child Abuse prevention and Treatment and Adoption Reform Act of 1978 (Public Law 95-266), the adoption assistance program established by the Adoption Assistance and Child Welfare Act of 1980 (Public Law 96-272), and funding for adoption services under the Adolescent Family Life Act of 1981.

In order to assess the impact of these Federal programs and to target scarce Federal funds, we need statistical information about adoption in this country. How can we develop and maintain an informed, rational policy on adoption unless we know trends in the annual numbers of adoptions, characteristics of adopted children, biological parents and adoptive families, types of adoptions, and the relationship of adoptive parents to the child? For instance, national data on adoption could tell us how successful the incentive of adoption assistance has been in moving children out of foster care into permanent homes. Or whether Federal policy which encourages adoption of children from the foster care system has increased the number of adoptions by foster parents.

As long ago as 1978, with the establishment of the adoption opportunities program under Public Law 95-266, Congress recognized the need for an adoption data system. The adoption opportunities program, designed to encourage and facilitate the adoption of children with special needs—that is, children who are considered hard to place because of factors such as handicap, age or race—specifically required the establishment and operation of a national adoption and foster care data gathering and analysis system utilizing data collected by the States. Yet here we are, almost 10 years later, and it is impossible to ascertain with any certainty how many children were adopted in this country last year.

In 1984 Congress reauthorized the adoption opportunities program, and renewed the Federal commitment to promoting the placement of thousands of institutionalized and foster care children with permanent, adoptive families. In the Labor and Human Resources Committee Report accompanying the Senate bill, the problem of data gathering was addressed at length. The committee report stated that more accurate information "must be collected." Further, the report concluded, "The Committee does not want the Secretary to rely only on voluntary State reporting for data-gathering and analysis purposes."

Still the Secretary of Health and Human Services does rely on voluntary reporting, to the Voluntary Cooperative Information System [VCIS], which is operated by the American Public Welfare Association with funding assistance from the Office of Human Development Services of the Department of Health and Human Services. A major disadvantage of the VCIS system is that it is limited to data on children placed for adoption by public child welfare agencies. In addition, VCIS is plagued by irregular reporting, variations in reporting time frames, and lack of common definitions. As the latest VCIS report warns, the data "should be considered as rough national estimates."

In response to Congress' express intent to have national information on adoption collected, in 1984 the Assistant Secretary for Human Development Services approved the formation of the Adoption Information Improvement Workgroup, a group of 22 individuals selected for their technical expertise in surveys and studies of children and families. The work group's mission was to examine the strengths and weaknesses of available statistical information about adoption, to identify the information gaps, and to make recommendations to the Assistant Secretary for ways to fill those gaps.

In April 1985 the adoption information improvement work group made seven major recommendations regarding ways to improve adoption information. I believe the workshop recommendations are of utmost importance and therefore am including all seven in this statement, even though this legislation responds to only the first recommendation. These recommendations, presented by the work group in a general order of importance of data which would be generated, are:

First, to implement a nationwide adoption information system accounting for all types of adoptions on an annual basis;

Second, to conduct a study of adoption service providers to determine the number and types of children in need of adoption, the number and types of families actively seeking to adopt and the adoption process;

Third, to encourage and support the addition of items to national surveys conducted by the Federal Government which would provide information about adopted children, adoptive families, birth parents, and potential adoptive parents to describe their current status and past history;

Fourth, to support studies of small samples of young unmarried pregnant women and the biological fathers to determine the decisionmaking process of the woman to keep her child or make an adoption plan;

Fifth, to examine the postlegal adoption use of and demand for services by birth parents, adopted children, and adoptive families provided by the public or private agency which placed the child or other service providers;

Sixth, to encourage the conduct of small scale research studies which examine the psychological, emotional, and social consequences of adoption for children as compared to children who remain with birth parents or a single parent, children who reside in step-families, children in long-term foster care, and children in other family structures; and

Seventh, to commission, publish, and distribute a review of the adoption research findings which would include a discussion of their implications for adoption policy and practice.

The legislation I am introducing today will ensure the implementation of the first recommendation of the Adoption Information Improvement Workgroup, and will generate the statistics they and other experts in adoption deem to be the most important for our national policy on adoption.

The bill amends the Adoption Assistance Program established under title IV-E of the Social Security Act to require, as a necessary feature of each State plan for foster care and adoption assistance, an annual statistical report to the Secretary of Health and Human Services on adoptions finalized by the State courts during the preceding calendar year.

The bill would require the State report to include first, the total number of adoptions finalized in the State during the preceding calendar year; second, the age, sex, race or ethnicity, nationality, and handicap status of the adopted children; third, the age and marital status of the biological mothers; fourth, the age and race or ethnicity of the adoptive parents; fifth, the relationship between the adoptive parents and the children prior to the adoption (relative, nonrelated, foster parents); sixth, the status of the children prior to the adoption (e.g., foster child, previously adopted); and seventh, whether the children were placed by a private agency, public agency, or independently.

No later than December 31 of each year, the Secretary of Health and Human Services is required to publish an annual report on the adoption statistics supplied by the States for the previous calendar year.

The bill recognizes the need for confidentiality and the data shall be reported in statistical form only. The bill contains language emphasizing that there is no intent to authorize or require the collection or release of information that identifies by name or address any party to an adoption.

Finally, the bill contains provisions allowing sufficient time after the date of enactment of this legislation for States to establish their adoption reporting systems.

Mr. President, I do not relish legislation Federal requirements for the States, and imposing these data collec-

tion requirements as a condition of participation in the title IV-E Adoption Assistance Program. But in this case, there are important reasons for this approach.

First and foremost is the price paid by children who grow up in foster care, without a permanent home. With the adoption opportunities and adoption assistance programs, the Federal Government dedicated itself to the goal of permanency for these children. It is essential that we have hard data to ascertain the results of these programs, and to direct our future policy.

Most adoptions of children with special needs are handled by public agencies or by private agencies under purchase of service agreements. However, public agencies and public resources are involved in all types of adoptions through home studies or supervision of independent adoptions, licensing of private agencies and individuals to make adoptive placements, disruptions of independent adoptions, and post-adoption services for any adoption, regardless of who made the initial adoptive placement. The minimum data required from the States by this legislation follows the recommendations of the adoption information improvement workgroup, and will provide the basic statistics on all adoptions necessary for sound overall adoption policy.

In addition, this legislation purposely does not specify how each State shall collect their data on adoption. It is my understanding that recordkeeping varies considerably from State to State. In some States, it may be a simple matter to gather these statistics from State court records. Other States may want to utilize the department of social services, the bureau of vital statistics, or the State adoption specialist. I would not presume to dictate to each State how best to collect these statistics.

As a followup to the adoption information improvement workgroup recommendations, the Department of Health and Human Services has funded a research study to determine the feasibility of obtaining adoption data from State court records, and the results of that study should be available within the next few months. This research will provide a valuable tool for States in the implementation of the data gathering requirement.

Further, establishing this data collection requirement as a part of the title IV-E Adoption Assistance Program ensures Federal matching funds so that the States would not have to bear the total financial burden. The Congressional Budget Office estimates that by 1988, when the State systems have been fully implemented, the total estimated costs to the States would be $1 million. Costs to the Federal Government are also estimated at $1 million annually, a small price relative to the $497 million the Federal Government spent in fiscal year 1985 on title IV-E foster care alone.

Finally, I believe that we have waited long enough for these statistics, and that it has been amply demonstrated that a voluntary system cannot provide the needed information. For too long we have relied on fragmental data and rough national estimates.

Mr. President, for over a year now I have been actively promoting adoption through the Congressional Coalition On Adoption. In our contacts with experts in the adoption field and individuals and couples who have been involved with the adoption process, I have been repeatedly urged to do something about the lack of adequate statistics on adoption. This legislation is a product of those concerns and has the enthusiastic support of the National Committee for Adoption, the North American Council on Adoptable Children, and Aid to Adoption of Special Kids (AASK America). I urge my colleagues to join me in sponsoring this bill which will provide a solid data base for our Federal policy on adoption. I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2476

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ADOPTION STATISTICS.

(a) CONDITION OF STATE PLAN APPROVAL.—Section 471(a) of the Social Security Act (42 U.S.C. 671(a)) is amended—

(1) by striking out "and" at the end of paragraph (16);

(2) by striking out the period at the end of paragraph (17) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraph:

"(18) provides for reporting adoption statistics to the Secretary on an annual basis in accordance with section 476(c).".

(b) ANNUAL REPORT BY THE SECRETARY.—Section 476(a) of such Act (42 U.S.C. 676(a)) is amended by adding at the end thereof the following new sentence: "The data submitted pursuant to subsection (c) with respect to a calendar year shall be collected and published not later than December 31 of the following year.".

(c) ANNUAL REPORT BY STATES.—Section 476 of such Act (as amended by subsection (b)) is further amended by adding at the end thereof the following new paragraph:

"(c) Not later than April 1 of each year, each State shall submit to the Secretary a report setting forth statistical data on adoptions finalized in the State during the preceding calendar year. Such data shall include—

"(1) the total number of adoptions finalized in the State during such preceding year;

"(2) the age, sex, race or ethnicity, nationality, and handicap status of the adopted children;

"(3) the age and marital status of the biological mothers of such children;

"(4) the age and race or ethnicity of the adoptive parents of such children;

'(5) the relationship (if any) between the adoptive parents and such children prior to adoption;

"(6) the status of such children prior to adoption (such as whether the child was a foster child or previously adopted); and

"(7) the manner in which such children were placed for adoption (whether by private agency, public agency, or independently).

Nothing in this subsection shall be construed to authorize or require the collection or release of any information that identifies by name or address any party to an adoption.".

(d) EFFECTIVE DATE.—

(1) Except as provided in paragraph (2), the amendments made by this section shall become effective on the first day of the calendar year to being more than 180 days after the date of the enactment of this Act.

(2) If a State agency administering a plan approved under part B of title IV of the Social Security Act demonstrates, to the satisfaction of the Secretary of Health and Human Services, that it cannot by reason of State law, comply with the requirements of the amendments made by subsections (a) and (c), the Secretary may prescribe that, in the case of such State, the amendment will become effective beginning on the first day of the first calendar year to begin after the close of the first session of such State's legislature to end on or after the date that is 90 days after the date of the enactment of this section. For purposes of the preceding sentence, the term "session" includes any regular, special, budget, or other session of a State legislature.●

ADDITIONAL COSPONSORS

The following additional cosponsors were added on May 19, 1986:

S. 1743

At the request of Mr. KENNEDY, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of S. 1743, a bill to amend section 810 of the Housing and Community Development Act of 1974, section 202 of the Housing Act of 1959, and section 8 of the United States Housing Act of 1937, to establish a special program for housing for the chronically mentally ill.

S. 1744

At the request of Mr. KENNEDY, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of S. 1744, a bill to require States to develop, establish, and implement State comprehensive mental health plans.

S. 1745

At the request of Mr. KENNEDY, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of S. 1745, a bill to amend titles XVI, XVIII, and XIX of the Social Security Act with respect to services and benefits for chronically mentally ill individuals.

S. 1822

At the request of Mr. THURMOND, the name of the Senator from Ohio [Mr. METZENBAUM] was added as a cosponsor of S. 1822, a bill to amend the

Copyright Act in section 601 of title 17, United States Code, to provide for the manufacturing and public distribution of certain copyrighted material.

S. 2253

At the request of Mr. HEINZ, the name of the Senator from Pennsylvania [Mr. SPECTER] was added as cosponsor of S. 2253, a bill to amend the Balanced Budget and Emergency Deficit Act of 1985 to exempt certain railroad retirement benefits from sequestration or reduction under an order issued by the President under section 252 of such Act.

S. 2328

At the request of Mr. EVANS, the names of the Senator from Minnesota [Mr. DURENBERGER] and the Senator from Nebraska [Mr. EXON] were added as cosponsors of S. 2328, a bill to prohibit for a 10-year period the transfer of sale of Federal Power Marketing Administrations or the Tennessee Valley Authority, and for other purposes.

S. 2331

At the request of Mr. HEINZ, the name of the Senator from Maine [Mr. COHEN] was added as a cosponsor of S. 2331, a bill to amend title XVIII of the Social Security Act to assure the quality of inpatient hospital services and post-hospital services furnished under the Medicare Program, and for other purposes.

S. 2332

At the request of Mr. BOREN, the names of the Senator from Louisiana [Mr. LONG] and the Senator from Louisiana [Mr. JOHNSTON] were added as cosponsors of S. 2332, a bill to provide credit assistance to borrowers of loans made by commercial lending institutions, Farm Credit System institutions, and the Farmers Home Administration, and for other purposes.

S. 2336

At the request of Mr. ABDNOR, the name of the Senator from Idaho [Mr. MCCLURE] was added as a cosponsor of S. 2336, a bill to protect United States cattlemen from imports of live Canadian cattle, and to require the International Trade Commission to conduct a section 201 investigation of such imports.

S. 2401

At the request of Mrs. KASSEBAUM, the name of the Senator from Massachusetts [Mr. KENNEDY] was added as a cosponsor of S. 2401, a bill to prohibit the manufacture or distribution in, or the importation into, the United States of certain firearms.

S. 2411

At the request of Mr. D'AMATO, the name of the Senator from New York [Mr. MOYNIHAN] was added as a cosponsor of S. 2411, a bill to prohibit possession, manufacture, sale, importation, and mailing of ballistic knives.

S. 2417

At the request of Mr. BYRD, the name of the Senator from Michigan [Mr. RIEGLE] was added as a cosponsor of S. 2417, a bill to establish the Aviation Safety Commission, and for other purposes.

S. 2450

At the request of Mr. HEINZ, the name of the Senator from Michigan [Mr. LEVIN] was added as a cosponsor of S. 2450, a bill to amend title II of the Social Security Act to remove permanently the 3-percent threshold requirement for cost-of-living increases.

SENATE JOINT RESOLUTION 196

At the request of Mr. HAWKINS, the name of the Senator from Texas [Mr. BENTSEN] was added as a cosponsor of Senate Joint Resolution 196, a joint resolution designating September 22, 1986, as "American Business Women's Day."

SENATE JOINT RESOLUTION 287

At the request of Mr. BOREN, the name of the Senator from Virginia [Mr. TRIBLE] was added as a cosponsor of Senate Joint Resolution 287, a joint resolution designating September 29, 1986, as "National Teachers Day."

SENATE JOINT RESOLUTION 314

At the request of Mr. QUAYLE, the name of the Senator from Rhode Island [Mr. PELL] was added as a cosponsor of Senate Joint Resolution 314, a joint resolution to designate the week beginning July 27, 1986, as "National Nuclear Medicine Week."

SENATE JOINT RESOLUTION 345

At the request of Mr. DOLE, the name of the Senator from South Carolina [Mr. HOLLINGS] was added as a cosponsor of Senate Joint Resolution 345, a joint resolution to designate the week beginning November 9, 1986, as "National Reye's Syndrome Awareness Week."

SENATE CONCURRENT RESOLUTION 122

At the request of Mr. NICKLES, the name of the Senator from Lousiana [Mr. LONG] was added as a cosponsor of Senate Concurrent Resolution 122, a concurrent resolution to express the sense of Congress with respect to agricultural loan restructuring.

SENATE CONCURRENT RESOLUTION 138

At the request of Mr. DOLE, the name of the Senator from Louisiana [Mr. LONG] was added as a cosponsor of Senate Concurrent Resolution 138, a concurrent resolution expressing the sense of the Congress with respect to Farm Credit System agricultural loan restructuring.

SENATE RESOLUTION 400

At the request of Mr. ROTH, the names of the Senator from Michigan [Mr. LEVIN] and the Senator from Nevada [Mr. HECHT] were added as cosponsors of Senate Resolution 400 a Resolution to retain current tax treatment of Individual Retirement account.

The following additional cosponsors were added on May 20, 1986:

S. 519

At the request of Mr. EVANS, the names of the Senator from Florida [Mrs. HAWKINS] and the Senator from Illinois [Mr. SIMON] were added as cosponsors of S. 519, a bill to require a study of the compensation and related systems in executive agencies, and for other purposes.

S. 1223

At the request of Mr. ARMSTRONG, the name of the Senator from New Hampshire [Mr. HUMPHREY] was added as a cosponsor of S. 1223, a bill to authorize the erection of a memorial on Federal land in the District of Columbia or its environs to honor members of the Armed Forces of the United States who served in the Korean war.

S. 1965

At the request of Mr. STAFFORD, the name of the Senator from Florida [Mr. CHILES] was added as a cosponsor of S. 1965, a bill to reauthorize and revise the Higher Education Act of 1984, and for other purposes.

S. 2103

At the request of Mr. MCCLURE, the names of the Senator from Nevada [Mr. LAXALT], the Senator from Nevada [Mr. HECHT], and the Senator from Alaska [Mr. STEVENS] were added as cosponsors of S. 2103, a bill to clarify the application of the Clayton Act with respect to rates, charges, or premiums filed with State insurance departments or agencies.

S. 2206

At the request of Mr. NICKLES, the name of the Senator from Wyoming [Mr. SIMPSON] was added as a cosponsor of S. 2206, a bill to amend the Internal Revenue Code of 1954 to repeal the windfall profit tax on crude oil.

S. 2256

At the request of Mr. QUAYLE, the name of the Senator from Idaho [Mr. MCCLURE] was added as a cosponsor of S. 2256, a bill to amend the Bilingual Education Act to make Federal financial assistance available for children of limited English proficiency without mandating a specific method of instruction, to encourage innovation at the State and local level through greater administrative flexibility, to improve program operations at the Federal level, and for other purposes.

S. 2270

At the request of Mr. SIMON, the name of the Senator from Alabama [Mr. DENTON] was added as a cosponsor of S. 2270, a bill to amend the Immigration and Nationality Act to deter immigration-related marriage fraud and other immigration fraud.

S. 2294

At the request of Mr. WEICKER, the name of the Senator from Maryland

[Mr. MATHIAS] was added as a cosponsor of S. 2294, a bill to reauthorize certain programs under the Education of the Handicapped Act, to authorize an early intervention program for handicapped infants, and for other purposes.

S. 2331

At the request of Mr. BUMPERS, his name was added as a cosponsor of S. 2331, a bill to amend title XVIII of the Social Security Act to assure the quality of inpatient hospital services and post-hospital services furnished under the medicare program, and for other purposes.

S. 2411

At the request of Mr. D'AMATO, the name of the Senator from Massachusetts [Mr. KENNEDY] was added as a cosponsor of S. 2411, a bill to prohibit possession, manufacture, sale, importation, and mailing of ballistic knives.

S. 2444

At the request of Mrs. HAWKINS, the names of the Senator from Ohio [Mr. METZENBAUM] and the Senator from Wyoming [Mr. WALLOP] were added as cosponsors of S. 2444, a bill to reauthorize the Head Start Act, the Low-Income Home Energy Assistance Act of 1981, the Community Service Block Grant Act, the dependent care State grant program, and for other purposes.

S. 2451

At the request of Mr. MELCHER, the name of the Senator from Massachusetts [Mr. KERRY] was added as a cosponsor of S. 2451, a bill to provide for entry into the United States of sugar only from friendly developing countries, to provide for entry of sugar from the Philippines on at least as favorable terms as sugar from any other country, and for other purposes.

SENATE JOINT RESOLUTION 274

At the request of Mr. GRASSLEY, the names of the Senator from Hawaii [Mr. INOUYE], the Senator from Virginia [Mr. TRIBLE], the Senator from Ohio [Mr. METZENBAUM], the Senator from Missouri [Mr. EAGLETON], the Senator from South Dakota [Mr. ABDNOR], the Senator from Arkansas [Mr. PRYOR], and the Senator from Pennsylvania [Mr. HEINZ] were added as cosponsors of Senate Joint Resolution 274, a joint resolution to designate the weekend of August 1, 1986, through August 3, 1986, as "National Family Reunion Weekend".

SENATE JOINT RESOLUTION 305

At the request of Mr. SIMON, the names of the Senator from Vermont [Mr. LEAHY], the Senator from South Dakota [Mr. PRESSLER], the Senator from South Carolina [Mr. HOLLINGS], and the Senator from Mississippi [Mr. COCHRAN] were added as cosponsors of Senate Joint Resolution 305, a joint resolution to designate the week of April 27, 1986, through May 3, 1986, as "National Arts in the Schools Week".

SENATE JOINT RESOLUTION 314

At the request of Mr. QUAYLE, the name of the Senator from Indiana [Mr. LUGAR], the Senator from Tennessee [Mr. GORE], the Senator from Arkansas [Mr. BUMPERS], and the Senator from Arkansas [Mr. PRYOR] were added as cosponsors of Senate Joint Resolution 314, a joint resolution to designate the week beginning July 27, 1986, as "National Nuclear Medicine Week".

SENATE JOINT RESOLUTION 326

At the request of Mr. WALLOP, the name of the Senator from Delaware [Mr. ROTH], was added as a cosponsor of Senate Joint Resolution 326, a joint resolution proclaim May 21, 1986, as "Andrei Sakharov Honor and Freedom Day".

SENATE JOINT RESOLUTION 339

At the request of Mr. HATCH, the name of the Senator from Florida Mrs. HAWKINS], the Senator from Oklahoma [Mr. NICKLES], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Louisiana [Mr. LONG], the Senator from Georgia [Mr. NUNN], the Senator from Michigan [Mr. RIEGLE], the Senator from New Hempshire [Mr. HUMPHERY], the Senator from North Dakota [Mr. ANDREWS], the Senator from North Dakota [Mr. BURDICK], and the Senator from Kansas [Mr. DOLE] were added as cosponsors of Senate Joint Resolution 339, a joint resolution to designate the week of November 30, 1986, through December 6, 1986, as "National Home Care Week.

SENATE JOINT RESOLUTION 347

At the request of Mr. LEVIN, the names of the Senator from Pennsylvania [Mr. HEINZ], the Senator from Rhode Island [Mr. PELL], the Senator from ALaska [Mr. MURKOWSKI], the Senator from Pennsylvania [Mr. SPECTER], and the Senator from Maine [Mr. COHEN], were added as cosponsors of Senate Joint Resolution 347, a joint resolution to designate the week of May 19, 1986, through May 24, 1986, as "National Homelessness Awareness Week".

SENATE JOINT RESOLUTION 349

At the request of Mr. MOYNIHAN, his name was added as a cosponsor of Senate Joint Resolution 349, a joint resolution to designate the week of May 25, 1986, through May 31, 1986, as "Critical Care Week".

SENATE RESOLUTION 407

At the request of Mr. CRANSTON, the name of the Senator from Minnesota [Mr. BOSCHWITZ] was added as a cosponsor of Senate Resolution 407, a resolution to express the sense of the Senate in support of a tax differential for long-term capital gains.

SENATE CONCURRENT RESOLUTION 141—RELATING TO ETHNIC REPRESENTATION IN AWARDING OF STATUE OF LIBERTY MEDALS

Mr. DECONCINI submitted the following concurrent resolution; which was referred to the Committee on the Judiciary:

SENATE CONCURRENT RESOLUTION 141

Whereas the Statue of Liberty Commission has announced its list of twelve foreign born Americans to be honored for their contributions to the United States at the Fourth of July national celebration of the Centennial of the Statue of Liberty;

Whereas representatives from major and important ethnic organizations were omitted from the list of honorees including Italian, Irish, Polish, Greek Americans, and many others;

Whereas this omission constitutes a tragic oversight of the contributions made by each of these ethnic groups to our Nation's history;

Whereas this omission constitutes a grave injustice to these ethnic groups compounded by the fact that the celebrations are being conducted at the Statue of Liberty and Ellis Island where so many millions of immigrants first touched American soil;

Whereas the twelve honorees selected only comprise 20 per centum of all ethnic Americans in the United States; and

Whereas numerous ethnic organizations have registered strong protests with the Statue of Liberty Commission: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it hereby expresses its profound opposition to the omission of important ethnic organizations from the list of foreign born Americans to be honored at the Statue of Liberty Centennial celebration, the Senate further urges the Statue of Liberty Commission and or the President to expand the list of honorees to guarantee representation by all ethnic American organizations whose contributions to our Nation deserve full and appropriate recognition.

● Mr. DECONCINI. Mr. President, I rise today to submit a concurrent resolution concerning the omission of major ethnic groups from those receiving medals during the Statue of Liberty Centennial celebration. Twelve foreign-born Americans are being recognized by the Statue of Liberty Commission at the celebration over the Fourth of July. These 12 represent only 20 percent of ethnic Americans. This legislation calls for the expansion of that list of 12 to guarantee full representation of all ethnic American organizations whose contributions to our Nation deserve full and appropriate recognition.

Congressman BIAGGI of New York, who has been a strong leader in ethnic affairs, has introduced identical legislation in the House of Representatives.●

SENATE CONCURRENT RESOLUTION 142—AUTHORIZING A TECHNICAL CORRECTION IN THE ENROLLMENT OF H.R. 2672

Mr. DOLE (for Mr. ROTH, for himself, Mr. STEVENS, and Mr. EAGLETON) submitted the following concurrent resolution; which was considered and agreed to:

S. CON. RES. 142

Resolved by the Senate (the House of Representatives concurring), That, in the enrollment of the bill (H.R. 2672) to amend title 5, United States Code, to establish a new retirement and disability plan for Federal employees, postal employees, and Members of Congress, and for other purposes, the Clerk of the House of Representatives shall make the following corrections:

(a) At the end of section 8432(b) of title 5, United States Code (as added by section 101(a) of the bill) insert the following new paragraph (4):

"(4) Notwithstanding paragraph (2)(A), an employee or Member who is an employee or Member on January 1, 1987, and has creditable service described in section 8411(b)(2) of this title may make the first election for the purpose of subsection (a) during the election period prescribed for such purpose by the Executive Director. The Executive Director shall prescribe an election period for such purpose which shall commence on January 1, 1987. An election by such an employee or Member during that election period shall be effective on the first day of the employee's or Member's first pay period which begins after the last day of that election period.

(b) In section 702(b)(4) of the bill, strike "401" and insert in lieu thereof "701".

AMENDMENTS SUBMITTED

PRODUCT LIABILITY VOLUNTARY CLAIMS AND UNIFORM STANDARD ACT

GORTON AMENDMENT NO. 1968

(Ordered referred to the Committee on Commerce, Science, and Transportation)

Mr. GORTON submitted an amendment intended to be proposed by him to amendment (No. 1951) submitted by Mr. DANFORTH (for himself and Mr. DODD) to the bill (S. 1999) to regulate interstate commerce by providing for a uniform product liability law, and for other purposes; as follows:

TITLE I

SHORT TITLE

SEC. 101. This Act may be cited as the "Federal Product Liability Reform Act".

DEFINITIONS

SEC. 102. As used in this Act—

(1) "Class I non-economic loss" means non-economic loss consisting of pain and suffering or mental anguish associated with (A) the death of a parent, child or spouse, or (B) permanent disfigurement or permanent total or partial loss of a body part or function of the plaintiff;

(2) "Class II non-economic loss" means non-economic loss consisting of all non-economic loss other than Class I non-economic loss which is compensable under State law;

(3) "collateral benefits" means all benefits and advantages received or entitled to be received (regardless of any right any other person has or is entitled to assert for recoupment through subrogation, trust agreement, lien, or otherwise) by any person harmed or by any other person as reimbursement of loss because of harm to person or property payable or required to be paid, under—

(A) any Federal law or the laws of any State (other than through a claim for breach of an obligation or duty); or

(B) any life, health or accident insurance or plan, wage or salary continuation plan, or disability income or replacement service insurance or any benefit received or to be received as a result of participation in any pre-paid medical plan or Health Maintenance Organization;

(4) "commerce" means trade, traffic, commerce, or transportation (A) among the several States, between any foreign country or any territory or possession and any State or between points in the same State but through any other State or a foreign country; or (B) which affects trade, traffic, commerce or transportation described in clause (A);

(5) "economic loss" means any pecuniary loss resulting from harm which is allowed under State law;

(6) "harm" means any harm recognized under the law of the State in which the action is maintained, other than loss or damage caused to a product itself, or commercial loss, with respect to which recovery is available under the commercial or contract law of the State;

(7) "manufacturer" means (A) any person who is engaged in a business to design or formulate or to produce, create, make, assemble or construct any product (or component part of a product); (B) a product seller with respect to all aspects of a product (or component part thereof) which are created or affected when, before placing the product in the stream of commerce, the product seller designs or formulates, or produces, creates, makes, assembles or constructs an aspect of a product (or component part thereof) made by another; and (C) any product seller not described in clause (B) which holds itself out as a manufacturer to the user or consumer of the product;

(8) "net economic loss" means loss consisting of economic loss less collateral benefits;

(9) "non-economic loss" means loss caused by a product other than economic loss;

(10) "plaintiff" means any person who brings a civil action under title II of this Act, and if such an action or claim is brought through or on behalf of an estate, the term includes the plaintiff's decedent, or if such an action or claim is brought through or on behalf of a minor, the term includes the minor's parent or guardian;

(11) "product" means any object, substance, mixture or raw material in a gaseous, liquid or solid state which is capable of delivery itself, or as an assembled whole in a mixed or combined state or as a component part or ingredient, which is produced for introduction into trade or commerce, which has intrinsic economic value, and which is intended for sale or lease to persons for commercial or personal use; "product" does not include (A) human tissue, blood, or organs unless specifically recognized as a product pursuant to State law; or (B) a product used in the course of any trade or business which has been discarded, abandoned, or disposed of by such trade or business, unless such product is one which is customarily produced or distributed for sale, consumption or use, or is customarily stored by individuals, in or about an office or the household;

(12) "product seller" means a person who, in the course of a business conducted for that purpose, sells, distributes, leases, labels, or markets, or repairs or maintains (to the extent such repair or maintenance is alleged to have caused or contributed to any harm), or otherwise is directly involved in placing a product in the stream of commerce; "product seller" does not include—

(A) a seller of real property other than a builder or contractor;

(B) a provider of professional services in any case in which the sale or use of a product is incidental to the transaction and the essence of the transaction is the furnishing of judgment or skill; or

(C) any person who acts in only a financial capacity with respect to the sale or lease of a product;

(13) "product user" means any person who owns, leases, operates, uses, or has control of a product;

(14) "property damage" means damage to any person's property, without regard to whether the person was harmed;

(15) "sale" means any change in ownership of a product, any intentional relinquishment of control of a product, and any lease of a product; "sale" includes any temporary transfer of control of a product in contemplation of the sale or lease of the product; and

(16) "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States, or any political subdivision of any State.

PREEMPTION OF OTHER LAWS

SEC. 103. (a) This Act governs any civil action for harm caused by a product, including any action which is based on: (1) strict or absolute liability in tort; (2) negligence or gross negligence; (3) breach of express or implied warranty; (4) failure to discharge a duty to warn or instruct; or (5) any other theory that is the basis for an award for damages for harm caused by a product.

(b) A civil action for loss or damage caused to a product itself or for commercial loss with respect to which recovery is available under the commercial or contract law of the State is not subject to the provisions of this Act, and shall be governed by applicable commercial or contract law.

(c)(1) This Act supersedes any State law regarding recovery for any harm caused by a product to the extent that this Act establishes a rule of law applicable to any action for such recovery. Any issue arising under title III of this Act that is not governed by any such rule of law shall be governed by applicable State law. This Act shall not be construed to waive or affect any defense of sovereign immunity asserted by any State under any provision of law.

(2) Nothing in this Act shall be construed to supersede any Federal law, except the Federal Employees Compensation Act.

(3) Nothing in this Act shall be construed to waive or affect any defense of sovereign immunity asserted by the United States.

(4) Nothing in this Act shall be construed to affect the applicability of any provision

of the Foreign Sovereign Immunities Act of 1976 (28 U.S.C. 1602 et seq.).

ATTORNEY'S FEES

SEC. 104. For purposes of sections 201, 202 or 203 of this Act, attorney's fees shall be calculated on the basis of an hourly rate which should not exceed that which is considered acceptable in the community in which the attorney practices, considering the attorney's qualifications and experience and the complexity of the case.

MANNER OF PAYMENT OF NET ECONOMIC LOSS

SEC. 105. Any tender of relief under section 201 of this Act, or any settlement under the settlement proceedings initiated under section 202 of this Act, may be made by—

(1) the payment of net economic loss previously incurred, non-economic damages, and an enforceable promise to pay future otherwise uncompensated net economic loss as it is incurred;

(2) an agreement to pay net economic loss by means of an annuity; or

(3) payment of a lump sum.

TREATMENT OF NET ECONOMIC LOSS FOR TAX PURPOSES

SEC. 106. Nothing in this Act shall be construed to render benefits tendered for net economic loss includable as gross income for the purposes of section 61 of the Internal Revenue Code of 1954.

APPLICABILITY OF THIS ACT TO CERTAIN CIVIL ACTIONS

SEC. 107. For purposes of this Act, a civil action for harm caused by a product which is part of an indivisible claim and which is brought against a person other than a manufacturer or product seller is subject to this Act if and only if the manufacturer or product seller is also a defendant in such action.

SEVERABILITY

SEC. 108. If any provision of this Act or the application of it to any person or circumstance is held invalid, the remainder of this Act and the application of the provision to any other person or circumstance shall not be affected by that invalidation.

EFFECTIVE DATE

SEC. 109. (a) This Act shall be effective 90 days after the date of its enactment. In accordance with section 208 of this Act, this Act shall apply to all civil actions or claims commenced or brought on or after that date, regardless of whether the conduct which caused the harm, or the exposure to the product which caused the harm, occurred before the effective date.

(b) If any provision of this Act would shorten the period during which a manufacturer or seller is exposed to liability under this Act, the plaintiff may, notwithstanding the otherwise applicable time period in section 208 of this Act, bring such action or claim within 1 year after the effective date of this Act.

TITLE II

PRODUCT LIABILITY ACTION

SEC. 201. (a) Any plaintiff may bring a civil action for damages against a person for harm caused by a product pursuant to applicable State law, except to the extent such law is superseded by this title.

(b)(1) Any plaintiff may, in addition to any claim for relief made in accordance with State law, include in such plaintiff's complaint a claim for relief for such plaintiff's net economic loss, together with Class I non-economic loss not greater than $250,000 and reasonable attorney's fees.

(2) Any plaintiff alleging harm caused by exposure to an product in the plaintiff's workplace may include in such plaintiff's complaint a claim for the relief specified in paragraph (1) of this subsection or a claim solely for the plaintiff's net economic loss and reasonable attorney's fees.

(c) If the plaintiff's complaint does not include a claim for relief as set forth in subsection (b) of this section, the defendant may tender the relief set forth in subsection (B)(1) of this section to the plaintiff within 60 days after service of the plaintiff's complaint or within the time permitted pursuant to State law for a responsive pleading, whichever is longer, except that if such pleading includes a motion to dismiss in accordance with applicable law, the defendant may tender such relief to the plaintiff within 10 days after the court's determination regarding such motion.

(d) In any case where an offer is made pursuant to subsections (b) or (c) of this section, the parties shall proceed in accordance with section 202 of this title.

(e) In any case in which a claim is made pursuant to subsection (b) of this section or a tender of relief is made pursuant to subsection (c) of this section, the court may, upon motion made prior to the expiration of the applicable period for response, enter an order extending such period. Any such order shall contain a schedule for discovery of evidence material to the issue of the appropriate amount of relief, and shall not extend such period for more than 60 days. Any such motion shall be accompanied by a supporting affidavit of the moving party setting forth the reasons why such extension is necessary to promote the interests of justice and stating that the information likely to be discovered is material, and is not, after reasonable inquiry, otherwise available to the moving party.

SETTLEMENT PROCESS

SEC. 202. (a) within the period for response permitted in section 203 of this title, the offeree of an offer to tender or accept relief under section 201 of this title shall either accept such offer (in which case the judge shall dismiss the action with prejudice) or shall file with the court the offeree's alternative proposal of relief, together with affidavits and evidence to support such proposal. At the time of such filing, the offeree shall serve on the offeror a copy of such filing and all materials filed with the court under this subsection.

(b) Within 5 days after receiving notice from an offeree under subsection (a) of this section, the offeror shall file with the court a copy of the offeror's original offer under this title, together with affidavits and evidence to support such offer to tender or accept relief. At the time of such filing, the offeror shall serve on the offeree a copy of such filing and all materials filed with the court under this subsection.

(c) The court may provide the opportunity for the offeror and offeree to offer oral evidence regarding the amount of such damages or other evidence regarding the amount of such damages or other evidence submitted under this section.

(d) Within 20 days after an offer is filed under subsection (b) of this section, the court shall, on the basis of which offer will provide the appropriate amount of damages, as to each element of damages and attorney's fees, select either the offeree's proposal or the offeror's proposal, and shall enter judgment accordingly.

(e) A determination by the court of the appropriate amount of damages and reasonable attorney's fees under subsection (d) of this section shall not be subject to review in any court. Nothing in this subsection shall be construed to prevent the offeree from proceeding with a civil action under this title after the date on which such determination is made in accordance with the limitations specified in section 203 of this title.

FAILURE TO TENDER RELIEF

SEC. 203. (a)(1) If the defendant, as offeree, does not tender in a timely manner the relief pleaded in accordance with section 201(b)(1) of this title or fails to act in accordance with the court's determination under section 202 of this title, and the plaintiff prevails in such action, the court shall enter judgment against the defendant and shall include in such judgment interest from the date of the decision of the court under section 202 of this title, together with reasonable attorney's fees and costs. Such fees shall be offset against any fees owned by the plaintiff to the plaintiff's attorney by reason of the verdict.

(2) The court shall enter judgment in accordance with paragraph (1) of this subsection unless the court determines that the defendant was reasonable in not tendering relief to the plaintiff in accordance with this section or in failing to act in accordance with the court's determination under section 202 of this title, because (A) the case presented an unsettled or novel, but credible, question of law, or (B) there existed a genuine question of fact material to a determination of liability.

(3) For purposes of this subsection, a plaintiff shall be considered to prevail in such action if the defendant is found liable to the plaintiff for any claim included in the plaintiff's complaint in an amount greater than 50 percent of the amount of the court's determination under section 202 of this title.

(b) If the defendant does not tender in a timely manner to the plaintiff the relief pleaded in accordance with section 201(b)(2) of this title, there is created a presumption, rebuttable by a preponderance of the evidence, that the product caused the plaintiff's harm, if the plaintiff introduces evidence sufficent to show that—

(1) the plaintiff was exposed to the product in the plaintiff's workplace;

(2) there exists a reasonable likelihood that exposure to such substance causes or significantly contributes to the alleged illness or disease; and

(3) there is a reasonable likelihood that the quantity or duration of the plaintiff's exposure significantly contributed to the harm of which the plaintiff complains.

(c)(1) If the plaintiff, as offeree, does not accept in a timely manner the relief tendered in accordance with section 201(c) of this title or the finding of the court under section 202 of this title is rejected by the plaintiff, no damages for Class II non-economic loss or for Class I non-economic loss in excess of $250,000 and no punitive damages may be assessed against such defendant with respect to liability for a defect in design or a failure to warn or instruct which is established on a theory which is based on the condition of the product rather than the conduct of the defendant.

(2) In any such action, any damages for economic loss awarded at trial shall be limited to damages for the plaintiff's net economic loss.

(d) For purposes of this action, "in a timely manner" means—

(1) in any case where the plaintiff is the offeree, 60 days after service of notice of a

claim or 10 days after the court's determination under section 202 of this title; and

(2) in any case where the defendant is the offeree, 60 days after service of notice of a claim or within the time permitted pursuant to state law for a responsive pleading, whichever is longer (except that if such pleading includes a motion to dismiss in accordance with applicable law, the defendant may tender such relief to the plaintiff within 10 days after the court's determination regarding such motion), or 10 days after the court's determination under section 202 of this title.

JURISDICTION OF FEDERAL COURTS

SEC. 204. The district courts of the United States shall not have jurisdiction over any civil action subject to the provisions of this title, based on sections 1331 or 1337 of title 28, United States Code.

JURISDICTION AND VENUE

SEC. 205. (a) Under this title, a civil action may be brought in a State court in the State in which the defendant resides or has its principal place of business, in which the harm which is the subject of the action occurred, in which the product was sold to the plaintiff, or in which the plaintiff resides if the defendant is doing business in that State. For the purposes of this section, harm which is incurred due to prolonged or repeated exposure to a product or which remains latent for a period following exposure to the product is presumed to occur in any State in which any such exposure occurred or in which the plaintiff resided during such period.

(b) The summons and complaint in such an action shall be served as provided by the law of the State in which the action is brought, except that the delivery of the summons and complaint to the defendant or the defendant's agent as required by the law of such State may be made by certified mail beyond the territorial limits of the State in which the action is brought.

FORUM NON CONVENIENCE

SEC. 206. Any court in which an action is commenced under this title shall decline to exercise jurisdiction over the claim if the court determines that the convenience of the parties and the interests of justice dictate that the action should proceed in another State or foreign jurisdiction. In any action maintained by a citizen of a foreign jurisdiction which arises out of a transaction which occurred in a foreign jurisdiction, there is created a presumption, rebuttable by clear and convincing evidence, that the action should proceed in a foreign jurisdiction.

CHOICE OF LAW

SEC. 207. In any civil action subject to the provisions of this title, the law to be applied to the action, except as otherwise specifically provided in this title, is the law of the State in which the action is maintained, except that no State law regarding the choice-of-law shall apply, and except that, in any action consolidated for trial pursuant to the provisions of section 1407 of title 28, United States Code, the law to be applied shall be the law of the State in which the district court of the United States is located.

LIMITATION OF ACTIONS

SEC. 208. Notwithstanding the law of any State, a civil action subject to the provisions of this title shall be barred unless the complaint is served and filed within 3 years of the time in which the plaintiff discovered or, in the exercise of reasonable diligence, should have discovered the harm and its cause, except that any such action of a person under legal disability may be commenced within 3 years after the disability ceases. If the commencement of such an action is stayed or enjoined, the running of the statute of limitations under this section shall be suspended for the period of the stay or injunction.

JOINT AND SEVERAL LIABILITY

SEC. 209. (a) If more than one person is liable to a plaintiff on an indivisible claim for the same harm, the liability of such persons shall be joint and several, except that—

(1) the liability on any such claim of a defendant who, in accordance with section 201 of this title, tendered relief which has been accepted or settled in accordance with section 202 of this title shall not be joint and several; and

(2) the liability of a defendant who, in accordance with section 201 of this title, tendered relief which has not been accepted shall not be joint and several, except that the defendant's liability shall be joint and several only to the extent of the net economic loss of the plaintiff.

(b) A right of contribution exists between or among two or more persons who are jointly and severally liable upon the same indivisible claim for the same harm, without regard to whether judgment has been recovered against all or any of such persons. Such right of contribution may be enforced either in the original action or by a separate action brought for that purpose. The basis for contribution among such liable person is the comparative responsibility of each such person, except that the court may determine that two or more persons are to be treated as a single person for purposes of contribution.

(c) If the comparative responsibility of the parties jointly responsible for the same harm to the plaintiff has been established by the court in the original action, to the extent that any party is liable to the plaintiff for a sum in addition to its percentage of responsibility pursuant to subsection (a) of this section, such sum shall be reduced by any collateral benefits of the plaintiff.

(d) The contributory negligence of an employer shall constitute a bar to any right of subrogation under a worker's compensation statute, or similar statute, of a State against a manufacturer or product seller for harm caused to an employee.

ADMISSIBLE EVIDENCE

SEC. 210. (a)(1) All relevant evidence is admissible in any civil action brought under this title, except as otherwise provided by the Constitution of the United States, Act of Congress, or any other rule prescribed by the Supreme Court of the United States pursuant to statutory authority, or, with respect to any section based on section 1332 of title 28, United States Code, by the Federal Rules of Evidence. Evidence which is not relevant is not admissible in any such action.

(2) Evidence which is relevant may be excluded in any civil action brought under this title if its probative value is substantially outweighed by the danger of unfair prejudice, confusion of the issues, or misleading the jury, or by considerations of undue delay, waste of time, or needless presentation of cumulative evidence.

(3) As used in this subsection, "relevant evidence" means evidence having any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without such evidence.

(b) Evidence of measures taken after an event, which if taken previously would have made the vent less likely to occur, is not admissible to prove liability in any action subject to this title, in connection with the event. This section does not require the exclusion of evidence of subsequent measures when offered for another purpose, such as proving ownership, control, or feasibility of precautionary measures, if controverted, or impeachment.

(c) If the defendant has tendered relief in accordance with section 201(c) of this title and the plaintiff refuses to accept such tender, evidence of such refusal is admissible in any civil action brought under this title.

UNIFORM STANDARDS OF PRODUCT SELLER LIABILITY

SEC. 211. (a) Notwithstanding any other provision of this Act, in any civil action for harm caused by a product, a product seller other than a manfacturer is liable to a plaintiff, only if the plaintiff establishes by a preponderance of the evidence that—

(1)(A) the individual product unit which allegedly caused the harm complained of was sold by the defendant, (B) the product seller failed to exercise reasonable care with respect to the product, and (C) such failure to exercise reasonable care was a proximate cause of the plaintiff's harm; or

(2)(A) the product seller made an express warranty, independent of any express warranty made by a manufacturer as to the same product, (B) the product failed to conform to the warranty, and (C) the failure of the product to conform to the warranty caused the plaintiff's harm.

(b)(1) In determining whether a product seller is subject to liability under subsection (a)(1) of this section, the trier of fact may consider the effect of the conduct of the seller with respect to the construction, inspection, or condition of the product, and any failure of the seller to pass on adequate warnings or instructions from the product's manufacturer about the dangers and proper use of the product.

(2) A product seller shall not be liable in a civil action subject to the provisions of this title based upon an alleged failure to provide warnings or instructions unless the plaintiff establishes that, when the product left the possession and control of the product seller, the product seller failed—

(A) to provide to the person to whom the product seller relinquished possession and control of the product any pamphlets, booklets, labels, inserts, or other written warnings or instructions received while the product was in the product seller's possession and control; or

(B) to make reasonable efforts to provide users with those warnings and instructions which it received after the product left its possession and control.

(3) A product seller shall not be liable in a civil action subject to the provisions of this title except for breach of express warranty where there was no responsible opportunity to inspect the product in a manner which would or should, in the exercise of reasonable care, have revealed the aspect of the product which allegedly caused the plaintiff's harm.

(c) A product seller shall be treated as the manufacturer of a product and shall be liable for harm to the plaintiff caused by a product as if it were the manufacturer of the product if—

(1) the manufacturer is not subject to service of process under the laws of any

State in which the action might have been brought; or

(2) the court determines that the plaintiff would be unable to enforce a judgment against the manufacturer.

TIME LIMITATION ON LIABILITY

SEC. 212. (a) Except as provided in subsection (b) of this section, a manufacturer or product seller shall not be subject to liability to a plaintiff for harm caused by a product in any action subject to the provisions of this title if the manufacturer proves, by a preponderance of the evidence, that the harm was caused after the product's useful safe life.

(b) A manufacturer or product seller may be subject to liability for harm caused by a product after its useful safe life if—

(1) the manufacturer has warranted that the product can be utilized safely for a time longer than the useful safe life;

(2) the manufacturer intentionally misrepresents facts about the product or intentionally conceals information about the product and that concealment was the proximate cause of the plaintiff's harm; or

(3) the harm was caused by exposure to a product, which exposure first occurred within the useful safe life of the product, even though the harm did not manifest itself until after the useful safe life.

(c)(1) In any action brought under this title, there is a presumption that the harm was caused after the useful safe life of the product—

(A) if, in the case of a capital good, the harm was caused more than 25 years after the time of the first use of the product or, if the time of the first use of the product cannot be established, more than 25 years after the time of delivery of the product; and

(B) if, in the case of any other product, the harm was caused more than 12 years after the time of delivery of the product.

Such presumption may be rebutted by a preponderance of the evidence.

(2) As used in this subsection, "capital good" means any product, or any component of any such product, which is of a character subject to allowance for depreciation under the Inernal Revenue Code of 1954, and which was—

(A) used in a trade or business;

(B) held for the production of income; or

(C) sold or donated to a governmental or private entity for the production of goods, for training, for demonstration, or other similar purposes.

(d) A motor vehicle, or a vessel, aircraft, or railroad used primarily to transport passengers, shall not be subject to the provisions of this section.

(e) As used in this section—

(1) "time of delivery" means the time when a product is delivered to its first purchaser or lessee who was not involved in the business of manufacturing of selling such product or using it as a component part of another product to be sold; and

(2) a product's "useful safe lift" begins at the time of the first use of the product following delivery and extends for the time during which the product would normally be likely to perform or be stored, or both, in a safe manner.

CLAIM WHEN MANUFACTURER OR PRODUCT SELLER UNKNOWN

SEC. 213. (a)(1) Any person seeking to recover under this title for toxic harm may, where it is not possible for such person, despite every reasonable effort, to identify the manufacturer of the individual product unit that caused the harm, bring a civil action in accordance with the provisions of this title against any manufacturer of a product that is identical and chemically indistinguishable from the product which caused the harm if that manufacturer's product was available at the time when, and in the market in which, the product that caused the harm was purchased. Any such manufacturer is liable for the full measure of any damages to which the plaintiff would otherwise be entitled under State law or this Act, or both, notwithstanding the fact that the plaintiff is unable to prove that the manufacturer against whom the claim is made was the manufacturer of the particular product which caused the plaintiff's harm.

(2) Any manufacturer or product seller who is able to establish, by a preponderance of the evidence, (A) the identity of the manufacturer or product seller of the particular product which caused the plaintiff's harm, or (B) that the manufacturer, as a matter of fact, could not have made the product which caused the plaintiff's harm, is not liable for such harm. Evidence that the manfaucturer did not distribute its product in the plaintiff's local market shall not be admissible under this paragraph.

(b) Any manufacturer or product seller who is liable to a plaintiff pursuant to this section or who tenders relief to a plaintiff in accordance with section 201 of this title shall be entitled to recover from any other manufacturer or product seller who had any share of the national market for the product which caused the plaintiff's harm, if the product of that manufacturer or product seiler was available when, and in the market in which, the product that caused the harm was purchased. Such recovery shall be in an amount equal to that percentage of the relief paid to the plaintiff which represents such other manufacturer's or product seller's share of the national market at the time the harm occurred or at the time of the exposure to the product. Any manufacturer or product seller who tenders relief to a plaintiff in accordance with section 201 of this title or who is liable to a plaintiff pursuant to this section may proceed directly against any other manufacturer or product seller pursuant to this title as if such manufacturer or product seller is a plaintiff.

PUNITIVE DAMAGES

SEC. 214. (a)(1) A claim for punitive damages made against a defendant in any action shall be tried separately. Punitive damages may only be awarded after a finding of liability against the defendant.

(2) In a trial of a claim for punitive damages, evidence of previous punitive damage awards against the defendant for the same alleged conduct shall be admissible only if such evidence is introduced by the defendant.

(b)(1) In any case in which the defendant has offered to tender relief pursuant to section 201 of this title, punitive damages, if otherwise permitted by State law, shall be awarded only if the plaintiff establishes by clear and convincing evidence that the harm suffered was the result of conduct manifesting a conscious, flagrant indifference to the safety of those persons who might be harmed by a product. The mere failure to exercise reasonable care in choosing among alternative product designs, formulations, instructions or warnings is not of itself such conduct. Except as provided in subsection (c) of this section, punitive damages may not be awarded in the absence of a compensatory award.

(2) When more than one action is pending for harm caused by a product and the provisions of paragraph (1) apply because the defendant has offered to tender relief pursuant to section 201 of this title, all such actions may be removed to the appropriate district court of the United States and consolidated on the issue of punitive damages pursuant to sections 1407 and 1441 of title 28, United States Code, notwithstanding the lack of diversity of citizenship between the parties in any such action.

(c) In any civil action in which the alleged harm to the plaintiff is death and the applicable State law provides, or has been construed to provide, for damages only punitive in nature, the provisions of subsection (b) of this section shall not apply.

RECORD RETENTION

SEC. 215. (a) Any plaintiff and any person who is a party to a civil action governed by this Act or who has notice that he or she may be made a party to such an action shall retain all material, documents and other data (including, in the case of the plaintiff, the product alleged to have caused the plaintiff's harm) within that person's possession, custody or control that are relevant or may lead to the discovery of evidence relevant to the claim or action.

(b) In any action governed by this Act, if the court determines that a party has willfully disposed of, destroyed, concealed, altered or removed any material, document or data in violation of subsection (a) of this section or any State or Federal rule, regulation, or statute requiring the retention of such material, document or data, there shall be a rebuttable presumption that the facts to which the material, document or data relate are established in a manner adverse to the position of the party who has committed the violation. The court shall assess a civil penalty against such party in an appropriate amount not less than $1,000 and order such party to pay the other party's costs, including reasonable attorney's fees, incurred in proving the violation.

(c) In any action governed by this Act, if the court determines that a party has nonwillfully violated subsection (a) of this section or any State or Federal rule, regulation, or statute requiring the retention of such material, document or data, and that no other means are available to establish the facts to which the unavailable material, document or data relate, the court may, in the interest of justice, establish a rebuttable presumption that the facts to which the material, document or data relate are, for the purposes of such action, established in a manner adverse to the party who has committed the violation.

COUNSEL'S LIABILITY FOR EXCESSIVE COSTS

SEC. 216. (a) In the case of any civil action under this title, any attorney or other person who is admitted to conduct cases in any court of the State in which such civil action is pending and whose conduct in the course of such action is calculated to delay resolution of the action, or is determined by the court (after consideration of the circumstances) not be in good faith, shall be subject to pecuniary sanctions to be imposed by the court. Any such sanction shall be equal to an amount not less than the total amount of court costs, fees, and expenses (including attorney's fees) reasonably attributable to the conduct.

(b) Nothwithstanding any other provision of law, if the court finds that a civil action under this title was commenced without a good faith belief by the attorney represent-

ing the claimant in such action that there was a reasonable basis in law and in fact for recovery of damages, or that such action was commenced merely for purposes of achieving a monetary settlement where there was no reasonable prospect for an award of damages, such attorney shall be liable for costs, fees, and expenses, including attorney's fees reasonably incurred to respond to or otherwise resist such action.

(c) For purposes of this section, an attorney or other person admitted to conduct cases in any court of the State in which is pending a civil action under this title shall not be considered to have demonstrated a lack of good faith merely because such attorney or person was pursuing a novel but credible theory of liability or defense.

NOTICES OF HEARINGS

COMMITTEE ON SMALL BUSINESS

Mr. WEICKER. Mr. President, I would like to announce that the Senate Small Business Committee will hold a field hearing on the cost and availability of liability insurance for small business on Friday, May 30, 1986, in Wausau, WI. The hearing will be held in the Branch One Courtroom of the Marathon County Courthouse. The hearing will commence at 9 a.m. For further information, please call Erline Patrick of the committee staff at 224-5175 or Steve Loucks of Senator KASTEN's office at 224-4632.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON DEFENSE ACQUISITION

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Subcommittee on Defense Acquisition of the Committee on Armed Services be authorized to meet during the session of the Senate on Tuesday, May 20, to hold a hearing to discuss recommendations from the President's Blue Ribbon Commission on Defense Management.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Committee on Armed Services, be authorized to meet during the session of the Senate on Tuesday, May 20, 1986, in order to conduct a business meeting on nominations, and on homeporting.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON CONSUMER

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that the Consumer Subcommittee of the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on Tuesday, May 20, 1986, to conduct a hearing on the pending product liability legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

VOTE "YES" ON UNITED STATES/UNITED KINGDOM EXTRADITION TREATY TO COMBAT TERRORISM

● Mr. WALLOP. Mr. President, the United States and the United Kingdom negotiated an extradition treaty almost a year ago. This treaty is an important cornerstone in the United States and Western allied effort to construct a vigorous and effective policy to combat international terrorism. The treaty now requires Senate confirmation, which should be quick and supportive.

Yet, there are those in this body who are trying to convince us that there is a difference between terrorists in Northern Ireland and terrorists elsewhere and that therefore the Senate should reject the United States/United Kingdom Supplemental Extradition Treaty. They say so because that treaty would allow the United Kingdom to seek extradition of terrorists of the outlawed Irish Republican Army [IRA].

Those who oppose this important treaty on those grounds are trying to draw a dangerous distinction between acts of terrorism by one group and acts of terrorism by other groups. This attempt to pick and choose among terrorists is not only ridiculous it is also foolhardy and doomed to failure. No war on international terrorism can succeed unless our policies are consistent and armed with as many tools as possible.

Furthermore, the United States/United Kingdom Supplemental Extradition Treaty is one we worked out with Prime Minister Margaret Thatcher, the staunchest ally the United States has in the battle against international terrorism. We must remember when we consider this treaty that it was Mrs. Thatcher and her government who strongly supported the United States in our defensive action against Libyan terrorism when no one else would do so. We must remember also, as we take up this treaty, that Mrs. Thatcher and her government supported us courageously and at considerable cost to their domestic political power.

Moreover, Prime Minister Thatcher strongly and eloquently supported the United States at the Tokyo Summit when we sought agreement on a summit seven antiterrorism policy. It was she who pointed out that there can be absolutely no justification whatsoever for terrorism anywhere at any time by any group. I agree entirely.

Mr. President, there can and should be no quibbling over a consistent, united front against international terrorism. I strongly support the United States/United Kingdom Extradition Treaty as a new weapon in the arsenal against international terrorism and I urge my colleagues to vote for it. I ask that the following article on that treaty and its role as a weapon against terrorism be printed in the RECORD.

The article follows:

THE UNITED STATES-UNITED KINGDOM EXTRADITION TREATY: NEW WEAPON AGAINST TERRORISM

(By Juliana Geran Pilon, Ph.D., Senior Policy Analyst)

The Supplementary Extradition Treaty between the U.S. and the United Kingdom was signed by both countries on June 25, 1985. It now requires confirmation by the U.S. Senate. The goal of the Treaty is to enable London and Washington to be more effective in combatting terrorism by increasing the chances that if someone commits a crime in one of the countries and then flees to the other, he will be returned to the first country to stand trial. This supplementary treaty is needed because the current U.S.-U.K. extradition treaty does not cover such wanton acts of violence as hijacking and hostage taking, which had been excluded because they were viewed as politically motivated. Traditionally, the U.S. has refused to extradite those accused of political "crimes." The pending supplementary treaty deals with this by stating specifically that these crimes no longer will be treated as political, thus permitting extradition in those cases.

The new Treaty will allow the U.K. to seek extradition of terrorists of the outlawed Irish Republican Army (IRA). As such, it is a matter of great importance to London. It should also be a matter of urgency to the U.S., for it would be a major weapon against terrorism. It also would be an appropriate way for the U.S. to show its gratitude to the U.K. for being America's only European ally to help and support the U.S. retaliation against Libyan-sponsored terrorism.

The new Treaty contains four substantive articles. Article 1 states that a person should not be exempt from extradition, no matter what his motive, if he commits the following crimes: aircraft hijacking and sabotage, crimes against internationally protected persons including diplomats, hostage taking, murder and manslaughter, malicious assault, kidnapping, and specified offenses involving firearms, explosives, and serious property damage. These are not political acts, states the Treaty.

Article 2 prevents a criminal from avoiding prosecution by fleeing to a country that has a shorter statute of limitations than the country in which the crime occurred. Article 3 extends from 45 to 60 days the period, following the provisional arrest of a fugitive, that a state has to submit evidence in support of its extradition request. Article 4 states that the Treaty applies to any offense committed before or after the Treaty takes effect. This retroactive provision has been standard in U.S. treaties since at least 1874.

Some members of the Senate Foreign Relations Committee, led by Joseph R. Biden, Jr. (D-DE) are attempting to modify the proposed Treaty in a way that seriously would weaken its antiterrorist value. A Biden Amendment would exempt from extradition those accused of crimes against noncivilians including policemen and off-duty soldiers. The reasoning seems to be that attacks against noncivilians are *prima facie* a political act. Most experts question

this logic. If passed, the Biden Amendment would allow terrorists to find sanctuary in the U.S., even if they shot a British policeman.

The political status of Northern Ireland is not at issue with the new Treaty, terrorism is. CIA Director William Casey recently stated that "the terrorist's victims may have no political identity, or they may be political symbols . . . One defining characteristic of the terrorist is the choice of method: the terrorist chooses violence as the instrument of first resort."

Some critics understandably are concerned that the Treaty will set a precedent, reversing longstanding U.S. policy of refusing to be involved in overseas politically motivated civil strife. Would the U.S., for example, extradite dissidents in the future to Nicaragua or Poland, where the critical absence of any recourse to democratic channels of protest makes armed resistance a last resort? In response to this concern, State Department General Counsel Abraham Sofaer has written to Senators Richard Lugar (R-IN) and Claiborne Pell (D-RI) promising that the U.S. will sign extradition treaties only with "genuine democracies."

The U.S. was wise to negotiate and sign the Treaty. Now nearly a year has passed. It is time for the U.S. and U.K. to add the Treaty to their arsenal against terrorism.

KOREAN DEMOCRACY

● Mr. DECONCINI. Mr. President, Senator HATFIELD has brought to my attention a speech made by former President Richard Nixon on April 21 to the American Newspaper Publishers Association luncheon in San Francisco. President Nixon makes some cogent remarks on South Korea which I would like to comment upon, especially since I have introduced Senate Resolution 392, a resolution encouraging a peaceful democratic transition in this country. While the former President is insightful in his observations, such as a few I have pointed out below, I disagree with his interpretation and application of these to U.S. foreign policy. Having visited the Philippines twice last year, while there are many superficial comparisons, South Korea exhibits many of the identical rumblings.

President Nixon accurately reflects the foreign policy and geopolitical benefit of encouraging democracy:

The fact that friendly non-Communist dictatorships are the lesser of two evils does not mean that we should do nothing to bring about reform of governments which do not measure up to our standards of democracy. The interests of the people involved in getting better government demand our action. Our own interests are involved because a government which holds power as a result of a free election is a more reliable ally and is less vulnerable to Communist subversion.

This is precisely my concern about North Korea. As the United States encourages the peaceful and orderly transfer of power and the right to petition the government through this resolution, we are acting diplomatically to preclude instability and violence. The United States should use our influence to urge democratic reform in friendly and allied governments. Especially in South Korea, where a hostile Communist government is only minutes away in the north, the trend should be orderly, peaceful, and reasonable. The resolution I have introduced does not threaten South Korea with curtailment of aid or economic sanctions. To conclude, I quote from President Nixon's talk:

There is substantial opposition to the government in Korea and President Chun should stay ahead of the curve by adopting reforms voluntarily before he is forced to do so.

Domestic instability and the North Korean threat is greatly reduced by intrinsic reform. If the Chun government does not initiate reform or at least allow fundamental rights such as free speech and freedom to assemble, then this paves the way for increased violence, protest, and anti-American sentiment. This creates legitimate national security concerns for South Korea and the United States. Although there are vast differences between the Philippines and South Korea, we have learned the lessons of the strength of "people power."●

RACISM IN RUSSIA

● Mr. HATCH. Mr. President, for decades the Soviet Union has ridiculed the United States for racism in all walks of life. It should be pointed out that these allegations have been made by a nation where racism is rampant.

It is reported that one Soviet official, while visiting Washington, DC, wondered why the U.S. Government "allows so many blacks to live in the Nation's Capital."

The spring of 1986 issue of Policy Review contains an insightful article on racism in Russia by DeRoy Murdock, chairman of Free Students of America. Mr. Murdock, who is a senior at Georgetown University, is one of the bright, upcoming leaders in America. His thought-provoking article on racism deserves wide circulation.

I ask that the article be printed in the RECORD.

The article follows:

THE RED AND THE BLACK—IN THE SOVIET UNION, SOME RACES ARE MORE EQUAL THAN OTHERS

(By Deroy Murdock)

Virtually every day the Soviet press berates the United States for the rampant racism that is said to govern daily life and policymaking in America. For example, *Tass* recently noted, with characteristic understatement, "Growing concern is caused by the rampage of racism bordering on genocide against Americans with dark skin."

Ironically, these charges are launched from a country where racism is just as bad, if not worse, than in the United States. The Soviet official Chaiko from the film *White Nights*, who refers to blacks quite casually as "niggers," is not an anomaly in real life within the Soviet borders.

There is little systematic evidence on the subject of racism in the U.S.S.R.: problems unacknowledged are seldom studied. Nevertheless those with firsthand experience of the Soviet Union, even when generally reluctant to criticize the regime there, frequently return disgusted with the bigotry that they say is commonplace, especially among Communist officials and in the armed forces.

Last November, black American playwright Charles Fuller visited the U.S.S.R. as part of a literary delegation. "There's no racism in the Soviet Union: that's what I was told," Fuller recalls. But during a visit to a school in Vilnius, Lithuania, several students "stared and pointed" and jeered upon seeing him. In another episode, Fuller found himself on a night train from Minsk to Moscow where a *Tass* reporter confidently regaled the American delegation with a story about black people that Fuller found "deprecating, condescending actually" and "reminiscent of Uncle Remus."

Fuller expresed disappointment that the Soviet government does nothing to discourage racism in Russia, but that is not surprising, he says, as the authorities deny its existence. Fuller found racism to be even more prevalent there than in his home country. "I detected no difference between Soviet attitudes about black people in that country, and those of white people in the United States in the 1950s, just as things here started to change."

Beat poet Allen Ginsberg, who visited the Soviet Union with Fuller, returned with similar impressions. "The Russians are the honkies of the Soviet Union like the Southern Baptists and white Protestant rednecks are the honkies here," remarks Ginsberg, with characteristic flair.

The Soviet Union has no indigenous black population. However, it has hosted many American and African blacks, most of them students who attend universities in Moscow. Patrice Lumumba University in Moscow is attended by thousands of blacks who go there for training in technical skills and Marxist dogma. They want to share the Soviet enterprise of spreading socialism around the world. But they are not treated by the Soviets as equals. In fact, Lumumba University is a focus of derision among Russian students who have nicknamed it "the zoo" and its African pupils "apes." Tom Melady, former U.S. ambassador to Burundi and Uganda, remarks that "the establishment of Lumumba University was a means to segregate Third World students, primarily Africans." He characterizes this as a Soviet version of apartheid.

Black students have been beaten up, even killed in some cases, when they dated or sought to marry Russian women. In December 1963, a Ghanaian student was found dead after he announced his engagement to a woman from Moscow. Although his body showed obvious signs of struggle, Soviet officials insisted that the Ghanaian had been drunk and had frozen in the snow. In 1975, the African Student Union in Lvov in the Ukraine wrote African ambassadors in

Moscow complaining about racism and urging them to plead with the Soviet authorities for better treatment. The students wanted their diplomats "to please let the Russians know that if they want our respect, they should respect our countries and peoples." They documented numerous cases of assaults, an attack on a pregnant Nigerian student, and the worst case in which a Nigerian was "attacked by a drunken Soviet with a chisel while sleeping in his room." His calls for help were answered by two friends who repelled the intruder. But shortly thereafter all three Africans were expelled for "attacking and beating up a Soviet citizen."

That same year, African students in Kiev went on strike to have a scholarship reinstated for a Czech woman who married a Nigerian. The Czech consulate in Kiev withdrew her scholarship after the marriage and ordered here to leave the province. The student protest, which featured picket signs saying "Moscow is another Alabama," proved successful, as the woman was permitted to stay on with her husband.

MOSLEM "HOMELANDS" POLICY

Michel Ayih, a young Togolese who studied in the U.S.S.R., captured the sentiments of many frustrated African students when he wrote:

"Instead of finding a country of unlimited human fraternity, I found myself in the heart of a world dominated by the most elementary and primitive racial reaction . . . Before coming to Moscow, I had lived in the West and I can vouch that I had never, by any means, found such systematic racial discrimination there."

The Soviet Union scarcely attempts to conceal its prejudices against blacks. Richard Dobson of the U.S. Information Agency reports that a prominent Soviet official, while on a visit to Washington D.C., expressed amazement that the U.S. government "allows so many blacks to live in the nation's capital."

David Shipler, a reporter for the New York Times, spoke with several victims of Russian racist attitudes for his book, Russia: Broken Idols, Solemn Dreams. Among them was a black American student in Leningrad who said she had gone several times for examinations by a Russian doctor. He finally asked her, "Which of your parents is white?"

"Why, neither," the girl replied. "They're both black."

"Really?" said the doctor in amazement.

"Yes, really. Why do you ask?"

"Because you're so beautiful."

Two Rand Corporation analysts, S. Enders Wimbush and Alex Alexiev, recently conducted a study of racial and ethnic diversity in the Soviet armed forces. After interviewing 130 former Soviet servicemen representing "a wide range of nationalities and geographic regions," they found that in the peacetime forces "racial discrimination is accepted and routinized, perhaps to an unprecedented degree."

Wimbush and Alexiev cite numerous examples of this prejudice, including the account of one soldier who told them:

"From the beginning we, the white people, considered ourselves somewhat higher and with more privileges than the churkas [a derogation for Asiatics meaning literally "wood chip"] . . . That is why, when it was necessary to do some unpleasant work, say cleaning a toilet, a Kazakh would be sent and the Russians would make him do it."

There is another story of a group of soldiers who did not like a pair of Kazakh Tatars in their squadron. "They knew [the Kazakhs] did not eat pork, so one Russian would put a pig's ear in a Tatar's soup."

The Tatars are Moslem Central Asians of Mongolian descent. One sub-group of these people, the Crimean Tatars, have probably suffered the gravest consequences of Soviet racism. Not only were they subjected to genocide, but now they are victims of a "homelands policy" as cruel as anything practiced in South Africa.

By a decree of the Soviet government, the Crimean Tatar Autonomous Republic was established in 1921. The Tatars were allowed to live there peacefully until 1944, when they were accused of collaborating with the Nazis and their entire population moved. Machine gun-toting N.K.V.D. (now K.G.B.) soldiers awakened the Tatars and herded them into cattle cars which they termed "crematoria on wheels." They were hauled around for weeks with neither food nor water.

The deported and displaced Crimeans were finally resettled in swamps and marshes in Uzbekistan which they then filled with the bodies of their dead. This human landfill in which the Tatars live inspired one of them to comment, I'm almost afraid to tread heavily on this ground. It seems as if I would hear someone groaning under my feet."

All this has been revealed in congressional testimony in the United States. Statistics have been collected in casulties: of the 238,500 Tatars deported in 1944, more than 110,150 had starved or frozen to death by 1946. Meanwhile, back in the Crimea, Stalin's men erased all traces of the Tatars' culture: they used axes, bulldozers, picks, and tractors to raze mosques and Tatar cemeteries. Even books by Marx and Lenin published in the Crimean Tatar language were burned. Towns with Tatar names were changed. As Ayshe Seytmuratova, a Tatar who left Russia, told the U.S. Congress, "The whole exercise was aimed at wiping us out not only from the face of the earth, but even from under the earth."

By 1967, the Soviet government admitted that the charges of pro-Nazi sentiments against the Tatars were absolutely false. But a decree of the Presidium of the Supreme Soviet concluded that "The Tatars, formerly residing in the Crimea, have resettled in the territory of Uzbekistan and other union republics." To this day, the Tatars are forbidden to return to their homeland: Directive 221 of the Ministry of Internal Affairs of the Uzbek S.S.R. states that they "are forbidden to enter the Crimea." Those who defy the order are expelled from their new homes and returned to Uzbekistan by car or train. Then they are punished.

This homelands policy has taken its toll. Even Crimean activists who are trying to get their people home have been driven to despair. Three of them hanged themselves in 1978. Musa Mamut, a 46-year-old Crimean Moslem, was driven by repeated police bruality and harassment to set himself on fire before his 11-year-old son. What the Tatars can expect from the Kremlin in the future is best expressed by a Soviet official who told dissident Memedi Chobanov, "I'll keep locking you up again, again, and again, until you stop loving your homeland."

JEWS AS HYBRID CRIMINALS

This points to an important reason for institutionalized racism in the Soviet Union—it serves the ends of the party leadership. By manipulating the racism in traditional Russian chauvinism, the Soviet Union is able to direct hostility toward ethnic groups and keep the polyglot peoples of the U.S.S.R. divided and, therefore, conquered. Bigotry is often directed at Soviet Jews for this reason. Antisemitism in the Soviet Union has been extensively documented. Suffice is to note that it often disguises itself as anti-Zionism, whereas in fact it frequently goes far beyond hostility to the state of Israel. William Korey of B'nai Brith observes, "Not since the Nazi era has the world seen such a vast amount of venomous antisemitic hate material as that pouring out of the Kremlin propaganda mills."

Two bigoted Kremlin propagandists are Vladimir Begun and Valery Emelyanov, both hailed as "Jewish specialists." Begun's book Invasion Without Arms describes the Jewish holy book, the Torah, as "an unsurpassed textbook of bloodthirstiness, hypocrisy, treason, perfidy, and moral degeneracy—all the lowest human qualities." This state-approved book was a Russian bestseller, enjoying an initial press run of 150,000 copies in 1977 and republication of 50,000 copies in 1979.

Emelyanov is now is prison charged with various crimes, but until recently he was a popular lecturer with the Knowledge Society in the U.S.S.R. In his book DeZionization he explains that "Jews are a stable criminal genotype of a hybrid character, created on a base of crossbreeding of ancient professional dynasties of the criminal world of the black, yellow, and white races." Emelyanov termed President Carter's first secretary of state as "the Jew Cyrus Vance" and the late New York Senator Jacob Javits as "the Vice-Obershturmfuher (sic) of the B'nai B'rith Gestapo" and a member of the "entire Zionist Masonic Mafia of the United States Congress."

To Marxists who value the doctrine of equality, all this is perhaps shocking and disturbing. Yet the Soviet Union, in its pervasive racism, is only echoing the racist sentiments held by Marx himself. Marx's correspondence is riddled with examples. He wrote Paul Lafargue, one of his daughter's suitors, not to make his overtures too intimate: "When you invoke your Creole temperament, then I consider it my duty to step in between your temperament and my daughter with healthy commonsense." Lest this be taken for lighthearted joshing, Marx wrote Engels about Ferdinand Lasalle, a Jewish associate of theirs, calling him a "Jewish nigger." He opined further:

"It is now completely clear to me that he, as is proved by his cranial formation and [curly] hair, descended from Egypt (assuming his grandmother on the paternal side had not interbred with a nigger). Now this union of Judaism and Germanism with a basic Negro substance must produce a peculiar product. The obtrusiveness of this fellow is also nigger-like."

Unlike the United States, the Soviet Union has not taken steps to reduce the problem of racism. Prejudice is apparently one area in the U.S.S.R. where equality is vaunted, but some races are more equal than others.●

S. 2454 TO REPEAL THE WARNER AMENDMENT TO FISCAL YEAR 1985 DOD AUTHORIZATION BILL

● Mr. DECONCINI. Mr. President, I am pleased to join the distinguished chairman of the Veterans' Affairs

Committee, Senator MURKOWSKI, the ranking minority member, Senator CRANSTON, my distinguished colleague on the Senate Judiciary Committee, Senator SIMON, and my distinguished colleague from Virginia, Senator WARNER, in introducing S. 2454, legislation to repeal the Warner amendment, which was included as a provision of the 1985 Defense authorization bill (Public Law 98-525).

The Warner amendment strips atomic veterans of their right to take legal action against defense contractors who participated in the atomic tests between 1945 and 1980 by stipulating that the United States is the sole defendant in suits filed by atomic veterans.

Since the Feres Doctrine (340 U.S. 135 [1950]) prohibits veterans from suing the Government for injuries suffered as a result of military service, enactment of the Warner amendment effectively precludes atomic veterans from seeking any legal redress for injuries they incurred during the early atomic blasts. The amendment changed the law without notice, stripping pending cases from the courts and denying other veterans with access to our courts.

An estimated 1 million people were exposed to radiation during the atomic testing program; 250,000 of whom were servicemen. At the time of the testing, these atomic victims were told that they were in no danger. Many times, neither protective clothing nor respiratory devices were provided for them. And for many of these veterans, exposure to ionizing radiation has resulted in serious health-related problems for them and their families. Many have been stricken with bone pain, extremely low blood counts, body pain, gum and nose bleeding, and cancer. Many atomic veterans are now highly susceptible to infection, strokes, heart attacks, comas, and death, and their families are also suffering. Genetic abnormalities are passed down to children and grandchildren. Many children of atomic veterans suffer retardation, skeletal and organ defects, cancer, and so forth.

The National Law Journal estimated that at least 100 veterans around the country had cases filed against more than a dozen contractors when the Warner amendment was enacted. These cases were thrown out of court after much time, hard work, and money had been invested in the suits by the victimized veterans. In the San Francisco Federal district court alone, the Warner amendment deprived 31 plaintiffs of any judicial remedy whatsoever. In addition to the cases which were dismissed, an estimated 200,000 potential cases exist. These veterans now have nowhere to turn, except to the Veterans' Administration.

Unfortunately, the Veterans' Administration rarely provides compensation for atomic veterans. Under VA adjudication procedures, veterans must prove their cancer or other health problems were caused by atomic blasts, which is a difficult task. As a result, the Veterans' Administration has denied roughly 99 percent of all atomic veterans' claims. Records show that out of 4,859 cases filed for radiation exposure compensation benefits, only 24 have been awarded compensation—17 by the Board of Veterans Appeals and 7 by the Departments of Veterans Benefits. This only 0.5 percent of all cases filed. Due to this low figure, veterans were forced to turn elsewhere. The ability to sue defense contractors provided veterans with one avenue of redress. With the enactment of the Warner amendment this avenue was also removed.

The Warner amendment took from these veterans, who served their country well, their only remaining hope. Atomic veterans are faced with extremely high medical costs as well as with excruciating pain caused by exposure to radiation, but are essentially told that they have been denied their constitutional right to legal remedies.

Atomic veterans served under highly unusual and dangerous conditions. Rather than placing obstacles in their way, we should be aiding them in their fight for justice. By repealing the Warner amendment, atomic veterans who are suffering due to radiation exposure will be able to pursue their claims against defense contractors. They will not be sentenced to die with no one giving them a second thought.

As a member of both the Senate Committee on Veterans' Affairs and the Senate Judiciary Committee, to which this bill will be referred, I enthusiastically support this bill and intend to work closely with its sponsors and with Senator SIMON and the other members of the Judiciary Committee to ensure expeditious and favorable consideration of this most important legislation.

Enactment of this bill will restore hope to thousands of deserving veterans who no longer have anywhere to turn for relief for injuries resulting from exposure to radiation during the early atomic testing blasts.●

LEGAL SERVICES CORPORATION

● Mr. HELMS. Mr. President, the Legal Services Corporation is one of many Federal programs whose cost to the taxpayers deserves close scrutiny as Congress looks for responsible ways to cut Federal spending and get control of the deficit. Is it really necessary for the Federal Government to fund a permanent establishment of lawyers for the poor, or are there other means better suited to obtaining legal services for those truly in need at less or not cost to the Federal Treasury?

Mr. President, LeaAnne Bernstein, a member of the Legal Service Board of Directors, addressed these questions in a May 9 article published in the Chicago Tribune. Her comments on this subject are extremely well taken, and I hope my colleagues in Congress and the public generally will give them careful attention.

Mr. President, I ask that "Going Private with Legal Aid," by LeaAnne Bernstein, appearing in the May 9 edition of the Chicago Tribune, be printed in the RECORD.

The article follows:

[From the Chicago Tribune, May 9, 1986]

GOING PRIVATE WITH LEGAL AID

(By LeaAnne Bernstein)

As early as 1971, it was recognized that legal services for the poor should not be a government function. That year a presidential advisory council, the Ash Commission, urged President Richard Nixon to remove such legal services from the auspices of the Office of Economic Opportunity and to organize it as a quasi-government corporation "as a first step toward reprivatization of what has traditionally been a function of the private sector."

As a result of this advice, the Legal Services Corp. [LSC] was formed. But 15 years after the Ash Commission report, the LSC budget has swollen from $61.8 million in 1971 to $305.5 million this year, and the goal of privatization is nowhere in sight.

Paradoxically, increased government funding and involvement have come when private-sector financing alternatives have been flourishing. For one thing, direct outside funding for LSC recipients reached $106 million in 1985, up from $47 million in 1982. Some of this money is from other federal government programs, some from states and localities. However, much of it is also from private contributions such as the United Way and other local fund-raising agencies. In addition, *pro bono publico* [for the good of the community] services by attorneys is documented at a monetary equivalent of at least half the federal budget for the Legal Services Corp.

Interest on Lawyer Trust Accounts programs [IOLTA funds] have been a significant source of money for legal services to the poor in recent years. These funds are generated from interest earned on trust funds handled by private attorneys for their clients. The amounts involved are too small or are not held long enough to draw interest in excess of service charges if held in separate accounts. Last year IOLTA funds came to nearly $27 million.

At a time when the failure of bureaucratic structures is being documented in many government programs, the Legal Services Corp. must be scrutinized closely. Federal funding of legal services is meant, not to support lawyers, but to resolve the legal problems of poor people. Many times, the solution need not even involve attorneys.

One such solution, Alternative Dispute Resolution, has boomed in the last 15 years. As of 1985 there were 475 full-time dispute-resolution mediators, 293 part-time ones and 5,985 program volunteers in more than 380 centers in 33 states. The average cost of a LSC case in 1984 was $182.50 while that of an average Alternative Dispute Resolution case was $36. And the latter gives a client a substantial role in resolving his own dispute,

unlike the attorney-centered adversarial LSC system.

In addition, the legal system has become far more accessible to ordinary people. In 1964, when federal legal services were institutionalized within the Office of Economic Opportunity, there were about 300,000 lawyers nationwide; today there are more than 660,000, with starting salaries for recent attorney graduates as low as $13,000 in some states. Since then, too, we have seen the advent of attorney advertising, self-help books and streamlined small claims procedures.

Technological advances [word processors and centralized data banks, for example] and the loosening of restrictions on advertising have resulted in increased service at lower prices from firms providing legal services to middle- and lower-income people. High-volume legal clinics offer cut-rate prices and can have the effect of forcing competitors to do likewise.

Though market pressures have forced prices down in the legal profession generally, the bureaucratic structure of the Legal Services Corp. has allowed average case costs to rise dramatically. Since 1982, almost all increases in federal appropriations for legal services have been in higher salaries and benefits for staff attorneys while the number of case closures has remained static. Benefits alone have risen 44 percent. The lawyers, many unionized, lobby Congress to prevent a change in the structure of LSC and to forbid the use of more cost-effective modes of delivery. The client is thus made a pawn in the justification of jobs for the lawyers.

The practice of law in the United States is a state-sanctioned privilege. With this privilege comes a professional responsibility to provide legal services to those who cannot afford legal fees. Many attorneys take this responsibility seriously. Before federal funding for legal services, voluntary legal aid societies provided community-based structures to ensure access to the system. Even now, the greatest non-LSC contribution to legal aid for the poor comes from *pro bono* work of individual lawyers and firms.

Fifteen years ago, the Ash Commission told President Nixon that "while government support is still necessary [for Legal Services], the need is not as strong today. The program has generated considerable interest and support in the private sector." This is more the case now than ever. Yet, despite the boom in non-LSC legal services for the poor, Legal Services lawyers have year after year demanded and often received greater government funding. The growth of alternative services and financial resources has been ignored; instead, there has been a growing entrenchment of LSC-funded attorneys.

In this, the first year of the Gramm-Rudman cuts, we have one more reason to review the budget of the Legal Services Corp. with an eye toward releasing its lawyers into the private sector, reintegrating indigent clients into the civil justice system and allowing the Legal Services Corp. to get on the track of progress.●

NEW ROUTE FOR CONRAIL

● Mr. SARBANES. Mr. President, the Department of Transportation seems determined to sell Conrail to Norfolk Southern—despite the costs. It recently pressured Norfolk Southern to raise its bid for the railroad by $700 million and make other concessions in order to persuade Members of Congress to support the sale.

In my view, even with these changes the proposed sale is not in the best interests of the Federal Government or the people of the State of Maryland. An editorial in today's Baltimore Sun underscores the continuing problems with the Department of Transportation's plan. The editorial points out not only the questionable manner in which Norfolk Southern proposes to raise the additional $700 million for the increased bid—by using the railroad's cash and pension funds for a leveraged buyout—but also the continued antitrust and anticompetitive aspects of the plan.

The editorial advocates a public stock sale of the railroad—an alternative which I strongly supported when the Conrail legislation was before the Senate—as providing the most effective assurance for the long-term viability of Conrail's rail system, and one which also avoids the anticompetitive problems of the proposed Norfolk Southern/Conrail merger. I commend this thoughtful and persuasive editorial to my colleagues and am confident that its arguments will not go unheard in the House of Representatives. I ask that the editorial be printed in the RECORD.

The editorial follows:

NEW ROUTE FOR CONRAIL

The Department of Transportation is getting desperate in its efforts to sell off Conrail, the big "rust bowl" freight railroad, to Norfolk Southern Corp. It has pressured NS to raise its bid by $700 million, to a total of $1.9 billion and suggested that the increase could be paid for by raiding Conrail's treasury and pension funds. That's not exactly our notion of sound financial practice.

In fact, DOT itself has strongly opposed such leverged buyouts for Conrail in the past because they are unworkable. Now, when the sale appears blocked in the House of Representatives, DOT has taken a 180-degree turn in its thinking, It needs to go even further: The Conrail deal with Norfolk Southern should be killed.

If Transportation Secretary Elizabeth Dole doesn't terminate the proposed sale, Rep. John Dingell is ready to do it for her. The powerful Michigan Democrat heads the panel considering the proposal and has bluntly said "the notion of selling Conrail to Norfolk Southern is dead." He favors a public sale anti-trust and anti-competitive aspects of the DOT plan.

Mrs. Dole's main concern is to ensure Conrail's long-term survival. She does not want a repeat of the collapse of the Penn Central and six other private Northeast lines that led to the government formation of Conrail. Norfolk Southern is one of the country's best run and most profitable railroads with exceptionally "deep pockets." By purchasing Conrail it could gain access to important Northeast ports, such as Baltimore, and the growing international container-freight market. Large economies would be possible by merging Conrail's mainly east-west routes with Norfolk Southern's vast north-south alignment.

The problem is that in the process, the combined company would have a monopoly on many key industrial routes in the Midwest and Northeast. CSX Corp. would probably have to abandon a major and historic rail line through Western Maryland. And the port of Baltimore, instead of being the recipient of more freight-rail business, could turn out to be a double loser as a result of cutbacks by CSX and Conrail-Norfolk Southern favoring its hometown ports of Norfolk and Philadelphia over Baltimore.

A public stock sale is gaining support as the best way to get the federal government out of the railroad business. Conrail has become enormously profitable in recent years. It has an agggressive, experienced management that has shown it can keep the railroad in the black in good and bad economic times. A viable, independent control would be a plus for the reawakening industries of the Northeast. It is this route that Mrs. Dole and DOT should be pursuing.●

NATIONAL PEACE OFFICERS' MEMORIAL DAY

● Mr. HATCH. Mr. President, last Thursday was National Peace Officers' Memorial Day. I would like to pay tribute to those brave men and women who daily preserve the domestic tranquility in America. The observance of this day focuses public attention on the commitment and sacrifices made by more than 500,000 officers in more than 15,000 police organizations.

Each and every day, these valiant men and women literally place their lives on the line as they faithfully and efficiently carry out their often dangerous work. In fact, those who serve in the various police organizations are really America's first line of defense against crime.

I would also like to express my appreciation to the police officers and organizations across the Nation for their work to make S. 49—the Firearms Owners' Protection Act—a solid crime-fighting measure.

America is becoming increasingly serious about fighting violent crime. The social experiments and theories of the past few decades are being discarded for anticrime measures based on solid research and undeniable results. The most effective, and those with the broadest support by the public and law enforcement, focus on the criminal, in specific the repeat offender.

The result of targeting criminals has been on one hand, a prison population that has swelled since 1980 from 350,000 to over 460,000 today. On the other, violent crime is down 10 percent. Property crime dropped 16 percent. Murder and robbery nosedived 22 and 18 percent respectively from 1980 through 1985.

Our police deserve enormous recognition for their contribution to this decline. Those who have given their lives in protecting our communities also deserve the everlasting respect and admiration of the American people.●

FIRST ANNIVERSARY OF RADIO MARTI

(By request of Mr. DOLE, the following statement was ordered to be printed in the RECORD):

● Mrs. HAWKINS. Mr. President, May 20 is the Cuban National Day. It is a day that we should take time to express our continuing concern over the subversion of the Cuban national identity by the current regime in Havana. Freedom is a precious commodity in today's world. When we fail to resolutely protect the rights of free people it is almost inevitable that freedom is taken by totalitarian governments serving their own interests. Unfortunately, this is the fate that befell the people of Cuba when the current regime took power. As the people of Cuba mark their independence today, we must renew our dedication to the renewal of the true spirit of Cuban independence. A spirit best expressed by Jose Marti.

Mr. President, May 20 also marks the anniversary of the day the envelope of silence that surrounds the country of Cuba was broken. Radio Marti, a radio program sponsored by the Voice of America to provide the people of Cuba news about events in their own country, began its broadcast operations 1 year ago today. The initiation of Radio Marti marked a very important event for both the people of Cuba and the people of the United States. For the people of Cuba, Radio Marti would provide them a source of information about news and events that affect their lives that is honest, unstilted, and objective. For the people of the United States, Radio Marti would stand as a monument to an important commitment. This commitments is that the United States stand to protect the right of all people to know about news and events that affect their lives.

As we mark the first anniversary of the Radio Marti program, it is clear that the program is fulfilling its purposes. First, it is fulfilling its commitments to the people of Cuba. Evidence already indicates that Radio Marti has a substantial listening audience in Cuba. The program has caused the official Cuban broadcasting operations to substantially modify their behavior. Radio Marti has focused on important issues in its broadcasts, including topics such as the Latin American debt crisis, the Grenada rescue operation, and the Third Party Congress in Havana. Radio Marti was the first source of information about the nuclear accident at Chernobyl for the Cuban people. Radio Marti broadcasts are balanced between news and entertainment in order to attract a large and attentive audience. Radio Marti adheres to a strict standard of accuracy and honesty in its news broadcasts, which is the foundation of its credibility in Cuba and around the world. Finally, Radio Marti is a constant and timely source of information for the people of Cuba, broadcasting for 17½ hours a day, 7 days a week.

For the people of United States, Radio Marti is another expression of their commitment to the universal principles of freedom of expression, open government, and the freedom of the press. Radio Marti carries on a tradition of radio broadcasts to countries where the press is tightly controlled begun with Radio Free Europe and Radio Liberty. The people of the United States should be proud of the efforts being made at Radio Marti to give the people of Cuba something we take for granted, the right to know about important news events from honest and accurate sources. Radio Marti stands as an important symbol of the principles upon which our country was founded, principles that are universally applicable.

Mr. President, on this day of Cuban independence I commend the people at Radio Marti for the success of their first year of operation. I am sure that Radio Marti will continue to be a success in the future. It is a program of which we can be proud and should continue to support.●

SUPPORTING THE MONROE DOCTRINE AND THE INTER-AMERICAN PEACE TREATIES

● Mr. MCCLURE. Mr. President, I submit for the RECORD two documents recently presented to the Organization of American States by Dr. Claudio Benedi, Washington director of the Junta Patriotica Cubana.

Mr. President, these are excellent statements outlining the importance of the Monroe Doctrine, the fundamental principle of U.S. foreign policy. America should be enforcing the Monroe Doctrine and the Symms Cuba Resolution in Central America today. The Monroe Doctrine is the essence of American foreign policy, and the Symms amendment reaffirming it overwhelmingly passed both Houses of Congress in 1982 and again in 1983. It is important to emphasize that the Symms Cuba Resolution simply reaffirms the fundamental principle of American foreign policy. The U.S. Congress is strongly on record as opposing Soviet subersion and aggression in the Western Hemsphere, and opposing a Soviet military base in Cuba. We are strongly in favor of self-determination for freedom-loving Cubans.

These documents were presented by Dr. Benedi to the OAS as a statement representing the freedom-loving Cuban people. The presentation was made at the recent OAS meeting in Cartagena de Indias in Colombia. One of Dr. Benedi's main recommendations is that the Castro regime in Cuba be prevented from ever rejoining the OAS as a voting member. I applaud Dr. Benedi's honorable efforts on behalf of freedom-loving Cubans everywhere, and I support Dr. Benedi's valiant efforts to defend liberty and human rights. Indeed, Dr. Benedi is one of America's bravest and most effective freedom fighters.

In addition, Mr. President, I also ask that two additional documents, one dated April 15, 1986, and the other dated April 18, 1986, be printed in the RECORD. These two documents deal with the "Benedi Doctrine"—the institutional suppression of human rights in Communist totalitarian Cuba.

The material follows:

JUNTA PATRIOTICA CUBANA,
AREA METROPOLITANA DE WASHINGTON,
Merrifield, VA.

("Pacta Sunt Servanda"—"One Agrees Freely, But Is Bound by the Agreement", F. Francisco de Vitoria)

Honorable Chairman of the Fifteenth Period of Sessions of the General Assembly, Organization of American States (OAS).

Honorable Chancellors, Ambassadors and Representatives of the Republics of the Americas.

DISTINGUISHED REPRESENTATIVES OF THE AMERICAS: In complying with a historical duty, at the same time we are exercising a right, it is our privilege to address you, and through your intercession the governments and peoples of the Americas, to reiterate, as participants in the Inter-American System and persons born in the Cuban State, the position of the Cuban people and its rights in the concert of the American nations, of which we are a part. We do this, besides, in the condition of representatives and on behalf of the organizations comprised in the Cuban Patriotic Board.

As you well know and we have reiterated, the Cuban State, from which we derive, is a part of the Inter-American System and a member of the Organization of American States (OAS). What is excluded is the current Marxist-Leninist regime, because of its being incompatible with the Inter-American System.

The Cuban State has underwritten, together with the States of the Americas that you represent, those treaties, covenants, agreements and resolutions that are in force in the Inter-American System, the oldest and most representative of all regional systems in the world. But both you and we "are bound by the agreement."

In the Cuban State is a member of the Organization of American States, as it is recorded in its covenants and has been widely recognized in your previous deliberations, such a state must, of necessity, have some manner of representation. "We are the voices of those who have none."

The current totalitarian Cuban regime is a true satellite, that represents in our hemisphere the Soviet neo-colonialism, but never a representative of the Cuban people, with which is even more incompatible than with the Inter-American System, because it runs counter to its history, traditions, culture, morals and idiosyncrasy. That regime is an instrument for the interference of an extra-continental power (the Soviet Union) in the internal affairs of the Americas.

In the Seventh Consultation Meeting of the Ministers of Foreign Relations of the Americas, assembled in accordance with the Treaty of Rio, which is as the NATO of the

Americas, in San José, Costa Rica, it was stated:

"1. The intervention or threat of intervention, albeit conditioned, on the part of an extra-continental power, in the internal affairs of any Republic of the Americas, is hereby condemned, and we underline that acceptance of the threat of intervention from an extra-continental power by any American State endangers the solidarity and security of the Americas, obligating the Organization of American States (OAS) to condemn it and to reject it also with an equally energetic attitude."

Nobody has the right, then, because of shortsightedness, ineptitude or cowardice, or rather due to naïve neutrality, to ignore that the satellite regime of Castro has "accepted the threat of intervention from an extra-continental power" (the Soviet Union) and that "he has endangered the solidarity and security of the Americas." What should your attitude be, in the compliance of your own agreements?

The Ninth Consultation Meeting of Ministers of Foreign Relations, assembled in accordance with the Treaty of Río, and convened at the see of the OAS in Washington, D.C., in 1964, agreed upon the following:

"1. That the present government of Cuba, since its installation in 1959, has developed, supported and otherwise conducted a policy of intervention in the American Continent, with methods, propaganda, provision of funds and training for sabotage and guerrilla operations, supplying armaments and assisting those movements that tend to the subversion of national institutions through the use of force, in order to install communist regimes . . ."

"2. That said assistance to subversion generally adopts the form of a politiçal aggression . . ."

Therefore, the Ninth Consultation Meeting resolves:

"a. To condemn the current govenment of Cuba as an aggressor and because of its intervention in the internal affairs of other States, violating their territories and sovereignties."

That condemnation, approved by the American States that you represent in this Assembly, is in force, and it becomes even more necessary and urgent that when it was approved that it be strictly complied with, since the current government of Cuba is a threat that imperils the other American States and has made a mockery of those agreements and resolutions that you have approved. It also continues to intervene in the internal affairs of other States, violating their sovereignties, and is going to continue doing that, because it is consistent with its Marxist-Leninist nature.

The Soviet Union has provided the Cuban regime with billions worth of armaments, in an arms race unparalleled in the Americas. Only last year it shipped 64,000 tons of armaments to Cuba, that not only have been utilized to arm a million members of the militias, but also to be exported to other countries in this hemisphere, such as Nicaragua, Grenada and the communist guerrillas in El Salvador. Last November, U.S. reconnaisance planes verified that Soviet-bloc ships arrived in Cuba loaded with armaments, unloading some and transferring others to Nicaraguan ships, especially heavy weapons. Therefore, the arms race is ongoing, even on the eve of this Assembly.

Cuba has, as it has been verified and you well know, a base for nuclear submarines at Cienfuegos Bay, where reportedly Soviet nuclear submarines have been repaired. Now it has been publicly stated that the Cuban regime is building, precisely in Cienfuegos, a nuclear plant, presumably for peaceful uses, but there exists the danger that it can be devoted to bellicose uses.

The Cuban communist regime has now an extense variety of warplanes, Mig-23 and Mig-27, capable of transporting nuclear warheads. The Mig-27 have a long-range capability and are much more dangerous, as carriers of offensive nuclear weapons, than the IL-28 that were in Cuba in 1962 and triggered the nuclear missile crisis. Besides, there are in Cuba over 12 Soviet Bear-class bombers (TU-95-D & TU-95-F). Bombers Bear TU-95-F are intended for anti-submarine warfare and are capable of attacking targets both on land and in the sea. The Soviet Union has these bombers permanently in Cuba now. Besides, the Soviets have built eleven airfields for warplanes.

It has been verified that Golf- and Echo-class nuclear submarines have visited Cuba in several instances.

Cuba is the only country in Latin-America that has not subscribed the Treaty of Tlatelolco for the Proscription of Nuclear Weapons in the region. Why is that? The answer is obvious.

It has also been verified that the Soviet Union has stationed a military brigade in Cuba, besides numerous high-ranking military officers, some of them disguised as technicians, businessmen, members of cultural or diplomatic missions. How is it that the States of the Americas allow Soviet troops to be stationed in territory of the Americas? This violates the OAS Charter and the Treaty of Río. What is the response of the American States in the face of that CHALLENGE?

Several Soviet ships, capable of loading nuclear missiles, have visited Cuba in 1980, 1981 and 1982. More recently, in this year 1985, a Soviet flotilla with vessels capable of carrying nuclear missiles, have been performing war games in the Caribbean. This is a direct threat against the oil fields in Venezuela and Mexico. They are also a threat against the other States of the Americas.

Various U.S. Senators, among them the Honorable James A. McClure and Steve Symms, have denounced the Soviet presence in the Americas on the floor of the U.S. Senate, and their denouncements have been recorded in the U.S. Congressional Register.

The Soviet Union has signed and ratified the Second Protocol of the Treaty of Tlatelolco, obliging itself not to bring nuclear weapons to the Americas, and it is easy to verify that they have violated that Treaty.

There are recent reports accusing the Soviet Union and Cuba of activities related to chemical and biological weapons in Cuba, infringing upon the Biological Weapons Treaty of 1975 and the Geneva Convention on Chemical Weapons of 1925.

The KGB (secret political police of the Soviet Union) has taken over all Cuban intelligence and espionage services, directed by the DGI (Dirección General de Inteligencia).

There are in Cuba 45 "schools" for training and preparation of guerrilla members, saboteurs and terrorists from all over the Americas, staffed by Soviets, Czechs, East Germans and Cubans.

The objectives of the Soviet Union, through its satellites in Cuba and Nicaragua, are those of taking over governments in each of the countries of the Americas. And there cannot be any agreement or compromise about that objective. Because of tactical conveniences, they might agree upon a "peace" in Central America, as Hitler agreed upon in Munich; and there shall not be a scarcity of imitators for Chamberlain in the Americas, willing to let themselves be deceived, betraying the destinies of their nations and the future of the Americas.

The Brezhnev Doctrine of limited sovereignty is being applied, in fact, in the Americas. In Hungary, Czechoslovakia, Poland and Afghanistan, Soviet troops and tanks invaded and trampled upon their sovereignties then the peoples of those countries, even within Maxism-Leninism proper, tried to give it a "human face". But Soviet troops and tanks have been carried to Cuba in order to prevent an uprising of the Cuban people against Soviet totalitarianism, or to suffocate it should it erupt. This is occurring against the silence of the American States, which are morally and legally obligated to help the Cuban people to liberate itself.

José Martí, the Apostle of the Cuban Independence, stated: "Watching the commission of a crime silently is equivalent to committing it."

Human rights are universal, inalienable and indivisible values in their enforcement, maintenance and defense, and there cannot be any discrimination in denouncing violations against them.

The Inter-American Commission on Human Rights has approved seven (7) special reports about the violations of human rights in Cuba, and numerous resolutions on the same issue. In the Annual Report that said Commission has submitted to this General Assembly it has denounced, once again, the violations against human rights in Cuba, following a continuous pattern of infractions that are inherent to the Marxist-Leninist regime and without which it could not be maintained in power.

In Cuba, at a variance with other countries in Latin-America, human rights are violated in the Constitution and Laws, which gives shape to an institutional violation against human rights, codified in its legislation in force. Human rights are also violated in fact, and political prisoners are given a "cruel, degrading and inhuman treatment", as the Inter-American Commission on Human Rights has stated.

The political imprisonment is now in Cuba the longest and most cruel recorded in the Americas, because it violates human rights totalitarily, continually and in an unlimited fashion. Those prisoners called "Plantados", because they have stood up to the regime and rejected Marxist-Lininist indoctrination, have spent over 20 years in prisons, at times in walled-up cells that have no windows, and other times in "drawers", in groups of two and three where there is scarcely room for one. The Historical Political Imprisonment in Cuba is an affront for the Americas, that contemplate it silently, and a denouncement against the cruelty of communism.

Over 500 Cuban workers have been incarcerated, some of them sentenced to death and other to 30 years of imprisonment at forced labor only for wanting to organize a labor union such as the Polish Solidarity. The Inter-American Commission on Human Rights has initiated a folder about this case upon our complaint.

Executions by firing squads continue in Cuba. We have denounced that this year university students and other youngsters who have rebelled against the regime have been executed. Many youngsters who refuse military induction to go to Angola, Ethiopia

or Nicaragua to fight, or to smuggle into El Salvador to assist communist guerrillas, are taken before the firing squads and executed. Their relatives are denied the right even to bury their bodies. Those relatives of the executed who insist in their inquiries, are threatened or punished. At the Managua Military Encampment, near La Habana, there is a place especially intended for those executions and a cemetery for their victims.

There is an estimate of between 15,000 and 20,000 male and female political prisoners in Cuba, in the 17 prisons and forced-labor camps existing there, expecially those of Boniato, Combinado del Este, Kilo 7, Minas del Frío, Guanajay and others.

Because of all of the above, and much more that would make this declaration and denouncement excessively lengthy, the Marxist-Leninist regime in Cuba is incompatible with the Inter-American System, as it has been stated by the Eighth Consultation Meeting of Ministers of Foreign Relations, convened at Punta del Este, Uruguay, in 1962. To pretend that such a regime could enter into the euphemistically called "ideological pluralism" would be an affront for the Americas and a violation of all treaties, covenants, agreements and resolutions in force.

There are States in the Americas that are not a part of the Organization of the American States (OAS) because Article 8 of its Charter forbids them. The Present regime in Cuba is forbidden by all articles of the Charter, of the Treaty of Rio and those agreements and resolutions in force, by much higher reasons, that affect not only the sovereignty of those States victimized by subversion, sabotage and terrorism, but also democracy, freedom and peace in the peoples of the Americas.

To this honorable assembly we state and request:

1. That we have, in our condition of an AMERICAN STATE, member of the Iner-American System and the Organization of American States (OAS) the right to ask that the VOICES OF THOSE WHO HAVE NO VOICE BE HEARD.

2. That those treaties, covenants, agreements and resolutions in force in the Americas be enforced. They have been underwritten and approved by the States represented by you, and by the Cuban State when the latter was free. That is an obligation, on the part of the Americas, with Democratic Cuba.

3. That we reject any kind of coexistence or détente with the satellite Marxist-Leninist regime of Castro. An agreement with satellite Castro is an affront to the Americas and a betrayal against the Free and Democratic Cuban People.

4. That, while we struggle for the independence of Cuba, at the same time we ask that there will be a denouncement, before the Americas and the world, against the "cruel, inhuman and degrading treatment" endured by male and female Cuban political prisoners, especially the "PLANTADOS", and the cessation of tortures against them at reclusion centers and forced-labor camps.

5. That freedom is an inalienable and natural right of men, women & all peoples, and there cannot be freedom in the Americas while there is no freedom in Cuba. "EITHER CUBA IS SAVED OR THE AMERICAS ARE LOST", as stated by the illustrious Cuban journalist and patriot, Dr. Guillermo Martínez Márquez, founder and past chairman of the Inter-American Press Society (SIP).

6. That we demand the cooperation of all for the enforcement of the Joint Resolution of the U.S. Congress of 1962, signed by the President of the United States and thus promulgated as a law, and reaffirmed by Senator Steve Symms' Amendment in 1984 and 1985 (in the latter instance with favorable votes from 77 U.S. Senators) whereby the United States obliges itself to fight with the Organization of American States to achieve self-determination for the Cuban people (which is equivalent to its freedom).

7. That independence and freedom for almost all American Nations were attained through the Intervention of American patriots and nations in the internal affairs of other countries. Bolivar, San Martin, O'Higgins are examples for that. Chile, Peru, Ecuador just to mention some, could not have achieved their independence at that time, if the other American States had not intervened on their behalf, in the same manner as the United States intervened to attain the independence of Mexcio—which intervention was decisive to defeat Maximilian—as France, Spain and Cuba intervened, in a decisive form, to help achieve independence for the United States of America.

8. That the so-called "Kennedy-Khrushchev Understanding" violates the OAS Charter, the Treaty of Rio and those covenants, agreements and resolutions in force within the Inter-American System. It lacks any value and has been violated by the Soviet Union and by Castro. All of which facilitates the collective action by the American States in the defense of the Treaty and the freedom of the Cuban people.

9. That the Treaty of Rio must be applied to the satellite Marxist-Leninist Regime of Cuba.

10. That the Punta del Este resolution, which is in force, be complied with, whereby it was declared that the Marxist-Le· 'nist doctrine is incompatible with the Inter-American System. This is the most important statement from the Inter-American System, in its confrontation against Marxist-Leninist doctrine, sponsored presently in the Americas by the Soviet Union.

11. That we shall be recognized as representatives of the Cuban State, a member of the Inter-American System and of the OSA, since what is excluded is the current government of Cuba.

12. That the institution and factual violation against human rights in Cuba be condemned, in accordance with the American Declaration of Rights and Duties of Man, and the principles and values of the Judeo-Christian civilization.

13. That it be declared that the so-called Brezhnev Doctrine (of limited sovereignty) is not applicable to the Americas, nor should it be applicable to any nation in the world. Consequently, the withdrawal of Soviet troops from Cuba must be enforced.

14. That the Organization of American States would approve the creation of a De-Colonization Committee to liberate Cuba and Nicaragua from Soviet neo-colonialism.

15. That this General Assembly would declare that there is no freedom of expression, press, religion, syndicalization, movement, etc., in Cuba, and that freedom, integrity and life of the human person are not respected either.

16. That this General Assembly would declare that Cuba has not signed the Treaty of Tlatelolco on the Prohibition of Nuclear Weapons in the Americas, because it maintains its territory open to nuclear weapons as well as to warplanes and submarines capable of transporting them, thus endangering all of the Americas and especially the Cuban people, as it did during the missile crisis in 1962.

17. That this General Assembly would declare that the satellite regime of Castro is one aligned with the Soviet Union.

18. That Cuban Freedom Fighters be released from prisons, not only in Cuba but also in Venezuela, México, Costa Rica and the U.S.

19. That our belligerence be acknowledged and recognized, as Cuban Freedom Fighters, although we shall continue to fight, with or without this acknowledgement, as we have done thus far.

20. That COLLECTIVE ACTION is recognized in the OAS Charter, in the Treaty of Rio (Inter-American Treaty for Reciprocal Assistance), in the Treaty of OECO, in the Treaty of CONDECA, and is the basis for the legitimate defense of our hemisphere; it is the counter-intervention in the face of extra-continental intervention of the international communism represented by the Soviet Union.

21. That this document be circulated among Member States in attendance in this Fifteenth General Assembly, because the Cuban State continues to be a member of the Inter-American System and of its legal & political entity, the Organization of American States (OAS).

Mr. Chairman of the Fifteenth General Assembly, Honorable Chancellors and Ambassadors, Honorable Representatives of the Americas:

We have complied with our duty once again, in pointing out to you, with all due respect, the moral and legal obligations, the sacred compromise that your respective states have contracted with the Cuban State. You now have the floor.

With our highest consideration, we remain,

Yours very sincerely,

Dr. MANUEL A. DE VARONA,
Chairman, Former Premier and Former President of the Senate in Free and Democratic Cuba.

Dr. CLAUDIO F. BENEDI-BERUFF,
Washington Area Representative.

JUNTA PATRIOTICA CUBANA,
AREA METROPOLITANA DE WASHINGTON,
Merrifield, VA.

(Bring the machine-guns. We are going to liquidate the diplomats—Stalin).

(Pacta sunt ser"anda—one agrees freely, but is bound by the agreement—F. Francisco de Vitoria).

Hon. Chairman of the Extraordinary General Assembly of the Organization of American States,

Hon. Ministers of Foreign Affairs,

Hon. Ambassadors and Representatives of the American States.

DISTINGUISHED REPRESENTATIVES OF THE AMERICAS: In our capacity as citizens of the Americas, members of the Inter-American System, born in the Cuban State, that is a part of the Organization of American States and, as an interested and affected party, in the matters before this Honorable Extraordinary General Assembly, we have the privilege as well as the right and duty of submitting to your learned attention the following considerations about the examination of the

fundamental instruments of the Organization of American States.

There exists a basic difference between the Inter-American System and its juridical and political organization: The Organization of American States (OAS), that must not be confused, lest we get lost in a wrong approach on the reality of the Americas, such as some parties interested in creating confusion have done.

For the pertinent effects of this Extraordinary General Assembly of the OAS, the maximum organism in the System, we deem convenient to schematize the objectives of these Considerations, focusing upon what we believe is, or should be, everyone's preoccupation: The Reformist Trend, its Objectives and Scope, within the following outlines:

1. The Inter-American System;

2. The Organization of American States; and

3. The fundamental instruments of the OAS.

1. *THE INTER-AMERICAN SYSTEM.*—What is under consideration in this Assembly, according to statements pronounced by the proponents of the Reform, is: THE OAS AND ITS FUNDAMENTAL INSTRUMENTS, not the INTER-AMERICAN SYSTEM. However, we must reflect upon certain points that we deem as pertinent.

How the System is a conjunction of principles that, put together, make up a body of doctrines. We must refer to those principles and to those doctrines.

The State is the juridical & political organization of the Nation, such as the Organization of American States is the juridical & political organization of the Inter-American System.

The Inter-American System is made up by principles and values deriving from the Western Judeo-Christian civilization. Transcendental values and principles, amongst which are uppermost the dignity of the human person, freedom, respect for the inalienable rights of the human being, comprised in the American Declaration of the Rights and Duties of Man, proclaimed by the Organization of American States in April, 1948, prior to the Universal Declaration of Human Rights proclaimed by the United Nations in December, 1948.

All of these principles and values have shaped the Inter-American System, in such a manner as to make up a Doctrine that we could properly define as the Inter-American Doctrine.

In order to make these principles and values effective in the historical and institutional reality of the Americas, the Inter-American System created the Organization of American States and its fundamental instruments, and declared that representative democracy is based upon popular sovereignty and the periodic and free consultation with all citizens of the member state of the OAS.

Within the Inter-American System, theocentrism, with its religious syncretism based upon the men and women of the Americas, cannot be excluded nor displaced by anthropocentrism, influenced by ideologies that are alien and foreign to the history, culture & tradition of the Americas.

The Inter-American System is the most senior, most efficacious & most successful regional system in the world, so that men and women will be able to perform, within the geographic and historical environment of the Americas, their transcendental and human destinies. That is why alien ideologies cannot be grafted unto the heart of the Americas, that would denaturize their essences. The Americas must, of necessity, be what they are, or they would cease being that and become invertebrated pieces of a broken structure, such as it has happened to other regional integrations in the past.

What there exists nowadays in the Americas is a crisis of identity, furthered when there are governments that fail to support those principles and values upon which they have come to be and, turning their backs to their traditions, culture and history, embrace ideologies that negate their transcendental values and their juridical and political principles.

There is an identity among the nations of the Americans and, due to that identity, they make up the organic and regionally structured whole, within a System that has given itself juridical and political institutions which are capable of representing and defending it.

To attack and destroy the Americas, the System must be attacked and destroyed, since it is based upon that identity and those principles and values, and that is what is happening today. That is the challenge.

With that understanding, the foreign (extra-continental) forces that have infiltrated within the Americas to subvert and destroy them, have started by having a base (Cuba), a sub-base (Nicaragua) and a strategy to destroy the Inter-American System, because the latter is absolutely incompatible with those forces; as well as a tactics to break the OAS, separating North from South, or trying to create parallel organisms.

The Inter-American System is theocentrical, and its values and principles comprise the belief in God, the full dignity of men and women, their freedom, justice, peace and the belief that the existing wealth in the Americas are in the service of the common good, administered by human beings for the benefit of men and women. The Inter-American System proclaims unlimited respect for human rights, brotherhood and fraternity among men and women, opposing the struggle between classes, and love opposing hate. Because of all these reasons, it is incompatible with Marxism-Leninism.

2. *The Organization of American States [OAS].*—The OAS will be what every one of its member states wishes it to be, as it has been states by former Secretary General of the OAS and former President of Colombia, the illustrious statesman Dr. Alberto Lleras Camargo.

Former Bolivian Chancellor, Dr. Mario Gutierrez, aptly stated in the Third Ordinary General Assembly of the OAS: "Those limitations endured by the OAS are not attributable to its Chart, amended in Buenos Aires in 1967, but rather to the attitudes that our nations will adopt to restrict the OAS' scope of action."

The OAS was founded in 1948, only 37 years ago. Its Constitutional Charter was amended in 1967 and those amendments went into effect in 1970.

The United Nations Organization (UNO) was founded in 1945; it is three years older than the OAS, and the right to veto exists within the UNO (that the Soviet Union has practiced 125 times). But nobody has undertaken seriously to raise the issue of amending the UNO's Constitutional Charter, despite the fact that the same countries whose governments propose amending the OAS' Charter are also members of the United Nations, and the additional fact that, within the international scope of the latter there have occurred more changes and there exist more reasons for any amendments than within the inter-American scope. To the former it must be added that the OAS has been much more efficient and useful to solve conflicts, to maintain peace and to foster the development of its member states than the UNO.

The question is not, therefore, in the Charter of the OAS, nor in its fundmental instruments, but in their correct application. When there have been member states within the OAS that have applied its norms, many conflicts have been solved, but when that has not been so, as in the cases of Cuba first and then Nicaragua, conflicts have not been solved, but instead problems have become more acute and the OAS has been weakened due to the non-compliance of its Charter, of the Reciprocal Assistance Treaty (Treaty of Río), and with those agreements, resolution and statements that during the last 40 years, after the II World War, it has been accumulating and incorporating to its juridical and political structure.

Within those territories controlled by the Soviet Union, nations have their sovereignty limited and are forced to follow the Marxist-Leninist System, according to the Brezhnev Doctrine of Limited Sovereignty, whereby nationalism is destroyed and replaced by internationalism, directed and managed by Moscow.

Ideological pluralism—an euphemism utilized to disguise the permisiveness that is the accomplice of Marxism-Leninism in the Americas is a denial of democratic coexistence within the Inter-American System. There cannot be coexistence where all attributes and circumstances for its existence may not be given. There can be a democratic pluralism, where representative democracy is practiced—so many times mentioned in the charter of the OAS—where peoples will vote periodically, with full liberty to elect their mandataries within the plurality of democratic parties, which is the antithesis of the totalitarian Marxism-Leninism.

The Soviets have proclaimed the Brezhnev Doctrine also to destroy ideological pluralism. Czechoslovakia tried—even with Marxism-Leninism—to give a "human face" to communism, in the so-called Prague Spring, and 80,000 Soviet soldiers invaded Czechoslovakia and smothered the surging and weak ideological pluralism of Alexander Dubcek, in the same manner they had already choked, with their tanks and Soviet troops, that of Hungary's, and as they are presently doing in Afghanistan.

The Brezhnev Doctrine is being applied in Cuba in a diverse manner. The Soviet Union has stationed 25,000 soldiers there, some of them integrating a brigade and others in military cadres, to prevent an uprising of the Cuban people, or to suffocate it should it happen. The same preventative measures are being applied to the Nicaraguan people.

There is no ideological pluralism in the Soviet Union, nor in any of the many nations subjugated by the Soviet Union, such as Cuba, where severe penalties, up to and including execution before a firing squad, are imposed upon those who advocate ideological pluralism (that it termed deviationism).

3. *Fundamental instruments of the OAS.*—We have referred to the Carter of the OAS and the Treaty of Rio in the preceding chapter.

The Charter of the OAS has already been amended, and those amendments have been in force since 1970, but the basic foundations of the Constitutive Charter are still in

force. The objectives of the Organization are there, they are in force, and some of them have never been applied not fully complied with. It there is anything missing, that is to give them their due compliance.

Which were the fundamental objectives intended by the representatives of our nations when they constituted the Organization of American States (OAS) and agreed upon its Constitutive Charter? They wanted to give the Inter-American System those juridical and political instruments capable of bringing to the reality, in the Americas, the principles and values of the Inter-American System. And they attained that. They were confident that those responsible with the compliance, in practice, of what had been agreed upon, would do it well and faithfully. It has not been always like that. There have been exceptions to that general rule. Besides the great realizations of the Organization, there have been great failures, which have brought about those problems we face up today, such as in the cases of Cuba and Nicaragua.

The crisis of the Organization is not with its regulations, but in the lack of compliance with same. An analogous thing happens with the Treaty of Rio.

The Treaty of Río is the NATO of the Americas. Approved in Río de Janeiro, Brazil, in 1947, it came two years after World War II had ended. Which were the fundamental objectives of this Treaty? The reciprocal assistance among the American States. The preservation of the Americas against extra-continental intervention in the internal affairs of the Americas, not only against a direct armed attack from those powers, but also against subversive and terrorist action and aggression. And the scope of the latter was defined.

The representatives of the American States who wrote and approved the Treaty of Rio, had in mind the threat that was posed at that time (and that has materialized now in the cases of Cuba and Nicaragua) by extra-continental intervention of International Communism, represented now by the Soviet Union and its presence in the Americas. Should the Treaty of Rio have been applied in accordance with those stipulations contained by it, in the framework of the juridical and political measures comprised in same, as well as in the Charter of the OAS and the resolutions and agreements approved in accordance with its general guidelines, we would not be facing today those problems that affect the peace in the Americas. We are still on time to defend democracy and peace in the Americas, such as they were conceived by our eminent liberators and those statesmen who gave birth to those juridical and political instruments.

The Treaty of Tlatelolco, about the prohibition of nuclear weapons in Latin-America, which is so important for the present and future of the Americas, has not been subscribed by Castro, the satellite of the Soviet Union. It is known that the Soviet Union has built a base for nuclear submarines in Cienfuegos (Cuba); that this base has been visited by nuclear submarines, capable of transporting and firing nuclear weapons. Now Castro is building a nuclear plant, presumably for "peaceful purposes." The Soviet Union, which signed Protocol II of the Treaty of Tlatelolco, has infringed upon same, according to our opinion. Why is it that Castro has not signed it?

If there are any amendments needed in the Inter-American economic institutions, to adapt them to the changing directions of regional and world economies, or to the serious problems caused by the external debts of Latin-American nations, covenants are to be approved or agreements are to be taken as deemed necessary, but the Inter-American System nor the OAS must be involved in these, with the pretext of those amendments.

We are not against reforms on principle, nor do we consider them inconvenient by system, by the sole virtue of their being reforms. What we deem as very serious is that, in the midst of so much confusion, demagoguery, political ineptitude, perplexity and Marxist agitation that act in compliance with extra-continental guidelines, it will be tried, perilously, to amend the Inter-American System with the disguise of amending the OAS.

The Secretary General of OAS, Ambassador Joao Clemente Baena Soares, in his eloquent speech pronounced on September 5, 1985, mentioned the statement of YUSSEF STALIN, leader of Soviet Communism: "Bring the machine-guns. We are going to liquidate the diplomats." This quotation should be present in the reformist deliberations of that Assembly: Honorable Chairman of the Extraordinary General Assembly; Honorable Ministers of Foreign Relations; Honorable Ambassadors; Honorable Representatives of the Americas:

We respectfully expect that our voice will be heard, and, along with ours, those of the many human beings in the Americas who have no voices will be heard as well.

Very attentively yours,

Dr. MANUEL A. DE VARONA,
Chairman of the Cuban Patriotic Board, Former President of the Senate in Free and Democratic Cuba.
Dr. CLAUDIO F. BENEDÍ-BERUFF,
Washington Area Representative.

JUNTA PATRIOTICA CUBANA,
AREA METROPOLITANA DE WASHINGTON,
Merrifield, VA, April 15, 1986.

Dr. LUIS ADOLFO SILES SALINAS,
Chairman, Inter-American Commission on Human Rights, Organization of American States, Washington, DC.

DISTINGUISHED CHAIRMAN: In the capacity that I have accredited, since the inception of that Inter-American Commission on Human Rights, as Coordinator of almost all associations and organizations of former male and female Cuban political prisoners and their relatives in Washington, D.C., and as the representative of the Cuban Patriotic Board, it is my high privilege to address you and, through your intercession the Honorable Members of that Commission, in order to state our gratitude for this opportunity that I am afforded once again to appear before the Commission to manifest and denounce the following:

First, Mr. Chairman and Honorable Members, I would like to reiterate our gratitude towards the distinguished Members and former Chairman of that Commission, Drs. Andres Aguilar and Cesar Sepulveda, for the numerous courtesies and deferences they always had towards us and their invaluable assistance to our difficult mission, as well as towards Dr. Luis Dementrio Tinoco, our old friend in the juridical, democratic and coffee trading endeavors in this Hemisphere, whose decease has been a great loss for the Americas and for the protection of human rights. We recently offered a Mass for his soul in a Catholic temple in this area. Let our condolences be known to his relatives and to that Commission, that he distinguished with his indefatigable work.

We also request the honor to salute respectfully and welcome on behalf of those whom we represent, the distinguished and prestigious jurists and representatives of the Americas in the Commission, Drs. Elsa Kelly, Tulio Bruni Celli and Oliver Jackman, to whom we wish great successes in the performance of their elevated and responsible missions. We also salute and state our best wishes to the newly-elected Chairman of the Commission, Dr. Luis Adolfo Siles Salinas, and the First Vice-Presidents, Dr. Gilda Russomano and Dr. Tulio Bruni Celli.

We would like to ratify before that Commission that a patter of continued violations against human rights is being presently followed in Cuba, both institutional violations in the Constitution and the Laws, as de facto violations, both intrinsic to the Marxist-Leninist system. Far from abating, these violations have increased until becoming an affront for the free men and women of the Americas and the world and a challenge to the zeal, watchfulness and performance of that Commission.

Executions by firing squads, that have now surpassed 40,000, continue to be effected as opposition and rebelliousness increase within the suffering Cuban population against the totalitarian regime that oppresses and enslaves them. At the Managua military camp, youngsters who refuse to go to Angola continue to be executed secretly, and their relatives are denied the consolation of burying their dead. These relatives are threatened, intimidated and their lives are jeopardized, together with their freedom, should they insist in their demands to inquire for their children. We request from the Commission that an investigation be open about these violations against human rights.

Let us allow to reiterate the denouncement that we timely submitted to the Commission about the events at the Embassy of Perú, La Habana. As stated in our denunciation, over 10,000 Cubans sought asylum in that Embassy. Due to the overcrowding, many of them were given "safeconduct" by the Cuban Government to return to their homes and wait for the exit visas to leave the country. Out of those, 2,500 have not been able to leave, because the present government of Cuba does not allow them. Many of them have been imprisoned, others have been executed by firing squads, and still others have disappeared, as in the case of brothers Antonio and Manuel Blanco, as we denounced before this Commission. These facts have come out in the open and have been widely publicized in the whole world. The Government of Perú and other sources have the list of these Cuban political refugees. Because of the above, we hereby ask the Commission to open a case based upon our denouncements in order to clarify the situation of those Cubans, who have been declared "non-persons" by the Cuban Marxist-Leninist regime. We enclose several copies of the book written by Mr. Sergio Galan Pino, one of those who sought asylum in the Embassy of Perú at La Habana, that contains many of the violations against human rights that took place there.

We would also like to reiterate the denouncement that we have made before this

Commission, adding new elements for judgment about the situation of the 12,500 Jews who lived in Cuba when the present regime took over the country, and out of whom only 500 remain in Cuba. Almost all of them have been forced to leave the country, and those who remain have no Rabbi to tend to their spiritual needs, as "the New York Times" has said. We request that the Commission will open another case to investigate the fate of these Jewish persons and the violations against their human rights. No Jewish collectivity as numerous as that will abandon a country, except due to flagrant violations against their human rights.

We have already denounced, and we hereby reiterate, the dramatic situation of the so-called "Plantados," Cuban political prisoners who are confined to the terrible prisons at Boniato, Kilo-Siete and Combinado del Este These Cuban political prisoners make up the historical political group of prisoners (presidio politico historico), the longest and most cruel collectivity of political prisoners in the Americas.

Cuban political prisoners are given a "cruel, inhuman and degrading treatment," as this Commission has stated, in conjunction with other international organizations for human rights. The U.S. Department of State also qualifies it in the same manner.

Many of these political prisoners are kept in walled-up cells, where they cannot see the sun, or in "drawers", small cells that crowd several of them without sufficient space for more than one. These kinds of tortures are practiced in several prisons in Cuba, among them Boniato, Kilo-Siete, Combinado del Este, Guanajay and others.

At the Combinado del Este the new plantados have been lodged, who have been in that prison for two, three and four years, and have been sentenced to terms of 15, 20 and 30 years of imprisonment.

In Galley No. 50 at the Combinado del Este, there are 50 youngsters who are plantados and who were placed together with common criminals, for which they rebelled. Some of them have been brutally beaten, among them the youngsters Alfredo Jimenez, Isbel Rolando Abreu, Ricardo Gil Miranda, Yosuan Accosta and Enrique Ruiz.

Another 150 plantados at the Combinado del Este, who were placed together with common criminals, also rebelled. The ages of this latter group range between 15 and 35 years. Many of them have declared a hunger strike, and their health is very critical. We request from the Commission that another case be opened and that it would act as soon as possible to prevent any further danger to the lives of these Cuban political prisoners.

In the detailed and courageous denouncement made by the United States Department of State about institutional and de facto violations against human rights in Cuba, a great many cases are outlined on 12 pages, single space, individual and institutional violations against human rights, and we request that said publication will be attached to this denouncement as evidence. A copy of this publication is hereby enclosed, to support our denouncement.

In a survey performed by several institutions devoted to investigate and denounce violations against human rights, among them Amnesty International, it was verified that in 1985 there were in Cuba 15,000 political prisoners. None other, among the American states, has presently such a high figure of political prisoners.

Many of these political prisoners are given new sentences after having served many years in prison, some up to 20 and 25 years. Instead of releasing them, they are kept indefinitely imprisoned.

There is no "separation of powers" in Cuba, since the Judiciary is controlled by the so-called "Popular Power" which is, in turn, a farce of representation to serve the propaganda purposed of the regime.

There are no procedural guarantees in Cuba. Most trials that result in executions are held secretly, without any guaranty for the accused.

There is no right to "Habeas Corpus" in Cuba. Political prisoners are arrested and they disappear, and their relatives are never informed where they might be. Lawyers who try to ascertain where their defendants may be, are arrested as well, and some of these lawyers have died in prison in mysterious circumstances, such as it recently happened to our colleague, Dr. Aramis Taboada, who the communist regime said that had passed away as a result of a cardiac arrest. Labor leaders have also died in similar circumstances, such as Guido Faraniman, who also "died" at the Combinado del Este on April, 1985.

Out of the 140 political prisoners in Cuba that the Catholic Hierarchy of the United States and Cuba requested from in Cuban regime to be released, and that it pledged to release, the regime finally delivered a list of 75, out of whom, over 50, are not those who appear in the list complied by the Bishops. None of them has been released yet.

Former Cuban political prisoners, who wander around in the streets in Cuba in the condition of "non-persons", are not allowed to leave the country. The present Cuban regime has unilaterally voided an "understanding" reached by it and the United States Government. We request the intervention of the Commission to protect the human rights of all released Cuban political prisoners, who lack all of those rights that the Commission protects.

Persecution against all religions continues, despite the pretended opening by the Marxist-Leninist regime in Cuba. This persecution is inherent to the so-called Socialist Constitution of Cuba, enacted in 1976. The few priests, pastors and ministers remaining are limited and confined to the scarce number of temples that are still open. Those Cubans who openly profess any religion, are deprived of many of their rights, among them those to education, employment and medical assistance. Several Jehovah Witnesses have been executed by firing squads and others remain incarcerated, sentenced to lengthy terms of imprisonment.

We would like to point out, as a positive action from the Commission, its inclusion in the annual report submitted to the Fifteenth General Assembly of the OAS, violations against human rights in Cuba.

An International Court assembled this weekend at Paris, France, made up by European personalities, especially former Cuban and Soviet political prisoners, under the sponsorship of "International Resistence", among whose founders are Vladimir Bukovsky, General Piotr Grigorenko and Armando Valladares. It received statements from 12 witnesses, former Cuban political prisoners and one from Nicaragua, who accused the Nicaraguan communist regime to impose the Cuban torture systems in their country.

Former male and female political prisoners were all in agreement to state that physical and psychological tortures continue to be performed in Cuba; that political prisoners are locked up in walled-up cells and that they are submittd to sexual abuses.

The above mentioned witnesses also pointed out that Cuban male and female political prisoners were being subjected to medical experiments, performed by Cuban and Soviet physicians.

Dr. Ana Lazara Rodriguez told the Court that she had been sentenced to 30 years of imprisonment for having thrown anti-communist leaflets through a window at the University of La Habana. She added that she had served 19 years of her sentence, and during her stay in prison she saw other female prisoners thrown in succession down the stairs, because they have refused to submit themselves to interrogations. At the bottom of the stairs there were stationed communist soldiers who struck the women on their breasts and stomachs. Later on they were dragged by their hair to the interrogation rooms.

Former political prisoner Raoul Carmenate said that 200 youngsters who refused to submit to communist indoctrination were taken to another barracks, close to his, where there were common criminals and sexual perverts, who threatened those youngsters with violating them. He also said that he had heard when many of those yongsters were tortured, especially a couple of them, who were between 15 and 18 years of age, for being members of the Jehovah Witnesses. Carmenate added that he had been imprisoned when he was 16 for having criticized the Soviet invasion of Hungary. He was charged wth being a CIA agent and propagandizing the Coca-Cola.

Former political prisoner Eduardo Capote showed the court his tortured hand. One of his fingers was missing, and he said it had been severe by communist militia members.

Actress Teresa Mayan said that she had been confined to the black cell, a filthy and anti-human lock-up, where she received a "cruel, inhuman and degrading treatment." She added that she had seen young female prisoners, whose ages ranged between 16 and 20 years, who were interrogated while soldiers masturbated themselves in front of them. In her group of prisoners, there were some who were sick with syphilis and tuberculosis. She said that political prisoner Mercedes Fernandez defecated parasites six centimeters in length, but she was not given medical assistance.

Despite the actions of the Commission in the case of Dr. Orlando Bosch and his companions imprisoned in Venezuela, they have not been released yet, regardless of the fact that a military court declared that there was no proof to convict them and acquitted them. After more than 8 years, they are still in prison, and the human rights of these political prisoners are being violated. We request of the Commission to continue its efforts before the Venezuelan Government for their prompt release.

The International Commission of Jurists, an organization attached to the United Nations, stated several years ago that "the rule of law does not exist in Cuba." Said statement is still in force and with a greater strength today than when it was issued.

There is no state of law in Cuba, such as this is known in the western world and has been consecrated by our Judeo-Christian Civilization.

A million Cubans who live in exile have been deprived of the Cuban citizenship. Those Cubans who have gotten naturalized in other countries get no acknowledgement of those citizenships by the Cuban regime. Thus, they lack both the Cuban citizenship, of which they were deprived, or that which they have adopted. Cubans who travel to

Cuba have been incarcerated in several instances, with one of them taken to the Boniato prison, and consular authorities of his adoptive country have not been permitted to take an interest in his case.

The Cuban communist regime is not only anti-juridical, but also lacks judiciousness.

Because of all of the above, we reiterate our request to expedite the preparation of the eighth report on the situation of human rights in Cuba. While the eight report is finished, we request of the Commission that the institutional and de facto violations against human rights in Cuba be included in the annual report from the commission to the sixteenth general assembly of the OAS.

We request very respectfully of the Commission that these denouncements are taken as made, that investigations and cases requested be opened, that the preparation of the Eighth Report be expedited and violations of human rights in Cuba be included on same.

We remain, Mr. Chairman, and Honorable Members of the Inter-American Commission on Human Rights, with our greatest consideration and respect,

Dr. CLAUDIO F. BENEDI,
Coordinator and Representative of Associations of Former Male and Female Political Prisoners in Cuba, and of the Cuban Patriotic Board.

JUNTA PATRIOTICA CUBANA,
AREA METROPOLITANA DE WASHINGTON,
Merrifield, Va, April 18, 1986.

Dr. LUIS ADOLFO SILES SALINAS,
Chairman, Inter-American Commission on Human Rights, Organization of the American States, Washington, DC

DISTINGUISHED CHAIRMAN: In the capacity that I have accredited since the inception of that Inter-American Commission on Human Rights, as Coordinator of almost all Associations and Organizations of Former Male and Female Cuban Political Prisoners and their relatives in Washington, D.C., and as the representative of the Cuban Patriotic Board, it is my high privilege to address you and, through your intercession the Honorable Members of that Commission, to extend the denunciation that we submitted before the full Commission on April 15, inst., regarding the new plantados, Cuban Political Prisoners who have declared a hunger strike at Building No. 3, Galley No. 50, of the Combinado del Este Prison, La Habana, Cuba, to which effect we state and denounce the following:

That Cuban political prisoner Rodolfo Frometa Caballero, who lived at Union City, New Jersey, United States of America, in 1982 and being a citizen of this country, travelled to Cuba during the so-called "Cuban Community Trips" and was arrested and imprisoned by the communist regime, thus violating his U.S. citizenship and his freedom of travel. He had left Cuba in 1967 through the United States Naval Base at Guantanamo. The U.S. consular representatives performed several efforts before the communist regime, all to no avail. Frometa Caballero was sentenced to 20 years of imprisonment.

Mr. Frometa Caballero and other political prisoners are receiving a "cruel, inhuman and degrading treatment". They have been locked up in walled-up cells, where they have stayed for 2 years without having seen the sunlight; they have been kept in isolation and given only an inadequate ration of food once daily, and have not been allowed to have any visitors, nor any medical assistance. Those filthy cells are full of human excrements and they are unable to properly fulfill their most urgent necessities. For all of those reasons, nineteen of them have declared a hunger strike, as we denounced before the Commission and now we are reiterating and extending.

Endangering their lives and through means that cannot be revealed for obvious reasons, they decided to make their plight known to the Commission and other organizations that protect human rights around the world.

The letter was handwritten, as you may suppose, and was prepared on behalf of the whole group by RODOLFO FROMETA CABALIERO. That letter has been published on the press and belongs to the public realm. A translated copy of said letter is enclosed with this extension of our denouncement, as an integral part of same.

The names of those Cuban political prisoners who have declared the Hunger strike are as follows: Jesus Monoz Tejera, Segundo Gonzalez Alonso, Oswaldo Cardin Lopez, Rafael Torres Socorro, Gerardo Quintero Valdes, Francisco Casales Fontes, Juan Luis Pozo Diaz, Felix Villar Cedron, Carlos Powory Ebantes, Lazaro O. Moreno Balanga, Orlando S. Suarez Torres, Jorge A. Blanco Rodriguez, Armando Castro Isarbia, Jose Luis Alvarado Delgado, Jose Luis Dominguez Rodriguez, Humberto Lopez Hernandez, Eliecer Socarras Duran, Adonis Frometa Caballero and Rodolfo Frometa Caballero.

The denunciation contained in the letter received from that somber prison of the Cuban Political Prison is self-explanatory; thus, we do not comment on its contents any longer.

We request very respectively of that Commission that this extenion of the denouncement previously submitted to the Commission be taken as made and included in the CASE, that the Commission has surely initiated about this most grave denouncement; that measures be taken with an emergency character as need to protect the lives of these Cuban political prisoners, and that this extension of the denouncement be included in the eighth report and in the annual report of the commission to the Sixteenth General Assembly of the Organization of American States.

We remain, Distinguished Chairman and Honorable Members of that Commission, with our greatest consideration and respect,

DR. CLAUDIO F. BENEDI,
Coordinator and Representative of Associations and Organizations of Former Cuban Male and Female Political Prisoners, and of the Cuban Patriotic Board.

TRANSLATION OF LETTER RECEIVED FROM CUBAN POLITICAL PRISONERS IN BUILDING NO. 3, GALLEY NO. 50, OF THE COMBINADO DEL ESTE PRISON, LA HABANA, CUBA, WHO HAVE DECLARED A HUNGER STRIKE

DEAR FRIEND: Only few lines to make known to you the circumstances in which I am, so you will make it known to all of my friends.

The situation is the following:

Nineteen of us, Plantados political prisoners, declared ourselves in a hunger strike because the military personnel at the Combinado del Este Prison, located at Kilometer 13½ of the Monumental Highway, Building No. 3, have forbidden our relatives to visit with us, despite these visits being every six months and limited to a single relative.

This strike has been on for longer than a week and may be fatal for some of us.

Because of that, I ask you the favor of divulging this news to the United Nations Organization and other international organisms that defend human rights.

The names of those who are in the hunger strike folllow:

Jesús Munoz Tejera, Segundo Gonzalález Alonso, Oswaldo Cardin López, Rafael Torres Socorro, Geraldo Quintero Valdéz, Francisco Casales Fontes, Juan Luis Pozo Díaz, Félix Villar Sedrón, Carlos Powory Ebantes, Lázaro O. Moreno Balanga, Orlando S. Suárez Torres, Jorge A. Blanco Rodríguez, Armando Castro Isarbia, José Luis Alvarado Delgado. José Luis Domínguez Rodríguez, Humberto López Hernández, Eliécer Socarrás Durán, Adonis Frómeta Caballero, Rodolfo Frómeta Caballero.

Well, José, my regards to the "China" and other acquaintances.

Besides, we have spent two years without being given a ray of sunlight.

That we are being held without any medical assistance and we are barely given an aspirin tablet.

We are in extremely small cells for the amount of prisoners that there are, and the cells are walled-up with iron plates, without any ventilation.

We are not allowed to see our children and, when we claim something, they say it is a lack of respect and get punished for 21 days in a cell full with human excrement, so that we will accept the re-education plan; besides, we are only given a meal daily. receive a salute from * * *.●

RETIREMENT OF JAMES BIRREN

● Mr. HEINZ. Mr. President, I ask that my colleagues join me in saluting an American scientist who has contributed immeasurably both to our knowledge of aging and to the quality of life for millions of America's older citizens. That scientist is Dr. James E. Birren, who is retiring next month as executive director and dean of the Andrus Gerontology Center at the University of Southern California.

When Dr. Birren began conducting research on aging nearly four decades ago, the term "gerontology" was unknown to most Americans. For that matter, Mr. President, much of what we know today about the aging process was unknown at that time. Since then, however, the contributions of Dr. Birren, and a growing number of scientists who are following in his footsteps, have greatly expanded our knowledge base. We now know a great deal about aging and have made significant strides toward addressing the many challenges posed by an aging population.

Dr. Birren began his career in 1947 as a researcher at the National Institutes of Health, Gerontological Research Center in Baltimore. At that time there were only 11 million Americans over the age of 65. Today, that number has more than tripled to 27 million and constitutes fully 12 percent of the population. It was Dr. Bir-

ren's foresight and keen intellect that enabled him to predict the importance of aging issues in American society. He chose early in life to devote his professional life to the study of aging and to the development of gerontology as a respected and useful enterprise.

After 3 years as a research scientist at the NIH, Dr. Birren moved to the National Institute of Mental Health as Chief of the Section on Aging. During his 14 years at NIMH, and in subsequent years, he conducted important research on a variety of aging-related concerns. Among his most important research accomplishments are: Analyses of the relation of age to speed of behavior; the relation of behavior to cerbral blood flow and metabolism in late life, and the relationship between physical fitness, age, and competence. These studies opened new doors to our understanding of the aging process and contributed much to the elimination of negative stereotypes about the abilities of older people.

In 1966, Dr. Birren moved to the University of Southern California where he started one of the Nation's first gerontology institutes. His credibility as a scholar and his unique interpersonal skills enabled him to start a program consisting of a handful of personnel operating out of a basement apartment and eventually built it into the world-renowned Andrus Center, which now occupies a modern 27,400-square-foot building on the campus, housing 41 faculty and researchers, more than 40 administrative and support personnel, and 180 students. Many other universities modeled their programs after the Andrus Center. Today there are several hundred gerontology institutes on university campuses across the Nation.

Mr. President, as Dr. Birren retires from his administrative duties at the Andrus Center and moves on to the next phase in his brilliant career, he leaves behind a remarkable legacy. He has published more than 215 articles, book chapters and books on a variety of aging issues. Most notably, perhaps, he is the editor of the "bible" in gerontology, the three volume Handbook on Aging. In addition, hundreds of scholars, practitioners, and teachers across the Nation have benefited directly from Dr. Birren as teacher, not to mention the thousands who have benefited indirectly and the millions of elderly whose lives are better because of Dr. Birren's work.

I would be remiss if I did not also mention that two of Dr. Birren's proteges are now serving the U.S. Congress in important capacities. I am especially proud that one of these, Dr. Stephen McConnell, is my staff Director on the Senate Special Committee on Aging. The other, Dr. Fernando Torres-Gil, is currently staff director of the House Aging Committee. It is also worth noting that there are at least 15 former students and faculty of the Andrus Center who hold professional positions with aging organizations right here in the Washington area.

Mr. President, I think my colleagues will agree that Dr. Birren's enormous contributions in aging are worthy of our highest esteem. We thank him for all he has done and wish him the best as he embarks on his next career.●

A TRIBUTE TO REVEREND ARTHUR JOHNSON

● Mr. LUGAR. Mr. President, I ask my colleagues in the Senate to join me in honoring Rev. Arthur Johnson's 30 years of service and dedication to the Friendship Baptist Church in Indianapolis, IN.

As the pastor for Friendship Baptist Church, Arthur Johnson has displayed the qualities and character of an outstanding leader and contributor to his community. He is demanding, caring, charismatic, visionary, and most importantly, a man of God.

His contributions to the Indiana community are many. Under his guidance and leadership, the Friendship Baptist Church evolved from a small congregation on the city's west side into a major force in the city's spiritual community that has helped to build homes, a factory, a day care center, and much more.

Reverend Johnson has shown an unerring ability to motivate others by capturing their enthusiasm and harnessing it for the betterment of society. His leadership and commitment to his fellow man have been a testament to his strength of character as well as a beacon of hope to the city of Indianapolis.

Upon his retirement from the Indianapolis Community Action Against Poverty, many felt that the city would lose a great leader. Yet, Arthur Johnson has continued his efforts to better the lot of his fellow man.

Friendship Missionary Baptist was blessed with the arrival of this religious giant 30-years ago; Arthur Johnson has truly made a difference.

I ask my fellow colleagues to join me in commending Reverend Johnson.●

MILWAUKEE'S KIM WAGNER: READING TO SUCCEED

● Mr. KASTEN. Mr. President: Imagine for a moment the utter confusion and freezing fear that paralyzes a young job seeker when his potential employer asks him to "fill out this application" and the youngster can't read a word of it.

Imagine the anguish of a high school dropout, sent to a nearby grocery store to pick up a few things for a sick neighbor, who can't read the list of items and doesn't know how to use a telephone to call and ask.

Imagine for a moment the quality of life experienced by the illiterate.

It is a life of frustration, a life of humiliation, a life of fear.

Recent statistics indicate that up to one-third of the adult population—perhaps 60 million men and women in America—cannot read the front page of a newspaper.

Perhaps 20 percent of adults are functionally illiterate—that is, they cannot read or write or compute with skills sufficient to function in our society.

And, as many as 13 percent of U.S. high school graduates fail to achieve reading and writing competence beyond the sixth-grade level.

Mr. President, illiteracy is a fearful disease that could undermine the foundation of our society. It is a disease in need of a cure, and that cure is coming in many forms.

There is, of course, the heightened awareness of dangerous failings in our secondary education system, failings outlined in the recent publication, "A Nation At Risk."

School districts across America are tightening up on academic requirements. State governors and legislatures are including adult literacy programs in their appropriations processes.

And, private employers are mobilizing their resources to increase employee literacy in ways that are consistent with their own needs and the needs of a competitive world market.

Mr. President, it is with great personal pleasure that I today bring to your attention a program developed by a private corporation for children in grades 3 through 8 to emphasize the joys of reading and the importance of good reading skills.

I also am personally proud to announce that a Wisconsin school girl has combined her love of reading with her artistic skills to become one of six winners in a nationwide contest sponsored as part of that program.

The Read to Succeed Program was created by Six Flags Corp. to encourage leisure time reading by young people. Open to all schools and libraries located within a 100-mile radius of the nine Six Flag amusement parks across the United States, the program is composed of three parts.

The first part, called reading as an adventure, teaches youngsters that there are books on every subject imaginable—including subjects each participating child is personally interested in, be it baseball, music, history, or the Hardy Boys.

The second part teaches children how to use the library. Libraries become something more than huge, strange smelling places where people aren't supposed to talk. Libraries become wonderlands—the passage to

unknown peoples and places and things.

The third part ncourages young people to share their love for books in groups. They learn the special joy of sharing a beloved book with family and friends, the joy of discussing what they've learned through reading.

The first Read to Succeed Program, which ran during this academic year, just concluded with a national contest in which 12,000 participating students were challenged to prepare an advertisement for their favorite book. Six winners were selected, one for each grade from grade 3 to 8.

Kim Wagner, a seventh grader at Milwaukee's St. Augustine School, won for her poster based on the book "Revenge of the Ninja."

Kim, the 13 year-old daughter of Mr. and Mrs. Kenneth Wagner, and her teacher, Sister Mary Jeanne Ansel, were in Washington last weekend to be honored by Six Flags for their achievement. While here, the six national winners visited the Library of Congress, the Center for the Book, and several children's bookstores.

A luncheon in their honor was held in the Russell Office Building last Friday, and I'm delighted that I was able to meet Kim, her parents, and teacher at that luncheon and to find out what a talented and special girl Kim is.

Mr. President, Kim Wagner's achievement is special, because it shows that at a young age she is enthusiastic about the adventure of reading and has the innate ability to capture her enthusiasm in art.

I share the pride of her parents, and of her school, which, by the way, also produced an honorable mention winner—seventh grader Sarah Sielan.

I applaud Six Flags Corporation for its commitment to encourage reading in young Americans.

And I use this opportunity to commend Kim and Sarah on their love for reading and to encourage all young people to follow their example.

Their lives, and ours, are enriched because they have discovered the wonders of books and have achieved the skills that will allow them to succeed through reading all of their lives.●

WISCONSIN BUSINESSMAN BUILDS HIS OWN FUTURE

● Mr. KASTEN. Mr. President, a plentiful supply of jobs for American workers is a No. 1 concern of every Member of this body.

Every vote we make, every stand we take on every issue is in some way colored by our concern that America's workers be kept on the job and that there be continued growth in job opportunities.

America is the land of opportunity. More Americans are working today than at any time in our national history. And a majority of those jobs are developing not in huge factories, not in government bureaucracies, but in small businesses.

Mr. President, two out of every three new jobs created in the United States during the last decade have been created by small business operators. In just the last 3 years, almost 2 million new businesses were incorporated.

In the past 20 years, small businesses have generated more than 20 million new jobs.

Those jobs are a direct growth of the American entrepreneurial spirit. Behind those 2 million new businesses stand men and women who were willing to risk their time, their energy, and their money in an uncertain enterprise.

Not every budding entrepreneur succeeds. More than half of the new starts in business fail within the first 5 years of operation. But American business history is highlighted by entrepreneurs who came back after initial defeats to establish burgeoning businesses.

In its first year, American Express sold only $9,000 worth of travelers' checks. Gillette sold only 51 razors and 168 blades in his first year; and Henry Ford's first two automobile companies went bankrupt before he put together the company we know today.

The entreprenuerial spirit that soared in those successful ventures continues to fly today. My home State of Wisconsin claims many successful native entrepreneurs—Ron Simek of Medford, who started the highly successful Tombstone Pizza Corp., as a sideline for his local bar; and Dale Smith, who began selling chili from the backroom of his gas station in Green Bay and who today markets that highly popular, tangily tasty product.

This is Small Business Week, Mr. President, and today I call your attention to another Wisconsin entrepreneur who tonight will be honored as the Badger State's Small Businessman of the Year.

Bob Endries doesn't hail from Milwaukee, Madison, Racine, or Oshkosh, those big cities of familiar sounding names. He's a native of Brillion, a town of some 2,900 residents in the northeast corner of Calumet County in east central Wisconsin.

The closest big city is Appleton, 26 miles west near the north shore of Lake Winnebago. But Bob Endries didn't found his business in the big city. He founded it in the basement of his Brillion house.

And in 16 years, he has expanded that two-person, husband-and-wife business into a 250-employee national distributor of fasteners—the nuts, bolts, and screws that keep our automobiles and other machines together.

Bob Endries is a true entrepreneur. In June 1970, while working as an automobile parts salesman, he recognized an industry-wide need for fasteners. So he and his wife, Pat, took the big gamble, borrowed $5,000 and began their own fastener business.

Today, Endries Fastener & Supply Co. handles in excess of $17 million in sales each year.

Mr. Endries selection as Wisconsin's Small Businessman of the Year comes as no surprise to those who know him. In addition to providing so many jobs for his hometown residents, he also is a community leader in other ways.

Mr. Endries is past president of his church council; he is a Little League coach and a Boy Scoutmaster. And he is a concerned and respected business operator who is on a first-name basis with all of his employees, whom he regards as the managers of the business.

Mr. Endries was selected as Wisconsin's Businessman of the Year by a committee composed of representatives from the U.S. Small Business Administration, Wisconsin Manufacturers and Commerce, the National Federation of Independent Business, and the Wisconsin Chamber of Commerce Executive Association.

I commend the committee on its choice, and I congratulate Mr. Endries on the success of his business and his commitment to the people of Brillion and Wisconsin's small business community.

Mr. Endries is an example of the best of America's entrepreneurial spirit. It is because of men like him that America continues to lead the world as a home for opportunity and success.

Mr. President, I ask that the attached article from the Milwaukee Journal be included in the RECORD.

The article follows:

FROM OPPORTUNITY TO SUCCESS—EXTRA EFFORT HELPED ENDRIES WIN STATE AWARD

(By Cathy Torke)

BRILLION, WIS.—In June 1970, Bob Endries, an automobile parts salesman, saw an opportunity in the fastener supply market—the assorted screws, washers, nuts and bolts that are the underpinnings of the auto trade.

With a burning desire to "build something," Endries quit his job and he and his wife Pat borrowed $5,000. He begin working out of his basement in Brillion, a community of 3,000 that is 26 miles east of Appleton.

From that one-man operation, Endries Fastener & Supply Inc., grew to sales of $17 million. And Endries, now 47 and president of the company, last month was named Wisconsin 1986 Small Business Person of the year.

He was chosen from a group of 23 nominees. The selection committee included representatives from the United States Small Business Administration, Wisconsin Manufacturers and Commerce, the National Federation of Independent Business and the Wisconsin Chamber of Commerce Executive Association.

"Generally four or five nominees, all of whom are nominated by outsiders, will emerge as top candidates. Bob Endries was one of them this year," according to Curt Charter, district director of the SBA and a member of the selection committee.

In making the selection, Charter said, the committee recognized Endries' community contributions as a Little League coach, Boy Scoutmaster, and past-president of his church council who regularly brings communion to shut-Ins.

That, "coupled with the fact that Endries Fastener maintained steady growth through the recessionary period of 1981–'84, put Endries at the top of the list," Charter said.

Endries Fastener is the fourth-largest distributor of fasteners in the United States. Projected sales for 1986 are over $20 million.

Endries' customers include many of Wisconsin's largest industries and equipment manufacturers. Among them are the Kohler Co., Mercury Marine, John Deere and the Manitowoc Co.

John Donovan, senior buyer for Mercury Marine's Fond du Lac plant, said: "When we're having a problem and we need a fastener part that they don't have, Endries will go out of their way to find a source for it."

An inventory of more than than 24,000 items allows Endries to process most orders within 24 hours. The company maintains its own transportation fleet for local deliveries and offers phone-in and pick-up service 24 hours a day.

As recently as 1974 there were only 10 employes; now there are 250. When the company's growth necessitated hiring employes, Endries used a recruitment method possible only in a small town.

He said: "I virtually drove up and down the streets of Brillion and looked at every house and said, 'That would make a good employe.' And I called people who never even asked me for a job and asked them to work for me."

Endries is on a first-name basis with each of the Brillion employes and visits all three shifts regularly. In his monthly "Meet the Press" conferences, six different employes get the chance to tell Endries what's on their minds.

"They know they can ask me anything," he said. Endries said he has a "total open-door policy" as a means of employe involvement.

"I'd like to see the day when we don't need managers," Endries said. "It's silly to have managers. They're like baby sitters. Employes don't need baby sitters."

The youngest of four children whose parents divorced when he was 10, Endries, a Brillion native, had "no family life to speak of and no formal training grounds to expose me to the proper way to do things."

Though he claims he is "no scholar," Endries had to develop good study habits to help him adapt to his fast-growing business. "And I do mean study," he said.

"I'm a strong believer in self-learning, in reading, in listening to learn how to better handle my responsibilities in business," Endries said.

Receiving the Wisconsin 1986 Small Business Person of the Year award was gratifying for two reasons according to Endries.

"It brings recognition to the family-owned business, which is the backbone of our free enterprise system," Endries said. "And the award also helps our employes feel that honesty, integrity and a job well done—values that we hold dear—are noticeable to other people in business."

Nomination and selection for the award are based on eight criteria: staying power, growth in number of employes, increase in sales volume, financial condition of the company, innovativeness of product or service offered, response to adversity, contribution to the community and demonstrated iniative in the national interest.

The national Small Business Person of the Year will be announced in Washington, DC, this week during Small Business Week.●

FIRST ANNIVERSARY OF RADIO MARTI

● Mr. CHILES. Mr. President, today marks the 84th anniversary of Cuba's independence from Spain and the first anniversary of the broadcasts of Radio Marti.

We can all be proud that during its first year, Radio Marti has proven to be an effective and reliable voice. It offers the Cuban people a freedom denied far too long; the freedom that comes from hearing the truth. Radio Marti provides the Cuban people an inalienable right—the right to the free flow of information and the common exchange of ideas. Nothing is more threatening to totalitarian governments than the free flow of information. However, nothing could be more menacing to democracy than complacency toward such basic principles as free speech.

To ignore the misinformation prevalent in Cuban society only perpetuates the harm done to the Cuban people by their own government. Radio Marti has shed light where the intent of the government was to keep its people in the dark. It has corrected the inconsistencies, pointed out the discrepancies and uncovered the lies of the Cuban government. Among the stories presented on Radio Marti were:

The attempted kidnapping by Cuban Embassy staff in Madrid of a high ranking defector and a subsequent 2-hour interview with the defector.

Coverage of Castro's decision to cancel an immigration agreement with the United States due to Radio Marti initiating its broadcasts.

The establishment of "Family Bridge," a program permitting Cuban-Americans to communicate over the air with their isolated relatives in Cuba.

The true story of the liberation of Grenada.

A detailed analysis of the ongoing Angolan struggle where 40,000 Cubans are stationed, an amount equivalent to 800,000 U.S. troops on a proportionate basis.

Coverage of the Third Party Congress of the Cuban Communist Party.

The rebuff by Latin leaders of Castro's effort to form a Latin American debtors cartel.

This list, taken from the annual report of the Advisory Board for the Broadcasting to Cuba, gives an idea of the kind of programming coming out of Radio Marti. Over the past year this radio station has aired stories which never would have been provided the Cuban people had it been left up to their government. They have a right to this information.

It is important that we continue to provide Cubans with this reliable voice. We must never forego the opportunity to use the power of truth against deception—the deception inherent in the closed society of Fidel Castro.

On this first anniversary of the Radio Marti broadcasts, I would like to commend the leadership and staff of Radio Marti. Their dedication and professionalism are to be admired by all.●

YURI ORLOV

● Mr. D'AMATO. Mr. President, I rise today to draw attention to the continuing plight of Yuri Orlov, a founding member of the Moscow Helsinki Group, and its first chairman. The group, organized by 11 Soviet human rights advocates, was established on May 12, 1976. The primary purpose of the Moscow Group was to promote human rights in the U.S.S.R. and monitor Soviet violations of the Helsinki Final Act.

Soviet authorities have arrested, detained, imprisoned, and exiled members of the group, including Orlov. These harsh reprisals underscore Soviet contempt for the concept of human rights and for those who speak out in support of human rights. In addition, they highlight Soviet disregard for their human rights commitments, especially those included in the Helsinki Final Act, which they have voluntarily accepted.

Mr. President, as Chairman of the Commission on Security and Cooperation in Europe, I commend the efforts of Yuri Orlov and his colleagues who have paid dearly for their work on behalf of those denied even the most basic human rights.

I ask that the attached biographical information be printed in the RECORD.

The information follows:

YURI FYODOROVICH ORLOV

A veteran of World War II and a graduate in physics from Moscow State University, Orlov was a member of the Communist Party of the Soviet Union and worked at the prestigious Institute of Theoretical and Experimental Physics of the Soviet Academy of Sciences until 1956. He was then expelled from the party and dismissed from his job for speaking out at a party meeting. He moved to Armenia and there obtained his doctoral degree in physics, becoming a Corresponding Member of the Armenian Academy of Sciences in 1968. Orlov returned to Moscow and was once again dismissed from his job in 1972. Following a 1973 letter in defense of Academician A.D. Sakharov, Orlov lost his post at the Institute of Theoretical and Experimental Physics in 1974 and has not worked in his profession since.

In the years from 1974 to 1976, Orlov was active in the defense of political prisoners in the USSR, signing the "Moscow Appeal": on behalf of Aleksandr Solzhenitsyn, participating in the first Unofficial International

Scientific Seminar (organized by Jewish refusenik scientists) and campaigning vigorously for the release of Leonid Plyusch, the Ukrainian cyberneticist imprisoned in a psychiatric hospital. In September 1974, Orlov became a founding member of the Moscow chapter of Amnesty International. Besides working to free fellow Amnesty members Sergei Kovalev and Andrei Tverdokhlebov after their arrests, Orlov also devoted much time to the prisoners of conscience and torture victims in Spain, Sri Lanka, Yugoslavia and Uruguay.

Orlov announced the formation of the Moscow Helsinki Group on May 12, 1976 and assumed the chairmanship. After a search and numerous interrogations in early 1977 and a vituperative campaign against him in the Soviet press, Orlov was arrested on February 10, 1977. While he was awaiting trial, the Norwegian Parliament nominated him for the 1978 Nobel Peace Prize. Orlov's case finally came to court in May 1978. On May 18, 1978, Orlov received the maximum penalty under Article 70, "anti-Soviet agitation and propaganda"—7 years in strict-regimen camp plus 5 years of internal exile.

Since his imprisonment, Orlov has been subjected to long periods of solitary confinement and denied visits from his wife. He has conducted numerous hunger strikes to protest interference with his mail and other forms of harassment. In ill health, Orlov has also been subjected to beatings by fellow prisoners. In 1982, Orlov's wife, Irina, wrote a personal appeal to President Brezhnev asking for consideration of her husband's release on humanitarian grounds; she also appealed to President Andropov. No response was received.

In February 1984, Orlov was released from labor camp to begin his term of internal exile in Yakutsk, in northern Siberia. He lives alone in an isolated and primitive hut. Orlov's health has further deteriorated in his place of exile. He has been denied access to proper medical treatment; he suffers from cystitis, nephritis, prostitis and the effect of an old skull injury. Since October 1984, he has not been allowed to receive mail or telephone calls from the West. On April 21, 1985, Orlov was attacked by two men. Although he was not seriously injured, the incident is only one of many types of harassment which Orlov undergoes.●

TENTH ANNUAL YAM DAY

● Mr. LONG. The golden sunshine of spring calls to mind that most nutritious of foods—the delicious golden yam. Today, May 20, 1986, we are observing the 10th annual "Yam Day," to celebrate the flavor and nutritional value of this excellent vegetable.

Our Nation is enjoying an upsurge of attention to our health and physical condition. We've learned that the kinds and amounts of food we eat can have a definite effect on our well being.

In fact, the National Academy of Sciences recently came up with a number of suggestions on how our diet affects our susceptibility to several diseases, including cancer. One of the recommendations was that we eat more fruits and vegetables rich in vitamin A and C.

These new facts make annual "Yam Day," with its goal of encouraging greater consumption of the Nation's sweet potatoes, even more worthwhile. One sweet potato proudly claims 9,230 units of vitamin A, a greater portion than almost any other comparable food.

The yam is a natural way to satisfy our sweet tooth without adding sugar, and without gaining weight. A medium-sized sweet potato adds only 82 calories to a meal.

Bake them, mash them, candy them, or eat them for an occasional treat. Sweet potatoes are especially good with poultry and pork, and don't forget that Southern favorite, sweet potato pie.

Because we have such a plentiful yam harvest, the Government uses large amounts of sweet potatoes in its food programs for the military and for schoolchildren. Since a major concern of these programs is to provide foods with a high nutritional value and a tasty flavor, the Louisiana yam is custom made. Yams have three great characteristics that make them ideal for Government feeding programs: They are extremely nutritious, they are very very versatile and can be prepared in many different ways, and they have a natural sweet taste that people—especially children—enjoy.

I encourage the U.S. Department of Agriculture and the Department of Defense to continue and increase their purchases of sweet potatoes, and hope that purchasing decisions will be made as early as possible to assist production planning.●

PHILIPPINE AMBASSADOR EMMANUEL N. PELAEZ

● Mr. KENNEDY. Mr. President, last Thursday I had the pleasure of meeting with the new Philippine Ambassador Emmanuel Pelaez. My sister Eunice Shriver happened to be with me and our conversation began with Ambassador Pelaez reminiscing about a meeting he attended on the Peace Corps 25 years ago as Vice President of the Philippines which Sargeant Shriver also was attending. Throughout his public service to the Philippines—which has spanned 40 years—Ambassador Pelaez has retained his commitment to those values embodied by the Peace Corps. His dedication to justice and democracy has never waivered over the years—whether it involved opposing the Marcos coconut monopoly or exposing corruption and kickbacks among the Philippine politicians. His stance against corruption nearly cost him his life 4 years ago.

I think I speak for the entire Senate and indeed for all Americans, in extending a warm welcome to our newest Ambassador in Washington. I look forward to working with him over the years as the Philippine Government strives to overcome the obstacles to preserving its new democracy and to restoring economic vitality to its country.

I would like to call to the attention of my colleagues a recent article in the Washington Post featuring Ambassador Pelaez. The article provides an interesting account of the history behind the new Philippine Ambassador. I ask that this insightful article may be placed in the RECORD.

The article follows:

[From the Washington Post, May 14, 1986]

TRIALS OF AQUINO'S MAN IN WASHINGTON

(By Myra MacPherson)

"It was about 11 o'clock. I was coming home from a dinner along, with my driver. A car in back of us started firing. There were two gunman. One pulled out my driver and finished him off. The other went to the right side of the car and fired . . .

"Five bullets entered my back. One broke five ribs. One was half a centimeter to the left of my spine; another was two centimeters to the right. And one bullet hit my left elbow"—there is a pause, a half-smile and a palms-up gesture of thanks to God or fate or whatever—"and I survived!"

The man proffers coffee from a silver urn on the gleaming table in his Massachusetts Avenue office.

His assailants were never found. "I had bodyguards after that." A wise smile crosses his face. "Supplied by the palace of Marcos."

The new Philippine ambassador, Emmanuel N. Pelaez, views life with soft humor and the slight detachment born of surviving many political winds in his 71 years. He looks and acts astonishingly youthful, with thick gray and brown hair, and face less lined than that of someone a decade younger. As he moves quickly about the Philippine Embassy, wearing brown loafers and a pale tan suit, there is no sign of the pounding his body took from bullets four years ago. Or the more than six months it took him to recuperate.

Palaez was once a lonely voice in the Philippine general assembly, denouncing Marcos' coconut monopoly, which taxed the small coconut planters. His colleagues, he says, were "either scared or benefitted from the monopoly. This money was put into a kitty and disposed of by the president's cronies. And there would be no accounting. The coconut producers would lose about 30 percent of their crops' real value—a terrific drain from the economy in rural areas," where many such farmers were living in poverty even before enactment of the tax. The levy brought in something like $1 billion dollars.

The night Pelaez was shot, he says, he had just returned from helping an exporter load 5,000 tons of coconuts bought from farmers at a higher price than the Marcos monopoly was paying them. "That was 1 million pesos, which otherwise would have been lost to the small people." The attempt to assassinate him came about "apparently because they say this challenge—whoever they were."

Pelaez had been a distinguished lawyer and assemblyman before Marcos declared martial law and abolished the Senate in 1972. Six years later, "when Marcos decided to restore the legislative arm, he called us former senators and told us it was going to be a brand-new assembly." He appealed to Pelaez and others, saying he needed them to

help guide it. "So I ran—only to find that he gave control to his own henchmen."

But Pelaez had not initially opposed Marcos, "Manila was beginning to be known as a Wild West city, and he restored peace and order," he says, "They collected something like 650,000 pieces of firearms. There would be boxes placed at strategic spots and people surrendered them."

Pelaez laughs at the "austerity" of the early Marcos regime when the slogan was "National Discipline for Progress." Later, "we knew that this was the most corrupt regime. But—my God," says Pelaez, in a whisper, "the extent!" The millions of dollars, the thousands of pairs of shoes, the jewelry and the billions in real estate, wealth far more vast than anyone would need, Pelaez says, were the product of "insatiable greed coupled with perpetual adolescence." Marcos and his wife Imelda, he says, "believed above all else that economic affluence had political power. They always bought their way in."

Still, Pelaez seems to admire Imelda Marcos' chutzpah. The Philippines "had a very unpleasant time" with Libya in 1976, "when Libyan money was funding unrest among Philippine Moslems. What Imelda did was go directly to Qaddafi." Pelaez chuckles, "She was effective."

"She waited for hours to see Qaddafi. And then when she learned that Qaddafi's father still lived in a tent, literally, in the desert, she went with her whole entourage and engaged the old man in conversation, gave him gifts. And this touched the old man." His present boss, Corazon Aquino, would be above that sort of manipulation, he says.

Pelaez's grandfather was an early settler of Mindanao, and in 1870 "literally cut down the forests and started planting coconuts." His father was also a coconut planter, but from childhood, Pelaez planned to be a lawyer.

"You have to go back to the Spanish period. All those years were punctuated by rebellions. We managed to overthrow the Spaniards. By a quirk of fate"—the Spanish-American War—"we had the Americans there, sitting in the boats. The Spaniards would not surrender to the Filipinos; they engineered a fake battle in which they surrendered to the Americans."

"I compare the United States to a golfer that sends his ball into the sand trap and then recovers beautifully. The military administration [of Theodore Roosevelt] was replaced by a civilian administration, headed by William Howard Taft." Pelaez says his name almost reverently. "He laid down the foundation of the Philippine government and brought the young American teachers who became the backbone of the Philippine education system."

A proud, colonized people, used to racial subjugation, the Filipinos found that under the Americans "we could talk our heads off—as long as we didn't take up arms." His generation was "born in an environment of freedom" and by 1935, the Philippines was a commonwealth, similar to Puerto Rico. "As a result, when the Japanese came, we fought on your side." Pelaez became a lawyer because "the heroes of my youth were the leaders of the lobby that used to come to the United States and plead for Philippine independence, and in my view you had to be a lawyer in order to argue successfully." The independence movement never turned to violence in any strength because the United States "always held out the hope that this could be settled peacefully. And it was." The Philippines gained independence in 1945.

After World War II, Pelaez made a colorful entry into politics in the case of the "postliberation beer scandal." When the Japanese surrendered, the United States had a huge stockpile of food and materials that were simply transferred to the Philippine government without any assessment or accounting.

"Among the stockpiles was a very big stock of beer . . . in the hundreds of thousands of cases. The Senate president connived with a Chinese merchant and manipulated things so as to award this huge stockpile of beer to the Chinese." The Senate president became very rich in kickbacks. "I was called to become counselor of the committee that investigated." As a result of the investigation, the Senate president was found guilty and deposed—and Pelaez was swept into elective office as an assemblyman.

Today he is pushing for yet another recovery of goods—those taken by Marcos. "There is no question morally," he says, that there should be a mandatory return, but Pelaez recognizes the slow necessity of "due process."

Pelaez was "comfortable in retirement" when Corazon Aquino appealed to him in her fight against Marcos. His private life was rich; a 47-year marriage, nine children and 29 grandchildren.

One night during the Aquino campaign, Pelaez met Aquino at a party. "She said she was drawing up a list of advisers and there was one person missing, and that was me. She asked me to join. So I campaigned actively for her."

The government is settling into its new, raw stage of running a problem-plagued country with many unemployed. Gone are the cheering mobs of millions, the election where people risked death to vote, the victory that moved the world. Pelaez, asked if he is sanguine about the future, says: "Sanguine, no. There are a lot of problems. But possible, yes. In all modesty, we know we can't get out of this hole by ourselves."

For 30 years, Pelaez has been in on negotiations to settle the thorny problem of U.S. bases in the Philippines. He allows himself to speak as drily and pointedly as the ambassador in him will allow. "It used to be 'American bases' but there has been a change in nomenclature. Now they are 'Philippine bases'—on which 'American facilities' are placed.

"The Pentagon now has a proposal to spend a million and a half dollars on housing for servicemen on both bases. The materials would come from the U.S., prefab. But we could build those homes for much less—and it would create so many jobs for Filipinos."

Pelaez has brought this up with authorities in the State Department and the Pentagon. What does he think will happen?

The sigh sounds negative, but the answer is again a guarded ambassadorial one.

"I don't know," says the 71-year-old survivor of Philippine and American politics. "I'm new on the job."●

SDI AND MADNESS

● Mr. QUAYLE. Mr. President, the Indianapolis Star recently ran an editorial on the President's strategic defense initiative that makes a rather important point concerning our existing nuclear strategy. As the editorial points out, we assume that so long as our forces can retaliate against a Soviet nuclear strike, the Soviets will never strike in the first place. What we pay far too little attention to, however, is the Soviets' clear superiority in hard-target kill weapons that could be used to cripple our retaliatory capability. Mutual assured destruction [MAD], in this case, would not be assured.

I believe it is critical that the madness of our current strategy and the need for SDI to assure survival and not extermination [SANE] be more widely understood. I ask that the full text of the Indianapolis Star editorial be in the RECORD.

The editorial follows:

STILL MAD

Debate over proposed creation of a space shield to defend the United States against nuclear attack blazes on as fiercely as ever.

The Soviet Union opposes the idea of a U.S. space shield while proceeding pell-mell with work on a space shield of its own.

The idea of a U.S. space shield is also opposed by the U.S. disarmament lobby, unilateral freezeniks and assorted leftist groups.

Some opponents concentrate on attacking the technology that might be used in space defense. A number of technologies are being considered. No particular one has been chosen for the Strategic Defense Initiative, as it's called officially.

As is always the case with science and technology, new discoveries are continually being made. One of these may prove ideal for a space shield.

That would not silence the U.S. critics or, of course, the Soviet critics either.

Basically, it is not technology that they oppose or the cost, which they always exaggerate. It is the idea of a space shield.

The alternative to a space shield is the Mutual Assured Destruction (MAD) doctrine which became the cornerstone of U.S. nuclear weapons policy in the 1960s.

The basis of MAD is the theory that neither superpower will make a first strike, because of assurance that the answering attack will be strong enough to destroy the first nation's war-making ability. MAD rules out defense.

U.S. intelligence estimates the USSR has 12,000 to 15,000 nuclear warheads while the United States has 10,000 concentrated in some 4,000 targets, making them quite vulnerable to pre-emptive strike. So U.S. retaliatory capacity could be crippled. Mutual destruction is not assured.

Suppose it were. What consolation is there in MAD?

Our goal should be SANE: Survival and Not Extermination.●

SOUTH KOREA

● Mr. SIMON. Mr. President, one of the most active and most thoughtful Members of this Congress is the distinguished Member from the House of Representatives, STEPHEN J. SOLARZ.

Recently, he had an article in the Washngton Post commenting on the situation in South Korea.

He chairs the House Subcommittee on Asian and Pacific Affairs but, much

more important than that, he has been a frequent visitor to that area of the world and, I have learned through the years, has a balanced, sensible approach to most of these issues.

In case some of my colleagues did not see the original article, I ask that it be inserted in the RECORD.

I would add that up to now the U.S. Ambassador to South Korea has not visited Kim Dae Jung, the person who is, in fact, the real leader of the opposition forces, the person who has risked a great deal to try and bring democracy back to South Korea.

I hope we will have a more positive, constructive impact on South Korea in the future.

It is a great country with a great people, with much potential. They will not achieve that potential if they do not move in the direction of having the freedom that the peopple of South Korea so desperately want.

The article follows.

AFTER MANILA, IS SEOUL NEXT?

(By Stephen J. Solarz)

Will the recent miracle in Manila be repeated on the streets of Seoul? Tens of thousands of Koreans have come out for rallies in support of constitutional revision in recent weeks. For now the government is permitting these peaceful demonstrations to go forward, yet it has also issued dire warnings of a crackdown if the rallies degenerate into what the regime elastically defines as disorder. The stage is being set for a showdown between the forces of authoritarianism and the partisans of pluralism.

This Korean exercise in "people power" could end in a new birth of freedom or in a replay of repression. There are some fundamental differences between Philippine and Korean societies. But in both, there has been a broad yearning for a peaceful transition from dictatorship to democracy.

Moreover, the internal political dynamics of the Philippines and South Korea have significant implications for the security of the United States. In the Philippines, the New People's Army, whose rise was fueled by the corrupt practices and repressive policies of the Marcos regime, threatened continued American access to our military facilities at Clark Field and Subic Bay. Widespread political instability in South Korea, which could easily occur if the government tries to supress the opposition, might lead Kim Il Sung to miscalculate that the moment had come to reunify the peninsula under communist control. With 40,000 American troops stationed in Korea and a mutual defense treaty between Washington and Seoul, the United States would inevitably be involved were another war to break out.

The most effective way for the United States to safeguard its interest in stability in South Korea is the same way it has sought to forestall communism in the Philippines—by promoting democracy. With 850,000 North Korean troops deployed offensively just north of the demilitarized zone, it would be imprudent for the United States to threaten the withdrawal of our troops or a reduction in military assistance in an effort to induce more rapid progress toward democracy. Such a strategy might well end up doing more to diminish deterrence than to promote pluralism. But the U.S. government should make clear its preference for accelerated progress toward genuine democracy, especially with respect to the elections in 1988 that will pick a successor to President Chun Du Hwan, and work to facilitate a reconciliation of the contending political forces.

There are, to be sure, indisputable differences between South Korea today and the Philippines under Marcos. Politically, Marcos tried to hold on until the bitter end, while President Chun has repeatedly pledged to step down in early 1988. Economically, the Philippines under Marcos became a basket case, while South Korea is an economic showcase that enjoys rapid growth and a relatively equitable distribution of income. Historically, the Philippines was bequeathed a legacy of democratic values by the United States, while Korea was ruled for centuries by a rigid Confucian imperial state and for decades by Japanese colonialists. Religiously, the Philippine Catholic church accounts for 85 percent of the population, while in Korea, Christians of all sorts are only 20 percent of the population.

Yet there are some striking political similarities as well: South Korea is, and the Philippines was, an authoritarian regime prone to widespread human-rights abuses. There are numerous reports of torture in Korea, just as there were many "salvagings"—summary executions—in the Philippines. There were hundreds of political prisoners in the Philippines, just as there are numerous political prisoners in Korea.

In both regimes, the military and security agencies provided the principal bases of governmental support, keeping the ruling elite in power and suppressing the desire of democracy among the people.

Marcos suffered and Chun suffers from a significant absence of legitimacy. Marcos by the end was largely bereft of support. Chun hurt his chances for legitimacy by securing power through a coup and then putting down an uprising with excessive violence.

In both countries, an organized opposition emerged to mobilize and project a nationwide demand for democracy. The disaffection in South Korea has not yet gone as far as it did in the Philippines. But it has advanced considerably, and many observers believe that the opposition would win a free and fair election—which may be why the government seems unwilling to permit it.

In addition to these political similarities, the drive for democracy in South Korea is fueled by some of the very social and economic factors that make it different from the Philippines. Precisely because of Korea's economic miracle, there is now a large middle class that wants a share of political power. The Korean population is one of the world's youngest—75 percent are under the age of 35—and best educated, with a literacy rate of almost 100 percent. As a result, Koreans are less and less willing to tolerate self-appointed rulers.

Although the church is not as important in Korea as in the Philippines, it is still significant: the homilies of Cardinal Stephen Kim, who has been an eloquent spokesman for human rights, serve as a moral barometer for the society as a whole.

It should be no surprise, therefore, that the government and opposition in Korea are on a collision course. The focus of their conflict is how the 1988 presidential elections should be conducted. Their argument is over who, in effect, will pick the successor to President Chun Du Hwan—the military elite or the people of the country.

The current constitution, on which little debate was allowed at the time of its adoption, mandates indirect elections through an electoral college, presumably to minimize disorder. The democratic opposition, convinced that this is merely a facade to legitimize a candidate who will protect the military's interests and ensure nothing more than Chunism without Chun, has mounted a campaign for direct elections.

This struggle over electoral arrangements is more than a scholastic debate. The very nature of the Korean political system is at stake. If the Korean people are given a genuine chance to pick the next president, the fundamentals of democracy—freedom of speech, of assembly, and of the press—will probably follow.

What are the interests of the United States in this delicate situation? We have a vital stake in deterring North Korea from attacking the South, and stability in the South is one element of deterrence. Yet stability is more likely to be guaranteed by democracy than by repression, which only increases popular resentment and dissatisfaction.

Not even the Korean opposition is asking the United States to withdraw our troops or cut military aid pending the establishment of democracy. Much as they want democracy, they also want peace. Both opposition leaders Kim Dae Jung and Kim Young Sam recognize that our forces and aid contribute to deterrence.

What we should do is use our influence to make clear where the United States government—both the executive branch and Congress—stands on Korea's political evolution. It is not our place to express a preference for direct or indirect elections, much less to favor one candidate over another. What is appropriate is that we state unequivocally our conviction that the Korean election system be designed to ensure that the choice for the next president reflects the wishes of the Korean people.

American interest would best be served, and a political disaster in Korea avoided, by a compromise in which both the government and the opposition give up some of what they seek for the sake of progress and stability. The key is an agreement on an election framework—direct or indirect—in which both sides have confidence that the will of the people will be respected, and that whoever wins will respect the personal security of the loser. If that confidence exists, procedure formulas will be relatively easy to devise.

For a compromise to have a chance, the two sides must begin talking to each other at the highest level. Even if a direct dialogue is not initially feasible, there are potential intermediaries, such as the Catholic Church or the U.S. embassy.

Like the Philippines, South Korea is an example of a country where we can more effectively protect our strategic interests by promoting our political values.

NAUM AND INNA MEIMAN: LET THEM GO

● Mr. SIMON. Mr. President, Naum and Inna Meiman are representatives of the modern day story of Passover. The Meimans, like the Jews who were slaves to Pharaoh, are being held captive against their will in the Soviet Union.

The Meimans applied to emigrate to the land of their ancestors, Israel. The Soviets allow Armenians to live in Ar-

menia, Lithuanians to live in Lithuania. Why don't they allow Jews to live in their homeland—Israel?

Inna is cancer-ridden and desperately needs treatment available to her in the West. Naum is an elderly man who has been through 10 years of torment, threats, and harassment by the Soviet Government.

I strongly urge the Soviets to allow the Meimans to emigrate to Israel.●

WALTER M. McMURTRY, JR., RETIRES

● Mr. LEVIN. Mr. President, after 19 years of dedicated service, Walter M. McMurtry, Jr., is retiring from the presidency of the Inner City Business Improvement Forum in Detroit today.

Walt is one of the founders of ICBIF. He served as executive director from 1967–71, and as president since 1971. Under his leadership ICBIF has grown to be one of the largest minority business development corporations in the United States.

ICBIF, a community-based organization, was founded after Detroit's 1967 civil disorders to provide financial, managerial, and technical assistance to minority businesses and businesspersons. It also assists majority companies by providing information and contact with minority suppliers.

Under Walt's leadership, ICBIF has given assistance to more than 3,200 minority businesses, secured loans totaling more than $63 million, helped institute corporate and governmental minority business purchasing programs, and been instrumental in the formation of other leading organizations involved in minority economic development.

A director of several venture capital firms and private companies, Walt McMurtry has served on numerous Federal, State, and city commissions. He was a commissioner on the Small Business Administration's Black Economic Development Council from 1968–70, and a member of the SBA's National Advisory Council to Small Business Investment Corporations in 1977.

Walt has willingly given of his time and talent to the Boys Scouts of America, the NAACP, the Detroit Urban League, Lewis Business College, the Hispanic Business Alliance, and countless other organizations and associations. His leadership and participation within the community have made a difference. His expertise and example have guided educators and entrepreneurs. His dedication has been the driving force that has made many dreams realities.

I congratulate Walt McMurtry on this happy occasion.●

ALBANY LOSES A GOOD MAN AND TRUE

● Mr. MOYNIHAN. Mr. President, in New York, the city of Albany is the seat of government. In some times, it has been a place of beginnings for Governors and for Presidents. It is there that H.H. Richardson's grand capitol looms high over the Hudson, and a few block away, on Eagle Street, that men like Grover Cleveland, Theodore Roosevelt, Alfred E. Smith, Franklin D. Roosevelt, Herbert H. Lehman, Thomas E. Dewey, Averell Harriman, and Nelson A. Rockefeller have lived and governed the State of New York.

For those men and for some others who came before and after them, government was more than politics; it was an art, an honorable and often noble pursuit.

The speaker of the New York State Assembly, Stanley Fink, is such a man. He has served in the legislature with unequaled strength and distinction for nearly two decades, and is widely credited for forming, out of a fractured party in his chamber, a cohesive and productive majority.

The speaker has not let ambition interfere with his work. Stanley Fink has not used Albany as a springboard to higher office; he has instead used the great influence a speaker can have for the good of his State and his people. And they have respected him—and reelected him for it.

Last week at the capitol, the Speaker announced he would not run again. He will dedicate his time and considerable talents now to the practice of law. This, of course, is his right, or more precisely his due. But for his colleagues in Albany, and for all who know Stanley Fink and his work, we cannot help but wish he might have stayed.

Mr. President, in the days that followed Speaker Fink's announcement, the press spoke with one voice about his time in the assembly and his departure from government. As part of the tribute I mean to pay him today, I ask that articles from the New York Times, Newsday, the New York Daily News, and the New York Post be printed in the RECORD.

I commend these articles to the attention of the Senate today, and in doing so, salute and send my personal thanks and good wishes to Stanley Fink. He will be greatly missed.

The articles follow:

[From the New York Times, May 15, 1986]

ALBANY LOSES A GOOD MAN

Speaker Stanley Fink's decision to leave the Legislature is a stunning blow to New York State's government. An energetic, voluble, determined man who played to win every point, Mr. Fink has since 1979 managed to forge the individualistic members of the Democratic Assembly majority into a unified political force.

Aside from his vigor and personality, Mr. Fink succeeded as legislator and negotiator with the Republican Senate leadership and Governors Carey and Cuomo for a reason unusual in Albany. He is directed by a consistent philosophy of government. He believes that organs of government should not take from the body politic the powers to make decisions directly, whether as jurors, electors of judges or voters in referendums. In his view, government exists to provide services and protections that the people cannot provide for themselves. His realism tells him that no government can accomplish what it should without an active, innovative economy to create wealth.

That so talented a leader now decides to relinquish public office sends a signal. In the present atmosphere of distrust and contempt, pride in government service turns sour, but that alone probably would not have motivated Mr. Fink to leave. A more daunting discouragement might be how hard it is to run for higher office—because campaigning for it cost so much. It will be difficult to find a replacement for Stanley Fink; it will be even harder to make the changes that might have kept him in the high office he has filled so well.

[From the Daily News, May 15, 1986]

FINK WON'T SEEK REELECTION

(By Adam Nagourney and Frank Lombardi)

Stanley Fink, the powerful speaker of the state Assembly, announced yesterday he will not seek reelection in November.

"It is my inner sense that the time has come to move on to new challenges," said Fink, a Brooklyn Democrat, explaining his decision to give up one of the most coveted positions in state government.

For several weeks, Fink, 50, had been hinting that he might bow out of politics and public life to devote more time to his family and pursue a lucrative private law practice.

The speaker is the leader of the 150-member Assembly, which is now controlled by Democrats by a 94 to 56 margin over Republicans. Fink, who has held the post since 1979, often has been as infuential in the adoption of state laws and the budget as Gov. Cuomo, also a Democrat, and Senate Majority Leader Warren Anderson (R-Binghamton).

An Albany fixture since the mid-1960s, Fink was first elected to his Canarsie seat in 1968. Before that he was an Assembly staffer. He rose rapidly in power and seniority by winning reelection every two years and by forming close ties with such mentors as Stanley Steingut, whom Fink succeeded as speaker seven years ago. Steingut, another Brooklyn Democrat, was deposed as speaker when he lost reelection.

The last speaker to give up his post on his own was Anthony Travia, also a Brooklyn Democrat, who resigned in 1968 to become a judge.

Fink's successor won't be chosen until January, after the November election, when all Assembly seats are up for election. But the maneuvering for his post—which pays $43,000 plus a $30,000 "lulu"—has already begun.

FOUR CANDIDATES

The four acknowledged front-runners are: Daniel Walsh, the current majority leader, who is from upstate Olean; Arthur Kremer, the chairman of the Ways and Means Committee, from Long Beach, L.I.; Alan Hevesi, the deputy majority leader, from Queens,

and Melvin Miller of Brooklyn, chairman of the Codes Committee.

Fink said that he intended to stay out of the succession battle because he didn't want to rule "with a hand from the grave."

He did not rule out returning to public life in the future. Fink has long been interested in running for governor.

"I'm leaving open the door," he laughingly told reporters after walking unannounced into the State House press room and making his announcement.

Earlier, Fink had notified Cuomo of his decision, as well as his Assembly colleagues and Anderson.

Confidants said Fink had grown "tired" of his legislative duties and having to divide his time between Brooklyn and Albany for more than six months a year.

For the last two years, Fink has been associated with the Manhattan-based law firm of Bower and Gardner, which specializes in defending doctors in medical malpractice suits.

[From the New York Post, May 15, 1986]

STANLEY FINK: NEW MOUNTAINS TO CLIMB

Assembly Speaker Stanley Fink, one of the most powerful Democrats in New York State, is calling it quits.

"It's time to move on to new challenges . . . to climb some new mountains," says Fink.

Principled and productive, Fink leaves the Assembly better than he found it—more contentious, perhaps, but more open and generally more responsive.

"When I was a young man, I sat in the back rows [of the Assembly] and I wondered about people who stayed to a point where many people thought they should not have stayed," says Fink. "I vowed then I would never permit that to happen to me."

The Speaker is less than generous to himself. He leaves at the height of his power and influence. He will be missed.

[From Newsday, (Long Island, NY), May 18, 1986]

A SPEAKER WHOSE VOICE WILL ECHO IN ALBANY

If tradition is any guide, Assemb. Melvin Miller (D-Brooklyn) is a shoo-in to succeed Stanley Fink as speaker of the Assembly. Every Democratic speaker in the past 50 years—with one brief exception—has been from Brooklyn.

But whether the new speaker turns out to be Miller or one of the other likely candidates—Arthur J. Kremer (D-Long Beach), Alan Hevesi (D-Forest Hills) and Daniel Walsh (D-Franklinville)—or some dark horse, the outspoken, sometimes gruff Fink will be a tough act to follow.

Fink announced last week that he would not seek re-election to the Legislature this year. He has been a member of the Assembly since 1968 and its speaker since 1979. In that capacity, he has been—along with the governor and the Senate majority leader—one of the three most powerful people in Albany.

It was a measure of his success as a legislative leader that both his political allies and his opponents expressed their regret at his decision to abandon politics and go into private law practice.

"It's a huge, huge loss," said Gov. Mario Cuomo, with whom Fink didn't always agree but with whom he worked closely. "I believe he will be ranked as one of the greatest Assembly speakers in the history of that proud legislative chamber."

Fink combined several rare political talents that made him a remarkable legislative leader. Not the least of these were his success in transforming the Assembly's historically fractious Democratic majority into a coherent political force and his skill in negotiating from that power base with his Republican opponents in the State Senate.

Fink's departure will leave an enormous gap in state government. It will not be an easy one to fill.

[From Newsday, Long Island, NY, May 15, 1986]

ASSEMBLY SPEAKER CALLS IT QUITS

(By Miriam Pawel)

ALBANY.—Stanley Fink, the tough Brooklyn Democrat who has ruled the Assembly with a skill and strength that impressed friends and enemies alike, announced yesterday he will not seek re-election.

The end of Fink's eight-year reign as Assembly speaker was greeted with sorrow and even tears by both Assembly Democrats and Republicans, who learned the news from Fink yesterday afternoon.

At the sort of impromptu news conference that has been his hallmark, he said: "It is my inner sense the time has come to move on to new challenges, hopefully climb some new mountains and do some things that I haven't had the opportunity to do heretofore . . . For a democracy to flourish, there has to be a constant influx of new ideas, new enthusiasm and new leadership. For the New York State Assembly, that time has come."

Fink, 50, joined the Manhattan law firm of Bower and Gardner in 1983 and said he plans to practice law. He was first elected to the Assembly in 1968 and has been the longest-tenured Democratic speaker.

Even as they were eulogizing Fink's successes, his colleagues and staff began discussing the succession battle touched off by the news.

Two senior members, Daniel Walsh (D-Franklinville) and Melvin Miller (D-Brooklyn), said they will seek the job; Alan Hevesi (D-Forest Hills) and Arthur J. Kremer (D-Long Beach) are also considered likely contenders.

Democrats said Fink made the announcement to the legislators matter-of-factly, turning away from his colleagues for a minute once or twice to regain his composure. "It was so low-key you wanted to cry," said Miller.

While most Assembly leaders said Fink's announcement would have little impact on the session's unfinished agenda, others said the impending succession battle could create chaos.

"It will add confusion to our activities because about five or six people are pressing their positions, trying to become speaker," said Assemb. John Cochrane (R-Brightwaters), whose Republican conference gave Fink two standing ovations.

Fink warned the Democrats by telling a story about a fishing trip last weekend: his friend, having chased away all but one duck from the rowboat, tried to shoo away the last stray, which turned out to be lame. The duck bit him on the finger, proving, Fink said, that lame ducks can still bite.

Democrats said they were also concerned that a bitter scramble for the leadership could damage their 93-56 edge in the Assembly.

In what some interpreted as a warning against interference from county leaders or the governor, Fink said the decision about a new speaker should be made only be Democratic legislators. There is no set procedure for selecting a speaker, but the majority party is expected to make a choice behind closed doors after the November elections that will be ratified by the whole house in January.

Staff members who must negotiate with the Assembly expressed concern that lobbyists and special interest groups would press particularly hard on the likely speaker candidates, making agreements more difficult. "There have already been some overly sensitive reactions to things by as-yet-unannounced contenders," said Assemb. Alexander Grannis (D-Manhattan). "I think you will see more of that."

Gov. Mario Cuomo and other legislative leaders praised Fink and said his departure was a loss for the state. "He is smart, candid, competent, has good instincts, good, judgment and good values," Cuomo said.

During Fink's tenure, the Legislature became a more professional independent and stronger branch of government. He often championed progressive causes, such as programs for the poor, education initiatives and mass transit aid.

"The bottom line was I was their leader, and together we did a lot of things that made peoples' lives better," Fink said.

Fink said he would remain neutral in the choice of a successor. Each of the leading contenders has drawbacks—Walsh and Kremer are from outside New York City, home of 56 of the 93 Democrats; Hevesi, whose Queens base once would have been an advantage, may now be stigmatized by the recent parking bureau scandals; and Miller's Brooklyn base may hurt him coming after two previous Brooklyn speakers, Fink and Stanley Steingut.

Aside from geographical concerns, some members and staff say Hevesi has a relatively weak staff, Miller has been aloof from the day-to-day process, Kremer has a small home base, and Walsh has certain positions that are at odds with most of the Democratic conference.

The battle will be a long one, and other lawmakers may emerge as compromise candidates. "Anyone who's counting noses at this point in time is not doing themselves justice," Walsh said.

Fink said he had no on reason for leaving, and that that was preferable. "It's nice to leave while the party is still going on," he said. "And I don't mean political party."

SAD DAY IN THE CAPITOL

Albany—In the ornate parlor outside the speaker's office yesterday afternoon, it was sort of like a wake and sort of like a graduation.

Legislators and staff trickled in, hugging one another, hugging Stanley Fink, paying respects. One staff member bought flowers, and one Assembly staffer complained that people were treating him as if he had had a death in the family.

"Everybody heard the rumors, but very few people thought this day would really come," said Assemb. Patrick Halpin (D-Lindenhurst), after Fink told his colleagues he would not run for re-election.

The sadness and nostalgia were pervasive, even among those who thought they knew the decision had been made weeks ago, even among those who stand to gain politically from Fink's departure.

Said Fink: "I concluded a while ago that this was what I was going to do . . . I made up my mind . . . the delay was making up one's heart. That's not always easy to do."

Friends, political allies and staff who have worked with the gruff Brooklyn Democrat over his 18 years in the Assembly gravitated to his office. They reminisced about experiences that spanned his reign—the time Fink, newly elected speaker, charmed an irascible Syracuse publisher; the time, this week, when he played a practical joke on Sen. Howard Babbush (D-Brooklyn), whose district overlaps his own, by telling Babbush he'd decided to forgo his Assembly seat to run for the State Senate—in Babbush's district.

Two legislative staff members close to Fink pondered the meaning of the word "sad" and the appropriateness of being sad when the speaker seemed perfectly happy. Everyone talked about possible successors and shakeups. And government junkies reflected on Fink's expertise and the number of times he had been able to change events by framing a question in a particular way or pushing hard on an issue.

Fink, whose decision had been expected for weeks, seemed relieved at having the ordeal over with as he roamed about, a package of Rolaids in his pocket. As legislators paid their respects, he engaged in his customary banter. Watching reporters interview one of the leading contenders to replace him, Fink said: "Ah, I remember when they used to crowd around *my* desk."

Fink was nostalgic, too. "The thought of not being with these people in a common cause to serve the people of this state is something which, to be honest is a little scary," he said. "But I'm at that stage where I think it's the right thing for me to do."●

ORDER TO HOLD SENATE CONCURRENT RESOLUTION 140 AT THE DESK

Mr. DOLE. Mr. President, I ask unanimous consent that Senate Concurrent Resolution 140 be held at the desk until the close of business tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR WEDNESDAY

RECESS UNTIL 11 A.M.

Mr. DOLE. Mr. President, I ask unanimous consent that once the Senate completes its business today it stand in recess until the hour of 11 a.m. on Wednesday, May 21, 1986.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF CERTAIN SENATORS

Mr. DOLE. Mr. President, I further ask unanimous consent that following the recognition of the two leaders under the standing order, there be special orders in favor of the following Senators for not to exceed 5 minutes each: Senators HAWKINS, CRANSTON, PROXMIRE, KERRY, BUMPERS, LEAHY, and LEVIN.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, following the special orders just identified, I ask unanimous consent that there be a period for the transaction of routine morning business not to extend beyond the hour of 12 noon with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. DOLE. Mr. President, as I have indicated following the special orders just identified the Senate could be asked to turn to any legislative or executive calendar item that can be cleared for action and possibly the veto message to accompany the Saudi arms sale.

I am also advised that the Safe Water Act conference report could well require a rollcall vote and, as I have indicated, there is some hope that we make some progress tomorrow on the supplemental appropriations bill.

So I guess the message would be that there will be rollcall votes tomorrow. I am not certain how long we will be in tomorrow. If we do not get to the supplemental, I would assume we would be out fairly early in the evening.

ARMS SALE VETO

Mr. BYRD. Should the President elect to veto the arms sale resolution, which I hope he will not do, if this occurs is it the intention of the distinguished majority leader to move for a quick vote on overriding the President's veto tomorrow?

Mr. DOLE. That is the intention of the majority leader, I say to my friend.

Mr. BYRD. Can the distinguished majority leader at this point enlighten us further as to what the indications from the White House may be at this point, whether there are strong indications that such a veto will occur this evening or tomorrow?

Mr. DOLE. I have been in touch with the White House I guess about 1½ hours ago. I was not able to determine whether or not they will do it tonight or tomorrow. The President has indicated that at the request of the Saudi Ambassador there be a modification to remove the Stingers from the package. But it is my understanding that the bill will be vetoed, I would assume either late this evening or early tomorrow morning.

Mr. BYRD. All Senators should be on notice. I do not want to try to attempt to put words in the distinguished majority leader's mouth.

Mr. DOLE. They should be on notice. It will be an important point. I think some Senators wish to be notified if they do it tonight, and I promised them I will do that. We are not trying to surprise anyone. All Senators should be on notice it is very likely—not certain, but very likely—this vote could come by, say, midafternoon.

Mr. BYRD. By midafternoon tomorrow. Very well. I thank the distinguished majority leader for stating for the record what he envisions as a very likely prospect.

Mr. DOLE. That is right.

Mr. BYRD. As I see it, the President will in all likelihood veto this resolution. It originated in the Senate and therefore it will be sent back to the Senate for an override, and the majority leader has every intention if that occurs of placing a vote before the Senate to override on tomorrow. So Senators should prepare their schedules accordingly.

Mr. DOLE. I will not say it is 100 percent we will do it, but it is very likely and it would be my advice to all Senators if they have an interest in this matter they should be checking in periodically.

Mr. BYRD. I thank the majority leader.

Mr. DOLE. Anything else?

Mr. BYRD. Nothing else.

□ 2000

RECESS UNTIL 11 A.M. TOMORROW

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move that the Senate stand in recess until the hour of 11 a.m. on Wednesday, May 21, 1986.

The motion was agreed to and, at 8 p.m., the Senate recessed until Wednesday, May 21, 1986, at 11 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 20, 1986:

DEPARTMENT OF THE INTERIOR

Jed Dean Christensen, of Virginia, to be Director of the Office of Surface Mining Reclamation and Enforcement.

DEPARTMENT OF DEFENSE

Michael P.W. Stone, of California, to be an Assistant Secretary of the Army.

THE JUDICIARY

Eugene R. Sullivan, of Maryland, to be a judge of the U.S. Court of Military Appeals for a term of 15 years.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

IN THE MARINE CORPS

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

TO BE LIEUTENANT GENERAL

Maj. Gen. Frank E. Petersen, Jr., xxx-xx-x... xxx-... U.S. Marine Corps.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by

the President under title 10, United States Code, section 601:

TO BE LIEUTENANT GENERAL

Maj. Gen. John Phillips, [redacted], U.S. Marine Corps.

IN THE NAVY

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370.

TO BE VICE ADMIRAL

Vice Adm. Robert E. Kirksey, [redacted] /1310, U.S. Navy.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

TO BE VICE ADMIRAL

Vice Adm. John M. Poindexter, [redacted] /1110, U.S. Navy.

IN THE MARINE CORPS

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

TO BE LIEUTENANT GENERAL

Maj. Gen. Clyde D. Dean, [redacted], U.S. Marine Corps.

IN THE AIR FORCE

Air Force nominations beginning Maj. Archie D. Barnes, [redacted] and ending Maj. Paul Rebek, [redacted] which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on April 24, 1986.

Air Force nominations beginning Pedro R. Cruz-Jimenez, and ending John W. Hofman, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on May 12, 1986.

Air Force nominations beginning Warren L. Griffin, Jr., and ending Frank L. Smith, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on May 12, 1986.

Air Force nominations beginning Maj. Joseph M. Bauer, [redacted] and ending Maj. Susan J. Troyer [redacted] which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on May 12, 1986.

IN THE ARMY

Army nominations beginning Philip J. Biondi, and ending Claude K. Smith, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on April 28, 1986.

IN THE MARINE CORPS

Marine Corps nomination of Capt. Timothy W. Foley, which was received by the Senate on April 25, 1986, and appeared in the CONGRESSIONAL RECORD on April 28, 1986.

Marine Corps nominations beginning Joseph P. Davis, and ending Walter O. McClenney, which nominations were received by the Senate on April 25, 1986, and appeared in the CONGRESSIONAL RECORD of April 28, 1986.

Marine Corps nominations beginning Robert G. Acosta, and ending Gover L. Wright, Jr., which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on May 12, 1986.

HOUSE OF REPRESENTATIVES—*Tuesday, May 20, 1986*

The House met at 12 noon.

The Right Reverend Monsignor James P. Cassidy, director of World Catholic Health and Hospitals, Catholic Charities, Archdiocese of New York, offered the following prayer:

Almighty God, who has brought us together in this Nation, out of many races and religious persuasions, we humbly ask Your blessings upon all assembled here and pour down upon them the gifts of wisdom and justice.

Grant us the vision to see Your will in all things and grant us the courage to follow it. May we always be aware of the dignity of every human being that we serve. Grant us peace and harmony and may we, by our actions, proclaim to one another and to all creation that we live in Your glory and trust.

We pray especially for the liberty and freedom of all the people of the world, and particularly, for the Cuban people, that they may grow in the freedom which they are celebrating this day.

O Lord, we humbly ask for Your strength to fulfill our destiny with competent, courageous leadership for the betterment of our country and all humankind. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. DAUB. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. DAUB. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 215, nays 99, answered "present" 3, not voting 116, as follows:

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 4420. An act to amend title 10, United States Code, to revise the retirement

system for new members of the uniformed services, and for other purposes.

The message also announced that the Senate had passed bills and a concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 863. An act to amend the National Traffic and Motor Vehicle Safety Act of 1966 and the Motor Vehicle Information and Cost Savings Act to authorize appropriations for fiscal years 1986 and 1987, and for other purposes;

S. 1848. An act to amend the Federal Food, Drug, and Cosmetic Act to establish conditions for the export of drugs; and

S. Con. Res. 139. Concurrent resolution to limit the amount that may be expended in any fiscal year by a Member of Congress for franked mail.

The message also announced that pursuant to sections 276h-276k, title 22, of the United States Code, as amended, the Chair on behalf of the Vice President appoints Mr. SIMPSON and Mr. WILSON, as members of the Senate delegation to the Mexico-United States Interparliamentary Group Meeting during the 2d session of the 99th Congress to be held in Colorado Springs, CO, May 29 to June 2, 1986.

PRIVATE CALENDAR

The SPEAKER. This is Private Calendar day. The Clerk will call the first individual bill on the Private Calendar.

STEVEN McKENNA

The Clerk called the bill (H.R. 1598) for the relief of Steven McKenna.

Mr. SENSENBRENNER. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

TEHRAN AMERICAN SCHOOL

The Clerk called the Senate bill (S. 173) to settle and adjust the claim of the Tehran American School for $13,333.94.

There being no objection, the Clerk read the Senate bill, as follows:

S. 173

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Tehran American School Claim Act of 1985".

SEC. 2. The Comptroller General of the United States be, and he hereby is, authorized and directed to settle and adjust the claim of the Tehran American School for $13,333.94, which amount constitutes proceeds from the sale of three motor vehicles arranged by the United States Embassy in Tehran, Iran, in 1979. There is hereby appropriated from any money in the Treasury not otherwise appropriated such amount as may be necessary for the payment of the claim.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

KENNETH DAVID FRANKLIN

The Clerk called the bill (H.R. 2505) for the relief of Kenneth David Franklin.

There being no objection, the Clerk read the bill, as follows:

H.R. 2505

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. WAIVER OF EMPLOYEE STATUS REQUIREMENT AND TIME LIMITATION FOR CLAIMING DISABILITY RETIREMENT BENEFITS.

(a) WAIVER OF EMPLOYEE STATUS REQUIREMENT.—Notwithstanding the requirement of section 8334(d) of title 5, United States Code, relating to status as an employee, Kenneth David Franklin of Raleigh, North Carolina, or his spouse, may make a deposit under such section.

(b) WAIVER OF TIME LIMITATION.—Notwithstanding the time limitation of section 8337(b) of title 5, United States Code, on filing a claim for disability retirement benefits, Kenneth David Franklin shall be entitled, after making the deposit allowed in subsection (a), to receive disability retirement benefits under subchapter III of chapter 83 of such title based on the claim referred to in the decision of the Merit Systems Protection Board numbered AT831L8410231, dated April 20, 1984, and the decision of the Merit Systems Protection Board numbered AT08318410232, dated April 20, 1984.

SEC. 2. COMPUTATION OF BENEFITS.

Upon receipt of the deposit allowed in section 1(a), the Director of the Office of Personnel Management shall certify to the Secretary of the Treasury the aggregate amount of the disability retirement payments that Kenneth David Franklin would have received if he had been receiving such payments for the period beginning on February 3, 1980, and ending on the date of the commencement of the period covered by the first disability retirement payment pursuant to this Act. The Secretary of the Treasury shall pay such amount, and interest on such amount at an annual rate of 6 percent, compounded annually, to Kenneth David Franklin from funds contained in the Civil Service Retirement and Disability Fund.

With the following committee amendment:

Strike out all after the enacting clause and insert:

SECTION 1. WAIVER OF EMPLOYEE STATUS REQUIREMENT FOR DEPOSIT OF RETIREMENT CONTRIBUTIONS.

Notwithstanding the requirement of section 8334(d) of title 5, United States Code, relating to status as an employee, Kenneth David Franklin of Raleigh, North Carolina, or his spouse, may make a deposit under such section.

SEC. 2. WAIVER OF TIME LIMITATION FOR CLAIMING DISABILITY RETIREMENT BENEFITS.

Notwithstanding the time limitation of section 8337(b) of title 5, United States Code, on filing a claim for disability retirement benefits, Kenneth David Franklin may file a claim, after making the deposit allowed in section 1, for disability retirement benefits under subchapter III of chapter 83 of such title.

Mr. BOUCHER (during the reading). Mr. Speaker, I ask unanimous consent that the committee amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. BOUCHER. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the Senate bill (S. 1027) for the relief of Kenneth David Franklin, and ask for its consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1027

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. WAIVER OF EMPLOYEE STATUS REQUIREMENT AND TIME LIMITATION FOR CLAIMING DISABILITY RETIREMENT BENEFITS.

(a) WAIVER OF EMPLOYEE STATUS REQUIREMENT.—Notwithstanding the requirement of section 8334(d) of title 5, United States Code, relating to status as an employee, Kenneth David Franklin of Raleigh, North Carolina, or his spouse, may make a deposit under such section.

(b) WAIVER OF TIME LIMITATION.—Notwithstanding the time limitation of section 8337(b) of title 5, United States Code, on filing a claim for disability retirement benefits, Kenneth David Franklin shall be entitled, after making the deposit allowed in subsection (a), to receive disability retirement benefits under subchapter III of chapter 83 of such title based on the claim referred to in the decision of the Merit Systems Protection Board numbered AT831L8410231, dated April 20, 1984, and the decision of the Merit Systems Protection Board numbered AT08318410232, dated April 20, 1984.

SEC. 2. COMPUTATION OF BENEFITS.

Upon receipt of the deposit allowed in section 1(a), the Director of the Office of Personnel Management shall certify to the Secretary of the Treasury the aggregate amount of the disability retirement payments that Kenneth David Franklin would have received if he had been receiving such payments for the period beginning on February 3, 1980, and ending on the date of the commencement of the period covered by the first disability retirement payment pursuant to this Act. The Secretary of the Treasury shall pay such amount, and interest on such amount at an annual rate of 6 percent, compounded annually, to Kenneth David

Franklin from funds contained in the Civil Service Retirement and Disability Fund.

MOTION OFFERED BY MR. BOUCHER

Mr. BOUCHER. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOUCHER moves to strike all after the enacting clause of the Senate bill, S. 1027, and to insert in lieu thereof the text of H.R. 2505 as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 2505) was laid on the table.

RAY A. BONNEY

The Clerk called the bill (H.R. 1291) for the relief of Ray A. Bonney.

There being no objection, the Clerk read the bill, as follows:

H.R. 1291

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Ray A. Bonney (Social Security Number 009-34-3522) of Edwardsville, Illinois, is relieved of liability for repayment to the United States of the sum of $16,890.98 plus accrued interest, which represents the amount that Mr. Bonney is indebted to the Department of Defense for payments received for travel and relocation expenses incurred by him in good faith reliance on the assurances of the Department of Defense that such expenses were authorized as a Government expense arising from his relocation from Pequannock, New Jersey, to Saint Louis, Missouri, to accept employment with the Department of Defense.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER. This concludes the call of the Private Calendar.

COMPREHENSIVE TRADE LAW REFORM

(Ms. KAPTUR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. KAPTUR. Mr. Speaker, finally, today, the House will consider the most comprehensive and far-reaching trade law reform in decades. If passed and enacted into law, it will make America more competitive in world trade—not by erecting barriers, but by unshackling American firms from unfair foreign practices. It will give American workers a square deal. For several years, we in Congress have been sounding the alarm on the glut of imports on our shores, and America's declining competitive status. For 6 years now, the President has tried to talk the problem away, first with a meaningless trade initiative, then with temporary intervention in the currency market. It hasn't worked.

Let history record, it was President Reagan who sat back and watched America rack up its largest trade deficit ever. It is President Reagan who threatens veto as America continues to lose 25,000 more manufacturing jobs each month. It is President Reagan who holds the reins of power and yet let America become a net debtor nation last year for the first time since World War I.

From the Industrial heartland of the Midwest to the high tech centers on both coasts, from the breadbasket of the Great Plains to the textile communities of the South, from the timber areas of the Pacific Northwest to the energy centers in the Southwest, America is asking us to stand up. I urge my colleagues on both sides of the aisle to support this vital trade legislation for jobs here at home, and our way of life.

TRADE BILL IS A "SHIN-KICKER"

(Mrs. SMITH of Nebraska asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SMITH of Nebraska. Mr. Speaker, today the House will begin consideration of omnibus trade legislation born out of frustration over trade deficits. Its sponsors euphemistically call it a bill, "To Enhance the Competitiveness of American Industry." It is hardly that.

As it is currently written, this bill will do more to injure Americans farmers, retailers, and consumers than it could possibly do to help industries facing unfair import competition. An impressive group of US industries, including the National Association of Wheat Growers, the American Soybean Association, the National Grange, and the Farm Bureau, have banded together to fight this legislation.

Recent administration actions prove that more vigorous enforcement of our trade laws is possible, but this bill goes beyond any fine tuning of trade laws and becomes in the words of the Washington Post a, "shin-kicker."

Two particularly pernicious sections of the bill strike hard at some of American agriculture's best customers. In 1985, Japan, Taiwan, West Germany, and the Lesser Developed Countries combined brought 73 percent of U.S. farm exports, over 21 billion, dollars worth. Tomorrow, our colleague from Illinois, Mr. CRANE, will be offering an amendment to the bill which would remove those sections most dangerous to American agriculture. Any Member of this House with any agricultural constituency at all can have no choice but to support the Crane amendment.

TRADE BILL IS FIRST STEP IN PUTTING AMERICA BACK TO WORK

(Mr. DURBIN asked and was given permission to address the House for 1 minute.)

Mr. DURBIN. Mr. Speaker, if you come face to face with the grim human casualties of our failed trade policy, if you meet the bankrupt farmers, the unemployed workers, and those who wonder how many times this economy is going to kill them before they really die, then the trade debate takes on a heartbeat and a soul.

President Reagan criticizes our trade bill as excessive. If the President and his loyalists on the floor today stared into the eyes of the victims of this trade deficit, as so many of us have, they would marvel at the restraint in this legislation.

Make no mistake, when once proud families of our farmers and workers live with the cruelty of this ruthless economy, they do not join the President is prescribing moderation as a cure.

H.R. 4800 is a measured, critical first step toward fair trade. In a city dominated by apologetic economists, this bill is a bulldog in a room full of cocker spaniels.

It is said that there is nothing more pregnant than an idea whose time has come. Stand aside, Mr. President, this Nation is tired of hearing excuses. We are declaring today that our Nation will have a clear and strong trade policy—the first step in putting America back to work.

LEGISLATION TO ALLOW DEDUCTION FOR "POINTS" PAID IN MORTGAGE REFINANCING

(Mr. BOEHLERT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOEHLERT. Mr. Speaker, once again we have evidence that many middle-income homeowners are taking it on the chin as a result of a Federal agency ruling.

Last week the Internal Revenue Service said to homeowners seeking to lower mortgage payments to take advantage of more favorable interest rates: "Sorry, we're not going to help."

Millions of Americans have been operating under the assumption that "points" paid to refinance a mortgage would be tax deductible in the year of refinancing. Not according to the IRS.

This came as quite a surprise to a great many people who had already refinanced and to an even greater number considering doing so.

Today, I am introducing legislation which will provide a break for homeowners attempting to get out from under onerous mortgage interest rates.

The measure will allow a deduction for "points" paid in refinancing in the year in which refinancing is obtained.

There is a question that we have all heard asked many times: How do you spell relief? The answer to so many middle-income American families is: Lower mortgage payments. Let us help them.

REPUBLICANS SHOULD VOTE "YES" ON TRADE BILL

(Mr. PEASE asked and given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEASE. Mr. Speaker, as we begin debate today on the omnibus trade bill, I am mystified as to why many of our Republican colleagues appear eager to carry water for an administration which is clearly out of touch with the American people. The American people want a tough trade bill. The administration does not want any trade legislation at all.

In the other body, the Republican-led Finance Committee is working on a trade bill which the administration does not like either. In fact, I understand that the administration does not even like the Republican substitute to be offered here in the House tomorrow.

Let us face it, Mr. Speaker, the administration opposes any effort here in Congress to deal effectively and constructively with our $150 billion trade deficits. So why, I ask Republican colleagues, should they take the heat for an administration—to quote Senator JOHN HEINZ, a good Republican—"whose successes have been at best damage-limiting, and whose failures have been disastrous for many industries."

I urge my Republican colleagues to join us on this side of the aisle and vote "yes" when the trade bill comes up for final passage.

THE WORLD'S LARGEST EXPORTER

(Mr. DAUB asked and was given permission to address the House for 1 minute.)

Mr. DAUB. Mr. Speaker, we are the world's largest exporter, sending annually over $200 billion worth of goods abroad. We are the world's largest exporter of ag products, sending agriculture about $30 billion worth of farm commodities overseas each year; yet we are going to consider a bill today and tomorrow that is going to reduce trade, including exports, dramatically. That is bad economics, and despite the misplaced enthusiasm of the majority party, it is going to be bad politics.

The American farmer depends on exports. The production from one out of every three acres he plants is sold abroad. This bill looks good for some heavy industries trying to protect domestic markets and jack up the price of their products to the American consumer, but it a depthcharge for American agriculture.

The next 2 days on the Republican desk, and I will try to leave on the Democratic desk, copies of the Textile Protection Act and the Automobile Domestic Content bill. I would like to have Members check their votes on those two bills and at least we might have some degree of consistency with respect to final votes on passage for free trade and fair trade.

LET US REFORM THE TAX REFORM ACT OF 1984

(Mr. BARNARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BARNARD. Mr. Speaker, I want to advise my colleagues that next week I will be introducing legislation to correct an inequity in the fringe benefit provisions of the Tax Reform Act of 1984. That act provided for the taxation of some fringe benefits provided by employers to employees. But, it exempted from taxation "no-additional-cost services"—that is, fringe benefits provided to employees and their families without "substantial additional cost" being incurred by the employers.

Unfortunately, and I believe inadvertently, when Congress established the "no-additional-cost services" exemption, it provided that the tax-free service to employees must be the same type of service which is sold to the public in the ordinary course of the employer's business. So that while commercial airlines and railroads can offer employees and their families tax-free empty seats, firms not in the transportation business but owning or leasing aircraft or railroad cars, cannot—even though the seat occupied by the hitchhiking person would otherwise be empty, the flight is for legitimate business purposes and would have been made whether or not such person was on board, and the employer incurs no substantial additional cost in providing this benefit. Not only is this distinction illogical and unfair, its enforcement by the IRS will actually produce "negative revenues"—that is, it will cost far more to enforce than it will return in dollars to the U.S. Treasury.

Mr. Speaker, Congress may be on the verge of approving historic changes in our tax laws. But let's not neglect to reform provisions of exisiting tax laws that are currently unfair and that will not be corrected by the tax bills currently pending before Congress.

FURTHER EVIDENCE OF SANDINISTAS' CAMPAIGN TO SUBVERT THEIR NEIGHBORS

(Mr. LAGOMARSINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAGOMARSINO. Mr. Speaker, in recent days, I have called to the attention of my colleagues further evidence of the Sandinistas' continuing campaign to subvert their neighbors. The evidence uncovered by Honduran military forces has failed to receive attention in the media, and as usual, few people hear about it.

One more such incident occurred in Honduras in March when a cache of arms located near the Honduras-El Salvador border was uncovered. The cache contained rocket grenades and TNT. The Honduran military also learned of routes traveled by the guerrillas between El Salvador and Nicaragua for transfers of weapons and money.

It is difficult to accept the proposition that the Sandinista Communists in Nicaragua will abide by a written agreement within the Contadora process unless there are substantive measures to provide for verification and enforcement which will prevent the Sandinistas from carrying out their campaign of support for guerrillas fighting their democratic neighbors.

INTERNATIONAL COMMUNITY SHOULD SPEAK MORE FORCEFULLY ON BEHALF OF DEMOCRACY IN CHILE

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, a weekend headline grabbed my attention: "Communists Gain in Chile."

Observers in that troubled nation now estimate that the Communist Party would now capture 20 percent of the vote in a nationwide election, up considerably from the last election held in that country. The reason, all agree, is the autocratic, repressive rule of Gen. Augusto Pinochet, the military ruler of Chile. Here is a classic case where communism gains when a repressive leader refuses to heed the interests of his own people; thus, he endangers the entire hemisphere's security.

No week goes by without reports of Pinochet's security forces quelling some disturbance, torturing political prisoners, and even snubbing the American Ambassador's efforts to convince them to democratize before the 1989 trumped-up election.

There is a viable democratic alternative in Chile.

Mr. Speaker, many have speculated who is next after Marcos and Duvalier,

who will be thrown out by their own people. Mr. Speaker, I think Chile is a prime candidate.

To avoid future bloodshed and instability, it is incumbent on the international community and the United States to speak out more forcefully on behalf of democracy in that country.

OPENING OF CENTER FOR NEAR EASTERN STUDIES IN JERUSALEM

(Mr. PACKARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PACKARD. Mr. Speaker, for the past 18 months, my alma mater, Brigham Young University, has been building a Center for Near Eastern Studies in Jerusalem adjacent to the Hebrew University. Israel's longstanding record of keeping Jerusalem open to all faiths is highly commendable.

Some religious groups here and in Israel have expressed fears that this new center would be used for proselytizing purposes. However, their fears are unfounded. The officials of Brigham Young University have signed an agreement which pledges that the center will not be used for missionary activities. These agreements include the dismissal of employees, faculty, and students if violations occur.

When in operation, the school will spread firsthand knowledge of Near Eastern society, culture, and history, resulting in enriched understanding and improved United States-Israeli ties. The center is soon ready for occupancy, and I wish to thank the 154 Members of the House who signed the letter asking the Knesset to proceed with the necessary permits to use the center as intended.

IN SUPPORT OF H.R. 1875, MILITARY CHAPLAINS FAITH BALANCE ACT

(Mr. STAGGERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STAGGERS. Mr. Speaker, I rise in support of H.R. 1875, the Military Chaplains Faith Balance Act. This legislation provides for proportionate representation of clergy serving as chaplains to the members of our military community.

This is a nonpartisan bill calling on the Secretary of Defense to use every viable means to preserve a faith-balanced Corps of Chaplains. Who could argue that our dedicated military clergy should not continue to serve the spiritual and religious needs of those brave women and men in our armed services?

We should simply ask ourselves whether we should allow our fine chaplains to be involuntarily released from the Chaplain Corps because of promotions, or should they be allowed to continue to serve the spiritual needs of the military community. I believe the answer is obvious.

Mr. Speaker, I believe this legislation is worthy of our attention. I join with over 150 of my colleagues in asking for cosponsorship of this important legislation.

HUMAN RIGHTS ADVANCE IN TAIWAN

(Mr. PORTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PORTER. Mr. Speaker, last week, the Taiwanese took a giant step down the road of freedom. After 37 years of strict one-party rule following the conclusion of the Chinese civil war, the Nationalist government has finally allowed opposition parties to operate in Taiwan.

Reuters news agency reports that government officials have worked out a compromise with opposition politicians to allow them to set up permanent offices across the island. This is a major step toward the full democratization of Taiwan.

The Congressional Human Rights Caucus believes it is important to praise countries that improve their records on human rights, as well as to criticize those that do not.

Mr. Speaker, the struggle for freedom in Taiwan is by no means over. The KMT government has yet to end the use of martial law, but an important step in the human rights struggle has been taken, and we applaud it.

TRIBUTE TO STAFFS OF MEMBERS AND COMMITTEES, CASUALTIES OF GRAMM-RUDMAN

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, I rise to pay tribute to a group of Gramm-Rudman casualties who are in effect close to home, the dedicated staffs of House Members and committees.

Gramm-Rudman and its across-the-board cuts hit this institution and its people several months before the rest of the Nation felt it.

These were major immediate cuts—$40,000 in most offices and 10-12 percent on most committees.

The human impact was also immediate—scores of people were forced to be let go.

The human response for the remainders is a remarkable story that might well be called the new breed of public servants.

Scores of people in both levels have or will be faced with furloughs—unpaid leave time. Yet what are many of them doing—working anyway, without pay, same hours, same pressures—yet no pay.

The remainder of people on House and committee staffs will be faced with pay cuts and certainly pay freezes, for the coming year.

These circumstances would cause morale problems in most lines of work. However, for the most part, I find them as dedicated and professional as ever. They do pride to themselves, their Members, their committees, and their Nation.

□ 1250

RECOUNT OF BALLOTS IN HOUSE ELECTIONS

(Mrs. MEYERS of Kansas asked and was given permission to address the House for 1 minute.)

Mrs. MEYERS of Kansas. Mr. Speaker, although the House ended its debate 1 year ago on the McIntyre-McCloskey election, we may face the same divisive issue again some time in the future in another State. This week I will introduce a bill that will prevent last year's events from recurring.

My bill will require that a recount of ballots in a House election be completed not more than 6 weeks after the date of the election involved.

The bill's purpose is to ensure that a recount will not delay the certification of Members-elect to the House before the convening of a new Congress. It would not take effect until 1988 to give States time to ensure compliance.

The State of Indiana did not complete its recount of the McIntyre-McCloskey election until January 22, 1985, almost 3 weeks after the House voted to vacate the seat and initiate an investigation.

With this very simple change, we can greatly enhance our ability to avoid this involvement in the future, while providing States flexibility for compliance. Most important, we assure that voters will not be deprived of their right to representation in the House.

I urge my colleagues on both sides of the aisle to join me in this effort.

WORKERS AND FARMERS BENEFIT FROM TRADE BILL

(Mr. OBEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OBEY. Mr. Speaker, there are three very important provisions for workers and farmers in the trade bill which we will debate today and tomorrow. The workers' rights provision defines it as an unreasonable trade practice for a foreign country to deny internationally recognized basic workers' rights such as protection of chil-

dren in the labor force, the prohibition of forced or slave labor, and adequate health and safety standards.

In addition, there are 2 provisions in the agriculture section which are particularly important for American dairy farmers. One would reclassify imported casein to reflect its primary use as a food substance and allow trade remedies if a domestic industry is hurt by unfair foreign subsidies of casein.

After having fought for a long time to restrict casein imports, I am pleased to report some progress on this issue.

The second provision would prohibit foreign-owned dairies financed by industrial development bonds from getting Federal price supports under milk marketing orders. This would put a crimp in subsidizing the kind of huge dairy operation which was set up in Georgia recently, which can only add to the milk surplus we have been trying to reduce.

I urge Members who are interested in the welfare of either workers or farmers to strongly support the trade measure which will be before the House over the next 2 days.

A CLEANER ENVIRONMENT THROUGH CLEAN COAL PROGRAM

(Mr. REGULA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. REGULA. Mr. Speaker, the acid rain question is once again in the forefront. Legislation is being marked up which, if enacted, would have the effect of killing the clean coal program.

Today the gentleman from West Virginia [Mr. RAHALL] and I are introducing legislation to encourage the further commercialization and widespread utilization of clean coal technologies, as a cost-effective means of addressing the acid rain problems. If successfully demonstrated and widely utilized, these technologies promise to provide utilities and industrial users of coal with several proven options by which to comply with environmental requirements.

The Clean Coal Program is a first step in accelerating the demonstration of a new generation of technologies that may be capable of burning coal more efficiently and more cleanly.

Last year's accomplishments were just the first step. The bill we are introducing represents the next phase.

We must now develop the policy framework to facilitate the market acceptance of these technologies.

A second component of the bill is a response to the recommendations of the Lewis-Davis acid rain report.

The report emphasized the need to concentrate upon retrofit technologies that could be used in existing facilities. Only a small number of the clean coal proposals can be classified as such.

The bill would direct DOE to solicit proposals for clean coal projects that could be utilized by existing facilities to reduce emissions.

The Clean Coal Program offered a promise to utilities looking for ways to meet future energy needs. It offered a promise to energy intensive industries for reductions in costs through improved efficiencies. It offered a promise of energy security by finding ways to burn our most abundant domestic energy resource cleanly.

We do not want to once again get in a position of being subjected to blackmail by the fossil fuel energy countries that have the oil.

Finally, it offers a promise of a cleaner environment for us in future generation.

This bill provides the opportunity to make these conditions a reality, and I think it is important that we develop retrofit on clean coal, as well as new technology so that we can use this abundant resource.

SOUTH AFRICA ATTACKS

(Mr. DYMALLY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DYMALLY. Mr. Speaker, I rise today to deplore the attacks by the South African Government across its borders on the sovereign countries of Zimbabwe, Zambia, and Botswana. In the day of international terrorism and state-sponsored terrorism, I cannot find a more accurate definition of these attacks.

It appears that this oppressively racist regime, in South Africa, under pressure for change by the free world community, is shifting its focus from apartheid to the African National Congress. Do not be fooled. The problem is not the ANC nor terrorism. The real problem is apartheid in South Africa. Pretoria is desperately seeking an issue to shift the attention away from the lack of change in South Africa. Confronting the violence and the ANC will not reduce the tensions nor dissolve the ANC in South Africa. Reforming the evils of this system, however, will best address both.

We need to reevaluate our foreign policy toward South Africa and the southern Africa region. Given our passive stand with constructive engagement, our indirect support of Pretoria and our assistance to Savimbi, and now the South African attacks on its neighbors, I believe the region is about to experience a heightening of tension. It is time we act firmly to stop apartheid, stop South Africa and prevent further violence.

The problem is South Africa, not Angola, not Namibia, not the ANC, not terrorism, and certainly not the countries under attack.

PRODUCT LIABILITY AND LIABILITY INSURANCE

(Mr. ROTH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROTH. Mr. Speaker, what is the biggest issue facing small business and the workers of America today? I think it is the question of liability insurance, especially product liability.

This evening in my office at 6 p.m., I have asked Professor Twerski, who is one of the leading experts in the area of tort law, to answer questions and to hear your comments regarding this issue. It is at 6 p.m. in room 215, Cannon Building.

This afternoon we are starting the debate on the trade bill, and one of the reasons we have a large trade deficit is because we have not answered this question of product liability and the lack of liability insurance coverage. We have many companies today that are spending more in the area of product liability and insurance than they do on R&D. We cannot keep going in this direction. That is why it is important for us to come to grips with this question, and to do it now.

SCREAMS OF PROTECTIONISM WILL NOT WORK

(Mr. LEVIN of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVIN of Michigan. Mr. Speaker, I can hear it now, the screams of protectionism, but I want to make it clear that we, who support the omnibus trade bill, will not be scared off.

There is a deep problem, and nobody can paper it over with epithets. I was told last year that in the cars that came off the assembly line, the joint Toyota-GM venture, the first cars had 70 percent Japanese-made content. What is it going to be with the second line? Ninety percent made-in-Japan content.

Sometimes we can best look at the opponents for the arguments for your position. In Sunday's Times, Hobart Rowan said there is little doubt that the administration's stepped-up efforts to enforce existing trade laws and their efforts to devalue the dollar got their impetus from last year's threat of protectionists legislation. Also, it was said that the Reagan administration, which has given the back of its hand to workers who are affected by import competition, must evolve a policy to ease the transition.

With all these screams about protectionism, the Reagan administration is biting at the very hand that has been

pushing it in the right direction. It will not work this week on the floor of the House when we pass the omnibus trade bill.

MORTON THIOKOL'S NEW $200 MILLION CONTRACT: SLAY THE MESSENGER, REWARD THE SLAYER

(Mr. MARKEY asked and was given permission to address the House for 1 minute.)

Mr. MARKEY. Mr. Speaker, the world of NASA and its space shuttle contractors gets curiouser and curiouser with each passing day. Last week, Morton Thiokol Inc., the designer of the space shuttle solid rocket boosters, reassigned Allan McDonald and Roger Boisjoly, two Thiokol engineers who had questioned the advisability of launching the shuttle in near-freezing weather, and who had cooperated with the Rogers Commission in bringing these issues to public attention. This blatant retaliatory action for a courageous act was followed this week by the announcement that NASA had awarded a recovery contract worth $200 million for the redesign and testing of improved rocket booster joints to the selfsame Morton Thiokol Inc.

What lessons do we teach by allowing such outrageous behavior? There are at least two. First, the reward for prudent advice to one's employer and for patriotic cooperation with a Presidential commission is a one-way ticket to a corporate Siberia. Second, the reward for the corporation which so unceremoniously whisks its best and brightest out of sight is $200 million in hush money.

Allan McDonald and Roger Boisjoly should be enjoying tickertape parades in the Nation's Capital, not packing their bags. Morton Thiokol should be penalized for blowing the whistle on their whistleblowers, not rewarded for its gag order. NASA should be rehabilitating its tarnished image, not compounding its errors by putting its seal of approval on an attempt to interfere with the Rogers Commission's mission. I urge my colleagues to cosponsor Joint Resolution 634, which I introduced last week, to debar Morton Thiokol from Federal contracts until it is determined that the corporation's actions against McDonald and Boisjoly were not retaliatory.

□ 1300

IMMIGRATION REFORM

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, the leadership of the Judiciary Committee has ignored the pleas of myself and other members of that panel for prompt and responsible action on immigration reform legislation. Instead, it has opted for a procrastination that places immigration reform in mortal danger.

An article in last Sunday's edition of the New York Times demonstrates the folly of this decision. Focusing on the village of Santiago Comaltepec in Mexico, it stresses three important points about illegal immigration. First, the Border Patrol reports that the number of undocumented aliens from Mexico who have been apprehended at the border in the last year has risen by 50 percent. Most of the constituents of this deluge cross the border for specifically economic reasons—perhaps to earn the dizzying wage of $5 an hour garnered last year by a village policeman. And most of them have no intention whatsoever of making the United States their new home. A village councilman put it this way:

> They don't go there to live. They go there to work, to earn a lot of money. Then they come back. Who would want to live there? This is their country.

These are precisely the facts addressed by employer sanctions and other features of proposed immigration reform legislation. It is certainly tragic that, despite the support of President Reagan and the other body, such crucial legislation may soon be entombed in the graveyard known to some as the House Judiciary Committee.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken on Wednesday, May 21, 1986.

SEQUESTRATION OF LOAN GUARANTEE COMMITMENTS

Mr. MONTGOMERY. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 2416), to revise further the limitation applicable to chapter 37 of title 38, United States Code, for fiscal year 1986, for the purpose of implementing any order issued by the President for such fiscal year under any law providing for the sequestration of new loan guarantee commitments and for other purposes, as amended.

The Clerk read as follows:

S. 2416

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Act entitled "An Act to establish, for the purpose of implementing any order issued by the President for fiscal year 1986 under any law providing for sequestration of new loan guarantee commitments, a guaranteed loan limitation amount applicable to chapter 37 of title 38, United States Code, for fiscal year 1986", approved March 7, 1986 (Public Law 99-255; 100 Stat. 39), is amended—

(1) by striking out "guaranteed loan limitation amount" and inserting in lieu thereof "limitation"; and

(2) by striking out "$18,200,000,000" and inserting in lieu thereof "$40,000,000,000".

(b) The title of such Act is amended by striking out "guaranteed loan limitation amount" and inserting in lieu thereof "limitation".

SEC. 2. TREATMENT OF CERTAIN ADMINISTRATIVE EXPENSES.

(a) IN GENERAL.—Section 1824(b) of title 38, United States Code, is amended by adding at the end the following new sentence: "For purposes of this subsection, the term 'administrative expenses' shall not include expenses incurred by the Administrator for appraisals performed after February 1, 1986, on a contractual basis in connection with the liquidation of housing loans guaranteed, insured, or made under this chapter.".

(b) USE OF SAVING.—Any saving in the General Operating Expenses Account of the Veterans' Administration that results from the implementation of the amendment made by subsection (a) shall be used by the Administrator of Veterans' Affairs for the purpose of administering the housing, compensation, pension, and education programs in title 38, United States Code, in a more timely manner.

The SPEAKER pro tempore (Mr. EARLY). Is a second demanded?

Mr. HAMMERSCHMIDT. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Mississippi [Mr. MONTGOMERY] will be recognized for 20 minutes and the gentleman from Arkansas [Mr. HAMMERSCHMIDT] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Mississippi [Mr. MONTGOMERY].

Mr. MONTGOMERY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, on February 25, the House passed H.R. 4130, a bill to increase the VA loan guaranty credit authority ceiling to $17.4 billion. The President signed the bill on March 7 (Public Law 99-255). Raising the ceiling was necessary because the volume of VA loans had previously been grossly understated by the Congressional Budget Office and the Veterans' Administration; and without this special legislation the program would have closed down its operation in April.

At the time we passed this measure, we were led to believe the new ceiling would be adequate for fiscal year 1986. Again, everyone underestimated the number of veterans wanting to take advantage of lower interest rates for loan purposes. This 9½-percent rate

has generated thousands of refinancing applications and has encouraged tens of thousands of other veterans to seek guaranteed loans for the first time.

Home loan guarantees have risen from 179,000 in fiscal year 1985 to a projected 400,000 by the end of this fiscal year.

The committee is now advised that the Veterans' Administration will reach the $17.4 billion loan credit ceiling by the last week in May.

Mr. Speaker, I yield such time as he may consume to the gentleman from Alabama [Mr. SHELBY], the distinguished chairman of the Subcommittee on Housing and Memorial Affairs.

Mr. SHELBY. Mr. Speaker, we had asked that H.R. 4775, a bill exempting the VA Home Loan Guaranty Program from the provisions of Gramm-Rudman-Hollings, to be considered yesterday under suspension of the rules.

Because there was some concern in other committees about the impact of Gramm-Rudman-Hollings on programs other than veterans' housing, the bill was pulled from the Suspension Calendar until we could have further discussions on exemptions for a variety of programs.

Frankly, Mr. Speaker, I and many other members of our committee, including the distinguished chairman of the full committee, would have preferred that we eliminate the VA's Home Loan Guaranty Program from Gramm-Rudman-Hollings. The program has never had a ceiling on loans and it does not require any outlay of Federal funds in fiscal year 1986. Additionally, reducing the number of guaranteed loans results in less origination fee income collected on such loans, and this actually serves to increase the deficit. The VA estimates it could receive approximately $300 million in revenues from these fees in fiscal year 1986 if the program is allowed to proceed normally.

Further, about 45 percent of the VA's loan guaranty commitments this year consists of refinancing loans which replace loans with substantially higher interest rates. It makes no sense to limit the VA's authority to replace a guaranty commitment on a loan when the net effect in a reduction in the risk that such a loan will be foreclosed. Veterans will be more able to meet their loan payments, and the number of defaults should go down.

Nonetheless, it was agreed that we would ask the full committee to consider raising the loan commitment ceiling rather than eliminating the ceiling altogether.

Mr. Speaker, the bill we are considering today is S. 2416 with our amendments. On May 6, the Senate passed this bill with a loan credit ceiling of $30.9 billion. The Veterans' Administration has confirmed that if we were to accept the Senate bill, we would probably run out of commitment authority again in late August.

What is the correct number, Mr. Speaker? Frankly, we don't know, but the committee has agreed to raise the ceiling from $17.4 billion to $38.3 billion. This supposedly will assure veterans that they will be able to get their loans refinanced or new loans through September 30 of this year.

Although we hope the latest estimate is sufficient, I can't guarantee that we won't be back on the floor later this year requesting the House to raise the ceiling for the third time.

Mr. Speaker, the second provision of our amendment would allow fees for appraisals performed in connection with foreclosures to be paid from the loan guaranty revolving fund rather than from the general operating expense account.

In fiscal year 1985, the Veterans' Administration guaranteed 179,000 loans. In fiscal year 1986, they project they could guaranty 400,000 loans. Obviously, the VA's workload has doubled. Unfortunately, however, as a result of budget cuts, VA regional offices have lost 73 loan guaranty employees in fiscal year 1986. This workload strain on fewer personnel is resulting in tremendous backlogs, lengthy processing periods and even inability to answer phone calls at many offices.

Paying these appraisal costs from the loan guaranty revolving fund will make available $4.2 million so that additional personnel can be hired in an effort to reduce these backlogs.

Mr. Speaker, I would like to commend the distinguished chairman of the full committee, Mr. MONTGOMERY, for his efforts in moving this new legislation in such an expeditious manner. I would also like to thank Mr. HAMMERSCHMIDT, ranking minority member of the full committee, and Mr. SMITH, ranking minority member of the Subcommittee on Housing and Memorial Affairs for their hard work on this proposal as well as all of my colleagues on the full committee who met early this morning to approve this new proposal.

Without their timely action, we could be celebrating Memorial Day week, a holiday commemorating the sacrifices of those who served this Nation in our Armed Forces, by closing the doors of the Home Loan Guaranty Program.

Mr. Speaker, I urge adoption of this bill.

□ 1310

Mr. HAMMERSCHMIDT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise as a strong supporter of the amendments to S. 2416 which would raise the Veterans' Administration Home Loan Guaranty Program ceiling from $18.2 billion to $40 billion and free additional funds for the program's operation. It has become apparent that this particular program—due to low mortage interest rates—is experiencing a level of activity which no one predicted would be so high.

The Home Loan Guaranty Program is the only VA benefit that many veterans will ever use. The program is of great economic importance, because it helps veterans obtain financing for buying their homes. This far-reaching contribution to the Nation's prosperity should not be overlooked.

The Veterans' Affairs Committee has moved quickly to avert a shutdown of the GI Loan Program. The committee wanted to exempt the program from Gramm-Rudman-Hollings and remove the limitation that had been twice imposed upon it because of the language of the Gramm-Rudman-Hollings bill.

The other body had a different approach. It wanted only to increase the imposed limitation under Gramm-Rudman-Hollings, and it wanted to do it in an amount that we felt was insufficient to get through the fiscal year.

Mr. Speaker, there has arisen a rather widespread feeling that an entire exemption from Gramm-Rudman-Hollings for the VA Loan Guaranty Program without consideration of other possible exemptions would not be the best course.

While I still favor the original concept of such an exemption as proposed by our chairman, Mr. MONTGOMERY, and by the Subcommittee on Housing and Memorial Affairs led by its chairman, Mr. SHELBY, and its ranking member, Mr. SMITH of New Jersey, I can understand the expressed concerns. Accordingly, I am pleased that we have reached a middle ground that would appear to solve the immediate problem of assuring that the VA will continue to guarantee GI loans.

The House amendment to S. 2416 would also address an extreme problem of backlogged work in the VA offices processing the flood of loan applications by freeing approximately $4.2 million to be expended for additional personnel. The bill would do this by allowing the VA to charge contract fees for foreclosure appraisals against the revolving fund, instead of against general operating expenses, as the law currently requires.

Mr. Speaker, our proposal, therefore, is to increase the Senate limitation of $30.9 billion in guarantees to $40 billion and to further amend it with respect to the revolving fund as set forth in H.R. 4775. It is my belief that the other body will accept these two amendments and send the bill to the President for signature.

Mr. Speaker, the dramatic increase in GI loans caused by lowered interest rates is good for veterans, good for the

economy and good for the country. This legislation would preserve and strengthen a vital VA program, and I urge its favorable consideration.

Mr. Speaker, I yield such time as he may consume to the distinguished and very able ranking minority member of the Housing and Memorial Affairs Subcommittee, the gentleman from New Jersey [Mr. SMITH].

Mr. SMITH of New Jersey. Mr. Speaker, I rise in strong support of S. 2416, as amended, which will raise the ceiling of the VA Guaranteed Home Loan Program to $38.3 billion.

Last February, Congress passed legislation to raise the original $11.4 billion ceiling to $17.4 billion. At that time, we believed the new ceiling would be sufficient to continue operating the program through the end of the fiscal year.

However, Mr. Speaker, the steady drop in interest rates has encouraged thousands of veterans to seek refinancing of existing loans and tens of thousands of other veterans to seek first time loans. In fact, the VA has told our committee that they are averaging $165 million in loan commitments daily. More than 400,000 mortgage loans will be guaranteed by the VA this year.

Because of this unusually high volume, the new ceiling will be reached in a matter of days, preventing the VA from writing any new loans. Clearly, Congress must act immediately to avert a shutdown of the program. Legislation passed by the other body would increase the authorization ceiling to $30.9 billion based on a VA recommendation. An even newer VA estimate, however, puts the VA loan commitment at $38.3 billion, the ceiling set in today's legislation.

This loan activity is unprecedented in the history of the program. It is placing a tremendous strain on VA personnel attempting to process loan applications in a timely manner. The loss of 73 loan guaranty employees to early retirement, coupled with serious budget cuts has catapulted the VA into a crisis situation.

As our committee was told by the regional director in the San Diego office, "We had cut away a good deal of organizational fat in previous years. We are now into muscle."

St. Paul reported that GI home loan service which normally takes about 30 days now takes 6 to 8 weeks. The Detroit office was forced to close its doors to the loan guaranty division. All visitors must now go to the veterans' services division reception area to have their questions answered.

These problems are characteristics of nearly every regional office in the country, Mr. Speaker, so I strongly support provisions in today's bill which will free up funds for the hiring of new loan guaranty employees. This bill redirects an estimated $4.2 million in funds now earmarked for fee appraisals to permit new hirings.

It should be noted that this change in procedure would create no additional outlays in the current fiscal year. Fee appraisals would simply be paid from the loan guaranty revolving fund rather than from the general operating expenses account.

Mr. Speaker, these changes are absolutely necessary to the continued successful operation of the VA Home Loan Program. Veterans should be able to take advantage of the current low interest rates without waiting 6 to 8 weeks to have their loans processed. Moreover, we must avert a shutdown of the program by raising the guaranty ceiling.

This is a good bill. I commend the distinguished chairman, Mr. MONTGOMERY, and the ranking member, Mr. HAMMERSCHMIDT, of the full committee, as well as my good friend and chairman of the Subcommittee on Housing and Memorial Affairs, Mr. SHELBY, for their diligence and commitment to this excellent program.

I urge the favorable consideration of this bill.

Mr. MONTGOMERY. Mr. Speaker, I yield myself such time as I might consume.

Mr. Speaker, I would like to also commend the gentleman from Arkansas [Mr. HAMMERSCHMIDT], who has certainly worked with the chairman; and also the chairman of the subcommittee, the gentleman from Alabama [Mr. SHELBY] and the ranking minority member, the gentleman from New Jersey [Mr. SMITH] for all the expedients, so that we could bring the bill up and have it before our colleagues today.

Mr. Speaker, I yield 3 minutes to the gentlewoman from Colorado [Mrs. SCHROEDER].

Mrs. SCHROEDER. Mr. Speaker, I want to compliment the distinguished chairman of the subcommittee and the full committee for working so hard to bring this to the floor, but I have a particular question that I would like to ask the Chairman.

What we are finding in Denver, CO, is there is lots and lots of refinancing going on as well as veterans applying for first-time VA loans because of the interest rate going down; and what has happened is that there is not staff enough to handle it, and some people are losing the sale on their house because they have a certain date by which the papers have to be processed, and there are just not enough people to process them in a timely fashion because VA has been so overwhelmed.

I am sure the committee has thought about that. Is there anything we can do about this staff crunch in this immediate time period?

Mr. MONTGOMERY. I will let the chairman of the subcommittee answer that.

Mr. SHELBY. If the gentlewoman will yield.

Mrs. SCHROEDER. I yield to the gentleman.

Mr. SHELBY. The bill, we are considering would make available an additional $4.2 million in the General Operating Expenses Account. We are going to be able to use money out of the revolving fund for appraisers and other things to help expedite the paperwork on these new loans. The workload has doubled at the VA, and I am sure it has in Denver and everywhere else. Last year I believe 179,000 VA loans were processed. This year the projection is for 400,000. That projection could be conservative if interest rates stay down.

The gentlewoman is exactly right; there is a backlog. They are now working overtime. We had a big retirement program where 73 loan guaranty people have gone who were experts in this area. So through this legislation we are going to bring on new people; we are going to have the money; and I am hoping in Denver and everywhere else we are going to be able to expedite these loans.

Mrs. SCHROEDER. I thank the gentleman, because I think that is very important: If we do, the money without having the people there to process it, it does not work. People's hopes get up and then they find out that the time goes by.

Mr. MONTGOMERY. Will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the gentleman.

Mr. MONTGOMERY. I thank the subcommittee chairman for answering the question very well.

Mr. Speaker, I would also like to point out that what we are doing today is an advantage to the Federal Government in that it secures the loans more. Instead of having to pay 13½ percent, if the veteran is allowed to refinance his or her loan at 9½ percent, that reduces the veteran's monthly payment by $60, $100, $200 or in some cases more. It also secures the loan for the Federal Government. Finally, it is a moneymaker for the Federal Government in that there is a user fee of 1 percent, that every time you refinance or obtain a new $100,000 loan, the $1,000 paid to the VA goes to the Loan Guaranty Revolving Fund.

So we think it is a good deal for the government. But as the gentle lady has pointed out, we do have some problems with processing the paperwork though. This bill will help alleviate the problem.

Mrs. SCHROEDER. I am delighted to hear that and I am delighted the committee took that into account. There is nothing worse than to have people think the money is there and then to find out nobody is there to really manage it.

Mr. MONTGOMERY. Mr. Speaker, I yield back the balance of my time.

Mr. HAMMERSCHMIDT. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi [Mr. MONTGOMERY] that the House suspend the rules and pass the Senate bill, S. 2416, as amended.

The question was taken.

Mr. HAMMERSCHMIDT. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous matter on S. 2416, the Senate bill just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

REPORT ON RESOLUTION WAIVING POINTS OF ORDER AGAINST CONFERENCE REPORT ON H.R. 2672, DESIGNATING NEW YORK INTERNATIONAL AND BULK MAIL CENTER IN JERSEY CITY, NJ, AS "NEW JERSEY INTERNATIONAL AND BULK MAIL CENTER," AND AGAINST CONSIDERATION OF CONFERENCE REPORT

Mr. BEILENSON, from the Committee on Rules, submitted a privileged report (Rept. No. 99-608) on the resolution (H. Res. 458) waiving certain points of order against the conference report on (H.R. 2672) to redesignate the New York International and Bulk Mail Center in Jersey City, NJ, as the "New Jersey International and Bulk Mail Center," and to honor the memory of a former postal employee by dedicating a portion of a street at the New York International and Bulk Mail Center in Jersey City, NJ, as "Michael McDermott Place," and against the consideration of such conference report, which was referred to the House Calendar and ordered to be printed.

□ 1320

EXPRESSING THE SENSE OF THE HOUSE THAT THE ATTORNEY GENERAL SHOULD EXAMINE EVIDENCE REGARDING ACTIVITIES OF KURT WALDHEIM

Mr. MAZZOLI. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 409) expressing the sense of the House of Representatives that the Attorney General should examine evidence regarding the activities of former United Nations Secretary General Kurt Waldheim during the Second World War and should determine whether such evidence requires that Kurt Waldheim be denied admission into the United States.

The Clerk read as follows:

H. RES. 409

Whereas the atrocities committed by the Nazis during the Second World War were an unprecedented affront to the dignity and conscience of all humanity and resulted in the death of millions of innocent people;

Whereas questions have been repeatedly raised about the wartime activities of former United Nations Secretary General Kurt Waldheim and his possible association with the Nazis;

Whereas substantial evidence has recently become available suggesting that former United Nations Secretary General Kurt Waldheim was a party to the crimes of the Nazis; and

Whereas section 212(a)(33) of the Immigration and Nationality Act (8 U.S.C. 1182(a)(33)) provides in part that any individual who, in association with the Nazi Government in Germany or with any government allied with or located in any area occupied by the Nazi Government of Germany, participated in the persecution of any person because of race, religion, national origin, or political opinion shall be ineligible to receive visas and shall be excluded from admission into the United States: Now, therefore, be it

Resolved, That it is the sense of the House of Representatives that the Attorney General of the United States should thoroughly and expeditiously examine all available evidence regarding the activities of former United Nations Secretary General Kurt Waldheim during the Second World War, including those documents obtained by the World Jewish Congress, to determine whether, as provided in section 212(a)(33) of the Immigration and Nationality Act (8 U.S.C. 1182(a)(33)), Kurt Waldheim is ineligible to receive visas and must be excluded from admission into the United States.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Kentucky [Mr. MAZZOLI] will be recognized for 20 minutes and the gentleman from California [Mr. LUNGREN] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Kentucky [Mr. MAZZOLI].

Mr. MAZZOLI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to briefly recount the legislative history of House Resolution 409 and to acquaint my colleagues with the activities of my Immigration Subcommittee and the full Judiciary Committee regarding it.

The resolution was introduced on April 8, 1986, and on April 10 referred to my subcommittee. Because the members of the subcommittee felt that time was of the essence, and that the resolution should be moved quickly, all of the members of the subcommittee, in a letter to Chairman RODINO on May 14, 1986, requested that the resolution be taken up by the full committee as quickly as possible.

H. Res. 409 was considered by the full Judiciary Committee this morning and was approved unanimously by a record vote of 31 ayes.

House Resolution. 409 expresses the sense of the House that the Attorney General of the United States should thoroughly and expeditiously examine all available evidence regarding the activities of former United Nations Secretary General Kurt Waldheim during the Second World War, including those documents obtained by the World Jewish Congress, to determine whether, as provided in section 212(a)(33) of the Immigration and Nationality Act (8 U.S.C. 1182(a)(33)), Kurt Waldheim is ineligible to receive visa to enter the United States should he seek entry.

The formal description here is whether Mr. Waldheim is excludable under our immigration laws

In 1978, the Congress amended the Immigration and Nationality Act by adding section 212(a)(33) providing for the inadmissibility of—

"(33) Any alien who during the period beginning on March 23, 1933, and ending on May 8, 1945, under the direction of, or in association with—

"(A) the Nazi government in Germany,

"(B) any government in any area occupied by the military forces of the Nazi government of Germany,

"(C) any government established with the assistance or cooperation of the Nazi government of Germany, or

"(D) any government which was an ally of the Nazi government of Germany,

ordered, incited, assisted, or otherwise participated in the persecution of any person because of race, religion, national origin, or political opinion.".

Since that date, 77 individuals have been denied visa under section 212(a)(33).

House Resolution 409 requests a complete investigation of Kurt Waldheim's activities and, on the basis of these investigations, calls for a determination of whether he should be denied a visa should he attempt to apply for entry into the United States.

I urge my colleagues' support of this resolution.

Mr. Speaker, I reserve the balance of my time.

Mr. LUNGREN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this resolution expresses the sense of the House that

the Attorney General should examine evidence regarding certain activities of former United Nations Secretary Kurt Waldheim during World War II. The resolution would require the Attorney General to determine if Mr. Waldheim should be denied admission based on this evidence in accordance with current Immigration law.

Section 212(a) of the Immigration Act sets forth those aliens to be excluded from admission into, or deported from, the United States.

This section, as amended in 1978, specifically excludes from admission; any individual who has been in association with the Nazi government in Germany or with any government allied with or located in any area occupied by the Nazi government of Germany and participated in the persecution of any person because of race, religion, national origin, or political opinion.

Mr. Speaker, I think this resolution is worthy of support.

That is why I joined my colleague from Kentucky, the distinguished chairman of our subcommittee, in requesting that the chairman of the full Committee on the Judiciary take this bill up without us having hearings on it and without us taking official action on it in the subcommittee.

At the same time, I would say that I do not view this resolution in any way as being critical of the administration. The administration, as I understand it and as I believe, has been pursuing this question. The Attorney General is charged with the responsibility of making the determination within his discretion. I believe he has been involved in such an investigation, and such an investigation is taking some time.

I would refer to a letter from the chairman of the full committee, PETER RODINO, to the Attorney General dated May 8th in which the chairman of the Committee on the Judiciary indicates that Mr. John Bolton, Assistant Attorney General of the United States, briefed Chairman RODINO and several of his colleagues on the Committee on the Judiciary on Wednesday, May 7 on the Waldheim matter.

The chairman goes on to say he believes this matter should be carried out with complete regard to the fundamental fairness and due process safeguards, but at the same time it should not be impeded or delayed by the possible political implications this investigation may have on the Austrian election or by the position formerly held by Mr. Waldheim with the United Nations.

I would say that I am in complete accord with the statement by the chairman that we do want to make sure that the investigation is in fact carried out with complete regard for fundamental fairness and due process and that it not be delayed unnecessarily. At the same time, I would hope that this is a manifestation of the fact that rather than being a dispute between the executive branch and the legislative branch on this matter, it is a manifestation of the agreement that exists between the executive and legislative branches that merely because of Mr. Waldheim's past position with the United Nations or his current position as candidate for office in his country of Austria, that ought not to have a bearing on whether this investigation should go forward and a determination made by the Attorney General.

COMMITTEE ON THE JUDICIARY,
Washington, DC, May 8, 1986.

Hon. EDWIN MEESE III,
Attorney General, Department of Justice, Washington, DC.

DEAR MR. ATTORNEY GENERAL: I thank you for having made Assistant Attorney General John Bolton available to brief me and several of my colleagues on the Judiciary Committee on Wednesday, May 7, on the Waldheim matter.

I must reiterate my view that the Department of Justice must proceed expeditiously in pursuing its investigation of Mr. Waldheim in order to ascertain the extent of his involvement, if any, in the commission of Nazi War crimes and the question of his ineligibility for admission under current Immigration law.

This matter should be carried out with complete regard to fundamental fairness and due process safeguards, but at the same time it should not be impeded or delayed by the possible political implications this investigation may have on the Austrian election or by the position formerly held by Mr. Waldheim with the United Nations.

I am pleased that Mr. Bolton has provided us with assurances that the investigation would be expedited and that it would be conducted without regard to political or diplomatic considerations. I trust we can have your personal assurances as well that this will be the case.

The possible inclusion of Dr. Waldheim in the "look-out" list maintained by the Immigration and Naturalization Service should be determined in accordance with the Immigration and Nationality Act and the administrative procedures used in this case should be identical to those that have been followed in other cases of this nature.

I would appreciate your response to the concerns I have raised and would request to be kept currently advised on the progress of this investigation.

Sincerely,

PETER W. RODINO, JR.,
Chairman.

Mr. Speaker, I would hope that all Members would support this resolution. I think it puts us on record in accordance with what is going on presently with the administration so that we will have all of the facts, the complete facts as they pertain to Mr. Waldheim and his activities during World War II.

Mr. LUNGREN. Mr. Speaker, I yield 5 minutes to the gentleman from New York [Mr. GILMAN].

Mr. GILMAN. Mr. Speaker, I rise in support of House Resolution 409, which expresses the sense of the House of Representatives that the Department of Justice should thoroughly and expeditiously examine evidence regarding the activities of former United Nations Secretary General Kurt Waldheim during World War II and should determine whether such evidence requires that he be denied admission to the United States under provisions of the Immigration and Nationality Act. I am a cosponsor of this resolution and I appreciate the work by its sponsor, the gentleman from New York [Mr. WEISS].

Mr. Speaker, I would like to point out that our Committee on Foreign Affairs has been active in investigating the foreign policy aspects of the Waldheim affair. Soon after the allegations about Dr. Waldheim began to surface, a staff investigative group looked into the matter during a stay in Vienna. Under the leadership of the gentleman from Pennsylvania [Mr. YATRON], the Subcommittee on Human Rights and International Organizations held hearings on this issue, and received testimony from the Simon Wiesenthal Center, the World Jewish Congress, and the son of Dr. Waldheim.

Mr. Speaker, it is obvious that Kurt Waldheim concealed important aspects of his wartime activities on many occasions. The American people are entitled to know how a man with such a background was elected Secretary General of the United Nations with the backing of the United States. Obviously, the past record of a German Army officer running for high office at the United Nations should have been of significant interest to the United States. Apparently, however, no serious derogatory information was uncovered at that time. Mr. Speaker, at this point in the RECORD, I ask consent that a letter from myself and other members of the Committee on Foreign Affairs to the Secretary of State, and the Department's reply, be inserted in full.

Our Nation has no interest in interfering in the internal affairs of other nations. At the same time, I should state, for my own part, that it is regrettable that notwithstanding the confirmed facts about Mr. Waldheim's coverup of his past, and the serious allegations which have raised regarding his participation in war crimes, the Austrian people have come very close to electing Kurt Waldheim as their President. It may be that a nationalistic reaction to the allegations has been deliberately stirred up by Waldheim and has helped him, rather than hurt him. This is a sad commentary on the degree to which the Austrian people have faced the reality of their past individual and collective actions in support of Nazism.

Whatever the decision of the Austrian people, the United States, having fought a war against Nazism and established the United Nations to assure

that it can never again threaten the world, has a special responsibility. Accordingly, I join my colleagues in calling upon the Attorney General to fully exercise his statutory responsibility with regard to his ongoing investigation of Kurt Waldheim, and I urge my colleagues to support the resolution before us.

Mr. STRATTON. Mr. Speaker, will the gentleman from New York yield?

Mr. GILMAN. I will be pleased to yield to my colleague from New York.

Mr. STRATTON. I thank the gentleman for yielding.

Mr. Speaker, the gentleman from New York has pointed out that there were, and he cited some information from the Simon Wiesenthal Foundation. But I wonder if the gentleman can explain why this individual, Simon Wiesenthal, who has relentlessly pursued all of the Nazis not only in the United States but around the world, has been one who has said that he does not think that Mr. Waldheim is a Nazi criminal?

Mr. GILMAN. I am unable to explain Mr. Wiesenthal's response to the allegations, and I am not aware fully of his report. I know that a report has been submitted to our committee.

Mr. SOLARZ. Mr. Speaker, will the gentleman from New York yield to me?

Mr. GILMAN. I would be pleased to yield to my colleague from New York.

Mr. SOLARZ. I thank the gentleman for yielding.

Mr. Speaker, just for the purpose of clarifying the record, let me say to my very good friend from New York that Mr. Wiesenthal has not said that in his judgment Mr. Waldheim was not involved in war crimes. What he did say was that he had not reached the final judgment on the matter but that he thought some of the people who are accusing Mr. Waldheim of having engaged in these activities were acting in a counterproductive fashion and were generating anti-Semitic responses in Austria.

Mr. MAZZOLI. Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. SCHUMER], who is the sponsor of a resolution which passed the other body on this very subject and is a major cosponsor of the resolution, which is before us, House Resolution 409.

□ 1335

Mr. SCHUMER. Mr. Speaker, I thank the gentleman from Kentucky [Mr. MAZZOLI] for yielding this time to me; and let me commend the gentleman for his leadership and alacrity on moving this issue. I am most appreciative.

Let me also thank the chairman of the full committee and the ranking member of the subcommittee for their help, as well as the gentleman from New York who drafted this resolution.

Let me say, ladies and gentlemen, that the Holocaust has taught us a lesson. The lesson is that those of us who are faced with allegations and possible bubblings up of Holocausts or other tragedies have an obligation not to stand by, not to rationalize, not to excuse. Rationalizations, excuses, and inaction are probably just as accountable for the death of millions as some of the perfidious people who created those deaths.

Mr. Speaker, we have here before us a resolution which is very simple. It urges that Kurt Waldheim be judged as any other person would be judged for his actions during the years 1941 to 1945 and no later.

The resolution asks that the Office of Special Investigations be given the same consideration with their recommendation for Mr. Waldheim as they have been given for every other Nazi and Nazi collaborator that they have recommended be put on the watch list.

We all know that there may be diplomatic considerations that will enter into any decision that is made, particularly after the Austrian election. There will be pressure from outside the Justice Department, perhaps from State, perhaps from some other quarters, that since Mr. Waldheim is a national figure and he might then be President of Austria, that we look the other way.

This resolution states firmly that we cannot look the other way, that what Mr. Waldheim did between 1941 and 1945 should be judged on their demerits, and anything he did subsequently should not abrogate what he did then. At best, Mr. Waldheim is a liar and a Nazi collaborator; at worst, he is a murderer. For this country not to put him on the watch list would be a tragedy, a moral tragedy and a political tragedy.

This resolution urges Justice to do the right thing. It is my hope and it is my prayer that jointly the legislative body and the executive branch will indeed do the right thing and judge Mr. Waldheim accordingly.

Mr. MAZZOLI. Mr. Speaker, I yield 2 minutes to the gentlewoman from Colorado [Mrs. SCHROEDER].

Mrs. SCHROEDER. Mr. Speaker, I thank the genteman from Kentucky [Mr. MAZZOLI] for yielding this time to me, and I thank the subcommittee for moving so rapidly on this.

Mr. Speaker, I think there is a real reason that we need to speak on this now. That is that we have always said that this is a government of laws and not of men, that all laws will be applied equally to men and women no matter what their rank.

I think it is important to say to the people of Austria as they go into this election that we will not waive the law if we find the facts to fit Mr. Waldheim. If we find that the facts fit him, then he goes on the watch list, whether he is citizen Waldheim or whether he is head of the Government of Austria, because our Government does not believe in making those distinctions. Everybody must comply.

We put the watch laws into effect in this country because we believe that what happened in World War II was so horrendous, so horrendous, that there is no defense, and we never, never want to see it happen again. And the defense to it cannot be what you would call Waldheimer's disease: "I don't remember." You cannot do that, Mr. Waldheim. You have to remember. You have to tell us what the facts are, and then we see if that meets the law.

The whole country of Austria cannot play that game either. I think we have always counted on them as strong allies. We want them to remain strong allies, but we certainly want them to know there is no way in the world that the United States is ever going to back up on its pledge to the free world that we will never allow what happened in World War II to happen again, and anybody who had any part of it cannot say that they forgot and, therefore, they can start over.

Mr. MAZZOLI. Mr. Speaker, I yield 5 minutes to the gentleman from New York [Mr. WEISS], who is the main sponsor of House Resolution 409.

Mr. WEISS. Mr. Speaker, I want to express my sincere appreciation and commendation to the distinguished gentleman from Kentucky [Mr. MAZZOLI], the chairman of the Subcommittee on Immigration, for moving so expeditiously with this particular resolution; and as well as to the gentleman from California [Mr. LUNGREN], the ranking member of that subcommittee; the gentleman from New Jersey [Mr. RODINO], the Chairman of the full Committee on the Judiciary; the gentleman from New York [Mr. SCHUMER], who has taken a leadership role on that subcommittee; and the gentleman from Pennsylvania [Mr. YATRON], who serves with me on the Foreign Affairs and serves as the chairman of the Subcommittee on Human Rights, and who held hearings on this particular important subject matter.

Mr. Speaker, House Resolution 409 expresses the sense of the House that the Attorney General should thoroughly and expeditiously examine all available evidence regarding the activities of former U.N. Secretary General Kurt Waldheim during the Second World War to determine whether as provided for in section 212(a)(33) of the Immigration and Nationality Act. He must be placed on the "watch list" and excluded from admission to the United States.

It has now been 2½ months since the release of documents showing that Dr. Waldheim is not the man we thought him to be. For years, Dr. Waldheim maintained that although he served in the German Army during World War II, he never belonged to any Nazi organization, and that he left active duty in 1941 after a leg injury.

Yet a flood of new evidence recently made public suggests otherwise. According to documents released by the World Jewish Congress and others, after his 1941 injury, Waldheim appears to have been not simply an interpreter for the German Army's group E, as he now acknowledges, but a special missions staff officer in the intelligence and counterintelligence branch, which waged bloody campaigns against civilians and partisans in the Balkans; that he did not "quietly oppose" Nazism as he had claimed, but rather may have joined three Nazi organizations; and according to the U.N. War Crimes Commission in 1948, there was sufficient evidence to prosecute Waldheim for "murder" and "putting hostages to death" while he was a German Army officer in the Balkans in 1944-45.

Each day more and more damning information comes to light about Dr. Waldheim's wartime activities—much of it retrieved from our own National Archives. This resolution does not seek to judge Dr. Waldheim. We do not have the authority to decide whether his activities during World War II should exclude him from admission to the United States.

What this resolution does is to urge the Attorney General to proceed expeditiously with his investigation of the Waldheim case, and to reach a determination about his admission status as quickly as possible. Once the Austrian election occurs next month, an impartial decision about Waldheim may become very difficult to make and probably much more difficult to implement.

The Waldheim case has been a disturbing matter for many Americans. Most disturbing, however, is Waldheim's response to these charges, when he suggests that the Holocaust is no longer relevant and should be forgotten. This attempt to forget Hitler's crimes is dangerous. Only by remembering the lessons of the past can we hope to make a better future. Those who tell us to forget the holocaust—or say it never happened—only pave the way to new tragedies.

To their credit, the Office of Special Investigations at the Justice Department has already looked into this case and recommended to the Attorney General that Waldheim be placed on the "watch list." I hope this resolution will persuade the Attorney General to take the next vital step toward clearing this issue up by ruling on Dr. Waldheim's admission status. But in any event, let this Resolution stand as a signal of the gravity with which this body regards the activities of those associated with the Nazis during World War II; and let it stand as a symbol of Congress' determination never to ignore or belittle the holocaust and the terrible deeds perpetrated by the Nazis during the Second World War.

□ 1345

Mr. MAZZOLI. Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. SOLARZ].

Mr. SOLARZ. I thank the gentleman for yielding.

Mr. Speaker, I want to join my colleagues in paying tribute to the gentleman from Kentucky [Mr. MAZZOLI], the gentleman from California [Mr. LUNGREN], and the other members of the committee who made possible the expeditious consideration of this resolution.

I do not know whether Kurt Waldheim is a war criminal. I do know, however, that the Government of Yugoslavia at the end of the Second World War charged him with involvement in war crimes. I do not know that the U.N. Commission on War Crimes put him on the "A" list of those individuals against whom they believed a prima facie case of involvement in war crimes had already been established.

I also know that the U.S. Army put Mr. Waldheim on a list in 1948 of suspected Nazi war criminals who were still at large, and I also now know, as do the rest of us, that Mr. Neal Sher, the gentleman in charge of the Office of Special Investigations in the U.S. Justice Department, has recommended to the Attorney General that Mr. Waldheim be put on the watch list.

I have been informed that never before has the Attorney General failed to respond affirmatively to such a recommendation from the Office of Special Investigations.

This resolution does not prejudge the issue, but it does call upon the Attorney General to act in an expeditious fashion in deciding whether or not Mr. Waldheim should be on the watch list.

I can imagine that the Attorney General would prefer not to have to make this decision at all. I can certainly understand why he might be hesitant to make it before the runoff election for the presidency of Austria in the next several weeks.

But it seems to me that he has an obligation to act in an expeditious fashion. If he were not to act, if he were to put off consideration of this matter until after the elections, he could just as easily be accused of engaging in an effort to influence the outcome of the Austrian election as he could be accused of attempting to influence the outcome of the election if he were to make the decision before the election were actually held.

This resolution calls upon him to make the decision in a timely fashion, just as he would as if an anonymous individual who did not have Mr. Waldheim's international reputation or political interest in Austria would have to make it under those circumstances.

And so I think, Mr. Speaker, that this resolution clearly expresses the view of the Congress that this is a decision that ought to be made in an expeditious fashion. I assume it will be passed overwhelmingly, if not unanimously. I can only express the hope that the Attorney General will heed the call of the Congress and decide whether or not to put Mr. Waldheim on the watch list.

Mr. LUNGREN. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from New York [Mr. FISH], the ranking Republican member of the full committee.

Mr. FISH. I thank the gentleman for yielding.

Mr. Speaker, I congratulate the gentleman from Kentucky [Mr. MAZZOLI], the subcommittee chairman, and the ranking Republican Member, the gentleman from California [Mr. LUNGREN], for the expeditious treatment that this measure has received, going before our full Committee on the Judiciary only this morning and coming out with a unanimous vote.

Mr. Speaker, I think that the action this body is taking this afternoon is very proper and appropriate, and I trust that the message here of expedition and the example set by the Congress of the United States in this matter will not be lost on the Department of Justice.

Mr. Speaker, the issue here, in my judgment, is not interference in the internal affairs of a friendly nation, in this case Austria. The issue, in my judgment, is, rather, the uniform application of the laws of the United States, a principle of the administration of justice that transcends all other considerations before us.

I look forward to a vote on this measure. I hope, as has been mentioned by my colleague from New York, that this will be a unanimous vote.

Mr. MAZZOLI. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan [Mr. LEVIN].

Mr. LEVIN of Michigan. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of the resolution.

There has been discussion about some of the details, and I very much congratulate the gentleman from Kentucky [Mr. Mazzoli] and the gentleman from California [Mr. LUNGREN] for expeditiously bringing up this resolution so that some of the facts can be brought out here. But I do not want to

speak to them. Others have. I just want to say a word about one of the points that has been raised during these last weeks, and that is the impact on Austria.

I have been walking around with a file of clippings the last few weeks, trying to assimilate how the Austrian people have reacted to these discussions, and I have heard people say, "Well, go easy on this matter; it may backfire. The Austrians have their backs up. They do not want outsiders talking about one of their leaders."

Well, all I can say, Kurt Waldheim's real past is in question. But I think as much so are the basic attitudes of the people of Austria.

In the next weeks and in the next months we are going to learn more about Mr. Waldheim's past. But we are going to learn even more, I think, about the Austrian people, whether they have learned from the lessons of the past.

I hope that we will quickly and unanimously pass this resolution.

Mr. LUNGREN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me just say again that I do support the adoption of this resolution. I might say that I appreciate all the accolades that have been thrown my way and the chairman's way. As we have discussed, I guess we are therefore responsible for having the fastest moving bill in the history of the Judiciary Committee this year as, alas, we are responsible for having the slowest moving bill through the Judiciary Committee this year, that some old immigration bill. As much as I support this bill and hope it is passed expeditiously, I only wish we had the same dispatch approach with respect to the overall immigration bill itself.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. MAZZOLI. Mr. Speaker, I yield 30 seconds to the gentlewoman from California [Mrs. BURTON].

Mrs. BURTON of California. I thank the gentleman for yielding.

Mr. Speaker, I want to join those who spoke on behalf of bringing this resolution to the floor expeditiously. I also want to commend the chairman, the gentleman from Kentucky [Mr. MAZZOLI], and also the ranking minority member, the gentleman from California [Mr. LUNGREN], for doing their utmost in bringing this legislation before the House.

Mr. Speaker, I am one of those who lost a lot of family in the Holocaust. To say that we should forget and not do anything about it, although the man is running for president of Austria, I think is a very bad point of view. I think we ought to do it now.

Mr. RODINO. Mr. Speaker, I rise in strong support of this resolution, which calls upon the Attorney General to "thoroughly and expeditiously" examine all available evidence regarding the World War II activities of former U.N. Secretary General Kurt Waldheim.

I have been urging the Justice Department to expedite its investigation of this matter ever since allegations were initially made by the World Jewish Congress and other Jewish organizations that Mr. Waldheim was deeply involved in Nazi war criminal activities.

In fact, because of my deep concern about this matter I convened a meeting in my office on May 7 which was attended by Justice Department officials and several members of my Judiciary Committee.

At that time, we were advised that an investigation was ongoing but that a final conclusion had not been reached by the Justice Department as to whether Mr. Waldheim is excludable under the provisions of our immigration law proscribing the admission on Nazis and Nazi collaborators.

In fact, during that meeting, the Justice Department denied that a final recommendation had been made by the Office of Special Investigations to place Mr. Waldheim in the Lookout book which contains the names of all persons who may be subject to exclusion. Some press reports had indicated that the Office of Special Investigations had made a recommendation to the Department of State that Mr. Waldheim be included in the automated visa Lookout system. During the meeting we were merely told that additional evidence was being reviewed and that any OSI decision was subject to review by other entities in the Justice Department.

On the following day, May 8, 1986, I wrote the Attorney General a letter reiterating my view that the Department of Justice "proceed expeditiously" with its investigation of Mr. Waldheim in order to ascertain the extent of his involvement, if any, in the commission of Nazi war crimes and the question of his ineligibility for his admission to the United States.

I also pointed out in my letter, which appears in its entirety in the committee report accompanying this legislation, that the procedures followed in Mr. Waldheim's case should be identical to those that have been followed in other cases of ths nature..

I strongly believe that Mr. Waldheim's international reputation, his current candidacy for President of Austria and his previous position at the United Nations should play no role whatsoever in this current investigation.

I urge my colleagues to wholeheartedly support this resolution and it is my hope that with its passage, the Justice Department will recognize that both Houses of Congress are committed to the prompt completion of the investigation into Mr. Waldheim's excludability.

Mr. MAZZOLI. Mr. Speaker, I thank my colleagues in the House for this discussion; I urge that the resolution be passed unanimously, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Kentucky [Mr. MAZZOLI] that the House suspend the rules and agree to the resolution, House Resolution 409.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

TRADE AND INTERNATIONAL ECONOMIC POLICY REFORM ACT OF 1986

The SPEAKER pro tempore. Pursuant to House Resolution 456 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 4800.

□ 1348

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself in the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4800) to enhance the competitiveness of American industry; and for the other purposes, with Mr. BEILENSON in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Illinois [Mr. ROSTENKOWSKI] will be recognized for 30 minutes; the gentleman from Tennessee [Mr. DUNCAN] will be recognized for 30 minutes; the gentleman from Washington [Mr. BONKER] will be recognized for 15 minutes; the gentleman from Wisconsin [Mr. ROTH] will be recognized for 15 minutes; the gentleman from Rhode Island [Mr. ST GERMAIN] will be recognized for 15 minutes; the gentleman from Ohio [Mr. WYLIE] will be recognized for 15 minutes; the gentleman from California [Mr. HAWKINS] will be recognized for 15 minutes; the gentleman from Vermont [Mr. JEFFORDS] will be recognized for 15 minutes; the gentleman from Texas [Mr. DE LA GARZA] will be recognized for 15 minutes; the gentleman from Kansas [Mr. ROBERTS] will be recognized for 15 minutes; the gentleman from Michigan [Mr. DINGELL] will be recognized for 15 minutes; and the gentleman from New York [Mr. LENT] will be recognized for 15 minutes.

The Chairman recognizes the gentleman from Florida [Mr. GIBBONS] on behalf of the gentleman from Illinois [Mr. ROSTENKOWSKI].

Mr. GIBBONS. Mr. Chairman, I yield myself such time as I may consume, and I rise in support of this

trade bill. It is a historic piece of legislation. I think as we start this debate we should try to lower our voices and think, and let us start back in the immediate post-World War II days.

The principles that we subscribed to then and the principles we subscribe to now are the same. However, the conditions in the world have greatly changed since that time. I guess I am privileged to be one of those who is old enough to remember the post-World War II days, and I can remember that there were no consumer goods in surplus in the United States or anyplace in the world, for that matter, in 1948, when the general agreement on tariff and trade was enacted, and there were no capital goods in surplus anywhere in the world.

So it made for a rather nice trading relationship. The demand was far higher than the supply, and so none of the nations at that time thought very seriously about dumping or about subsidizing their products into their trading partners' market. But of course, as everyone knows, today the conditions are far different from that. There is an abundance of consumer goods available for all markets. There is an abundance of capital goods. And it is in that environment that we now approach this bill. The competitive situation in the World has changed and has changed remarkably. We must respond to that change. If we do not, we do it at our own peril. Today, instead of having a demand-driven economy, we have a supply-driven economy, in which everyone is trying to get rid of their surplus goods—any they will do it by any manner or means that is available. Our laws have not simply kept up with this. We are not changing our principles, Mr. Chairman, we are changing our laws to reflect the changed conditions. These changed conditions mean that we can no longer allow people to subsidize goods into our market. We had agreed to that many, many years ago. We can no longer allow dumping into our market. We agreed to that many years ago. These are international agreements that I am talking about, and they must be vigorously enforced. But the laws that we have that do all of this go back to the 1940's, 1948, particularly, and they do not give a person an incentive to follow the law. As the law now stands, if you violate it, you are just slapped on the wrist and told, "Go forth, young man, and don't sin again," but you are forgiven. That encourages people to take predatory actions against our markets. This bill tries—and I think successfully tries—to switch that burden around. It puts a penalty on unfair trade practices in our market. It is the first time we have tried that. We have just really sought relief from it in the past. Now we say, "Observe the law. You know what the law is, and you disobey it at your own risk."

□ 1400

It sounds like to me it is a sound change that ought to be made; one that I urge us to make.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield myself 4 minutes.

Mr. Chairman, the bill we bring to the floor today is wrapped with doubt, frustration—and hope. It is a declaration that America's industry, farmers and inventors deserve the same competitive footing as our trading partners. We have waited long enough to respond to the disastrous decline in the nation's trade balance—and the competitive disadvantage it implies.

The Trade and International Economic Policy Reform Act of 1986 is an all-out congressional offensive to modernize and restructure American trade policy—and to check unfair trade practices that are costing this country jobs and a secure economic base in the future.

The bill was drafted by seven House Committees and locked together under the able direction of the House majority leader, JIM WRIGHT. Collected under one number—H.R. 4800—the bill states our concern that the traditional policy alliance between Congress and the White House is breaking down at the very time when the country's trade performance is weakening.

The statistics are staggering. During the past 4 years, the United States has accumulated a total merchandise trade deficit of almost $400 billion. The trade deficit nearly quadrupled between 1982 and 1985. Our current account balance deteriorated from a $6 billion surplus in 1981 to a nearly $110 billion deficit in 1985. For the first time since World War I our country has become a net debtor. And if present trends continue, our net external debt will exceed $500 billion by 1990.

Yet the administration's policy of benign neglect continues as if we were trading with the world as it was 40 years ago—when we dominated world trade—when we decided what was "GATT legal" and what wasn't—when we controlled the world's resources, manufacturing, and its richest market.

About all we still claim is the world's richest market. And the rest of the world is not above skirting the law to get to it. It is that flaw that has led to the distinction between free trade and fair trade—and it is the logic and the drive behind the bill we bring forth today.

It is not a perfect bill. Its force does not fall along party lines, despite administration portrayal. Unfair trade practices emerge in every State and every congressional district. To simply brand this bill protectionist is no more valid than calling tax reform a sop for the poor.

Tax reform and trade reform are not regional nor partisan priorities. Both demand that Congress and the President meet half way. We would be more than willing to address White House objections—had they worked with us in the drafting.

For the moment, we are going it alone. I only hope that in the weeks ahead we can mend some fundamental differences in the Senate and meet in the fall to finally set forth trade policy that our countrymen and our trading partners can understand—and respect.

Mr. Chairman, of the eight titles in H.R. 4800, the Committee on Ways and Means has written three: titles I, II, and VIII. Together, they address growing areas of foreign government intervention, such as foreign industrial targeting; toughen U.S. responses to foreign trade barriers that violate trade agreements; promote, through tough negotiations, foreign market access for highly competitive elements of our economy—such as telecommunications and intellectual property—in cases where our trading partners do not maintain the same fundamental fairness and openness as does the United States; reduce the excessive bilateral trade surpluses of countries that rely on systematic unfair trade policies; regulate new forms of injurious dumping and subsidies; and to end the chaos in U.S. trade policymaking by creating a single, central voice for coordinating and administering such policies—the U.S. Trade Representative.

Mr. Chairman, I urge adoption of this timely and effective legislation, and I reserve the balance of my time.

Mr. DUNCAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I had hoped to be able to vote for a bipartisan trade reform bill this year. Obviously, that opportunity is not available today.

We have before us two omnibus bills, one designed by your side of the House and one developed by mine. Because of the partisan ratio here, it's not hard to guess which measure has the better chance. All that we republicans can do is appeal to the sense of logic and fair play which we know exists on the other side of the aisle. We really believe we have a superior piece of legislation, one that would be equally helpful to U.S. exporters and importers, far more beneficial to American commerce and industry in general, and a clear signal that this country is ready to play hardball in world trade.

Let there be no mistake about my own views and concerns, as they have been reflected in the development of these two partisan measures.

First, there is no doubt in my mind that a bipartisan majority of us believe the time has come to toughen up

both our trade laws and their implementation. The people with whom we do business throughout the world must know that we no longer are willing to put up with unjust and inequitable practices. The international trade field has become tilted against us, and we want it leveled.

I also am concerned about the administration's role with respect to existing trade law. Over the past 8 months, section 301 cases have been pushed aggressively, other provisions of trade law have been used more often, and new bilateral agreements have been pursued with vigor. But I simply cannot overlook the possibility that had these steps been taken earlier, and with greater zeal, we might not be here today debating this kind of legislation.

In my view, the past several administrations have moved too slowly and not strongly enough in enforcing trade law already on the books. Although I firmly believe that existing statutes need to be improved, I also think they are not quite as inadequate as some critics have portrayed them. They do have teeth, they just don't bite hard enough.

But even if the administration has been somewhat slow in acting, the majority leadership in this House has been much too quick, and far too partisan, in reacting. H.R. 4800 is, in fact, a classic example of overreaction.

For example, H.R. 4800 decrees that the denial of certain internationally recognized worker rights is an unfair trade practice under section 301. This means, in effect, that if any country with which we do business appears to be in violation of this worker right provision, we should take that factor into account in determining whether we continue to do business.

And what are these worker rights? One of them has to do with minimum wages, another with collective bargaining, still another with safety and health standards.

Ironically, our own Government has not signed an official agreement on these kinds of rights, yet H.R. 4800 would have the United States sit in pious judgment on the way other nations deal with them.

Many of our trading partners, especially the less developed ones, would find such a provision of U.S. trade law not only impossible but insulting. I believe that worker rights should be set forth as goals for all countries, including ours. But they should be matters for negotiation, not exercises in hypocrisy and blackmail.

Another flawed provision of H.R. 4800 calls for establishment of a tripartite council on industrial policy. This is another big-government approach to problem solving—an approach that I believe the American people have rejected, and will continue to reject.

The proposed council would duplicate the work of existing advisory bodies, and cost too much additional money, at a time when we are desperately seeking ways to cut Government spending.

A third bad provision of H.R. 4800 would force the administration to take punitive action against any country which does not reduce its trade surplus with the United States by 10 percent per year. I certainly agree we should take action, especially against unfair practices, to cut all trade surpluses not in our favor. But this provision goes too far. It is illegal under international law, it would undermine our exporters, and it could make American agriculture very, very vulnerable. The countries adversely affected by this provision clearly can be expected to retaliate against us, and our agricultural products are prime targets. Our farmers have enough trouble; they don't need this kind of grief.

H.R. 4800 is loaded with provisions that are, at the very least, questionable. But in the interest of time—and I do not have very much in this debate—I will cite just one more example.

Under long-standing law, the Chairman and Vice Chairman of the International Trade Commission [ITC] are chosen by the President to serve 2-year terms. The Chairman may not be one of the two most recently appointed Commissioners nor of the same political party as the outgoing Chairman or the incoming Vice Chairman.

This procedure makes sense, and has brought a sharing of responsibility and leadership, a continuity of service and some independence and bipartisanship to the ITC.

H.R. 4800 would require the Senate to confirm the President's appointment of a Chairman and Vice Chairman and would allow even the newest Commissioner to head the organization. Although this change would, in my opinion, do nothing to improve the operation of the ITC or the performance of any Commissioner, my primary objection is based on the transparent motive behind it: to punish a particular Commissioner. As far as I am concerned, this is a terrible way to handle a congressional grievance against a Commissioner. It is devious, circuitous, and runs the risk of undermining the effectiveness of the ITC.

But this is consistent with the thrust of H.R. 4800 as a whole. It is a purely partisan, election year statement. Although its designers may not have so intended, it is likely to damage both farms and businesses cut the number of jobs available, bring our economic recovery to a halt, and lower standards of living for millions of Americans.

Our substitute would do none of these things. It would take away some Presidental discretion and strengthen the hand of our special trade representative. It would demand more executive action, and allow less time to take that action.

It is tough, but it is fair. I think it provides a responsible common ground for a wide variety of views and concerns which are held by Members of this body. I hope my colleagues on both sides of the aisle will accept it for what it is: a first-rate compromise.

□ 1410

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 2 minutes to the gentleman from New Jersey [Mr. GUARINI].

Mr. GUARINI. Mr. Chairman, I am very pleased to be here to lend my strongest support to the omnibus trade reform bill. We are living in a very sophisticated world of trade, and this bill offers a realistic approach. Put together by the expertise of seven committees, I think it attends to the problems that we have before us today.

In terms of trade, we have lost $150 billion last year, and over the last 5 years we have doubled each time, from $23 to $150 billion, and we are still escalating. This translates into 3 million jobs that were lost, U.S. industries lagging, and our national security being in peril.

We had to borrow $100 billion last year in order to meet our national debt. We are in an economic crisis, and this trade deficit is part of our whole fabric. We now have a $2 trillion national debt ceiling, with tremendous negative balance-of-payment accounts and debt service.

I think we have got to get our economy in order, and this is certainly a step in the right direction, and a historic one.

This legislation is very carefully crafted. It applies to the problems that we have before us today. It asks for a new round of GATT in which we can take care of the problems of Government procurement, subsidies, service industries, counter trade, and intellectual-property rights. Mindful that GATT had taken 7 years before, we have to do something else to send a very strong signal out.

The present practices of our trading partners are no longer acceptable, nor are the rules of GATT acceptable today. We must change them, but by the same token, we must certainly help ourselves by putting our President in a stronger negotiating position, and by passing these trade reform laws which would modernize section 201, give temporary relief and make it a little easier for our people to bring a cause of action. We must provide a trade remedy, depoliticize trade, natural resources recognize subsidies and provide compensatory damages for dumping.

I just want to add that this is GATT-consistent, it certainly is not protectionism, and the time is now to set right our trade laws.

Mr. DUNCAN. Mr. Chairman, I yield 5 minutes to the ranking Republican member on the Subcommittee on Trade, the gentleman from Illinois [Mr. CRANE].

Mr. CRANE. Mr. Chairman, I want to express by appreciation to our distinguished minority leader on the Committee on Ways and Means, the gentleman from Tennesssee [Mr. DUNCAN], who has done yeoman service in behalf of trying to provide a rational alternative to the "Son of Smoot-Hawley."

I think the designation "Son of Smoot-Hawley" to describe the handiwork that has come before this body is appropriate. H.R. 4800 represents a half dozen committees' input. It is a kind of a recrudescence, if you will, of what happened on the floor of this Chamber back in 1930, when every interest under the sun finally got its moment to add and contribute to what turned out to be the most counterproductive piece of trade legislation ever crafted in the history of this Nation.

I think it is important for us to put this whole debate in perspective at the outset. When Under Secretary of Commerce Bruce Smart appeared before our committee, he indicated that if the whole world practiced free trade right now, absolutely no restrictions or impediments anywhere, that that would have only a 10-to-20-percent impact on our trade deficit of last year. What that means, then, is with a $150 billion trade deficit, that in the best of worlds, if the whole world practiced free trade, that would only have been approximately a $120 billion trade deficit. It may have been as little as a $135 billion trade deficit if the 10-percent figure is correct.

What this suggests is that there is something infinitely more complicated involved in this debate than remedying trade injustices and especially moving in the counterproductive manner that the Committee is considering in H.R. 4800.

Amongst other things that we ought to take into consideration is our general lack of competitiveness. The Wall Street Journal had an interesting article that appeared recently in this connection describing some of the problems that we as a country have.

They noted:

From 1977 to 1985, labor costs per unit of output in manufacturing rose 50 percent more in the U.S. than in Japan, even though real wage costs per hour rose by 20 percent less in the U.S. The gap is thus 70 percent, of which changes in the exchange rate account for only 25 percent.

They continued:

During the past three years America's manufacturers increased their rate of productivity growth from near zero to about 3 percent * * *. However, Japan has registered 8-percent annual gains over a far longer period. As a result, its productivity has increased 45 percent more than that of the U.S. in the past eight years.

They concluded:

It is unlikely that U.S. manufacturers can sustain even the present 3-percent rate of productivity growth, because the recent gains were scored during an economic recovery. Moreover—

And this I underscore—

proposed tax-reform legislation is likely to retard capital formation and further slow U.S progress in this area.

This leads me to a second point. The second point is our tax laws. Our tax laws are still skewed against capital formation, and in fact econometric study that was run on the bill that was reported out of this Chamber last December indicated: First, it would vastly increase the cost of capital; second, it would retard growth in gross national product; third, it would aggravate the deficit picture; and fourth, it would aggravate unemployment.

The Senate may have added some refinements that modestly improve upon the House version of that tax bill, but every component of the Senate bill contains essentially the same assaults upon capital formation and puts these additional production costs on business, at a time when we are trying to improve our competitive position.

One other point I would like to stress has to do with stupidity on the part of congressional action vis-a-vis trying to shave down that margin of superiority and trade advantage that the Japanese have. Had we liquefied gas on the North Slope, for example, last year—and this is before the prices fell—that would have been an $11 billion export item to Japan in 1985. Had we freed North Slope oil for export, that would have been a $10 billion annual ticket. Had we permitted rawcut timber on our Federal lands to be exported to Japan, there is another billion.

What I am suggesting is that if that is the problem, our relationship with Japan in terms of trade imbalances, why do we not contemplate some of those remedies, instead of going down this garden path of erecting tariff barriers that can only impact adversely on American jobs, adversely impact on consumer costs, and simultaneously trigger a kind of reciprocity that will be devastating, especially to our agricultural interest, the No. 1 export of the United States. Our good friend, the gentleman from Nebraska, I know is working conscientiously in this area.

I urge the Members to defeat H.R. 4800.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 2 minutes to the gentleman from Missouri [Mr. GEPHARDT].

Mr. GEPHARDT. Mr. Chairman, our country has seen its competitive position erode over the last several years to unacceptable levels.

From the world's leading creditor nation, we have been reduced to the position of the world's largest debtor nation with a whopping external debt of $101 billion last year—and rising.

We have seen the trade deficit quadruple over the last several years to $148 billion. And we now hear that the trade deficit may top $170 billion this year—another record.

We have seen the loss of more than 1.7 million manufacturing jobs since 1981 and more than a half million farms forced to foreclosure due to decreased export opportunities.

Something must be done to stem the tide of eroding competitiveness and rising trade deficits. The provisions in the Ways and Means title will reverse this tide. It will strengthen America's export position by opening up markets that have been closed to us. But, we don't simply ask other countries to open their markets to our goods, we ask them to open their arms to the products of any country—that's what free trade is all about.

The Ways and Means title also improves the ability of the United States to respond to a wide variety of unfair trading practices that have resulted in products being dumped into our markets.

It will streamline and modernize the tools that our businesses need to compete effectively in a world marketplace on a level playing field with other countries.

Finally, it gives the President the authority to conduct a new round of trade talks to update the antiquated rules of free trade that don't acknowledge the trading system of the 1980's.

The Ways and Means provisions, along with the other titles in H.R. 4800, will help to restore America's position as No. 1.

□ 1420

Something simply must be done to stem the tide of eroding competitiveness and rising trade deficits. The provisions in the Ways and Means bill will reverse this tide. It will strengthen America's export position by opening up markets that have been closed to us; but we do not simply ask other countries to open their markets to our goods. We ask them to open their arms to the products of any country. That is what free trade is about.

The Ways and Means title also improves the ability of the United States to respond to a variety of unfair trading practices that have resulted in products being dumped on our markets. It will streamline and modernize the tools that our businesses need to compete effectively in a world marketplace on a level playing field with other countries.

Then finally, it gives the President the authority to conduct a new round of trade talks to update antiquated rules.

The Ways and Means provisions, along with other titles in H.R. 4800, will help restore America to its No. 1 position as a trade competitor.

Mr. DUNCAN. Mr. Chairman, I yield 2 minutes to the gentleman from New Hampshire [Mr. GREGG], a member of the committee.

Mr. GREGG. Mr. Chairman, we all recognize that there is a major problem in our present trade structure. There is no question but that our trade imbalance is something of serious concern. It is something which must be addressed and addressed effectively; however, the bill which is before us, presented by the majority in the House, is fatally flawed. It does not accomplish the goals we seek. It is really the $3 bill of trade. It is an attempt to counterfeit our way into a competitive position with other nations.

If you look at the bill, it has a number of very substantive problems. It has an amendment offered by the gentleman from Missouri, which was just referred to, which involves basically an arbitrary reduction of our trade relationship with three major nations. It is not based on the fact that they have done anything wrong in specific areas, but simply based on the fact that they have a surplus.

It has in it language which would require arbitrarily that our labor standards here in the United States be applied internationally, a situation which makes no sense, for internationally some international standards we do not apply here in the United States. Take, for example, many of the Canadian standards. Therefore, why should Canada have to assume our standards, or any other nation?

It creates an industrial policy position, a board called the Industrial Adjustment Advisory Committee, which is an arbitrary attempt to centralize the process of creating a more competitive situation here in the Untied States by having centralized Federal control of industrial policies, a situation which has never worked, an idea of the past which has failed.

It has in it also language which would create effectively a 3-year retroactive liability for American importers by making them liable for the process of buying when they have bought goods which have been dumped on the American market, even though they may not have known those goods were being dumped.

It will set American against American and it will not accomplish our general goal of trying to reduce the trade deficit.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois [Mr. HAYES].

Mr. HAYES. Mr. Chairman, I rise in support of H.R. 4800, Trade and International Economic Policy Reform Act, and in opposition to Congressman CRANE's amendment to section 301 of the 1974 Trade Act.

The huge trade deficit has had dramatic consequences for American firms and workers. Manufacturing has been hit particularly hard, with the loss of an estimated 2 million jobs due to imports. Even the traditionally strong export industries—agriculture, high technology, land services—have suffered substantial losses. Agricultural exports have fallen from $25 billion in 1981 to just $7 billion in 1985.

The deficit reached $150 billion in 1985, of which $113 billion was for manufactured products alone. This crisis has continued to grow in 1986 and the Reagan administration continues to pursue a business-as-usual policy. Mr. Chairman, the AFL-CIO has been working with Congress to help formulate a bill that would provide both immediate relief from our trade problems, as well as suggesting changes in trade law that will form the foundation of an effective national policy for the years to come. Although the final product does not contain all of the provisions that I, nor the AFL-CIO, believe are necessary to address the Nation's trade crisis, it does contain a number of important provisions concerning relief from unfair trade practices:

SECTION 301—RELIEF FROM UNFAIR TRADE PRACTICES

Section 301 of the current trade law was designed to provide the President with the authority to take all appropriate feasible steps to respond to practices of foreign governments that are unjustifiable, unreasonable, or discriminatory which burden or restrict U.S. commerce. Despite this board power, the President had rarely taken actions to defend domestic production confronted by unfair practices overseas. Major provisions are:

First, transfer of decisionmaking from the President to the U.S. Trade Representative [USTR].

Second, industrial targeting.

Increasingly, foreign governments are implementing industrial targeting policies directed at promoting and increasing the international competitiveness and market share of particular industries.

Provides USTR with the authority to take action in response to industrial targeting that causes or threatens to cause material injury.

Remedies to include tariffs, import restrictions, orderly marketing agreements or other domestic measures.

In the event of an affirmative finding, USTR would be required to take action to fully offset the material injury or threat for such injurious industrial targeting.

Third, trade deficit reduction.

Procedures are established to provide greater certainty of response on the part of the U.S. Government toward countries that maintain both unwarranted trade surpluses with the United States and unreasonable and discriminatory trade practices.

An investigation period would be provided in order to determine which countries maintain both unreasonable and discriminatory trade practices as well as an unwarranted trade surplus with the United States. Unwarranted trade surpluses would be defined as a ratio of exports to the United States to imports from the United States of 175 percent (nonpetroleum merchandise trade) or more.

Each country so identified would be required to reduce its 1985 surplus in calendar year 1987 by 10 percent and in each successive year until the U.S. trade deficit as a proportion of GNP is 1.5 percent or less, or such country's ratio falls below 175 percent.

Failure to achieve the deficit reduction goal in calendar year 1987 would subject said country to a series of escalating remedies.

Fourth, labor rights.

Competitive advantage in trade should not be derived from the denial of the right to freedom of association, the refusal to insure a safe work environment, the exploitation of child labor, or other such reprehensible practices.

Section 301 is amended to define failure to take steps to meet internationally recognized labor rights as an unreasonable act, policy, or practice.

As my colleague, DON PEASE, has argued, and I agree with him when he said:

> The worker rights provisions improve the * * * U.S. trade law by building in incentives for labor standards to move up in developing countries to some minimum level of respect for internationally recognized worker rights. We cannot afford to tolerate a trading system that pits American workers in competition with the lowest common international denominator on worker rights. The ability to sell in America, the world's greatest consumer market, is a powerful source of influence that ought to be used to spread the benefits of trade within countries as well as among them. It is just as true overseas as it is here at home that increasing the incomes of working people creates increased demand for more American exports which creates more American jobs".[1]

Mr. Chairman, these are some of the reasons why I support H.R. 4800. I hope that my words would help a majority of my colleagues to also give their support to this bill.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. MATSUI].

---

[1] Republican Don J. Pease, Dear Colleague, May 15, 1986.

Mr. MATSUI. Mr. Chairman, I urge strong support for H.R. 4800, the Omnibus Trade Act.

As we know, our trade deficit for this year is estimated to be in excess of $150 billion. For the first time since 1914 our Nation is a debtor Nation.

This bill, H.R. 4800, merely levels the playing field so that we open markets among our foreign competitors.

This is not a bill to protect our shores. It is a bill basically to open up markets of other countries.

It gives the President additional tools to negotiate and if he is unable to negotiate, then certain sanctions must be meted out by the President.

At the same time I think all of us have to admit, we do not have any illusion that this bill in and of itself will solve the macro-economic trade problems that our Nation faces today. That is a matter pertaining to monetary policy, fiscal policy of our country, Japan, West Germany, and many others of our trading partners.

But this bill will go a long way in bringing equity to our trading system.

I would like for a moment to discuss one other aspect of the bill, and that is the telecommunications part of the bill. As many of you know, many of us 5 or 6 years ago were saying that, well, we do not have to worry so much about our industries, even though steel and some of the heavy industries will go down because of Japanese steel and Korean automobiles; we still have our telecommunications industries. That is after all the technology of the future.

This shows why trade is such a major issue and why we have to act today. In 1981, we had a trade surplus in terms of telecommunications of over $1 billion. Unfortunately, in 1986 that surplus will turn into a deficit in excess of $1.2 billion.

This bill merely opens up markets so that we have a level playing field in America which is very competitive to compete on a fair basis.

Mr. DUNCAN. Mr. Chairman, I yield 2 minutes to the gentleman from Nebraska [Mr. DAUB], a member of the committee.

Mr. DAUB. Mr. Chairman, as a member of the House Committee on Ways and Means, I welcomed the opportunity this legislation offered to modernize our trade laws and combat unfair trade practices abroad. However, as the bill moved through the committee, my enthusiasm turned to concern and finally alarm over what the committee wrought.

The committee in its wisdom decided to take a golden opportunity for bipartisan trade reform and turn it into a political exercise carefully orchestrated play to some powerful but essentially special interest. I suppose I shouldn't have been surprised at the exercise, particularly considering the majority party leadership's affection for fawning over special interest groups.

However, there's no free lunch when it comes to trade. In attempting to bend over backward for a few special interests you going to have to take it out of the hide of farmers.

For years the farmer has been our best exporter, the American farmer generates the world's largest export volume of agricultural products. In 1985 the United States shipped nearly $30 billion of such goods overseas. Nearly one out of three acres the American farmer plants is for export.

The bill is riddled with anti-ag export provisions. The Gephardt amendment requires across-the-board reductions of imports from at least three major trading partners—these partners happen to be among our biggest buyers of ag products in 1985.

Europe—ranked No. 1 in purchases of U.S. farm exports at $6.5 billion;

Japan—ranked No. 2 at $5.4 billion;

Taiwan—ranked No. 7 at $1.2 billion.

These three partners alone bought over $13 billion from the American farmer in 1985—this approaches the entire outlays for CCC that year.

We already sit on the edge of an ag trade war with Europe over the EEC enlargement issue. Their actions are unjustified but shows their willingness to shut out American ag on the slimest pretext. The Gephardt provision won't be a slim pretext, it will be a justification that will stand up under GATT scrutiny.

The Pease amendment in this bill will permit unfair trade actions against trading partners which don't meet internationally recognized worker's rights.

Few purchasers of U.S. ag export buyers will meet this test.

The Carter grain embargo greatly damaged the American farmer and did little to punish the Soviet Union. The Pease amendment, like the Carter grain embargo, will put foreign policy objectives squarely in the way of farm exports, but this time it will involve many more countries than just the Soviet Union.

Lesser developed countries, which are our best prospects for farm market expansion, won't meet the Pease standards. And they won't buy from our farmers if we don't buy from them. They won't have the cash.

This is quintessential Carterism, and the farmer knows it. Jimmy Carter would love to sign the Pease amendment into law.

There are other major problems for farmers in this bill.

I am submitting for the RECORD a letter signed by 10 farm groups who are extremely nervous about the effects of this bill on agriculture. They know its strychnine for the farmer.

The Republican substitute eliminates the antifarm baggage this bill has but contains provisions, like full reciprocity and a new round of GATT negotiating authority, to fight unfair trade.

Let's cast a vote for farms, vote down this bill.

Mr. CHAIRMAN, I include the following letter to the chairman of the Ways and Means Committee:

NATIONAL GRANGE,
Washington, DC, May 19, 1986.

Hon. DAN ROSTENKOWSKI,
Chairman, Ways and Means Committee, U.S. House of Representatives.

Many of the legislative proposals to deal with our international trade deficit problems, including major elements of the House "Omnibus Trade" bill (H.R. 4800—The Trade and International Economic Policy Reform Act of 1986), pose serious dangers for our U.S. agricultural export markets. We urge you to weigh these issues carefully before supporting any measure such as H.R. 4800 which includes undue restriction of Presidential authority to consider all national interests and which has other proposals that would not conform to our obligations under the General Agreement on Tariffs and Trade.

Such proposals to deal with our very serious international trade problems would bring retaliatory action against our agricultural and other exports, would in other ways reduce the ability of our trading partners to purchase U.S. products, and would seriously jeopardize our chances for success in a new round of multilateral trade negotiations aimed at dealing with these problems more appropriately through an improved system of international trading rules.

While we agree that more aggressive action is still needed in the interests of the U.S. trading community to deal with unfair competition, the proposals of H.R. 4800 intended to strengthen Sections 201 and 301 of the Trade Act of 1974 have not been properly designed and would bring more damage than benefits to our national trade interests.

We would be pleased to join with Congressional and other trade leaders in encouraging the administration to step up still further its Section 301 and other initiatives of recent months, and to hold firm in its expressed intent to gain major improvements and reforms in the GATT through a comprehensive new round of negotiations which puts export subsidies and other critical agricultural concerns on the highest level of priority.

We believe that these issues of such great national importance deserve further consideration, in order to eliminate the dangers that we see in some of the proposals of H.R. 4800.

American Soybean Ass'n; Farm & Industrial Eqpt. Inst.; Grain Sorghum Producers' Ass'n; Millers' National Federation; National Ass'n of Wheat Growers; National Grange; Nat'l Soybean Processors' Ass'n; National Turkey Federation; The Rice Millers' Ass'n; United Fresh Fruit & Vegetable Ass'n.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 2 minutes to the gentlewoman from Connecticut [Mrs. KENNELLY].

Mrs. KENNELLY. Mr. Chairman, I rise in support of H.R. 4800, the Trade and International Economic Policy Reform Act. It is a sensible and re-

sponsible approach to the trade crisis that now confronts us.

Many times in the history of this country we have faced difficult challenges. As a united people we have worked together to overcome them, and grown stronger as a country. In my district, and in districts all over the United States, workers and business owners have been asking—when are we going to get serious about the trade deficit? When are we going to get serious about our jobs?

The bill before us today is deadly serious. It says that it is time to use the laws we already have to stop unfair trade practices. It says we can use those laws to discourage unfair imports, encourage American exports, and help our industries reassert themselves in the marketplace.

Mr. Chairman, the members of the committee have resisted the temptation to single out specific industries for special protection. Rather, we have concentrated on the big picture. We have streamlined, modernized, and expedited procedures. We have built timetables into the law. We have focused authority into the hands of the responsible officials. This legislation is not punitive: it is positive and constructive.

Every so often, debates in this country become polarized. The trade issue is now being characterized as one between free traders and protectionists. As a result, we get a lot of rhetoric, but nothing is resolved. This bill puts the subject of trade back in perspective. This body need look no further than the March 1986 trade deficit of $14.5 billion to realize that the time for meaningful trade reform is now. I urge my colleagues to join me in supporting this legislation.

Mr. DUNCAN. Mr. Chairman, I yield 2 minutes to the gentleman from South Carolina [Mr. CAMPBELL].

Mr. CAMPBELL. Mr. Chairman, today as we take up the discussion of trade in this body, I think we need to recognize that there are those who adhere to a policy of free trade, there are those who adhere to a policy of protectionism. Unfortunately, neither works, but somewhere in the middle we have groped through the years to general agreements on tariffs and trade and in specialty actions and such things as the multifiber arrangement to seek a reasonable way to trade fairly in this world. Our decision to seek this route allows this administration or any administration remedies against unfair practices.

The reason we are here today is the administration has not chosen to use the tools available to it to insist on fairness in international trade.

A few months ago we had before this body, and it passed, a bill on textiles and apparel. It passed overwhelmingly. It passed the Senate. It was vetoed. That veto message will be up on August 6 and this body will have a chance to override the veto.

The administration in the meantime has an opportunity to show that it will enforce existing laws. That is the way we should go, but if they do not, then this Congress under the Constitution has not only the right, but the obligation to exercise control over the trade practices of the United States.

As we consider this legislation, let us weigh the future of the wealth of this country, for that is what we are speaking of.

This bill is not a good bill. It is a political document, but it may be a political document that makes a statement that must be made.

In my opinion, the answer to that question rests in the hands of the administration.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio [Mr. PEASE].

Mr. PEASE. Mr. Chairman, I rise in support of this bill. I do so proudly. I think it is an excellent bill which will respond and does respond to the concerns of American citizens about the trading system of this world being a fair trading system.

I am particularly pleased, Mr. Chairman, to be the author of a section dealing with worker rights. To hear some people talk, it is none of our business whether the imports flooding into our country are made by workers whose most basic rights are repressed, but you might get a different answer to that question from one of thousands of young children, 10 to 14 years of age, in one Southeast Asian country who are sold into factory work by their impoverished rural parents for $20 to $100 per year. The typical workday for these young children is 15 hours a day, 7 days a week. They sleep in factory storerooms. They are fed only rice and vegetables.

In the name of humanity, we Americans ought to be concerned about those young children, but we also ought to be concerned because American textile workers making $6.50 an hour are trying to compete with children working under these conditions. That is not fair.

□ 1435

Americans know that is not fair. This administration can take a doctrinaire, free-trade, no-action approach if it wishes, but that is not going to satisfy the American people. We in the House, joined with Republican Members in the Senate, are going to write a trade bill that responds to the concerns of Americans. It is going to be a good bill.

I think Members of this House ought to go along right now and support it also.

Mr. DUNCAN. Mr. Chairman, I yield 4 minutes to the gentleman from Texas [Mr. ARCHER].

Mr. ARCHER. I thank the gentleman for yielding this time to me.

Mr. Chairman, H.R. 4800 should be named the "Boomerang Bill of 1986." It may appear to be pointed elsewhere, but its ultimate target is our own economic heart.

Its designers say they want to send a clear message to our trading partners. Well, they're sending one—no mistake about that. And the answer is certain to be: retaliation.

I understand most if not all of the motives behind H.R. 4800, and I sympathize, and agree, with many of them.

To a great extent, H.R. 4800 is just a political exercise. The House Democratic leadership has asked for this kind of legislation with the hope—a false one, I trust—that it will give their party a talking point advantage in the fall elections. I have no sympathy with that particular motive behind the bill, and I believe it, too, will boomerang.

But there are other motives. Some of our trading partners have not been playing fair. They have, in some cases, abused our laws as well as the rules of GATT. The United States marketplace has been a dumping ground for some foreign products, and certain U.S. goods and services have been, in effect, locked out of overseas sales.

Unfortunately, some people believe H.R. 4800 will right these wrongs. It won't. It will only make them worse.

One provision after another is written to have the ultimate effect of curbing imports into the United States. The countries that are adversely affected are not going to merely shrug their national shoulders, or become properly contrite and promise to do better.

That simply is not the way the world works. These other countries are going to retaliate. They are going to determine where we are most vulnerable and they are going to close their markets to the items we most want to sell to them.

In many instances, our vulnerability will be in agriculture. If I were an American farmer interested in overseas shipments, I would be absolutely furious over H.R. 4800. Anyone who believes our agricultural exports would not be damaged by this bill is fantasizing.

But this is not the only kind of retaliation H.R. 4800 would bring. Some of it would be less tangible, but equally as hurtful.

H.R. 4800 would add a new category of unfair trade practices. If a country did not provide certain worker rights, this would become a factor in determining punitive action under our section 301 statute.

The rights at issue include collective bargaining, minimum wages, and occupational health and safety standards.

These are rights which we in this Chamber might readily accept. But some of our trading partners would be unable to do so. Imagine, for instance, asking one of the relatively undeveloped States, with which we do a brisk and mutually advantageous business, to follow our OSHA rules. It would be a practical impossibility and could engender resentment in what had been a very friendly relationship.

The intent behind this provision of H.R. 4800 might be humanitarian, but the result would be the reverse.

If we really want to send our trading partners a recognizable signal that we demand fair play, we need another approach. We need to be more clever.

First, we might use more imaginatively and more often the laws we already have. Section 201—the old escape clause—section 301, and our antidumping and countervailing duty provisions are strongly worded. Stronger usage is called for, and our trade officials already are coming through for us. Over the past several months a number of aggressive steps have been taken. That course should be continued.

Second, we need to exert leadership in new international negotiations. The sooner a Reagan round begins, the better. We can try our case in this court of world opinion with skill and zeal. We have first-rate advocates and a good cause. Let's use them.

Third, we can develop bilateral agreements where broader efforts fail or our particular needs are better served.

Fourth, we can pursue basic economic policies that will enable us to compete more effectively across both the Atlantic and the Pacific. Our industrial and commercial base is improving.

But we need to do a better job here in the Congress. A sensible budget compromise, leading to tight spending limitations, would help a great deal.

If the deficit really is reduced, if interest rates stay low or drop even more, if inflation remains under control, and if we legislators can resist such temptations as the boomerang bill of 1986, we might—we just might—get ourselves in a better world trade position. It's worth a try, Mr. Chairman.

The committee adopted my amendment to clarify the criteria by which the International Trade Commission determines causation of material injury in investigations involving fungible products.

While fungible products are merchandise sold by weight or volume without significant product differentiation, the problem that I am attempting to address specifically relates to decisions by the ITC where United States industries have not been considered to be materially injured by imports even though imports have been found to be sold in the United States at less than their fair market value.

I think it is important to note that, under my amendment, the ITC could not reject a finding of material injury solely on the basis of any of four factors that include price leadership, parallel price reductions in other related markets where imports are not present, the fact that U.S. producers also import the merchandise or that U.S. producers are not losing money overall, even though their profits are reduced due to the imports' impact on the market.

The markets for fungible products are extremely price sensitive and the introduction of imports through actual sales or offers for sale can severely depress prices and disrupt the markets to the point where domestic producers may be forced to purchase the dumped products themselves in order to protect market share and to maintain their distribution networks.

The demand for many fungible products is dependent on demand for the product for which they are components. Sales of cement, for example, fluctuate depending on the level of construction activity. Price ordinarily rises when construction activity increases and declines when demand slackens. Companies who make fungible products for which there is such a fluctuating demand expect to make low profits or lose money during periods of slack demand. In such a case, an industry's profitability may be depressed by imports but it could be denied relief solely because it was not losing money at that point.

There should be a clear preponderance of evidence in order for the ITC to make a finding of no material injury in a case where imports at less than fair market value have been found. I believe that this amendment will accomplish that purpose.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 1 minute to the gentleman from Michigan [Mr. LEVIN].

Mr. LEVIN of Michigan. I thank the gentleman for yielding this time to me.

Mr. Chairman, so far we have nothing but promises, promises, promises about our trade deficit, promises from the administration that present laws were enough, but they have not been; promises from the administration that its belated action on the dollar imbalance would reduce the U.S. trade deficit, but it has not; promises from the Japanese of a new action plan and of open doors, but the doors remain far more shut than open.

It has been said on the floor that this bill constitutes overreaction. The possible overreaction is far more defensible than inaction. It is said that we should remember 1930. True. But it is vital to remember what has been happening since 1980 and what could happen to U.S. industries by 1990.

Today and tomorrow, action, action, action will replace promises, promises, promises.

Mr. ROSTENKOWSKI. Mr. Chairman, I yi·d 1 minute to the Delegate from the District of Columbia [Mr. FAUNTROY].

Mr. FAUNTROY. I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in support of H.R. 4800, a bill designed to enhance the international competitiveness of American industry. In recent years, we have witnessed the relative deterioration of industrial competitiveness in the United States of America. At the same time, other areas of the globe, including Europe and Japan, have achieved remarkable economic progress while other less developed countries have developed export-based programs of economic growth. It is quite clear that in 1986, the clock cannot be turned back; rather, we must forge ahead.

While a portion of the increased competition in the rest of the world follows in the course of economic development and is due in part to superior management skills, and so forth, some of it has been attained through other noncompetitive vehicles, including excessive Government involvement in export promotion and protectionism, super-exploitative wages, and fluctuations in the value of foreign currencies. This, combined with the uncoordinated macroeconomic policies being pursued by major trading partners of the United States, has resulted in an increasingly unstable economic environment, one in which the competitive position of the United States is increasingly undermined.

The following statistics shed some light on the growing role of international trade:

U.S. exports as a portion of GNP, increased from about 5.7 percent in 1960 to 8.9 percent in 1981.

U.S. exports, as a percentage of world exports, have declined from 25.3 percent to only 11 percent, though the dollar amounts have increased from $28.9 billion to $223 billion.

Thus, not only has U.S. trade increased as a portion of GNP, but the United States has endured a decline in its share of world trade. This decline in U.S. share of world trade reflects a decline in a rapidly expanding seemingly infinite universe. Even as the share has been halved, the dollar amount of U.S. trade increased tenfold. These statistics together indicate that economic growth in 1986 is marked by interdependence.

The volatility within the economic environment has thwarted further increase in U.S. exporting capability, as our leadership has remained mired in principles of "free trade." H.R. 4800, by contrast, acknowledges that reality has changed.

The banking portions of H.R. 4800 are designed to address many of the concerns both my colleagues on the Banking Committee and our constituents have with regard to international trade. The measures for international monetary reform, for increasing the effectiveness of multilateral institutions, for competitive exchange rates, and for a council on industrial competitiveness, all direct themselves at the heart of the problem. These meas-

ures may not be perfect in all respects, but at the very least they address the central issue, namely the interdependence of the international economy.

In a world engulfed in interdependence, up until last September, the Reagan administration continuously ignored this fact, and it continued to argue in favor of an ideological approach based on laissez-faire. Finally, in September, the administration acknowledged that "free trade" is not free, but rather costly, when measured in terms of mounting trade deficits and American jobs.

Although the intervention undertaken by the Group of Five last fall deserves our approbation, it is not sufficient. While the dollar has fallen substantially since September, this is only a first step toward correcting the course of the international economy. We need to move further down this road and provide additional measures to ensure that American workers and industry are not competing on a playing field that is tilted away from the United States.

I oppose protectionism. However, as one of our colleagues in the Senate stated recently, the Reagan administration has labeled as protectionist "anything that walks," including H.R. 4800. Unlike the Reagan administration, I know there are no alternatives if we want to compete with those countries paying their workers less one-sixth of what we pay our own. That is a fact. As to whether such industries, including textiles and machine tools, deserve to be protected is a public policy question with important economic security implications. These industries need to be examined individually and the appropriate public policy decisions reached accordingly.

In addition to the areas of wage differentials, productivity concerns and international exchange rates, we should examine our competitiveness and management structure. Here again, Mr. LAFALCE'S contribution, namely, the Council on Industrial Competitiveness, would allow us to begin to do just that. The council, as the document states, is designed to "develop and promote policies which enhance the productivity and competitiveness of U.S. industries."

If this bill can indeed be faulted on any grounds, they probably relate to its length. However, packaged inside the 450-plus pages of the bill are numerous trade policies which, I believe will enhance the competitive position of the United States, while leading to increased international economic stability. While this package is by no means perfect, it begins to address what has been a long time in coming, namely, a trade policy. H.R. 4800 argues that we must acknowledge the world beyond our borders—we must recognize that we need our trading partners as much as they need us—and we must shape a coherent trade policy which acknowledges in nonideological fashion, the growing importance of the international economy.

Mr. DUNCAN. Mr. Chairman, I yield 1 minute to the gentlewoman from Maine [Ms. SNOWE].

Ms. SNOWE. I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in strong support of H.R. 4800, the omnibus trade bill of 1986. This represents our chance finally to create a fairer opportunity for those industries which have been bludgeoned by imports and abandoned by our laws.

Time after time when we have witnessed the demise of another industry, or another mill or plant shutting down in this country, we have come to hear, like a broken record, the dismay of our workers who, through no fault of their own, are told their product is not competitive.

The message from our workers in trade-sensitive industries has been loud and clear for those who listen. While trade is a complex subject with complex problems to solve requiring complex solutions, I believe it all comes down to this: U.S. trade policies aren't working. The U.S. trade deficit, reaching almost $150 billion in 1985, graphically points out that we are losing our competitive position in country after country and product after product.

As we debate this legislation, we are a Nation whose trade laws bear little relevance to the world marketplace of the 1980's. The experiences of my district illustrate this sad fact all too clearly.

Maine's shoe, textile, lumber, fishing, and potato industries have all been buried by surging levels of imports and unfair foreign trading practices, including Government subsidies. I have seen thousands of workers in my State lose their jobs, and hundreds of firms close their doors, all because our trade laws are not tailored in any reasonable way to our businesses and workers.

The shoe industry, for example, is experiencing 82 percent import penetration, and sees over 750 million pairs of shoes enter this country annually. Japan, though, only allows 1 million pairs annually, and Brazil, with its then-100-percent tariff, allows virtually no shoes. In this light, the footwear industry filed a trade relief petition under section 201, and a 5-year temporary quota system was recommended by the ITC, but rejected outright by the President. A devastated industry which followed the prescribed course of our trade laws was instead abandoned under those laws. Since that time, there have been monthly increases in footwear imports as high as 30 and 40 percent.

As many of my colleagues in this body are aware, the footwear industry has pursued relief under our trade laws for many years, and has lived a complete nightmare ever since. But having worked through an established administrative relief process, and having demonstrated very clearly the need for a temporary opportunity to modernize, this industry became a victim of the enforcement side of our trade equation.

The President's denial of the footwear industry's petition was wrong, and this industry's inability to get any kind of meaningful trade assistance from this Government is almost shameful. Unfortunately, that is, more often than not, the kind of attitude some have taken in opposing any meaningful remedies to industries hurt by imports.

The timber industry faces similar import problems. Right now, 80 percent of the timber sold in the Northeast comes from Canada, largely because of an unnatural price advantage. The Federal and Provincial governments in Canada sell their timber to Canadian companies for 10 percent of the free market cost—a 90 percent subsidy. But under our existing trade laws, this practice is not considered a subsidy. So, when the timber industry pursued a countervailing duty case, they lost—because the largest unfair trade provision was excluded from consideration.

The fishing industry has also suffered from Canadian imports. Maine fishermen have been living with depressed prices in recent years due to 55 Federal and Provincial Canadian subsidy programs. On April 30, the industry received a positive injury determination on its countervail case for fresh groundfish. However, the ITC did not find injury for processed fish, which are every bit as subsidized as fresh goundfish. Nevertheless, this countervail determination marked the first time that our Government has officially confirmed that Canada's fishing industry is heavily subsidized, and that the effect has been most damaging for Maine and other New England fishermen.

Finally, there is the sad plight of the potato industry. In part because of imports from Canada, Maine potato farmers are receiving about $1 for a 165-pound barrel of potatoes which cost them $9 to produce. Canadian farmers, however, are the beneficiaries of at least 27 distinct subsidy programs. In light of these subsidies, Maine's potato industry filed an antidumping case. Three years later—3 years of $250,000 in expenses that the economically strapped farmers could ill afford—their case was denied. Once again, an industry which has been reeling from imports found no refuge in our trade laws.

With each of these industries, Mr. Chairman, I could give you a history of their courageous efforts to utilize our existing trade laws to pursue relief from out-of-control imports. In each situation, the years have gone by as their market shares have dwindled. The concerted efforts of our foreign competition to seize our markets at our expense, and the inability of these industries to get a meaningful, positive response from the U.S. Government, has been a combination impossible to overcome.

These examples, and others, make it indelibly clear that the United States operates at a self-imposed disadvantage in the international marketplace. It is essential that the House adopt the legislation before us today. It is essential that the House adopt the legislation before us today. Obviously, the various provisions of this legislation do not represent a magic solution. Transferring decisionmaking authority to the USTR, inclusion of natural resource inputs in countervailing duty cases, fast-track temporary relief for perishable products and other provisions, however, offer a substantially improved opportunity to domestic industries.

It does, however, finally create a useful tool out of our trade laws. These provisions are the legislative embodiment of the approach to which we can no longer give lip service—fair trade. Fair trade will not take place if we cling to the notion that international trade is somehow "free." The sooner our actions show that unfair trade practices will not be tolerated, the sooner the competitive abilities of our workers and industries will once again assert themselves.

Mr. Chairman, this legislation sets out to correct our trade policies in a meaningful way. Last month, I had an opportunity to testify before the Ways and Means Trade Subcommittee on this legislation during their hearings. I testified that if I had to summarize what I believe needs fixing, it would be this: First, there should be less discretion available to the President to reverse the rulings of the ITC and other agencies which make trade determinations.

Second, there should be more consideration given to the fact that trade relief is temporary and that an industry should be given more opportunities to modernize to face the international competition. Third, there needs to be a tighter time schedule built into all of the major trade laws and avenues taken by industries in pursuit of trade relief. Finally, our trade laws need to be more practical for the problems our industries face. We see too many loopholes that prevent industries, such as ours in Maine, from obtaining the trade relief they deserve from this Government.

The solution, to summarize our difficulties, is to tighten up and expand the applicability of U.S. trade laws and to utilize our improved laws by enforcing our rights in the world trade arena to be able to compete fairly. I believe the legislation we are considering today is a step in the right direction.

I am particularly pleased that this legislation includes reforms to sections of our trade laws designed for trade relief: including section 201, section 301, and the countervail and antidumping provisions. I support the transferral of the administrative authority to the U.S. Trade Representative, but as the USTR is still part of the administration, we should not expect different policy directions from the White House to emerge from this adjustment.

I also strongly support the inclusion of natural resource inputs as actionable under countervailing duty laws, which closes a very large loophole many nations have taken advantage of. For example, with Canadian timber, right now the Canadian Government sells its timber to Canadian companies for 10 percent of the real market value, and as a result, our lumber has been undercut consistently in markets across this country. This provision to constitute resource inputs as subsidies is an important step forward.

I also support a provision to allow for fast-track consideration of trade petitions representing perishable products. If this provision had been in place earlier, it might have made a world of difference for Maine's potato industry, which had to wait 3 years for a final determination on their trade case. The potato industry and other perishable industries need a better recourse to pursue relief without being strung out waiting for decisions for years, and this provision should help.

In many other areas, this legislation also is positive, including the authority for the administration to pursue a new GATT round with clarified objectives, the addressing of remedies to telecommunications trade, and the better protection of intellectual property rights. I see these changes as being positive and necessary.

One disappointment I have, however, with this legislation is with respect to extending tariff-cutting authority as part of a new GATT round without an exemption for import-sensitive products. For example, at a time when a number of textile and footwear products are being crippled by cheapened imports, this could serve to literally wipe out certain products whose only buffering from complete destruction is the existence of U.S. tariffs.

Under this bill, import-sensitive products whose tariffs are under consideration to be reduced will require fast-track approval by Congress. My concern is that many import-sensitive industries, including the shoe and textile industries, are already at the end of their ropes due to import surges and unfair trading practices by other foreign governments. The administration needs to know that we will not allow the rug to be pulled completely out from under these import-battered industries at a time when they need our help the most.

Finally, I want to make it clear that I believe unless this Government is willing to take a step forward to enforce our laws and look out for our best interests at home and abroad, we won't see the kind of improvement in the trade arena that we desperately need, and for which this legislation is intended.

Mr. Chairman, I urge my colleagues to support this legislation, and to restore a slim measure of hope to the battered industries and pressured workers of my district and this Nation.

Mr. DUNCAN. Mr. Chairman, I yield 5 minutes to the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. I thank the gentleman for yielding this time to me.

Mr. Chairman, as we debate H.R. 4800 today, we should keep in mind that it is an issue under consideration, not a bill. The issue is whether to make our national trade policy a hostage to special interest protection and election year rhetoric.

The administration has called this bill defensive and defeatist, and it seems that most U.S business and agriculture interests agree. This bill scoffs at our international obligations and gives only lipservice to future negotiations as a means to resolve trade disputes. It totally ignores U.S. export interests and the major role U.S. exporters continue to play in international markets. The bill focuses on failure and asks us to regress into protectionism as a way to solve our mounting trade deficit. Do they expect the American people to be so naive?

The underlying premise of this legislation is that the United States should from now on behave like a child when it comes to international trade; stamp its foot; demand to have its own way and, if that doesn't work, take all the marbles and go home. Never mind that we kick U.S. exporters in the shins on the way or that we would be going home to higher prices, domestic chauvinism, and future uncompetitiveness. Is this what the Congress and the American people really want? I have faith that it isn't so.

There has been much wringing of hands, about the administration's failure to develop a coherent trade policy and to do something about the trade deficit. Many have jumped on the rhetorical bandwagon. Yet this administration has been more active than any previous administration in using our trade laws, especially section 301 cases,

and have not been hesitant about taking action when negotiations fail. The administration, as have past administrations, continues to pursue a trade policy that calls for effective enforcement of our trade laws, active negotiations to resolve outstanding disputes or new areas for GATT coverage, and free and fair competition with as little Government interference as possible. I am confident this administration will continue this policy and not follow the destructive example H.R. 4800 has laid out for them.

Mr. Chairman, at this point I insert a list of administration actions to redress trade grievances or open new markets.

The list follows:

TRADE POLICY ACTIONS AS OF MAY 16, 1986

As a part of the President's trade policy announced September 23, 1985, the Administration has:

Taken the unprecedented step of self-initiating Section 301 unfair trade cases on: Brazilian informatics market and investment restrictions (9/13/85); Korean fire and life insurance market restrictions (9/13/85); Japanese market restrictions on tobacco products (9/13/85); Korean lack of protection for intellectual property rights (10/16/85).

Self-initiated for the first time a Section 305 investigation to gather information on the potential trade barrier posed to U.S. meat exports by the proposed EC Third Country Meat Directive (3/31/86).

Initiated the first case ever brought under Section 307, initiating an investigation of Taiwan's automotive export performance requirements (3/31/86).

Achieved a negotiated resolution on the issue of Japan's market restrictions on leather and leather footwear (12/20/85). Japan agreed to compensation through reduced tariffs worth $236 million in increased market access and the U.S. will impose prohibitive tariffs on $24 million of Japanese leather exports to the U.S.

Announced a GATT Subsidies Code case against European Community wheat export subsidies (10/16/85).

Secured market-opening concessions from Taiwan on tobacco, wine, and beer in response to the threat of a 301 case (10/16/85).

The Administration has formed the President's strike Force on Trade, chaired by Commerce Secretary Baldrige, to identify specific trade barriers which may require further action. To date, the Strike Force has:

Recommended to the Economic Policy Council in November 1985 that the U.S. Government initiate an antidumping investigation on 256K DRAM (Dynamic Random Access Memory) and above semiconductors from Japan. The USG self-initiated the antidumping investigation December 6, 1985. This is the first time ever that the Department has self-initiated an unfair trade investigation outside an established program such as the Steel Trigger Price mechanism. The International Trade Commission found preliminary injury (5-0) on January 22, 1986. The Department of Commerce announced preliminary dumping margins on March 13. A final dumping determination is expected by May 30.

Recommended to the Economic Policy Council in January 1986 that the United States Government undertake informal consultations with Airbus Governments, (France, Federal Republic of Germany, United Kingdom) to contain or eliminate unfair trade practices on current and future Airbus programs. The first round of discussions took place March 20-21 in Geneva. As the issue remains open, a second round of discussion will take place in June.

Recommended to the Economic Policy Council that a comprehensive strategy for dealing with unfair intellectual property rights practices be undertaken. This strategy, announced April 7, 1986, includes: a legislative initiative; intensified bilateral pressure through consultations, possible denial of GSP benefits, and possible 301 cases; heightened multilateral efforts; and an Administration policy statement on intellectual property rights.

The working group level of the Strike Force is considering many issues, some of which are being developed further. These issues will be forwarded to the Strike Force over the next few weeks.

We have moved to resolve four disputes with the European Community:

We have reached agreement with the EC under the President's steel program which provides for voluntary restraints on most European steel exports to the United States through September 1989. To remedy the problem of diversion by EC exporters from licensed products to semi-finished steel, as of January 1, 1986, the U.S. imposed quotas on imports of EC semi-finished steel.

In December 1985, we negotiated resolution of the EC canned fruit case, obtaining an EC commitment to reduce its production subsidy by 25 percent by July 1986 and eliminate it entirely by July 1987.

Following the failure of the U.S. and EC to reach a solution on the citrus problem by the agreed October 31 deadline, on November 1 the U.S. imposed duties of 40 percent ad valorem on EC-origin pasta products not containing egg and 25 percent ad valorem on EC pasta containing egg. We have, however, continued to discuss this case with the EC and would prefer a negotiated solution which would enable us to put this case behind us.

On 5/15/86, announced a specific response to new EC restrictions on U.S. grain and oilseeds exports to Spain and Portugal as a part of the terms under which those countries joined the EC in January 1986. In response to the EC's quotas on U.S. agricultural exports to Portugal, the U.S. will impose quotas on certain agricultural products from the EC: white wine valued over $4 per gallon, chocolate, candy, apple or pear juice, and beer. These quotas will be adjusted to mirror the trade losses caused the U.S. by the EC's restrictions. With respect to the variable levy imposed in Spain, announced that in 30 days the U.S. will withdraw tariff "bindings" (GATT agreements not to raise tariffs above a certain level) and increase those tariffs if the EC does not provide adequate compensation by July 1.

On the bilateral/multilateral front, we have:

Welcomed Canada's initiative for a possible bilateral free trade arrangement and have begun discussions on Canadian softwood lumber imports.

Secured agreement of our GATT trading partners to establish a preparatory committee for a new round of multilateral trade negotiations. We expect the round to be launched at a meeting of trade ministers scheduled for September 1986.

Undertook Market-Oriented Sector-Specific (MOSS) discussions with the Japanese in four areas: telecommunications, medical equipment and pharmaceuticals, electronics, and forest products. Major problems related to implementation of Japan's new telecommunications laws as well as the radio wave law have been resolved. In the medical equipment and pharmaceuticals area, agreement has been reached in most of the contentious areas including acceptance of foreign clinical test data, faster approval procedures and transparency in the insurance reimbursement system. Key achievements in the electronics sector are chip protection legislation, software copyrights and computer parts duty elimination. In addition, an agreement has been reached on wood product tariff cuts as well as on a significant reduction in paper duties.

Initiated Market-Access Fact-Finding (MAFF) talks on telecommunications trade barriers in Europe. The first market access discussions were initiated with Germany last December. The discussions allowed us to gain useful information on procurement practices, standards and regulations governing enhanced services. We will now assess the detailed, technical information which was provided and evaluate the "openness" of the German telecommunications market to U.S. suppliers. We held similar talks with the Italian Government in April and expect to begin consultations with other European countries in the near future.

Signed an agreement with Japan on the elimination of tariffs on computer equipment and parts and with Canada on the elimination of tariffs on computer parts and semiconductors.

We are continuing vigorous enforcement of AD/CVD laws. We have 47 investigations ongoing and there has been over a 200 percent increase in AD/CVD cases processed from 1980 (50) to 1985 (133).

Most significant AD/CVD cases since September 1985.

Completed cases with affirmative findings of dumping or government subsidization: Japan/cellular mobile telephones on October 24, 1985; Brazil/fuel ethanol on January 21, 1986 (n.b. the International Trade Commission found "no injury" so case was terminated); Saudi Arabia/carbon steel wire rod on January 27, 1986; Canada/groundfish on March 14, 1986; Korea/Offshore platform jackets and piles on March 31, 1986; Japan/Offshore platform jackets and piles on March 31, 1986; and Japan/64K semiconductors on April 23, 1986.

Pending cases of dumping or government subsidization: Japan/EPROM semiconductors due July 30, 1986; and Japan/256K semiconductors due August 1, 1986.

We have also moved forcefully to deal with unfairly subsidized competition in our export markets:

Countered foreign subsidized agricultural exports by concluding sales under the Export Enhancement Program valued at over $465 million.

Countered foreign subsidized export financing. Pending Congressional acceptance of the President's War Chest proposal, the Export-Import Bank has offered grants to help American companies win sales worth about $328 million in eleven pending overseas contracts. By aggressively using mixed credits, we hope to persuade our trading competitors, particularly France, Italy and Belgium, to support negotiations to eliminate predatory financing practices. In March 1986, to Counter a Brazilian bid using non-competitive financing in the U.S. market, Eximbank took the unprecedented step of extending concessionary financing to a U.S. company for a sale in the U.S.

The problem is that even if every unfair trade practice in the world were wiped from the slate tomorrow, it would have very little effect on our trade deficit. Our trade laws were not intended to resolve macroeconomic problems facing the whole country. The strong dollar has been a difficult burden on almost all sectors of our economy, but the blame more legitimately belongs on our own shoulders for failure to reduce the budget deficit than on the inadequacy of our trade laws or overall trade policy.

Neither are our trade laws designed to be a clearinghouse for a host of other issues with only a limited relationship to trade. Our trade laws cannot force countries to pay U.S. minimum wages, establish unions, and allow collective bargaining. Our trade laws can't dictate child labor standards or worker safety, however meritorious those goals are. Our trade laws cannot change Japanese society or reverse Japan's desire to be a first-class world competitor. Our trade laws cannot turn developing countries into developed countries, or resolve the problem of Third World debt. Our trade laws cannot make uncompetitive U.S. firms competitive or make U.S. businesses aggressive exporters.

Our trade laws can attempt to remove unfairness, or its effect, from international trade and enhance negotiations to improve trade disciplines. The administration can use these and other laws to level the playing field and promote adjustment. But industries have to make their own decisions about the best course of action for its future competitiveness. Protectionism is an expensive and regressive solution that I believe most U.S. businesses find unacceptable.

Yet, H.R. 4800 is before us demanding that protectionism become our national trade policy. One need only look at the active supporters of this bill and the special interest provisions contained in it to know that H.R. 4800 deserves the protectionist label it has acquired. Further steel quotas, special protection for footwear and textiles, casein quotas, further restrictions on meat imports, special provisions designed to curtail lumber, hog, and semiconductor imports all appear in H.R. 4800. The list goes on.

It is a familiar list of industries that have traditionally sought protection from the Government, not just in recent times of a strong dollar and high trade deficits. These industries were also at the public trough when the dollar was weak and imports seemed modest. This bill proves that the appetites of these industries cannot be satisfied but that its proponents will never give up trying, even if it means further harm to competitive industries and agriculture.

Although it seems that there is no turning back the partisanship of H.R. 4800, some of us will continue to try to bring reality back into the process. Tomorrow, three amendments will be offered to remove the worst provisions of the Ways and Means title of this bill. They will not make the bill completely satisfactory to the administration or remove all the provisions of questionable GATT legality. However, they will bring this bill back into the realm of legitimate discussion and, if passed, will show that we are serious about trade legislation this year or early next year.

One thing we cannot achieve is to make H.R. 4800 a serious tool for a new round of trade negotiations. The rule would not allow an amendment that could put meat on the negotiation authority provisions of this bill. As it is, the negotiating provisions are laughable and embarrassing. They provide only 4½ years of authority and the provisions are riddled with restrictions. Apparently, supporters of H.R. 4800 want to send a message to our trading partners that we are not really serious about future GATT negotiations.

Two of the amendments designed to improve the bill will be offered by myself. They are supported by a wide range of U.S. business and agriculture as well as the administration.

The first amendment gives clear authority to pursue unfair Government pricing of natural resources as a separate cause of action under 301 but removes the inflexible natural resource definition under the countervailing duty provisions.

This is preferable to the administration, agriculture groups and many business groups than having a special definition under the countervailing duty laws. The administration recognizes that natural resource pricing practices are a problem that needs to be addressed in negotiations and in the context of existing law. Farm groups have less to fear from foreign retaliation and from rising fertilizer prices at home if the problem is addressed in a reasonable way under section 301.

Defining resource input subsidies, including removal rights, as a unilateral subsidy under our countervailing duty laws is very controversial among business groups. It is questionable under the GATT and would seriously hurt U.S. agriculture interests. Natural resource problems should be addressed under section 301, through negotiations and other warranted actions, as provided under the Republican substitute.

The amendment also strikes the burdensome provisions on downstream product monitoring that would require endless, administratively difficult and mostly unjustifiable monitoring of third country pricing of component parts and other inputs.

Finally, the amendment strikes the provisions that establish a private cause of action in the Court of International Trade for damages against manufacturers, exporters, importers, and cosignees for economic losses associated with imports sold at less than fair value. These provisions are GATT illegal and would establish a personal liability and harassment that U.S. exporters would loudly cry out against if it were to be applied to them in foreign markets.

The second amendment attempts to get Government or Government-directed panels out of the business of telling industry how to remain competitive and adjust to imports. The amendment strikes the provisions that establish Industry Adjustment Advisory Groups in conjunction with 201 cases that will attempt to advise industry on adjustment decisions they might need to take. Industry knows its best interests better than government/industry/labor/consumer panels, and we should resist such bureaucracy and such efforts to establish a national industrial policy.

The amendment also maintains the President's role in determining relief under section 201. Cases under section 201 are investigations of fairly traded goods and involve all imports of the merchandise concerned, not just products from particular countries or foreign firms. Such cases of necessity require a national perspective and the authority of the President behind any recommended relief. Most U.S. businesses agree with this assessment.

Finally, the second amendment strikes the adjustment assistance trust fund that would capture tariff and auctioned quota revenues from any 201 relief and earmark the moneys for trade adjustment assistance programs. Although TAA has now been streamlined and made more effective, this trust fund is yet another attempt to escalate benefits and costs of the TAA program.

Mr. Chairman, I hope these two amendments and the ones offered by my colleagues from Illinois and North Carolina can be passed and that we can get back on the track of b'partisan trade legislation that can be discussed with the administration realistically. Passage of these amendments will demonstrate that we reject protectionism and that we want real trade reform, not just a partisan issue for all to exploit.

It is unfortunate that the House must busy itself in a partisan trade bill, rather than one which can become law. Better we should work together on a real bill. The sensible course to pursue is that endorsed by the Washington Post, the Wall Street Journal, the Journal of Commerce, and the Minneapolis Star and Trib-

une, whose editorials I include in the RECORD.

We should defeat H.R. 4800.

The editorials follow:

[From the Washington Post, May 14, 1986]

A SHIN-KICKER BILL

The trade bill now moving rapidly through the House is an anthology of all the congressional grievances and irritations accumulated through five years of Mr. Reagan's presidency. With a few notable exceptions, Mr. Reagan has not been very sympathetic to the kind of pain that a surge of imports inflicts on a specific industry, or the towns that depend on it. An open market will best serve the country and its economic growth, the president says. That's correct, but not very comforting to congressmen from troubled districts—or their constituents. This bill, now reported by the Ways and Means Committee, is the House Democrats' counterattack.

It would make litigation easier for Americans fighting imports. That would lead to lower imports, and consequently lower exports, and consequently fewer jobs for Americans. For example, the most objectionable section of the bill says that countries selling too much to this country, and buying too little, will have to bring their trade surpluses down by 10 percent a year for the next four years. That is aimed, of course, at Japan, Taiwan and West Germany. The size of their surpluses is largely the result of the American mistakes that sent the dollar's exchange rate sailing too high for the past several years. The proper remedy is the decline of the exchange rate that has already taken place. But a lot of people in Congress don't trust economics and, instead, want to rely on litigation.

The bill gets into the troubling subject of the status of foreign workers. The author of this provision, Rep. Don Pease of Ohio, cites the imported clothing made by child labor in Asia. He also speaks of imports from countries that prohibit labor unions and require little or nothing in the way of standards for wages, hours and safety. Those are important concerns, and he is surely right when he says that trade has to benefit producers, as well as consumers and trading companies. But he would try to ensure it by allowing American companies to cite denials of workers' rights when fighting imports. That will do more to reduce imports here than to improve working conditions abroad. A more promising approach, as the administration urges, is to negotiate international standards in the next round of trade talks—although, to give Mr. Pease a point, that argument would carry more weight if the administration were pressing workers' rights more actively in its trade policy.

Frustration rarely produces good legislation. This bill is a shin-kicker, intended to attract attention. In that, it is succeeding very effectively. But among American industries, it will hurt the most competitive and help only the least competitive.

[From the Wall Street Journal, May 15, 1986]

TRADE-BILL TERPSICHORE

That outrageously protectionist trade bill House Democrats have concocted is described by the Washington Post as a "shin-kicker," intended to make President Reagan pay heed to companies and labor unions protesting about competition from foreign goods.

Rep. Bill Frenzel (R., Minn.) comes closer to the mark in saying that the House leadership "prefers an issue to a law."

In short, this bill, now scheduled for floor debate in the House next week, is an exercise in political grandstanding. With it, House Democrats want to show they are willing to get tough with foreigners who so deviously scheme to sell Americans Sonys and Audis. No president with any regard for the health of the international economy could sign it. But a veto, the progenitors believe, will cost Republicans votes in November.

We would urge them not to be quite so certain. Congressmen spend their time preoccupied with parochial concerns, failing to discern that Americans are becoming more internationalist in their economic thinking. Americans need only look around to see that they derive some very large benefits from internationalized innovation and competition. Moreover, the trade bill's authors have so overplayed their hands that knowledgeable people doubt their seriousness. It's not nice to play games with legislation.

It's not nice partly because it demeans lawmaking, but partly as well because it carries certain dangers. There is always a possibility that events will conspire to allow a bad bill to actually become law.

Something of that sort happened in 1970–71. A Democratic Congress set a political trap for Richard Nixon not unlike the one now being laid for Ronald Reagan. Congress gave Mr. Nixon something he did not want, the discretionary power to control prices and wages, burying it in a veto-resistant defense production bill.

The Democrats then piously proclaimed that Mr. Nixon had all the authority he needed to "control inflation," then 5.5%. Republicans were furious over being set up to be blamed for inflation. They called it "devious Democratic demagoguery."

Almost a year to the day after Mr. Nixon accepted those unwanted powers, the collapse of the Bretton Woods international monetary system prompted him to use them. He applied "temporary" controls. They disrupted U.S. production, helping precipitate, among other things, the first oil "crisis." Underlying inflationary pressures rose and eventually exploded, real incomes fell and the nation's economic policy debate degenerated into confusion and acrimony.

The trade bill is cut from the same cloth. One of its more mindless provisions would require 10% annual reductions in the U.S. trade deficits with Japan, Taiwan and West Germany. To accomplish that pointless feat would necessitate market interference of the most ham-handed type, disrupting capital flows as well as trade. It would also be a gross violation of international trade rules hard on the heels of Mr. Reagan's success in Tokyo in engendering a new round of trade-liberalization talks.

Still another section would attempt to legislate "workers' rights" in countries shipping goods to the U.S. Every U.S. trading partner will see the hyprocrisy. The intent isn't to protect workers abroad but to keep the goods they make out of the U.S. market.

The bill would make it mandatory for the president to retaliate by a date certain against any nation deemed guilty of an "unfair" practice. This, too, is ham-handed. An arbitrary deadline could simply cut off talks on some issue at a crucial point, quite possibly losing some U.S. exporter a sale. To argue that Congress can legislate in advance the outcome of negotiations betrays, among other unattractive qualities, a streak of arrogance.

As we say, these and other exercises in economic demolition in the bill have led us and a good many other people to conclude that the Democratic leadership is not serious. Maybe things look different from inside the Beltway, but from our perspective it's hard to see how playing fast and loose with public policy can be regarded as good politics.

[From the Journal of Commerce, May 5, 1986]

TRADE YES, TRADE BILL NO

Congress is speeding ahead in the wrong direction with its comprehensive trade bill, and the Reagan administration is doing a poor job of convincing anyone to hit the brakes.

The bill is scheduled to reach the House floor by mid-May and has a good chance of passage. Even congressional opponents of the legislation predict it will go through both houses of Congress. And, although a presidential veto is thought to be a certainty, some predict there may be enough votes to override that veto.

Rep. Bill Frenzel, R-Minn., who rides with the White House on trade, says he sees the bill zipping through both the House and Senate "like a greased eel."

The major bills pending on both sides of Congress address a wide range of trade law, but among the most controversial of the proposed reforms involve the president's trade sanction authority.

The most radical of the provisions requires the president to negotiate with countries that close their telecommunications markets to the United States. If the negotiations are not successful within a specific amount of time, the president would be required to retaliate. The bills would withdraw the president's current authority to reject International Trade Commission recommendations for relief, often in the form of tariffs or quotas, when industries claim they are being injured by imports.

Reflecting congressional opinion that trade relief decisions should be depoliticized, the president's authority is transferred to the U.S. trade representative in those cases and also in those involving unfair foreign trade practices.

The administration is correct in opposing these provisions because they limit the president's authority and flexibility. In addition, the White House is right when it says the U.S. Trade Representative's Office is an arm of the executive branch and transferring authority there will make no difference.

Other sections of the bills that slap deadlines on negotiations aimed at opening markets should be excised. Administration officials warn that deadlines could defeat the purpose of such talks.

Industry and labor supporters of the bills point to ailing industries and sharp drops in unemployment as reasons for the need for trade law reform. Economists generally contend that $1 billion in exports add 25,000 jobs to the U.S. economy, $1 billion in imports substracts 25,000 jobs from the economy.

A Commerce Department study shows that in 1984, based on export job gains and job losses from imports, including farming, mining, construction, manufacturing and services, there was a net loss of 1.1 million jobs, about 1.3% of total employment. Manufacturing sectors lost about 2.3 million jobs in 1984. Big losers were textiles, electrical

and electronic equipment, leather, motor vehicles, nonferrous metals, iron and steel.

In other words, the United States has a problem. The solution, in our opinion, is not to build barriers to trade but to build up U.S. industries' ability to compete abroad. The devaluation of the dollar is already helping. Tax incentives that encourage industries that are essential to the industrial base of the country also help. Some interim protection of non-competitive U.S. industries is also called for. But imports that force the United States into reindustrializing, and force management and labor to become more cost effective also are helpful, painful though the process may be.

In the meantime, there is a serious communications problem between those who support the bill and those who do not. That problem should be addressed because both sides need to come up with a policy that helps the United States to compete in the world again in essential industries rather than slash out at those countries that outperform U.S. industries.

The expected presidential veto of the trade bill might force both sides to get down to serious talking about a serious problem. Less time would be wasted, however, if both sides admitted to an impasse and attempt to come up with a more constructive approach to the problem than the current trade bills in Congress.

[From the Minneapolis Star & Tribune, May 20, 1986]

DEMOCRATS SHOULD DEFEAT THEIR HOUSE TRADE BILL

House Democrats are staging a cynical charade this week. They are bringing up for debate and a vote an angry trade bill that has little purpose except to sound tough about foreigners who make things Americans want to buy. The bill would do most Americans great harm. It would torpedo the negotiations for more liberal world trade that President Reagan urged at the Tokyo summit.

But the House bill is not intended to become law. It is put up as a target for the Senate to shoot down or for Reagan to veto if the Senate fails. Then in next fall's election campaigns, Democrats can claim that they tried to save U.S. jobs from foreign competition, but Republicans wouldn't let them.

At least we hope the Republicans won't. Legislators often pretend to favor a bill they know is bad, relying on the bill's eventual defeat by other legislators or by a veto. On small matters that sort of flummery may be forgiveable. But large matters are different because mistakes are more dangerous. Trade is a large matter. The House Democrats' bill is truly dangerous.

For instance, it includes a boneheaded protectionist provision that would require West Germany, Taiwan and Japan to reduce their trade surpluses with the United States by 10 percent a year for the next four years. That sounds tough, all right. But so rapid a turnaround in trade with those nations would only be possible if they or this country kept their products out of the United States by high tariffs or low quotas. Either way, U.S. consumers would face higher prices and less choice among those countries' products. And either way, West Germany, Taiwan and Japan might counter U.S. trade restrictions with barriers of their own against U.S. products. That would sound tough, too. But the outcome for all sides would be less trade and lower living standards.

We doubt many Democrats want that result. They probably prefer that the lower-valued dollar and increased competitiveness of U.S. industry be allowed to improve trade balances without clumsy attempts by government to intervene in particular industries. And as long-time internationalists, most Democrats presumably favor multilateral efforts to build trade in a world market, not unilateral protectionist efforts for short-term gains.

Democrats should not leave it up to Republicans to defeat the self-destructive House trade bill. They should drop the charade and do the job themselves.

□ 1445

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 3 minutes to the gentleman from Texas [Mr. PICKLE].

Mr. PICKLE. Mr. Chairman, I hope that the interest generated by this trade bill will lead to a stronger commitment to enforce existing trade laws.

While some of our colleagues may feel that this legislation goes beyond the scope of responsible trade policy, I believe this bill reflects increasing frustration with an administration which prefers to apply quiet diplomacy to cases of blatant foreign unfair trade practices. In fact, some would have us believe that we do not have a genuine problem—that our industries are bellyaching because foreign competitors just outproduce us.

However, the evidence proves differently.

There are cases, Mr. Chairman, of proven foreign government practices which provide an unfair advantage to industries in direct competition with our industries. Foreign governments have become more sophisticated with export-promotion activities. We must respond to these new forms of trade barriers with stronger enforcement of existing laws. And we must also reform our trade laws to better address foreign unfair trade practices.

The Ways and Means Committee has taken positive steps toward strengthening statutory authority to enforce U.S. rights under trade agreements and to obtain elimination of foreign government unfair trade practices which burden or restrict U.S. Commerce. Section 301 of the Trade Act of 1974 is a negotiating tool for upholding U.S. trade agreement rights and for obtaining the elimination of unreasonable and discriminatory foreign trade practices. Section 301 likewise authorizes the President to retaliate against these foreign practices as additional negotiating leverage.

The committee clarified the application of section 301 to specific foreign government practices, required mandatory action in some cases, and established time limits for action on 301 cases.

Foreign government tolerance of cartels has burdened U.S. trade in semiconductors. The unpenetrable web of users and producers formed by cartels prevents our industry from achieving market-share performance levels evident elsewhere. The committee clarified that this foreign government practice is actionable under section 301, but still maintained the President's discretionary authority to act if he deems it appropriate.

Current law does not require the President to make a final decision within a specific timeframe on what action, if any, he will take under section 301. The committee bill imposes a 30-day time limit on Presidential action. This will expedite decisions and actions in meritorius section 301 cases, and bring cases to final resolution within a reasonable timeframe.

The committee also tightened the time limits for Presidential action under the national security statute, or section 232. Section 232 of the Trade Expansion Act of 1962 requires the Secretary of Commerce to conduct an investigation to determine the effects of imports of an article on the national security. The committee bill requires reporting within 90 days rather than 1 year, and imposes a 30-day time limit on the President to determine whether to concur with the report. The President must then act within 15 days.

The committee shortened the time period allowed for elimination of a national security threat. A threat to national security posed by imports should be determined and acted upon as quickly as possible and I am pleased to support this change in existing law.

Mr. Chairman, I am aware of opposition to various aspects of this trade package, and understand the inclination of some to just wait and see what happens. The committee has been forced into action on the trade issue by less-than-enthusiastic administration response to our worsening trade picture.

Our $148 billion trade deficit will not permit us to continue to coddle our trade partners into cooperation with us. The administration must exercise its existing authority to respond to unfair trade practices. We have attempted to strengthen the administration's hand and I hope this worthwhile effort will yield positive results.

Now I want to say to my friend, the gentleman from Minnesota [Mr. FRENZEL] and to the Members of the House, that there are laws on the books today that should be enforced to give us a more favorable trade position. If we do not enforce the laws we have on the books, then you can see that this Congress is going to take action itself and enter into fields of legislation that ought to be reserved for GATT negotiations.

We are are saying about section 301 and 232 is that if there is a violation of trade law, then something ought to be done down the street. We are not im-

posing new laws; we are just simply saying that the laws we have ought to be enforced.

There is not any politics to that. The only politics is somebody who wants to say it is politics to try to make a political issue of it. I say to you, Mr. Chairman, the time has come that we ought to take section 301 and 232 and, if it is good law, then let us enforce it.

I am one Member who has met with the Special Trade Representative several times and tried to say to him, in the semiconductor field, you ought to get some kind of agreement with the Japanese so that they could at least give us access to their markets and prevent the dumping of goods. They have negotiated back and forth and here, 30 days ago or more, they had to break off negotiations with Japan because they could not reach any agreement.

I said to Mr. Yeutter then, and I say to this House, unless the administration, on the Cabinet level now, notwithstanding the fact that nine Members want to say let us not do that, if we do not say at the Cabinet level that these violations are actionable, then we have a law on the books that means nothing. If that happens and there is no action taken then I will tell you that this Congress is going to be entering more and more into legislative fields that ought to be reserved to negotiation or under the GATT.

That is not going to happen if we get some kind of relief. The administration is put on notice now that they ought to enforce the laws that they have.

The CHAIRMAN. The Chair would advise the gentleman from Illinois [Mr. ROSTENKOWSKI] that he has 7 minutes remaining and the gentleman from Tennessee [Mr. DUNCAN] has 3 minutes remaining.

Mr. DUNCAN. Mr. Chairman, I yield 1 minute to the gentleman from Maine [Mr. MCKERNAN].

Mr. MCKERNAN. Mr. Chairman, I commend the members of the Committee on Ways and Means for their diligent work on reforming the trade laws of this country. Both H.R. 4800 and the Republican alternative would strengthen the ability of U.S. industries to compete fairly with the numerous nations that currently have unfair advantage over our domestic producers through foreign government policies.

Mr. Chairman, I have made my case for stronger trade laws time and time again. I have witnessed the effect of our current trade laws on many of Maine's leading industries, including shoes, lumber, potatoes, and fishing. All of these industries have tried to seek recourse against foreign dumping practices, trade barriers, and subsidies. I have seen these industries, all with valid complaints against these trade injustices, go through the proper channels, only to be denied any action by the Federal Government that would allow them the chance to compete on an even playing field. Clearly, our trade laws need to be revamped to give U.S. trade policy some teeth.

I applaud the efforts of the Members for identifying crucial aspects of both section 301 and section 201 of the Trade Act of 1974 that need to be changed, and for taking the necessary steps to ensure that these laws do make a difference to an industry's competitiveness. With respect to section 301, foreign transgressions of trade agreements have devastated many U.S. industries, and will continue to do so should mandatory response provisions, time limitations for Federal action, and increased authority of the U.S. Trade Representative, as outlined in H.R. 4800, not be adopted. These proposals provide effective reforms for a law that, while essentially well intended, does not currently carry out the objectives for which it was enacted.

Similarly, industries that have proven their case under section 201, with reams of evidence to support the extent of the injury they have suffered from imports, are also effectively prevented from obtaining relief under the present law. By increasing the authority of the U.S. Trade Representative, by easing the process by which an industry can seek relief, and by allowing a mechanism for the consideration of special cases that require immediate action, H.R. 4800 addresses these concerns, and rectifies the problems caused by the existing process. In addition, I believe the adjustment plan as outlined in H.R. 4800 would enhance an industry's ability to establish long-term goals that extend far beyond the immediate needs of import relief.

H.R. 4800 also addresses the problem that many industries have faced in terms of competing with foreign producers who receive subsidies on natural resources that are used in production. These subsidies, and the benefit they give to foreign producers, erode the competitive edge that domestic industries would otherwise be able to capitalize on. By authorizing the imposition of a countervailing duty on products that receive a Government subsidy on natural resources used in production, H.R. 4800 closes yet another gap in our existing trade policy.

The provisions I have mentioned go far to reduce the inherent flaws in our current trade policy. In some respects, Mr. Chairman, I regret that the trade bill does not address other issues that seriously impede the ability of U.S. industries to compete fairly with our foreign counterparts. Specifically, I believe that other Government programs, such as the off-season unemployment benefits paid by the Canadian Government to their North Atlantic fisherman, should also be included in the definition of a foreign government subsidy of a private industry. However, that aspect notwithstanding, I again commend the Committee on Ways and Means for tackling a tough issue, and for coming up with reasonable, intelligent methods for dealing with this country's trade problems.

Mr. DUNCAN. Mr. Chairman, I have no further requests for time and I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Under the rule, general debate will continue for 30 minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs.

The gentleman from Washington [Mr. BONKER] will be recognized for 15 minutes and the gentleman from Wisconsin [Mr. ROTH] will be recognized for 15 minutes.

The Chair recognizes the gentleman from Washington [Mr. BONKER].

□ 1455

Mr. BONKER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I yield such time as he may consume to the distinguished chairman of the full committee, the gentleman from Florida [Mr. FASCELL].

Mr. FASCELL. Mr. Chairman, I first would like to commend the Democratic leadership, Speaker O'NEILL, for making the decision in March to bring a trade bill to the floor in May, and the majority leader, Mr. WRIGHT, for shepherding the process of putting together a trade bill. With the historic 1985 trade deficit of $150 billion likely to be surpassed this year, despite a substantial fall in the value of the dollar, it is imperative that the United States take action to begin the process of reversing this ever upward spiral.

I especially would like to recognize the work of DON BONKER, chairman of the Subcommittee on International Economic Policy and Trade, and the other members of the subcommittee, for the excellent work which they undertook in a short time period to produce H.R. 4708, which became the Foreign Affairs sections (titles III and VII) of the trade bill. Title III includes various provisions aimed at enhancing U.S. export competitiveness. It makes changes in the U.S. and Foreign Commercial Services and in other ways improves the export promotion activities of the U.S. Government. The amendments to the Export Administration Act are designed to facilitate the export licensing process in order to remove duplicative and out-of-date controls and focus enforcement efforts on goods and technologies that would make a significant contribution to the

military capability of an enemy nation. Title III also provides greater operating authority to the Overseas Private Investment Corporation and to the Trade and Development Program.

Special recognition is due the untiring work of DAN MICA for the inclusion in the bill of title VII, revising the Foreign Corrupt Practices Act. He has worked over the past 3 years to bring to the House legislation to clarify the intent and purpose of that law. He has constructed the changes with the assistance of HOWARD BERMAN, and in recent weeks with that of TIM WIRTH, who chairs the subcommittee of jurisdiction of the Committee on Energy and Commerce. The changes made by title VII provide a needed clarification of the intent of the law, which should facilitate the enforcement process and provide greater guidance to U.S. businesses operating overseas.

Finally, Mr. Chairman, while I may not be in agreement with every provision of this bill, I think overall it goes a long way to improving U.S. trade law and both promoting and protecting U.S. trade interests around the world.

Mr. BONKER. Mr. Chairman, I would like to commend the chairman of the full committee, Mr. FASCELL, for his support and efforts to facilitate legislative action on title III which is now incorporated into H.R. 4800, and also commend the ranking member, the gentleman from Wisconsin [Mr. ROTH] and the gentleman from California [Mr. ZSCHAU], who is not here, and the gentleman from Nebraska [Mr. BEREUTER] for their cooperative efforts; and while we do not always agree on every provision, we certainly have had a constructive effort within the subcommittee that I chair.

Mr. Chairman, I would like to begin by responding to what I feel are strongly worded attacks by this administration on the trade bill, attacks which I believe are unwarranted and at least at best exaggerated.

This legislation is not protectionist, nor is it the absolutely worst bill that could possibly be concocted—a claim that was made by the White House this morning.

If anything, the legislation is carefully designed to revise our sagging industries, restore many of those lost industrial jobs, promote exports, and to make America competitive once again.

It is aimed at bringing down our high trade deficits. Those deficits clearly threaten America's economic well-being. The bill will give us a far more effective trade policy, and compel a reluctant President to deal with our trade problems, but, I add once again, it stops short of protectionism.

Actually, the legislation incorporates about all the recommendations of the Democratic Trade Task Force which I chair; the Republican Trade Task Force, and a bipartisan trade committee over on the Senate side. Key features of these reports are now contained in H.R. 4800, and they include: Provisions to strengthen U.S. trade laws and improve procedures to combat unfair barriers to foreign markets. Greater protection of U.S. intellectual property rights.

We attempt to identify new factors that constitute unfair trade practices, including export targeting, resource import subsidies, and international worker rights; and we extend the authority for the President to negotiate new trade agreements at GATT.

In title II of the bill, we attempt to deal with export promotion by way of facilitating new and expanding export opportunities for U.S. businessmen. We have a major title in the bill that deals with international monetary reform so that we can bring stability and certainty to international exchange rates, and put an end to the volatility that makes it exceedingly difficult for U.S. exporters to compete.

Now, we have a good section on education and training; attempts to enhance America's educational program in areas involving math and science and foreign languages; really the human ingredients that you need to increase our competitiveness; and we have a strong section on agricultural trade policy.

Mr. Chairman, I want to address just for two moments title III in the bill, because that deals with the section over which the subcommittee has jurisdiction.

First of all, recognizing that we deal primarily in export promotion, we have attempted to lay out a clear and effective export promotion program. We do this by making the Foreign Commercial Service statutory; by expanding and improving programs to assist U.S. exporters, and upgrading foreign commercial service officers so that they can serve on equal footing with other U.S. officials in our embassies around the world.

We also require a State Department country report on fiscal, monetary, and trade policy. This is similar to the human rights report that is now required by law; so that we have a better understanding of what other countries are doing in putting together their macroeconomic, fiscal and trade policies.

Mr. Chairman, in this whole section of export control policy to which we will entertain an amendment tomorrow, let me state that the collective desire of our committee is to remove unnecessary controls on the export of technology. To focus our attention on the truly critical military technology and remove the unnecessary controls so that our high-tech exporters can compete effectively.

In 1980, the United States was the premiere exporter of technology. Today, in 1986, we will register a trade deficit in technology of $18 billion. The President's Commission on Industrial Competitiveness chaired by John Young, estimated that $12 billion of our $150 billion trade deficit is due to export controls. There is simply no way that we can compete effectively as long as we retain these shackles on U.S. exporters.

Members will recall that 3-year debate on the Export Administration Act; that we passed significant reforms to remove the burdensome controls and unnecessary procedures on export of technology. Yet, several key provisions in that law are not being carried out, so what we attempt to do in this legislation is compel the executive branch to do what the Congress ordered last year.

Mr. Chairman, technology is where we have our greatest potential in trade, but we cannot compete under those circumstances. The committee bill does indeed protect our national security interests while streamlining licensing procedures. I think that represents the desire of all Member of the House.

In conclusion, Mr. Chairman, this legislation's main goal is to restore America's competitiveness. It will do so in a way that is positive and consistent with with international trade law, and relies not on statutorily set import restrictions, but on opening markets and promoting exports.

H.R. 4800 is an extraordinary effort to overhaul and update our trade laws and to provide an alternative to failed policies and staggering trade deficits.

Mr. Chairman, as SAM GIBBONS had noted earlier, this is a historic moment for the Congress. I trust that we will live up to the challenge by passing this legislation this week.

Mr. MICA. Mr. Chairman, the bill before us seeks to promote American trade and to redress some of the problems with existing laws which have contributed to our almost $150 billion trade deficit in 1985. While our trading partners offer incentives and export promotion programs, we place barriers in front of U.S. businessess trying to compete in international markets. Although it was enacted for the best of reasons—to prohibit U.S. corporations from bribing overseas in order to obtain business—the Foreign Corrupt Practices Act has created export disincentives for U.S. companies.

The FCPA was enacted against a background of revelations regarding bribes paid by U.S. multinational corporations to high-ranking foreign officials, actions which in some cases had important foreign policy implications for the United States. While deterring the payment of bribes overseas, however, the FCPA went overboard in its prescriptions for what corporations must do to ensure compliance with the law. Added to that situation was a contentious, 8-year debate over what the law as passed actually meant in practice, resulting in a needless and unjust loss of U.S. exports because of the lack of clarity in some of the

act's core provisions. Because of the imprecision of the law, exporters have been forced to forego perfectly legitimate business opportunities simply because they could not reasonably determine whether any improprieties might occur which were beyond their control and which could conceivably place them in violation of the act.

Even where a business acts in good faith to seek advice on compliance from the U.S. Government, it may still be denied the satisfaction of knowing whether or not its conduct would be a violation of the statutory prohibitions. This is unfair and untenable, especially because it creates the greatest burden for those small- to medium-sized firms which cannot afford specialized counsel.

The overall purpose of the amendments to the FCPA in the legislation before us is to try to eliminate those ambiguities which have so troubled the exporters and resulted in a loss of overseas business, yet still retain the absolutely essential prohibitions against the bribery of foreign officials which appear in the current law. The bill makes significant clarifications in the provisions of the law relating to liability for the actions of third parties, better defines the scope of prohibited payments, and more clearly identifies what payments will be allowed. It also doubles fines for prohibited payments and creates new civil penalties. It is meant to send a signal to U.S. companies that they simply must not engage in unauthorized activities in pursuit of overseas business, or they will face the consequences. At the same time, those same companies must not be denied those important opportunites to export because the Congress and the executive branch have left them in the dark as to what they can and cannot do in pursuit of such business.

Section 701(a) amends section 30A of the Securities and Exchange Act of 1934 (15 U.S.C. 78dd-1) with respect to foreign trade practices by issuers, and makes parallel amendments to section 104 of the Foreign Corrupt Practices Act of 1977 (15 U.S.C. 78dd-2) regarding trade practices by domestic concerns. The bill modifies the standards of culpability in current law and clarifies the definition of illegal payments. Prohibited payments include those for the purpose of influencing acts or decisions of foreign officials in order to assist corporations and individuals "in obtaining or retaining business for or with, or directing business to, any person, including the procurement of legislative, judicial, regulatory or other action in seeking more favorable treatment by a foreign government."

The Foreign Affairs Committee noted in its report on this provision that "the definition of 'retaining business' shall not be limited to the renewal of contracts or other business, but shall include the completion of existing contracts and the carrying out of existing business." Therefore, payments for the procurement of the various actions cited in the bill in seeking more favorable treatment from a foreign government would be prohibited. But, as the committee report notes, "the prohibition does not include payments made for purposes other than obtaining or retaining business," as those terms are elaborated in the law, and further by the committee report.

Direct, or "willful," bribes to foreign officials are prohibited, as in current law. Companies and their officers and directors remain liable for illegal payments made by third parties. However, the "reason to know" standard regarding liability for the actions of third parties is replaced by a split standard. Under the new standard, corporations or individuals with actual "knowledge" of bribes or attempted bribes by third parties—for example, their agents—are subject to criminal penalties. Drawing on the definition of reckless conduct from the draft model penal code, corporations, or individuals which act in a manner "recklessly disregarding" a "substantial risk" that third parties would bribe or attempt bribery are subject only to civil penalties. As defined in the proposed code, "a person is 'reckless' if he is aware of but disregards a substantial risk that a circumstance exists or that a result will occur." A "substantial risk" is defined in the bill as "a risk that is of such a nature and degree that to disregard it constitutes a substantial deviation from the standard of care that a reasonable person would exercise in such a situation."

A company may not be held vicariously liable if it can show by a preponderance of the evidence that it had established procedures to prevent its employees from making bribes and that its supervisory employees had used "due diligence" to prevent employees or third parties from making bribes. It would be impracticable, given the complexity and variety of possible business transactions as well as the differences in the resources available to different firms, to specify so called "red flags," that is, particular occurances which would require specific corporate responses.

"Due diligence" will of course vary from case to case, depending on the particular situation, and on the size of the company and the resources available to it in attempting to establish procedures to prevent bribes by its employees and agents. A principal goal of the Foreign Affairs Committee in amending the Foreign Corrupt Practices Act was to increaser incentives for self-policing on the part of the business community, in concert with the clarifications deemed necessary in the prohibitions section of the bill.

A corporation or individual may defend itself from prosecution by showing that a payment was made "for the purpose of expediting or securing the performance of a routine governmental action," or where that payment was "expressly permitted" by the laws or regulations of the foreign country. These payments were never intended to be proscribed by the Congress in passing the FCPA, but some have concluded additional clarity was needed beyond that provided in current law. In order to accomplish this, allowable payments are defined in the bill in reference to the purpose of the payment, rather than by the job description of the recipient, as in current law. An affirmative defense, required under the "due diligence" defense against vicarious liability, is not required in this provision of the bill. Instead, the defense of a payment as one related to the "performance of a routine governmental action" or which is "expressly permitted" by the laws or regulations of the foreign country is one asserted by the defendant, and which preserves the traditional burden of proof resting with the Government in a criminal or civil action.

As in current law, enforcement responsibility rests with the Department of Justice and the Securities and Exchange Commission. New procedures are established for the promulgation by the Attorney General of guidelines for compliance with the law, again with an eye toward making clearer to the business community exactly what conduct is proscribed. These guidelines should assist businesses in establishing their own internal procedures to prevent their employees from paying bribes to foreign officials in order to obtain business.

In addition, the business community should receive clearer statements from the Attorney General regarding what constitutes a prosecutable offense under the revised prohibitions, since he must respond to specific inquiries regarding compliance within 30 days after receiving a request. In any civil or criminal prosecution brought against a company, the Attorney General's response would create a "rebuttable presumption" that the company had complied with the law, as long as the facts were correct as presented in the request, and provided the circumstances of the situation comported with the company's proposed conduct.

Section 701(b) amends section 32(c) of the Securities and Exchange Act of 1934, for violations under the new section 30A(a) (1) or (2), to provide for fines of up to $2 million for issuers, and $100,000 and/or 5 years in prison for individuals. It also creates a new civil fine of up to $10,000 for issuers.

Section 701(c) amends section 104 of the Foreign Corrupt Practices Act of 1977 to establish prohibitions on trade practices by domestic concerns which are identical to issuers.

Section 701(d) expresses the sense of the Congress that the President should pursue the negotiation of an international antibribery agreement.

Mr. ROTH. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, I would like to take this opportunity to thank the gentleman from Washington [Mr. BONKER] for his leadership in our committee on trade matters and for his work on this bill. Despite extraordinary time constraints the chairman did a yeoman's job in fashioning a comprehensive trade bill.

There are many provisions in the Foreign Affairs title which will enhance U.S. trade:

We put into statute the United States and Foreign Commercial Service, an important arm of the Commerce Department whose primary mission is to help U.S. exporters.

We authorized research to improve the competitiveness of U.S. agriculture and to monitor the agricultural export strategies of our competitors.

We eliminate the need for export licenses for low-technology sales to all free world destinations. In other words, exporters in your district will no longer have to get export licenses to sell low technology, as long as it is being sold to a free world destination.

We link future U.S. foreign aid commitments to trade liberalization in the developing world.

We call for the protection of U.S. intellectual property rights.

The Foreign Affairs Committee made important contributions in other areas which are now found in other titles of the bill or will be offered as amendments. These include: Strengthening the Export Trading Company Act, providing a mixed credit "war chest" fund, and clarifying the Foreign Corrupt Practices Act.

These are all very important provisions and represent a considerable amount of work dedicated to enhancing the export environment for American companies. While no one bill will magically eliminate the U.S. trade deficit, or eliminate all foreign trade barriers to U.S. products, or boost U.S. productivity and competitiveness, we can make improvements in the American trading atmosphere.

This body will have the opportunity to do so tomorrow when amendments will be considered. If we are successful in eliminating those provisions now in the bill which are either highly protectionist or serve to damage rather than enhance U.S. interests, then we can be proud of the work we have accomplished in trade in this session.

Our exporters, our farmers, our retailers, our service companies, and our consumers will have their eyes on Congress tomorrow when each and every one of us decides whether to make this bill into a responsible piece of legislation or whether to unveil this effort as a charade.

It is with this in mind that I am offering tomorrow an amendment that concerns national security export controls.

The purpose of my amendment is to strike some of the clear veto items put forth by the entire Cabinet.

This body well recalls the hours of work that we put into the renewal of the Export Administration Act of 1985. We spent 2½ years in agonizing debate over this issue. It has been just 10 months since the new Export Administration Act became law. And that law contained over 50 major revisions to the way in which we handle export controls.

The omnibus trade bill contains many more revisions to the Export Administration Act—revisions that in the judgment of many would seriously jeopardize our national security interests.

For example, one of the provisions now in the bill would require an automatic 40-percent cut in the list of items that are controlled for national security purposes. Forty percent. The provision sets up an arbitrary formula which mandates huge cuts in our control list even though the items on the list are known to contribute significantly to the military potential of our adversaries.

Everyone supports the idea of an orderly decontrol of products that are no longer militarily critical. But a meatcleaver approach as proposed in this bill would seriously undermine our national security controls.

Let me point to another provision now in the bill that would hinder our national security export control efforts. The provision concerns reexport controls. If enacted, companies would no longer have to obtain permission from the Commerce Department to reexport their products if shipped to one of our allies. Basically, once the product is received by the first buyer, we turn over the tracking responsibility to our allies. In essense, we loose the capability to track militarily critical technologies once they leave American shores. Unfortunately, at this point, our allies do not all have the same resources or interests in tracking U.S. technology and assuring that it remains on this side of the Iron Curtain. Most of our allied partners in fact make very few prelicense or postshipment checks.

Rather than mandate a blanket repeal of reexport licenses, other approaches—such as the gold card approach now being worked on by the Commerce and Defense Departments—can accomplish the same objective of removing onerous paperwork requirements without compromising national security.

This same provision contains a blanket removal of reexport license requirements for any U.S. product or technology going to any destination as long as it is valued under $10,000 and is a component part. Removing reexport license requirements for parts and components may make sense in certain limited instances. However, such a decontrol would be best acomplished by way of very specific regulations taking into account the end user, the country destination, the military criticality of the component part, and other parameters.

A third provision in the bill which my amendment strikes would expand the definition of foreign availablity so that if a foreign product is found to be freely available in a free world country that does not restrict exports to the Soviet bloc, then the identical United States product ought to be decontrolled. For example, let's take a country like Ethiopia which doesn't maintain any export controls on products going to the Soviet bloc. If, say, Korean-made computers are found in ample supply in Ethiopia, then the equivalent American computer would have to be decontrolled to the Soviet bloc because of foreign availablity. Expanding the definition of "available in fact" along the lines proposed in this legislation would effectively decontrol United States high technology to the Soviet bloc in a manner inconsistent with our national security interests. High technology may now be "available in fact" in noncontrolled countries with loose export controls. However, that high technology is most likely only in the hands of very reliable companies who police themselves.

A fourth provision my amendment strikes would require private industry representatives on the U.S. Government export control negotiating team at COCOM. Such a move would be highly inappropriate and unprecedented interference into the Department of State's management of multilateral negotiations. COCOM negotiations are classified political discussions forming one of the cornerstones of the collective security system.

A fifth provision in the bill would limit the authority of the Customs Service has had since 1789 to detain and seize merchandize. The Commerce, Defense, and Customs are resolving previous difficulties which have emerged over the last few years through the interagency process. This legislation unnecessarily interferes in those discussions by placing an arbitrary unprecedented 10-day limit on Customs Department seizures.

And finally, the bill now increases the budget of the Office of Export Administration by 40 percent from its present authorization.

My amendment is straightforward. It strikes these provisions and restores the administration's budget request for export control administration.

I urge your support for this amendment tomorrow. Voting for this amendment eliminates several of the veto items in the bill. Voting for this amendment restores a balance to national security export controls. And voting for this amendment will enhance the prospects of this trade bill becoming law.

□ 1505

Mr. Chairman, I yield 1 minute to the gentleman from Alaska [Mr. YOUNG].

Mr. YOUNG of Alaska. I thank the gentleman for yielding me this time.

Mr. Chairman, it is my understanding that your amendment would eliminate section 321 of the omnibus trade bill—a provision that places unneeded additional restrictions on the export of crude oil from Alaska.

Mr. ROTH. If the gentleman will yield, yes, my amendment would eliminate that provision; however, it does not delete any of the current prohibitions on oil exports. We don't lift the ban on North Slope oil, nor do we expand present controls.

Mr. YOUNG of Alaska. It is also my understanding that your amendment would allow my State to pursue an initiative to export 6,000 barrels per day of Cook Inlet oil.

Mr. ROTH. Yes; and since we are both concerned with the effects that oil export would have on the merchant marine industry, can you give us an idea of how much oil you're talking about?

Mr. YOUNG of Alaska. As you know, I share your concern for the U.S. merchant marine. The Cook Inlet export would be the equivalent of only 1 small tanker of oil every 6 months. 6,000 barrels per day is less than one-third of 1 percent of all Alaskan crude oil. It does not pertain to the North Slope oil.

Mr. ROTH. And carried in American flag ships?

Mr. YOUNG of Alaska. Yes; on American flag ships.

Mr. ROTH. And I would add that the North Slope crude is for the U.S. market, and export prohibitions on this oil can only be lifted by Congress.

Mr. YOUNG of Alaska. That is true. At this time I thank the gentleman for yielding.

Mr. Chairman, I rise in strong opposition to H.R. 4800. This legislation is counterproductive and certain provisions would actually serve to hinder U.S. competitiveness by placing new controls on crude oil.

Specifically, section 321 of title III would halt an important trade initiative being pursued by the State of Alaska to export 6,000 barrels per day of Cook Inlet oil located in southern Alaska. Far from enhancing trade, the new export controls would be overly restrictive and lead U.S. energy policy badckwards.

Currently, there are five statutes which control the export of domestically produced crude oil. Appropriately, these controls allow the President the flexibility to approve certain exports. The huge reserves of North Slope oil would require legislation from Congress. However, the export restrictions proposed by this trade bill would needlessly restrain Presidential discretion and block the administration's proposal to allow for Cook Inlet export.

While opponents of this action argue that any export of Alaskan oil would threaten U.S. energy security, the rule change to allow for Cook Inlet export contains specific language to ensure a consistent U.S. supply. This initiative, which was open for public debate, contains a 1-year time limitation. The Department of Commerce has also retained the right to revoke export licenses "if there is a serious interruption of available U.S. oil supplies." Moreover, even opponents admit that the 6,000 barrels proposed for export is "more symbolic than substantive."

A more positive approach to this area was included in the Trade Partnership Act, a trade reform package introduced by the House Republican leadership late last year. Rather than restraining all United States exports, we choose to tie oil exports to reciprocal concessions from the Japanese. This action would not only improve our important relations with Pacific Rim nations, but would help United States industries gain access to the reluctant Japanese market.

As this example illustrates the House Republican initiative seeks workable solutions to our serious trade problem—a sharp contrast to the political grandstanding that is represented in the Democratic trade package.

In addition, the Democratic approach to oil export reinforces outdated policies enacted during the height of the oil crisis, ignoring the current problem of oversupply that threatens our domestic oil industry. By foreclosing any option for limited exports, small domestic producers on the west coast are forced to compete with Alaskan oil. This market distortion increases the likelihood of shutting in many marginal or stripper wells that are vital to our energy security—stripper wells account for roughly 15 percent of U.S. oil production, and once closed are extremely expensive to reopen.

Finally, this counterproductive provision is just one example of the many provisions that have made the chance for real trade reform impossible. As a result, the omnibus trade bill would serve to hinder U.S. competitiveness, not increase it.

The CHAIRMAN. The Chair would advise the gentleman from Washington [Mr. BONKER] he has 6 minutes remaining and the gentleman from Wisconsin [Mr. ROTH] has 7 minutes remaining.

Mr. BONKER. Mr. Chairman, I yield 1 minute to the gentleman from Arizona [Mr. UDALL].

Mr. UDALL. I thank the gentleman for yielding me this time.

Mr. Chairman, although this bill was reported by the Committee on Ways and Means, there is a provision which concerns the jurisdiction of the Committee on Interior and Insular Affairs which I want to address briefly. I appreciate the cooperation of Chairmen ROSTENKOWSKI and GIBBONS in working out our mutual concerns with it.

Section 239 suspends duty on a quoted amount of sweaters from Guam which enter under the tariff schedules as provided in the territory's organic act.

Unfortunately, the need for this provision was created by administration regulations issued outside of the appropriate provision of the tariff schedules, general headnote 3(a). The regulations changed the definition of what constitutes a product of the territory. To void the applicability of these regulations to the U.S. insular areas, the House passed legislation in the last Congress.

Since the Senate did not act on the bill, a compromise in this legislation was necessary to enable the territorial sweater industry to continue to exist. Guam's able Delegate, BEN BLAZ, Representatives FRENZEL and LAGOMARSINO are to be complimented for pursuing this compromise.

This bill does not solve the similar problem confronting the sweather industry in the neighboring U.S. Commonwealth of the Northern Mariana Islands.

The commonwealth's covenant provides that the customs treatment of Northern Marianas products be the same as the treatment of Guam products. However, this section is not intented to create either new benefits or requirements for articles imported from the Northern Marianas. They should continue to enter under existing headnote 3(a) guidelines.

So, in the case of sweaters alone, the treatment of Northern Marianas products will differ somewhat from Guam products. In all other cases, however, imports from the northern Marianas should be treated the same as imports from Guam.

I believe that my colleagues join me in expecting that the customs treatment of imports from the insular areas will continue to be provided under, and consistent with, the headnote and not contradictory regulations.

Mr. ROTH. Mr. Chairman, I yield 2 minutes to the gentleman from New York [Mr. KEMP].

Mr. KEMP. I thank the gentleman for yielding.

Mr. Chairman, I rise in opposition to H.R. 4800. President Reagan, I think is right about this legislation; it is not a fair trade bill, it is a less trade bill. The sponsors call it a warning shot across the bow of our trading partners.

It will miss its target. Instead, it is going to hit the American consumer, it is going to hit the American people, it is going to hit the people of the world who care deeply about encouraging trade, not discouraging trade.

At a time when Congress needs to be talking about the need to create jobs, to establish the proper conditions for increased trade, this bill will have the opposite effect. This bill will not create any new jobs; it will simply shuffle them between industries. You don't create a job by taking someone else's job away from them.

The various provisions contained in this legislation are almost certain to start a trade war—a war in which there will be only losers. We've been down this path before—Smoot-Hawley was the answer given 50 years ago and it amost destroyed a people and a nation.

How and when could this new trade war start? It will take the form of legislation in other countries that simply mirrors H.R. 4800 and it will start the minute this bill is enacted.

Let me summarize some of the items in this bill that are almost guaranteed to lead to this disaster, that will lead to a weaker, not a stronger America, and a contraction not an expansion of trade. In particular, the Gephardt amendment is a terrible idea because it threatens an international trade war, not just between countries but between the U.S. Government and the U.S. consumer. The Gephardt amendments tells countries that discriminate against American goods while running a trade surplus that they must reduce their surpluses by 10 percent a year

for 4 years. If they didn't, the President would have to block their sales to America. The primary targets are Japan, West Germany, and Taiwan.

This amendment ignores the simple fact that a large trade surplus is not necessarily a sign of strength. Both Brazil and Mexico have large trade surpluses, yet their economies are weak. Japan ran a trade deficit in the 1950's and 1960's when its growth rates were more rapid than today. In the first century after our independence, when the United States became the foremost industrial economy in the world, we routinely imported more than we exported. Hong Kong has run virtually continuous trade deficits for 140 years.

Combined with a series of GATT illegal, unilaterally defined trade actions, this amendment will necessitate the enactment of retaliatory legislation by our major trading partners. They will have to follow suit or face economic and political turmoil at home.

Ultimately, the Gephardt amendment is based upon the premise that there is too much international trade or that somehow it is bad. By forcing this reduction in trade, it will invite, in my view, retaliation that will mean higher prices, and a lower standard of living. I am glad the gentleman is here to listen to this. It will invite retaliation. I am disappointed that his party is picking up the Smoot-Hawley idea of the Republican Party in the 1930's and renaming it as the Gephardt legislation of the 1980's.

● Other features are just as foolish, such as setting up a bureaucratic industrial planning board. Every European country has an industrial planning board, and our friends in the Democratic Party want the United States, which has created 10 million new jobs in 3 years without any inflation, to go the way of Europe with industrial planning. It is ridiculous. If there's anything the American economy and the American people don't need, it's a new bureaucracy telling them how to "plan" for the future.●

By simple mindedly striking the number of items off the commodity control list and prohibiting reexport controls, this bill makes valuable technology available to the enemies of freedom.

The President is cut out of trade policy by making retaliation mandatory, in some cases without any determination of injury by our trade agencies. These provisions turn the President into a second-class citizen and limit his ability to conduct a responsible and balanced foreign policy.

Mr. GEPHARDT. Mr. Chairman, will the gentleman yield?

Mr. KEMP. I have 2 minutes, I say to the gentleman. I would be glad to get him some time on his own side of the aisle.

This bill establishes a strategic currency reserve. We are going to use taxpayer dollars in the United States of America to buy French francs or British pounds or Japanese yen? Why should we use taxpayer dollars for strategic currency reserve to intervene to defend foreign countries' poor monetary policy? It is really lending billions of dollars to foreign governments. We have got a foreign aid bill. Do not use trade legislation for foreign aid.

H.R. 4800 fails to come to grips with the cause of these problems.

I know it is not the intention of the authors of H.R. 4800 to put Americans out of work or to lower their standard of living. For the pressure for protectionism comes out of a frustration with the trade deficit, and the people behind the numbers.

It shows in the faces of families who've lost jobs—whether they work in the steel mills of Buffalo, the textile mills of the Carolinas, or the shoe factories of the Northeast.

We need lower interest rates, lower tax rates and lower, not higher, trade barriers to put these Americans back to work. This means attacking the causes of the problem, not the symptoms.

The world needs a stable exchange rate system. And this means a stable dollar, not one that flucuates wildly month to month. The floating exchange rate system means feast or famine, and ultimately semistarvation for the economies of all trading nations. The nations of the world spend more time trying to protect themselves against an overvalued or undervalued currency than they do in developing market for our products, or jobs for our workers. For how can a company make the long run decisions about product development, plant construction, or hiring when the value of the currency is never certain? It's time for the administration to come up with a plan for currency stability. We don't need more crisis management or yet another study. The old system needs replacing: Its failure is measured in lost jobs and closed factories, broken families, and broken dreams.

We need to speed up the timetable on the Reagan round of world trade, or GATT talks. To move these multilateral talks along, we must aggressively pursue bilateral negotiations. The best way to do this is to establish free trade areas just as we have with Israel, and we are starting to do with Canada and Asia. Opening up markets, not closing them is the answer. And by successfully concluding such free trade area agreements, the pressure builds on non-FTA countries to open up their markets—otherwise they will be left behind.

We need a Federal Reserve policy that emphasizes stable prices, not some meaningless measure like M1, or M3, or M-infinity. To those who think monetary policy has little to do with trade, I ask them to talk to a farmer or a manufacturer who watched markets disappear as the dollar and interest rates were driven sky high by the Fed's restrictive policies just a few short years ago.

We need once and for all to reject the austerity policies of the IMF and the other multilateral banks that have driven the developing world into a State of near pauperism. It's time that the theory of the Baker plan become a reality—talk must be translated into trade liberalization, privatization, and the freeing up of markets. In addition, the slow-growing economies of Latin America, Europe, and developing nations, should also be encouraged to cut their own tax rates. These countries have traditionally been strong markets for U.S. goods and services, but in recent years their economies have been suffocating under high taxes. Encouraging stronger, more dynamic foreign economies through tax cuts and these other actions would be good in itself, but it would also mean more robust markets for U.S. exports.

And finally, the Congress needs to enact, as soon as possible, a tax bill along the lines of that passed by the Senate Finance Committee. The resulting drop in interest rates, and increases in productivity, savings, and economic growth will mean more in new jobs and opportunity than a hundred trade bills.

The bottom line is simply this: trade helps everyone—it maximizes jobs, output, and income, and wages—in the United States and abroad. Although some people say that we have lost 2 million or more jobs due to imports, they forget to point out that on net we have gained more than 10 million new jobs during the same period. The rate of inflation is the lowest in almost a generation and interest rates are the lowest in a decade. Let's address the real causes of the problems faced by American workers and families so that they can join us in this prosperity.

This is a time for Congress to show vision. We must break down economic barriers between our allies and spread the ideas of freedom and democratic capitalism throughout the world, not isolate ourselves and our economy under a suffocating cover of protectionism. America's prosperity is inextricably intertwined with the welfare of our allies and major trading partners. In trade as in so many other aspects of economic and social life, we must all move forward together.

I urge the House to defeat this destructive legislation.

Mr. BONKER. Mr. Chairman, I yield 1 minute to the gentleman from Missouri [Mr. GEPHARDT].

Mr. GEPHARDT. I thank the gentleman for yielding.

In that the gentleman from New York mentioned my name and my amendment, I think it is appropriate to respond to the points that he made.

The Gephardt amendment is nothing like anything that we have done in the past, such as Smoot-Hawley; it is a very different approach. It is a flexible approach.

I would just ask the gentleman a rhetorical question, and that is: Is the gentleman happy with the $150 billion trade deficit that we have this year, that is projected to be $400 billion by the year 1990? The Republican administration approach to trade is to stick our heads in the sand, not ask anyone to open their markets abroad, and to simply put up with being the largest trade debtor nation in the history of the world. I do not think that is the kind of trade policy we want. Should we not try something different? Should we not try something new? Should we not try to approach these problems with a varied approach that will get at the root causes and get us out of the situation where we have the largest trade deficit in the history of the world?

Mr. KEMP. I take it that is a rhetorical question.

Mr. ROTH. Mr. Chairman, I yield 3 minutes to the gentleman from Nebraska.

Mr. BEREUTER. Mr. Chairman, I rise necessarily in objection to H.R. 4800. I certainly have been supportive of the legislation which was reported by the Foreign Affairs Committee which became a part of the package we now know as H.R. 4800. I, in fact, commend the chairman of the Trade Subcommittee, the gentleman from Washington, Mr. BONKER, for his effort, and I think, by and large, we had a bill that we could support on a bipartisan basis. Certainly, I was and am supportive of the legislation passed by the Foreign Affairs Committee.

I do, however, think that there are substantial problems in many other parts of H.R. 4800, primarily those coming to us from the House Ways and Means Committee, and I am particularly concerned that many of the provisions there are certainly strongly antiagriculture in their impact. I'll be commenting a bit later about the details of my concerns with respect to the impact of this legislation on agriculture and agribusiness.

Before that, however, I thought that I would bring a few recent editorial comments concerning H.R. 4800 to the attention of my colleagues.

We might begin with the lead editorial in the New York Times of Monday, May 19, 1986, which, in speaking about this legislation said, this bill "would shoot American consumers in the foot." Or you may consider an editorial from the Washington Post of May 14, 1986, entitled "A Shin-Kicker Bill." It said in conclusion: "Frustration rarely produces good legislation. This bill is a shin-kicker intended to attract attention. In that, it is succeeding very effectively. But among American industries it will hurt the most competitive and help only the least competitive." The Wall Street Journal of May 15, 1986, in an editorial entitled "Trade Bill Terpsichore" made essentially the same point, and it could perhaps in the relevant portion be quoted most effectively in the following fashion: "One of the more mindless provisions would require 10 percent annual reduction in the U.S. trade deficits with Japan, Taiwan, and West Germany. To accomplish that pointless feat would necessitate market interference of the most ham-handed type, disrupting capital flows as well as trade. It would also be a gross violation of international trade rules hard on the heels of Mr. Reagan's success in Tokyo, and engendering a new round of trade liberalization talks."

In an editorial of Monday, May 19, 1986, the Christian Science Monitor concludes with this statement: "Opening up—not closing off—trade remains the necessary goal." This bill indeed does not encourage trade as much as it attempts to cut it off, it seems, in its effect.

Finally I'd like to mention a column from the Washington Post dated May 14, 1986, by Hobart Rowan, speaking specifically of H.R. 4800. In referring to the single provision that brings the greatest concern to me, concern based upon retaliation by our major agricultural customers against us, he says the following:

> Gephardt's "controlled entry" of imports (a wonderful euphemism, I think) to solve the problem doesn't do anything to reinspire a competitive American edge. It suffers from the same deficiency as the 25 percent surcharge: It attacks the trade deficit by closing our markets, instead of getting our trading partners to open theirs. That's why, although Gephardt and other Democrats shun it, it deserves the tag "protectionist."
>
> • • • U.S. Trade Representative Clayton Yeutter put it this way in a conversation on the bill: "If Japan and West Germany and any others comply (with the annual 10 percent reduction in surplus), they simply will cut their exports here, rather than open markets. If our major objective is to expand world trade, this surely isn't the way."
>
> C. Fred Bergsten, head of the Institute for International Economics here, says scornfully: "The Gephardt amendment is grossly inadequate in its targets, and completely unacceptable in its instruments."

Concluding his argument in that column, Rowen says the following:

> It's clear to me that, on balance, the Democratic omnibus bill is bad legislation, violative of the GATT. But it's time for the administration to do more than denounce the bill. It must do something positive.

Indeed, I agree, it is time for the administration to take a more aggressive role, and in fact, that's a problem that the executive branch has had now during several administrations. Congress is perfectly right in proceeding to push the adminstration and to demand fair trade, and to protect as necessary vital parts of our economic structure and our industrial base.

Mr. Chairman, while I am concerned about many aspects of H.R. 4800 and have had a role in working on diverse elements of the legislation through membership on both the Foreign Affairs Committee and the Committee on Banking, Finance, and Urban Affairs, I rise today to speak against this bill in the form that it has been reported to the floor. As a Member who represents a congressional district that is heavily dependent upon agriculture, I want to explain why trade, and this trade bill in particular, is important to the people of my State.

During the past year there has been considerable debate in this chamber about the state of our agricultural economy. In the recent past, Congress has debated and passed the Export Administration Act which will dramatically limit the use of food embargoes as a tool of foreign policy, a new multiyear farm bill to extend commodity price-support, conservation, and commercial export promotion programs, and emergency farm credit legislation to save the Farm Credit System. Each attempts to address particular problems within agriculture, but none alone will be a total solution.

For any member who represents an agricultural district, or anyone familiar with the economic problems in our agricultural sector of the economy, it is obvious that agriculture suffers from not one, but a myriad of problems. Agricultural trade is no exception and it must be addressed if we are going to turn around our economic situation in agriculture.

Today, we begin debate on omnibus trade legislation which in many respects will be as important to the farmers, ranchers, and producers in my State of Nebraska as any agriculturally related legislation considered by this House during the last several years. This trade bill has many positive features which are protrade and proagriculture, but it also contains several provisions which are very antitrade and particularly detrimental to agriculture.

While this trade bill in some way affects virtually all industries in the United States, what we must understand is that agriculture is this Nation's largest industry with nearly $1 trillion dollars invested in farm assets.

Agriculture is our Nation's largest employer, requiring nearly 2.7 million workers in farming alone—as many as the combined work forces of the transportation, steel, and automobile industries. Another 18.3 million people are involved in the storage, transporta-

tion, processing, and merchandising of the Nation's agricultural products.

As an industry, agriculture is also this Nation's largest exporter. Although we have witnessed a steady and precipitous decline in our agricultural exports over the past 5 years—from a high of $41 billion in 1981 to a 10-year low of $29 billion last year—the United States remains the world's leading exporter of agricultural products.

There is no question that U.S. agricultural exports have been, and continue to be, the largest contributor to our balance of payments. During the years 1960 through 1984, commercial exports of U.S. farm products brought over $430 billion back to the United States. During the same period, exports under Public Law 480-Food for Peace Program accounted for an additional $31 billion dollars in agricultural trade.

Foreign markets provide a major and invaluable outlet for U.S. farm production. In fiscal 1984, more than half of the wheat, soybeans, rice, cotton, and sunflower seeds produced were exported. Similarly, more than one-third of the tobacco, feed grains, and tallow were exported. Nationally, 2 out of 5 acres are farmed for export. In Nebraska, the production from 1 out of 3 acres will be sold overseas.

Thus, a decline in U.S. agriculture exports is significant to agriculture because it represents a loss of overseas markets for our surplus production, a decline in farm income, a decline in export-related jobs and an increase in the cost of price support programs administered by the Department of Agriculture.

As the volume of U.S. agricultural exports has fallen to a 10-year low, the cost of USDA farm programs has hit an all time high. Thus, a direct relationship exists between the volume of U.S. agricultural exports and the cost of USDA farm programs. It is therefore, in the best interests of not only farmers, but also the taxpayers of the United States to aggressively support and promote the expansion of foreign markets for U.S. agricultural commodities and products.

While a number of trade-related issues and programs were included in the 1985 farm bill last year, there are positive features in this trade bill which will further enhance U.S. agricultural exports and our competitiveness in the world.

I am pleased that the Foreign Affairs Committee on which I serve included within its bill a number of provisions relating to agriculture. I also commend the chairman and members of the Agriculture Committee for the provisions which they have included in this bill. In addition, the Ways and Means Committee has addressed some issues which have plagued certain agricultural interests such as the ethanol industry, perishable products producers, and the livestock sector of agriculture for many years.

In general, this trade bill does contain many positive provisions which will concentrate more authority in the U.S. Department of Agriculture to take charge of all agriculturally related trade matters. Among other proagricultural provisions in this bill, the United States will begin to establish a long-term agricultural trade policy for this country by requiring the USDA to file annual long-term strategy reports with Congress for 1, 5, and 10-year periods. USDA food aid programs will also be better used to promote the development of new markets, and the USDA Export PIK Program will be broadened to include our traditional customers that have previously been excluded from participating in this program. Finally, continued emphasis is placed on improving the quality of our agricultural exports, especially grain quality.

I would point out that a number of these provisions added to this legislation by this member and by the House Agriculture Committee are the result of the work of the National Commission on Agricultural Trade and Export Policy. This is a commission created by Congress nearly 2 years ago to study the problems associated with the decline in U.S. agricultural exports and to make recommendations to Congress regarding changes in administrative policy and legislation that would result in an expansion of existing markets and the development of new ones for our agricultural products.

The Commission has met regularly over the past year and a half and will make its final report and recommendations to Congress next month. However, in light of the fast track that this trade bill was given by the leadership of this House, this Member of Congress who serves on the Commission felt it was imperative to include some of its recommendations in this trade bill.

I would also point out that the agriculture provisions in both the omnibus trade bill and the Michel bill are virtually the same. While each is aggressive in promoting agricultural exports, and both would be effective in opening up new markets for our products overseas, it is obvious that the Gephardt and other onerous provisions of H.R. 4800 will invite retaliation by our trading partners against the United States and agricultural producers especially.

Despite the excellent proexport provisions of agriculture and agribusiness, this trade bill as reported to the floor would almost certainly be disastrous to American agriculture. Members of Congress from States producing large quantities of wheat, feed grains, and soybeans should be particularly subject to harsh criticism if they vote for H.R. 4800, as reported to the floor. It is disastrous for American agriculture. In short, while there are many good provisions in this bill which are protrade and proagriculture, these are a few which are very antitrade and detrimental to agriculture.

I would ask my colleagues who have been so patient, supportive, and interested in agriculture and agricultural problems over the last year to pay close attention to the debate today, and the debate tomorrow on the Crane amendment and the Michel substitute, to learn why the farmers and the agricultural producers of the United States stand to lose so much if this bill is passed in its current form. For those members who already represent agricultural districts, there should be no question or doubt that certain protectionist provisions are potentially devastating to agriculture.

The sections in this bill which attempt to deal with trade deficits by mandating reductions and imposing surcharges, tariffs, and quotas—the Gephardt provisions—and other sections relating to natural resource subsidies, the denial of internationally recognized worker rights—the Pease provisions—and the unilateral limitation of imports of goods from nonmarket economies will all have a serious detrimental impact on agricultural trade. Of these provisions, the Gephardt amendment adopted in the Ways and Means Committee is by far the most dangerous and damaging to agriculture and agribusiness.

All of these sections are in reality targeted toward trading partners which are among our largest foreign purchasers of U.S. agricultural commodities and products. If Congress had designed legislation to internationally hurt farmers and disrupt U.S. agricultural exports, they could not have designed a more effective or efficient way to invite retaliation than this bill.

Although U.S. agricultural exports go to more than 130 countries around the world, nearly 70 percent of those exports are made to only 15 countries: Japan, U.S.S.R., the Netherlands, Mexico, Canada, South Korea, Taiwan, West Germany, Spain, Egypt, Belgium, the United Kingdom, Venezuela, Italy, and Portugal. These countries alone accounted for $26 billion in U.S. agricultural exports in 1984. In terms of regional markets, Asia was the biggest market at $15.2 billion.

Other major markets include Western Europe—$9.3 billion of which $6.7 billion went to the European Community; Latin America—$5.3 billion; Africa—$2.9 billion; Canada—$1.9 billion; and Eastern Europe—$0.7 billion. All of these markets will be adversely affected and potentially lost if H.R. 4800 is passed as reported to the floor.

Many of the protectionist provisions in this legislation have been included, I am sure, with the best of intentions to help those industries and their workers that have been hurt by a flood of cheap or subsidized imports. While my congressional district is primarily agricultural, it also has an important and growing industrial base. Therefore, I recognize and I am also sympathetic to the problems faced by those in industrialized areas.

The direction of this trade bill should be to promote trade and increase the exports of each industry of the United States. It should also require the executive branch to get much tougher in pursuing fair trade, responding quickly and effectively to unfair trade practices of competitors, and encouraging access to other markets which are now essentially closed. Unfortunately, this legislation in large measure marches in the opposite direction by discouraging trade, inviting retaliation and pitting the economic interests of one industry against another.

When trade legislation seeks to protect one industry at the expense of another—which this legislation does—then the economic well-being of everyone in this country is adversely affected. For the farmers of this country, the retaliation which this bill invites will be swift and severe. It will only compound our trade problems in agriculture and many other industrial and business sectors. For those who seek protection, the benefits will be tangible, but shortlived. In the long run, we will all suffer, yet gain no appreciable economic advantage for U.S. workers, or any comparative advantage for the United States in the world marketplace.

Mr. Chairman, agricultural trade is but one solution to the economic problems we face in agriculture. This trade legislation can either be a part of that solution, or, like the worst provisions of H.R. 4800, it can be the source of many future problems for the farmers of this country.

□ 1520

Mr. BONKER. Mr. Chairman, I yield 3 minutes to the gentlemen from California [Mr. BERMAN].

Mr. BERMAN. Mr. Chairman, I thank the gentleman for yielding this time me.

Mr. Chairman, I rise in support of two titles of this bill, title III with respect to export controls, and title VII relating to amendments to the Foreign Corrupt Practices Act.

I will be urging tomorrow, along with our subcommittee chairman, the gentleman from Washington, opposition to the Roth amendment to title III, which guts an important effort to try to eliminate a variety of duplicative licensing procedures and bureaucratic roadblocks in the way of export promotion.

Mr. Chairman, I would like to focus my brief time today on the work done by the subcommittee chairman, the gentleman from Washington, and by the gentleman from Flordia [Mr. MICA], working together with other members of the subcommittee in finally coming together on a significant and meaningful change to the Foreign Corrupt Practices Act, a change which has the benefit of giving business, exporting industries, a better sense of what we are requiring and, at the same time, enhancing the importance and the needs of law enforcement in preventing bribery of foreign officials by representatives of U.S. companies.

I want in particular to thank the chairman of our subcommittee, the gentleman from Washington, and my distinguished colleague, the gentleman from Florida.

Together, we have achieved in this legislation a vitally important objective. We have taken steps to substantially clarify the intent and meaning of the law, and in so doing, in my view we have enhanced business compliance and law enforcement under the act.

There are two sections, which happen to be among the amendments I offered in the Foreign Affairs Committee, that I particularly want to point out to my colleagues.

By setting forth standards of due diligence to prevent and detect violations of the act by employees and agents, we have given companies doing business abroad an important incentive to self-police. What we have done is to include in the act a "due diligence" defense by companies accused of foreign bribery. This would be allowed as an affirmative defense, meaning that the company has the burden of going forward and proving by a preponderance of the evidence that due diligence was used.

The defense would be available only if: One, the company had established and implemented, in good faith, procedures designed to prevent violations and, two, officers and supervisory employees of the company used due diligence to prevent the specific violation by the offending employee. What would constitute due diligence would be a factual determination by the trier of fact and would vary depending upon the particular circumstances of the transaction at issue.

In our discussions of this amendment in committee, my colleagues and I pointed out that companies would be particularly well advised to exercise due diligence when one of the so-called red flags exists in a transaction. Examples of such red flags might include, but are certainly not limited to:

Any usual proposal relating to the method of payment of any participants in the transaction, particularly through third countries or in currency;

Any known or suspected family relationship between any participants in the transaction and any foreign government official;

Refusal by any participants in the transaction to sign affidavits or make representations that they will not violate the FCPA;

The size of the commission paid to the agent in relation to the services performed;

Any known or suspected misrepresentations by the agent or others in connection with the proposed transaction;

Requests by any participants in the transaction that the company prepare false invoices or any other type of false documentation; and

Any negative information developed as part of the independent investigation—which should be required—into the activities and reputation of the agent or other participants in the transaction, including any information developed regarding the financial interests of any foreign government official in any companies participating directly or indirectly in the transaction.

In the appropriate case, the presence of even one of these red flags might necessitate due diligence steps by supervisory personnel in the corporation. Such due diligence might include: Regular training and updating of all levels of involved corporate personnel, independent investigation of the background and reputation of agents and other participants in the transaction, contract provisions obligating the parties not to violate the act and voiding the contract ab initio if the act is violated; a right to perform a full or partial audit of the books of agents or other transaction participants; disclosure of the existence and terms of agency relationships to the foreign government purchaser, periodic compliance certification by corporate personnel and participants, and independent opinions of local counsel that local law will not be violated by any part of the transaction.

During markup in committee, I observed that if I were a corporation or business in this country interested in exporting and doing business abroad, the first thing I would do after this bill becomes law would be to put into effect a procedure which ensures that my representatives in foreign countries are not making corrupt payments, to insulate the company from either criminal or civil liability. I think the incentive to self-policing can do far more than hiring a thousand more investigators in the SEC or the Justice Department to deter corrupt payments, and that is why I view this amendment to the act as a very positive contribution to enforcing the values of this law.

The second section I particularly want to address today was also an amendment I successfully offered in committee. Title VII of H.R. 4800 defines more clearly illegal payments. The current statute makes illegal bribes "to obtain or retain business." In the bill before us, we clarify that the prohibition includes payments made to assist in the "procurement of legislative, judicial, regulatory, or other action in seeking more favorable treatment by a foreign government." We are in agreement that payments of this nature are prohibited by current law, but the language of this legislation makes this clear and will strengthen law enforcement and business compliance in this area.

As a consequence, it should now be perfectly clear that payments made to procure more favorable tax treatment, exemption from laws or regulations of a foreign country, or other actions enhancing the treatment of the company would be prohibited.

In sum, Mr. Chairman, I am happy to join with my colleagues from the Committee on

Foreign Affairs in voicing strong support for these amendments to the Foreign Corrupt Practices Act. Business is provided with clarification as to their obligations under the law, which, given the criminal penalties provided under the act, is only fair. And important incentives are provided to business to self-police, which I believe is the most effective means of enforcing the law. In the end, in view of the important policy objectives of this law, it is my belief that business, the public, and America's relations with countries around the world, are all the beneficiaries of the important clarifications we have achieved in the legislation before us today.

Mr. ROTH. Mr. Chairman, may I inquire of the Chair as to how much time I have remaining?

The CHAIRMAN. The gentleman from Wisconsin [Mr. ROTH] has 2 minutes remaining and the gentleman from Washington [Mr. BONKER] has 2 minutes remaining.

Mr. ROTH. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. LAGOMARSINO].

Mr. LAGOMARSINO. Mr. Chairman, I rise in strong opposition to H.R. 4800, the protectionist trade bill of 1986 and in support of the Republican substitute. The Republican substitute is a more carefully crafted compilation of many needed improvements in our trade laws, some of them coming from H.R. 4800. While I do have some concerns with the Republican bill, I believe that it is a good beginning and a significant improvement over the partisan majority bill.

The United States is the greatest trading nation in the world, with exports over $200 billion a year. We have more at stake in maintaining a healthy world trading system than any other country. If enacted into law, the Democratic trade bill would severely damage our economy, reduce our international competitiveness, destroy American jobs and embroil us in trade conflicts with nearly all our major trading partners. It is no wonder that this legislation is opposed by the Wall Street Journal, the Washington Post, the New York Times, the LA Times, the Chicago Tribune, the Farm Bureau, the Business Roundtable as well as various manufacturers, service industries, consumers groups, and retailers. My distinguished colleague from Minnesota, [Mr. FRENZEL], has pointed that there are at least 55 major flaws in the Democratic trade bill.

I would like to take this opportunity to touch on a few of the more significant objections I have to this poor legislative effort. First, unilateral restrictions linked to bilateral trade deficits with Japan, West Germany, and Taiwan would violate GATT and invites massive trade retaliation against United States exports, particularly agricultural commodities. California, and my district with its specialty agricultural crops, would be especially hard hit. Second, a provision under the bill would add denial of internationally recognized workers rights as an actionable practice under section 301. I am strongly opposed to creating this arbitrary category of unfair trade practice since it is based on standards that Congress has not ratified for the United States. Moreover, it is ironic that the same workers that this provision is trying to help, will in the long run be hurt by U.S. trade restrictions on the products they produce.

Third, amendments to our export control laws would damage vital national security interests. The 40-percent reduction in items under national security export controls within 2 years is arbitrary and unwise. Furthermore, it is unwise to prohibit reexport controls on U.S. items to or from Cocom countries since this is a critical tool for tracking and preventing diversion of strategic items to the Eastern bloc.

Fourth, the legislation establishes an industry adjustment advisory group to make industrial policy recommendations as part of section 201 cases. In this time of fiscal restraint we do not need a new bureaucracy with a large budget to gather and disseminate information, that is already performed by many advisory bodies. This big government approach to economics was rejected by the American people during the last election.

Fifth, the legislation would create a private right of action for economic loses caused by dumping in the 3 proceeding years. This would only violate GATT and invite mirror legislation abroad that would mean wide-scale harassment of U.S. exporters in foreign courts and U.S. importers here. Finally, H.R. 4800 would add significantly to the budget deficit. Preliminary analysis indicates that enactment of this bill would result in increased outlays of $6.5 billion over a 3-year period. Costly new grant programs in the Department of Education and Labor would duplicate programs and increase Federal interference in areas of State responsibility.

Mr. Chairman, H.R. 4800 would only weaken the ability of American firms to compete in the world marketplace, expose American exporters to retaliation by other countries, risk national security by weakening export controls and weaken the President's ability to eliminate unfair trading practices abroad. The administration agrees that the U.S. trade deficit is a serious problem and has an aggressive program to deal with this issue. They have initiated cases of unfair trading practices with Japan, the European Community, South Korea, Taiwan, and Brazil that have opened markets not closed them. They have made important strides toward strengthening GATT which governs international trade and have helped reduce the value of the dollar against other major currencies, so U.S. products are priced more competitively in world markets. Nine members of the President's Cabinet have recommended that the President veto this bill. I encourage my colleagues to oppose this poorly drafted partisan trade bill.

[From the Los Angeles Times, May 11, 1986]

ASKING FOR TROUBLE

Efforts of at least three committees in the House of Representatives to erect protectionist walls around the United States and impose mandatory retaliation in trade disputes will be brought together in a "mega-bill" by the House leadership on Tuesday and rushed to floor action. The result threatens to disrupt international trade, poison efforts to establish a freer flow of goods among nations and invite trouble for U.S. exports.

For all its appalling consequences, however, the package is gaining support from a coalition of special interests, each mistakeniy assuming that its economic problems of the moment can be resolved by banning foreign competition and legislating how other nations behave. The Democratic Party, apparently thinking it can exploit the complex problem to advantage in this year's elections, is leading the way.

The most dangerous aspect of the legislative package is that it will discourage important reform movements at the very moment that these reforms are gaining international acceptance. The establishment of the Group of Seven at the Tokyo Economic Summit last week, the agreement on a new round of negotiations for a greatly expanded General Agreement on Tariffs and Trade and the new agreements with Japan and the European Community to move from confrontation to conciliation on outstanding issues all would be jeopardized by the protectionist package.

While the details will not be known until Tuesday, it is already clear that the legislation will embrace mandatory retaliation which would undermine the widely-accepted concept that international trade agreements cannot be negotiated on a product by product basis but must reflect overall trade. The package is expected to include specific cuts on imports from Japan, Germany and Taiwan in ways that would tear apart existing agreements and standards for settling disputes over unfair trade.

America's own farm exports would be at risk through a loosely written ban on so-called resource subsidies that seeks to punish any product that benefits from alleged below-market inputs, including oil, water and power. Automatic penalties imposed on imports judged to be products of places without due respect to workers' rights would open the way to endless challenge and unresolved dispute.

Unemployed steelworkers in Pittsburgh, dislocated textile workers in the Southeast, surplus-suffocated grape growers in Fresno and farmers fighting over-production and depressed prices are being told that this protectionism will resolve their problems. It will not. It will only make them worse.

The Administration already has adequate legislative tools to move ahead in the constant struggle to overcome unfair practices and to gain more access for American exports. It has been working effectively. That effort should be encouraged, not sabotaged.

TRADE POLICY ACTIONS AS OF MAY 16, 1986

As a part of the President's trade policy announced September 23, 1985, the Administration has:

Taken the unprecedented step of self-initiating Section 301 unfair trade cases on:

Brazilian informatics market and investment restrictions (9/13/85);

Korean fire and life insurance market restrictions (9/13/85);

Japanese market restrictions on tobacco products (9/13/85);

Korean lack of protection for intellectual property rights (10/16/85).

Self-initiated for the first time a Section 305 investigation to gather information for the potential trade barrier posed to U.S. meat exports by the proposed EC Third Country Meat Directive (3/31/86).

Initiated the first case ever brought under Section 307, initiating an investigation of Taiwan's automotive export performance requirements (3/31/86).

Achieved a negotiated resolution on the issue of Japan's market restrictions on leather and leather footwear (12/20/85). Japan agreed to compensation through reduced tariffs worth $236 million in increased market access and the U.S. will impose prohibitive tariffs on $24 million of Japanese leather exports to the U.S.

Announced a GATT Subsidies Code case against European Community wheat export subsidies (10/16/85).

Secured market-opening concessions from Taiwan on tobacco, wine, and beer in response to the threat of a 301 case (10/16/85).

The Administration has formed the President's Strike Force on Trade, chaired by Commerce Secretary Baldrige, to identify specific trade barriers which may require further action. To date, the Strike Force has:

Recommended to the Economic Policy Council in November 1985 that the U.S. Government initiate an antidumping investigation on semiconductors from Japan. The USG self-initiated the antidumping investigation December 6, 1985. This is the first time ever that the Department has self-initiated an unfair trade investigation outside an established program such as the Steel Trigger Price Mechanism. The International Trade Commission found preliminary injury (5-0) on January 22, 1986. The Department of Commerce announced preliminary dumping margins on March 13. A final dumping determination is expected by March 30.

Recommended to the Economic Policy Council in January 1986 that the United States Government undertake informal consultations with Airbus governments (France, Federal Republic of Germany, United Kingdom) to contain or eliminate unfair trade practices on current and future Airbus programs. The first round of discussions took place March 20-21 in Geneva. As the issue remains open, a second round of discussions will take place in June.

Recommended to the Economic Policy Council that a comprehensive strategy for dealing with unfair intellectual property rights practices be undertaken. This strategy, announced April 7, 1986, includes:

a legislative initiative;

intensified bilateral pressure through consultations, possible denial of GSP benefits, and possible 301 cases;

heightened multilateral efforts; and

an Administration policy statement on intellectual property rights.

The working group level of the Strike Force is considering many issues, some of which are being developed further. These issues will be forwarded to the Strike Force over the next few weeks.

We have moved to resolve four disputes with the European Community:

We have reached agreement with the EC under the President's steel program which provides for voluntary restraints on most European steel exports to the United States through September 1989. To remedy the problem of diversion by EC exporters from licensed products to semi-finished steel, as of January 1, 1986, the U.S. imposed quotas on imports of EC semi-finished steel.

In December 1985, we negotiated resolution of the EC canned fruit case, obtaining an EC commitment to reduce its production subsidy by 25 percent by July 1986 and eliminate it entirely by July 1987.

Following the failure of the U.S. and EC to reach a solution on the citrus problem by the agreed October 31 deadline, on November 1 the U.S. imposed duties of 40 percent ad valorem on EC-origin pasta products not containing egg and 25 percent ad valorem on EC pasta containing egg. We have, however, continued to discuss this case with the EC and would prefer a negotiated solution which would enable us to put this case behind us.

On 5/15/86, announced a specific response to new EC restrictions on U.S. grain and oilseeds exports to Spain and Portugal as a part of the terms under which those countries joined the EC in January 1986. In response to the EC's quotas on U.S. agricultural exports to Portugal, the U.S. will impose quotas on certain agricultural products from the EC: white wine valued over $4 per gallon, chocolate, candy, apple or pear juice, and beer. These quotas will be adjusted to mirror the trade losses caused the U.S. by the EC's restrictions. With respect to the variable levy imposed in Spain, announced that in 30 days the U.S. will withdraw tariff "bindings" (GATT agreements not to raise tariffs above a certain level) and increase those tariffs if the EC does not provide adequate compensation by July 1.

On the bilateral/multilateral front, we have:

Welcomed Canada's initiative for a possible bilateral free trade arrangement and have begun discussions on Canadian softwood lumber imports.

Secured agreement of our GATT trading partners to establish a preparatory committee for a new round of multilateral trade negotiations. We expect the round to be launched at a meeting of trade ministers scheduled for September 1986.

Undertook Market-Oriented Sector-Specific (MOSS) discussions with the Japanese in four areas: telecommunications, medical equipment and pharmaceuticals, electronics, and forest products. Major problems related to implementation of Japan's new telecommunications laws as well as the radio wave law have been resolved. In the medical equipment and pharmaceuticals area, agreement has been reached in most of the contentious areas including acceptance of foreign clinical test data, faster approval procedures and transparency in the insurance reimbursement system. Key achievements in the electronics sector are chip protection legislation, software copyrights and computer parts duty elimination. In addition, an agreement has been reached on wood product tariff cuts as well as on a significant reduction in paper duties.

Initiated Market-Access Fact-Finding (MAFF) talks on telecommunications trade barriers in Europe. The first market access discussions were initiated with Germany last December. The discussions allowed us to gain useful information on procurement practices, standards and regulations governing enhanced services. We will now assess the detailed, technical information which was provided and evaluate the "openness" of the German telecommunications market to U.S. suppliers. We held similar talks with the Italian Government in April and expect to begin consultations with other European countries in the near future.

Signed an agreement with Japan on the elimination of tariffs on computer equipment and parts and with Canada on the elimination of tariffs on computer parts and semiconductors.

We are continuing vigorous enforcement of AD/CVD laws. We have 47 investigations ongoing and there has been over a 200 percent increase in AD/CVD cases processed from 1980 (50) to 1985 (133).

Most significant AD/CVD cases since September 1985.

Completed cases with affirmative findings of dumping or government subsidization:

Japan/cellular mobile telephones on October 24, 1985;

Brazil/fuel ethanol on January 21, 1986 (n.b. the International Trade Commission found "no injury" so case was terminated);

Saudi Arabia/carbon steel wire rod on January 27, 1986;

Canada/groundfish on March 14, 1986;

Korea/Offshore platform jackets and piles on March 31, 1986;

Japan/Offshore platform jackets and piles on March 31, 1986;

Japan/64K semiconductors on April 23, 1986;

Pending cases of dumping or government subsidization:

Japan/EPROM semiconductors due July 30, 1986.

Japan/256K semiconductors due August 1, 1986.

We have also moved forcefully to deal with unfairly subsidized competition in our export markets:

Countered foreign subsidized agricultural exports by concluding sales under the Export Enhancement Program valued at over $465 million.

Countered foreign subsidized export financing. Pending Congressional acceptance of the President's War Chest proposal, the Export-Import Bank has offered grants to help American companies win sales worth about $328 million in eleven pending overseas contracts. By aggressively using mixed credits, we hope to persuade our trading competitors, particularly France, Italy and Belgium, to support negotiations to eliminate predatory financing practices. In March 1986, to counter a Brazilian bid using non-competitive financing in the U.S. market, Eximbank took the unprecedented step of extending concessionary financing to a U.S. company for a sale in the U.S.

OFFICE OF THE U.S. TRADE REPRESENTATIVE, EXECUTIVE OFFICE OF THE PRESIDENT,

Washington, May 14, 1986.

DEAR CONGRESSMAN: We are writing to convey our deep reservations about H.R. 4800, the House Omnibus Trade bill. If enacted into law, this legislation would severely damage our economy, reduce our international competitiveness, destroy American jobs and embroil us in trade conflicts with virtually all our significant trading partners.

The United States is the greatest trading nation in the world. We export well over $200 billion a year, and more than five million American jobs are dependent upon exports. We have more at stake in maintaining a healthy world trade system than any other country, yet this bill would create chaos in that system.

H.R. 4800 is not a "fair trade" bill; it is a "less trade" bill. It is not tough; it is defensive and defeatist. It is being represented as strengthening the trade laws, but it is really just protectionism in disguise. It flagrantly violates international agreements, thereby exposing American exporters to retaliation.

The big losers under H.R. 4800 would be the workers of many of our most dynamic industries who would find overseas markets closed to them, and consumers who would pay higher prices on thousands of products. The U.S. almost assuredly would lose jobs in the aircraft, business machines, paper, chemicals, agricultural and other machinery, and food processing industries. Farmers who produce soybeans, wheat, corn, and tobacco would lost export sales. Why should we jeopardize the livelihood of the five million Americans whose jobs depend on exports?

We are dealing effectively with the basic causes of our trade deficit. Substantial exchange rate changes have occurred, improving the U.S. competitive position. The LDC debt problem is being addressed, providing expanded markets for U.S. exports. Arrangements for closer economic policy coordination are in place, fostering improved global growth and greater exchange rate stability.

Breaking down trade barriers in other countries can also contribute to reducing our trade deficit. The President's Trade Policy Action Plan of last September is aggressively being implemented, making full use of existing trade laws. The President has self-initiated a number of unfair trade cases that will open markets, not close them.

Besides being objectionable on trade policy grounds, H.R. 4800 could add significantly to the budget deficit. Preliminary analysis indicates that enactment of this bill would result in increased outlays of $6.5 billion over the 1987–89 period. The costly new grant programs in the Departments of Education and Labor would uselessly duplicate programs already authorized and financed in four agencies, and increase federal interference in areas of state responsibility.

In sum, H.R. 4800 would weaken the ability of American firms to compete in the world marketplace, disrupt efforts to stabilize exchange rates, risk national security by weakening export controls, expose American exporters to retaliation by other countries, and weaken the President's ability to eliminate unfair trading practices abroad. If H.R. 4800 passes in anything like its present form, we will without hesitation recommend that President Reagan veto it.

Sincerely,

George P. Shultz, Secretary of State; Caspar W. Weinberger, Secretary of Defense; Malcolm Baldrige, Secretary of Commerce; William Bennett, Secretary of Education; James A. Baker III, Secretary of the Treasury; Richard E. Lyng, Secretary of Agriculture; Bill Brock, Secretary of Labor; James C. Miller, Director, Office of Management and Budget; Clayton Yuetter, U.S. Trade Representative.

Mr. BONKER. Mr. Chairman, may I inquire of the Chair as to how much time I have remaining?

The CHAIRMAN. The gentleman from Washington has 2 minutes remaining.

Mr. BONKER. Mr. Chairman, I would like to take this opportunity to recognize the efforts by members of the committee, the gentleman from California [Mr. BERMAN], who just spoke; and the gentleman from Florida [Mr. MICA]; along with the gentleman from Colorado [Mr. WIRTH] of the Energy and Commerce Committee; and the chairman of that committee, the gentleman from Michigan [Mr. DINGELL], for their cooperative efforts and rather intense last-minute negotiations to work out a very technical and legal wording that has now resulted in title VII in H.R. 4800.

This has always been one of the more critical trade-related issues, and it is also a very difficult one on which to find a consensus.

The gentleman from Florida [Mr. MICA] has been a long-time supporter of reform of the Foreign Corrupt Practices Act. The gentleman from Colorado [Mr. WIRTH] and others have had differing approaches to rewriting this basic law. So I would like the RECORD to note their considerable effort to reach a consensus so that we can place this important title in H.R. 4800.

Mr. Chairman, I have no further requests for time and I yield back the balance of my time.

The CHAIRMAN. All time for general debate under control of the Committee on Foreign Affairs having expired, the general debate shall now continue with 30 minutes equally divided and controlled by the chairman and ranking minority member of the Committee on Banking, Finance and Urban Affairs.

The gentleman from Rhode Island [Mr. ST GERMAIN] will be recognized for 15 minutes and the gentleman from Ohio [Mr. WYLIE] will be recognized for 15 minutes.

The Chair recognizes the gentleman from Rhode Island [Mr. ST GERMAIN].

Mr. ST GERMAIN. Mr. Chairman, I yield myself 4 minutes.

Mr. Chairman, our burgeoning trade deficit must be brought under control. In every one of our districts, employment, and company profits are lower than they should be. If we could restore some balance in our trade relations with other countries, the economic well-being of our entire Nation could be improved. The recent adjustments in international exchange rates will help, but as we all know, they will not be enough. The legislative actions in H.R. 4800, the Trade and International Economic Policy Reform Act of 1986, are critically needed to complete the picture.

I commend our Speaker, Mr. O'NEILL, our majority leader, Mr. WRIGHT, and the other Members of the leadership of this House for the wisdom, energy, and courage they have evidenced in bringing this bill before us. H.R. 4800 is tough legislation, and it is critically needed. I am proud to say that I can support H.R. 4800 in its present form without equivocation or hesitancy. As debate on this measure proceeds, I will be expending all the resources at my disposal to assure its ultimate passage.

With regard to the Banking Committee provisions comprising title IV, it is my understanding that Mr. BONKER of Washington intends to offer an amendment to the Bank Holding Company Act that would fundamentally alter the basis on which banks could offer export services to U.S. exporters. His amendment would not enhance U.S. export efforts and could indeed hamper them. His amendment runs counter to our intent when we passed the Bank Export Services Act in 1982, and I will be constrained to oppose the gentlemen's amendment when it is offered.

Mr. BARNARD of Georgia, a distinguished member of both the Banking and Government Operations Committees, has brought to my attention concerns similar to those expressed by Mr. BONKER, and has affirmed the need for regular order, for which I am appreciative. Regardless of how Mr. BONKER's amendment is dealt with, I believe it would be beneficial to all concerned if some discussions involving Mr. BONKER, Mr. BARNARD, the Federal Reserve, and the Department of Commerce, could take place. I would be pleased to assist in arranging such discussions.

□ 1530

Mr. WYLIE. Mr. Chairman, I yield myself 4 minutes.

Mr. Chairman, I rise in opposition to H.R. 4800, the omnibus trade bill.

I will confine my remarks to the four different bills reported by the Banking Committee and included as various subtitles under title IV.

Subtitle C, the Competitive Tied Aid Fund Act, enjoys broad bipartisan support. It is included in both H.R. 4800 and my substitute.

I wish I could be as supportive of the remaining subtitles of title IV of H.R. 4800, but I cannot. These subtitles, the other subtitles, are strongly opposed by the administration, and with good reason.

Subtitle D, the Council on Industrial Competitiveness, jumps out as being objectionable. At a time when all of us should be concerned with Federal budget deficits, I do not think Congress should be proposing to create a new permanent bureaucracy here in Washington.

The gist of this new agency, I gather, is to have the Government pick the economic winners and losers in our society, a Herculean task. I would rather not entrust to any Government official, elected or appointed.

This new bureaucracy under subtitle D would be funded to the tune of $25 million in fiscal year 1987 and for a total of $139 million over the next 5 years, according to CBO.

Think about this proposal for a minute; $25 million for a new bureaucracy.

Let me read just one provision of this subtitle so that Members will get a flavor for the kind of tar pit in which we may be sinking. Section 464 of subtitle D empowers this new untested bureaucracy "to assess (all) private sector requests for Government assistance or relief" of any kind and to make recommendations "as to a condition of such assistance or relief."

The only condition is that the applicant become internationally competitive in the future.

This strikes me as a sweeping grant of authority, almost unprecedented in nature. For example, we all want our farmers to be competitive internationally. So I presume all individual requests for agricultural loans by farmers across this country would have to go before this new bureaucracy.

This may not be the intent of the legislation's authors, but there are no guidelines, no exemptions, no restrictions in the bill. As a result, I think subtitle D is tragically flawed.

Subtitle B, the International Debt, Trade and Financial Stabilization Act of 1986, is also seriously flawed. The major thrust of this proposal is to increase substantially the size and the speed of financial flows to debtor countries. Neither the administration nor the World Bank itself is requesting these kinds of changes. Moreover, section 424 requires the President of the United States to encourage other member countries of the World Bank to create a new "bank entity" within the World Bank to lend up to $5 billion.

No restrictions or guidelines regarding exactly how these new funds are to be used are included in the legislation.

The World Bank has ample capacity to increase its lending authority by roughly $2 billion per year over the next 3 years. Perhaps the most unfortunate aspect of this subtitle is that it would undercut the administration's debt initiative of last year, which has received broad international support, precisely at a time when debtor countries like Argentina and Brazil are in the process of making the tough decision to put their own economic houses in order.

Subtitle A of title IV, the so-called Competitive Exchange Rate Act of 1986, is also inappropriate. At best, the creation in section 404 of a new strategic currency reserve within existing stabilizing fund is redundant; at worst, it could be potentially costly if used universely to speculate in foreign exchange markets.

Mr. Chairman, may I encourage my colleagues to support the substitute which I will offer.

Mr. ST GERMAIN. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from North Carolina [Mr. NEAL], chairman of the Subcommittee on International Finance, Trade and Monetary Policy.

Mr. NEAL. Mr. Chairman, this omnibus trade bill incorporates two bills that came out of the Subcommittee on International Finance, which I chair. The first authorizes a so-called war chest for combating unfairly subsidized export credits granted by our competitors. The second establishes improvements in our policy on exchange rates.

The war chest addresses the problem of tied aid credits, or, as they are more generally known, mixed credits. Mixed credits are export credits that are subsidized far beyond the modest degree of subsidy contained in conventional official export finance. They represent a blending of conventional finance and outright aid—hence the term "mixed credits."

Due to a loophole in the international agreement governing official export credits, these mixed credits are perfectly legal—but also perfectly pernicious, when used to steal export markets from American exporters.

No one objects to a country granting foreign aid, and tying that aid to the purchase of its own exports. When used as genuine foreign aid, mixed credits pose no problem. But several countries have abused mixed credits by extending them to capture normal, commercial export contracts, in cases that could not reasonably be construed as legitimate foreign aid. When that happens, our exporters suffer a severe competitive disadvantage—unless they can also offer this form of highly subsidized mixed credit financing.

Though we could protect our exporters by offering equivalent mixed credits whenever they must compete with a foreign mixed credits offer, that would become prohibitively expensive. Instead we have been trying to convince other countries to abandon their abuses of this unfair trade practice. Negotiations to impose discipline on the use of mixed credits have made considerable progress—but some countries still resist the degree of discipline we deem necessary.

This war chest will be targeted against those recalcitrant countries. Grants from the war chest, which will be under the sole discretionary control of the Secretary of the Treasury, will be targeted at the export markets of countries that balk at reaching a satisfactory agreement to end the abuse of mixed credits. These grants, when blended with conventional export finance, will constitute a highly attractive, highly subsidized package of mixed credits, designed to inflict direct pain and punishment on foreign exporters, until their governments see the wisdom of ending this pernicious practice.

In our hearings on this legislation the Treasury Department made it clear that France was the primary culprit, and the main target of this war chest. Since then, another round of negotiations on mixed credits indicated some willingness by France to make progress on this issue. New problems with Japan have, however, emerged. At present, a primary target for the war chest could well be Japan, as much or more than France. It would be the responsibility of the Secretary of the Treasury, the official in charge of U.S. policy in these ongoing negotiations, to determine how the war chest should be used to attain maximum negotiating advantage.

The exchange rate provisions of this trade bill also came out of my subcommittee. Their primary purpose is to make the Secretary of the Treasury responsible and accountable to the Congress for administration policies that affect exchange rates. He would be forced, through semiannual reports and appearances before the Congress, to explain his exchange rate policies, and to explain how other economic policies of the administration affect the exchange rate.

I have long argued that the exchange rate itself has not been the problem—but that it has been an important indicator of serious problems in our macroeconomic policies, in particular our fiscal deficits. The reporting requirements of this bill, including the public release and discussion of heretofore confidential IMF reports on our economy, should serve to focus attention on, and establish accountability for, the macroeconomic policies that really matter in achieving a competitive exchange rate.

These two legislative initiatives should help our country become much more competitive in world trade and reduce the horrendous trade and current account deficits which are weakening our country.

Mr. WYLIE. Mr. Chairman, I yield 3 minutes to the gentleman from Iowa [Mr. LEACH].

Mr. LEACH of Iowa. I thank the gentleman for yielding me this time.

Mr. Chairman, few bills are more tempting to vote for than this one. Many of its premises—the staggering trade imbalances and the weak trade negotiating stance of the United States—are valid.

Yet when all is said and done, this bill must be considered a landmark for

its partisanship and its lack of responsibility.

H.R. 4800 attempts to deal with the trade deficit by restricting imports and curbing economic growth.

While not as extensive or damaging as the Smoot-Hawley approach of the 1930's, H.R. 4800 nonetheless raises the prospect of sparking trade wars and reducing world commerce. By retarding trade, world economic growth will be curtailed and the average living standard of the average citizen—at home and abroad—will be cut back. The "Fortress America" trade policy implied in this bill will, for instance, produce a double-whammy for the Amercian farmer: Costs of production will go up and foreign sales will go down. Likewise, the American consumer will be ripped off by politicians who prefer to reach for excuses rather than work for answers.

Some of us in this body have been concerned that the administration has been too unilateral in its political and military policies abroad. Ironically, the alternative political party in this country has produced a protectionist bill that sets a standard of unilateralism in trade policy with repercussions that go well beyond the trade arena. Protectionist trade policies of this nature are not only economically foolish; they are politically dangerous. They sow the seeds of social instability and conflict around the world. They make the world more unstable at a time when responsibility is most in demand.

History illustrates how Japan in the first half of this century expanded militarily in direct relation to its tariff isolation. History teaches that a lack of economic growth in developing countries produces social turmoil and breeds radicalism. History teaches that the cost of responding to protectionist economic policies can be towering—in terms of wars fought, famines instituted and weapons purchased.

A far preferable approach is to acknowledge the trade dilemma with which the United States is confronted and to recognize what Congress can constructively do about it. The more appropriate challenge is to seek to reduce the trade deficit by expanding exports rather than restricting imports. Economic growth is preferable to industrial stagnation; entrepreneurial answers are preferable to political groping.

Congress after all, is institutionally responsible for the greatest fiscal mistake of the century—a peacetime deficit of unprecedented dimensions. It is fiscal irresponsibility, not so-called trade legislation, which is chiefly responsible for the overvaluation of the dollar and the highest real interest rates in this century. Righting the imbalances and the unfairness implicit in the budget deficit is the single most important and effective thing that Congress can do to protect domestic industry. The trade deficit will be more likely to shrink in relation to reductions in the budget deficit than in relation to protectionist steps of the nature contemplated in this bill.

Trade protectionism is an irresponsible copout. It is an ostrich-like response to the real problems of our day. While not as extreme as many might advocate, H.R. 4800 nonetheless should be defeated so Congress can devote its priorities to the proper task—righting its own economic mistakes.

Mr. ST GERMAIN. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from New York [Mr. LAFALCE], the chairman of the Subcommittee on Economic Stabilization.

Mr. LAFALCE. Mr. Chairman, America's increasing inability to compete in world markets is one of the most serious challenges facing the United States. This legislation will ensure that we can meet that challenge.

Our economic environment has fundamentally changed. The United States is now part of an increasingly integrated international economy. Today 70 percent of U.S. goods must compete with foreign products in domestic and foreign markets.

The fundamental measure of our economic condition in such an integrated world economy is our trade picture, and that picture is grim. In 1983, the Banking Subcommittee on Economic Stabilization, which I chair, began a lengthy series of hearings on the competitive problems confronting U.S. industry. Our merchandise trade deficit the previous year had been $42.7 billion. It mounted to $69.4 billion in 1983. During the course of our hearings, one fact became disturbingly clear: Both mature and emerging U.S. industries were increasingly unable to compete in the newly competitive global marketplace. Anyone with eyes to see had to realize that our trade position could only deteriorate further, and our worst fears have now been realized. In 1984, the trade deficit nearly doubled to $123.3 billion. It continues to mount, hitting almost $150 billion last year. The result has been a decimation of U.S. industry and U.S. jobs.

This country simply cannot sustain trade deficits of this magnitude. The United States has become a net debtor for the first time since we emerged as a major world power in 1914, and there is no prospect that will change.

To date, this country has done little to adjust to our new competitive environment. What we will do in the future is the critical issue now before us. We have three options. The first is to continue to follow the laissez-faire policies of this administration. We can see all too clearly where those policies have led us—they have helped to create the disastrous situation we now confront.

In my view, our country simply cannot afford to follow this path any longer. Yet, we continue to cavalierly disregard the competitive impact of the policy choices we make. At a time when our foreign competitors are moving aggressively to solidify their positions in the world trading system, our own declining competitiveness remains unaddressed by any comprehensive or integrated strategy. The magic of the marketplace is rapidly relegating this country to the position of a second-rate economic power.

Our second option is to rely on protectionist measures to insulate beleaguered industries from market pressures. This defensive posture has in fact become our most obvious targeted policy response. We must reject this approach. It is ostrichlike, debilitating, and ultimately self-defeating. Protectionism merely evades the competitive challenge we face. And we cannot evade that challenge forever.

We must face the fact that the economic dominance that produced the prosperity of the 1950's and 1960's for our country is gone, and it will not be returning. We have to build our future prosperity in a world where many talented nations compete effectively. The old habits and old policies will not suffice for our new situation. To be successful, domestic economic policies—including specific policies for revitalizing U.S. industry—must be developed and implemented with close attention to their competitive impact.

Our third option, then, is to develop an alternative to protectionism—a positive strategy that will actively enhance U.S. competitiveness and create an environment in which U.S. industry can fairly compete. The bill before us chooses that path. It seeks to have Government play its proper role of creating an environment at both the national and international levels in which American businesses and workers can fairly compete. In particular, two provisions of the Banking title—both of which I authored—the creation of a Council on Industrial Competitiveness and the Competitive Exchange Rate Act—make U.S. competitiveness a central concern in the policymaking process. These provisions would focus both our macroeconomic and microeconomic policies more effectively on enhancing U.S. competitiveness.

This bill deals comprehensively with a multitude of trade policy problems that are affecting our competitive position: the need to control unfair trade practices; the need for new multilateral trade negotiations encompassing issues too long ignored; the need to open foreign markets and break down barriers to U.S. exports; and the need to close loopholes in our tariff and customs laws. These are important

areas of reform and it is long past time we dealt with them.

But, this bill also recognizes that changes in negotiating strategy and unilateral changes in our trade laws alone will not miraculously turn our trade deficit around. Other factors eat away at our competitive strength: a long-term decline in relative productivity growth; insufficient capital investment in the revitalization of basic industries and in the commercialization and diffusion of new technologies; a lack of adequate patient capital to invest in smaller, innovative firms; a series of systemic inefficiencies in the management and organization of business, including adversarial labor-management relations and short-term time horizons; and a serious erosion in the institutional support for production, including a lack of high quality domestic and international economic data and the analytical capability to make use of it. The high dollar has undermined the competitive position of our industries and wild fluctuations in currency markets have made it impossible for American business to plan. The debilitating debt crisis faced by developing countries has closed critical export markets for American products.

We must make improving U.S. competitiveness an explicit goal in our policymaking process and target our economic policies more directly at improving this Nation's competitive performance. The Banking title of this bill establishes policies and creates mechanism that will focus our economic policymaking more sharply on competitiveness issues.

The bill would create a 16-member Council on Industrial Competitiveness, an independent entity with membership drawn equally from business, labor, Government, and academia or public interst groups. This Council would serve as a much-needed instrument for focusing Government policy more explicitly on improved competitiveness and productivity. The Council would provide a mechanism through which key economic factors could work cooperatively to develop a long-term competitiveness strategy for our economy and for specific industries and sectors, and create a consensus in support of that strategy. In addition, it would introduce the important concept of conditionality into our policymaking process. The Council would, where appropriate, assess private sector requests for Government assistance or relief, and recommend conditions designed to ensure that such relief would actually improve the international competitiveness of the industry concerned.

A remarkable consensus has emerged as to the need for such a fundamentally different policy approach. The President's own temporary Commission on Industrial Competitiveness has argued, and I quote, "Mechanisms should be developed for building consensus among key sectors of society to better respond to our competitive challenges." The Council would be precisely such a mechanism.

A critical provision of the Ways and Means title of the bill underscores this new emphasis on improving the competitive performance of American industry. That provision introduces a far more effective industry adjustment process than currently exist under section 201, which provides for industries injured by imports. We have for too long provided trade relief to industries with no assurance that the relief granted would actually improve the industry's competitiveness. This bill would help us establish the critical link between temporary trade relief and a long-term improvement in competitive performance.

A second Banking Committee initiative is equally critical to solving our trade problems. For years, the administration touted the high dollar as a symbol of our economic leadership and belittled the problems it caused for U.S. industries in world markets, while totally disregarding the impact of wide currency fluctuations on U.S. businesses. The Competitive Exchange Rate Act would highlight the importance of exchange rate issues. The exchange rate of the dollar is not treated merely as an inadvertent byproduct of other policies. This legislation would make achievement of a competitive and sustainable exchange rate for the dollar a distinct policy goal in its own right.

Under the Competitive Exchange Rate Act, the Secretary of the Treasury is made accountable for developing a strategy to move the dollar to a competitive level and minimize the destabilizing fluctuations in exchange rates that have become all too characteristic over the last several years. The intent of this proposal is to significantly increase the accountability of the President for the impact of exchange rates on trade competitiveness. This administration continues to pretend that its own domestic economic policy choices have no impact on exchange rates and the competitive position of our traded-goods sector. This legislation would bring these issues together and highlight their clear interrelationship. While the administration's recent efforts deserve our support, a broader and more authoritative initiative such as this is required.

My Republican colleagues would have us do nothing at all about these important problems. We cannot continue to ignore our own competitive problems and the impact of important policy decisions on the competitiveness of American industry, as the proposed Wylie amendment would have us do. We have already taken that approach for far too long.

Our trade deficit is enormous, but its impact not immediately visible, and many question if we truly need to act. There may never be a day when a clear crisis arrives. It does not work that way. Great Britain did not awake one day to discover that its competitiveness and its standard of living were declining. Rather, it was a gradual deterioration over many years, eventually resulting in second-rate economic status for the nation. Some of that deterioration has taken place here already; it will continue to take place unless we dedicate ourselves to reversing it. But we have great assets as a nation, and with a concerted effort, we can ensure a bright economic future for our country and our people.

President Reagan may try to take some comfort from our disturbingly weak recovery and low inflation. But these positive signs cannot dissipate the cloud that our deteriorating trade position casts over our economic future. If our country is fortunate enough to be in a period where some of the economic news is relatively good, we should be wise enough to make this a period of opportunity, not complacency. It is a period of time for recognizing the scope of the competitive challenge and for building consensus behind policies that will allow us to secure our competitive future.

□ 1545

Mr. WILEY. Mr. Chairman, I yield 3 minutes to the gentleman from New York [Mr. WORTLEY].

Mr. WORTLEY. I thank the gentleman for yielding me this time.

Mr. Chairman, title IV of the bill before us is entirely composed of provisions that were originated and approved by the House Banking Committee which I have the honor and privilege to serve on. However, I was disappointed with the committee's proposals, and I urge my colleagues to support the substitute being offered by the gentleman from Ohio, the ranking minority member of the Banking Committee.

Mr. Chairman, I don't believe problems are solved by setting up new bureaucracies and to increase Government spending, yet this is precisely what a provision in title IV would do. Twenty-five million dollars of taxpayers money would be requisitioned for the establishment of a so-called Council on Industrial Competitiveness. It is unclear what the Council would be responsible for doing that isn't already being accomplished through the Department of Commerce, the U.S. Trade Representative, the International Trade Commission, or the private sector itself.

But besides being a duplicative data clearinghouse, the Council is also bestowed with the power to report industrial development priorities and recommend national industrial strategy. This is the discredited and, I had

hoped, defunct idea of centralized industrial planning which clearly would turn the free market on its head. When business decisions become political decisions the result is inefficiency, loss of competition, and extreme distortions in supply and demand.

Furthermore, the Council is also authorized to review all private sector requests for Government assistance and to make recommendations regarding who is most deserving. We should not put the Federal Government in the business of picking the Nation's economic winners and losers—that power properly rests with the consumer.

Mr. Chairman, another provision of title IV is disturbing to me and that is the encouragement of the creation of a nebulous World Bank affiliate that would be authorized to make billions of dollars of high-risk loans to lesser developed countries. These loans would be considered high-risk because they would not be required to be backed by the same amount of reserves as typical World Bank loans. Besides not establishing any requirements for basic economic reforms in the lesser developed countries in return for these new loans, this provision contradicts the administration's efforts to increase commercial bank financing of lesser developed countries.

I also cannot support the provision that calls for immediate full disbursement of loans to World Bank clients. While I recognize and am sympathetic to the liquidity bind of some less developed countries, such action on a widespread scale would undermine the leverage used to ensure that projects are carried out and completed in the manner agreed to. In addition, immediate disbursement of committed project loans would not be cost-free since World Bank clients would be charged interest upon receipt of the loan, which would simply add to the interest burden of the borrower.

Mr. Chairman, the substitute does contain the one truly bipartisan provision, which I hope will be enacted—the creation of a temporary Department of Treasury war chest to combat the unfair trade practices commonly employed by other countries. Treasury could target the export markets of countries that routinely exploit or abuse tiedaid credits for commercial purposes. Hopefully, this war chest would induce other countries to pursue negotiations on a comprehensive arrangement to prohibit the use of tiedaid credits by any country. But while waiting for a negotiated settlement, we cannot afford to roll over and play dead—in this case, it takes fire to fight fire.

Mr. Chairman, I will conclude my remarks with some general observations about the trade legislation before us. We desperately need reforms in our trade law so that our Government has the tools, and the incentive, it needs to enforce fair trade in order that we can have free trade. However, it is not possible for me to support the omnibus trade bill as crafted by the House majority unless drastic modifications are made. I will support the minority substitute, which is truly aimed at opening markets worldwide and not closing off our own. Whatever short-term gains might be gained by closing down our markets would certainly be lost as prices and inflation increased and retaliation from other countries threatened our export industries and farmers.

Particularly objectionable provisions in the majority trade bill include: Requiring mandatory and inflexible reductions in the amount of goods a foreign country may sell in the United States; requiring the President to unilaterally violate GATT under certain conditions; making the denial of ambiguous "workers rights" by foreign countries a trade violation leaving the United States vulnerable to similar legislation by foreign countries which would dictate their own standards for the United States to meet; reducing the President's capability to conduct a cohesive foreign policy; loosening of major export-control procedures adopted less than a year ago by Congress to protect national security interests especially in the area of military-related technology; establishing drastic exchange-rate reform despite the administration's recent success in devaluing the dollar through negotiations.

Mr. Chairman, I will vote for trade reform this week, but I cannot support the current majority package, which promises catastrophic foreign policy and economic results. To an extent, the administration has been inexcusably reluctant to enforce the fair trade laws that are already on the books. I criticize this lax enforcement now as I have in the past. But resorting to this defeatist, protectionist, and extremely partisan legislation is not in the best interests of this country and I will not be responsible for reaping the consequences of such an irresponsible approach.

Mr. ST GERMAIN. Mr. Chairman, I yield 3 minutes to the gentleman from New York [Mr. LUNDINE].

Mr. LUNDINE. I thank the gentleman for yielding me this time.

Mr. Chairman, since 1980, our trade deficit has escalated dramatically from $36 billion in 1980 to $150 billion in 1985, a fourfold increase. We are in the midst of a trade crisis. The future stability of the international trade and financial system depends on how we handle this crisis. The bill before us today will help reduce the disastrous U.S. trade deficit, at the same time as it promotes the expansion of the international trading system.

The present situation is unsustainable. We do not have the capacity to purchase indefinitely $150 billion more in imports than we export. Right now, our enormous budget and trade deficits are being financed by foreign borrowings. Last year, the United States became a net debtor nation for the first time since 1914. We have surpassed Brazil as the world's largest debtor nation. If we do not reverse this situation, like developing countries, we will soon have to start running large trade surpluses just to pay our foreign debts. At this point, it will be impossible to both service our foreign debt and secure economic growth.

This bill is about jobs—about keeping and creating high quality jobs for Americans. Two million Americans were displaced from their jobs last year because of our trade deficit. We have regained only 60 percent of the manufacturing jobs lost since the 1982 recession. Our manufacturing trade deficit has gone from a $7 billion surplus in 1980 to a $113 billion deficit last year. Without a strong industrial base, we cannot maintain our status as the world economic leader or assure high quality jobs for our people in the future.

This bill is not a protectionist bill. It is rather a bill which places the primary emphasis on expanding U.S. exports and the volume of world trade. It emphasizes industry adjustment and worker education and training in response to an increasingly competitive world economy. In addition, this bill will help improve the competitiveness of U.S. industries so that we can compete more effectively against foreign imports.

This legislation will improve the economic climate in which we must compete. It will put us on a path toward stable and competitive exchange rates for our dollar. This will help ensure that our exports can compete on a fair playing field and that our businesses will be able to compete effectively by investing here in America instead of abroad. It will directly counter the unfair export financing practices of our competitors to ensure that U.S. firms do not lose export markets simply because of subsidized export financing.

The second way this bill will help reduce the U.S. trade deficit is by opening up markets abroad to expand U.S. export opportunities, American enterprises have found themselves locked out of too many markets in both industrialized and developing countries. It will rekindle growth in many developing nations of the world where our largest and most lucrative export markets of the future exist. The Gephardt amendment included in the Ways and Means portion of this bill will ensure that foreign countries open their markets to U.S. products or suffer the consequences of retaliatory action by the United States.

I hope we do not have to retaliate against our trading partners to secure access to their markets. But let's face it—we've done a lot of talking with countries like Japan, but are getting nowhere. Whether it be in semiconductors, telecommunications, or fiber optics, they are not opening their markets to U.S. competition.

As a member of the House Banking Committeee, I have worked hard to fashion legislation to help address our trade deficit because I believe it is a national priority. I sponsored and advocated the exchange rate and debt subtitles of title IV of the bill. Over the years I have worked hard to devise an effective industrial strategy and response to the menacing problem of mixed credits.

It has been a particularly difficult, but instructive road on the competitiveness issue since my colleagues DAVE BONIOR, LEE HAMILTON, and I introduced the first proposal for such a council in April 1982. When we first introduced this legislation, we were in recession and the argument was made that the competitiveness problem would go away as economic growth resumed. This has not happened. The United States still lags behind our foreign trading partners in productivity growth. During the last decade, we have lost world market shares in 7 of 10 high-technology sectors. For the first time in our history, real wages in the United States are falling. Unfortunately, our competitiveness problem endures.

Taken together, the provisions of title IV reported from the Banking Committee will make a significant contribution to reducing our present trade deficit and keeping us competitive in the future. Later in this debate, I will strongly urge my colleagues to oppose the Wylie substitute to the Banking Committee title of this bill. While I will detail my reasons when the substitute is considered, let me just indicate at the outset of this debate that I believe this substitute represents an unsatisfactory approach to dealing with the problems of our volatile exchange rate system, to the massive and counterproductive debt overhanging developing countries, and to promoting the future competitiveness of U.S. industry. The Wylie substitute basically contends that all is well in these areas and that congressional action and direction is not necessary.

You will be asked by Mr. WYLIE to put your trust in an administration which brought you 4 years of an extremely overvalued dollar and under which the developing country debt crisis was ignored while it took its toll on our trade deficit. You will be asked to put your faith in an administration that claims the United States does not have a competitiveness problem, in spite of the contrary findings of their own group set up to study the competitiveness issue.

H.R. 4800 is good for America. It deserves your support. Its provisions have met the test of scrutiny by six separate committees in the House. This is not a protectionist bill, it is a progressive trade bill. It will help reduce our trade deficit and it will help improve the productivity and competitiveness of U.S. industry in the future. All of this means jobs and a rising standard of living for America.

Mr. WILEY. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania [Mr. RIDGE].

Mr. RIDGE. I thank the gentleman for yielding me this time.

Mr. Chairman, I ask my colleagues to assist our exporters and their employees and families with one of the most important questions relating to trade finance—mixed credits. Mixed credits are a combination of development assistance and traditional export financing. This practice is now used by many of the major trading countries to finance their exports. This practice, tolerated to date under the protective umbrella and rhetoric of free trade, has cost many Americans their jobs.

Title IV of H.R. 4800 is a good beginning, but only a beginning. According to the Treasury Department, the fund and the legislation would be used to target the mixed credit practices of France, Italy, and Belgium. My colleagues, the list of offending countries is much larger and the chief user and abuser is Japan. It is reported that our foreign competitors filed nearly 500 mixed credit offers from January 1984 through June 1985 with a total volume of $6.5 billion in 1985 alone. It should be noted that mixed credit use in 1979 was less than $1 billion.

The language in the bill fails to provide an effective counter to these practices. Our own program which must have a much higher degree of stability to respond to rapidly changing circumstances in the increased use both in number and amount by our foreign competitors. The amendment to be offered by Congressman BONKER provides that flexibility and gives both Treasury and the appropriate trade agencies an effective and workable tool to combat the use of mixed credits.

One final, and most important, observation. In the budget we passed last week, there is no money. I say again, no money to accommodate the $300 million required to fund this program. It is quite probable that should the existing language be adopted, the Appropriations Committee will likely fund the program from the direct lending program of Eximbank. There is a program and authorized funds designed to counter mixed credits to avoid a further reduction in the direct lending program of Eximbank.

If we seriously seek to pressure our export competitors by funding a separate mixed credits program without authorizing additional money, it is imperative the amendment offered by Congressman BONKER be adopted.

□ 1555

Mr. BARNARD. Mr. Chairman, may I inquire how much time remains?

The CHAIRMAN. The gentleman from Georgia [Mr. BARNARD] has 3 minutes remaining and the gentleman from Ohio [Mr. WYLIE] has 3 minutes remaining.

Mr. BARNARD. Mr. Chairman, I yield 1 minute to the gentleman from Alabama [Mr. ERDREICH].

Mr. ERDREICH. Mr. Chairman, the time has come for Congress to put a stop to piecemeal efforts to address a crisis that threatens the economic well-being of the working men and women of our Nation, our country's ineffective and outdated trade policies.

The escalation of the U.S. trade deficit over the past 5 years, to over $150 billion in 1985, and still growing, has meant job loss for millions of Americans, including thousands in Jefferson County. This trade deficit has caused an unprecedented crisis in international trade, one that threatens to have a profound impact on steel, textile, and other domestic industries and poses a serious threat to our industrial base and future economic activity.

I know for certain that the people of Jefferson County, AL, whom I represent, have an important stake in the development of strategies and trade policies that will promote a growing economy and full and fair participation by the United States in international trade. In the past, we have fought this ever-growing threat to our economic and job security with one hand tied behind our back. I'm sure I don't have to tell you, we have been losing the battle. It is imperative that we take decisive steps to update and modernize our trade laws to effectively address this trade imbalance.

The nations around the world daily take advantage of our open market; it is past time that we put fair trade into international trade relations.

Some would say, "do nothing." But that has been the major thrust of our policy these past 5 years, and the result has been an escalating trade deficit. What we need is a new government activism in export promotion and trade policy, what some call a strategy for industrial competitiveness.

That is what the Omnibus Trade Act seeks to do. It moves us toward a tough-minded trade strategy. This is business nationalism, and it is time we put America's economic interest first. Our jobs, our economic future depend on it.

The Omnibus Trade Act represents a substantial step toward untying our hands so that we can fight fire with fire. It strengthens our trade laws, puts more leverage in the hands of our trade negotiators. It is a step toward forcing a level playing field in international trade.

I am pleased to note that this act includes major portions of a bill that I introduced in the House several weeks ago to stop the counterfeiting of U.S. products by foreign countries. These provisions would protest U.S. patent rights by removing the requirement of U.S. firms to prove economic injury from the sale of pirated products, and places the burden instead on the pirater. It also increases the penalty for violation of cease and desist orders to $100,000 or the domestic value of the articles.

The continuing erosion of our economic and jobs base and continuing rise in our trade deficit demands that something be done and that it be done now. I urge my colleagues in the House to support this legislation for the sake of those in Jefferson County and across this Nation who are looking to us to make certain that the future of their livelihoods and the economic security of our Nation is assured.

Mr. WYLIE. Mr. Chairman, I yield myself my remaining time.

Mr. Chairman, I want to reiterate, to emphasize my own objection to the Council on Industrial Competitiveness. Not a single one of my constituents has petitioned me to create a new permanent bureaucracy or to be a party to what I regard as needless deficit spending. I would doubt seriously if any of my colleagues' constituents have made these kinds of requests, either.

I mentioned earlier that a request for agriculture loans by farmers across this country would have to go before this new bureaucracy, the way I read it. We all want our exporters to be competitive internationally, so all Export-Import Bank loans would have to be second guessed by this new bureaucracy. We want our auto and steel industries to be competitive, so I presume the implied subsidy of quantitative import restrictions for steel and vehicles would likewise have to clear whatever additional hurdles that this new bureaucracy might require. And what about the subsidies that the Federal Government has over the years lavished on our merchant marine? Will they too be subject to review by this proposed council?

Taken to the extreme, I am sure we all want our young students to be competitive with students around the world, but do we really want a new bureaucracy to review and assess each and every student loan application?

Mr. Chairman, this bill also proposes a new fund which I refer to as a new "World Bank bank." Section 424 requires the President of the United States to encourage other member countries of the World Bank to create a new bank entity within the World Bank to lend up to $5 billion.

Mr. Chairman, at the appropriate time I will offer an amendment as a complete substitute for title IV striking the objectionable provisions which I have just outlined. I will include in my substitute the so-called Competitive Tied-Aid Fund Act, which I think is a good provision. It will also include an endorsement of the administration's debt and dollar initiatives to promote economic stability and growth. It will also include directions to our executive directors at the multilateral development banks to encourage greater trade and investment liberalization and to ensure that loans do not go for products or commodities already in world surplus.

Mr. Chairman, I encourage my colleagues to support my substitute.

Mr. Chairman, I yield back the balance of my time.

Mr. BARNARD. Mr. Chairman, I yield myself the remainder of my time.

Mr. Chairman, the Banking Committee has labored long and hard to produce its portions of H.R 4800. It probably is not perfect, and we will labor on this floor to better it.

At this stage of debate, I have a particular concern—an additional subtitle E to title IV—the banking title. I understand it might be offered by Mr. BONKER, chairman of the Subcommittee on International Economic Policy and Trade of the Committee on Foreign Affairs. This amendment will substantially alter the Export Trading Company Act of 1982 as it governs the ownership and activities of export trading companies [ETC's] by bank holding companies.

I share his concerns that the Federal Reserve Board has not been as aggressive as it might be in allowing bank holding company involvement in export promotion through freer operations of ETC's. I commend him for strongly focusing attention on this area.

The Subcommittee on Commerce, Consumer, and Monetary Affairs of the Committee on Government Operations, which I chair and which oversees the Federal Reserve, has held hearings on this problem, at which the gentleman from Washington testified.

I have also had a longstanding familiarity with the ETC Act through my membership on the Banking Committee where I supported that act's passage as "a step in the right direction."

And, I have written Banking Chairman ST GERMAIN urging him to review the implementation of the act and, if necessary, draft remedial legislation.

Further, I am sure the Banking Committee, which is undoubtedly the committee of primary jurisdiction, would give due consideration to the position of the Committee on Foreign Affairs which reported out ETC Act amendments in H.R. 4708, its version of a trade bill.

Those amendments, however, were not included in the consolidated package before us, and they have not been reviewed by the Banking Committee.

Consequently, I must associate myself with today's remarks by Chairman ST GERMAIN that now is not the proper time and this is not the right vehicle for these substantial changes in the banking structure.

In this regard, I also believe more consultation is needed with the Federal Reserve. I admit that, to date, I have not been satisfied with its actions. Yet, my respect for Chairman Volcker, who does not favor these statutory changes, compels me to support a further attempt to address this situation through pressing for regulatory instead of statutory modifications.

Regulatory adjustment is perfectly feasible under current law in most respects. I feel certain Chairman Volcker would be friendly to meeting on this matter with any Members of Congress who wish to do so. I would hope that Secretary Baldrige would also participate.

I must say to the Committee of the Whole, that bank holding companies—which lie at the heart of our financial system—are in a period of unprecedented change. Most of you are aware of the huge consolidation movement which is hitting the banks so that credit can be pooled more efficiently. This is only the tip of the iceberg—rapid change is happening at almost every level of finance.

I am an ardent supporter of modernization of financial regulation—which means far more flexibility than current law permits.

Yet, the forum in which significant structural changes should be basically prepared is the Banking Committee.

It is hard for those of you who do not serve on it to imagine how difficult decisions are to make on financial structure.

When you alter our financial structure you are taking momentous steps:

That rarely can be undone and

That have elements of national danger, as well as opportunity.

These decisions must be finely tuned and paced in the context of the dynamic changes that are remolding the banking system, as a whole.

Further, while promotion of export trading companies joined with banking can be a valuable tool in bettering exports, the evidence does not suggest that adjustments are "must" items for today.

Consequently, despite the commendable concerns of the gentlemen from Washington about a single aspect of the banking system—bank export trad-

ing companies—I must vigorously oppose any effort to approach financial structure in just this one dimension in this bill.

With the promise I will assist in pushing on with review of these matters, I would urge him:

To defer an ETC Act amendment today;

To pursue the consultation course I have outlined above; and

To permit the Banking Committee to review his approach from the perspective of the overall financial structure of the Nation.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All time for general debate under the control of the Committee on Banking, Finance and Urban Affairs having expired, general debate shall now continue, 30 minutes to be equally divided and controlled by the chairman and the ranking minority member of the Committee on Education and Labor.

The gentleman from California [Mr. HAWKINS] will be recognized for 15 minutes and the gentleman from Vermont [Mr. JEFFORDS] will be recognized for 15 minutes.

The Chair recognizes the gentleman from California [Mr. HAWKINS].

Mr. HAWKINS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to thank the members of the Education and Labor Committee for their cooperation and assistance in drafting title V of this bill. I also commend the House leadership for recognizing that investments in education and in people are critically important if our Nation is to remain competitive in the world marketplace.

May I also commend the House leadership through this proposal in encouraging the minority to offer a new approach as well, thus recognizing on a bilateral basis the need to reform current trade policy.

There is no magic wand that we can wave over foreign markets to further open them up to American goods or to reduce our appetite for imported products. But we can—as we do in this bill—recognize the importance of a skilled work force, economic growth and a quality education in restoring competitiveness.

We cannot compete in the world marketplace if we have large numbers of our people unable to read, and we cannot create new jobs if we are unwilling to train our work force.

It is not Korea's fault that some 60 million young people and adults cannot read a daily newspaper or that 13 percent of high school graduates can't read above a sixth-grade level.

It is not Taiwan's fault that only 2 percent of college students study more than 2 years of a foreign language.

It is not Japan's fault that we produce less than half the number of engineers than they do with twice the population.

Experts estimate that the trade deficit has cost America millions of jobs over the past 5 years.

For every $1 billion in trade deficit, 25,000 jobs are either lost or not created. Those who have lost high paying jobs in the steel, auto, or computer industry most likely will never return to their previous lifestyles without retraining.

The bill also gives the Secretary of Labor the authority to reimburse employers for up to half of the cost of upgrading and retraining of their work force to be more competitive in international markets. This funding is dependent upon the establishment of a voluntary labor-management committee. Another key aspect of the bill is the establishment of computerized job bank systems in all States.

We have included title V in this trade bill because we feel that investing in people is equally as important as negotiating trade agreements. It is a fully competitive United States—with a well educated and well trained work force—that maximizes the chance for success in international negotiations.

This trade bill gives us the opportunity to begin now to establish innovative and dynamic programs for American workers and industry, teachers, and students; and fosters a new sense of cooperation between labor, business, and the education community.

Six committees and the House leadership have worked together to accomplish what the administration has so far refused to do—implement a coordinated, comprehensive Government policy to reduce the trade deficit and prepare our work force for the future. This is the kind of decisionmaking process that the Government should be using to deal with all of our economic problems.

If we cooperate now and continue to cooperate on other pressing matters, the future will indeed be bright and filled with thousands of new jobs and opportunities. Passage of this trade bill will help ensure this future of promise and prosperity.

Indeed, only 35 percent of the unemployed receive jobless benefits, but for those who have been out of work for 6 months or more only 13 percent get unemployment compensation.

Too many Americans are unemployed or woefully underemployed because of the trade crisis. Imported cars clog the highways around the Nation's Capital as autoworkers fill State unemployment offices.

Mr. Chairman, the education and training component of H.R. 4800 is the key difference between this and past trade legislation. This section establishes programs in the area of education and job training that are designed to improve the competitiveness of American workers for many years to come.

Title V of this legislation authorizes a series of programs designed to improve the competitiveness of the American worker. In education, we establish new grants to States for trade-related programs in reading, math, science, and foreign languages. Grants would also be provided to colleges and universities to purchase lab equipment and improve instruction in trade related curriculums.

Our educational systems must be committed to offering education of the highest quality and these systems must be adequately financed in order to ensure the strength of U.S. industries.

In the employment and training area, a new program is created within the Job Training and Partnership Act to retrain workers, including farmers, who have lost their jobs due to trade. If an unemployed worker is not receiving jobless benefits or trade adjustment assistance, a small stipend is provided during participation in the retraining program.

□ 1605

Finally, Mr. Chairman, I would like to cite from the administration's own report of the National Commission on Excellence in Education, entitled "A Nation at Risk." Quoting that report, it says:

> Our Nation is at risk. Our once unchallenged pre-eminence in commerce, industry, science, and technological innovation is being overtaken by competitors throughout the world.
>
> We report to the American people that while we can take justifiable pride in what our schools and colleges have historically accomplished and contributed to the United States and the well-being of its people, the educational foundations of our society are presently being eroded by a rising tide of mediocrity that threatens our very future as a Nation and a people. What was unimaginable a generation ago has begun to occur—others are matching and surpassing our educational attainments.
>
> If an unfriendly foreign power had attempted to impose on America the mediocre educational performance that exists today, we might well have viewed it as an act of war. As it stands, we have allowed this to happen to ourselves. We have been squandered the gains in student achievement made in the wake of the Sputnik challenge. Moreover, we have dismantled essential support systems which helped make those gains possible. We have, in effect, been committing an act of unthinking, unilateral educational disarmament.

Therefore, Mr. Chairman, I submit the title V of H.R. 4800 helps us to keep and improve on the thin edge we now hold in competition. Only by seizing this opportunity can we ensure our destiny and our future and our survival and our leadership.

Mr. JEFFORDS. Mr. Chairman, I yield 5 minutes to the gentleman from Wisconsin [Mr. GUNDERSON].

Mr. GUNDERSON. Mr. Chairman I regret very much that it appears, at least in some perspectives, that this whole debate has become a partisan debate, because I think if there is one issue that ought not to be divided by party lines, it is the issue of trade. I hope to try to be constructive in trying to move us away from partisan divisions toward a bipartisan consensus on legislation.

My guess is that some of the elements of the bill in front of us may be too bureaucratic, but on the other hand I will tell you that it would be absolutely essential that this Congress, if it is going to deal with trade in 1986, do something, not just talk about it. Unfortunately, many of our friends and allies around the world believe if you talk to the United States about trade, that in and of itself is all that is sufficient.

I would also call to the attention of a number of my Republican colleagues that if, upon close scrutiny, you read many of the provisions of the bill in front of us, much of the mandatory part is not really mandatory, if the President determines that such action is not in the best interest and reports so to Congress.

But I would like to focus on a couple of areas of this legislation which I think are most important and those are areas which have not been discussed by the Ways and Means Committee; rather, this section, title V, which deals with trade and also some of the elements which deal with agriculture. I would like to believe that our distinguished chairmen of these two committees have done an outstanding job in these two areas in response, because first and foremost when you are dealing with trade, you are dealing with competitiveness. If you are going to deal with competitiveness, you need to recognize that we do have certain obligations to try to train and retrain our citizenry to be capable to provide the kind of competitiveness in manufacturing and exports that we want.

Now, when you look at the education and labor component of the bill, I think there are some very important provisions that have been included that need to be called to the Members' attention.

For the first time, Mr. Chairman, we deal with not only the displaced industrial worker, but we deal with the displaced agricultural worker. We focus in this country I think too much on the problem with imports coming into this country and displacing workers. We never look at the declining exports and its impact on trade. That becomes very important in the area of agriculture.

Second, we focus on the whole issue of unfair labor practices abroad. You cannot look at the subhuman working conditions and wages paid to individuals in some countries and not count that at least as an indirect subsidy of that country in the international trade market.

Third, this section requires the Department of Labor to identify those areas of workers displaced due to import and export competition.

With the industrial workers, it has been rather common, but I would call my colleagues' attention that this also calls upon the Department of Labor to identify displaced agricultural workers. This will be the first time that we truly look at our formulas and our reporting system to determine whether or not we are accurately and properly reflecting the number of agricultural workers in rural areas that are displaced due to economic conditions today. This will go a long way in dealing not only with the trade issue, but with the bigger crisis that exists in American agriculture today.

In the agricultural area I would like to call the attention of my colleagues and particularly those colleagues involved in the dairy area with a couple elements which I think are just very, very important. First of all, we have finally achieved, Mr. Chairman, a reclassification of imported casein, to recognize its use as a food additive rather than simply an industrial chemical. In the 6 years I have been in this Congress, we have tried to find a means to achieve that goal. The legislation in front of us today does just that.

Second, almost every Member of Congress has made public comments about the inequity and inconsistency of allowing international corporations to come in here and start up large dairies through the use of tax exempt bonds, et cetera. I will point out to my colleagues that the Agriculture Committee section of this bill denies such foreign companies from coming in here and selling such milk at either class 1 or class 2 prices. That means that the Irish dairies could not sell their milk at $15.35 per hundred, which is the over-order premium price in Atlanta, GA, today; rather they would be required to sell it as class 3 milk at $10.98. That, friends, is going to send a real signal of support to the American dairy farmer across this country.

Third, in the area of agriculture, I want to point out one of the problems we have had in the pork industry. We have been trying to deal with excessive imports of pork coming into this country and I think we have all been disappointed with the way the International Trade Commission has ruled that processed food cannot be regulated in the same way as raw or original food would be.

I would call to the attention of my colleagues that again in the agricultural section of the bill, processed imports will be considered by the International Trade Commission as to their effect on growers of raw products.

There are some problems in this legislation. I hope they are fixed up in the end; but overall, Mr. Chairman, let us use it as a starting point for a bipartisan consensus on trade.

Mr. HAWKINS. Mr. Chairman, I yield 2½ minutes to the gentleman from Michigan [Mr. KILDEE].

Mr. KILDEE. Mr. Chairman, I rise in strong support of H.R. 4800, and of title V of this legislation. Title V, reported unanimously by the Education and Labor Committee, authorizes new programs for education and training to enhance U.S. international competitiveness.

The education and labor provisions of this legislation include new programs to retrain and employ American workers affected by international competition, and provides grants to elementary, secondary, vocational, and postsecondary institutions to prepare today's students for a more competitive American industry.

I am particularly pleased that the education and labor provisions contain a Labor-Management Grant Program.

This program will assist both workers and industry in becoming more competitive in international markets. A similar program, using partial Federal funding, was utilized in my congressional district at the Buick City automobile plant. It helped save thousands of jobs for automobile workers who were about to be displaced.

The Labor-Management Grant Program in title V of H.R. 4800 will provide similar training to that which took place at Buick City in Flint, MI.

Before Buick City was created the Buick plant in Flint was one of the oldest of General Motors' factories. Today, it is the most modern in technology.

Not only did General Motors have to replace equipment to bring Buick City up to date. It also had to retrain and upgrade the skills of its workers so they could work with the new technology.

Together Buick, the UAW, the Flint Board of Education, the Genesee Intermediate School District, Mott Community College and later the University of Michigan joined in an effort to save thousands of American jobs. Together, they directly retrained 900 autoworkers who are now finishing the process of training 5,100 workers.

As a result of this Joint Management, Labor and Education Program, a total of 6,000 workers have had their skills upgraded to work in a new manufacturing process with new technology.

The effect has been marvelous both in new technology and competitiveness, and in a diminution in unemployment in Flint.

In 1982 the city of Flint was the unemployment capital of the country with an unemployment rate that reached 27.1 percent. Today, while still too high, the unemployment rate has dropped to 13.7 percent.

The education and labor provisions of H.R. 4800 will help replicate this experience more efficiently and more widely.

Together, title V and the other provisions of H.R. 4800 seek to set a new direction in trade policy, a policy change which is long overdue.

For more than 5 years, now, this country has tried to practice so-called free trade policies while other countries have played by a different set of rules. The result of this has been an overall trade deficit of nearly $150 billion last year. The largest trade deficit of any nation in world history. Last month alone, our trade deficit reached $14.5 billion, $2 billion more than the month before.

I am pleased that H.R. 4800 sets new guidelines for American trade negotiations so that unfair foreign trade actions will be promptly met with an appropriate and tough American response. This measure sends a clear signal to our major trading partners that we will no longer tolerate unfair trading practices and we will vigorously enforce U.S. trade laws.

And it provides both American industry and American workers with the tools they need to enhance their competitiveness in today's world economy.

Mr. JEFFORDS. Mr. Chairman, other Members have already pointed out the magnitude of our trade deficit and the serious economic effects that it has engendered. They have discussed the steps that they believe we must take to turn around the flow of trade. During my remarks, I want to focus on the long-term strategy that we should pursue in addressing our trade problem. I want to make sure that we don't miss the forest for the trees—that in attempting to solve the immediate problems of unfair trade practices and of the flood of imports, we don't ignore the need for education and training and improve productivity. A far better alternative to protectionism is a policy that encourages America's workers and industries to rise up and meet the challenges of foreign competition. We must think positive, not negative.

Over the past few years America has become increasingly vulnerable economically. American businesses have been undersold by foreign competitors with newer technologies and cheaper labor. The number of U.S. jobs either directly or indirectly related to exports fell by 1.8 million, or 25 percent, between 1980 and 1984. Despite the lower value of the dollar, the Nation's merchandise trade deficit widened to $14.52 billion this March. The trade gap with Japan swelled to a record $5.52 billion in March, approximately $1.2 billion more than in February.

For some time America remained at the forefront of the high-technology sector, with an established computer industry and well-financed military research and development. Entrepreneurs provided the energy and skills needed to develop products. The Government provided funds—often first to the universities in the form of development grants and research support—and later, as an eager customer, to emerging new enterprises.

We have begun to lose our competitive edge even in high-technology, "sunrise" industries. Between 1965 and 1980, U.S. exports lost a share of the world market in 7 out of 10 high-technology industries: engines and turbines; professional and scientific instruments; electrical equipment and components; optical and medical instruments; drugs and medicine; plastic and synthetic materials; and industrial chemicals. We held our share in aircraft and parts, and we gained export market share only in office, computing and accounting machines, and in agricultural chemicals.

There is no single, stop-gap measure that can resolve America's trade problem. We must use all the tools at our disposal. And among the most important of these tools is education and training. Over the next 10 to 15 years, the work force will undergo a major change in composition. There will be striking increases in the less well educated segments of the population that have typically been the least prepared for work. From 5 to 15 million manufacturing jobs will be restructured, and an equal number of service jobs will become obsolete. The disruption from these changes in work will be great, and the need for job training will take on added significance. As most workers will have a number of jobs during the course of their lifetimes, retraining and skill upgrading will also become increasingly important. After all, over 75 percent of the work force in the year 2000 is already working today.

There is growing evidence that even today there is a real mismatch between new jobs in the labor market and the people who are available to fill them. For some worker-hungry personnel officers, jobless statistics are mysterious; they can't get enough skilled workers. The dearth of skilled workers is due in part to the "baby bust"—the low birth rate of the 1960's and early 1970's. It is also due, however, because unemployed workers do not have the right skills to take advantage of the increased demand for workers.

What is needed are solid retraining programs to enable workers to adapt to the age of technology. The Office of Technology Assessment estimates that there are over 2 million displaced workers in this country—workers who held their previous jobs for 3 or more years. Such workers are now unemployed through no fault of their own; their displacement is usually associated with technological and economic changes. Some may have worked in industries adversely affected by imports; some may have been employees of a plant forced to shut down. In Canada the government has successfully implemented Worker Retraining and Placement Committees to aid workers in factories facing shutdowns or mass layoffs.

The problems of dislocated workers are not the same as the problems of the hard-core unemployed. Dislocated workers generally have established work histories and good work habits. They represent an important natural resource whose productive work efforts could contribute substantially to the Nation's economy. We've got to find a place for such dislocated workers to be retrained so that their potential contributions are not lost, and so they can again be productive human beings. Many of these needs are not being met by our Government, and any trade strategy that we develop should consider them.

Any efforts to help dislocated workers, however, must supplement an improved education foundation provided by our school systems. It is basic education that forms the bedrock of employment skills. American education, once the envy of the world, is being outpaced by countries that once played catchup with the United States. It would be hard to deny the connection between Japan's involvement in the world marketplace and the improvements it has initiated in its educational system. In Japan, students spend four times as much time on homework than their American counterparts. More Japanese, 90 percent, graduate from high school than Americans, 75 percent. They attend school for longer hours. And they are required to pursue a more rigorous curriculum, including required courses in math, science, and foreign language. Per capita, Japan turns out twice as many engineers as the United States. Efforts to improve the quality of academic education in the schools is essential to the development not only of knowledge in mathematics, science, computer literacy, and foreign language that will translate into improved opportunities for international commerce. Now the United States is in a position of having to play catchup.

Another area in which we might follow the Japanese lead is labor-management cooperation committees.

Such "quality circles" have provided an opportunity for an exchange of ideas between labor and management regarding improvements in production techniques and general working conditions. In these situations, the worker is more akin to a partner than an employee. Japanese companies, using such committees to draw upon the creativity of their workers, have benefited from more committed workers who have felt a greater personal stake in their companies' success.

Last, a final area we cannot ignore is our college and university infrastructure. Following World War II there was a major surge in Federal support for scientific research at colleges and universities. The Federal Government has encouraged the use of college facilities for research and development, expanding the definition of research qualifying for the R&D tax credit to include research contracted out to universities. However, Federal obligations for research and plant facilities decreased 90 percent in constant dollars between 1966 and 1983, and now we face a new problem—an obsolete and outdated R&D infrastructure.

Many college research and laboratory facilities are woefully inadequate. Many lack basic equipment, and most lack state-of-the-art equipment necessary for R&D. On an average, university research equipment is twice as old as comparable equipment in industry. A recent survey by the National Science Foundation found that 20 percent of university scientific equipment is obsolete and no longer used. It has been estimated that it could cost between $30 and $40 billion to replace and renew higher education's physical plant. Industry can only make up a small portion of the decline in direct Federal support of university R&D facilities. To make up a 1-percent loss in Federal support would require about a 20-percent increase in support from industry.

That our competitive position is as strong as it is may be due in no small part to earlier investments in science and technology. The United States is dependent upon its R&D enterprise. Research and development efforts have fueled the economy, and our entire society has benefited from the fruits of these efforts, which include, of course, college and university R&D. Our industrial productivity, security, health, and general welfare are all affected by the quality of the Nation's research and development activities. University-conducted research accounts for about half of all basic research and about 12 percent of R&D efforts.

The problem of outdated research and laboratory facilities is exacerbated by the ever-increasing pace of the technological revolution. Each new experiment seems to require more sophisticated equipment and more complex techniques. Research and laboratory facilities are important not only because they are the training ground for our scientists and engineers of the future. They are also crucial to the role played by our institutions of higher education in the development of new processes, new products, and new discoveries that could form the basis of new industries. A key challenge facing our Nation in the future will be improvement of the mechanisms for transforming basic research into the first stage of product development—to enhance collaborative efforts between business, higher education, and government that will facilitate transfers from the drawing board to the factory. We cannot expect colleges and universities to meet that challenge with wornout tools.

In my view, the best defense against the trade deficit is a good offense. Any attempt to solve our trade problem should take a long-range view. We need to look beyond free trade, fair trade, and protectionism. Our strategy should embrace education and training programs to make our workers and our industries more productive and competitive. Paying heed to the role of science and technology in our Nation's future, we should look for ways to assure that our future work force has the knowledge and the skills to keep America at the forefront of new developments in the fields of science, technology, and engineering. Our strategy should also encompass an effort to assure that our colleges and universities have the resources—both human and physical—to play a leading world role in developments in science and technology. In short, it should include a strong effort to make ourselves competitive and productive not only this year but in the decades to come.

In order to address these critical issues that I have outlined, I intend to offer an amendment to title V of the trade bill. There was an error in my amendment as printed in the May 15 RECORD. A corrected version of the amendment will be printed in the RECORD of today's proceedings, and I will ask unanimous consent tomorrow to offer the corrected amendment in lieu of the amendment as printed in the May 15 RECORD.

My amendment includes a program of matching grants for the modernization and revitalization of college research and laboratory facilities. As I indicated above, I think restoration of our R&D capability is of paramount importance if we are to stay at the forefront of developments in science, technology, and engineering.

My amendment would authorize a more realistic figure for worker readjustment and placement committees, based on the successful experience with such committees in Canada.

Finally, the amendment calls for two demonstration or pilot programs to determine how farmers and farm communities can best be served by job retraining services, and to determine whether techniques such as job sharing or reduced work hours could be used to reduce the adverse impact of mass layoffs.

It is, believed, essential that any effort to resolve our trade problem encompass education and training programs, as well as a strong effort to revitalize our R&D capacity. As Secretary of Labor Brock—a former U.S. Trade Representative, and no stranger to the trade problem—has said:

> There are just a few basic ingredients in our ability to compete. The first and most important is people * * *. As a nation, we have the most productive people in the world. They are ready, willing and able to work—all they need are the tools. And that means building an educational system that prepares us for the world of work, whatever field that may be, it means investment in new plants and equipment, it means investment in retraining and lifetime skills.

Education and training programs will help assure that we not only regain our place as a leader in world trade, but that we retain that position for years to come. Therefore, they should be a critical and fundamental part of any trade bill we consider.

AMENDMENT TO H.R. 4800 OFFERED BY MR. JEFFORDS

Page 327, line 16 strike out "$500,000,000" and insert in lieu thereof "$480,000,000".

Page 341, line 6 strike out "$500,000,000" and insert in lieu thereof "$470,000,000".

Page 340, after line 25 insert the following new chapter:

Chapter 4—College Research Facilities

SEC. 545. REPLACEMENT AND MODERNIZATION OF COLLEGE RESEARCH FACILITIES.

(a) PURPOSE.—It is the purpose of this section to assist in revitalizing the Nation's academic research programs through capital investments in laboratories and other research facilities at universities and colleges.

(b) PROGRAM ESTABLISHMENT.—To carry out this purpose, the Secretary of Education shall, from the sums available under subsection (g) to carry out this section in any fiscal year, establish and carry out a new university research laboratory modernization program that will provide assistance for the replacement or modernization of such institutions' obsolete laboratories and other research facilities.

(c) COMPETITIVE GRANTS; REGULATIONS.—The university research laboratory modernization program established pursuant to subsection (b) shall be carried out through projects which involve the replacement or modernization of specific research facilities at universities and colleges. Funds shall be awarded in response to specific proposals submitted by such universities and colleges, in accordance with regulations prescribed by the Secretary of Education to carry out the purpose of this part. Funds to carry out the program shall be awarded on a competitive basis. The funds so awarded to any university or college shall be in an amount not exceeding 50 percent of the cost of the replacement or modernization involved (with the funds required to meet the remainder of such cost being provided by the institution

involved or from other non-Federal public or private sources).

(d) CRITERIA FOR AWARD.—Criteria for the award of funds to any institution for a project under a university research laboratory modernization program shall include—

(1) the quality of the research and training to be carried out in the facility or facilities involved;

(2) the congruence of the institution's research activities with the future research needs of the agencies referred to in subsection (f); and

(3) the contribution which the project will make toward meeting national, regional, and State research and related training needs.

(e) EQUALIZATION OF FEDERAL FUNDS.—At least 15 percent of the amount available under this section in any fiscal year shall be available only for awards to universities and colleges that received less than $10,000,000 in total Federal obligations for research and development (including obligations for the university research laboratory modernization program) in each of the two preceding fiscal years.

(f) CONSULTATION.—In prescribing regulations and conducting the program under this section, the Secretary of Education shall consult with—

(1) the National Science Foundation;

(2) the Department of Health and Human Services;

(3) the Department of Defense;

(4) the Department of Energy;

(5) the National Aeronautics and Space Administration; and

(6) the Department of Agriculture.

(g) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated (in addition to sums authorized by section 511) $50,000,000 for fiscal year 1987 and such sums as may be necessary for each succeeding fiscal year to carry out this section.

Page 350, after line 25, insert the following new subsection (and redesignate the succeeding subsections accordingly):

"(f) The Secretary shall identify individuals, including employees of the Department of Labor, who shall be available on a regional basis to provide planning, operational, and technical assistance to labor-management committees described in subsection (b).

Page 356, line 13, insert before the close quotation marks the following: "Such report shall also include an analysis of alternative methods for reducing the adverse effects of displacements of farmers and ranchers, not only on the individual farmer or rancher, but on the surrounding community.".

Page 357, after line 9, insert the following new subsection:

(e) ADDITIONAL STUDIES.—The National Commission for Employment Policy shall conduct research related to the provisions of this subtitle. Such research shall include examination of—

(1) the role of the employment services in implementing programs to enhance services provided under this subtitle, and

(2) alternative techniques for managing production cutbacks without permanently reducing workforces.

A report on the research conducted under this subsection shall be submitted to the Congress not later than 18 months after the date of enactment of this Act.

□ 1620

Mr. HAWKINS. Mr. Chairman, I yield 3 minutes to the gentleman from Massachusetts [Mr. MOAKLEY].

Mr. MOAKLEY. I thank the distinguished gentleman from California [Mr. HAWKINS], the chairman of the Committee on Education and Labor, for yielding this time to me.

Mr. Chairman, chapter 3 of title V of H.R. 4800, authored by my colleague from Massachusetts, Mr. ATKINS, authorizes the Secretary of Education to provide grant assistance to a nonprofit State corporation to design, develop and construct, a model, regional educational telecommunications network and technology resource centers.

A plan for a national educational telecommunications demonstration program has been developed by the Massachusetts Corporation for Educational Telecommunications [MCET]. MCET is a nonprofit State corporation established by the Massachusetts State Legislature for the purpose of developing a comprehensive educational telecommunications network. MCET has designed a state-of-the-art satellite based network which has the capacity to link all elementary and secondary schools, colleges and universities, libraries, medical facilities, and worksites in Massachusetts and throughout New England.

Mr. Chairman the New England region has vastly different educational and economic needs. Several universities in the region have already been working with educational telecommunications on a limited scale and are eager to expand programming services through a comprehensive regional network. A number of private sector corporations have also expressed strong interest in receiving worker training programs over an educational telecommunications network such as MCET.

Mr. Chairman, dramatic improvements in educational quality are needed if American industry and workers are to regain their competitiveness in the world economy.

I would like to ask the distinguished Chairman of the Educational and Labor Committee, Mr. HAWKINS, if he agrees that the use of educational telecommunications can help move our Nation in this direction?

Mr. HAWKINS. Mr. Chairman, if the gentleman will yield. I do agree with the gentleman from Massachusetts that advances in educational telecommunications can play an important role in improving math, science, foreign language, and other instruction in our Nation's schools.

In my home State of California, several universities have existing educational telecommunications networks serving students and workers in their general vicinities. It is in the interest of these and other similar programs around the country that a national demonstration of a large-scale network be conducted.

Mr. Chairman, training of displaced workers and improvements in math and science education are among the primary goals of title V of H.R. 4800, the Education and Training for American Competitiveness Act. The Committee on Education and Labor believes that educational telecommunications can help achieve these goals by working to bridge the gaps in our educational system which have resulted in the educational and industrial competitiveness crisis we now face.

For these reasons, the Committee accepted the amendment of the gentleman from Massachusetts [Mr. ATKINS] authorizing the construction of a national demonstration network. I would like to commend the author of the amendment, Mr. ATKINS, and you, Mr. MOAKLEY, for your strong support for this project and the overriding need to improve our Nation's educational quality and industrial competitiveness.

Mr. MOAKLEY. Mr. Chairman, I thank the distinguished chairman for his remarks and his support of a national demonstration of a model, regional educational telecommunications network. I also congratulate the gentleman from Massachusetts [Mr. ATKINS] for his leadership on this important issue.

Mr. JEFFORDS. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Ohio [Mr. REGULA].

Mr. REGULA. I thank the gentleman for yielding this time to me.

Mr. Chairman, I support this bill. It is not perfect, but I think it is a step in the right direction. Hopefully it will be improved in the other body. It does require that the President take action if there is evidence of unfair trading practices, and that has been a longtime concern of many of us. It has a wide range of options available to the President, and it does have a safety valve. I think it is important that we emphasize that the section 301 mandatory action is waived if the President determines such action is not in the national economic interest of the United States.

Another important feature is that it does provide a private cause of action for dumping. It gives those who are being unfairly hurt by dumping some recourse.

I am disappointed that the bill did not address the problem of the measure of damages in determining whether or not there is dumping. As my colleagues know, our present laws provide protection to our domestic industries against dumping practices.

When it is calculated that dumping occurs, remedies and penalties are invoked to restore the loss to our domestic producers.

A critical factor, therefore, becomes the calculation of dumping margins. Presently, the U.S. Commerce Department treats foreign importer sales to U.S. subsidiaries differently from sales to unrelated parties. The result is that

it is easier for foreign importers to dump when they sell to a subsidiary purchaser.

This is because the Commerce Department does not deduct a reasonable profit during its dumping calculations when the sale is to a related party. This has the effect of inflating the exporter's sales price by the amount of such phoney profit and reduces the possible dumping margin by that amount.

In essence, what happens is that a foreign importer makes a product for $10, sells it to a U.S. subsidiary for $9, but tacks on a phony profit of $3 for purposes of the dumping calculation. Our Commerce Department then considers the sales price to be $12 instead of $9, and, instead of dumping, this sale is considered lawful. In reality, it is a sham.

Every other nation implementing an antidumping law or regulation follows the practice of deducting a reasonable profit from related party prices. Our Commerce Department maintains that, while this is the case, their method of calculation is correct, despite the fact that it hurts American industries.

I submit that we gain few points in world trade by standing on the righteousness of our actions while watching our trading partners calculate dumping in a way that more appropriately protects their domestic industries.

The object of any trade legislation should be to inject fairness into the system. By amending our dumping calculation method to conform to that of our trading partners, we can make a more level playing field for American workers.

I proposed this change as an amendment when this bill was in committee. I speak today to establish a legislative record about this issue, it is my intent to proceed with this matter as this legislation is considered in the other body.

Mr. HAWKINS. Mr. Chairman, may I ascertain how much time I have remaining?

The CHAIRMAN. The gentleman from California [Mr. HAWKINS] has 3½ minutes remaining and the gentleman from Vermont [Mr. JEFFORDS] has 2 minutes remaining.

Mr. HAWKINS. Mr. Chairman, I yield 2 minutes to the gentleman from Montana [Mr. WILLIAMS], a member of the committee.

Mr. WILLIAMS. I thank the Chairman for yielding this time to me.

Mr. Chairman, I rise in support of this legislation, and particularly the important education and training component of this legislation. America cannot regain its status as the world's leading and most aggressive trader unless we have appropriate education and training and retraining of the American work force, and that includes those people who are, of course, not yet in the work force but in their younger years.

The bill authorizes, as my colleagues know, two programs under the Job Training Partnership Act. One is to provide efforts on an industrywide basis to workers who are adversely affected by trade, and the other is to provide individual education and retraining to workers whose jobs are at risk.

□ 1630

The bill also, by the way, authorized the development and implementation of computer State job bank systems to increase job-matching efficiency and that is very important.

In the area of education, the bill authorizes a program in which State education agencies would receive money for literacy training, vocational education and education in mathematics, science and the foreign languages.

I believe that is a critical part of this bill. America's standing in international competition has been significantly eroded by illiteracy, including functional illiteracy in the work force here in the United States. Our world neighbors, our friends around this globe, are for the first time in four decades or more seriously challenging us in both the marketplace of goods and the marketplace of ideas. It is the education component of this legislation that establishes America once again as the leader in the marketplace of ideas.

If we are to continue to compete as a nation in the grand American tradition, we must have a fully literate work force and the authors of this bill had the wisdom to provide that component within this trade legislation.

Mr. JEFFORDS. Mr. Chairman, I yield myself such time as I may consume. Mr. Chairman, I would just like to offer some comments about the education training section and what I would feel would hopefully be the need in this bill to have a provision which would adequately fund it.

I am concerned about the fact that we will have to be competing, although there is $500 million set aside in the budget with other programs in order to fund this title.

I believe what we should have done, although it would not be ruled in order by the Chair, would be to take and put a small fee on all the imports that come into this country so that we could use the moneys which would derive from the problem to give us a solution.

For instance, by a 0.3 percent fee on imports that come into this country, we could generate $1 billion, or more than $1 billion, to put and to adequately fund all these programs and make it unnecessary to compete with the other priorities which are established in our budget system.

I am afraid that, unfortunately, I cannot offer that amendment, but I would hope, as we go into the future, that we will take seriously the fact that we have to provide adequate funding for this title here in order to make it work and to give America the advantages of what we could do with adequate funding in this title.

Mr. HAWKINS. Mr. Chairman, I yield the balance of my time to the gentleman from Minnesota [Mr. VENTO].

The CHAIRMAN. The gentleman from Minnesota [Mr. VENTO] is recognized for 1½ minutes.

Mr. VENTO. Mr. Chairman, I rise in support of title V of this measure which address the displacement of workers and education retraining benefits and help to address this adverse impact and I rise in support of the worker rights provisions in H.R. 4800 which would amend section 301 of the Trade Act of 1974 to define the denial of certain basic internationally recognized worker rights as an unreasonable trade practice. These worker rights include the right of association, the right to organize and bargain collectively, the prohibition on the use of any form of forced or compulsory labor, a minimum age for the employment of children, and acceptable conditions of work with respect to minimum wages, hours of work, and occupational safety and health.

Mr. Chairman, I want to commend the chairman of the education and labor committee for his good work on title V and I further want to commend my good friend and colleague, the gentleman from Ohio [Mr. PEASE] for his outstanding work in the Committee on Ways and Means in including these important provisions in H.R. 4800. The gentleman from Ohio has put his finger on one of the most glaring and indefensible obstacles to the establishment of fair international trade. It is fundamentally unfair for American industries and American workers to compete in the international marketplace against government-owned and government-sponsored industries which fail to adhere to basic standards recognizing the rights of their workers.

The basic worker rights which are defined in this legislation are not new ideas nor are they unusually controversial in most countries of the world. While certain particular standards governing hours, wages, working conditions, and health and safety standards may vary from country to country, there is a generally recognized international principal which recognizes that workers who produce goods and services should have certain rights as well as consumers.

There is a rich body of law and custom which confirms the importance of worker rights in our trade relations with other nations. The basic rights identified in the bill include freedom of association, recognized in

our first amendment and in the National Labor Relations Act of 1935 which permits workers to join a union and bargain collectively. The prohibition on forced or compulsory labor is contained in our 13th amendment and is reaffirmed in the Taft-Hartley Act of 1947. The establishment of a minimum age for the employment of children was first recognized in the Fair Labor Standards Act of 1938. This law also set the first minimum wage and hours law. Finally, the framework for occupational safety and health standards was established with the passage of the Occupational Safety and Health Act of 1970. Numerous court decisions over the years in our State and Federal courts have reaffirmed the vital importance of these basic laws recognizing the rights of American workers.

But these principles have been applied outside of the United States as well in the international community. The United States has participated for over many years as an active member of the International Labor Organization [ILO]. The ILO has adopted most of these basic principles through its covenants with member nations. While the United States has not adopted each and every ILO covenant, official U.S. policy over the past 50 years through both Republican and Democratic administrations has been to support a generally progressive labor policy which recognizes fundamental worker rights.

There has been considerable misinformation spread concerning the worker rights provisions of this legislation. Some have suggested that the adoption of these provisions would somehow impose U.S. labor laws and standards upon our trading partners. Nothing could be further from the truth. Even if we wanted to do so, this Congress lacks the authority to legislate for other sovereign states. We do have the authority, however, within the context of our own bilateral and multilateral trade relations with other countries to attempt to persuade other nations to live up to the word of the agreements which they have signed with the ILO and to urge respect and adherence to internationally accepted labor principles and practices. As I mentioned earlier, this is asking nothing more than what the United States has been willing to do and in fact has done over the past 50 years.

H.R. 4800 worker rights provisions carefully distinguishes "unjustifiable" trade practices from those which are "unreasonable." Unjustifiable practices, such as foreign violations of existing trade agreements, require—with certain limited exceptions—a proportional response by the President. The worker rights provisions of the bill fall under the category of "unreasonable" practices which allow the President discretion in the timing and nature of a response. These provisions do not tie the President's hands nor do they require any unreasonable action. They simply attempt to provide the President with some authority to address the issue of basic worker rights in the context of our trade agreements with other nations. Our trading partners who are members of the ILO and who profess support for internationally recognized worker rights should not be offended when this issue is raised, as it should be, in our trade negotiations with them.

Finally, Mr. Chairman, as a matter of trade policy, I believe that the worker rights provisions of this legislation are necessary to further the domestic economic development of our trading partners and to strengthen our trade relations. International trade should not only benefit those who consume goods but should benefit those who produce those goods as well. Strong support for international worker rights is in our national interest to be sure, but it is also in the interest of our trading partners. Improving the living standards of workers around the world through support for international standards will inevitably create strong new markets for our trading partners' domestic industries as well as our own American industries if they have reasonable access to those markets.

Both title V retraining provisions and these worker rights provisions are a major improvement over the existing policy path that we are following. U.S. policy would treat with logic the workers displaced and educate and train and bring them back into the mainstream, the world of work with enhanced education facilities and infrastructure and the limits on the impact of unjust treatment—worker rights, indeed exploitation of workers in our trading partners economies.

I hope that my colleagues will join me in supporting these important retraining and worker rights provisions in H.R. 4800.

The CHAIRMAN. All time for general debate under the jurisdiction of the Committee on Education and Labor having expired, general debate shall now continue for 30 minutes, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture.

The gentleman from Texas [Mr. DE LA GARZA] will be recognized for 15 minutes, and the gentleman from Illinois [Mr. MADIGAN] will be recognized for 15 minutes.

The Chair recognizes the gentleman from Texas [Mr. DE LA GARZA].

Mr. DE LA GARZA. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, when the Hcuse debates national trade policy, as we are doing today, one of the key elements in that discussion must be agricultural trade policy. That is true for two reasons:

First, agricultural exports are crucial to the financial stability and future prosperity of our agricultural and food economy.

And second, for many years, agricultural trade has been one of the few areas in which the United States has had a positive balance of trade. The wheat, cotton, and other crops we sell abroad, in other words, help pay for many of the foreign products we import.

In both of those areas, we have problems that must be addressed.

As the House knows, the Nation's farm economy is in trouble, and one major cause of that trouble is the fact that agricultural exports have declined sharply during the 1980's. Exports have fallen from a record of $43.8 billion in fiscal 1981 to an estimated $28 billion for the current fiscal year. That represents a decline of more than 36 percent in that area.

As far as the balance of trade is concerned, there is also cause for concern. In the 1981 fiscal year, our agricultural exports ran ahead of agricultural imports by $26.6 billion. In fiscal 1986, however, the favorable balance of agricultural trade will be down to only about $7 billion—a decline since 1981 of nearly 74 percent.

Our Committee on Agriculture, Mr. Chairman, addressed the issues related to agriculture and I would advise my colleagues that some of the areas that we adopted amendments and submitted for incorporation into this vehicle were either deleted because of jurisdictional conflict with other committees, or were adopted by the other committees, specifically the Committee on Ways and Means and the Committee on Foreign Affairs in their section of this omnibus trade bill.

What we have then that provides incentive, assistance and some degree of hope to our agricultural sector is giving more or additional tools, the basic tools that agriculture needed for competing in the world economy, I think, were well provided in the Farm Act of 1985. These are, then, additional tools that we would give the President and the various agencies to deal with some of the areas of concern related to agricultural trade, world trade, beyond the domestic utilization of the products that our farmers produce.

The decline in our agricultural trade balance is bad news for our entire economy. When we lose exports, farmers lose income, but they are not the only people who suffer. Declining exports mean that surpluses go up and farmers are forced to reduce acreage—and that affects the whole wide range of industries that produce farm supplies and handle farm commodities.

Let me give you just one example. In the 1981 crop year, farmers used nearly 288 million acres for wheat, corn, sorghum, barley, soybeans, rice, and cotton. In the current year, under programs which we are using to cope with heavy surpluses, the acreage for those crops will be limited to only about 266 million acres. Our farm economy and our national economy would be much better off if farmers and the agribusiness industries had those idled acres back in production at prices that produced a fair return for the growers.

We do not have a precise estimate of just how much net income American farmers have lost because of the decline in exports. But if you look at the USDA estimates of export sales in recent years, you will find some uncomportable numbers. Just suppose, for a moment, that export sales in recent years had remained at the fiscal 1981 level of $43.8 billion. In the 6 years ending in fiscal 1986, that would have brought nearly $263 billion from foreign buyers of our farm products. The actual amount we got in that period was just under $215 billion. And that means the American farm economy, over the past 6 years, has lost a cumulative total of nearly $48 billion in export sales.

This problem is not new. The export depression was one of the major factors we considered in the House when we wrote the omnibus farm bill last year. That bill, as my colleagues recall, included a number of major new program and policy steps designed to help make us more competitive in world agricultural markets.

Now, as part of H.R. 4800, the general trade bill which is before the House today, we have provisions which give us an opportunity to go further in dealing with agricultural trade issues. Title VI of the bill includes several proposals designed to make the programs adopted in 1985 work more effectively. In addition, we have included proposals that can make the Agriculture Department a tougher, better coordinated and more active agency for moving American products into world markets. Also, we have added several features designed to make sure that American growers get a fair chance to compete with imports in our own domestic market. And finally, we have brought you amendments which put Congress on record against the European Community's recent steps to restrict American trade and which urge the President to take a strong stand against foreign discrimination against American beef and citrus products.

Mr. Chairman, I will include in these remarks a brief summary of the items included in title VI of the bill. Before doing so, however, I want to reemphasize the importance of trade to agriculture and to remind the House again how much damage is done when we lose agricultural exports.

I will not go over the dismal figures on farm income and the number of farmers who have suffered so much in this worst agricultural depression since the 1930's. But in addition to the record of suffering on the farm, there is a record of economic distress that is a direct result of the problem on the farm. I want the House to hear the following brief extract from a March 1985 report from the National Commission on Agricultural Trade and Export Policy:

> Capacity utilization in the pesticides manufacturing and potash industries has fallen by 33 percent and 22 percent since 1980. Soybean crushing plants are operating at 64 percent of capacity and grain trading firms at 50 percent. 1,200,000 less bushels of basic commodities were loaded on barges on a weekly basis in 1984-85 than in 1980-82. Two thousand less railcars carried commodities on a weekly basis in 1984-85 than in 1980-81. The story is equally serious for other industries. Although other sectors of the general economy are experiencing growth, there has been no economic recovery in U.S. agriculture.

That report is now a little more than a year old. But the basic problem it presents has not changed much.

Mr. Chairman, I know there are some who say that we should not use programs which promote exports by programs such as the Export Bonus Program or the export credits we approved last year. I agree that in a ideal world, where all nations use fair trading policies, it would be better to do without such programs. But we do not live in a perfect world. The fact is that there is today little really free trade in agriculture. Governments all over the world use programs designed to protect farmers for a variety of reasons—sometimes to help assure domestic food supplies, and sometimes to give their farmers an advantage in world markets.

Our country has made repeated efforts over the years to improve the world trade climate and to eliminate unfair subsidies and trade barriers. I believe Congress and our farmers favor these efforts and want them to continue and to succeed. But until they do succeed, we cannot leave American farmers standing alone to compete against the treasuries of foreign governments.

For all these reasons, we need to take every chance we get to improve our policies, programs and machinery for promoting agricultural exports and for moving toward fair trade conditions in both export and domestic markets. Here now is a summary of the steps in that direction taken by title VI of H.R. 4800.

SUBTITLE A

This subtitle deals with several problems that have hampered the development of responsive Federal programs, including the fact that it has been difficult to coordinate development of effective agricultural trade policy when so many Government agencies are involved in the process. To improve this situation, H.R. 4800 gives the Agriculture Department—subject to the overall trade policy leadership role played by the U.S. trade representative—primary responsibility within the executive branch on all matters concerning agricultural trade and agricultural trade policy. Also, the subtitle will substantially reform the trade policy apparatus inside USDA by steps including creation of the post of Undersecretary for Trade and International Affairs. Other significant provisions of the subtitle will:

Create a mechanism for continuous monitoring of unfair agricultural trade practices by other countries.

Create an office to help American farmers, ranchers, and others damaged by unfair agricultural trade practices prepare cases for submission to the International Trade Commission and other bodies.

Require the President to develop and submit an annual long-term agricultural trade strategy plan.

Authorize the Secretary of Agriculture to make surplus Government-owned commodities available for cooperator projects overseas to expand agricultural markets.

Strengthen a provision requiring that priority in operating the Export Enhancement Program—using surplus commodities as export bonus payments—be given to traditional foreign customers who continue and expand their purchases.

Encourage the Agriculture Department to implement the agricultural commodity barter programs established by the 1985 farm bill.

SUBTITLE B

In recent years there has been an increasing number of cases in which unfair trade or subsidy practices of other nations have damaged domestic markets for American farmers. The subtitle, in dealing with these issues, will:

Require the Secretary of Agriculture to collect hard information on the value and quantity of imported raw and processed agricultural products and compare these estimates to domestic production and consumption.

Require the ITC, when investigating "material interference" cases involving tobacco imports under section 22 of the Agricultural Adjustment Act, to take into account the assessments paid by American farmers to cover costs of the Tobacco Support Program.

Express the sense of Congress that the President should impose import fees and duties against the products of countries that discriminate against American citrus and beef in violation of the General Agreement on Tariffs and Trade.

Require the Secretary to conduct studies to: First, determine whether imports of honey interfere with or render ineffective the Federal Honey Support Program; and second, whether imports of roses are adversely affecting domestic products.

SUBTITLE C

This subtitle includes provisions addressing several other trade-related problems. It will:

Deny benefits of the Federal Milk Marketing Program to dairies owned by foreign entities and financed by industrial revenue bonds—applies only to dairies that begin operations after May 6, 1986.

Prohibit the addition of dockage or foreign material to U.S. export grain.

Express the sense of Congress in opposition to the trade restrictions that the European Community has applied to American Agricultural products as a result of the addition of Spain and Portugal to the European Community. The provision states that if satisfactory compensation is not obtained, retaliatory steps such as those announced by the President should be taken.

In addition, a number of provisions directly affecting agriculture are found in titles I and VIII reported by the Committee on Ways and Means and in title III reported by the Committee on Foreign Affairs.

Mr. Chairman, the provisions of title VI were developed by the Committee on Agriculture at business meetings held on May 6 and May 8, 1986. At those meetings, the committee approved a number of proposals to improve the agricultural trade situation, and advised the Committee on Rules of its decisions.

Also, following the business meetings, my staff worked with other House staff to include proposals approved by the Committee on Agriculture in the omnibus trade package then being put together for introduction on May 9. For the most part, the committee proposals were included in the trade bill and are before the House today, as title VI of H.R. 4800. Several committee proposals were not included in title VI of H.R. 4800 because of jurisdictional concerns or because of overlap with the provisions of other titles of H.R. 4800.

I would advise the Members that the Committee on Agriculture has put together a committee print that provides the legislative history for title VI. The committee print documents the committee's work that led to the inclusion of title VI in H.R. 4800, and analyzes and describes the background for the provisions in title VI.

I would note, for the record, that the provision adopted by the Agriculture Committee relating to ethanol imports was not included in title VI of H.R. 4800, but was included as section 864. Also, a provision approved by the Agriculture Committee authorizing increased use of Department of Agriculture representatives, such as agricultural attaches and agricultural counselors, abroad was deleted from title VI because a similar provision was included in section 314(c) of title III, developed by the Committee on Foreign Affairs.

With respect to the Agriculture Committee provision relating to emergency action in import relief, while it was not specifically included in H.R. 4800, its intent and purpose are reflected in other provisions of H.R. 4800, particularly the provisions of title I providing for emergency relief on perishable agricultural commodities, and expedited action in critical circumstances, in section 201 cases.

H.R. 4800 does not contain the Agriculture Committee proposal requiring reciprocal action when another country is using unfair trade practices in competition with U.S. agricultural commodities determined to be in surplus supply. However, I would note that title I of H.R. 4800 does contain a number of provisions toughening the U.S. response in section 301 unfair trade cases. For example, the bill will require the U.S. trade representative to initiate a section 301 investigation into the acts of a foreign country that have a significant adverse effect on U.S. exports and is a likely violation of U.S. rights.

With respect to the Agriculture Committee provisions relating to unfair competition reports, not included in H.R. 4800, I would note that other provisions of title VI establish a trade victim's assistance unit within the Department of Agriculture, and the Department of Agriculture will be designated to have primary responsibility, within the executive branch, for agricultural trade matters. Also, title VI retains the provision of the Agriculture Committee proposal on assistance to victims of unfair trade practices requiring other agencies to consult with the Secretary on actions that could be initiated to counter unfair trade practices that adversely affect U.S. agriculture.

I would note that the title VI provision relating to the use, by cooperator groups, of PIK commodities abroad is the language adopted by the Foreign Affairs Committee and originally proposed for inclusion in title III, rather than the language included in the Agriculture Committee proposal.

Finally, I would note that H.R. 4800 does not include several proposals adopted by the Agriculture Committee, as follows: First, the sense of Congress relating to the generalized system of preferences: second, the proposals relating to limiting Canadian beef imports and amending the Meat Import Act of 1979 to include lamb, liver cattle, and pork; and third, the sense of Congress proposal relating to the Agency for International Development.

There are other areas in which we add some of the tools necessary, Mr. Chairman, and I submit to the members that the Committee on Agriculture diligently, conscientiously and, I think, effectively dealt with the issue in our committee in a nonpartisan way, as we always have within our committee, looking toward the end result of enhancing the ability of our agricultural sector, of our producers, to compete in a world market on a fair, equitable, level playing field.

□ 1640

Beyond that, we leave it to our ingenuity, our productivity, and the quality of our product to compete with the other countries; but we can and we should and we must level the playing field by whatever equitable means we can utilize in order to give our producers not the edge, but the ability to compete equally with other producers around the world.

Mr. Chairman, I reserve the balance of my time.

Mr. MADIGAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to take this opportunity to commend my chairman, the gentleman from Texas, for his efforts to properly address the difficulties that American farmers face in agricultural trade. Through all of last year, the Agriculture Committee worked in a bipartisan manner to remedy many of these difficulties in the 1985 farm bill. Now, before those remedies have even been fully implemented, we are presented with this so-called Trade Reform Act that politicizes our formerly bipartisan trade policy and singles out the American farmer to bear the brunt of this misguided and highly political bill.

This year the Agriculture Committee was awaiting the recommendations of the congressionally created agriculture export commission that has been working for 18 months to identify areas of needed reform. The committee intended to develop comprehensive agricultural trade legislation later this year.

Suddenly, the orderly work of the committee was disrupted by a demand from the majority leadership to immediately submit agricultural sections for the bill now under consideration. It was also made clear that this omnibus trade bill would be the only trade vehicle for the rest of this Congress. As a result, the Agriculture Committee was forced to abandon its plans for a carefully considered agricultural trade bill this year and hurriedly throw together a jumble of ideas with almost no debate and without being able to consider the final report of the agriculture export commission. While most of

the ideas contained in title VI of H.R. 4800 are acceptable, we don't have any idea what important proposals for enhancing farm exports we have missed in pursuit of this omnibus bill.

The real danger for American farmers in H.R. 4800 lies beyond the agricultural title. In a shortsighted effort to placate every political segment of the population involved in trade, the majority has stirred up a witch's brew of protectionism that is certain to ignite a trade war. And the first victim of that trade war is going to be the American farmer. Already scrambling to retain his share of agricultural exports in a world glutted with excess food exports, the American farmer will be forced to stand by helplessly as his best markets are destroyed by the trade war brought on by the majority's "trade reform."

It may be politically satisfying for some domestic constituencies to create arbitrary, automatic retaliation standards to be used against our competitors or to set ourselves up as self-appointed referees of other countries' labor policies, but such acts will spell the end of American farm exports. The countries targeted by the majority's bill are the American farmer's best overseas customers. The majority may be able to score political points with this bill, but they are going to drive American farmers off the land.

There is no question that the American farmer has been battered in the competition for export markets in recent years. He has borne the burden of embargoes, world recession and an overvalued dollar. Through a series of channels progress has been made to revitalize our farm export trade. In the farm bill Congress put into place new policies and programs that are setting the stage for new growth in U.S. agricultural exports. The administration is implementing those programs and taking action to fight unfair trade practices where they exist. The world trading community is about to enter into a new round of trade talks that may finally resolve many of the major disputes in agricultural trade. Just as we are on the verge of accomplishing something positive for the farmer, the majority's bill would destroy all that effort.

Those of us who represent rural and farming areas should carefully weigh the impact of H.R. 4800 on the farms and small towns of our districts before supporting this bill. Instead of creating a tool to repair the problems in American trade policy, the majority has fashioned a loaded gun pointed directly at the head of the American farmer. Those who care about the fate of the farmer must join me in opposing this ominous trade bill.

Mr. Chairman, I yield 2 minutes to the gentlewoman from Nebraska [Mrs. SMITH].

Mrs. SMITH of Nebraska. Mr. Chairman, I rise today to express my disappointment with the bill we are now considering. I have read many times the comments of some Members of this House that the trade bill before us is proexport, not antiimport. I only wish it were so.

Agriculture was tired of taking a back seat in trade negotiations. It has tired of suffering the backlash from protectionist moves designed to delay the inevitable transition of noncompetitive industries.

We are now discussing the agricultural trade provisions of the bill. If my colleagues want to see some proexport language I commend these sections to them. It is a pity that such laudable goals are completely buried in the overall mean spirited, protectionist tone of this bill. This bill does not just close the door on some of this country's most valued agricultural customers, it slams it in their face, and locks our farm economy out in the cold.

Ninety-five percent of U.S. international trade is waterborne according to the National Association of Stevedores. If you have any doubts that this bill will result in less, not more trade, you need only to look to the Stevedores' opposition to it.

A trade deficit of $148.5 billion is unacceptable, but our Nation, farmers should not have to bear the burden of Congress' frustration with trade law enforcement.

The bill uses the meat ax rather than the scalpel in attempting to remedy problems in U.S. trade laws. The bill would require that the President act by whatever means to cut United States trade deficits with Japan, Taiwan, and West Germany by 10 percent each year. Those three countries accounted for 32 percent of all U.S. farm exports in 1985. The U.S. agricultural trade surplus would have disappeared if those countries had turned to other suppliers last year; $9.3 billion in lost sales.

You can be sure that those nations would turn to other markets. I am sure you all remember the disastrous consequences when the Chinese cancelled $500 million in United States wheat purchases when we restricted $37 million in textile imports. It would happen again.

Another section of the bill makes foreign labor laws a subject that could be cited as an unfair trade advantage. Action under such a statute would constitute foreign meddling beyond anything the American people would accept, and it is naive to believe that it would have any positive effect on policy in the affected countries. This provision would strike hard at the less developed countries. In 1985 these countries bought nearly $12 billion in U.S. farm exports; 41 percent of our sales.

Combining these two provisions lets you see that this bill has huge potential to anger countries buying $21.3 billion of farm products, or 73 percent of our total farm exports in 1985.

Not only is this bill antiagriculture, it is antilabor. Retaliation from our trading partners would result in longer unemployment lines, not shorter. America's exporting and construction industries would suffer, as would manufacturers who rely on imported imputs.

As an example of the bill's potential impact on American jobs, let me cite a study done by a coalition dedicated to stopping wood tariffs. According to those figures, action against Canadian softwood imports would result in a net gain of 511 jobs in 4 States while resulting in a loss of 27,381 jobs in the rest of the country.

This does not mention that the housing industry calculates lumber action moves would drive up the price of an average home more than $1,000. A $1,000 rise in home costs will drive 300,000 people out of the housing market.

Congress is knocking at the wrong door on this issue. Most experts in the field acknowledge that even if every barrier and tariff and unfair practice that the United States objected to were removed, our trade deficit would only fall by 20 percent. More important to the problem of trade imbalances are the value of the dollar and the United States budget deficit.

The bill's proponents have missed the boat on this issue. Not only have their monetary reform proposals been outdated by Secretary Baker's successes, but in an attempt to do something anyway the bill requires that the Treasury establish the same exchange rate targets that Secretary Baker has rightfully avoided because they would be destabilizing and unsustainable.

Since last April the dollar has fallen against every major currency; down 18 percent against the pound, 25 percent against the franc, 28 percent against the mark, and over 33 percent against the yen. Achievements in this area cannot be denied. Secretary Baker not only persuaded the industrialized nations to join us in lowering the value of the dollar last September, but was able to get a commitment for future monetary stabilization at the Tokyo summit.

The force of the fall of the dollar cannot be overlooked. Japan is the largest buyer of United States wheat and corn. When the combined effects of the reduced loan rate and the falling dollar are felt in Tokyo this fall, the Japanese will only be paying half of what they had to pay for corn and wheat in the fall of 1985. This is most certainly going to increase exports of these products.

When the bill's sympathizers discuss their reasoning you can hear them say the dollar is down 30 percent, but we are still facing record trade deficits; the dollar must not be the problem.

I want to remind my colleagues that it was only last September 22 that the group of five met at the Plaza Hotel in New York City and agreed to a policy to bring down the value of the dollar. Secretary of Commerce Baldrige announced to the Foreign Affairs Committee of this House that the U.S. trade deficit for this year would probably fall only slightly, if at all, this year due to the backlog of orders and inventory that delay the effects of the falling dollar. Impatience should not undermine real tangible steps toward solving a large part of our trade problems.

There seems to be enough support for this bill to carry it out of the House. That is regrettable. The administration seems ready to promise a veto. I can only hope that it happens quickly so that this Congress can have an opportunity to seriously address proposals to enhance our country's ability to compete in an international market.

Mr. MADIGAN. Mr. Chairman, I yield 3 minutes to the gentleman from Oregon [Mr. ROBERT F. SMITH].

Mr. ROBERT F. SMITH. Mr. Chairman, I rise to oppose this legislation.

They say that those who don't learn from history's mistakes are destined to repeat them. If this bill becomes law, we'll prove that wisdom of the ages.

In the history of American economic troubles, there is no disagreement that the Smoot-Hawley Act of 1930 was a landmark mistake. Its credited with pushing hard economic times into a full-blown Depression.

Mr. Chairman, Smoot-Hawley was passed in a fit of protectionism very similar to the mood in this Congress today. It added a 25-percent tariff on all goods imported for sale in America.

Today, I'm seriously concerned that Congress could be so swept up in its own political vanity that it would buy a crusader's label at the risk of another Smoot-Hawley Act, and at great risk to America's competitive position in overseas markets.

I certainly hope that couldn't happen, but what I see in this bill is not reassuring.

The one single, critical, overriding lesson from Smoot-Hawley and other similar measures is that, in international trade, you can't keep out theirs and let out ours.

Sponsors of this legislation say, as they did on another unwise bill just months ago, that America needs to erect tall fences to protect American business and industry from extinction at the hands of cheap foreign imports.

The battle cry is that "American industry should not be driven into domestic production oblivion."

Fighting foreign trade practices with threats is one thing. But doing it with real quotas, tariffs or legal barriers is dangerous at best. And our international trade adversaries see it as warlike at worst.

There is not a member of this House who can deny that, just like in real war, when one side fires its protectionist cannons, the other guy shoots back.

In international trade, retaliation comes in the form of new restrictions or boycotts on American products.

Certainly, as a Representative of the State of Oregon, my first concern is that this bill will hurt my district drastically. It can virtually kill our business with the Pacific Rim Nations.

Two of the nations targeted by this bill, Japan and Taiwan, are the 2d and 14th largest buyers of American wheat, representing exports that amount to $872 million.

If Northwest wheat farmers are to sell their products, they must export. Fully 85 percent of the wheat produced in this region must be exported because domestic utilization of white wheat, produced predominately in the Northwest, accounts for only 15 percent of total production.

The overvalued dollar caused by congressional overspending has already taken its toll on wheat producers in the Northwest; additional impediments to trade would be disastrous.

But even if Oregon's products aren't legislated off the market in those countries, our sales will suffer the lack of dollars to pay for them.

Oregon may be first to feel the retaliation, but history tells us the entire Nation will feel the sting of international trade wars.

There is no denying the political enticement of a protectionist's siren song. There are many even in Oregon, where our timber industry has been so brutalized by Canadian imports, who cheer this kind of bill's "Stop 'em at the Border" tough talk.

I can certainly understand that nearly every congressional district either has a problem with foreign imports now or it has a nervous blue-collar constituency that believe a problem is on the way.

The political popularity of any "protection-from-imports bill," is obvious.

But I insist that we must resist the "do-something quick" frenzy this bill promotes. We'll pay dearly tomorrow for basking in the glory of the crusade today.

The natural question for anyone like myself is, "What do we do instead?" I know that there are plenty of things we shouldn't do. This fence-building is one of those things.

Every fence we build to keep "them" out also keeps us in.

I know that we can help our own exporters produce and market their products. I know that we can bring down the value of the dollar. I know that we can encourage them to promote and research and sell more vigorously.

We can help by insisting that America's voices are more adamant, more insistent on protection of American concerns in multinational negotiations and less willing to back down in the face of an adversary.

We can insist that the President be willing to play the same international trade hardball as our competitors.

We can help the administration, the trade representatives, the executive agencies and the courts to more quickly and more positively interpret and enforce the laws we already have on the books, the ones that are there to specifically counteract and stop competitors' abuses of free trade.

Most of all, though, we can avoid hobbling American business or forcing them to conquer even new trade barriers by resisting the urge to put our own up right now, right here.

The best response to America's trade deficit is to encourage American industry, American farmers, American business.

There are no flashy congressional actions that will ever replace tough negotiations, wise marketing, and hard work, by producers and government alike.

If we really want to help, let's get out of their way.

Let's not forget the lessons of Smoot-Hawley. Most of all, let's not repeat the mistakes of history.

□ 1650

Mr. MADIGAN. Mr. Chairman, I yield such time as he may consume to the gentleman from Dodge City, KS [Mr. ROBERTS].

Mr. ROBERTS. Mr. Chairman, I would like to think a problem of this magnitude could be addressed with bipartisan reason.

What we have before us, however, is the product of politics, not economics. I do not mean to perjure the intent of anyone in this body. But, Mr. Chairman, this is not a trade act. This is a trade show. The legislation before us should be entitled "The Get Tough on Trade Policy, Full Opportunity Press Release Act of 1986."

If we must push into a highly charged, partisan battle beneath banners reading "Fair Trade" and "Buy American or Bye, Bye," let us make sure that we do not jab the bayonet into our own heart.

Mr. Chairman, the contents of this legislation and the conditions framing this debate are truly galling.

Every Member of this body knows exactly why the trade deficit exists. We have persisted in spending beyond our means, borrowed from abroad at high rates of interest, driven up the value of the dollar, decreased our competitiveness on world markets and in-

creased the relative price attractiveness of imported products here at home. Indeed, we have met the enemy and he is us.

But in Congress we do not want to take the blame for the fruits of our shortsighted excesses. We cannot admit we created the budget deficit which, in turn substantially increased the trade deficit. Therefore, it only seems fitting in the twisted logic of this debate to point the finger of blame at our trading partners and President Reagan.

Likewise, we all know but choose not to admit the simple fact that protectionism, lack of market access to American goods, or whatever you may want to call it is not the basic cause of our trade problems. While it won't read well in the press releases or sound good at the press conferences, the fact is that even if the world's markets were all totally and completely open to our products, the United States would see a reduction of only 10 to 20 percent in the trade deficit.

While the dollar has fallen significantly in recent months, the drop has not had time to work its way into the trade figures. Rather than allowing real market forces to work and foreign goods to become more expensive in American markets and American goods to become less expensive on the international market, the proponents of this hastily drawn and poorly conceived bill wish to try to score a few political points and snatch defeat from the jaws of victory.

Mr. Chairman, I keenly share the frustration and anger of those whose lives and livelihoods have suffered as a result of the trade deficit. I know all too well the pain that results from living in and representing an economically hard-pressed area. In my own district the oil economy is in the depths of a depression and the farm economy continues to suffer. While I am hopeful the farm bill will be one positive factor in restoring price and profit to agriculture, there are other factors to consider.

There is no question that any legislation that restricts imports will restrict exports. Suffering as they are, exports are quite simply the lifeblood and stock-in-trade of the American grain farmer. As a matter of fact, in my district the production from 1 acre in 3 has to find its way to the world grain market.

I am not happy with the administration's trade policies per se, but this is no way to go about improving that policy. The new farm bill contains important new trade provisions. They are unique and they are bipartisan. We should be working to make sure the appropriate trade officials implement the bill's discretionary terms. That is the real answer, the practical approach.

But beyond my own parochial interests, the best anyone can hope for from this restrictive legislation is a transfer payment from one sector of our domestic economy to the other. At worst, we can expect that the suffering of some sectors will lead to the suffering across the board as the 5 million Americans whose jobs depend on exports lose work.

Yes, Mr. Chairman, during a time of adversity throughout rural America, the likes of which we have not experienced since the Great Depression, it is a time for action. But, Mr. Speaker, it is also a time for candor.

The only place this bill is going is into too many stump speeches this fall. We all know this bill is headed for a veto, with enough time of course for everyone to issue at least 10 press releases urging the President to get tougher than Matt Dillon on Front Street and then 10 more giving him "Holy Ned" when he doesn't. Yes, that's the stuff; it makes great headlines. In the end result, we have empty promises and fingers of blame and, if not vetoed, a trade war that will make the Carter grain embargo look mild in comparative damage.

Go down the contents of this bill. If it is not a sense of Congress section expressing a goal second only to motherhood; it is a directive mandating virtually every Federal agency dealing with trade to report back to the USDA or the Congress every third foggy night. Almost every commodity group wrote its own platform.

We already have a good trade section in the new farm bill. We have already beaten up on the administration for preaching free market without proper policy follow through. As this bill says, we are awaiting the findings of the Agricultural Trade and Export Policy Commission. If you need a laundry list to campaign with, use that one; it will be a good one.

Mr. Chairman, I don't know what upsets me more: Those in the administration who have consistently dragged their heels on implementing an aggressive trade policy, or those here in this body who always seem to perfer an issue to a bill—a real bill. This bill, at best, is a political document that promises more than can be delivered. At worst, it is a grab bag of demagoguery from a bunch of economic ambulance chasers at a time when farm country deserves and needs much more.

Mr. DE LA GARZA. Mr. Chairman, I yield myself such time as I may consume in order to conclude.

Mr. Chairman, I stand in a very hard situation here, in one respect, that there is a train leaving the station and, regardless of the sentiments of some of my colleagues, it is a vehicle which is going, I do not know where the end is going to be, but as being responsible for activities in part shared with my distinguished colleague from Illinois and members of the committee, we had to choose. Do we have a vehicle on that train or not? We went the usual way which we do in our committee and acted as responsibly as we could regardless of the political side of the aisle. We acted as we ordinarily do in a bipartisan or nonpartisan way.

The main problem that we had was some of the areas of major concern to us are the jurisdiction problems with other committees. We took the road that, if they were not blatantly infringing on another committee's jurisdiction, we would incorporate it into what we submitted and then allow someone else to make that decision. This was done. This was done in areas that we had that were constructive and could prove to be helpful, were incorporated into the Foreign Affairs Committee section or into the Ways and Means Committee section.

Now opposition to the bill per se, that is in each individual's responsibility and right. The agricultural sector, of which we took from whatever resources we had including some advance notice from the Agricultural Trade Commission that my colleague from Illinois mentioned, and incorporated it as best we could. It has been said by myself and others, and I assure you that it is correct, that we have some basic tools that we had in the 1985 Food Security Farm Act. But we could not stand aside and not address as best we could the issue of trying to enhance the position of agriculture and of our producers that are suffering so vastly. I would feel that it would be of great pride to the members of the Agriculture Committee that our section was incorporated by the minority leader in his version that he will submit later, except in two instances. That would prove very conclusively that the work done by the Agriculture Committee was responsible, is fair, is equitable and hence would not have been incorporated by Mr. MICHEL into his vehicle.

Therefore, we now have a position where the Agriculture Committee, having done the responsible thing, would have it in two basic sections, either in the main legislation or in an alternative piece of legislation that will be submitted at a later point. Hopefully, that which we have responsibly suggested to be incorporated into this measure might prove to be of help.

Mr. MADIGAN. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I would be happy to yield to the gentleman from Illinois.

Mr. MADIGAN. I thank the gentleman for yielding.

Mr. Chairman, I want to repeat what I said in my opening remarks, that the gentleman from Texas does an outstanding job in everything that

he does and that this speaker, and no speaker on this side of the aisle, raised any objection to what is contained in this bill with regard to the product from the gentleman from Texas' committee, the House Committee on Agriculture. What we object to is inclusion of it in this horrible bill.

Mr. Chairman, I thank the gentleman for yielding.

Mr. DE LA GARZA. I thank the gentleman. He has indeed clarified more forcefully than I could have that what we did was the responsible thing to do. We put it on the train that is leaving the station. Agriculture is in such a stage that we cannot pass up an opportunity to try to assist. This is just another opportunity. Hopefully, the rhetoric that we have heard today will fall by the wayside, and that both sides will get together, we will agree on some compromise down the line in conference committee and do a little bit more, a little bit more for agriculture that yet needs so much.

Mr. Chairman, I yield back the balance of my time.

Mr. PANETTA. Mr. Chairman, I support the development of an American trade policy that will promote the unimpeded growth of the international trading system. Although that statement may seem somewhat facile in the context of today's debate, as recently as a year ago, the notion was not a given. There has been a fundamental change in thinking about trade over the last year, not only in Congress, but within the administration, in business, labor, and education circles, and among the general public as well. Record breaking deficits have forced trade onto the front burner, and an overall general concensus has evolved around the need to formulate some kind of a coordinated response to the problem. The specifics of any such response are obviously still the subject of much debate, yet the fact that they are being debated at all represents a triumph in and of itself.

Last year at this time, America was undergoing a rude awakening to the harsh realities of unprecedented trade deficits, with voices rising in calls for domestic protection, import surcharges, neo-Smoot-Hawleyism, and various degrees of Japan-bashing. While such rhetoric has become outmoded, I think it is important to note why.

America has undergone a crash course in international trade and finance over the last year. We have become keenly—often painfully—aware of the impact of foreign trade on our everyday lives. We have acquired a certain level of sophistication about the causes of our trade imbalances. Even the President now admits that the grossly overvalued dollar is largely responsible for the deficits, after more than 4 years of denying any connection. Moreover, the administration has finally acknowledged that the problem will not simply disappear by itself, and, under intensified public and congressional pressure, has belatedly begun implementing reforms.

Business, as well, has responded to the challenge. Industries are taking bold new steps to improve productivity and enhance their international competitiveness. All across the Nation, we find innovative new approaches to adjusting to a more competitive world, including management techniques, business-educational-labor partnerships, retraining programs, and greater use of advanced technology.

The implications of America's increasing intolerance for escalating trade deficits have not escaped our trading partners either. Foreign governments have reluctantly begun to assume part of the responsibility for the imbalances, and are demonstrating a willingness to work together to restore integrity to the international trading system.

These initial steps, while encouraging, are not sufficient in and of themselves. America desperately needs to develop an overarching trade policy, which will provide the framework for future reforms. The complexity of the problems facing us is overwhelming. The overvalued dollar has been the chief but not the sole culprit. Other factors will have to be considered in reorienting America to the new international economy, including export enhancement, multi- and bi-lateral agreements and negotiations, fiscal and monetary policy, tax incentives, R&D, international debt, domestic trade law and its enforcement, productivity, industrial competitiveness, domestic and foreign governmental regulation, interest rates, adjustment assistance programs, education, technology transfer, marketing strategies, and national security. The list goes on and on.

Obviously we cannot make decisions in each of these areas in a vacuum. We must have some higher vision of where we are headed, what we hope to achieve, and why. We must be aware of the interrelatedness of our actions. We must be sure that in repairing the faucet we do not destroy the sink; that the left hand does not demolish what the right has so carefully built up.

It is for precisely these reasons that I have long advocated the adoption of a comprehensive trade policy. Last fall, I joined a number of my colleagues in introducing the Competitive America Trade Reform Act, many of whose provisions are included in today's bill. While I am under no illusions that we can legislate the deficit away, I do believe that we need some kind of overall policy direction.

The bill before us is by no means perfect. Nor is it in anywhere near final form. I have particular concerns about some of its provisions, as I am sure many Members will. I am particularly troubled by attempts to link retaliatory action to arbitrary trade surplus levels with individual countries, or to impose unilaterally new standards of unfair trade practices. Such moves could easily precipitate retaliation, inflaming strained trade relations and causing undue damage to third party domestic industries.

Nevertheless, I support this legislation because in the final analysis it is a proactive attempt to reorient America to the new international marketplace. It deals with everything from the immediate need to close up loopholes which have allowed foreign competitors to violate intellectual property rights, to long term strategies to prepare America's children for a world vastly different from the one their parents have known. In laying out policy, the bill does not neglect to look at trade's impact on such sectors as agriculture, labor, the developing world, foreign affairs, education, R&D, industry, consumers, and national security. It adopts a coordinated, broad-based approach to a complex problem for which there are no simple solutions. While we can and will argue about the specifics of the plan, we need to act, and act now. The trade deficit will not disappear on its own. America must respond to the challenges that lie ahead, and, in the absence of leadership from the executive branch, Congress should lead the way.

I would like to take a moment now to focus attention on three particular aspects of trade reform legislation which should not be overlooked. First, let me point out the critical importance of free and fair trade to our agricultural sector. American farmers export a full 40 percent of their production. Yet over the past 6 years, foreign markets have shrunk rapidly, in part due to the debt crisis which is squeezing the economies of much of the developing world. Moreover, because agriculture does not currently fall under the auspices of GATT, there is no formal framework in which disputes between nations can be resoloved. The lack of a multilateral agreement regarding agricultural trade has also meant that, more often than not, American farmers find themselves the innocent victims in bilateral trade wars that have absolutely nothing to do with them. They are easy targets for retaliation.

The agricultural community has a particularly keen interest in maintaining an open and expansive international trading system and in pursuing economic policies that will promote market growth and monetary stability. The legislation under consideration would point us in that direction. Negotiating authority would be provided for the President to enter into a new GATT round with a specific objective of extending its mandate to agricultural trade. An amendment which I offered to the Agriculture Committee's bill would improve upon an agricultural export enhancement program that was initiated in the 1985 farm bill, and would help to make U.S. exporters of agricultural commodities more competitive. In addition, the bill before us strengthens and expedites the process through which domestic producers can obtain relief from unfairly traded imports, which will be extremely important for certain agricultural sectors.

The second aspect of the bill that I would like to emphasize is its attention to the long-term need to reorient American society toward a more interdependent world. I have long argued for a greater emphasis in the United States on foreign languages and international education. I believe that Americans' inferior language capabilities and relative obliviousness to the nuances of foreign cultures has placed us at a dangerous disadvantage diplomatically, politically, strategically, and economically. The trade crisis has highlighted this shameful neglect, and if we continue to postpone corrective action we will undermine our future standing in the international marketplace.

The omnibus trade package includes measures to upgrade foreign language training in our elementary and secondary schools, and to establish summer institutes for students, teachers, and businesspersons which will emphasize languages and their links to interna-

71-059 O-87-37 (Pt. 8)

tional business affairs. In addition, the development of study abroad programs run jointly with foreign governments is encouraged in order to prepare a pool of professionals with the kind of solid intercultural experience which is so crucial to international competitiveness. Although often forgotten in discussions of trade enhancement, these educational initiatives are absolutely essential to our future economic well-being.

Finally, I would warn against complacency as far as the value of the dollar is concerned. Monetary interventionism has brought the dollar down from its dizzying heights of a year ago. However, let us not forget the fundamental cause of the dollar's escalation in the first place: our own Federal budget deficits provoked by this administration's reckless fiscal policy. Last week we passed a budget resolution which would substantially reduce deficits without extracting a disproportionate share of the sacrifice from any one sector of society. Yet the budget process has just begun. In the course of the long negotiations that lie ahead, the relationship between these dual deficits should not be forgotten.

I urge Members from both sides of the aisle to support this important piece of legislation. Unless we as a body take a leadership role in advancing America's trade policy, our economy will soon be outpaced by leaner, more forward-looking competitors. The challenge that lies ahead is also an opportunity. We can create a climate that will allow for both domestic and international economic growth and prosperity. Trade is not a zero-sum game. If we play our cards right, we can all be winners.

The CHAIRMAN. The time of the gentleman from Texas [Mr. DE LA GARZA] has expired.

All time for general debate under the control of the Committee on Agriculture having expired, general debate shall continue, with 30 minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce.

The gentleman from Michigan. [Mr. DINGELL] will be recognized for 15 minutes and the gentleman from Indiana [Mr. COATS] will be recognized for 15 minutes.

The Chair recognizes the gentleman from Michigan [Mr. DINGELL].

Mr. DINGELL. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to commend my colleagues, those on my committee, and the members and chairmen of the Committees on Ways and Means, Foreign Affairs, Banking, Education and Labor, Agriculture, Judiciary, and of course, my friends and colleagues on the Committee on Energy and Commerce.

The leadership is to be thanked and commended, I believe, particularly majority leader JIM WRIGHT because of his efforts to bring the Trade and International Ecomomic Policy Reform Act of 1986, H.R. 4800, to the House for its consideration.

Our current trade problems threatens the economic foundation of this country. While our trading partners have relentlessly pursued their economic self-interest in determining trade policies, this country has been hamstrung by an ideology referred to as free trade, which clearly ignores the realities in the world trading situation.

In 1985 our trade deficit was $148 billion. In 1986 it is anticipated to reach $170 billion.

More than $150 billion of the growth in our annual trade deficit has been racked up during this current administration. In just 4 years, the United States has gone from being a principal world supplier of capital goods to being a net importer. There has been almost no increase in American production of capital goods since 1981. Indeed the increase in domestic purchases of the past 4 years has been met almost totally, to the amount of 95 percent, by imports.

□ 1705

Most of the capital spending in the United States has been either in mergers and acquisitions—paper capital development—or in new manufacturing facilities—outside the United States, with jobs going elsewhere.

We now import vast quantities of manufactured goods, and we export raw materials and natural resources.

As a result, we are running up heavy debts around the world. In the first quarter of 1985, the United States became a net debtor country for the first time since 1914. By 1990, our international debt may exceed $500 billion. This would require a trade surplus of $50 billion each year just to pay the interest.

In the short run, this has turned the United States into a service economy and cost us over 1½ million manufacturing jobs. Declining U.S. agricultural exports have resulted in over 500,000 farm foreclosures since 1980.

In the long run, it will undermine our economic independence.

A service economy cannot survive without a manufacturing sector. Service and production industries are interdependent, and can grow over the long term only if they grow together.

Moreover, the situation is getting worse, not better.

The red ink of our trade deficit is not confined to the rust bucket and sunset industries. High technology, the panacea of the nineties, is losing, right now.

In high technology products, our trade surplus of $26.5 billion in 1980 has been cut by over 75 percent to $6.2 billion in 1984. In 1980, the United States ran a trade surplus in telecommunications equipment of almost $1 billion; 5 years later, we had a deficit of $1.1 billion.

The Trade and International Economic Policy Reform Act of 1986, H.R. 4800, is one of the most important pieces of legislation the House of Representatives will consider this Congress. It is comprehensive trade reform legislation which, if adopted, will lay the groundwork needed to address our growing trade problems.

Several provisions of the bill are of particular importance to the Committee on Energy and Commerce. First, included in the Energy and Commerce Committee title of the bill, title VII, is section 701 on the Foreign Corrupt Practices Act [FCPA]. Section 701 will give important and needed clarification to the provisions of the FCPA. This statute, which I am proud to say arose from our committee to the House in 1977 following investigations in the 94th and 95th Congresses by the Energy and Commerce Committee and Senate Committee on Banking, Housing and Urban Affairs, has dramatically reduced large-scale bribery of foreign officials by American companies. Subsequent investigations by the committee in the 97th and 98th Congresses, however, have uncovered a number of uncertainties about the implementation and enforcement of the law. Section 701 makes the needed statutory clarifications.

Consistent with the need to clarify this statute, and given that this legislation is being considered in a manner which did not allow the Committee on Energy and Commerce to file a committee report, I have attached to my remarks the joint statement of the Honorable JOHN D. DINGELL, chairman, Committee on Energy and Commerce, and the Honorable TIMOTHY E. WIRTH, chairman, Subcommittee on Telecommunications, Consumer Protection and Finance, Foreign Corrupt Practices Act Amendments, section 701 of title VII of H.R. 4800, omnibus trade bill. This statement, which includes the views of the Committee on the Judiciary as to provisions on Department of Justice guidelines and opinions, is the legislative history of the clarifying and technical amendments made by section 701.

A second title of the legislation, title II on International Trade in Telecommunications Products and Services, addresses the important, and growing, trade problems which this Nation is experiencing with telecommunications products and services. The title is based on H.R. 3131, reported by the Energy and Commerce Committee on January 30, 1986. Title II is a joint jurisdiction between the Committee on Energy and Commerce and the Committee on Ways and Means. Again, consistent with the manner in which this legislation has been brought to the floor of the House, a second attachment has been included with my statement which is intended to serve as the legislative history regarding this title of the bill.

The House can be proud of many other provisions of the legislation. Title I addresses the important problem of unfair trade barriers in a manner consistent with H.R. 3777, the Trade Law Modernization Act. This bill passed the Energy and Commerce Committee by a vote of 37 to 3, demonstrating the sweeping concern felt by many of the committee members. The amendments made by title I address problems related to the import of unfairly traded products into the U.S. market, damage to U.S. industries due to import competition, various dumping and subsidy practices by our trading partners, the protection of intellectual property rights, and other matters.

Title I also includes provisions to deal with multiple and repeat offenders of U.S. customs laws. It is designed to have a significant deterrent effect on those importers who already pay millions of dollars in customs fraud penalties, but violate these laws nonetheless. This provision, as do many others in the bill, implements recommendations of the members of the Oversight and Investigations Subcommittee of the Energy and Commerce Committee. It is based on over 3 years of investigations into these important issues, and is worthy of strong support by the House.

In conclusion, I urge my colleagues to support H.R. 4800, the Trade and International Economic Policy Reform Act of 1986. Its passage is vital to the future economic well-being of this country.

JOINT STATEMENT OF HON. JOHN D. DINGELL, CHAIRMAN, COMMITTEE ON ENERGY AND COMMERCE AND HON. TIMOTHY E. WIRTH, CHAIRMAN, SUBCOMMITTEE ON TELECOMMUNICATIONS, CONSUMER PROTECTION AND FINANCE

FOREIGN CORRUPT PRACTICES ACT AMENDMENTS, SECTION 701 OF TITLE VII OF H.R. 4800, OMNIBUS TRADE BILL

Mr. Speaker, the Foreign Corrupt Practices Act (FCPA) was passed in 1977 to address problems of large-scale bribery and improper payments to foreign government officials by some of America's biggest corporations. More than 450 companies were involved; friendly governments were undermined; and the scandal left American business with a black eye at home and around the world.

During the 94th and 95th Congresses, the Committee on Energy and Commerce and the Senate Committee on Banking, Housing and Urban Affairs held extensive hearings on the matter of undisclosed improper payments by American corporations and considered several bills designed to deal with the problem in various ways.

On May 12, 1976, the Committees received from the Securities and Exchange Commission (SEC) an extensive "Report on Questionable and Illegal Corporate Payments and Practices" (SEC report), which summarized the SEC's enforcement activities and findings to that date. That report traced the history of the SEC's investigations, which revealed the widespread misuse of corporate funds and questionable or illegal corporate payments. These undisclosed payments represented a serious breach in the operation of the SEC's system of corporate disclosure and, correspondingly, in public confidence in the integrity of the system of capital formation. The SEC report also analyzed the public filings of 89 corporations that had disclosed varying types of questionable payments, plus six special reports obtained as the result of SEC enforcement actions and the allegations made in eight additional cases in which the SEC had obtained some form of judicial relief. Finally, the report contained the SEC's analysis of the degree of disclosure required concerning questionable foreign payments under the existing Federal securities laws, and it outlined the legislative and other responses which the SEC recommended to remedy these problems.

As a result of this process, the FCPA was adopted in 1977 as an amendment to the Securities Exchange Act of 1934 with respect to issuers under the jurisdiction of the SEC, and as a free-standing requirement of federal law for domestic concerns and others outside the jurisdiction of the SEC.

The FCPA specifically prohibits the bribing of foreign government officials by U.S. companies and individuals. Civil enforcement of the Act rests with the SEC. Criminal enforcement of the Act, as well as civil enforcement over companies and individuals not within the jurisdiction of the SEC, rests with the Department of Justice. The SEC also enforces provisions of the Act requiring that U.S. public companies develop internal accounting control systems and keep accurate books and records.

It appears that the FCPA has dramatically reduced large-scale bribery of foreign government officials by American companies. It has worked well, largely because the vast majority of honest businesses in the U.S. have taken steps to comply with the law.

However, following passage of the FCPA, as companies attempted to understand the new law and implement procedures to ensure compliance with the law, a number of exporters began reporting to the Congress that the words of the law were unclear. For example, some feared criminal prosecution for inadvertent errors or negligence, as a consequence of the "reason to know" standard under current law for liability for payments made to third parties. Some exporters have advised Congress that they have withdrawn from some export activities where they could not ascertain whether certain situations might be construed as involving violations of the law. These situations range from the payment of travel expenses for foreign officials visiting the U.S. to inspect products and plant facilities, which clearly should be permitted and which a reasonable review of the law would permit, to payments made to foreign agents under circumstances that indicate an agent might pass on the payment as a bribe to a foreign official.

During the 97th and 98th Congresses, the Subcommittee on Telecommunications, Consumer Protection and Finance of the Committee on Energy and Commerce held a number of hearings on the impact of the FCPA on foreign relations and trade, and, with the Subcommittee on Oversight and Investigations of the Committee on Energy and Commerce, conducted extensive oversight of SEC and Department of Justice enforcement activities under the Act. That review showed that neither firms nor individuals were being prosecuted for inadvertent errors or negligence, but that enforcement under the Act was reasonable. In addition, the impact of the FCPA on exports could not be determined with any certainty.

It appears that the problems of most members of the business community are based on misperceptions about what the Act requires. For example, some businesspersons have argued that someone could "go to jail" for mere negligence if an agent passed a bribe to a foreign official. The legislative history of the FCPA clearly shows that such a result was not intended by Congress; an interpretation of the language of the law would not yield such a result; and the enforcement policies of both the Department of Justice and the SEC clearly would not encompass such a reading of the statute.

However, there continues to be uncertainty in the business community about the reach of the law. Indeed, it has been suggested that the restraints of the law may be greatest on the most scrupulous members of the business community, who may withdraw form situations in which they cannot proceed with certainty that a bribe will never be paid by subordinates.

Objectives of the Legislation

The fundamental purpose of this legislation is to clarify the FCPA's meaning and Congressional intent. It is the intent of the legislation that the vast majority of honest businesses be given clear guidance about the scope of the law, while the small minority of unscrupulous businesses are constrained by the law. This is accomplished through narrowly-drawn amendments to current law with clearly-defined terms. The legislation will enhance compliance with the law, will provide incentives for self-policing by businesses affected by the law, and will strengthen law enforcement under the Act.

Summary of The Legislation

The legislation amends Section 30A of the Securities Exchange Act of 1934 (15 U.S.C. 78dd-1) with respect to foreign corrupt practices by issuers, and makes parallel amendments to Section 104 of the Foreign Corrupt Practices Act of 1977 (15 U.S.C. 78dd-2).

The legislation clarifies standards of liability for illegal payments to foreign officials made through third parties by substituting for the current "reason to know" standard a "recklessly disregarding" standard for civil liability and a "knowing" standard for criminal liability. This essentially reflects current enforcement policies of the Securities and Exchange Commission and the Department of Justice.

The legislation makes clear that the prohibition under current law against payments to foreign officials for the purpose of obtaining or retaining business includes payments made to influence legislative, judicial, regulatory or other action.

The legislation makes clear that certain kinds of payments are not intended to be within the scope of the general prohibitions under the FCPA. These payments include those that are expressly legal by statute or regulation in foreign countries and payments for certain kinds of routine actions, such as processing work orders and loading and unloading cargoes.

The legislation also provides incentives for self-policing by business, by setting forth standards of due diligence to prevent and detect violations of the law by employees and agents.

Criminal fines for violations are increased under the legislation, and new civil penalties are created. In addition, the bill establishes procedures for the issuance of guidelines and statements of enforcement intention by

the Department of Justice to further enhance compliance with the Act and to assist small exporters who are unable to obtain specialized legal counsel.

Liability Provisions

Payments for the procurement of favorable legislative, judicial, regulatory or other action by a foreign government. The FCPA currently prohibits payments made by firms (issuers and domestic concerns) and individuals (officers, directors, employees, or agents, or stockholders acting on behalf of issuers and domestic concerns) to foreign officials and certain others for the purpose of influencing certain official acts or decisions, in order to assist the firm or individual making the payment in "obtaining or retaining business for or with, or directing business to, any person."

The legislation adds new language to make it clear that the prohibition under current law against payments to obtain or retain business includes payments made to assist in the "procurement of legislative, judicial, regulatory, or other action in seeking more favorable treatment by a foreign government." Payments of this nature are prohibited by current law; the language of the legislation makes this clear and will strengthen law enforcement and business compliance in this area.

Standard of liability for payments made through third parties. The FCPA currently prohibits improper payments made to (1) any foreign official, (2) any foreign political party or official thereof or any candidate for foreign political office, and (3) "any person, while knowing or having reason to know" that the payment would be offered or given to either (1) or (2).

The foreign payments scandals of the 1970's demonstrated a clear need for provision (3), above, barring bribes paid through third parties. There were numerous cases involving companies that used agents as conduits for illegal payments. In adopting the FCPA, Congress determined that it would not permit companies to do through agents what they could not do directly or otherwise to take a "head in the sand" approach and attempt to remain free from liability.

However, the "reason to know" standard under the current law has been criticized as unclear. Although this formulation is found in other federal statutes, the meaning of the language under the FCPA is not defined in the statute, and there have been no judicial interpretations of the language under the FCPA. Some businesses interpret the standard as tantamount to "reason to suspect" that an agent will pass on a bribe, or a negligence standard, and may consequently withdraw from legitimate activity. Clearly such an interpretation was not intended by Congress in adopting the language and does not reflect the current enforcement policies of the SEC and the Department of Justice. Accordingly, the legislation clarifies the standards for third party liability in keeping with the original intent of the Act and current and appropriate enforcement policies.

The legislation does not change the standard of liability for payments made to (1) foreign officials or (2) foreign political party officials or candidates. With respect to payments made through third parties, the legislation clarifies the standard of liability by setting forth specific standards for civil and criminal liability under the Act. A firm or individual is subject to civil liability if it makes a payment to any person "while knowing, or recklessly disregarding" that all or a portion of the payment will be passed on to a foreign official or to a foreign political party, official or candidate for the purposes stated in the legislation. A firm or individual is subject to criminal liability if it makes a payment to any person while "knowing" that all or a portion of the payment will be passed on to a foreign official or foreign political party, official or candidate for the purposes stated in the legislation. The terms "knowing" and "recklessly disregarding" are defined in the legislation.

The statutory change makes it clear that mere negligence will not give rise to a civil prosecution under the FCPA. There must be a showing of reckless disregard or knowledge. This reflects current enforcement policies of the SEC and the Department of Justice. The statutory change also makes it clear that neither mere negligence nor reckless disregard will give rise to a criminal prosecution under the FCPA. In order to bring a criminal prosecution for violation of the third party payments provision, a showing of knowledge as defined in the Act would be required. This also reflects current enforcement policies and interpretations of the SEC and the Department of Justice.

Definitions of Recklessly Disregarding and Knowing

Knowing.—The definition of "knowing" is intended to make it clear that a "head in the sand" approach to the payment of bribes through third parties will not be tolerated. Knowing is therefore defined to include conscious disregard of a high probability that a payment to a third party will be transmitted by that party to a foreign official or to a foreign political party, official or candidate for a prohibited purpose.

Recklessly disregarding.—In addition, the definition of "recklessly disregarding" is intended to encourage self-policing by business. Recklessly disregarding is therefore defined to include awareness of a substantial risk that a third party will transmit a prohibited payment, and disregard of that risk.

Defenses

Payments for expediting or securing the performance of a routine governmental action, not including the award or continuance of business, or the procurement of favorable legislative, judicial, regulatory or other action.—The legislative history of the FCPA states that certain kinds of foreign payments are not intended to be covered by its prohibitions. The legislative history states that the Act "does not . . . cover so-called 'grease payments' such as payments for expediting shipments through customs or placing a transatlantic telephone call, securing required permits, or obtaining adequate police protections, transactions which may involve even the proper performance of duties."

As the 1977 House Report made clear, although such "grease payments" may be reprehensible in the United States, they may be a way of life in other parts of the world. In some cases, small payments may be demanded by relatively low-level foreign government employees before they will even properly perform the duties for which they are responsible, such as processing applications.

The definition of "foreign official" under the FCPA was intended to further distinguish payments of this nature. The FCPA explicitly states that the term "foreign official" does not include "any employee of a foreign government or any department, agency, or instrumentality thereof whose duties are essentially ministerial or clerical." The legislative history notes that "in defining 'foreign official,' the Committee emphasizes this crucial distinction [between prohibited payments and 'grease' payments] by excluding from the definition of 'foreign official' government employees whose duties are essentially ministerial or clerical."

The policy adopted by Congress in 1977 remains valid, in terms of both U.S. law enforcement and foreign relations considerations. Any prohibition under U.S. law against this type of petty corruption would be exceedingly difficult to enforce, not only by U.S. prosecutors but by company officials themselves. Thus, while such payments should not be condoned, they may appropriately be excluded from the reach of the FCPA. U.S. enforcement resources should be devoted to activities having much greater impact on foreign policy. Thus, payments for activities such as the awarding of contracts and procurement of favorable legislation or favorable judicial or regulatory treatment should be proscribed, as the FCPA now provides.

However, there has been some criticism that the current statutory language does not clearly reflect Congressional intent and the boundaries of prohibited conduct. Critics have complained that "grease" payments are not clearly excluded, because the payments are defined primarily in terms of the official receiving the payments (one whose duties are "essentially ministerial or clerical"), instead of the purpose of the payment. The statutory change that would be accomplished by the legislation will reflect current law and Congressional intent more clearly.

The legislation states that it shall be a "defense" to actions brought under the FCPA that a payment was made "for the purpose of expediting or securing the performance of a routine governmental action by a foreign official." The legislation would further provide that the term "routine governmental action" means an action which is ordinarily and commonly performed by a foreign official, including processing governmental papers, loading and unloading cargoes and scheduling inspections and actions of a similar nature. The legislation further makes it clear that the term does not include "any decision by a foreign official on the question of whether, or on what terms, to award new business to or to continue business with a particular party, or the procurement of legislative, judicial, regulatory, or other action in seeking more favorable treatment by a foreign government."

By describing the type of conduct that falls within the FCPA prohibitions, as well as the type of conduct that is outside the scope of the FCPA, the law will give business greater guidance so that responsible businesses will be better able to police their own activities.

In determining whether the defense provided under this paragraph is met, a court may consider whether payments ostensibly for "routine governmental action" are a subterfuge for other prohibited payments. Thus, it may determine that a payment which is unusually large in relation to the "governmental action" performed may not fall within this defense. It may also consider whether the foreign official receiving the payment is in a position substantially to influence the question of whether, or on what terms, to award new business to or continue business with a particular party, or to influence legislative, judicial, regulatory, or other action.

Payments expressly permitted under a law or regulation.—The legislation also provides

that it will be a defense to actions under the FCPA that a payment is expressly permitted under a law or regulation. This also clarifies the intent of the law and current enforcement policies. The term "expressly permitted" means that the propriety of the payment must be reflected under some written law or regulation. It is intended that the specific law or regulation permitting the payment and its applicability to defendant's actions must be shown by the defendant.

In determining whether the defense provided under this paragraph is met, a court may consider whether a payment which is "expressly permitted" under a law or regulation for a certain purpose is, in fact, made for a different, prohibited purpose. For example, while it may be legal in some countries to hire and pay a salary to a foreign official serving as an agent, a court may determine that a salary which is unusually large in relation to the service performed may not fall within this defense.

Vicarious Liability; Due Diligence Defense

Under current law, under appropriate circumstances, a firm may be held vicariously liable for violations of the FCPA by employees or agents. This is the proper result, because firms should be responsible for taking appropriate steps to prevent violations.

The lack of enforcement resources at the SEC and the Department of Justice make it clear that the enforcement agencies are able to detect and pursue only a small number of violations of the FCPA, as is true of violations of many other statutes. Consequently, enforcement agencies under this statute, as well as many others, must depend upon the deterrent effect of the law, and, more important, self-policing by responsible businesses.

The legislation establishes a new, "due diligence" defense for civil and criminal liability of issuers and domestic concerns for violations of the FCPA by employees and agents. It provides that if the issuer or domestic concern has established procedures for detecting violations, and if the officers and employees with supervisory responsibility for the employees or agent violating the law have exercised due diligence to prevent the violation, then no vicarious liability will apply. Of course, supervisory responsibility for the actions of a particular employee or agent may be exercised by many officials in an organization and can include, for example, the general supervisory authority of high level corporate officials. The requirements must be established by a preponderance of the evidence.

Although "due diligence" is a familiar concept under the Federal securities laws, the legislation does not specifically define the term. It is intended that would constitute "due diligence" would be a factual determination by the trier of fact and would vary depending upon the particular circumstances of the transaction at issue. Due diligence might include many of the steps currently employed by firms seeking to comply with current law: regular training and updating of all levels of involved corporate personnel; independent investigation of the background and reputation of agents and other participants in the transaction; contact provisions obligating the parties not to violate the Act and voiding the contract if the Act is violated; a right to perform a full or partial audit of the books of agents or other transaction participants; disclosure of the existence and terms of agency relationships to the foreign government purchaser; periodic compliance certifications by corporate personnel and participants; and independent opinions of local counsel that local law will not be violated by any part of the transaction.

The scope of due diligence may also vary according to the circumstances of the transaction. Many companies seeking to comply with current law, for example, have indicated that certain factors, such as those set forth below, may indicate the need to undertake additional inquiry on the part of corporate officials:

Any unusual proposal relating to the method of payment to any participants in the transaction, particularly through third countries or in currency;

Any known or suspected family relationship between any participants in the transaction and any foreign government official;

Refusal by any participants in the transaction to sign affidavits or make representations that they will not violate the FCPA;

the size of the commission paid to the agent in relationship to the services performed;

any known or suspected misrepresentations by the agent or others in connection with the proposed transaction;

requests by any participant in the transaction that the company prepare false invoices or any other type of false documentation; and

any negative information developed as part of the independent investigation into the activities and reputation of the agent or other participants in the transaction, including any information developed regarding the financial interests of any foreign government officials in any companies participating directly or indirectly in the transaction.

The size of the company and the resources available to it may also be considered in determining the scope of the due diligence steps. For example, many large multinational companies have the capacity to place corporate officials in foreign countries, while many smaller exporters must rely almost exclusively on foreign agents. In many cases, it may be impossible for an exporter to determine with absolute certainty that an agent will abide by the law. In meeting the defense under this section, it must be shown that reasonable steps were taken.

It is perhaps most important that firms create an environment which fosters good business practice and compliance with the law. In this connection, employees and agents should be encouraged to comply with the law and to report factors that may indicate improper behavior.

Guidelines and Opinions

In order to enhance compliance with the provisions of the FCPA, the legislation establishes a procedure for the Department of Justice to issue guidelines and opinions.

In 1980, and pursuant to the general powers given the Attorney General to enforce the criminal laws of the United States, 28 U.S.C. sec. 509-10, the Attorney General promulgated regulations to clarify the then "informal" procedures of the Department of Justice (Department) in reviewing prospective conduct under sections 103 and 104 of the FCPA, 15 U.S.C. sec. 78dd-1, 78dd-2. The legislation contains provisions that establish a statutory scheme based on many of the same features of the business review program set up by the 1980 regulations. To the extent that the statutory scheme conflicts with the procedures set up by the 1980 regulations, the statutory language takes precedence.

The legislation provides that issuers and domestic concerns may submit information on prospective conduct to the Attorney General, who within 30 days must issue an advisory opinion as to whether the disclosed conduct is in conformance with the Department's present enforcement policy regarding compliance with the FCPA. The Attorney General's determination that disclosed conduct comports with Departmental enforcement policy creates a rebuttable presumption of compliance with the statute, which can only be overcome by a preponderance of the evidence.

Much attention was given to the function of the Department in issuing opinions to private parties submitting information on prospective conduct. The language is drafted to avoid an inference that the opinion of the Attorney General is "final or binding" on the Department or that disclosed conduct receiving an initial 30-day approval is exempt from later challenge based on other information. The FCPA disclosure system thus comports with other business review programs at the Department in establishing a procedure that may be of assistance to business planning without constricting the Department's ability to take any enforcement action that it deems necessary.

Businesses submitting information for review may rely on the Attorney General's determination to the extent that their future conduct falls within the scope of the disclosed information. Additional disclosures for new or different business activities may further widen the scope of conduct deemed presumptively valid if later challenged. But it is the submitting business, and not the Attorney General, that posseses the knowledge of whether its prospective conduct comports in fact with the disclosure made to the Attorney General. All that the Attorney General may do in these circumstances is to state whether the disclosed conduct, as provided by the submitting parties, comports with the Department's present enforcement intention. Should evidence of noncompliance with the FCPA later arise, the enforcement agency could then guage whether disclosure was sufficiently accurate and complete to warrant further measures. If so, the federal courts will be the final arbiter of whether the statute was violated.

It is intended that the opinion process will further clarify the Department's enforcement intention under the FCPA with respect to specific business transactions. It is not intended that this process be used to seek exemptions inconsistent with the fundamental purpose of this Act. The legislation further provides that the Department will establish procedures to maintain the confidentiality of documents submitted under this procedure. As with other business review programs at the Department involving export trading companies and joint research and development activities, these safeguards include protection against the release of disclosed proprietary information to private parties under the Freedom of Information Act and protection against any form of public disclosure by executive branch officials.

In order to enhance compliance with the provisions of the FCPA, the legislation establishes a procedure for the Department to issue guidelines describing examples of activities that would or would not conform with the Department's present enforcement policy regarding FCPA violations. As with other guidelines issued by the Department, the language makes clear that the guidelines do not by themselves establish the statutory standards by which courts, as the

ultimate arbiters of the Act, might judge conduct under the FCPA.

The legislation provides that the Department and the SEC shall provide timely guidance to exporters and small businesses who are unable to obtain specialized counsel with respect to compliance with the FCPA. It is intended that the SEC will make its views known as to whether it will be bound by the Department's enforcement intentions, as is its current practice.

VIOLATIONS

The legislation doubles the criminal fines for violations of the FCPA (from $1 million currently to $2 million.) The legislation also creates a new civil penalty of up to $10,000 for firms and individuals.

The violations provisions of the statute make it clear that the "knowing" standard for third party payments must be met before a criminal penalty can be imposed.

In addition, the legislation removes the implication under current law that a violation by an issuer or domestic concern must be found prior to imposing criminal penalties on employees or agents. This is particularly important in view of the new due diligence requirements, which would prevent a finding of a violation by an issuer or domestic concern under certain circumstances where the employee or agent violated the law.

TITLE II OF H.R. 4800, THE TRADE AND INTERNATIONAL ECONOMIC POLICY REFORM ACT OF 1986

PURPOSE AND SUMMARY

Title II of the Trade and International Economic Policy Reform Act of 1986 is designed to open foreign markets to U.S. telecommunications equipment and service suppliers rather than closing or inhibiting competition in the domestic American markets.

The legislation is aimed at achieving a more open world trading system for telecommunications products and services through negotiations and achievement of fully competitive market opportunities for U.S. telecommunications exporters and their subsidiaries in those markets in which barriers exist to free international trade.

While much attention has recently been focused upon the trade imbalance with Japan, the bill does not focus upon one market. Instead, it recognizes that efforts must be made in a number of foreign markets (including Western Europe and Canada, as well as Japan) that are currently characterized by pervasive government intervention which impedes the access of American telecommunications suppliers. Moreover, Title II of H.R. 4800 covers both telecommunications equipment and services such as the resale of private lines. By including services, U.S. service providers will be able to gain access to telephone lines for purpose of reselling them as part of a value-added network or some other value-added service offering.

The policy underlying the provisions of this Title is that negotiations are the preferred course to open foreign markets to U.S. suppliers. However, Title II provides that if the Trade Representative determines that a country is denying fully competitive market opportunities to U.S. suppliers and negotiations fail, then the President must take remedial measures to open the foreign market. Title II requires the President to take action which restricts or denies access to foreign suppliers of the foreign country. The President retains full flexibility in shaping the remedial measures imposed under Title II.

BACKGROUND AND NEED FOR THE LEGISLATION

Among the fastest growing areas of the international economy is the telecommunications equipment and services market. As of 1984, this sector of commerce amounted to nearly $325 billion and is estimated to reach $539 billion by 1990—growth of over eight percent annually.

The regulation of telecommunications equipment and services provided by both foreign and U.S. firms in interstate and foreign commerce is a major area of the Committee's jurisdiction. The Committee is greatly concerned that the increasing access that foreign firms have gained to our domestic telecommunications market has not been matched by fully competitive market opportunities for U.S. equipment producers and service providers abroad. This imbalance threatens the trade competitiveness of the U.S. telecommunications industry.

Telecommunications equipment

The United States balance of trade in telecommunications equipment has deteriorated significantly in recent years—from a surplus of almost $1 billion in 1980 to a deficit of $1.3 billion in 1985.

Between 1980 and 1984 imports of telecommunications equipment to the U.S. rose 166 percent while American exports in this sector of the economy increased just 40 percent. Specifically, imports from Japan increased by nearly 250 percent while U.S. exports to that country increased by about half that amount. Imports from Europe increased 90 percent while American exports to those nations only increased by 3 percent.

Moreover, for the first time in history, Japan has become the leading exporter of telecommunications equipment, capturing almost 21 percent of the world market in 1984. The United States fell to second place with about 12.7 percent of the market.

In addition to losing our position as dominant exporter in this area, the U.S. has experienced a higher rate of telecommunications imports than many other nations. Imports accounted for about 10.5 percent of American telecommunications consumption in 1983 while Japan imported only 1.4 percent of its equipment. Likewise, Canada and Europe just 8 and 6 percent, respectively.

The leading exporters of the world's telecommunications equipment are now the East Asian countries. In 1983, 75 percent of telecommunications imports to the United States came from the Far East—39 percent from Japan, 18 percent from Taiwan, 13 percent from Hong Kong, and the balance from Singapore, Malaysia and Korea.

The Committee believes that this deterioration in our telecommunications trade position is largely the result of two factors: barriers in foreign telecommunications markets—which prevent U.S. suppliers from exporting to foreign countries—and deregulatory changes in the U.S. domestic market, including the restructuring of AT&T—which allow foreign suppliers to sell freely in the U.S. market. These factors, among others, make the international telecommunications market unique.

The American telecommunications industry is the technological leader in the international telecommunications equipment market. Its products are of the highest quality and are available at competitive prices. Despite this technological lead, the United States exports only about 10 percent of its production, while accounting for nearly 40 percent of the global consumption in telecommunications. Japan, on the other hand, with less than 10 percent of the global consumption, exports about 22 percent of its production. Canada and Europe export about 21 and 19 percent, respectively.

U.S. telecommunications trade difficulties are not caused by any competitive weakness of U.S. industry. The problem relates largely to the imbalance between the openness of the U.S. markets and the lack of comparable openness in foreign markets.

The U.S. telecommunications market is by far the largest in the world, constituting nearly half of the global market in telecommunications. As a result of a number of deregulatory decisions, foreign businesses are now able to compete vigorously in the U.S. telecommunications market. Foreign multinational corporations have seized this opportunity and have quickly penetrated the U.S. market. This rapid increase of foreign suppliers in the American market starkly contrasts with the very slow progress of U.S. companies abroad.

Foreign markets in the industrialized nations remain largely closed to U.S. telecommunications products, reflecting factors such as the strong preference of foreign post and telecommunications authorities for their own home suppliers, "buy national" industrial policies, and a variety of tariff and nontariff barriers. Purchases in the market outside the United States are largely controlled by government procurements through government owned and operated Ministries of Posts and Telecommunications. Government procurements of telecommunications equipment account for almost 60 percent of the $33.8 billion equipment market outside of the U.S. Foreign governments have the ability and the willingness to use their procurement leverage to foster their national telecommunications industries to the exclusion of competitors such as United States suppliers.

Privatization and deregulatory initiatives have resulted in some progress towards providing access by U.S. telecommunications suppliers to markets in countries such as Britain and Japan. Yet, these measures have still not resulted in fully open and competitive markets.

Japan

Japan accounts for this country's largest bilateral trade deficit in telecommunications equipment. For this reason, U.S. negotiating efforts aimed at achieving greater market access for U.S. firms abroad have largely been concentrated on Japan. In 1985, U.S. officials became concerned that proposed new Japanese certification procedures for customer premises equipment (CPE), developed in conjunction with the restructuring of the Japanese telecommunications market, would reduce the access of U.S. firms to the Japanese telecommunications market. However, following an intensive negotiating effort, Japan agreed to new certification procedures for CPE which more closely resemble those used by the United States. However, it is still too soon to evaluate the impact these certification procedures will have—in practice—on U.S. suppliers.

Nippon Telephone and Telegraph (NTT), the Japanese government's telecommunications monopoly, still procures virtually all of its mainline telecommunications products from Japanese producers. The Committee hopes that NTT, in its procurement of mainline telecommunications equipment, will afford fully competitive access to U.S. suppliers. The Committee intends to monitor progress in this area.

The ability of U.S. suppliers to penetrate the Japanese telecommunications market is

not only limited by current NTT procuremen practices. In addition, Japanese procedures with respect to radio communications equipment certification, licensing for services, and frequently allocation have had the effect of impeding the sale of U.S. products. Government-wide attention and effort by the United States has resulted in recent progress in resolving these problems. Nevertheless, firms account for only about two percent of Japan's $4 billion telecommunications equipment market.

The telecommunications market access problem confronted by U.S. firms is not limited to Japan—it is global in scope. While Japan has at least made a commitment, in a bilateral agreement, to the principle of nondiscriminatory procurement of telecommunications equipment, other major U.S. trading partners have made no such commitment and, in fact, expressly exclude their Ministries of Posts and Telecommunications (PTTs) from coverage under the Procurement Code which was negotiated during the last round of multilateral trade negotiations under the General Agreements on Tariffs and Trade (GATT).

Canada

In Canada, the major telecommunications equipment manufacturer is controlled by Bell Canada, the largest provider of telecommunications services, which has a policy of favoring its subsidiary in its procurement of equipment. Moreover, Canadian tariffs on telecommunications equipment are substantially higher than those in the United States. These factors substantially limit U.S. producers' opportunities in this market, which represents over $1.5 billion in sales annually.

Europe

The $17 billion European telecommunications market—the largest in the world outside the United States—is largely closed to U.S. products, particularly mainline equipment, because of restrictive procurement policies of the individual national PTTs. In some cases, such as France, government authorities have deliberately utilized preferential procurement as a mechanism for creating international competitive advantage for their national producers.

International satellites

Some foreign governments have made international telecommunications equipment and services targets of their industrial policies. The Committee is concerned that these governments might restrict the procurement options of providers of international telecommunications facilities in order to advance these industrial policies. The Committee joins the Administration and the Federal Communications Commission in condemning any such unfair trade practices and believes that the U.S. satellite industry should have a fair opportunity to supply international telecommunications facilities.

Telecommunications services

In addition to trade in telecommunications equipment, trade in telecommunications services has become an increasingly important component of U.S. international trade and has the potential to be a major American export commodity. The world market for telecommunications services in 1984 reached about $265 billion and is estimated to grow to $444 billion by 1990, a growth of over 9 percent annually.

Not only have telecommunications services become an increasingly important aspect of U.S. international trade as a commodity for export, but these services are also essential to effective participation in foreign markets by almost every other U.S. industry. Without reliable, reasonably-priced communications, U.S. firms would find themselves at a severe competitive disadvantage in the world economy, largely unable to transact business with their trading partners.

Clearly, the information industry—a multibillion dollar industry which includes a wide array of services ranging from timesharing to movies and other entertainment programming to mail and telex—is becoming an increasingly important component of U.S. exports. Currently there are nearly 400 information suppliers that provide direct access to records through telephone lines and through the use of a computer terminal. Several American firms have begun marketing these services abroad, offering information such as stock quotations and up-to-date news. It is estimated that U.S. electronic data base service providers had 1984 revenues of nearly $1.5 billion, and firms providing remote data processing services are estimated to have had revenues of about $6 billion that same year.

Moreover, broadcasting entities such as Turner, ESPN, HBO, WOLD and the three networks may increase their use of international communications facilities to exchange sports, information, and entertainment programming between the United States and other countries. Other users could transmit newspapers, magazines and similar information to various foreign locations for printing and distributions.

With respect to broadcasting, there currently appears to be trade barriers relating to the treatment of American radio and television signals by Canada in particular. Examples of these barriers are Canadian denial of tax deductions to businesses which place advertising on U.S. broadcast stations; limits upon the amount of U.S. programming which Canadian stations may broadcast; Canadian governmental authorization of the for-profit interception and redistribution by Canadian satellite of U.S. television signals without the consent of, or compensation to, the U.S. stations and other affected copyright holders; and the unauthorized, uncompensated microwave distribution of U.S. border television signals, sometimes with alterations or deletions, in areas of Canada beyond the stations' over-the-air coverage. The Committee believes that the Canadian government should take appropriate steps to eliminate these barriers.

CONCLUSION

The technological leadership of the domestic U.S. telecommunications industry means that there is no need to impose measures to protect the industry in its home market. Rather, the industry requires mechanisms by which to gain access to foreign telecommunications markets.

The Committee recognizes that the strength of the U.S. dollar—which simultaneously increases prices of our imports—has had an impact on the U.S. telecommunications trade deficits and on the ability of U.S. businesses to compete abroad. The Committee is also aware that American telecommunications companies must recognize that the former domestic market has been transformed into a larger, global market, and they must engage in more extensive marketing efforts if they are going to cope with this new reality. However, despite these other contributing factors, the Committee is convinced that foreign barriers to entry are a major component of the telecommunications trade problem.

The Committee does not intend merely to send our trading partners a signal. Rather, Title II of H.R. 4800 would establish a framework within which the opportunity for U.S. suppliers to compete in the international telecommunications market shall be greatly increased, or new conditions governing foreign access and participation in our own domestic market will be implemented. Title II of H.R. 4800 contains many of the authorities necessary to ensure that action restricting foreign access to the U.S. market will be taken unless U.S. firms obtain meaningful market access abroad.

However, the Committee believes that the President's authority to impose regulatory sanctions under section 301(c) of the Trade Act should be extended to cover telecommunications products. Extension of such authority would provide the President with a full range of remedial actions to help ensure telecommunications products.

Currently under the Trade Act, the President can take action against foreign suppliers of telecommunications services in the U.S. market. Recognizing the significant and increasing U.S. trade imbalance in telecommunications products, the Committee strongly believes the President should also have the authority to implement regulatory sanctions against foreign suppliers of telecommunications products.

HEARINGS

The Committee's Subcommittee on Telecommunications, Consumer Protection and Finance held one day of general hearings on telecommunications trade on March 27, 1985. Testimony was received from Robert S. Strauss, former United States Trade Representative; Frederick Bergsten, Director, Institute for International Economics; Howard D. Samuel, President, Industrial Union Department, AFL-CIO; John Yochelson, Director of International Business and Economics, Center for Strategic and International Studies, Georgetown University; William G. Moore, Jr., Chairman of the Board, American Electronics Association; Eric I. Garfinckel, representing the Communications Industry Association of Japan; and Allen R. Frischkorn, Jr., Chairman, International Trade Committee of the Information and Telecommunications Group, Electronic Industries Association.

In addition, the Subcommittee on Commerce, Transportation and Tourism held a similar hearing on March 28, 1985. Testimony was received from the Honorable Lionel H. Olmer, Undersecretary for International Trade, Department of Commerce; C. Travis Marshall, Corporate Vice President, Motorola Inc.; Michael Borrus, Deputy Director, Berkeley Roundtable on the International Economy, University of California; John Morgan, Assistant to Executive Vice President, Legislation-Government Agencies, Communication Worker of America; and Robert B. Wood, Research Director, International Brotherhood of Electrical Workers.

On October 1, 1985 the Committee's Subcommittee on Commerce, Transportation, and Tourism; and the Subcommittee on Telecommunications, Consumer Protection and Finance held one day of joint hearings on H.R. 3131, a bill similar to Title II of H.R. 4800. Testimony was received from Hon. S. Bruce Smart, Undersecretary for International Trade, U.S. Department of Commerce; Bruce Wilson, Assistant U.S. Trade Representative; John Hinds, Vice President, AT&T International, Inc.; Yong Tuck Lee, President, M/A-COM MAC, Inc.; John J. McDonnell, Vice President, Elec-

tronic Industries Association; Edwin B. Spievack, President, North American Telecommunications Association; Stanton D. Anderson, Anderson, Hibey, Nauheim and Blair; William O'Connor, President, Executone, Inc.; Barbara Easterling, Executive Vice President, Communications Workers of America; and Robert B. Wood, Research Director, International Brotherhood of Electrical Workers.

COMMITTEE CONSIDERATION

On October 2, 1985, the Subcommittee on Commerce, Transportation and Tourism met in open session and ordered reported the bill H.R. 3131, a bill similar to Title II of H.R. 4800, as amended, by a voice vote, a quorum being present. On October 3, 1985, the Subcommittee on Telecommunications, Consumer Protection and Finance met in open session and ordered reported the bill H.R. 3131, as amended, by a voice vote, a quorum being present. On November 21, 1985, the Committee met in open session and ordered reported the bill H.R. 3131 with amendments by a recorded vote of 33 to 0, a quorum being present.

COMMITTEE OVERSIGHT FINDINGS

Pursuant to clause 2(l)(3)(A) of Rule XI of the Rules of the House of Representatives, the Subcommittees held oversight hearings and made findings that are reflected in the legislative report.

COMMITTEE ON GOVERNMENT OPERATIONS

Pursuant to clause 2(l)(3)(D) of Rule XI of the Rules of the House of Representatives, no oversight findings have been submitted to the Committee by the Committee on Government Operations.

INFLATIONARY IMPACT STATEMENT

Pursuant to clause 2(l)(4) of rule XI of the Rules of the House of Representatives, the committee makes the following statement with regard to the inflationary impact of the reported bill:

There is no inflationary impact associated with the enactment of Title II of H.R. 4800.

SECTION-BY-SECTION ANALYSIS

TITLE II—INTERNATIONAL TRADE IN TELECOMMUNICATIONS PRODUCTS AND SERVICES

Section 201. Short Title.

Section 201 provides that this Act may be cited as the "Telecommunications Trade Act of 1986."

Section 202. Findings and Purposes.

Section 202 puts forth six congressional findings stating that: rapid growth in the world market for telecommunications products and services will continue for several decades; the United States can improve prospects for its exports and technological leadership through an effort to achieve an open world market; most foreign markets have extensive government intervention which adversely affects U.S. exports, investment, and employment; the open U.S. market has resulted in a dramatic growth in imports and a growing imbalance in competitive opportunities; and unless the imbalance is corrected by achieving fully competitive market opportunities for U.S. telecommunications products and services in foreign markets, the United States should avoid granting continued access for foreign products and services in telecommunications and other areas.

Section 202 also contains three purposes of the Act: (1) to foster the economic and technological growth of and employment benefit from a high quality telecommunications network; (2) to ensure that countries which have made commitments to open telecommunications trade fully abide by those commitments; and (3) to achieve a more open world trading system for telecommunications products and services through negotiation and achievement of fully competitive market opportunities for U.S. telecommunications exporters and their subsidiaries in those markets in which barriers exist to free international trade.

Section 203. Negotiating Objectives.

Section 203 identifies six primary negotiating objectives and seven secondary negotiating objectives for the purpose of section 204, which requires the USTR to establish specific negotiating objectives on a country-by-country basis.

The primary negotiating objectives, in Section 203(a) are:

1. The nondiscriminatory procurement of telecommunications products and related services by foreign entities that provide local exchange telecommunications services that are owned, regulated, or controlled by foreign governments.

2. Assurances that any requirement for the registration of telecommunications products which are to be located on customer premises, for the purposes of—

A. attachment to a telecommunications network in a foreign country, and

B. the marketing of the products in a foreign country,

be limited to the certification by the manufacturer that the products meet standards established by the foreign country for preventing harm to the network or network personnel.

3. Transparency of, and open participation in, the standards-setting processes used in foreign countries with respect to telecommunications products.

4. The ability to have telecommunications products, which are to be located on customer premises, approved and registered by type, and, if appropriate, the establishment of procedures between the United States and foreign countries for the mutual recognition of type approval.

5. Access to the basic telecommunications network in foreign countries on reasonable and non-discriminatory terms and conditions (including non-discriminatory prices) for the provision of value-added services by United States suppliers.

6. Monitoring and effective dispute settlement provisions regarding matters referred to in paragraphs (1) through (5).

The secondary negotiating objectives in section 203(b) are:

1. National treatment for telecommunications products and services that are provided by United States firms;

2. Most-favored-nation treatment for such products and services;

3. Nondiscriminatory procurement policies with respect to such products and services and the inclusion under the Agreement on Government Procurement of the procurement (by sale or lease by government-owned or controlled entities) of all telecommunications products and services;

4. The reduction or elimination of customs duties on telecommunications products;

5. The elimination of subsidies, dumping, violations of intellectual property rights, and other unfair trade practices that distort international trade in telecommunications products and services;

6. The elimination of investment barriers that restrict the establishment of foreign-owned business entities which market such products and services; and

7. Monitoring and dispute settlement mechanism to facilitate compliance with telecomminications trade agreements.

Section 204. Investigations of Foreign Telecommunications Trade Barriers

Investigations. Section 204(a)(1)(A) requires the USTR, within six months of the date of enactment, to initiate and conclude an investigation of foreign countries with a substantial potential market for U.S. telecommunications products and services. The purpose of the investigation is to identify and analyze those acts, policies, and practices in each country which deny fully competitive foreign market opportunities to the telecommunications products and services of U.S. firms.

Under section 204(a)(2), the USTR may exclude any foreign country from the required investigations, if the USTR determines that the potential market in that country for U.S. telecommunications products and services is not substantial. However, countries excluded from investigation for this reason must be reviewed annually by the USTR as provided by section 204(c). If the USTR considers that country's potential market to be substantial, he must initiate and conclude, within 6 months, an investigation to identify and analyze those acts, policies, and practices which deny fully competitive foreign market opportunities for U.S. firms.

Investigations by petition from interested parties or by self-initiation also may be undertaken by the USTR under section 204(b). Such investigations must be completed with 6 months of the date on which they were commenced, in the case of investigations by self-initiation; or within 6 months of the date on which a petition is filed.

Trade Negotiating Objectives. Section 204(a)(1)(B) requires the USTR to establish specific primary and secondary negotiating objectives which should be pursued in negotiations to obtain fully competitive market opportunities in foreign countries for telecommunications products and services of U.S. suppliers. The USTR shall establish these negotiating objectives on the basis of the analysis described in this section. The USTR also shall take into consideration; the needs of affected U.S. industry in that country; the competitiveness of U.S. industries in domestic and world markets; the progress being made to expand market opportunities under existing agreements or ongoing negotiations; and the availability of appropriate incentives and effective remedies.

Section 205. Action by the President in Response to Investigations by Trade Representative.

Section 205(a) requires the President, upon completion of USTR's investigations under sections 204(a)(1)(A) or 204(b) to enter into negotiations with countries which were identified during the investigation as denying fully competitive market opportunities to U.S. suppliers of telecommunications products and services. The purpose of the negotiations is to enter into agreements which achieve the specific primary and secondary negotiating objectives that were established by the USTR under section 204(a)(1)(B).

The negotiating period in section 205(c) provides 18 months from the date of enactment for the President to enter into agreements with the countries identified by the USTR during his investigation. The President may request up to two one-year extensions of the negotiating period. In order to obtain an extension of the negotiating

period, the President must summit a bill 90 days prior to the expiration of the negotiating period and a statement that: substantial progress is being made in negotiations with the country concerned; and further negotiations are necessary to reach an agreement which meets the specific primary and secondary negotiating objectives established with respect to that country. Such requests for extension of the negotiating period will be considered by Congress under the "fast-track" procedures of sections 102 and 151 of the Trade Act of 1974.

If the President is unable to enter into a trade agreement with a foreign country within 18 months after the date of enactment provides that the President shall take whatever actions authorized by this Title that are necessary and appropriate to achieve the purposes of the primary objectives not covered by the agreement. Section 205(b)(1)(B) provides that the President may take whatever actions authorized by the bill that are necessary to achieve the secondary objectives not covered by the agreement.

Section 205(b)(2) requires that any actions taken by the President against the goods or services of a foreign country be directed first at telecommunications products and services from that country.

Section 205(b)(3) authorizes the President to take the following actions if no agreement is obtained: to terminate, withdraw, or suspend trade agreements; take any action under section 301 of the Trade Act of 1974; prohibit the Federal Government from purchasing telecommunications products of a specified country; increase domestic preferences or suspend waives of domestic preferences with respect to Federal government telecommunications purchases (or other products in the case of suspension of waivers); deny Federal funds or credits for purchases of telecommunications products of a specified foreign country; and suspend GSP benefits on articles from specified foreign countries.

In order to ensure the sanctity of contracts, section 205(b)(5) specifies that actions taken by the President under section 205(b)(3) will not affect any binding obligations entered into before the date of enactment of this bill to which any U.S. citizen or national is a party. Section 205(b)(6) provides that any action taken by the President under section 205(b)(3) is subject to approval by Congress under "fast-track" procedures.

Section 205(d) provides that the President may modify or terminate any action taken against a country only if that country enteres into a trade agreement which achieves the objectives established by the USTR for that country.

Section 206. Review of Trade Agreement Implementation by Trade Representative.

Section 206(a) defines "trade agreement" (1) a trade agreement entered into under section 205 that is in force with respect to the United States, and (2) a trade agreement regarding telecommunications products or services that was in force with respect to the United States on the date of enactment of this Act.

Section 206(b) requires the USTR to conduct annual reviews to determine whether any act, policy, or practice of a country with which a telecommunications trade agreement has been reached: (a) is not in compliance with the terms of the agreement; or (b) otherwise denies fully competitive market opportunities within the context of the terms of the agreement.

If the USTR determines that a country's acts, policies, or practices violate a telecommunications trade agreement or otherwise deny fully competitive market opportunites under the agreement, section 206(d) requires him to take whatever authorized actions that are necessary to: (a) fully offset the foreign act, between the United States and the foreign country in telecommunications trade. The USTR may not take action against a country with a trade agreement in existence on the date of enactment before the President has taken action against any other country under section 205(b)(3).

Section 206(e) authorizes the USTR to terminate, withdraw, or suspend trade agreements or take any action under section 301 of the Trade Act of 1974. Actions must be directed first at telecommunications products and services. If all feasible actions have been taken against telecommunications products and services, and if the applicable objectives established with respect to that country have not been achieved, then, and only then, may actions be directed against other products and services.

Section 206(e)(4) provides that any actions taken by the USTR are subject to "fast-track" Congressional consideration. Section 206(f) specifies that actions taken by the USTR will not affect binding obligations entered into before the date of enactment of Title II to which any U.S. citizen or national is a party. Section 206(g) provides that the USTR may modify or terminate any action taken under this section only if he determines that the foreign country concerned has taken appropriate remedial action regarding the act, policy, or preactice concerned.

Section 207. Consultations.

Section 207 requires that the President and the USTR consult with the Secretary of Commerce and other members of the Trade Policy Committee established under section 242(a) of the Trade Expansion Act of 1962; with the private sector advisory committees established under section 135 of the Trade Act of 1974; and with other interested parties in the course of investigations, in the establishment of negotiating objectives, and in determining appropriate action. In addition, this section requires the President to consult closely with appropriate committees of Congress on all aspects of the negotiations.

Section 208. General Trade Agreement Authority.

Section 208 provides general trade agreement authority allowing the President to conclude telecommunications trade agreements under section 205(a). Section 205(a) authorizes the President, during the 42-month period following the date of enactment, to enter into trade agreements to achieve the primary and secondary objectives established by the USTR. Section 208(b) provides that agreements involving U.S. concessions are to be treated as trade agreements subject to "fast-track" legislative procedures. Under section 208(c), the President is authorized to extend agreement benefits and obligations to all countries or just to countries which are parties to the agreement. In addition, the President may choose whether or not to apply the agreement benefits and obligations uniformly to all parties.

Section 209. Compensation Authority.

Section 209(a) authorizes the President to enter into agreements granting new U.S. concessions as compensation to a foreign country for action taken against it, if that action is found to violate U.S international obligations, including obligations under the General Agreement on tariffs and Trade (GATT). Section 209(b) provides that agreements reached under this section are subject to Congressional approval under "fast-track" procedures.

Section 210. Definition of Telecommunications Product.

Section .210 defines "telecommunications product" in terms of classification number from the Tariff Schedules of the United States (TRSUS).

Section 211. International Obligations.

This section provides that nothing in the Act shall be construed to require the President and the Congress to violate U.S. legal obligations, including GATT obligations.

Mr. COATS. Mr. Chairman, I yield 3 minutes to the gentleman from New York [Mr. LENT].

Mr. LENT. Mr. Chairman, I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in opposition to H.R. 4800, the Trade and International Economic Policy Reform Act of 1986. I simply cannot support this bill in its current form.

Mr. Chairman, we need effective, strong trade legislation. The free flow of goods and services in international commerce, the lifeblood of a healthy U.S. and world economy, is in danger today. U.S. industries are faced with closed markets overseas while imports enter U.S. markets unfairly. As a result, the United States faced a $148.5 billion trade deficit last year. This situation has not improved. Almost every month the United States sets a new record trade deficit.

Congress can no longer stand by and watch American jobs being lost as U.S. manufacturers move overseas or go out of business. Effective action must be taken. That is why I joined the bipartisan effort of the Energy and Commerce Committee in reporting effective legislation—H.R. 3777—the Trade Law Modernization Act, and H.R. 3131—the Telecommunications Trade Act of 1986. Those bills are models of bipartisan efforts that resulted in well-balanced legislation. H.R. 3777 and H.R. 3131 update our trade laws to address the unfair trade practices U.S. industries face today, without being protectionist.

Unfortunately, I cannot say the same for H.R. 4800, H.R. 4800 has become a partisan and jurisdictional battlefield. This legislation is laden with bad provisions. One example is the provision establishing a Council on Industrial Competitiveness. This simply funnels U.S. economic aid and policymaking through a massive state-planning agency and unnecessarily involves the Government in the process of picking "winners and losers."

Another example is the title addressing our telecommunications trade deficit. That title does not provide for the President to take enforcement action

against a foreign country through the FCC, although he may determine such action to be necessary to achieve equivalent telecommunications market access. The FCC is the branch of Government that has primary jurisdiction over telecommunications. It should, therefore, be the branch of Government that has primary jurisdiction over telecommunications market access enforcement action. Yet the President cannot use, as a remedy, the denial of a license to a foreign company to operate in the United States.

These are just two examples where the partisanship behind H.R. 4800 has resulted in a bill which will not effectively address the trading problems that face U.S. industries.

The rule governing consideration of H.R. 4800 makes a substitute in order. That substitute is not laden with the many protectionist provisions that are in H.R. 4800. The substitute will give the House a second chance at creating a trade bill that will effectively address our trade problems without being partisan or protectionist. I urge my colleagues to take the opportunity the substitute will provide us to pass well-balanced, effective legislation.

Mr. FLORIO. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, I rise in support of the bill H.R. 4800, the Trade and International Economic Policy Act of 1986.

This bill is designed to address the No. 1 economic problem facing our country—the skyrocketing U.S. trade deficit. In each of the last 4 years, the U.S. trade deficit has broken all previous records. Last year's deficit was a staggering $150 billion and estimates are that in the year 1990, the U.S. trade deficit will be $300 billion—twice as high as last year's deficit.

Furthermore, the United States officially became a debtor nation last year for the first time since 1914. In the 4 short years since 1981, America has gone from being the world's largest creditor nation to becoming the world's largest debtor nation. Over the last 5 years, our trade problems have also robbed about 2 million Americans of their jobs in manufacturing industries.

This bill gives America's most productive industries—telecommunications, natural resources, and many others—the opportunity to compete fairly in international trade. Without such legislation, U.S. industry will continue to lose market share to foreign competitors, and American firms and jobs will continue their exodus offshore. Nothing less that the future economic health of our country is at stake, and I think this bill is a major step toward curing our ills.

My subcommittee reported two bills early in the Congress that contain provisions substantially similar to titles I and II of H.R. 4800. One of these bills, the Trade Law Modernization Act, H.R. 3777, made important changes in U.S. trade laws that appear in title I of H.R. 4800. This legislation includes changes in section 301 of the Trade Act of 1974 dealing with unfair foreign trade practices; changes in section 201 of the Trade Act of 1974 which provides relief to U.S. firms injured by imports; and amendments to title VII of the Tariff Act of 1930 that would make it easier to impose antidumping and countervailing duties on imports subsidized by foreign governments. All the changes are designed to make relief easier to obtain for U.S. firms and to ensure that trade considerations are given greater weight in deciding when remedies should be imposed.

The other bill, H.R. 3131, the Telecommunications Trade Act of 1986, is substantially similar to title II of H.R. 4800. This legislation was initiated by my colleague, TIM WIRTH, and myself a year ago.

For several reasons, I believe the trade problems facing the telecommunications industry are unique and require special attention by Congress.

First, it was governmental action that created many of the trade problems that now plague the U.S. telecommunications industry, and therefore, our Government must take some responsibility for their solution. The flood of foreign telecommunications imports coming into the United States only began in response to a series of regulatory and judicial actions that culminated in the breakup of the AT&T system. While the American telecommunications market underwent virtual total deregulation, foreign markets remained tightly controlled by government-run corporations and largely closed to U.S. telecommunications products.

Last year, AT&T closed down its last residential phone equipment manufacturing operation in the United States and moved it to Singapore. In the process, 2,000 Americans in Shreveport, LA, lost their jobs. Now, AT&T's home telephone products are imported—not made in America.

Since 1980, the U.S. telecommunications trade balance has plummeted from a surplus of nearly $1 billion to a deficit last year of $1.3 billion. This year, our telecommunications trade deficit is expected to grow still larger.

The second reason I assign high priority to the passage of telecommunications trade legislation is because we still have a chance to minimize the damage inflicted on this industry if we move very quickly. The U.S. telecommunications industry is comparable or superior to its foreign competition in terms of quality, technology, and innovation.

Our only deficiency is meaningful access to foreign markets. Unless access is obtained soon, however, U.S. firms will miss out on a major procurement cycle in Japan and many other countries that may make American companies virtually noncompetitive in the world market for the next 5 years.

Only the threat of legislatively mandated retaliation can keep the pressure on other countries to open their markets to U.S. firms.

Title II of H.R. 4800 would establish a framework within which the opportunity for U.S suppliers to compete in the international telecommunications market shall be greatly increased, new conditions governing foreign access and participation in our own domestic market will be implemented. Title II gives the President a sufficient period of time to negotiate access to closed foreign markets, but if those negotiations fail, the bill requires him to take action against foreign firsm in this market. Therefore, the bill limits the Presidents's discretion not to act in the fact of unfair foreign trade practices.

It is a tough bill, and it is a good bill. I urge my colleagues to support it when we vote on it tomorrow.

□ 1715

Mr. COATS. Mr. Chairman, I yield 3 minutes to the gentleman from Ohio [Mr. OXLEY].

Mr. OXLEY. Mr. Chairman, I rise in opposition to H.R. 4800 and in support of the Michel substitute.

I am disturbed by the course of events in the last several months that has led us from trade reform legislation to a political issue, and I think that is unfortunate.

The first committee to act was our Energy and Commerce Committee, on a comprehensive trade reform bill, H.R. 3777, which passed out of our committee on a strong bipartisan vote. There were only three votes against that legislation in committee.

At that time I felt we had a responsible and effective bill that was nonprotectionist in nature and yet at the same time made some very valid statements in our international commitments as far as trade is concerned. It was a strong position, a strong bill, and I think that without resorting to protectionism we were very effective in passing that legislation.

In the meantime, the Ways and Means Committee took hold of the bill, and from that point on, in my estimation, the legislation has gone downhill. I am disappointed in that.

The extremely protectionist language that will undoubtedly invite foreign retaliation is currently present in the legislation that we are considering. It is against U.S. exports and certainly impacts very heavily on agricultural exports in my home State, in my home district. As a matter of fact, 1 out of every 4 acres of ground in Ohio are devoted to agricultural exports, and I

fear that the retaliation will have a severe effect on our ability to export agricultural products throughout our country into other countries of the world.

What I am particularly concerned about is the bill language providing for 301 actions against countries that violate internationally recognized worker rights, which even the U.S. Congress has never adopted on our own. I am wondering what kind of effect that is going to have worldwide. It seems to me that we have enough to do internally without telling other countries how they can handle their own particular workers.

The bill also mandates retaliation by a date certain in specific 301 cases, thus limiting negotiating powers for affected U.S. industries. If negotiations are proceeding and the inflexible deadline is reached, retaliation is required and there is no chance for a reasonable solution. Retaliation by foreign governments is thus invited for U.S. products.

The issue has also been resurrected of industrial policy, a failed policy that is a synonym for more Federal bureaucracy, more special-interest lobbying, and more Government interference in the market.

The bill has also expedited decisions by Commerce on issues of national security import investigations, which could seriously hamper the review of these very important matters by that Department.

In addition, the so-called omnibus trade bill is full of industry/company-specific provisions that provide relief on tariffs. Such "pork" has no place in this type of legislation.

I would hope that the House would take a serious look at this flawed legislation and to consider the Michel substitute which, in my estimation, more closely tracks the original bill that passed out of the Energy and Commerce Committee with a good number of votes, and my friends that I am looking at right now.

Mr. FLORIO. Mr. Chairman, I yield 3 minutes to the gentleman from Colorado [Mr. WIRTH], the sponsor of H.R. 3131, which is the essence of title II.

Mr. WIRTH. Mr. Chairman, this is an historic occasion for the House of Representatives. H.R. 4800, the Trade and International Economic Policy Reform Act of 1986, is the most comprehensive trade legislation ever considered on the floor of the House of Representatives.

H.R. 4800 is the product of the hard work of no less than seven committees of the House under the strong stewardship of the Speaker and the majority leader. I wish to commend each committee and the leadership for their many hours of work to bring this comprehensive trade package to the floor. The legislation we consider today is also a result of the deep and increasing frustration with the lack of administration leadership to advance American trade and economic interests with our major international competitors.

I rise today to support the specific provisions in Title II and VIII of the bill, the parts of the bill within the jurisdiction of the Subcommittee on Telecommunications, Consumer Protection and Finance. I believe we can be particularly proud of the provisions in title II of H.R. 4800, the Telecommunications Trade Act of 1986. This title had its genesis in telecommunications trade legislation, H.R. 3131, that Congressman JIM FLORIO and I introduced nearly a year ago—legislation which enjoys the strong support of industry and labor. I am gratified that our efforts that began several months ago to get nonprotectionist market opening telecommunications trade legislation have come this far.

In recent years, the U.S. balance of trade in telecommunications equipment has deteriorated significantly. Our telecommunications trade balance has plummeted from a surplus of nearly $1 billion in 1980 to a deficit of $1.3 billion in 1985. This year the U.S. deficit is expected to grow still larger to an estimated $1.6 billion.

Like H.R. 3131, title II of H.R. 4800 is designed to address our current trade imbalance in telecommunications by opening foreign markets to U.S. suppliers of telecommunications products and services. Moreover, this legislation recognizes that negotiations are the preferred course to achieve market access for American telecommunications firms abroad.

I firmly believe negotiations are an essential component if telecommunications trade legislation is going to serve the goal of opening foreign markets instead of closing our own. Where negotiations do not result in improved market access for U.S. firms, title II, like its predecessor H.R. 3131, would require the President to take some action to restrict foreign access and participation in the U.S. markets as a means of forcing open the foreign market in question.

There is broad consensus on substantially all of the provisions contained in title II. However, while title II gives the President additional authority to take action against unfair trade practices, it does not, as currently drafted, provide the President with the full range of available sanctions to achieve meaningful market access abroad for U.S. telecommunications firms. I believe the President and his trade negotiators should have at their disposal every possible effective remedy to combat unfair practices in telecommunications trade.

Time after time, foreign governments have used their registration and certification standards and regulations for telecommunications products to impede access by U.S. firms to their markets. However, title II of this legislation, as currently drafted, does not list among the potential remedies that the President might initiate the use of regulatory actions as a means of opening foreign markets to U.S. telecommunications products. Industry has clearly and consistently advocated the need to have this option available to the President as a tool for opening foreign markets when more disruptive measures such as tariffs and quotas may not be appropriate.

It is my understanding that the proposed amendment to provide the President with the authority to take regulatory actions in order to open foreign markets to U.S. telecommunications products will not be offered to title II. I am pleased that this amendment will not be brought up at this particular time. Too much effort has been devoted to piecing together a package intended to send a strong signal to foreign governments and the administration that the telecommunications trade problem will not be treated lightly.

Now that telecommunications trade legislation has come this far, it is important that we present a united front as we move forward to deal with this important challenge to one our most promising and dynamic industrial sectors. Moreover, it is my belief that there will be an opportunity for the House to consider this important issue at some future point.

Mr. Chairman, I also rise in support of section 701 of title VII of H.R. 4800, which contains amendments to the Foreign Corrupt Practices Act. The Foreign Corrupt Practices Act was developed by the predecessor committee to the Committee on Energy and Commerce, after extensive hearings in the 94th and 95th Congresses. The act addressed some very serious abuses in a regretful era in American corporate history.

The disclosures in 1973 of illegal corporate political contributions to the Nixon campaign revealed that the contributions were made possible by the maintenance of off-the-books accounts, false bookkeeping entries, the laundering of funds through foreign bank accounts, and other illegal activities by major corporations. More than 300 major corporations contributed millions of dollars to election campaigns. Criminal charges were brought against a number of companies and individuals.

The falsification of corporate financial records, designed to disguise or conceal the source and application of corporate funds and the existence of secret slush funds, was also used to facilitate questionable or illegal payments to foreign government officials. Ultimately, more than 450 corporations disclosed illegal or questionable payments abroad. Many made pay-

ments totaling $10 million or more. Those foreign payments had far-reaching consequences for United States foreign relations in Japan, Italy, the Netherland, and for other friendly governments.

The Foreign Corrupt Practices Act was passed in 1977 to specifically prohibit the bribing of foreign officials by American companies and individuals. The act, and self-policing by thousands of American firms doing business abroad, has dramatically reduced the bribery of foreign government officials.

In addition, in many respects the act has had a very positive impact on foreign trade. American diplomats overseas have noted that the law has benefited American companies who, in their dealings with foreign governments, can point out that the law calls for a higher standard of behavior on their part than their foreign competitors. American companies say they have been able to resist requests for payoffs from certain foreign officials by pointing to the constraints of the law.

When the Foreign Corrupt Practices Act was adopted in 1977, Congress did not ignore that some business might be lost as a result of the new law. However, Congress determined that it was not in our national interest to gain business that could only be gained by paying bribes. Congress concluded that the payment of bribes is bad business practice. To quote from the 1977 committee report:

> [Bribery] erodes public confidence in the integrity of the free market system. It short-circuits the marketplace by directing business to those companies too inefficient to compete in terms of price, quality of service, or too lazy to engage in honest salesmanship, or too intent upon unloading marginal products. In short, it rewards corruption instead of efficiency and puts pressure on ethical enterprises to lower their standards or risk losing business.

Why, then, should we change the law? After the law was passed, a number of exporters began telling the Congress that the words of the law were unclear. Many ethical, responsible members of the business community said they wanted to comply with the law, but they did not understand certain words and phrases used in the statute. Some said that they had to withdraw from export activities where they could not be certain whether those activities might be construed to involve violations of the law. Some feared criminal prosecution for mere negligence.

In the 97th and 98th Congresses, the Subcommittee on Telecommunications, Consumer Protection and Finance conducted an extensive review of the act and its impact on foreign relations and trade, and we reviewed the enforcement records of the SEC and the Department of Justice. The impact of the act on exports could not be determined with certainty. With respect to enforcement of the act, it was clear that neither the SEC nor the Justice Department were prosecuting companies for minor mistakes or negligence.

Even so, it is clear that there continues to be uncertainty about what the law requires. Indeed, some have suggested that the restraints of the law may be greatest on the most scrupulous members of the business community, who may withdraw from situations in which they cannot proceed with certainty that a bribe will never be paid by subordinates.

I believe it is important to convince American exporters that they are being treated fairly by their Government, so that we can win renewed support for this important law. U.S. exporters should work as partners with the Government to assure that the scandals of the 1970's that damaged the international stature of this country and American business are not repeated. It is my view that if businesses are asked to continue to support and operate under the Foreign Corrupt Practices Act, we in the Congress, in return, can give them further assurances about the law's meaning and congressional intent.

This legislation is a very positive step in strengthening and clarifying the law. The law is clearer because it uses terms that are defined in the statute, and are generally understood concepts under the Federal securities laws. The law is stronger because it provides incentives for companies to police themselves. The changes here build upon the intent of Congress in 1977. Law enforcement under this legislation will be strengthened.

I would note that this is in stark contrast to a number of earlier proposals, which were purportedly drafted to clarify the law but, instead, opened wide loopholes and introduced vague, new terms. In the 97th Congress, the Senate passed legislation in this area which had loopholes "big enough to fly all of Lockheed through," according to the New York Times. The legislation would have opened the way for a few, unscrupulous companies to evade the law, and it could only have hurt honest exporters who wanted to comply with the law.

In 1981, the administration proposed legislation that would have repealed the accounting provisions of the act, which require that all public companies keep accurate books and records. This would have hurt public shareholders and undermined confidence in the integrity of our markets and our system of full disclosure. This idea was roundly rejected and, indeed, the accounting provisions are left intact by this legislation.

The legislation before us involved the careful work of a number of Members, and I wish to acknowledge them today. There are a number of members of the Committee on Foreign Affairs who worked on earlier drafts of the legislation. The gentleman from Florida [Mr. MICA] sponsored legislation which, although different from the legislation before the House today, had as its goal giving more guidance to the business community to operate under the law. The gentleman from Washington, the distinguished chairman of the Subcommittee on International Policy and Trade, Mr. BONKER, and the gentleman from Florida, the distinguished chairman of the committee on Foreign Affairs, Mr. FASCELL, shared this goal, and devoted considerable effort to ensure that this goal was realized. The gentleman from California [Mr. BERMAN] spent many hours working with me and the Energy and Commerce Committee, working with colleagues on the Committee on the Judiciary and on the Committee on Foreign Affairs, to try to develop clear, tight language.

Significant changes were made to address my concerns and those of the distinguished chairman of the committee, Mr. DINGELL, as well as the concerns of other Energy and Commerce Committee members. Those included keeping the jurisdiction over enforcement of the act with the SEC, the agency responsible for ferreting out the payments scandals of the 1970's, and making amendments directly to existing law, so that there could be no room for doubt about the law's meaning and intent. Many changes were made during the referral of the legislation to the Committee on Energy and Commerce prior to the introduction of H.R. 4800.

The gentleman from New Jersey, and distinguished chairman of the Committee on Judiciary, Mr. RODINO, contributed his expertise to the development of the criminal standards and Justice Department enforcement.

Finally, I would like to thank the gentleman from New Jersey and ranking minority member of the subcommittee, Mr. RINALDO, for his participation in the lengthy hearings and review on this issue. When we held our first hearings on this subject in 1981, I said thare would be no "quick fix" on the legislation. He agreed with that approach and worked very patiently with all of us as we looked for the right language to clarify and strengthen the law.

As I noted earlier, amendments to the act contained in previous legislation passed by the Senate would have opened wide loopholes in the law. I would close by saying that all of the House Members who have participated in the development of the amendments contained in this legislation have given assurances that they will hold to the House position and avoid

any weakening changes that may be proposed in conference.

Chairman DINGELL and I have prepared a statement describing the history of the Energy and Commerce Committee's review of the issues and a discussion of the major provisions of the legislation. The statement is intended to give law enforcement agencies and the business community further guidance about the meaning of the law and congressional intent.

Mr. COATS. Mr. Chairman, I yield 3 minutes to the gentleman from Texas [Mr. FIELD].

Mr. FIELDS. Mr. Chairman, I rise to express my strongest opposition to H.R. 4800. I feel that this legislation is misguided, ill-conceived and dangerously protectionist.

The U.S. current trade deficit cannot be sustained. Reducing the deficit is a priority problem which deserves responsible attention. For this reason, I worked with my colleagues on the Energy and Commerce Committee in recommending legislation to address unfair trading practices abroad and certain inadequacies in our current trade laws. However, while many of the provision recommended by the Energy and Commerce Committee are included in H.R. 4800, the final product is a bill that would do more harm than good.

Protectionism often creates two separate classes of workers; One class in which jobs are protected, and another class of workers whose jobs are expendable. While this bill has been dubbed by some as a "job-saving" bill, the fact is that the passage of this bill would save some jobs while destroying others.

As a representative of our Nation's third busiest port, I am particularly concerned. This bill places in jeopardy the jobs of more than 32,000 Texans directly dependent on the port's activities. These are hardworking Americans who pay their taxes, who believe in the free enterprise system, and who now find they may lose their jobs, through no fault of their own, because of the misguided actions of their Government. Under this bill, maritime workers, railroad workers, and truckers would be severely impacted.

The big losers under H.R. 4800 will be the workers of many of our most dynamic industries, consumers who would pay higher prices on thousands of products, and farmers who will most assuredly lose export sales due to retaliation. The fact is that free trade benefits all Americans—especially Houstonians. An estimated 160,000 Texans—more than 3 percent of the State's total work force and more than 10 percent of the work force in Harris County—receive direct benefits from the Port of Houston. Forty percent of all agricultural products produced in the United States are exported—I might add, Houston has been the Nation's largest grain exporting port—as are 20 percent of all goods produced in the United States. If we proceed to erect the type of trade barriers proposed in H.R. 4800, in blatant violations of our international trade laws, we will not be encouraging economic growth and prosperity; rather, we will be setting a course toward economic stagnation.

Mr. Chairman, the Republican substitute provides us with a responsible alternative to the protectionist legislation in H.R. 4800. The substitute retains the constructive provisions in the bill, while eliminating the most damaging measures. It amends existing trade laws to expand the unfair practices meriting retaliation. It removes the injury requirement for industries whick seek relief from violation of patents, copyrights, and trademark law infringements. The substitute contains provisions specifying objectives for negotiating agreements with foreign governments to provide access to U.S. telecommunications products and services. Finally, the substitute urges the President to launch a new round of GATT negotiations as soon as possible to resolve pending issues not satisfactorily resolved in earlier trade negotiations and to develop multilateral disciplines in areas where trade problems have emerged or become more acute. A new round of GATT is the most constructive way to address the complex problems which exist in the world market today. I urge my colleagues to support the Michel substitute. It is by far the most responsible approach.

Mr. FLORIO. Mr. Chairman, I yield 2 minutes to the gentleman from New Mexico [Mr. RICHARDSON], a valuable member of our subcommittee.

Mr. RICHARDSON. Mr. Chairman, I would like to commend you and all the members of this committee and the other committees who have worked so hard on this important legislation. While the bill before us today does not include the language of the Energy and Commerce bill which is of special concern to me, I think the legislation is long overdue. America's basic position on trade issues is an artifact of World War II when we emerged from the World War as the most powerful industrial economy in the world. Our economy could tolerate large tariff and nontariff barriers erected against our products while at the same time being open to imports; our trade laws reflect this post-World War II view of the world. But Japan and Europe have now reconstructed and no longer need to protect their domestic industries to rebuild shattered economies. And while the economic position of these countries has changed, before now, we have seen no corresponding changes in U.S. trade law to reflect this new economic reality. Our trade laws are in desperate need of the revisions found in this bill.

Mr. Chairman, most of us are strong supporters of free trade and most of us also recognize what free trade does and does not mean—free trade does not mean closing markets to U.S. goods; free trade does not mean dumping goods on the American marketplace; free trade does not mean foreign subsidization of industries to the detriment of ours; and free trade is not enhanced by U.S. trade laws which do not adequately address these barriers to its practice.

I have a special interest in trade—much of New Mexico's mining industry has been wiped out by unfair trade. Unemployment statistics for the mining segment of New Mexico's economy indicate that between 1984 and 1985, 21,000 jobs were lost to foreign mining interests. Layoffs have occurred in virtually all facets of mining and they are continuing. In 1985, Taos County at the extreme north-central end of my district, already had an unacceptable 20-percent unemployment level; its largest employer, a molybdenum mine, has laid off many of its workers. Now, in 1986, the moly mine has virtually closed down and unemployment in the county is approaching 40 percent. New Mexico's two remaining uranium producers, both in the Grants, NM area, were forced to close their mines and mills in 1985, laying off several hundred workers in the process. In 1986, only one uranium mine continues to operate and it is basically stockpiling its uranium; it has no customers. Similar statistics are found in New Mexico's potash and copper industries.

New Mexicans are not alone in watching the decimation of their mining industries by unfair foreign trade. In 1980, 110,000 American families, most of them from rural areas, were supported by hardworking miners. After 5 years of our much-heralded "support for the American family," fewer than 45,000 families can now make this claim. In 1980, metals mining in the United States was a $9 billion enterprise. After 5 years of the economic recovery about which we all hear, it is now worth less than $5 billion. In 1980, the United States had a manageable trade deficit of under $35 billion. After 5 years of this so-called fiscal responsibility, we now have a trade deficit approaching $150 billion.

One of the most troubling things about both New Mexico's and the Nation's dismal statistics on trade and mining is that these trade policies have hit rural America the hardest. We have not only ignored the causes of this dislocation, but we have ignored the result—the hundreds of thousands of workers who need our support and assistance. The downturns in mining, brought about as a direct result of unfair trade, have hurt rural areas more than urban areas,

Western States more than Eastern States. These areas are the least equipped to deal with large-scale unemployment; local economies are not diversified, services are limited or nonexistent, retraining possibilities are few, relocation is seldom an option.

Mr. Chairman, the administration's response to the trade deficit, in boxing parlance, has been a light left jab. The bill we are considering today is a stiff left hook, to signal to our trading partners that we mean business and that we want their trade.

The time has come to blow a loud whistle on the trade deficit and to demand a specific plan of action. The administration ignores this problem and hopes that it will go away. It is too late for Band-Aids and Dr. Feelgood lectures. the American people are starting to feel the pain.

The costs have been high. Four million American workers have lost their jobs, their livelihood has been jerked from under them and sent overseas. The future costs are higher: an eroding industrial base, a declining economic growth rate, an American potentially less secure and shrinking opportunity for America's youth.

We need to level the playing field and demand that other countries treat our exports the same way that we treat theirs.

Foreign governments have got to stop such practices as taxing American products just enough to make it impossible for the consumers to buy them or stalling our exports with interminable redtape or requiring that any advertising of American products be in English, which potential customers in their countries cannot read.

The message is simply this: Stop, we cannot take it, and we will not take it any more. Unless you correct this mistreatment, trading partners, we will retaliate.

That, to me, is a level playing field—fair trade.

Mr. COATS. Mr. Chairman, I yield 2½ minutes to the gentlewoman from Connecticut [Mrs. JOHNSON].

Mrs. JOHNSON. Mr. Chairman, I have been a strong advocate of comprehensive trade law reform and the adoption of procompetitive policies by both Government and the private sector, business, and labor. Government should not relieve business of its responsibility to modernize but should guarantee business and America's working people the right to compete on equal terms. Whether you call it fair trade or a level playing field, it is jobs to people I represent.

Last year, I developed a package of initiatives to assure fair competition and encourage trade expansion and am pleased that many of the ideas outlined in my original package were embraced by Democrats and Republicans. The bill before us moves toward creating sounder trade laws to serve us in the decades ahead but missteps seriously.

The sections in the bill which advance reciprocity as the guiding principle, codify that industrial targeting is unfair and extremely injurious, strengthen laws to protect U.S. innovation, seek to open telecommunications opportunities in foreign markets, speed relief, toughen penalties, and make the USTR more accountable to offer effective response to unfair trade practices and progressive initiatives and need to be approved by this body.

In addition, the bill incorporates legislation I initiated with LYNN MARTIN and others last September which shortened the timetable for responding to 232 petitions and would have implemented remedies for the machine tool industry had the President not acted today, and I commend him on the strong actions he took to seek VRA's. Furthermore, it relaxes export controls on products that are clearly available from foreign producers and frees our resources to more effectively prohibit the export of militarily sensitive technology.

But as a legislator representing a State that is among the top exporting States in the Nation, with one in seven jobs related to exports, I must express my deep reservations about the sections which seek to undermine the international trading system by forcing arbitrary formula reductions in our trade deficits with some of our most important trading partners. This is plainly bad policy that will backfire and cost my constituents jobs.

Another provision which concerns me exposes U.S. buyers to retroactive penalties for accepting dumped goods and would pit one American company against another unfairly and unproductively—making us weak, not strong. I agree we need better antidumping laws, but they should be against the dumpers, not our own people. In fact one of my disappointments is that the bill does not include the possibility of prohibiting access to America's market except after multiple offenses. Since the purpose of dumping is to gain market share, no penalty but exclusion will end this practice.

In view of the important reforms contained in the committee bill backed by the members of both parties, I hope that we will be able to keep our heads this week and pass amendments to clean this legislation up, or I believe it will be left up to the other body to save us from ourselves. Trade law reform has been a long time in coming. Let's do it right.

□ 1730

Mr. FLORIO. Mr. Chairman, I yield 1 minute to the gentleman from Louisiana [Mr. TAUZIN].

Mr. TAUZIN. I thank the gentleman for yielding me this time.

Mr. Chairman, to the great majority of Americans who have a job today, this bill may be meaningless. In fact, those great Americans who are working today might be enjoying the fruits of cheaper goods imported from foreign lands.

But to those Americans who are without jobs, let me point out to you that this ought to be a nonpartisan effort. To the unemployed AT&T worker in Shreveport, LA, who has lost his job because AT&T relocated to Singapore; to the American shrimper working in the Gulf of Mexico who has to compete against shrimp caught in Mexico with Goverment-sponsored diesel at 18 cents a gallon, this bill says he has a chance again to work in America.

It says that the unemployed American, be he Democrat or Republican, you have a chance to share in the American dream by working and earning a decent income for your family.

To the minority of Americans who have been denied their jobs, the majority of Americans ought to stand and say, "This is no Democrat or Republican issue; this is an issue to provide employment for Americans."

I am particularly pleased that the bill contains a resource subsidy provision that would do something for the American shrimper; provisions to protect the jobs of the AT&T worker in Shreveport and all in America who have lost their jobs to unfair foreign trade practices.

Mr. COATS. Mr. Chairman, I yield myself the balance of my time.

Mr. Chairman, I join with many today who, on both sides of the aisle, have for several years called for and worked for meaningful trade reform. There is no question in my mind that changes in our trade laws need to be made. I have introduced legislation, worked with the U.S. Trade Representative, the Department of Commerce, the USDA, the FCC and other agencies, and I have worked with both industry and labor to draft and support meaningful trade reform legislation.

Six months ago, I was hopeful that we were on our way to substantive, workable trade reform that could have brought real relief to American industry and the American worker. But somewhere along the line the trade reform train picked up a lot of excess cars loaded with a lot of excess baggage—tariffs and quotas against countries with high trade surpluses with the United States, without regard to which products are treated fairly or unfairly—the Gephardt amendment.

The Pease amendment that requires adherence by our trading partners to world labor standards even if the United States does not impose those standards. A Council on Industrial Competitiveness, a bureaucratic body

that would impose industrial policy on American taxpayers. That would divert capital and resources; pick winners and losers. Does anyone here truly believe that a Washington bureaucrat is capable of determining which industries should succeed and which should fail? Does anyone doubt that this process would become highly politicized as soon as it is imposed?

What started out as a bipartisan effort to address real trade concerns has turned into a partisan election year effort that unfortunately addresses the politics, but not very much of the substance of our trade problems.

This bill is not trade reform; it is trade retreat. This bill is not a market-opening bill; it is a market-closing bill. This bill is not a jobs-producing bill; it is a job-reducing bill.

We have a chance to get the trade reform train back on the right track without the unnecessary baggage. The Michel substitute adopts the best of the current trade law reform proposals. It provides stronger, broader relief to industries threatened by unfair trade practices, including foreign industrial targeting. It cracks down on dumping and subsidized imports; counterfeiting and repeat customs law violators. It also attacks the problems of closed telecommunications markets and unfairly priced natural resources with tough but fair new rules.

Most importantly, the substitute provides for expanded agricultural exports. Expanded sales of manufactured goods; expanded services. It opens doors to America's products which means American jobs.

Let us respond to our serious trade problems with fair and strong legislation, not with partisan posturing. Our purpose in changing the trade laws should be to ensure a better trading system now and in the future to protect U.S. jobs and to open markets for U.S. producers. Unfortunately, the bill before us does none of these.

Fortunately, the Michel substitute points the direction in which we should go in addressing our trade problems.

Mr. FLORIO. Mr. Chairman, I yield 1 minute to the gentleman from Ohio [Mr. ECKART].

Mr. ECKART of Ohio. I thank the gentleman for yielding me this time.

Mr. Chairman, I rise today in support of H.R. 4800. The President accuses us who support this bill of protectionism. Well, the American workers, I think, can accuse him of surrender. For the first time in this century, the United States has become a debtor nation.

There is no doubt about it, this is in fact a jobs bill, Failing to pass it makes us accessories to the cirme of sending our jobs overseas forcing more families into unemployment rolls of which we find 40,000 in my State already having lost their job to foreign competition

This bill protects American workers from the American Government, for indeed, we discovered during the course of these hearings that our own GSA has been puchasing materials for the defense stockpile from foreign manufacturers who are dumping their goods in the United States.

Mr. Chairman, it is not enough simply to retool our factories; we have to reskill our workers and this bill provides adequate training and educational opportunities for workers who have lost their place and look to us for some help.

Most importantly, Mr. Chairman, this bill sends a most important, strong and clear message to our trading partners who have allowed unemployment to pile up on our shores while their goods fill our stores

Mr. FLORIO. Mr. Chairman, I yield the balance of my time to the gentleman from Massachusetts [Mr. MARKEY].

Mr. MARKEY. I thank the gentleman for yielding time to me.

Mr. Chairman, I rise in support of the amendments to the Foreign Corrupt Practices Act contained in title VII, section 701 of the bill.

The Foreign Corrupt Practices Act was passed in 1977 to address the embarrassing revelations of a large-scale corporate bribery of foreign government officials. Some of America's biggest corporations were involved.

After lengthy hearings by the predecessor subcommittee to the Subcommittee on Telecommunications, Consumer Protection and Finance, the subcommittee reported the legislation, which was then reported by the predecessor committee to the Energy and Commerce Committee. It passed the House of Representatives without opposition.

In recent years, concerns have been raised by responsible members of the business community that the law may be unclear in certain respects. I have been sympathetic to those concerns, but I have not been sympathetic to a number of earlier proposals, particularly those from the administration and from the Senate, which, in the name of "clarifying" the law, would have introduced vague, new terms and opened wide loopholes in the law.

The lengthy hearings and review process undertaken by the Committee on Energy and Commerce and its subcommittees has produced the narrow, clarifying and strengthening amendments that are part of the legislation before us today. They demonstrate that this committee and the House of Representatives support a strong, antibribery law—one that is clear and that has the support of the business community.

Mr. TALLON. Mr. Chairman, we are considering today a measure which can restore America's competitive edge in international trade. H.R. 4800 is balanced, timely, and vital legislation to provide fair as well as free trade. It requires the President to take action in response to certain kinds of practices which keep American products out of foreign markets or which give unfair advantage to foreign exports. It also provides assistance to American companies and workers hard hit by foreign competition, and helps promote U.S. exports in world markets. What this bill does is eliminate unfair trade practices and provide a level playing field for international trade between the United States and its trading partners.

No one can deny that we must act now to prevent the erosion of America's manufacturing base and our status as a world power. We need a trade policy now. Our present trade practice of transporting in goods and transporting out jobs cannot be continued. If we do not aggressively pursue trade reform, the result will be the transfer of economic strength to other nations and the resulting decline in American power.

I hope my colleagues will have the courage to stand up for American industry in the face of a multiplicity of quotas, tariffs, and restrictions by foreign governments. Up to now many of our leaders have failed to tackle our trade problem because they are afraid of a single word—protectionism. Our decline in economic strength is largely the result of a war of words on American trade policy. On one side are the free traders; on the other side are the protectionists. They are both creating a great deal of noise, but unfortunately both are defending a myth.

They argue textbook theories and ancient history without regard to the real economic world marketplace.

As a result, the United States has no rational trade policy that might reduce our $150 billion trade deficit and enable us to compete in new and constantly changing world trade.

First, to dispell the myth, pure free trade does not exist now and never has. Neither does its ideological opposite, pure protectionism.

To look at the real world:

At least half of the world trade is affected by some sort of protectionism—tariffs, quotas, subsidies, or other measures that distort trade by preventing its free flow.

Fully 40 percent of the world trade is not between countries but between branches of multinational companies.

Almost every nation except the United States has a trade policy, and makes it part of its overall foreign policy.

In view of these practical realities, the administration's blind faith in free trade is ridiculous. Yet, on the other side, protectionists take a meat-ax approach by proposing a blanket 25-percent tariff, as though all imports are equal and all countries deserve the same treatment.

With today's technology and communications systems, modern factories can be built around the world, taking advantage of the lowest wages, while being directed by headquarters in New York.

Therefore, the theory of "comparative advantage" is no longer a natural occurrence,

but can be created by any country or multinational corporation willing to go to the trouble. This is the biggest cloud on the U.S. trade horizon.

Some of our problems will disappear as the dollar weakens, but the threat of low-wage competition will continue. This is why we need a full-fledged trade policy, based on world realities. Our Government policies on taxes, industry, investment must be shaped to promote trade and expand industry jobs. H.R. 4800 is an important step in this direction. It requires the President to take action to address harmful trade barriers, remove export controls, and stabilize international currency markets.

Does this imply some protectionism? Yes, but aren't our industries, jobs, communities, our standard of living worth protecting? In economic defense, like in military defense, the question is not if, but how.

We have an arsenal of offensive and defensive weapons—duties, quotas, subsidies, tax incentives, bilateral agreements. The key is a set of rational, practical trade policies using what works best in specific situations. And that is what we have here with H.R. 4800.

A trade policy for our Nation is long overdue. It is time to jettison the myths and start dealing with the real world. If "protectionism" offends the ear, we can call it "managed trade" or "organized free trade" or some other fancy name. At this stage, what we call it is less important than whether we do it.

Mr. RODINO. Mr. Chairman, I rise in support of H.R. 4800, the Trade and International Economic Policy Reform Act of 1986.

For too long, there has been a passive approach taken by some of our trade officials to a range of fiscal and trade issues currently causing distress. It has now been left to Congress to take the "fight" rather than "flight" response to competitive challenges from abroad. I believe H.R. 4800 offers such a plan. By providing for assertive responses to unfair trading practices and barriers to entry abroad and healthy competition policies at home, this legislation is an important step in returning America to its leadership position in exports, high technology, and R&D breakthroughs.

This legislation takes a comprehensive approach to our current problems. The Committee on the Judiciary has worked closely with other committees on a wide range of issues coming within its jurisdiction. These matters include extending greater intellectual property protection to domestic patent holders, fashioning more responsive remedies for American companies against foreign dumping and other unfair trading practices and clarifying and strengthening provisions of the Foreign Corrupt Practices Act.

I would like to offer some comments on those provisions of H.R. 4800 that would amend the Foreign Corrupt Practices Act of 1977. As you know, that act was a needed response by Congress to combat increasing instances of improper conduct by certain domestic concerns in securing or performing commercial contracts. To assist compliance, the Department of Justice in 1980 set up a business review program whereby businesses could submit information to the Department about prospective conduct in order to determine whether such conduct would conform with the DOJ's enforcement policy under the act.

As initially reported from the Foreign Affairs Committee, the amendments to FCPA in H.R. 4800 were generally very salutary in making necessary refinements to the description of offenses to be covered as well as the appropriate penalties to be levied if violations occur. However, I had very strong objections to those features of the proposed changes that went beyond already-established business review programs at the DOJ such that the Department of Justice would have become transformed from an enforcement agency into a regulatory body with adjudicatory powers.

I am pleased that an amendment I offered to correct these problems was adopted in the text of the legislation under floor consideration today. I want to briefly explain the intent of the amendment.

It is clear that the role given the DOJ by Congress in assisting business with statutory compliance in various areas of business dealings has always been advisory in nature. Congress has carefully avoided delegating to the Department powers that would place this enforcement agency in the untenable role of a quasi-adjudicatory body making binding determinations affecting the rights and property of private parties. Thus in all business review programs set up by Congress at the Department, the aim has been to carve out an institutionally acceptable role for the Department in assisting business planning without undermining its fundamental mission as the chief enforcer of the Federal laws of the United States. When the business community came to the Judiciary Committee to seek assistance in setting up export trading companies in 1982 and R&D joint ventures in 1984, we fashioned, and Congress enacted, business review programs that struck this balance between enforcement concerns and business planning.

Neither the Export Trading Company Act nor the National Cooperative Research Act conferred absolute immunity for conduct disclosed to the DOJ for the simple reason that the DOJ is not a tribunal or finder of fact empowered to collect evidence under oath about whether the submitted information is totally accurate and complete. In short, disclosure of conduct could not reasonably be equated with statutory compliance. That is, of course, the function of the courts. It was reasoned that it is never a good idea for the DOJ to assume the dual function of being both the investigator and the adjudicator. This is even more true when the statute we are dealing with involves potentially criminal behavior.

The reported provisions of H.R. 4800, however, had placed the DOJ in exactly that role. That version provided that any initial opinion by the Attorney General about disclosed prospective behavior was to be "final and binding" on the Department such that the courts would have been precluded from making an independent assessment of the evidence. Moreover, such a scheme would have also been self-defeating: By mandating that the DOJ's determination be final and binding, and mandating that the Attorney General reach a decision in only 30 days, the DOJ would have become very reluctant to give its approval to any submission.

The amended language that was adopted simply comports the basic features of the disclosure system set up for FCPA concerns with many features of programs currently used by the Department to evaluate activities of export trading companies and joint R&D ventures. Most significant, the new provisions drop the "final and binding" language and, instead, treat the Attorney General's initial determination concerning disclosed conduct as creating a rebuttable presumption of compliance with the statute, which can only be overcome by a preponderance of the evidence.

A rebuttable presumption of compliance is exactly what the Attorney General may reasonably offer a business submission under a 30-day review period: Businesses may rely on the determination to the extent that their conduct falls within the scope of the disclosed information. Additional disclosures for new or different behavior may further widen the scope of conduct deemed presumptively valid if later challenged. It is the submitting business concerns, however, and not the Attorney General, that possess the knowledge of whether their prospective conduct does in fact comport with the disclosure made to the Attorney General. All that the Attorney General may do in these circumstances is to state whether the disclosed conduct, as provided by the submitting parties, comports with the DOJ's present enforcement intention. Should evidence of noncompliance with the FCPA arise, the enforcement agency could then gauge whether disclosure was sufficiently accurate and complete to warrant further enforcement measures. If so, the Federal courts will be the final arbiter of whether the statute was violated.

The revised language appearing in H.R. 4800 also strengthens the confidentiality protections that businesses will have when they disclose information. I am very sympathetic to the concerns of the business community that strict confidentiality attach to any materials or information submitted to the Department in a business review procedure under the FCPA. In 1984, I worked diligently to ensure that the most comprehensive safeguards on proprietary information be implemented in the DOJ's review of proposed joint research and development activities. This included protection from FOIA requests initiated by private parties as well as from public disclosure by officials. Both these features now appear in the text of H.R. 4800.

In order to enhance compliance with the provisions of the FCPA, the legislation establishes a procedure for the Department to issue guidelines describing hypothetical conduct that would or would not conform with the Department's present enforcement policy regarding FCPA violations. As with other guidelines issued by the Department, the language makes clear that the guidelines do not by themselves establish the statutory standards by which courts, as the ultimate arbiters of the act, might judge conduct under the FCPA.

I greatly appreciate the cooperation of Chairman FASCELL and the Committee on Foreign Affairs in working out our mutual concerns about these amendments to the FCPA. Together with the other provisions of H.R. 4800, this legislation should greatly enhance

America's competitive position in the international marketplace. I urge my colleagues to vote for passage of this important measure.

Mr. KASTENMEIER. Mr. Chairman, I rise to discuss the omnibus trade bill. In particular I wish to address the portion of the bill which relates to intellectual property and trade. This section has been developed cooperatively between the Ways and Means Committee and the Committee on the Judiciary. Indeed one section of the bill—relating to amendments to section 337 of the Tariff Act—is identical with my bill H.R. 4747 (a measure reported unanimously by the Subcommittee on Courts, Civil Liberties and the Administration of Justice of the Committee on the Judiciary).

INTELLECTUAL PROPERTY AND TRADE

It is now commonly accepted that the United States should take steps to address our serious trade problems. Increasingly the private sector, Government officials and politicians have fixated on worldwide protection of American intellectual property as one of the keystones to addressing the trade problem. Without question, the American creative genius has been nurtured by strong legal tradition of protecting the property rights of intellectual property owners. As we think about adjusting our lives and laws to meet the trade problem, I hope that we can proceed in a balanced, dispassionate and objective way. As important as this task is we should not take precipitous action as a palliative for short-term problems.

Before outlining what are, in my view, the elements of a coherent and comprehensive approach to intellectual property and trade, let me set the context.

Our key intellectual property laws—copyright and patent—are derived from the constitutional mandate to "promote the progress of science and useful arts, by securing for limited times to authors and inventors the exclusive right to their writings and discoveries." (U.S. Constitution art. 1, section 8, clause 8). The Constitution envisions a bargain. Creators and inventors receive a benefit—a form of a limited monopoly right. In exchange, the public arguably benefits twice—first, when it obtains access to the creation or invention, and second, when the term of protection expires and the creation or invention is added to the public domain. This bargain furthers the public interest and does not represent in any way recognition of the natural right of creators and inventors to proprietary protection. Thus, our intellectual property laws—including also laws relating to trademark and semiconductor chip mask works—represent carefully fashioned compromises which limit the nature and extent of the rights of intellectual property owners. These limits include concepts such as "fair use" and "first sale" in copyright and the right to engage in "reverse engineering" with respect to mask works.

From a political perspective it is safe to say that our intellectual property laws are neither unlimited nor primarily designed to provide a special benefit. "Rather, the limited grant is a means by which an important public purpose may be achieved." *Sony* v. *Universal City Studios,* 464 U.S. 417, 429 (1984).

This perspective is important to keep in mind when addressing trade legislation affecting intellectual property. In my view, it would be a serious mistake to use legislation relating to international trade as a vehicle for changing the positive law relating to intellectual property.[1] I am also hopeful that we will not ignore the public interest in a rush to protect what are currently perceived by some to be embattled industries.

An omnibus trade bill should include amendments to the Tariff Act to improve the work done by the International Trade Commission.[2] The bill before us does just that. Before outling the features of those amendments, let me first outline the nature of the current remedy, and discuss the possible reforms.

BACKGROUND AND CURRENT LAW

The purpose of section 337 is to provide a remedy for unfair methods of competition in import trade that substantially injure, tend to substantially injure, or destroy an efficiently and economically operated domestic industry. This statute, which was first enacted in 1922, took its current form in 1974.[3]

The vast majority of section 337 cases have been based on allegations of infringement by imports of U.S. intellectual property rights, for exmple, patents, trademarks or copyrights.

A violation of section 337 usually leads to exclusion from entry into the United States of the articles connected with the unfair trade practice. Such an exclusion order can cover not only articles of persons over whom personal jurisdiction existed and who participated in the proceedings to determine violations, but also articles of importers and foreign manufacturers who never participated in the proceedings and over whom no personal jurisdiction existed in the United States. Such an order can apply to the articles of persons who did not start to produce the articles until well after the order was issued. As such, it is an extraordinary remedy which allows broad relief to a holder of intellectual property rights or other individual harmed by an unfair practice.

SECTION 337 REFORM

After receiving a complaint under section 337, the Commission has 30 days to decide whether to institute an investigation. After a case is instituted, it is delegated to an Administrative Law Judge (ALJ), who holds a preliminary conference usually within 45 days. In cases involving requests for temporary relief, the ALJ has 4 months in which to issue a preliminary determination. The Commission may review this initial determination and, if necessary, fashion a temporary remedy, which may be disapproved by the President for policy reasons.

With regard to permanent relief, the ALJ has 9 months to determine whether or not there has been a violation of section 337 (14 months in "more complicated" investigations). Again, the Commission may undertake a review to affirm, reverse, or modify the ALJ's determination and, if necessary, to fashion a remedy. The Commission has 1 year after the institution of the investigation to complete the case (or within 18 months if it finds the investigation to "be more complicated"). The President has 60 days during which his disapproval of the Commission's determination can be intered.

My subcommittee—the Subcommittee on Courts, Civil Liberties and the Administration of Justice—conducted 2 days of hearings on the various legislative proposals to amend section 337 (for example, title II of H.R. 3776 and title II of H.R. 4539). Two primary issues emerged during the hearings. First, a vast majority of the witnesses[4] and other commentators[5] advocated elimination of the "injury" and "efficiently and economically operated industry" requirements. Second, some witnesses urged elimination of the domestic injury requirement. Both of these issues are addressed in the omnibus trade bill.

Proponents of change argued that proof of injury in intellectual property cases should not be required. They asserted that acts of infringement of an intellectual property right should be sufficient. They pointed out that under the trademark and copyright laws a Customs order can be obtained for those types of infringing goods without proof of injury. Moreover, they argued that because these intellectual property rights involve the right to exclude others from using or practicing the protected property that injury should be irrelevant. Finally, although injury determinations have rarely prevented relief before the ITC advocates for change nonetheless claimed that litigating the injury question is unduly burdensome and expensive.

Opponents of removing "injury" tests have argued that such a move would violate the General Agreement on Tariff and Trade (GATT). This view was contradicted by the United States Trade Representative, a leading academic expert (Prof. Robert Hudec of the University of Minnesota Law School) and most other witnesses. Opponents also argued that the "injury" requirement serves to keep the rights of complainants and respondents in equilibrium. They observed that in exchange for less procedural protections in an ITC proceeding the respondents are able to avoid liability unless there is the additional showing of injury. This position was rejected by proponents on policy grounds. They argued that the "injury" test only makes sense when nonintellectual property rights are being asserted and that inclusion of the requirement by Congress in 1930 did not anticipate the use of section 337 to enforce intellectual property rights.

The omnibus trade bill eliminates both the "injury" and "efficiently and economically operated industry" requirements. The language used is largely derived from the language adopted by the Ways and Means Committee and the Committee on the Judiciary.

The administration (H.R. 4585) and Congressman Moorhead (H.R. 3376) advocated elimination of the "domestic industry" requirement. This approach was opposed by organized labor, Allied-Signal, Corning Glass Works, the chairperson of the ITC and the Intellectual Property Owners Organization.[6] Some witnesses before my subcommittee and before the Trade Subcommittee urged a slight modification of the definition of "industry" insofar as it applied to intellectual property cases. In essence these witnesses argued that the ITC has created an inconsistent set of rules to determine whether an industry exists.[7] The proposed amendment in the omnibus trade bill clarifies the results of previous

[1] Footnotes at end of article.

ITC decisions [8] and corrects some recent incorrect applications of the Commission in more recent cases.[9] The amendment makes clear that a "domestic industry" can exist through the development of a "licensing" industry. The amendment also makes certain the availability of section 337 relief to universities who have made substantial investments in engineering, or research and development in connection with the exploitation of an intellectual property right.[10] The language used in the amendment is a combination of that found in H.R. 4539 and that found in the bill reported by the Trade Subcommittee. Deleted from both versions is language relating to "sales and marketing." As many of the witnesses indicated, the "domestic industry" requirement will serve as a gatekeeper to prevent the excessive use of the ITC under section 337. The inclusion of "sales and marketing" activities in the United States was seen by most commentators as being too broad.

PROCEDURAL REFORMS

During the course of the hearings on this bill a number of procedural suggestions also were made to improve the efficiency of ITC operations. These changes appear to have the support of virtually all commentators. A complete description of these changes can be found in the Ways and Means Committee Report.

In conclusion, I urge my colleagues to support those provisions of the bill that relate to intellectual property and trade.

---

[1] For example, we should avoid taking sides in the grey market or parallel import issue in trademark law or on first sale in copyright law, or on reverse engineering in mask work law.

[2] Additional measures to further classify the rights of intellectual property owners have already been considered. Congress—through legislation processed by the Committee on Ways and Means—has given the United States Trade Representative and the Department of State powerful weapons to use in bilateral negotiations in the context of the General System of Preferences (GSP) and the Caribbean Basin Initiative (CBI). By permitting GSP and CBI benefits to be affected by the adequacy of our trading partners' intellectual property laws we have already wielded a big stick to induce greater intellectual property protection abroad.

Currently pending before my Subcommittee are two important measures affecting patent rights: process patent protection and legislation to implement the Patent Cooperation Treaty. Enactment of these measures would further align American law with internationally accepted norms of patent protection.

Finally, there have been proposals to make an intellectual property code part of the GATT and to adhere to the Berne Convention. I emphatically note, as others have done, that both of these initiatives raise serious issues for domestic law. And I have been assured that the administration will not proceed on these fronts without full consultation with both the House and the Senate, including all the relevant committees.

[3] The Commission has instituted 240 investigations under section 337 since 1974. Of these, 19 are pending. The following table breaks down the results of the 221 completed investigations:

Voluntary terminated	127
No respondent appeared	40
Remedy put in place	(33)
Violation found	28
Remedy put in place	(23)
No violation found	26
Total completed	221

[4] United States Trade Representative, Allied Signal, Genentech, and Corning.

[5] E.g., NAM, CBEMA, U.S. Chamber of Commerce, E.I.A., IPO, A.I.P.L.A., and organized labor.

[6] In this regard, it was postulated that such a change would transform the ITC into an intellectual property court. They also claimed that it would make the ITC forum available to two non-domestic companies with no United States investment to argue about access to the United States market.

[10] Compare, Certain Limited-Charge Cell Culture Microcarriers, supra.

Mr. WALGREN. Mr. Chairman, many Americans have been alarmed at the Nation's trade imbalance. In 1980, the United States had a trade deficit of $24 billion. By 1985, it had zoomed to $150 billion, a level unprecedented in our history. Since 1980, the buying power of the U.S. dollar overseas jumped 40 percent, making American exports expensive for foreign consumers while reducing the price of foreign imports for Americans. The resulting flood of imports has been called the worst trade crisis since the Great Depression.

The strong buying power of the dollar abroad is the result of the unprecedented Federal deficits that have grown from $29 billion in 1979 to $200 billion in 1985. These deficits come from the administration's tax cuts reducing revenues from the budget and increased defense spending.

The real crime in trade deficits is the erosion—in fact elimination—of American jobs. A shift of $60 billion in the trade deficit means a loss of 2 million jobs. For every $1 billion increase in the trade deficit, 25,000 jobs are lost. Estimates of job losses because of the rise in the trade deficit since 1980 range from 3 to 4 million. America's No. 1 export has now become jobs.

TRADE BILL OUGHT TO HELP

I am ready to stand first in line today to support H.R. 4800, the Omnibus Trade Act of 1986. This bill would change the trade laws and our mechanisms for stopping illegal imports. It is widely agreed that: First, our current trade laws have not worked; and second, the executive branch has not effectively used the laws available to stop illegal imports. This bill would give the U.S. Trade Representative tougher tools to fight imports, would give the President new tools for stabilizing international currency markets to make the U.S. dollar more competitive, and would strengthen export promotion by the Federal Government. And it would provide new assistance for training and retraining American workers dislocated by foreign imports.

I think it especially important that the Ways and Means Committee incorporated provisions similar to my bill, H.R. 4665 giving American industries and workers direct access to Federal courts to stop dumped and subsidized imports and customs fraud. A companion to S. 1655, introduced by Senator ARLEN SPECTER, these provisions are needed because the current methods for seeking relief from illegal imports through the executive branch simply do not work.

Currently, American industries—be they textiles, shoes, electronics or steel—must go through protracted and costly agency proceedings, with the Department of Commerce and the International Trade Commission. A dumping case having any controversy takes an average 11 months, often much longer. Not only is this expensive, the lengthy process also gives the importing industry time to "regroup," to reap huge illegal profits and capture new markets. Forcing injured industries to plod through layers and layers of bureaucracy at a snail's pace is inexcusable. It may be good for the Washington lawyers, but it means lost jobs and shattered economies in places like my hometown of Pittsburgh.

Another problem with current law is that if and when relief if finally granted by the ITC, the relief is only for the future—usually countervailing duties on future imports. Under my bill, courts could award damages, attorneys fees, and injunctive relief against further imports. In other words, courts could stop the imports immediately and make monetary awards to the injured American industry for the injuries.

Having only prospective relief also creates an essentially riskfree situation for the dumper. They know they can export to this country with few adverse consequences except duties on future goods. They will only be punished in the future, if stopped. Thus, present law has very weak deterrents against illegal trade practices. My bill would create the possibility of heavy penalties for past illegal acts.

My bill and the provision in the trade bill would take trade enforcement out of the political arena. In the executive branch, effective trade enforcement has fallen prey under many administrations to political considerations, with seemingly little regard for the beleaguered industries and communities hurt by illegal imports. By adding the courts as an avenue for redress, cases would be less susceptible to political manipulation.

Since 1980 the number of antidumping cases filed with the International Trade Commission has increased 42 percent, but the trade deficit has escalated unabated.

In the case of steel, imports have been steadily climbing from 15 percent in 1979, to 20.5 percent in 1983, to 25 percent in 1985, at one time reaching a record high of 33 percent. Industry losses in the last 4 years were close to $7 billion. Since 1974, 15 steel companies have gone out of business. Thirty plants have been closed and 560 producing units in other plants have been terminated. Thirty million tons of capacity have been eliminated. Employment in the industry has been cut in half. The administration, rejecting quotas on imports, has attempted to implement voluntary restraint agreements, but clearly this policy is not working. The VRA program's goal is to hold imports to 20 per-

cent, but 1 year later imports were hovering at 25 percent. Of course 25 percent is preferable to, for example, 38 percent, which some say would be the figure without VRAs. But even so, VRA's stop only future imports; they do not levy any penalties for the unfair imports of the past.

Additionally, there is significant evidence that these voluntary agreements, are being circumvented, there is evidence of transshipment of steel from a VRA country through a non-VRA country, thereby changing to country of origin in violation of our customs laws. Witnesses before Congress have testified that products are shipped from a controlled VRA country to a non-VRA country where they undergo superficial transformation. The final product is then deemed to be eligible because it is not credited to the controlled actual country or origin. In products like apparel and footwear, there are many cases of products being mislabeled or simply declared to be something which they are not, to evade import laws. We need tools to give U.S. industries a right to go to court to fight such customs fraud.

Passage of this bill, I hope, will be one glimmer of hope for communities like mine that are still reeling from these mammoth deficits. I hope my colleagues will join me in voting "aye."

Mr. MAVROULES. Mr. Chairman, I rise today in support of H.R. 4800, the Trade and International Economic Policy Reform Act of 1986. This bill will provide our Nation with the tools needed to combat an unprecedented U.S. balance-of-trade deficit. Moreover, this legislation will lay the basis for America's long term competitiveness in international markets. It is, in short, the most comprehensive trade legislation ever debated in the U.S. House of Representatives.

There are few initiatives that enjoy the degree of support that we find today behind this particular piece of legislation. The bill itself represents an enormous effort on the part of seven different committees—it is the product of countless hours of hard work, and the efforts of a great many of our most distinguished colleagues.

More importantly, however, is the simple fact that this issue—the problem of U.S. trade—hits home with virtually every Member of the U.S. House. There is not one of us here today who does not represent people back home who have been adversely impacted by America's massive trade deficit. The problem is one that affects us all. Everyone of us. And lets not kid ourselves. We must take action before it is too late.

A brief look at the statistics is enough to demonstrate the magnitude of the problem:

An annual trade deficit in 1985 of $148.5 billion;

An accumulated deficit from 1981 through 1985 of $432.6 billion;

A net external debt in 1985 of $101 billion; and

A loss of approximately 1.7 million manufacturing jobs to foreign competition over the last 5 years.

And the list goes on. The figures are simply overwhelming. They become particularly disturbing when each one of us begins to consider the local ramifications—the dislocations and hardships suffered in our own States and districts. In my home State of Massachusetts, we are particularly dependent on foreign trade. In fact, over 15 percent of all the manufactured goods produced in Massachusetts are specifically for export purposes. The entire New England region is dependent upon exports in order to maintain a healthy and growing economy.

But lets not stop here. Let us look at our own individual districts, and at the very cities and towns in which we live. It is here that the issue becomes less abstract. Because it is here that we can see the businesses that have gone under, and the people who have been left without jobs. It is estimated by the U.S. Commerce Department that every billion dollars in the deficit represents 25,000 jobs that are either lost, or could have been created. And again, the balance of trade deficit for last year alone was almost $150 billion. A recent survey by a Washington, DC, economic consulting firm, Joel Popkin & Co. concluded that in the past 3 years, 2.1 million U.S. households included a worker who had lost a job due to foreign competition. This translates into 700,000 households per year.

In my home district—the Sixth Congressional District of Massachusetts—traditional manufacturing industries are struggling to survive. Many firms have been unable to keep above water. The once thriving shoe industry pales in comparison to what it used to be. Textile and apparel producers, and tanneries—the list goes on—have all been hit hard by foreign competition. And believe me, this is not a problem that is unique to the manufacturing sector. America's high technology companies are also finding it increasingly difficult to compete. Last year, for example, the United States experienced a $1 billion deficit in telecommunications trade, and a $16 billion deficit overall in the field of electronics.

Nobody here is asking for a handout. All we are asking is for the opportunity to compete on fair terms. And, above all, we are asking for a trade policy, an end to the confusion, and the ad hoc policies that have characterized the past 5 years. Put quite simply, we need an effective and coherent policy by which to govern U.S. trade.

The bill under consideration today provides that policy. It addresses very specific trade problems, and develops a program by which to reduce the balance-of-trade deficit. It includes provisions and goals for a new round of international trade negotiations. It addresses the problems of volatile exchange rates and LDC debt. It includes educational provisions that will give workers the opportunitiy to improve their skills. And it is consistent with the principle of free and fair trade that dates back to the very first reciprocal trade agreement in 1933.

It is a responsible bill, and a bill that is long overdue. I urge you all to support this landmark piece of legislation.

Mr. BROYHILL. Mr. Chairman, we must reform our trade laws. As one of the leaders in the effort to save our textile industry, I know that American industry today is fighting for its very life against an almost endless list of unfair and illegal foreign trade practices.

Investigations by the Energy and Commerce Committee, on which I serve as the ranking Republican member, have found counterfeiting, quota fraud, targeting, dumping, subsidization, barriers to U.S. exports, copyright and trademark theft, and predatory import surges. Unless these unfair trading practices are stopped, we might as well tell our constituents to put in their applications at McDonalds and Taco Bell because there will be precious few manufacturing jobs left in this country.

I joined with the chairman of the Energy and Commerce Committee, JOHN DINGELL, last fall to draft a bipartisan, far-reaching and fair trade reform bill. We labored long and hard to keep out of that legislation provisions that would cost jobs, rather than create them. We stayed away from things that would add a layer of Federal bureaucrats or waste Federal tax dollars. We refused to help one industry by burdening another. Our efforts were difficult, but successful. The Trade Law Modernization Act, H.R. 3777, was ordered reported by our committee on November 25, 1985, by a vote of 37 to 3.

H.R. 3777 addressed all the basic trade law problems I identified earlier. If the majority of this body wanted to accomplish real trade law reform, rather than partisan posturing, I am confident that Congress could present a bill like H.R. 3777 to the President quickly and with overwhelming bipartisan support.

Now, the opportunity for timely trade law reform may well be lost. H.R. 4800 contains many of the reforms originated in H.R. 3777, but the benefits from those changes will be lost because of other provisions in H.R. 4800 that will cost jobs, waste taxpayer money, set up Federal bureaucracies, and create a fantasy land for lawyers. This is why H.R. 4800 is not supported by many of the businesses it is supposed to help.

For example, H.R. 4800 requires tariffs and quotas against countries with high trade balances with the United States—without regard to whether particular products are traded fairly or unfairly. This is like amputating a leg when the patient has a broken bone. It takes care of the broken bone all right, but it's a rotten way to practice medicine.

Those sections of H.R. 4800 requiring adherence to world labor standards are no better. We don't impose those standards in the United States. It will not help our trading situation to legislate compliance with those standards by other nations.

In the same vein, why establish a council on industrial competitiveness? It won't do anything to help our industries to compete. It's just one more case of the tried and failed Democratic response to any problem—set up a new Government agency to generate paper.

Mr. Chairman, we need good trade law reform desperately. H.R. 4830, the Republican substitute, takes strong action to protect U.S. interests at home and abroad. It will open foreign markets to American goods. It will stop fraud and counterfeiting, and it will allow U.S. officials to act quickly and effectively to stop unfair trade practices.

Let me discuss just one example of the Republican substitute's strengths. The process for obtaining bilateral limitations on textile and apparel imports that are hurting the U.S. industry is too slow and cumbersome. The substitute would address this problem by requiring

the Secretary of Commerce to expedite this process.

What does H.R. 4800 do about this problem? Nothing! I intend to offer an amendment to H.R. 4800 to take care of this glaring omission, but this is just one of the many problems with H.R. 4800.

Our industries don't need bluster—they need stronger trade laws to help them deal with unfair trade practices. Our unemployed workers don't need partisanship—they need jobs. The substitute is strong trade law that will help create new American jobs. I urge my colleagues to support it.

Ms. MIKULSKI. Mr. Chairman, I rise in support of H.R. 4800, the Trade and International Economic Policy Reform Act of 1986. H.R. 4800 is a step in the right direction. This bill puts America back in a strong trading position. It means that industry in my State of Maryland and industry throughout America will once again compete equally with our trading partners for a share of the world market.

This is not a protectionist bill—it does not put our trading partners at a disadvantage—instead, it creates a level playing field. It makes sure that we treat our trading partners the same way they treat us. That is not protectionist—that is fairness. And that is all we ask from our trading partners.

This bill ensures that American industry will become increasingly competitive in the future. It provides programs for American workers in literacy training, vocational education, mathematics, science, and foreign languages, so that American workers will be the best trained, the best educated in the world. And it provides retraining and placement services for workers displaced by changes in international trade and by modernization of American industry.

Earlier this year, in a speech to the Baltimore Propeller Club, I called on Congress to provide a framework of export controls and regulations that are balanced, workable, and intrinsically promotional. The process behind the granting of export licenses is wound up in redtape. It takes a French computer manufacturer only 2 days to get his product out of the country, but it takes his American counterpart 1 or 2 months just to get a Commerce Department license to export goods to Western Europe. This bill streamlines the regulations that shackle American industry.

Finally, this bill goes to the heart of the relationship between human rights and trade. Many of our trading partners subsidize their export industries by denying laborers collective bargaining rights, by denying children the protection of child labor laws, and by denying workers safe and healthy working environments. These human rights abuses, abuses that directly and adversely affect our industries and our workers, cannot be tolerated. Under H.R. 4800, American industry will be able to defend itself against unfair trade practices, including the suppression of human rights and the exploitation of foreign labor.

Mr. Chairman, for too long the industries that made America great—steel and auto—and new high tech industries that will keep America great—telecommunications and computers—have been fighting an uphill battle on an uneven playing field. It's time to level that playing field and to give our industry a fair chance to compete in world markets. That is why I support and urge all my colleagues to support H.R. 4800.

Mr. ALEXANDER. Mr. Chairman, I want to thank the members of all of the committees involved in the bill that we are considering today. The trade bill is an important first step in solving our Nation's worsening trade problem. It certainly provides new avenues of relief for U.S. industries facing trade which is injurious and unfair, and goes a long way toward reforming our trade laws and encouraging our foreign trading partners to end unfair trading practices.

H.R. 4800 is based on the principles of fair trade and enforcing rules of international trade. Its goal is a level trading field for all. Moreover, it is an omnibus bill that addresses the problems of manufacturers, workers, and farmers—all of whom are suffering because of the abysmal trade policies of the Reagan administration.

There is one area that I want to focus on that deserves special attention, especially for those of us who represent footwear and textile-apparel areas, and indeed, any import-sensitive products. This bill requires that if the President reduces the tariffs on items that are not eligible for duty-free treatment under the GSP program, such reductions must be approved by Congress.

Some of us had hoped to limit the President's authority to a much greater extent because this President has shown his callous disregard for the people in these import-impacted industries. His denial of the section 201 request of the footwear industry and his veto of the Textile and Apparel Enforcement Act of 1985 leads us to believe that he will continue to sacrifice these industries on his altar of free trade. Anyone who watched the heart-rending "Today Show" segment last Wednesday morning on what is happening to Mountain City, TN, since the closing of the Burlington Mill will know what I am talking about. I don't need to be convinced. I've seen the devastation already in my hometown of Osceola, AR, when the textile mills closed there.

I would like to go on record that I and many of my colleagues will view the upcoming GATT round with a cynical eye. If the President wants to improve trade in services, fine. If he wants to open other markets to investment, fine. If he can succeed in getting greater access to foreign markets, that's fine too. But he had better not do it by hurting those American industries already battered by imports. He should not have to give away our modest tariff protection in return for other countries adopting policies they should have adopted a long time ago.

The CHAIRMAN. All time for general debate has expired.

Mr. FLORIO. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. MICA] having assumed the chair, Mr. BEILENSON, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill, (H.R. 4800) to enhance the competitiveness of American industry, and for other purposes, had come to no resolution thereon.

□ 1235

A LETTER TO THE EDITOR OF PRAVDA

(Mr. GEKAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks, and include extraneous material.)

Mr. GEKAS. Mr. Speaker, I have here a letter which I am today forwarding to Izvestia in Moscow to the editor of Pravda in Moscow asking them to set the record straight on the remarks of their General Secretary, Mikhail Gorbachev, on the relative information provided for the recent nuclear disaster in the Ukraine, as compared to the accident that happened at Three Mile Island in 1979.

Gorbachev said that the U.S. Congress knew nothing about Three Mile Island until 10 days after that incident occurred. That truth is, and I was there, that a contingent of the Members of Congress came to that island the day afterward, after having learned about it within hours of the incident occurring. I greeted them. They held a press conference, were briefed and the entire country and the whole world knew about it, let alone 10 days afterward, on the day that the incident happened.

I have no illusion that Izvestia and Pravda are going to print my letter. I also predicted that the '76'ers were going to win the NBA championship; however, I am going to forward copies of this letter to the media in Western Europe so that they will understand that in truth Gorbachev was wrong.

Mr. Speaker, I include the letter to the editor, as follows:

HOUSE OF REPRESENTATIVES,
Washington, DC, May 19, 1986.

Re letter to the editor.

VIKTOR G. AFANASYER,
Editor, Pravda, c/o Vitaliy Vladimiovich, Chevy Chase, MD.

DEAR MR. AFANASYER: General Secretary Mikhail Gorbachev did not correctly represent the facts when he implied, in his first statement after weeks of silence on the Soviet Union's nuclear accident at Chernobyl, that timely information on the 1979 accident at the Three Mile Island (TMI) nuclear facility in the United States was withheld from the world. His claim that the U.S. Congress was not notified until ten days after the nuclear accident at TMI is incorrect.

As a member of the Pennsylvania State Senate representing the TMI area at the time of the accident (I currently represent that area as a member of the United States Congress), I myself went to the TMI facility immediately on the day of the accident, and I know the swiftness with which the news of the accident had been made known to the world.

Here are the facts:

1. I can attest to the fact that within hours of the accident representatives of the international media, national broadcasters and journalists as well as the local media converged on the site and gave the world continuous accounts of the accident;

2. Agencies of the American government at the local, state, and federal levels were informed of the events of TMI within hours of the accident's discovery;

3. The President of the United States was notified of the TMI accident at 9:15 a.m., just five hours after the accident was discovered by plant officials. President Jimmy Carter personally toured the nuclear facility four days after the accident;

4. Members of the Congress of the United States were notified on the day of the accident. I personally greeted several members of Congress who visited the site the day after the accident; an impromptu press conference also attended by members of the international media was held immediately upon the conclusion of a briefing.

General Secretary Gorbachev cannot justify the Soviet Union's withholding of information about its nuclear accident at Chernobyl by accusing the United States of doing the same at Three Mile Island.

Very truly yours,

GEORGE W. GEKAS,
Member of Congress.

TROOP WITHDRAWAL LEGISLATION

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, I have introduced legislation to cut the number of American troops stationed abroad by nearly one-half over the next 5 years.

We have been cajoling, threatening, and begging our allies for years to spend more for the common defense. Nothing has happened. In 1978, all of NATO got together and we all promised to raise our defense spending by 3 percent a year. During the 1981 to 1985 period, only one nation kept that pledge—Uncle Sucker.

In 1981, the Government of Japan promised to take over defense of sea and air lanes within 1,000 nautical miles of Japan. Yet, Japan still spends less than 1 percent of its GDP on defense. We spend nearly 7 percent.

It's clear to me that if we want our allies to help more with the common defense we have to do more than plead and threaten. We have to force them to take over their own territorial defense.

Now, the idea of the Germans defending Germany and the Dutch defending the Netherlands does not strike me as radical. What I propose is a new division of labor, where we provide strategic and common defense needs and our allies defend their own land and the sea and air lanes connecting them with the rest of the world.

The way we achieve this goal is simple: Over the next 5 years we withdraw 10 percent of our troops stationed ashore each year. There's no threat or ultimatum involved. We simply redeploy our limited defense resources to other vital common defense needs.

Right now, we have approximately 250,000 ground troops in Germany, 75,000 in other European NATO countries, 40,000 in Korea, 50,000 in Japan, and 50,000 elsewhere. Under this legislation, the number in NATO countries would drop by 35,000 a year until reaching the level of 165,000 in fiscal year 1991. The number in other countries would drop by 10,000 a year to reach the level of 87,000 in fiscal year 1991. How the Pentagon wants to manage these troop reductions is their business.

The legislation goes on to say that for every two divisions brought home, one would be decommissioned. Hence, over the next 5 years, the overall size of the active duty military would drop by 100,000 or 5 percent. This would result in substantial savings in the military personnel and operations and maintenance accounts. The other soldiers brought home would be stationed at existing facilities. Since it is less expensive to maintain soldiers in the United States than abroad, this would also save money. Obviously, such a repositioning would involve some airlift and sealift cost and some military construction cost. We might also want to expand the reserves.

Yet, the primary purpose of this legislation is not to save money. The probability of an extended, manpower-intensive, World War II-style land war in Europe is remote. Yet, our huge troop presence in Europe is so that we can fight such a war. I, frankly, believe there are other, higher priority missions for our military to perform.

I intend to offer the contents of this bill on the defense authorization legislation when it comes to the floor.

A FORCED CHOICE IS NO CHOICE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. SOLARZ] is recognized for 5 minutes.

Mr. SOLARZ. Mr. Speaker, I rise today to introduce legislation to correct an injustice recently affirmed by the Supreme Court. On March 25, the Court upheld the right of the Air Force to prohibit an Orthodox Jewish officer from wearing a yarmulke while on duty. This decision is offensive to the basic constitutional rights guaranteeing the freedom of religion.

The bill I am offering today, which is identical to one introduced in the other body, offers a reasonable and just solution to this problem. This bill would amend chapter 45 of title 10 of the United States Code to allow the wearing of all neat, unobtrusive, and conservative religious apparel if the wearing of such apparel is part of the religious observance of the member, unless the wearing of such apparel interferes with the performance of the member's military duties.

I include the text of this short piece of legislation here:

H.R. 4861

A bill to amend title 10, United States Code, to permit members of the Armed Forces to wear under certain circumstances, items of apparel not part of the official uniform

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. WEARING RELIGIOUS APPAREL NOT PART OF THE OFFICIAL UNIFORM.

(a) IN GENERAL.—Chapter 45 of title 10, United States Code, is amended—

(1) by redesignating section 774 as section 775; and

(2) inserting after section 773 the following new section:

"§ 774. Wearing religious apparel

"(a) Except as provided in subsection (b), a member of the armed forces may wear an item of religious apparel if—

"(1) the wearing of the item of apparel is part of the religious observance of the religious faith practiced by the member, and

"(2) the item of apparel is neat, conservative, and unobtrusive.

"(b) The Secretary concerned may prohibit a member from wearing an item of religious apparel if the Secretary determines that the wearing of such item significantly interferes with the performance of the member's military duties.".

(b) CONFORMING AMENDMENTS.—The table of chapters at the beginning of such chapter is amended—

(1) by redesignating the item relating to section 774 as 775; and

(2) by inserting below the item relating to section 773 the following new item:

"774. Wearing religious apparel.".

Jews, as much as any ethnic group in the United States, cherish the freedom offered by America, and they are as eager as any group to fulfill the responsibilities demanded of us to protect that freedom. Until this decision, I am sure that Captain Goldman never believed that serving his country was inconsistent with observing the traditional rites of his faith.

It should not be.

My legislation would not only resolve cases involving the wearing of the yarmulke, but would also allow military personnel of any religion to wear, within reason, appropriate religious apparel. I believe the Air Force and the Department of Defense interpreted too strictly regulations that prevented Captain Goldman from wearing his yarmulke. Certainly, the Court's narrow majority on this decision left much room for debate. For this reason, Mr. Speaker, I feel it is necessary to pursue a legislative solution.

Clearly, obtrusive and possibly interfering apparel should not be allowed in the military, especially if such apparel would hinder the effectiveness of the service man or woman or of other military personnel. This legislation in no way interferes with that goal. It merely balances that right and need of the military to regulate dress, with the constitutional freedom of religion that is so important to the history of our Nation.

I have discussed this legislation with numerous religious and community groups and they firmly back both the bill and the message it sends forth: Neither Jews, nor the members

of any religious faith, should have to choose between their faith and their country.

I urge my colleagues to join with me on this important piece of legislation.

TENTH ANNUAL YAM DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Louisiana [Mrs. LONG] is recognized for 5 minutes.

Mrs. LONG. Mr. Speaker, today, May 20, 1986, we are observing the 10th annual "Yam Day," to celebrate the flavor and nutritional value of this excellent vegetable. We also celebrate the 25th Anniversary of the Sweet Potato Council.

Our Nation is enjoying an upsurge of attention to our health and physical condition. We have learned that the kinds and amounts of food we eat can have a definite effect on our well-being.

In fact, the National Academy of Sciences recently made a number of suggestions on how our diet affects our susceptibility to several diseases, including cancer. One of the recommendations was that we eat more fruits and vegetables rich in vitamins A and C.

These new facts make annual "Yam Day," with its goal of encouraging greater consumption of the Nation's sweet potatoes, even more worthwhile. One sweet potato proudly claims 9,230 units of vitamin A, a greater portion than almost any other comparable food. Vitamin A is essential for good eyesight and helps keep the skin resistant to infection.

The yam is a natural way to satisfy our sweet tooth without adding sugar, and without gaining weight. A medium-sized sweet potato adds only 82 calories to a meal.

Bake them, mash them, candy them, or eat them for an occasional treat. Soon everyone will be convinced of the glories of the yam. Sweet potatoes are especially good with poultry and pork, and don't forget that southern favorite, sweet potato pie. Yams are not just for Thanksgiving dinner anymore.

Because we have such a plentiful yam harvest, the Government uses large amounts of sweet potatoes in its food programs for the military and for schoolchildren. Since a major concern of these programs is to provide foods with a high nutritional value and a tasty flavor, the yam is custom made. Yams have three great characteristics that make them ideal for Government nurition programs: they are extremely nutritious, they are very versatile and can be prepared in many ways, and they have a natural sweet taste that people—especially children—enjoy.

I encourage the U.S. Department of Agriculture and the Department of Defense to continue to increase their purchases of sweet potatoes, and I hope that purchasing decisions will be made as early as possible to assist production planning.

TRADE AND INTERNATIONAL ECONOMIC POLICY REFORM ACT OF 1986

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio [Mr. PEASE] is recognized for 60 minutes.

Mr. PEASE. Mr. Speaker, I take this special order today to comment at somewhat more length on the trade bill that has been before us this afternoon and will be before us tomorrow and Thursday. I think the debate has been sadly deficient, largely because of the way that the debate was structured. This is indeed a landmark piece of legislation. It seems ridiculous to me that we would have had a rule that provided for only 1 hour of debate, for example, on the Ways and Means Committee portion of this bill, a major part of the bill. Here we are changing the trade laws in monumental ways, and yet we have only an hour of debate divided equally on either side, which means 30 minutes of debate were allowed for the 23 majority members of the Ways and Means Committee.

In practical terms that came down to about 2 minutes apiece for several members of the committee, and no time for other members of the committee, and almost no time for anyone not on the Ways and Means Committee. Obviously in 2 minutes one cannot develop any kind of an argument at all, nor can one spend any time when one has only 2 minutes responding to what was said by previous speakers. One needs to get out within that 2 minutes one's primary message.

So I sensed this afternoon that Members were really talking past one another. We were making our points on the majority side of the aisle, minority Members were making their points, and no one was debating or responding or refuting the comments made by other Members.

It seems to me for that reason that the debate was sadly deficient. There was a number of statements made that should have been corrected or challenged, if you will, that were not, and I am hoping in some respects at least to make amends for that for some parts of the bill during this special order.

Mr. Speaker, I am particularly interested in a section of this bill dealing with worker rights. I am the author of this section. It is a section that is similar to other legislation that we adopted in 1984 as part of the generalized system of preferences, and in 1985 during reauthorization of the Overseas Private Investment Corporation.

Essentially the provision of which I am an author says that pursuant to section 301 of the Trade Act of 1974, it is possible for an aggrieved party in the United States to bring a case, an action, under section 301 alleging an unfair trade practice on the part of an overseas competitor, if that competitor, or the nation in which that competitor operates, is systematically repressing the rights of its workers—and that is denying those workers the opportunity to better themselves, to have better working conditions, higher wages, whatever.

□ 1750

That section is a new idea in a sense. It has drawn a lot of opposition from the Reagan Administration.

I must say, I have yet to understand why it has done so, but certainly the materials that have been provided to us by the administration, while carefully and amply stating the opposition of the administration to this provision, hardly provides any justification at all for that opposition.

Beyond that, a number of statements were made on the floor today about that section which simply are not correct. I would like to respond to those allegations and at least set the record straight from my point of view.

The administration in the form of a letter from several members of the Cabinet expresses its opposition to this bill. It has a list of what they call examples of the most unsupportable provisions of the House omnibus trade bill. One of those is the worker rights cause of action. This summary by the administration in one paragraph does accurately describe what the section is. It says that it makes denial of internationally recognized worker rights an unfair practice actionable under section 301. So far so good.

Then they go on to say, "This standard would come back to haunt U.S. exporters."

There is no explanation whatsoever of what the administration means when they say this section would come back to haunt U.S. exporters. I am mystified by what they might mean by that.

During the debate today, several members of the committee stood here and again complained about this section, said they did not favor it; but in the process of doing so, their descriptions were simply inaccurate in one respect or another. The gentleman from New Hampshire [Mr. GREGG], for example, said this provision would require that our standards for worker rights be applied to other countries around the world. That allegation simply is not true.

The gentleman from Nebraska [Mr. DAUB] had similar comments to make.

The gentleman from Texas [Mr. ARCHER] said, "Imagine what it would be like for us to require third world nations to adopt our OSHA laws."

My section of the bill does not do that in any way, shape or form.

Let me deal with some of the issues that have been raised about this section. It has been said, as I say, that we would require other countries to adhere to internationally recognized worker rights. I ought to say that those internationally recognized worker rights are definitely spelled out in U.S. law right now in the generalized system of preference law that we passed in 1984. Those worker rights which are specified in the law are as follows: Freedom of association, the right to bargain collectively, prohibition on forced labor and slave labor, a requirement that a country have a minimum age of some sort. It does not specify what that minimum age should be. That is left up to the discretion of the country.

Finally, it says that acceptable conditions of work as to hours and minimum wage and health and safety standards.

The State Department in reporting pursuant to the GSP law in 1984 on worker rights conditions in various countries has said that acceptable conditions of work, the last of the five criteria spelled out in the 1984 law, means a minimum age of some kind. They suggest perhaps 14 years of age; some sort of minimum hours, they suggest maybe 48 hours a week. In sum, they do not specify a minimum wage, except to say a wage that would provide reasonably for a person in that country. So we are not talking about $3.35 an hour or $2 an hour, in some countries not even $1 an hour, but what is appropriate to that country.

It has been said that we seek to impose on Third World countries' adherence to internationally recognized worker rights that we ourselves do not recognize. That allegation comes about because some of the rights which we delineate in the law, the 1984 law, are drawn from various conventions of the International Labor Organization. Many of those conventions have been ratified by many nations of the world, some by the United States, but most not by the United States for historic reasons that I will not go into. I need only to remind our colleagues that there are a lot of international documents that the United States has not ratified. It took us 30 or 40 years to ratify just recently in the Senate a convention or treaty against genocide, for political reasons here in the United States, so it is not necessarily a flaw that we have not specifically endorsed certain International Labor Organization conventions; but even if we have not done that, certainly we in the United States have specifically adhered to each and every one of the worker rights enumerated in the 1984 law and incorporated in the bill before us today.

I outlined before what those five rights are that are specified. I can go over them and show you how each and every one is already adhered to by the United States.

The first one is the freedom of association. That freedom is guaranteed in the U.S. Constitution and has been now for well over 200 years. Beyond that, the National Labor Relations Act of 1935 guarantees and speaks to the freedom of association.

What about a prohibition on slave, forced, or compulsory labor? That is enshrined in the 13th amendment to the Constitution of the United States, as well as the Taft-Hartley Act of 1947 and title 18 of the U.S. Criminal Code, all of these U.S. legal documents.

What about the question of a minimum age for the employment of children? We set a minimum age for children in the Fair Labor Standards Act of 1938.

What about hours of work? We set those also in the Fair Labor Standards Act of 1938, which has been amended several times since.

Occupational safety and health, we certainly adhere to the standards according to the OSHA law, the Occupational Safety and Health Act of 1970.

So in all these cases in the U.S. Constitution, in American law and in a rich lode is case history, we have in the United States adhered to those worker rights. We are not, therefore, being hypocritical or unreasonable in asking other countries to adhere to these rights. As a matter of fact, we do not ask them to do as much, nearly as much as we do, let alone more.

Now, I would like to mention also in this regard that it has been official U.S. policy for more than 50 years through both Republican and Democratic administrations to belong to the International Labor Organization, to actively support international conventions and respect for basic worker rights embodied in the ILO conference and to vigorously participate in the supervision of international adherence to the basic ILO convention. Only last summer Secretary of Labor William Brock was telling the ILO conference in Geneva that the United States is allied with those nations that are "resisting either the formal or de facto dismantling" of the ILO system of standards and supervision.

The truth of the matter is that our country does recognize and practice the legitimacy of worker rights embodied in the basic ILO Convention.

□ 1800

Mr. Speaker, it has also been said that these worker rights are not recognized by a lot of other nations, even though many, many nations, most nations of the world, belong to the International Labor Organization. I think that charge is without foundation also and I would like to lay out chapter and verse in response to that.

Any country that belongs to the International Labor Organization and had ratified an ILO Convention, is legally bound to implement national laws, its own national laws, to carry out the purpose of that particular ILO Convention. More basic than that, more than 150 countries belong to the ILO, and with membership in the ILO comes de factor acceptance of Freedom of association, one of the five worker rights mentioned in this bill.

It is noteworthy to look at international law and the record of international acceptance of these rights as stated in the fundamental ILO covenants.

With regard to freedom of association, 105 countries, including Gabon, Bulgaria, China and Singapore, have ratified covenant 11 written in 1921 dealing with the right of association. Ninety-seven nations have ratified covenant No. 87, dealing with freedom of association and protection of the right of workers to organize.

With respect to the right to organize and bargain collectively, 113 countries, including Bangladesh, Indonesia and Romania, have ratified covenant 98 adopted originally in 1949 pertaining to the right of workers to organize and to bargain collectively.

Regarding forced labor, 109 countries have ratified covenant 105, calling for the abolition of forced labor. Regarding the establishment of a minimum age for the employment of children, 69 countries, including Albania, the Ivory Coast and Singapore, have ratified covenant 105, fixing the age of 14 years as the minimum age for industrial employment.

Incidentally, some may be surprised to learn that 46 countries have ratified covenant No. 1, pertaining to hours of work, and 32 countries have ratified covenant 131 calling for the establishment of a system of minimum wages to cover wage earners.

Clearly, even if countries have not ratified these ILO Conventions, there is no misunderstanding as to what constitutes internationally recognized worker rights.

Mr. OWENS. Mr. Speaker, will the gentleman yield?

Mr. PEASE. I would be happy to yield to the distinguished gentleman from New York.

Mr. OWENS. I thank the gentleman for yielding.

Mr. Speaker, I would like to congratulate the gentleman on his sponsorship of this special order. I would also like to congratulate him on his amendment. I think the amendment that goes to workers' rights goes to the heart of the problem. The problem is not a problem of free trade, in my opinion; it is a problem of the free trade swindle.

At the heart of the free trade swindle is the ability of certain govern-

ments to lower the cost of their products, or certain economists to lower the cost of their products by having working conditions which are not on a par with the working conditions here, or having wages which are far lower, and that has been apparent for some time. It is true in the case of the developed economies, and that is bad enough, but in the case of the economies of some of the underdeveloped countries, or in the case of an exploited and semislave market similar to the one in South Africa, it is apparent that a great advantage is assumed by those producers or manufacturing concerns, or the investors and financiers who have concerns in these economies where the cheap labor or the semislave is available.

What is at the heart of our effort to end the trade swindle, I think, is the effort to salvage a national economy again from an international economy which has gone berserk. We have an international economy which benefits an oligarchy of international financiers, international investors. They make tremendous profits by moving their investments from one country to another, wherever the labor market is cheapest, and other conditions, but usually the primary condition, or the condition that makes for the lowest cost of production is the low cost of the labor market. They can move around. They can realize tremendous profits at the same time their own home economies, whether you are talking about the economy of this country or some of the other developed nations, their own home economy suffers, the workers suffer, because when you are in pursuit constantly of cheaper and cheaper labor, then those jobs which are first for the unskilled and then the jobs for the semiskilled, and even for the skilled.

We have a situation developing where the information industry, certain foreign countries are seeking to take over the information industry in this country because of the fact that they can produce much cheaper labor, highly skilled labor, well educated labor, college graduates, Ph.D.'s, scholars from the Sorbonne, and some of the best universities of Europe, but they are employed at much lower wages. So it doesn't stop with just the unskilled and semiskilled laborers, but it starts there. They can pick up and pursue the cheapest labor anywhere. They can make tremendous profits because the products that we invest in, and we have to admit to the whole world, and certainly admit to our own people, that many of the products that come back into this country from our foreign competitors are products which have been financed by our own dollars, our own financiers and our own investments going abroad, investing in plants in various products processes which bring the products here. They are produced at very low cost in accordance with the standards of the local economies in the local countries, but they come back into the country and are sold at much higher cost in accordance with the standard of living of this country.

So we have a tremendous windfall profit realized by the people who are investing in the plants abroad and the various enterprises abroad. So there is a powerful group of people who are greatly benefited by the present situation. The balance-of-trade deficit benefits certain groups in this country who are realizing the windfall profit that they make when they invest abroad, they use the cheap labor, they bring the products back to this country and sell it at the prices consistent with our country. They realize a tremendous profit and they become the powerful hidden force that we cannot see which keeps insisting that free trade must be maintained, despite the fact that our plants and our factories are closing. It is obvious to any fool that you cannot survive as a nation, the national economy cannot survive, if this continues to go on. But there are such powerful people benefiting that the smokescreen is constantly thrown up.

I think nowhere is it more apparent than the extreme case that easily allows it to be seen in South Africa. In the South African economy, we have General Motors, we have Xerox Corp., we have a number of major corporations who would have to admit, because the facts and the records will show it, that the profit ratio in South Africa is higher than it is anywhere else in the world. The kind of profit they make in their manufacturing enterprises in South Africa is higher than it is in Asia, higher than it is in Europe, and higher than it is, of course, in this country because that is why they have moved from this country.

The one factor which is different, the one factor which is the determining factor, is the semislave labor pool that they have in South Africa. So when you press labor down to a semislave status, then the profits go up accordingly. The ratio of the profit is so tremendous that there will be continued massive resistance to any divestment attempts, no matter what conditions there are.

It seems to me that the gentleman's amendment cannot be rejected. There can be no reasonable argument offered to the gentleman's amendment if we are going to insist on some kind of regulation of trade at all; that if other conditions must be met by our foreign competitors, if those conditions must be met, then certainly your condition is basic. It is at the heart of the whole production process. I do not see why we can insist that certain other kinds of conditions such as the pricing of products in the local market must be consistent with certain standards, they cannot sell their products at a lower cost in the local markets and provide a subsidy. That is a reasonable regulation. I do not see how then we can accept the manufacture and the production of products using labor that is exploited, or labor that is so vastly underpaid that it produces a great difference in the cost and gives them a great advantage.

So I applaud the gentleman's amendment. I think it is at the heart of the entire problem. Nobody will admit it, but it is at the heart of the problem and should be recognized as such. The amendment is quite reasonable. It does not go as far as it should go, in my opinion, but it is certainly reasonable enough. It is in accordance with standards that have already been established. It says no more than that workers should at least have the opportunity to be able to fend for themselves. They ought to be able to try to establish reasonable conditions for themselves, and that right to bargain ought to be recognized, and from that would naturally flow certain kinds of improvements in the standards and the working conditions and certainly the wages, and there would be some kind of balancing out of this tremendous unfair advantage that our foreign competitors have now and are able to, therefore, exploit our own markets.

I congratulate the gentleman and I would certainly urge the passage of his amendment to this bill.

Mr. PEASE. I thank the gentleman very much for his contribution.

Mr. Speaker, I think it is important that we take a look for a while at the people who are involved here. It seems to me that those who would oppose this amendment, this worker rights language, essentially are saying that it is none of our business as Americans under what conditions the products are made which flood into our markets.

When you go to the K-Mart or some other discount store and pick up products made in Taiwan or Korea or Thailand or Sri Lanka or wherever, and pick up those shirts, that it is no business of ours, no concern of ours, under what conditions they were made. I would hope that Americans are not callous enough to take that attitude.

Here is an article called "Docile and Dextrous—Young Women Suffer From the Economic Miracle in Southeast Asia." This quotes a young girl who was working in an electronics company in a Southeast Asian country. She says:

I have been working at the electronics company for over 5 years. I want to quit. I cannot. It is so hard to get another job. You do not know what it is like to be a worker. It is bitter. Very bitter. The prices keep rising, especially food, but they never raise our

wages until a long time after the prices rise. They do not care if we starve.

Every day they push us to do more and more. If they had a standard for a day's work, it would be more reasonable. Our salaries are limited, but they have unlimited demands for production.

This young woman works in this electronics factory with nearly 1,000 other women who sleep in a dormitory every night. Each one of them has, according to this article, a narrow formica platform on which to sleep. Neither the factory nor the dorm has a fan or air conditioner, although the temperature sometimes approaches an inhuman 100 degrees. They work 8 to 12 hours a day, depending on production demands, 6 days a week, and she is paid $60 a month for her labor. That is less than 30 cents an hour.

The day that the author of this article visited the plant, the drinking fountains were broken, the tap water is not safe to drink, so the workers had to buy liquids. Four glasses of juice or carbonated water, during the course of a day, cost one-fifth of a worker's daily income.

□ 1815

That is the sort of thing that we are condoning when we turn our backs on the conditions under which products are made which flood into our country.

Here is an advertisement which is from several years ago but it is very interesting and still relevant. Seven good reasons why you should be looking to the Philippines to locate your factory. One of those seven good reasons relates to the labor force. It said recent Presidential decrees have lifted work restrictions on Sundays and holidays, liberalized the employment of women and children, and expanded the scope of apprenticeship programs. Labor costs could work out 35 to 50 percent lower than they are elsewhere in Hong Kong or Singapore.

Clearly, the allure of these Southeast Asian countries is cheap labor, exploited labor, workers who do not have an opportunity to better their own lots in life.

Here is an article from the National Catholic Reporter that talks about children in Thailand being sold into slavery. You need a factory worker for a factory in Thailand who is going to manufacture textiles or garments for the American market, fine, there is a place where you can go in downtown Bangkok every day and there is an auction for young girls age 10 to 14 years of age.

Their parents, from the impoverished rural areas of Thailand, bring them in by train. The auction block is just outside of the train station. The parents sell their 10- to 14-year-old girls into indentured servitude for a year at a time. How much do they get? Twenty dollars. Maybe $40 or $50 or $60 if it is an exceptionally good worker. That is the sort of thing we are condoning.

These workers have workdays of 15 hours a day, 7 days a week. That is what we are condoning.

Closer to home, here is a report on Haiti. Here is a report of a factory that produces detergent in Haiti. A young man works there and said he works in temperatures of 95 to 113 degrees Fahrenheit without air-conditioning. All day long, he had to breathe in plastic and chemicals without protection.

The noise in the factory surpassed all normal decibles. He receives $3 a day for his labor. Ordinarily, you would think in those circumstances the workers would want to stand up for their rights and ask for an opportunity to get some fans or perhaps some filters for the chemicals; perhaps a little better wages than $3 a day.

While Haiti has in its constitution the right for workers to organize, the workers of this company did so, informed the management of their move in a letter and they also mentioned it to the Ministry of Social Affairs and the press.

In the letter, they very specifically stated that they were not trying to create trouble, but merely to put forth specific legitimate demands. Instead of respecting their right to organize, according to the constitution, the following events took place. "We delivered the letter to the press, the management and the Ministry of Social Affairs at noon. To our great astonishment, by 3 p.m., they had fired all of those who had joined the union." So much for worker rights in Haiti.

Let me go on a little further. I have been concentrating on what happens to the workers, the exploited workers in these other countries. I told you that if they get 40 cents an hour for their wages, they are doing well.

The products of these countries are coming back to the United States and are being sold in competition with textiles and garments made in Alabama, South Carolina, Georgia, and in dozens of other States in the United States.

The garment industry and the textile industry in the United States is not a highly paid industry. As a matter of fact, mainly it is not a unionized industry. Most textile, most garment factories are not unionized.

These are folks, most of them women, often widows, who earn $6, $6.50 an hour, hardly exorbitant wages. How will we expect them to compete to keep their jobs with 10-, 11-, 12-year-old children working for peanuts, if anything, 15 hours a day, 7 days a week? If that is not a case of unfair trade in relation to the workers in our country, I do not know what is.

We have a labor force of roughly 100 million people in the United States. We have 8 million people or more unemployed right now, and they would love to get jobs.

But with imports coming to this country unrestricted and with the current administration taking that attitude that they could care less what the working conditions are, what the worker rights are in other countries, our 100 million working Americans, our 8 million unemployed Americans have to compete with up to 2 billion people in Third World countries who are perfectlly willing to work for 50 cents an hour or less and whose governments deliberately repress their rights so that they cannot look forward to an adequate wage or safe working conditions or time off so that they can enjoy their families.

The amendment, worker rights amendment in this trade bill, tries to deal with that problem. If that is not an unfair trade practice, I do not know what is.

The worker rights amendment, to respond to some comments made by my colleagues earlier, addresses this problem in a way which is entirely consistent with current U.S. trade law. The worker rights section is not a brand-new initiative; it is an extension of existing trade law. The identical list of worker rights is already in U.S. law, as I have said, in relation to the generalized system of preferences and the Overseas Private Investment Corporation.

Furthermore, the new trade bill merely extends the definition of unfair trade practices which is already in section 301 of the Trade Act of 1974. The existing section 301 defines as unreasonable or unfair three trade practices: the denial of market access in another country, the denial of the opportunity to establish a business in a foreign country, and the failure to protect copyrights, patents, and other intellectual property rights. Those three are already defined in current U.S. trade law as unfair trade practices.

Let me add that we in the U.S. Congress unilaterally define those three unfair trade practices. They are not part of any international agreement.

We, in our amendment, add a fourth unreasonable act and that is repression of worker rights. I ask you, Mr. Speaker, is it fair when an overseas manufacturer steals, copies, or sells a patented U.S. product? You bet it is.

□ 1825

Similarly, is it fair when a $6.50 an hour American textile worker has to compete against 10-year-old children working 15 hours a day, 7 days a week?

My answer is, You bet it is there as well. It is time, in my view, for us to get on with the job of protecting American workers from the unfair trade practices of our competitors. That is what this bill is all about.

I am happy to yield to my good friend and colleague from Ohio [Mr. SEIBERLING].

Mr. SEIBERLING. Mr. Speaker, I think that the Congress and the Nation owe the gentleman from Ohio [Mr. PEASE] a debt of gratitude for having focused on this very important issue, probably the most important single issue in this entire bill.

When I was a college student, I remember reading the history of the industrial revolution and some of the writings of the conditions that prevailed in England in the early part of the 19th century and the late 18th century: absolutely appalling working conditions, and this prevailed through a great part of the 19th century, and in some industrialized countries, well into this century.

Until we had enlightened laws prohibiting child labor, until we had laws providing for health and safety in the workplace, which are fairly recent in our history, until we had laws providing for the right of labor to organize collectively and bargain for its rights and its wages, we had conditions which were so appalling that they gave rise, among other things, to the famous Communist Manifesto of 1848 and all of the terrible implications that we are still confronted with as a result of that fact.

Marx was wrong about capitalist states. The Western nations, the democratic nations, showed that they had the ability through the use of the ballot and through enlightened leadership, to reform rather than to have to destroy the existing form of economic organization, as a result of which, for many years, the workers in the United States have enjoyed the highest wages and have enjoyed safe and healthy working conditions.

If they are forced to compete with people who are compelled to work in conditions that are comparable to those in the depths of the worst part of the early industrial revolution, then we are surely going to pay a terrible price in this country. One of two things is going to happen: Either we are going to bring the level of working conditions and wages and other relevant factors up to the level that we think is consistent with the decent minimum that workers are entitled to respect, we are going to bring those up in the Third World countries to that level, or else our workers are going to be driven down to the low level, and that is something I don't think the American people will tolerate.

Now is the time to do something about it, before we have lost all of these and the rest of our industrial jobs, and paid the terrible social and moral price that that entails.

So I think, again, we owe the gentleman from Ohio [Mr. PEASE] a great debt, and I hope that our colleagues tomorrow are going to backup what the committee has done in adopting the gentleman's very, very thoughtful, well-based and wise recommendations as incorporated in this bill.

Mr. PEASE. I thank the gentleman very much for his comments. As usual, he has provided us with some valuable historical perspective. I think the parallel is quite apt between where we are now in say Southeast Asia and where the European countries were in the mid-1800's.

Mr. Chairman, my time draws short. I would like to comment quickly on two other things. I have been talking about the worker rights amendment. I think we have covered that pretty thoroughly.

Let me turn to another amendment which was offered in the Committee on Ways and Means by out colleague, the gentleman from Missouri [Mr. GEPHARDT]. That seeks to require the President to take action to reduce the trade deficits that we have on a bilateral basis with a few other nations of the world.

That amendment has been roundly criticized by the administration and by some of the administration's supporters here in the Congress today as being an outright violation of our international treaty obligations and is sure to invite retaliation. It has been characterized as being automatic; we are going to have to do these things, and there has been a lot of misinformation about that amendment.

Let me point out that the Gephardt amendment seeks to require the President to reduce the trade deficits with countries which are selling us far, far more goods than we sell them. In order for a country to get on the list of nations with which the President must negotiate, there must be three conditions met, and all three must be met; not one, not two, all three.

One is that the nation involved must have a disproportionate surplus of trade with the United States. Countries like Taiwan, Korea, Japan, West Germany, Canada meet that criterion.

The second criterion is that the country must have not only an unsual surplus with the United States, but also with all the rest of the world. So we are saying it is not only that we are being innundated with products, but that the country is not buying from other nations as well.

When we mention that second criterion, then you drop countries like South Korea off the list, because while they have a big surplus with us, and while Canada does, they do not have surpluses with the rest of the world.

Then we go to yet a third criterion, and that is that the country involved, in order to get on the list, must, according to certification by the President, have a consistent pattern of trade barriers to the products of other countries, which would explain why they are exporting more than they are importing.

I am confident that when you apply that test as well, countries like West Germany which have been mentioned today, would be dropped off the list also. I do not think that the President would have any reason to certify that West Germany has a consistent pattern of trade barriers to imports coming in to that country. I am not sure that the President would certify that for other major countries as well.

Even if he does, once he makes that certification, then the President is required to negotiate with the leaders of those countries, to figure out a way to reduce by 10 percent per year for 4 years—no precipitous drop—10 percent per year for 4 years, the trade imbalance that that country has with us.

It could do it most easily by opening up its own markets to our products, and that of course would be best all the way around for world trade.

Only if the President fails to come up with a negotiated agreement does this Gephardt provision then say that the President is obligated to take what actions he deems necessary and advisable to achieve the 10 percent per year reduction.

So the discretion is in the hands of the President, and where the President finds that it would be contrary to the national economic interest, he does not even have to certify or do anything at all.

So there is ample opportunity for the President to avoid taking action where it would not be in the true best interests of our country. That is a far cry from what we have been told here on the floor today is the effect of the Gephardt amendment, and I would urge Members to very carefully look at that amendment tomorrow when it comes up for debate.

Finally, Mr. Speaker, I want to repeat what I said earlier today, and that is that I am somewhat mystified as to why so many of our Republican colleagues appear eager to carry water the Reagan administration, an administration which is clearly out of touch with the American people.

□ 1835

If there is anything which is clear from public opinion polls, it is that the American people want us in Washington to get tough on trade. They want to have a level playing field. They do not want to have the opposition from other countries flooding our shores with imports, playing all the time with the wind at its back. They want to have a level fair playing field. That is what the American people want, and that is what they tell us.

Yet, this administration does not want any trade legislation at all. In the other body the Republican-led Finance Committee is working on a

trade bill which is quite similar in many respects to the bill we have before us now. Guess what? The administration does not like that bill either. No partisanship there. That is not a Democratic bill. That is a Republican bill. Yet the administration is opposed to it. In fact, I am told that the administration does not even like the Republican substitute which will be offered on the floor of the House tomorrow. You cannot satisfy the administration in any respect, if you seek to level the playing field and tighten up on our trade laws so that we can get tough with out trading partners.

Let us face it, Mr. Speaker, this administration is opposed and will oppose any efforts here in Congress to deal effectively and constructively with the enormous trade deficits, $150 billion a year, that we have been running in recent years.

So I really ask why my Republican colleagues should take the heat for this administration, an administration, to quote Senator JOHN HEINZ, a good Republican: "whose success have been at best damaging or damage-limiting and whose failures have been disastrous for many industries."

It seems to me that Members on the Republican side of the aisle in this Chamber ought to come in tomorrow and Thursday and vote for the Republican substitute. They are entitled to believe that that is a bill more to their liking than the one that the Democratic majority reported out of the Committee on Ways and Means.

But after they have done that, I would hope my Republican colleagues will look and see where their loyalties really lie. Do they lie with the administration, which is clearly opposed to any trade legislation, or do those loyalties lie with the American people, the constituents who sent them here and who are growing increasingly concerned about the loss of American jobs to foreign imports?

I hope the answer of my Republican colleagues will be "yes." Once the Republican substitute has been voted on, I hope that they will come around and vote for final passage on this omnibus trade bill, which is a good, responsible but tough piece of legislation.

JUDICIAL REVIEW FOR VETERANS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. LAFALCE] is recognized for 10 minutes.

Mr. LAFALCE. Mr. Speaker, I rise today to remind my colleagues of the need for veterans' access to judicial review of their claims before the Veterans' Administration.

This issue is a long-overdue subject of congressional action, and a longstanding concern of mine. In both of the past two Congresses, I introduced bills which would have granted judicial review to veterans. In this Congress, I am a cosponsor of H.R. 585, the Veterans' Administration Adjudication Procedure and Judicial Review Act. This bill to grant judicial review was introduced by my colleague, DON EDWARDS, who has also introduced previous legislation in this area. I would like to acknowledge his leadership and continuing efforts, which will deserve much of the credit when our veterans' right to judicial review is at last written into law.

The Senate has now passed judicial review for veterans for the fourth consecutive Congress. Unfortunately, the full House has never been given the opportunity to vote on judicial review for veterans, but H.R. 585 is being cosponsored by 210 Members, and with such solid support I am confident that it is an issue whose time has come.

Mr. Speaker, I would like to outline today the objectionable provisions of current law that would be changed by H.R. 585, the main provisions of the bill, and the reasons for which it is imperative that we grant judicial review to veterans.

CURRENT LAW

The Administrative Procedures Act of 1947 contains safeguards to ensure that American citizens are treated fairly by the agencies that administer our Nation's laws. These safeguards have proved to be effective and sensible, and they have not excessively burdened our court system.

Unfortunately, one class of citizens is conspicuously barred from the guarantees of the Administrative Procedures Act. That class is veterans. Under a 1933 law, veterans are denied the right to appeal the decisions of the Veterans' Administration regarding the benefits to which they are entitled under law. An even older law, dating back to 1862, limits the amount a veteran can pay an attorney to only $10.

Together, these antiquated statutes effectively bar veterans from independent appeal of VA decisions, and even independent legal counsel to advise them of their entitlements under the law. The prohibitions were originally intended to serve the interests of veterans, but in today's circumstances they are glaring anachronisms that unfairly discriminate against veterans, depriving them of the same rights to due process that have been granted to other citizens.

OUTLINE OF H.R. 585

H.R. 585 remedies the defects of current law while retaining certain strengths in the current system of adjudicating veterans' claims. The bill codifies the existing adjudication procedures of the Veterans' Administration. These procedures are perfectly equitable, as far as they go. They allow the adjudication of veterans' claims fairly and to the satisfaction of both parties in nearly all cases.

However, for the small number of cases in which mistakes may have been made by the VA, H.R. 585 would allow veterans to appeal the final decision of the VA in court.

It is important to note that judicial review would be granted only as a last resort. To protect veterans from burdensome legal fees, the bill retains the current limit of $10 during the adjudication process, all the way through the determination of the Board of Veterans' Appeals. After that determination, if they were still dissatisfied with the outcome, the $10 limit would be raised so that veterans could retain their own legal counsel in order to appeal effectively in court.

Even then, however, H.R. 585 includes provisions to ensure that veterans are not charged unreasonable fees for the legal services they receive. I believe these provisions effectively grant the protections to veterans that are embodied in current law, while allowing them the option of exercising their right to due process through judicial reveiw.

THE NEED FOR JUDICIAL REVIEW

If most veterans are treated fairly under the current system of adjudicating veterans' claims to benefits, as I believe they are, it might well be asked why their current preclusion from judicial review needs to be changed.

One answer is that while judicial review may seem unimportant or unnecessary to the system of veterans' benefits as a whole, it is vital to the few individual veterans who are statistically certain to be the victims of mistakes in the VA's procedures.

Those procedures are not infallible; it should be noted that the VA employs a large legal staff that regularly brings veterans to court when mistakes are made in their favor. It is fundamentally unfair that veterans are denied the same right to judicial review enjoyed by the VA when mistakes run in one direction rather than the other.

Lack of access to the courts not only imposes hardships on the few veterans who are victims of mistakes. It also threatens all veterans with the insecurity of lacking potential access to the courts if mistakes happen to be made in their individual cases.

Beside these practical considerations, a more general reason supports the right to judicial review. That is the principle of separation of powers. Our Constitution provides for an independent judicial to ensure that our laws are properly administered by executive agencies. The effect of current law is to authorize the VA to grant certain benefits to veterans. In fact and in principle, however, the benefits have already been granted by an act of Congress, and the VA is merely authorized to distribute them.

Limitations on powers of administrative agencies may seem a minor point compared to the more concrete concerns of veterans for an equitable outcome of their appeals, but it is important to affirm that veterans are entitled to their benefits under the law of the land, not merely at the discretion of the Veterans' Administration.

While the VA does fine work in its adjudication of nearly all claims, its role as an administrative agency must be limited within the bounds of our constitutional system of checks and balances. No administrative agency should have the last word on the interpretation of the law. Such interpretation is the province of the courts. Our laws already recognize this principle for virtually every administrative body except the Veterans' Administration, and I believe we should act promptly to correct this lapse in our legal code.

CONCLUSION

Mr. Speaker, I am aware of divisions of opinion on this issue of judicial review. Many of the objections to H.R. 585 are based on

unfounded fears that it will make our system of veterans' benefits difficult to administer.

There is no quesiton that a system without judicial review is simpler than a system with judicial review. However, the prospect of a few more cases in the courts, and of requiring VA personnel to go to court to correct mistakes in the VA's favor as well as mistakes in the favor of veterans, is overshadowed by the need to protect the real interests of veterans and the integrity of our system of administering laws.

It would be marginally more convenient for the Government to continue its denial of judicial review for veterans. This convenience, though, is bought at a high cost. A small number of veterans pay with real hardship; all veterans pay with insecurity in their legal entitlements; and our Nation as a whole pays by compromising the equal right of all citizens to appeal to an independent judiciary for due process and fair treatment under the law.

Ending this aberration in our legal system should be an urgent concern of the Committee on Veterans' Affairs, and of the House as a whole. I respectfully urge that H.R. 585 be brought to the floor promptly for the consideration of the full House, and that my colleagues join me, and 210 other Members who care about veterans' rights, in cosponsoring this much-needed corrective legislation.

TEMPORARILY SUSPENDING ROMANIA'S MOST-FAVORED-NATION STATUS

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Illinois [Mr. CRANE] is recognized for 60 minutes.

GENERAL LEAVE

Mr. CRANE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of this special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. CRANE. Mr. Speaker, at this juncture, I would like to yield to my distinguished colleague from the great State of Virginia, inasmuch as he has time constraints which I do not have this evening.

Mr. WOLF. Mr. Speaker, I thank the gentleman and commend the gentleman for taking out this special order. The purpose of this special order is to encourage and urge the Secretary of State and the administration and the President of the United States not to extend the most-favored-nation status to Romania. There are so many reasons.

When I visited Romania last year with Congressman SMITH of New Jersey and Congressman HALL, we heard so much about the persecution and the violation of human rights, and I know my colleague, Mr. CRANE from Illinois, will cover all those points and will make such a logical case that I think all reasonable people will acknowledge that the most-favored-nation status for Romania should be and must be suspended.

Let me read one or two points. From one General Pacepa, a defector from Romania, listen to what he has to say about Romania and international terrorism.

He said, "A few examples are the paramilitary training school run by Romania for members of the Russian Communist Party who receive training in sabotage, diversion, and guerrilla tactics. Romania's political material support for the Palestinian Liberation Organization and its terrorist detachments and the secret cooperation of the Romanian Government with the Libyan security forces."

Helsinki Watch says, "Romania is generally considered to be one of the most egregious human rights offenders in Eastern Europe." A statement by the former ambassador says, "Romania's abysmal record on human rights and its lack of internal reforms are a mockery of declared United States policy goals." Another Helsinki Watch committee quote, "Romania's internal policies have deteriorated to the point where Romania is now one of the worst human rights offenders in Eastern Europe." Yet we give most-favored-nation status to one of the worst human rights offenders in Eastern Europe.

We met with Father Calciu when we were over there, who had been in prison for 21 years for refusing to take a factory job, refusing to deny his priesthood. He was subjected to periods of 10 days during each period during which he was given no food, no water, no heat, and no clothes. At the end of those periods, when convulsing violently, he would be given 2 days' worth of food and then put back on 10 days of deprivation. This went on for 100 days. The Romanians wanted to keep him alive to break him. For 100 days Father Calciu countered and refused to submit and went on a hunger strike himself, and finally they become very concerned that he would die. And they began to feed him.

There are so many, and I wish we could document the names and the places if we had the time, of all the people whose human rights have been violated. But let me just tell you one more, which I think will really grab anyone listening, particulary if you are in the administration and you work for the State Department and you deal with this issue.

Arrests of religious activists do result in death. Recent examples of deaths of clergymen resulting from arrests include as follows: In his Christmas Eve sermon in 1983, Rev. Gaza Palfi opposed an edict by President Ceaucescu making Christmas Day an ordinary working day. The next day, this Catholic priest was arrested and severely beaten, particulary around the liver. He was taken to a clinic where he died 2 months later, not having responded to treatment, simply because he felt that Christmas should be a holiday. The Romanian secret police arrested him, beat him up, and he later died.

There are at least six other known deaths in recent years of Roman Catholic priests, Pentecostal and Baptist clergymen that occurred during or following interrogation, and the list, as I said, goes on and on and on.

Clearly, Mr. President, clearly, Mr. Secretary of State, by holding out the hopes that they will improve by giving them most-favored-nation status, it is not working. What we would ask is that you not extend most-favored-nation status at this time and allow Congressman CRANE and the Committee on Ways and Means to hold extensive hearings, to look into this issue because it would be absolutely wrong to extend most-favored-nation status at this time. What would that tell the Romanian people? It would tell them that America does not care, that we have forgotten about them. So I am sorry; I implore you and ask you and urge you do not extend most-favored-nation status until Congressman CRANE, Congressman GIBBONS, and the Committee on Ways and Means can look into it.

Again I want to commend my friend from Illinois and wish him well because I think this is one of the most important issues that this Congress will deal with. It is unfortunate that we do not have the opportunity to offer an amendment to the trade bill coming up, but I think we can make a clear moral statement. I know the administration, if they hear it, will do something about it. I thank the gentleman and yield back whatever time I may have.

Mr. CRANE. I thank the gentleman. I would like to add a postscript: I endeavored to introduce such an amendment to the trade bill that we have under discussion today and tomorrow, and I yielded to the request of our distinguished chairman of the subcommittee, the gentleman from Florida [Mr. GIBBONS] to withdraw that amendment at this time because he suggested that he thought there were some political implications that might better be reserved for separate hearings by the Subcommittee on Trade in June. But we do have this June 3 waiver deadline for the administration to contemplate an extension of most-favored-nation treatment to the country of Romania. I have a letter on its way to the President urging him not to extend that most-favored-nation treatment preference until the subcommittee has an opportunity to review the case and to make a determination.

I would like to read an excerpt from a book by Gen. Ion Pacepa, who was referred to by my colleague from Virginia.

General Pacepa is the highest-ranking intelligence officer from the Soviet bloc ever to defect. He was a personal adviser to Ceaucescu and Deputy Director of the Department of Foreign Intelligence, which is the KGB equivalent in the country of Romania.

He writes:

Orders have repeatedly been given for the silencing of emigre journalists and others who publicly criticize the Romanian dictatorship, including United States Government employees working for Radio Free Europe. Monica Lovinescu, a respected but outspoken French citizen who for years has been an employee of Radio Free Europe in France, has particularly incensed Ceaucescu.

Lovinescu must be silenced. Ceaucescu ordered at one point. Not killed. We don't need any uncomfortable French and American investigations just now. She should be beaten to a pulp and have her jaw, teeth and arms broken, so that she will never again be able to speak or write—beaten in her own home so she and others will learn that no place is safe for people who calumniate the proleterian dictatorship, not even their own homes. She should become a living corpse, an unforgetable example for others.

In November 1976, Lovinescu was severely beaten in her home by a Palestine Liberation Organization group acting on Romania's behalf.

Now, what would you use as a word to describe someone who would make such an appeal? Degenerate, depraved, psychopathic? This is a form of subhuman species that unfortunately still peoples this world, but in this instance it is a head of state that we have gone out of our way to try and lure into the civilized world. And in the face of those attempts since 1975 with concessionary trade policies they, if anything, have deteriorated to a lower level than existed at that time.

General Pacepa notes a number of examples of these excesses, some of which were referred to by my colleagues from Virginia.

But let me cite just a few.

In July 1981, Emil Georgescu, an outspoken Romanian program editor at Radio Free Europe, was stabbed 22 times. This, again, General Pacepa insists was at the instigation of the Romanian Government and the dictator Ceaucescu himself.

With cooperation from Bulgaria, Romania has used and shipped arms and drugs, sold to obtain foreign currency. The Romanian Government organized paramilitary training schools for training Greek and Spanish Communist Party members for terrorist and guerrilla-type operations. Interestingly enough, Romania was the first country to land a commercial flight at Beirut airport after the United States called for an embargo of the airport.

We have been discussing trade issues. Let us take a look at our trade relations with the Government of Romania. At least 30 American companies have offices in Bucharest. In recent years America has sold power turbines for Romania's Nuclear Energy Program, coal, agricultural products, and energy technology.

American, in turn, buys refined petroleum products, finished steel products, textiles, and footware. The United States trade deficit, and I want to underscore this, the United States trade deficit with Romania has reached a ratio of 4.7 to 1. United States exports in 1985 were $206.5 million, while imports from Romania were almost $1 billion, with trade deficit standing at $743 million.

Under the generalized system of preferences, which has also been extended to Romania, they have been able to ship 134 million dollars' worth of goods into the United States duty free in 1985. It demonstrates a dramatic increase from 1982, when only $54 million was imported duty free. And the real sticker is that the U.S. Trade Representative has cited Romania as one of the countries most frequently subject to antidumping actions. They not only have taken advantage of trade concessions that have been lawful that we would otherwise extend exclusively to civilized nations, civilized trading partners, they have taken advantage of that and engaged in trade abuses.

□ 1850

The Washingtonian magazine published by the Washington Post, which has the condensation of the book by General Pacepa, lists a variety of other incidents in this trade arena, excesses engaged in by the Romanian Government in the past.

For example: the complete blueprints of newly designed American aluminum rolling mills were used as a basis for constructing high-capacity aluminum-foil and sheet-metal factories.

Three glass factories were built from 1976 to 1980 based on illegally obtained intelligence provided by an American engineer in exchange for the initial sum of $200,000. The intention was to flood the American market with glass products at dumping prices.

The Romanian Ministry of Agriculture estimated that it saved over $300 billion by stealing the entire United States national hybrid-corn collection, containing more than 14,000 assortments and species, which became the basis for further research in Romania. Romania recruited an agent at the United States Department of Agriculture's Research Center in Beltsville.

In regards to transfers of technology, Pacepa writes:

Mr. Ceausescu serves as a conduit for the transmission of embargoed western technology to Moscow.

In the area of human rights violations, in addition to some of those that we already heard, after the United States granted MFN status in 1975, Romania instituted total censorship of mail coming from outside the country.

Romania approved complete monitoring of all international telephone calls, a secret Communist Party decision.

President Ceausescu personally ordered that all telephones be of the type developed by the internal security police which "can be instantly converted into a microphone to monitor people's private conversations."

President Ceausescu ordered the removal of "all but a few token Jews" from military and security forces and from sensitive Government positions.

Romania ordered its intelligence service to assassinate and savagely beat Romanians abroad who had criticized the Romanian Government; to assassinate emigrees working for Radio Free Europe. Both PLO terrorists and criminal mercenaries were used.

In addition, to this, they have continued horrendous attacks on religion.

The Bistrita Baptist Church was bulldozed on November 2, 1984.

The Giulesti Baptist Church was bulldozed on June 4, 1985.

The Tiganesti Church, after being destroyed by an earthquake in 1977, was not allowed by the Romanian Government to be rebuilt.

The Baptist Church of Restita, which has 800 members, has only seating capacity for 100. When, in 1983, members of the church expanded the building to accommodate more worshipers, the Romanian Government bulldozed the new section, exposing the church to the elements.

Granting MFN to Romania has not positively influenced Romania's foreign policy vis-a-vis the Soviet Union, Mr. Speaker.

As General Pacepa again has observed:

It is true that Rumania's political position within the Warsaw Pact embodies a degree of genuine independence and is an irritant to the Soviet Union. Until now, however, the pragmatic purpose of that posture has been solely to increase Ceausescu's personal stature and to attract Western money and technology to help build Communism in Rumania.

He also notes:

Under Yuri Andropov and now under Mikhail Gorbachev, who seems to show less rigidity toward him, Ceausescu has evidently resumed closer ties with Moscow.

Soviet presence in Romania is mounting. Former U.S. Ambassador to Romania, David Funderburk, checked registries, schools, traced license plates and came up with an "ungodly" number of resident Soviets, including Soviet agents in factories monitoring Romanian exports to the Soviet Union.

Intelligence ties are very close with the U.S.S.R. Pacepa notes that all significant information gathered by Ro-

mania's intelligence department is offered directly to the KGB.

Mr. Ceausescu serves as a conduit for the transmission of embargoed western technology to Moscow.

According to the May 1986 issue of the Free Romanian, a Romanian dissident newsletter based in London, Romania's economic ties to the Soviet Union are increased:

From this year, Soviet technical aid projects in Romania will grow to 41 under [the newest 5 year plan]. Plants producing steel, electircal power, rolling stock and aircraft are being equipped with Soviet Machinery. More and more Romanian plants are becoming involved in joint production arrangements using Soviet Technology . . . Romania has also emerged as a large-scale producer of Soviet types of armaments, both for export to Russia and to Russia's clients in the third world.

Mr. Speaker, again let me reiterate the importance of withholding on the part of the administration a concession to a nation that, by its actions, clearly has violated all of the concepts involved in the Helsinki agreements, as well as contained in the Jackson-Vanick language which provided the exception of a waiver to enable Communist bloc countries to enjoy special trade concessions and benefits in terms of their commerce with the United States.

As I mentioned at the outset, we do have hearings scheduled in the month of June, and I would hope that all those who share the concerns that our colleagues on a bipartisan basis have expressed, who have visited in Bucharest personally and who have had the opportunity to talk not only to defectors, but to those still suffering the tortures of living under that system, will recognize that we need a consensus on the part of the Congress to take an action that can lead but to one conclusion. And that conclusion, Mr. Speaker, is that Romania clearly has violated every concept behind the basis for conferring waivers on countries because of their human rights practices or because of providing free and unlimited emigration.

Mr. HALL of Ohio, Mr. Speaker, I commend the gentleman from Illinois [Mr. CRANE] for arranging for this floor time for a discussion about Romania and the possible extension of most-favored-nation trading status for that country.

For years, Romania has enjoyed the undeserved reputation of being a so-called moderate and independent Eastern-bloc country. But organizations like Helsinki Watch have correctly called Romania "one of the worst human rights offenders in Eastern Europe." It is time for the United States to face this reality and to start treating Romania like the human rights violator that it is.

Human rights monitoring organizations and our own State Department have been tracking the state of human rights in Romania. In virtually all such reporting on human rights, Romania is condemned for its repression.

I personally had not focused much on Romania until I had the opportunity to visit that country last summer. The gentleman from New Jersey [Mr. SMITH] and the gentleman from Virginia [Mr. WOLF] and I traveled to Romania on a private trip arranged by Christian Response International.

Our trip was a people-to-people trip. We went as American Christians to share and to pray with our Christian brothers and sisters in Romania.

We saw firsthand the evidence of persecution of religion in Romania. In that country, churches have been bulldozed, Bibles have been turned into toilet paper, and pastors and lay leaders have been jailed or heavily fined for preaching. Beatings and other forms of torture are given to religious prisoners of conscience.

During our visit to Romania, individuals would come up to our group at great personal risk, and as they shook our hands, they would press messages into our palms about their family members in prison and other tribulations imposed upon them because of their faith. We were deeply moved by the courage of the Romanian believers.

Upon our return, our congressional group brought to the attention of the Romanian Government specific cases and specific issues where we hoped to see positive movement by the government. Sadly, the Romanian Government has shown little interest in genuinely reforming its treatment of the church.

In view of the continuing reports of religious persecution and harassment, we introduced H.R. 3599, a bill to temporarily suspend most-favored-nation status to Romania for 6 months.

It is not our intention to impose further suffering on the Romanian people; rather, we are hoping that use of the trade leverage our country has with Romania can help bring about improvements regarding religious rights. A temporary suspension of MFN is the best way to convey to that government that the United States will not conduct business as usual as long as religion is being persecuted in Romania.

It is our hope that our legislation will never have to be enacted into law. Indeed, we pray that Romania will take the necessary steps to end religious repression. At this moment, though, the Romanian Government continues to have no shame over its persecution of Christians. Regrettably, withdrawal of MFN seems to be the only way to get that government to realize that it is in its own best interest to permit true freedom of religion.

It is my hope that the administration will not recommend renewal of most-favored-nation trading status for Romania. Let Romania be placed on probation, and let the administration assess whether progress is being made concerning religious freedom and human rights.

If the administration does decide to extend MFN, than I would urge the Subcommittee on Trade of the House Ways and Means Committee to act favorably on H.R. 3599. I would ask that the subcommittee note the growing support in the House for H.R. 3599. If MFN is extended, this bill should be sent to the floor.

The issue of religious repression in Romania cannot be swept under the carpet. Human rights, especially religious rights, must be on the table in America dealings with the Romania Government.

No nation can live in isolation from the world community. We have seen growing global outrage over the human rights abuses in South Africa. A similar campaign of concern must begin against the repression in Romania.

The statements of my colleagues this day are yet another indication of support in the House for those who suffer for their faith in Romania. Let us take the actions needed to move hearts to end the persecution of our courageous brothers and sisters in Romania.

GENERAL LEAVE

Mr. CRANE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and to include extraneous matter on the bill, H.R. 4800.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. GROTBERG (at the request of Mr. MICHEL), for today and the balance of the week, on account of illness.

Mr. LUJAN (at the request of Mr. MICHEL), for today and the balance of the week, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. COATS) to revise and extend their remarks and include extraneous material:)

Mr. CLINGER, for 5 minutes, on May 21.

Mr. BURTON of Indiana, for 60 minutes, on May 21.

(The following Members (at the request of Mr. PEASE) to revise and extend their remarks and include extraneous material:)

Mr. SOLARZ, for 5 minutes, today.

Mrs. LONG, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. LAFALCE, for 10 minutes, today.

Mr. GAYDOS, for 60 minutes, on May 21.

Mr. GAYDOS, for 60 minutes, on May 22.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. MICA after the remarks of Mr. BONKER, on H.R. 4800, in the Committee of the Whole, today.

(The following Members (at the request of Mr. COATS) and to include extraneous matter:)

Mr. CRANE in two instances.
Mr. FRENZEL.
Mr. MCDADE.
Mr. LEACH of Iowa in two instances.
Mr. COURTER in four instances.
Mr. SHUMWAY.
Mr. THOMAS of California.
Mr. SOLOMON.
Mr. MCCOLLUM.
Ms. SNOWE.
Mr. HYDE.
Mr. PORTER.
Mr. GUNDERSON.
Mr. FRENZEL in five instances.
Mr. RITTER.
Mr. SILJANDER.
Mr. HAMMERSCHMIDT.
Mr. ROTH.
Mr. COBLE.
Mr. COBEY.
Mr. CONTE.
Mr. LIGHTFOOT.
Mr. COATS.
Mr. MOORHEAD.

(The following Members (at the request of Mr. Pease) and to include extraneous matter:)

Mr. HOYER.
Mr. MCHUGH.
Mr. MARKEY.
Mr. LUNDINE.
Mr. BERMAN.
Mr. FRANK.
Mr. FASCELL.
Mr. TALLON.
Mr. STOKES.
Mr. BRUCE.
Mr. DOWNEY of New York.
Mr. LEVIN of Michigan.
Mr. SMITH of Florida.
Mr. DERRICK.
Mr. DICKS.
Mr. MORRISON of Connecticut.
Mr. SIKORSKI.
Mr. WRIGHT.
Mr. COLEMAN of Texas.
Mr. YATRON.
Mr. DELLUMS.
Mr. ROWLAND of Georgia.
Mr. FAUNTROY.
Mr. LEHMAN of Florida.
Mr. STARK.
Mr. ROYBAL.
Mr. RODINO.
Mr. LAFALCE.

SENATE BILL AND CONCURRENT RESOLUTION REFERRED

A bill and concurrent resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 1848. An act to amend the Federal Food, Drug, and Cosmetic Act to establish conditions for the export of drugs; to the Committee on Energy and Commerce and Foreign Affairs.

S. Con. Res. 139. Concurrent resolution to limit the amount that may be expended in any fiscal year by a Member of Congress for franked mail; to the Committee on House Administration.

BILL AND JOINT RESOLUTIONS PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on the following day present to the President, for his approval, a bill and joint resolutions of the House of the following titles:

On May 19, 1986:

H.R. 4382. An act to require the Architect of the Capitol to place a plaque at the original site of Providence Hospital;

H.J. Res. 234. Joint resolution designating the week of May 18, 1986, through May 24, 1986, as "National Food Bank Week";

H.J. Res. 427. Joint resolution designating the week beginning on May 11, 1986, as "National Asthma and Allergy Awareness Week";

H.J. Res. 492. Joint resolution to designate the week of June 1, 1986, as "National Neighborhood Housing Services Week"; and

H.J. Res. 613. Joint resolution allowing qualified persons representing all the States to be naturalized on Ellis Island on July 3 or 4, 1986.

ADJOURNMENT

Mr. CRANE. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 58 minutes p.m.) under its previous order, the House adjourned until Wednesday, May 21, 1986, at 11 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3535. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend section 155 of the Omnibus Budget Reconciliation Act of 1981 and the United States Grain Standards Act to recover the costs of carrying out the provisions of the United States Grain Standards Act, and for other purposes; to the Committee on Agriculture.

3536. A communication from the Adjutant General, the Veterans of Foreign Wars of the U.S., transmitting proceedings of the 86th national convention of the Veterans of Foreign Wars of the United States held in Dallas, TX, on August 16-23, 1985, pursuant to 36 U.S.C. 118; 44 U.S.C. 1332 (H. Doc. No. 99-223); to the Committee on Armed Services and ordered to be printed.

3537. A letter from the Secretary of Education, transmitting a review of the national assessment of educational progress, pursuant to 20 U.S.C. 1221(k)(6); to the Committee on Education and Labor.

3538. A letter from the Director, Defense Security Assistance Agency, transmitting notification of the Department of the Navy's proposed lease of defense articles to Argentina (transmittal No. 29-86), pursuant to 22 U.S.C. 2796(a); to the Committee on Foreign Affairs.

3539. A letter from the Acting Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting a report on the political contributions of Cynthia Shepard Perry, of Texas, as Ambassador to the Republic of Sierra Leone, pursuant to 22 U.S.C. 3944(b)(2); to the Committee on Foreign Affairs.

3540. A letter from the Assistance Administrator for Administration and Resources Management, Environmental Protection Agency, transmitting notice of new and altered Federal records systems, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

3541. A letter from the Director, Administrative Office of the United States Courts, transmitting the concerns of the judicial Conference of the Untied States regarding budgetary reductions which impact on the security and safety of the Federal judiciary; to the Committee on the Judiciary.

3542. A letter from the executive director, American Chemical Society, transmitting a report and financial audit for the society, pursuant to Public Law 88-504, section 3 (36 U.S.C. 1103); to the Committee on the Judiciary.

3543. A letter from the Administrator, National Oceanic and Atmospheric Administration, Department of Commerce, transmitting the Ocean Thermal Energy Conversion Report for fiscal year 1985, pursuant to 42 U.S.C. 9165; to the Committee on Merchant Marine and Fisheries.

3544. A letter from the Special Council, U.S. Merit Systems Protection Board, transmitting a copy of a report by the Secretary of Transportation setting forth the findings and conclusions of the Secretary's investigation into allegations of violations of the law mismanagement, a gross waste of funds and a substantial and specific danger to public safety in the air collision avoidance program of the Federal Aviation Administration, pursuant to 5 U.S.C. 1206(b)(5)(A); to the Committee on Post Office and Civil Service.

3545. A letter from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to amend the Social Security Act and related laws to make adjustments in benefits, improve administration, and make corrections and clarifications in the old-age, survivors, and disability insurance program, to make adjustments in benefits under the supplemental security income program, and for other purposes; to the Committee on Ways and Means.

3546. A letter from the Secretary of Agriculture, transmitting the third quarterly commodity and allocation table showing current programming plans for food assistance, pursuant to 7 U.S.C. 1736b(a); jointly, to the Committees on Agriculture and Foreign Affairs.

3547. A letter from the Chairman, Nuclear Regulatory Commission, transmitting a report on the nondisclosure of safeguards information for the quarter ending March 31, 1986, pursuant to AEA, section 147e, (94 Stat. 788); jointly, to the Committees on Energy and Commerce and Interior and Insular Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. RODINO: Committee on the Judiciary. House Resolution 409. Expressing the sense of the House of Representatives that the Attorney General should examine evi-

dence regarding the activities of former U.N. Secretary General Kurt Waldheim during the Second World War and should determine whether such evidence requires that Kurt Waldheim be denied admission into the United States (Rept. 99-607). Referred to the House Calendar.

Mrs. BURTON of California: Committee on Rules. House Resolution 458. Resolution waiving certain points of order against the conference report on (H.R. 2672) to redesignate the New York International and Bulk Mail center in Jersey City, NJ, as the "New Jersey International and bulk Mail Center," and to honor the memory of a former postal employee by dedicating a portion of a street at the New York International and Bulk Mail Center in Jersey City, NJ, as "Michael McDermott Place," and against the consideration of such conference report, (Rept. 99-608). Referred to the House calendar.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 4212. A bill to provide for the reauthorization of the Deep Seabed Hard Mineral Resources Act, and for other purposes (Rept. 99-609, Pt. 1). Order to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BOEHLERT:

H.R. 4849. A bill to allow homeowners to deduct the full amount of prepaid interest paid in connection with the refinancing of their principal residence for the taxable year in which paid; to the Committee on Ways and Means.

By Mr. ANNUNZIO:

H.R. 4850. A bill to apply the National Labor Relations Act to persons employed in food service activities under the Architect of the Capitol; to the Committee on Education and Labor.

By Mr. COURTER:

H.R. 4851. A bill to repeal section 2406 of title 10, United States Code, relating to cost and price management of contracts with the Department of Defense; to the Committee on Armed Services.

By Mr. DERRICK:

H.R. 4852. A bill to designate the U.S. Post Office to be constructed in Barnwell, SC, as the "Solomon Blatt, Sr., Post Office"; to the Committee on Post Office and Civil Service.

By Mr. EVANS Of Iowa (for himself, Mr. PANETTA, and Mr. BEREUTER):

H.R. 4853. A bill to create a secondary market for sound mortgages secured by farm real estate and guaranteed by the Farmers Home Administration, and for other purposes; to the Committee on Agriculture.

By Mr. LIGHTFOOT (for himself, Mr. TOWNS, and Mr. HATCHER):

H.R. 4854. A bill to authorize loans under the Small Business Act for economic injury caused by Federal action, to establish criteria for the determination of substantial economic injury under section 7 of the Small Business Act, and for other purposes; to the Committee on Small Business.

By Mr. McCOLLUM:

H.R. 4855. A bill to authorize the President to present a special congressional gold medal to Joe Kittinger; to the Committee on Banking, Finance and Urban Affairs.

By Mr. REGULA (for himself and Mr. RAHALL):

H.R. 4856. A bill to provide for the commercialization of new clean coal retrofit technologies and the development of additional electric generation and industrial energy capacity; jointly, to the Committee on Energy and Commerce, and Science and Technology.

By Mr. SIKORSKI:

H.R. 4857. A bill to amend section 207(e) of title 18, United States Code, to require that the Executive Office of the President be treated as a single agency or department; to the Committee on the Judiciary.

By Ms. SNOWE (for herself and Mr. BEREUTER):

H.R. 4858. A bill to amend section 552 of title 5, United States Code, to exempt from disclosure to the public matters relating to the design and construction of facilities of a diplomatic nature if such disclosure would present a physical security threat to that facility or would endanger the life or physical safety of any individual in those facilities; to the Committee on Government Operations.

By Mr. THOMAS of California:

H.R. 4859. A bill to enhance the value of the naval petroleum reserves by improving the production and pricing mechanisms applicable to such reserves; jointly, to the Committees on Armed Services, and Energy and Commerce.

By Mr. TORRICELLI (for himself, Mr. NELSON of Florida, Mr. BROWN of California, Mr. ANDREWS, Mr. GORDON, Mr. VOLKMER, Mr. MINETA, Mr. RALPH M. HALL, Mr. DORNAN of California, Mrs. BENTLEY, Mr. DOWNEY of New York, Mr. DYMALLY, Mr. LIPINSKI, and Mr. LEVINE of California);

H.R. 4860. A bill authorizing the construction of a replacement orbiter for the Space Transportation System; to the Committee on Science and Technology.

By Mr. SOLARZ:

H.R. 4861. A bill to amend title 10, United States Code, to permit members of the Armed Forces to wear, under certain circumstances, items of apparel not part of the official uniform; to the Committee on Armed Services.

By Mr. HAMILTON (for himself, Mr. VISCLOSKY, Mr. MCCLOSKEY, Mr. SHARP, Mr. JACOBS, Mr. MYERS of Indiana, Mr. BURTON of Indiana, Mr. HILER, Mr. COATS, Mr. HILLIS, Mr. GARCIA, Mr. WORTLEY, Mr. FASCELL, Mr. LANTOS, Mr. FUSTER, Mr. KOSTMAYER, Mr. DELLUMS, Mr. SMITH of Florida, Mr. WILSON, Mr. DE LA GARZA, Mr. FISH, Mr. BEDELL, Mr. FEIGHAN, Mr. MURPHY, Mr. MATSUI, Mr. ANTHONY, Mr. DYMALLY, Mr. PERKINS, Mr. BUSTAMANTE, Mr. FUQUA, Mr. FAZIO, Mr. HORTON, Mr. HUGHES, Mr. COELHO, Mr. GREEN, Mr. WIRTH, Mr. RALPH M. HALL, of Ohio, Mr. LENT, Mr. MARTINEZ, Mr. OWENS, Mr. GUNDERSON, Mr. MOORHEAD, Mr. MRAZEK, Mr. BROOMFIELD, Mr. STUMP, Mr. LAGOMARSINO, Mr. JEFFORDS, Mrs. BURTON of California, Mr. BARNES, Mr. BROOKS, Mr. LAFALCE, Mr. KINDNESS, Mr. VOLKMER, Mr. FROST, Mr. RICHARDSON, Mr. MONSON, Mr. CONYERS, and Mr. YATRON):

H.J. Res. 640. Joint resolution to designate 1987 as the "National Year of the Americas"; to the Committee on Post Office and Civil Service.

By Mr. HAMMERSCHMIDT (for himself, Mr. HOWARD, Mr. SNYDER, Mr. MINETA, Mr. ROE, Mr. STANGELAND, Mr. OBERSTAR, Mr. GINGRICH, Mr. CLINGER, Mr. MOLINARI, Mr. YOUNG of Missouri, Mr. SHAW, Mr. RAHALL, Mr. MCEWEN, Mr. SAVAGE, Mr. BOEHLERT, Mr. LIGHTFOOT, Mr. LIPINSKI, Mr. ROWLAND of Georgia, Mr. GRAY of Illinois, and Mr. TRAFICANT):

H. Con. Res. 339. Concurrent resolution expressing the sense of Congress that the essential air transportation program should be maintained for the 10-year period of which it is authorized; to the Committee on Public Works and Transportation.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

380. By the SPEAKER. Memorial of the House of Representatives of the State of Illinois, relative to the nuclear accident in the Soviet Union; to the Committee on Foreign Affairs.

381. Also, memorial of the general assembly of the State of Illinois, relative to a proposed memorial in the District of Columbia honoring the women who served in the Armed Forces; to the Committee on House Administration.

382. Also, memorial of the general assembly of the State of Georgia, relative to an amendment to the Constitution of the United States; to the Committee on the Judiciary.

383. Also, memorial of the Senate of the State of Hawaii, relative to the exemption of matured money market certificates as preferential transfers in bankruptcy proceedings; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 471: Mr. DORNAN of California, Mr. MONSON, Mr. HUTTO, Mr. NIELSON of Utah, and Mr. SKEEN.

H.R. 1089: Mr. CLAY.

H.R. 1375: Mr. OWENS.

H.R. 1589: Mr. WORTLEY.

H.R. 1625: Mr. HYDE.

H.R. 1705: Mr. MITCHELL and Mr. YATRON.

H.R. 1809: Mr. HYDE.

H.R. 2793: Mr. FISH.

H.R. 3006: Mr. GINGRICH.

H.R. 3042: Mr. SOLARZ.

H.R. 3087: Mr. KOSTMAYER and Mr. MINETA.

H.R. 3260: Mr. RINALDO.

H.R. 3429: Mr. MCGRATH, Mr. VENTO, Mr. ALEXANDER, Mr. SEIBERLING, and Mrs. BURTON of California.

H.R. 3644: Mr. PURSELL.

H.R. 3710: Mrs. MEYERS of Kansas, Mr. SUNDQUIST, Mr. WALGREN, Mr. SHUMWAY, and Mr. DICKINSON.

H.R. 3733: Mr. HAWKINS, Mr. GRAY of Illinois, Mr. RAHALL, Mr. FAUNTROY, Mr. PENNY, Mr. BUSTAMANTE, Mr. SKELTON, Mr. JACOBS, Mr. FRANK, Mr. LUKEN, and Mr. KLECZKA.

H.R. 4301: Mr. BARNES, Mr. CHAPPIE, and Mr. YATES.

H.R. 4344: Mr. BILIRAKIS and Mr. CAMPBELL.

H.R. 4355: Mr. CLAY and Mr. FAUNTROY.

H.R. 4390: Mr. AKAKA.

H.R. 4422: Mr. GLICKMAN, Mr. CROCKETT, Mr. MORRISON of Connecticut, Mr. RICHARDSON, and Mr. MOLLOHAN.

H.R. 4448: Mr. DUNCAN.

H.R. 4469: Mr. FEIGHAN, Mr. CROCKETT, Mr. HALL of Ohio, and Mr. BOEHLERT.

H.R. 4538: Mr. DREIER of California, Mr. WORTLEY, Mr. LUNGREN, Mr. KEMP, Mr. CRAIG, Mr. CHAPPIE, Mr. GINGRICH, and Mr. SUNIA.

H.R. 4545: Mr. DASCHLE, Mr. PEPPER, Mr. APPLEGATE, Mr. ROE, Mr. HOWARD, and Mr. WEISS.

H.R. 4573: Mr. THOMAS of California, Mr. HYDE, Mr. WORTLEY, Mr. CHAPMAN, Mr. LAGOMARSINO, Mr. OWENS, Mr. DORNAN of California, Mr. FASCELL, Mr. ANDREWS, Mr. MORRISON of Connecticut, and Mr. KOSTMAYER.

H.R. 4615: Mr. LEHMAN of Florida, Mr. EDWARDS of California, Mr. DORGAN of North Dakota, Mr. SABO, Mr. LOWRY of Washington, Mr. GARCIA, Mr. FORD of Michigan, Mr. BROWN of California, Mr. FLORIO, Mr. SMITH of Florida, Mr. BUSTAMANTE, Mrs. BOXER, Mr. VENTO, Mr. BATES, Mr. WEAVER, Mr. SEIBERLING, Mr. EVANS of Illinois, Mr. LEVINE of California, Mr. MORRISON of Connecticut, Mr. MRAZEK, Mr. OWENS, Mr. STARK, Mr. DOWNEY of New York, Mr. ECKART of Ohio, Mr. FROST, and Mr. SCHEUER.,

H.R. 4621: Mr. HYDE and Mr. OXLEY.

H.R. 4638: Mr. SEIBERLING, Mr. BILIRAKIS, and Mr. MCGRATH.

H.R. 4681: Mr. KOSTMAYER, Mr. GILMAN, Mr. JEFFORDS, Mr. KILDEE, and Mr. LEVINE of California.

H.R. 4703: Mr. ROSE, Mr. BEVILL, Mr. APPLEGATE and Mr. SAVAGE.

H.R. 4755: Mr. FAZIO, Mr. MRAZEK, and Mr. OWENS.

H.R. 4763: Mr. BATEMAN and Mr. SMITH of New Hampshire.

H.R. 4787: Mrs. COLLINS.

H.R. 4830: Mr. PACKARD and Mr. OXLEY.

H.J. Res. 7: Mr. CRAIG, Mr. WHITTAKER, Mr. SUNDQUIST, Mr. ZSCHAU, and Mr. TAYLOR.

H.J. Res. 131: Mr. ST GERMAIN, Mr. STRANG, Mrs. BURTON of California, and Mr. BOUCHER.

H.J. PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

354. By the SPEAKER: Petition of the council of the village of McDonald, Trumbull County, OH, relative to American prisoners of war and missing in action in Southeast Asis; to the Committee on Foreign Affairs.

355. Also, petition of Maria Castillo, et al, of Caracas, Venezuela, relative to the situation in Central America; to the Committee on Foreign Affairs.

356. Also, petition of the Southern Christian Leadership Conference, Atlanta, GA, relative to the native American people of Big Mountain; to the Committee on Interior and Insular Affairs.

357. Also, petition of the City Council of Bay Village, OH, Relative to "Save American Industry/Jobs Day"; to the Committee on Post Office and Civil Service.

358. Also, petition of the City Council of Elyria, OH, relative to "Save American Industry/Jobs Day"; to the Committee on Post Office and Civil Service.

359. Also, petition of the Chamber of Commerce of Lorain, OH, relative to "Save American Industry/Jobs Day"; to the Committee on Post Office and Civil Service.

360. Also, petition of the Graduate Student Council, University of Tennessee, Knoxville, TN, relative to sections 117(d) and 127 of the Internal Revenue Code; to the Committee on Ways and Means.

AMENDMENTS

Under clause 6 of rule XXII, proposed amendments were submitted as follows:

H.R. 1

By Mr. AKAKA:

(Amendment to the amendment in the nature of a substitute (text of H.R. 4746)).

—Page 13, after line 19, insert the following new section (and redesignate the subsequent sections, and conform the table of contents, accordingly):

SEC. 123. MORTGAGE INSURANCE ON HAWAIIAN HOME LANDS AND INDIAN RESERVATIONS.

(a) APPLICABILITY OF MORTGAGE INSURANCE ON HAWAIIAN HOME LANDS.—Section 247(c)(1) of the National Housing Act is amended by inserting before the period at the end the following: "(or, in the case of an invidividual who succeeds a spouse or parent in an interest in a lease of Hawaiian home lands, such lower percentage as may be established for such succession under section 209 of the Hawaiian Homes Commission Act, 1920, or under the corresponding provision of the Constitution of the State of Hawaii adopted under section 4 of the Act entitled 'An Act to provide for the admission of the State of Hawaii into the Union', approved March 18, 1959 (73 Stat. 5))".

(b) MORTGAGE INSURANCE ON HAWAIIAN HOME LANDS AS OBLIGATIONS OF GENERAL INSURANCE FUND.—Section 247 of the National Housing Act is amended—

(1) by redesignating subsection (c) as subsection (d); and

(2) by inserting after subsection (b) the following new subsection:

"(c) Notwithstanding any other provision of this Act, the insurance of a mortgage using the authority contained in this section shall be the obligation of the General Insurance Fund established in section 519. The mortgagee shall be eligible to receive the benefits of insurance as provided in section 204 with respect to mortgages insured pursuant to this section, except that (1) all references in section 204 to the Mutual Mortgage Insurance Fund or the Fund shall be construed to refer to the General Insurance Fund; and (2) all references in section 204 to section 203 shall be construed to refer to the section under which the mortgage is insured.".

(c) MORTGAGE INSURANCE ON INDIAN RESERVATIONS AS OBLIGATIONS OF GENERAL INSURANCE FUND.—Section 248 of the National Housing Act is amended—

(1) in paragraphs (3) and (5) of subsection (f), by striking "insurance fund" each place it appears and inserting "General Insurance Fund";

(2) by redesignating subsections (f), (g), and (h) as subsections (g), (h), and (i), respectively; and

(3) by inserting after subsection (e) the following new subsection:

"(f) Notwithstanding any other provision of this Act, the insurance of a mortgage using the authority contained in this section shall be the obligation of the General Insurance Fund established in section 519. The mortgagee shall be eligible to receive the benefits of insurance as provided in section 204 with respect to mortgages insured pursuant to this section, except that (1) all references in section 204 to the Mutual Mortgage Insurance Fund or the Fund shall be construed to refer to the General Insurance Fund; and (2) all references in section 204 to section 203 shall be construed to refer to the section under which the mortgage is insured.".

By Mr. BEREUTER:

(Amendments to the amendment in the nature of a substitute (text of H.R. 4746).)

—Page 22, strike line 15 and all that follows through page 31, line 15, and insert the following:

SEC. 144. URBAN DEVELOPMENT ACTION GRANT SELECTION CRITERIA.

(a) CONSIDERATION OF PRIOR FAILURE TO RECEIVE GRANT.—Section 119(d)(1)(C) of the Housing and Community Development Act of 1974 is amended by inserting after the last semicolon the following: "the failure of the city or urban county to receive a preliminary grant approval under this section on or after December 21, 1983;".

(b) PORTION OF SELECTIONS BASED SOLELY ON PROJECT QUALITY.—Section 119(d) of the Housing and Community Development Act of 1974 is amended by adding at the end the following new paragraph:

"(3) After making grants with respect to areas described in subsection (b)(2) during any funding round under this section, the Secretary shall distribute the remaining grant funds under this section so that to the extent practicable during such funding round—

"(A) 50 percent of the funds is first made available utilizing all of the criteria established under paragraph (1); and

"(B) 50 percent of the funds is then made available solely on the basis of the criteria established under paragraph (1)(C).".

(Amendment to the amendment in the nature of a substitute offered by Mr. Wylie (test of H.R. 4757).)

—Page 19, after line 12, insert the following new subsection:

(a) CONSIDERATION OF PRIOR FAILURE TO RECEIVE GRANT.—Section 119(d)(1)(C) of the Housing and Community Development Act of 1974 is amended by inserting after the last semicolon the following: "the failure of the city or urban county to receive preliminary grant approval under this section on or after December 21, 1983;".

Page 19, line 13, insert before "Section" the following: "(b) PORTION OF SELECTIONS BASED SOLELY ON PROJECT QUALITY.—".

By Mrs. BURTON of California:

(Amendment to the amendment in the nature of a substitute (text of H.R. 4746).)

—Page 90, after line 4, insert the following new section (and conform the table of contents accordingly):

SEC. 245. PROCEDURES AND POLICIES FOR MANDATORY MEAL PROGRAMS IN ASSISTED HOUSING FOR THE ELDERLY.

(a) EXEMPTIONS FROM MEAL PROGRAMS.—

(1) REQUIRED EXEMPTIONS.—The owner of any assisted housing for the elderly that requires tenants to participate in a meal program shall grant a tenant an exemption from such participation if—

(A) the program cannot satisfactorily accommodate the special dietary or health needs of the tenant, as certified by the physician of the tenant;

(B) the program cannot satisfactorily accommodate the special diet or food practice tenets of the religion of the tenant;

(C) participation in the program substantially interferes with the employment of the tenant; or

(D) participation in the program constitutes an unbearable financial hardship on the tenant, taking into consideration the cost to the tenant of meals not covered by the program and other necessary living cost remaining after payment of charges for the program.

(2) ADDITIONAL EXEMPTIONS.—The owner of any assisted housing for the elderly that requires tenants to participate in a meal program may grant a tenant an exemption from such participation for any additional reason determined by the owner to be appropriate.

(b) FINANCIAL ASSISTANCE.—The owner of any assisted housing for the elderly that requires tenants to participate in a meal program may, in lieu of granting an exemption under subsection (a)(1)(D), provide the tenant with financial assistance toward the cost of participation in the program.

(c) ACCEPTANCE OF FOOD STAMPS AS PAYMENT.—The owner of any assisted housing for the elderly that requires tenants to participate in a meal program shall accept food stamps toward payment for the meals included in such program.

(d) DEFINITIONS.—For purposes of this section:

(1) The term "assisted housing" means housing that is assisted under section 202 of the Housing Act of 1959, section 236 of the National Housing Act, or section 8 of the United States Housing Act of 1937.

(2) The term "elderly" means any individual who is not less than 62 years of age or any family the head of which (or whose spouse) is not less than 62 years of age.

(e) REGULATIONS.—The Secretary of Housing and Urban Development shall issue such regulations as may be necessary to carry out this section.

(Amendment to the amendment in the nature of a substitute offered by Mr. Wylie of Ohio (text of H.R. 4757)).

—Page 77, after line 6, insert the following new section (and conform the table of contents accordingly):

SEC. 224. PROCEDURES AND POLICIES FOR MANDATORY MEAL PROGRAMS IN ASSISTED HOUSING FOR THE ELDERLY.

(a) EXEMPTIONS FROM MEAL PROGRAMS.—

(1) REQUIRED EXEMPTIONS.—The owner of any assisted housing for the elderly that requires tenants to participate in a meal program shall grant a tenant an exemption from such participation if—

(A) the program cannot satisfactorily accommodate the special dietary or health

needs of the tenant, as certified by the physician of the tenant;

(B) the program cannot satisfactorily accommodate the special diet or food practice tenets of the religion of the tenant;

(C) participation in the program substantially interferes with the employment of the tenant; or

(D) participation in the program constitutes an unbearable financial hardship on the tenant, taking into consideration the cost to the tenant of meals not covered by the program and other necessary living costs remaining after payment of charges for the program.

(2) ADDITIONAL EXEMPTIONS.—The owner of any assisted housing for the elderly that requires tenants to participate in a meal program may grant a tenant an exemption from such participation for any additional reason determined by the owner to be appropriate.

(b) FINANCIAL ASSISTANCE.—The owner of any assisted housing for the elderly that requires tenants to participate in a meal program may, in lieu of granting an exemption under subsection (a)(1)(D), provide the tenant with financial assistance toward the cost of participation in the program.

(c) ACCEPTANCE OF FOOD STAMPS AS PAYMENT.—The owner of any assisted housing for the elderly that requires tenants to participate in a meal program shall accept food stamps toward payment for the meals included in such program.

(d) DEFINITIONS.—For purposes of this section:

(1) The term "assisted housing" means housing that is assisted under section 202 of the Housing Act of 1959, section 236 of the National Housing Act, or section 8 of the United States Housing Act of 1937.

(2) The term "elderly" means any individual who is not less than 62 years of age or any family the head of which (or whose spouse) is not less than 62 years of age.

(e) REGULATIONS.—The Secretary of Housing and Urban Development shall issue such regulations as may be necessary to carry out this section.

By Mr. ROTH:

(Amendment to the amendment in the nature of a substitute (text of H.R. 4746).)

—Page 48, strike lines 8 and 9 and insert the following (and conform the table of contents accordingly):

SEC. 205. VOUCHER DEMONSTRATION PROGRAM.

(a) OPERATION OF PROGRAM.—Section 8(o) of the United States Housing Act of 1937 is amended—

(1) in the first sentence of paragraph (1), by striking "In" and all that follows through ", the" and inserting "The";

(2) by striking paragraph (4);

(3) by redesignating paragraphs (5) through (8) as paragraphs (4) through (7), respectively; and

(4) in paragraph (5), as so redesignated by this subsection, by striking "an initial" and inserting "a".

Page 48, line 10, insert before "Section" the following: "(b) ADMINISTRATIVE FEES.—".

Page 48, line 11, strike "is amended" and insert the following: "(as amended by subsection (a) of this section) is further amended".

Page 48, line 13, strike "(9)" and insert "(8)".

H.R. 4800

By Mr. JEFFORDS:

Page 341, line 6, strike out "$500,000,000" and insert in lieu thereof "$470,000,000".

Page 340, after line 25 insert the following new chapter:

CHAPTER 4—COLLEGE RESEARCH FACILITIES

SEC. 545. REPLACEMENT AND MODERNIZATION OF COLLEGE RESEARCH FACILITIES.

(a) PURPOSE.—It is the purpose of this section to assist in revitalizing the Nation's academic research programs through capital investments in laboratories and other research facilities at universities and colleges.

(b) PROGRAM ESTABLISHMENT.—To carry out this purpose, the Secretary of Education shall, from the sums available under subsection (g) to carry out this section in any fiscal year, establish and carry out a new university research laboratory modernization program that will provide assistance for the replacement of modernization of such institutions' obsolete laboratories and other research facilities.

(c) COMPETITIVE GRANTS; REGULATIONS.—The university research laboratory modernization program established pursuant to subsection (b) shall be carried out through projects which involve the replacement or modernization of specific research facilities at universities and colleges. Funds shall be awarded in response to specific proposals submitted by such universities and colleges, in accordance with regulations prescribed by the Secretary of Education to carry out the purpose of this part. Funds to carry out the program shall be awarded on a competitive basis. The funds so awarded to any university or college shall be in an amount not exceeding 50 percent of the cost of the replacement or modernization involved (with the funds required to meet the remainder of such cost being provided by the institution involved or from other non-Federal public or private sources).

(d) CRITERIA FOR AWARD.—Criteria for the award of funds to any institution for a project under a university research laboratory modernization program shall include—

(1) the quality of the research and training to be carried out in the facility or facilities involved.

(2) the congruence of the institution's research activities with the future research needs of the agencies referred to in subsection (f); and

(3) the contribution which the project will make toward meeting national, regional, and State research and related training needs.

(e) EQUALIZATION OF FEDERAL FUNDS.—At least 15 percent of the amount available under this section in any fiscal year shall be available only for awards to universities and colleges that received less than $10,000,000 in total Federal obligations for research and development (including obligations for the university research laboratory modernization program) in each of the two preceding fiscal years.

(f) CONSULTATION.—In prescribing regulations and conducting the program under this section, the Secretary of Education shall consult with—

(1) the National Science Foundation;

(2) the Department of Health and Human Services;

(3) the Department of Defense;

(4) the Department of Energy;

(5) the National Aeronautics and Space Administration; and

(6) the Department of Agriculture.

(g) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated (in addition to sums authorized by section 511) $50,000,000 for fiscal year 1987 and such sums as may be necessary for each succeeding fiscal year to carry out this section.

Page 350, after line 25, insert the following new subsection (and redesignate the succeeding subsections accordingly):

"(f) The Secretary shall identify individuals, including employees of the Department of Labor, who shall be available on a regional basis to provide planning, operational, and technical assistance to labor-management committees described in subsection (b).

Page 356, line 13, insert before the close quotation marks the following: "Such report shall also include an analysis of alternative methods for reducing the adverse effects of displacements of farmers and ranchers, not only on the individual farmer or rancher but on the surrounding community.".

Page 357, after line 9, insert the following new subsection:

(e) ADDITIONAL STUDIES.—The National Commission for Employment Policy shall conduct research related to the provisions of this subtitle. Such research shall include examinations of—

(1) the role of the employment services in implementing programs to enhance services provided under this subtitle, and

(2) alternative techniques for managing production cutbacks without permanently reducing workforces.

A report on the research conducted under this subsection shall be submitted to the Congress not later than 18 months after the date of enactment of this Act.

EXTENSIONS OF REMARKS

LIBYA, THE COVERT OPTION AND INTELLIGENCE OVERSIGHT

HON. HENRY J. HYDE
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. HYDE. Mr. Speaker, the recent raid on Libya has triggered a number of thoughtful articles that have underscored the vital role intelligence plays in combating terrorism. Unfortunately, this Nation's intelligence capabilities are not what they should be, and much of the blame can be attributed to damaging leaks from sources in both the executive and legislative branches.

Until we can demonstrate that we can keep a secret, we are not going to get the kind of intelligence necessary to combat effectively this modern scourge of civilization.

Columnists Suzanne Garment and Cord Meyer, as well as our collegue MIKE DEWINE, have written timely and succinct articles on our intelligence problems that deserve my colleagues' immediate attention. Particularly noteworthy is a recommendation by all three of these respected voices that Congress reduce regular access to sensitive information by establishing a Joint Committee on Intelligence along the lines of House Joint Resolution 7—a measure that I introduced at the beginning of this Congress and which now has 153 bipartisan cosponsors from all points on the political spectrum. The cited articles and a list of House Joint Resolution 7's cosponsors follows:

Armey, Richard K. (TX).
Badham, Robert E. (CA).
Barton, Joe (TX).
Bateman, Herbert H. (VA).
Bentley, Helen D. (MD).

START TREATING U.S. INTELLIGENCE AS VITAL BUSINESS

(By Suzanne Garment)

Here are some snapshots of Washington in the week of the Tripoli bombing:

The president was on television explaining the reasons for the air strike. On March 25, he said orders went out from Tripoli to attack Americans in West Berlin. On April 4 the terrorist told Tripoli they would attack the next day. On April 5 they reported success.

The U.S. will pay a price for the president's specificity. But no one doubted that he had to speak in this much detail.

On Monday at 4 p.m. EST, administration officials began confidential consultations on the Libyan strike with the congressional leadership, consistent with the War Powers Act. Afterward, journalists learned from a couple of senators that the president would be making a big statement at 9 that night. The story that U.S. action was imminent made the CBS news at 6:30 p.m.—before the raid actually began.

At breakfast Thursday, Secretary of Defense Caspar Weinberger emphasized once more that the U.S. fighter-bombers had homed in precisely on terror-related facili-

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

ties. "The targets were effectively covered," he said with some satisfaction.

Later he mentioned Libya's report, widely accepted by the press, that Muammar Qadhafi's adopted baby daughter had been killed. The secretary said he'd been told there was no evidence that Col. Qadhafi had in fact ever adopted a child. Of course, Mr. Weinberger added, "not an awful lot is known about Libya."

The Libyan incident has us relearning basic lessons about international conflict, intelligence and secrecy. Before we forget what we have seen, we should try to turn these lessons into some concrete improvements in intelligence policy.

Many of us noted, for instance, that an F-111 is not just a piece of waste, fraud and abuse. To take another example, we saw that when you are bombing a city, bravery and physical skill are of no use unless you know where your targets are. Or another: You can be very good at collecting information through machines, yet dangerously deficient in the intelligence work that has to be done by humans.

We have also been reminded that leaked information can invite disaster. We have seen once more that when it comes to secrets, the U.S. Congress is a sieve.

No one thought much about any of these things a decade ago, when it was open season on government secrets in general and the intelligence agencies in particular.

Intelligence was seen as a moral issue. Out of this view came the Senate's new Select Committee on Intelligence in 1976, and a House counterpart in 1977. We also got a law saying that the president must directly approve any U.S. covert action and tell Congress about it.

The results were predictable. Covert actions became riskier for presidents, and therefore declined. The new committees, 29 congressmen plus their staffs, made it harder to keep secrets. Sometimes the Hill leaked. Sometimes executive-branch dissidents leaked to the Hill, which then leaked in turn. After one of these disclosures, congressmen would publicly add their own two cents and serve as an amplifier for the leaked information.

Beyond specific committees and laws, the intellectual climate got clammy. Congressmen became obsessed with procedural prerogative and phony legalism. We ended up having open hearings on whether to dispense covert aid. We began to see in the press actual leaked stories of U.S. covert-action proposals, and no punishment rained down on the perpetrators.

Also, some people in the oversight committees started thinking that they should actually help manage the intelligence enterprise. This fall, the Senate committee's staff drafted a "National Intelligence Strategy: Guidelines for FY 87." It was turned out to be an awesomely sophomoric document that could not really be fixed, because it treated intelligence as a commodity you can produce more or less the way you make widgets.

In short, for many people intelligence is still an ideological plaything rather than an enterprise whose results matter intensely in the real world.

Some of this can be fixed only by a broad change in attitudes toward intelligence, the legislative-executive balance, and secrecy. Some can be helped along by modest structural fixes.

For instance, what are we doing with two intelligence oversight committees, when we could do the job with one reasonably sized joint committee?

There is already some feeling in each house that you would get more mutual confidence, hence better oversight, by having fewer fingers in the pie. Rep. Henry Hyde has introduced a joint-committee resolution in the House. Sen. Dan Quayle is pushing the idea in the Senate.

The plan has a big problem, of course: It would deprive some congressmen of their places at the intelligence table. You can even find some people who criticize the idea on the merits. These people talk about checks and balances. They say it's good for lots of congressmen to learn something about the intelligence field.

But the oversight process has more important purposes than to serve as a tutorial for broad sections of Congress. As for checks and balances, is our intelligence apparatus so tough and bad that a single congressional watchdog committee cannot cope with it?

In the quiet after the Libyan attack, Washington heard the familiar sound of offended congressmen, whining that they had not been consulted enough about it. This lack of seriousness shows why we would be better off with fewer congressmen intimately involved in intelligence issues. And it is this type of impulse that we all have to start controlling in ourselves if intelligence matters are to be treated seriously again.

[From the Washington Times, Apr. 25, 1986]

REAGAN'S GAMBLE AND THE COVERT OPTION

(By Cord Meyer)

(Cord Meyer is a nationally syndicated columnist.)

If Ronald Reagan's retaliatory bombing raid against Libya results in fulfilling Secretary of State George Shultz's hope for an internal coup that topples Col. Muammar Qaddafi and replaces him with a more moderate leader, there will be few at home or in Europe to criticize the president for his high-risk gamble.

Given President Reagan's long streak of good luck in world affairs, such a benign coup cannot be ruled out. But the latest intelligence suggests that Col. Qaddafi is in effective control after some confused infighting between regular Libyan army units and his revolutionary guards.

Reagan officials now concede they do not expect any early overthrow of the Libyan dictator, and the consequences of the American attack have to be weighed in the knowledge that Col. Qaddafi will be on stage to orchestrate the Arab world's response.

Both moderate Arab diplomats and American Middle Eastern experts are convinced that in coming weeks the Libyan leader will play to the hilt his favorite role of David against Goliath. Waving the flag of his Islamic radicalism, he will attempt to rally the Arab masses against U.S. interests and allies. Moderate Arab regimes, who have no use for Col. Qaddafi, have had to join in publicly condemning the raid.

State Department officials concede that the Arab rulers who have been most cooperative with the United States, such as Egyptian President Hosni Mubarak and King Hussein of Jordan, will be under the heaviest pressure to reduce their ties to the United States. As one veteran Qaddafi watcher observed, "We may have made a hero our of a bum."

Wearing the cloak of injured innocence and playing on anti-American emotions stirred up by his agents, Col. Qaddafi can be counted on to widen his already considerable influence in the Sudan, where he has been quick to offer Libyan planes and pilots to help the provisional government deal with the revolt in the South. With the United States having to reduce its diplomatic presence because of a terrorist incident, the expending Libyan influence in the Sudan can be a threat to both Egyptian and U.S. strategic interests.

The Soviet Union stands to profit in a number of ways from Col. Qaddafi's ability to survive the U.S. strike. Some Arab ambassadors in Washington, in fact believe the American attack was deliberately encouraged by the Soviet authorities. They cite the discreet removal of Soviet navel vessels from Libyan harbors prior to the attack and the well-timed appearance of Georgia Arbatov on American television to dismiss the notion that Libya could count on Soviet support.

The most obvious Soviet gain is on the propaganda front in Western Europe, where popular demonstrations against the U.S. action have given the Soviets a new opportunity to exploit the peace movement. General Secretary Mikhail Gorbachev has astutely posed as a responsible statesman, and the flurry of Soviet arms control proposals is designed to highlight the contrast with the American bombers over Libya.

Nor is it by any means certain that, if Col. Qaddafi were overthrown, a successor regime in Libya would necessarily be pro-Western. With 5,000 Soviet technicians in Libya to advise the government and the army, the Soviet KGB has been in an excellent position to recruit army and air force officers as ideologically committed agents, as it did prior to the Communist coup in Afghanistan.

Moreover, the Reagan administration has had to pay a high price in order to win strong bipartisan support for its reprisal policy. Only by revealing information derived from Libyan coded cables was it possible to prove Col. Qaddafi's directive role in the disco bombing in West Berlin.

But in the process of informing the American public, the administration also alerted the Libyans to the vulnerability of their cable traffic. Since the Libyans now buy sophisticated European communications gear, it will be a long time before the United States again has the access to the vital information that it has lost.

Finally, in respect to the innocent people killed in the air raid, the Reagan administration can plead that the crude blunderbuss of military reprisal was forced upon it by the proven inability of the Congress to keep secret the more selective tool of covert action.

Plans for working secretly against Col. Qaddafi with the Egyptians and the responsible Libyan opposition were aborted last November by suspected leaks to The Washington Post from the congressional intelligence committees.

In order to recover the American covert action capability, Republican Rep. Henry Hyde of Illinois has introduced a bill with 142 co-sponsors that would merge the Senate and House intelligence oversight committees into a single joint committee with much-reduced staff and membership.

The blunt instrument of aerial bombardment is no substitute for the scalpel of effective covert action in dealing with the Col. Qaddafis of this world.

[From the Washington Times, Apr. 25, 1986]

REAGAN'S GAMBLE AND THE COVERT OPTION

(By Mike DeWine)

(Mike DeWine, a Republican congressman from Ohio, is a member of the House Foreign Affairs Committee and its subcommittee on Africa.)

The U.S. air strike in Libya demonstrates more effectively than hours of committee hearings why Congress should rethink its restrictions on U.S. use of covert activity abroad.

Faced with an international menace like Muammar Qaddafi, President Reagan in the 1980s has fewer viable options than President Eisenhower would have had in the 1950s. The single biggest reason is Congress' steady efforts to restrict U.S. covert activities.

If this were the 1950s, we might have awakened one morning to find that Col. Qaddafi had been deposed in a coup, or was otherwise gone from the scene. Now, by contrast, he is still in a position to direct terrorism.

The disaffection for covert operations among many in Congress is paralleled in the country as a whole. One problem seems to be that covert activity goes against the American preference for deciding questions and taking action out in the open and achieving a quick, clear resolution of problems. Yet covert action may sometimes be a better tool than overt action for dealing with the delicate problems encountered in foreign policy. In addition, the most common argument against covert activities is the moral argument—that it is immoral for the United Sates to intervene secretly in another country. But if congressional restrictions on covert action effectively limit the president's choices to military action like the air strike against Libya, the moral argument collapses. In the most blunt example, given that no other tactic has worked, is it not better morally to help depose Col. Qaddafi than to kill an innocent Libyan child with an American bomb?

In the same way, I believe strongly that if we had had an opportunity to assassinate Hitler it would have been morally justified to do so. Millions of innocent people died because he remained in power as long as he did.

This is what I thought as the first reports of our raid surfaced in the evening news. While many Americans might initially cheer our show of force, I wondered how they would feel when the sun rose over Libya and television transmitted pictures of bloody children's bodies and twisted civilian buildings.

That is not to say that our military execution of this operation was lacking. In fact, I think the current evidence shows the plan was carefully crafted and brilliantly executed, with every effort made to avoid hurting civilians. Neither do I criticize President Reagan's decision to take this action.

My criticism is with those who have limited the choices available to American presidents in dealing with fanatics like Col. Qaddafi.

Covert action is not the only possibility. For example, tough economic sanctions might have put enormous pressure on Col. Quddafi—if our allies would have cooperated. Four and a half years of unilateral economic sanctions by the United States, however, didn't have enough impact.

With the failure of economic sanctions, covert action does become a consideration. To mount such an operation, Congress has required the president to honor a host of reporting requirements. For example, all the members of the House and Senate intelligence committees must be informed. That is 31 people; committee staff adds another 92 with varying degrees of access to the information. These briefings have made it easy for one person who does not believe the operation should proceed to appoint himself or herself to stop it. No need to bother with a long legislative process; you merely pick up the phone and call a reporter.

This might have happened most recently in the very case of Libya. Without conceding that such a plan actually existed, it should be noted that an alleged covert plan wound up on the front page of the Nov. 3, 1985, Washington Post. The headline of this story by Bob Woodward read: "CIA Anti-Qaddafi Plan Backed; Reagan Authorizes Covert Operation to Undermine Libyan Regime.

The world then read that "President Reagan has authorized a Central Intelligence Agency covert operation designed to undermine the Libyan regime headed by Col. Muammar Qaddafi, according to informed government sources."

"The plan, which involves CIA assistance to another country or countries in North Africa and the Middle East that oppose Qaddafi, has run into initial resistance from the House and Senate Select Committees on Intelligence, which oversee the CIA."

Such a plan may not have existed, but if it had, it should never have been disclosed in the media.

No one yet knows how the current confrontation with Col. Qaddafi will play out, and I'm not advocating a particular action in this situation. But I do believe careful consideration of the reasons for the first U.S. bombing raid since Laos in 1973 suggests that we reassess our restrictions on covert action.

An excellent starting point is a proposal by Illinois Republican Rep. Henry Hyde to combine the House and Senate select committees on intelligence into one smaller joint committee and to cut back significantly on the number of people with access to intelligence information.

My point is not that every secret scheme should be indulged, but that Congress has imposed such high procedural hurdles that effective covert action has become virtually impossible. While the United States on some occasions may have misused covert action, Congress's overreaction to this was and is a grave mistake.

Covert action, judiciously used, can be an important tool of foreign policy. It sometimes can help us avoid action that is more costly in innocent human life and more destabilizing in terms of world politics. It protects and enhances the cooperative efforts of other countries which for various reasons, many require the option of "plausible denial."

Foreign policy rarely presents good choices; usually the task is choosing the best of several bad choices. Limiting the options may only compel us to take more drastic action than we need to.

[From the New York Times, Apr. 23, 1986]

INSTEAD, BE COVERT

(By Michael DeWine)

(Michael DeWine, Republican of Ohio, is a member of the House Foreign Affairs Committee.)

WASHINGTON.—Now that we've seen overt military action in Libya, is covert action still such an unpalatable alternative?

President Reagan has fewer workable options today than President Dwight D. Eisenhower would have had in the 1950's in the face of an international menace. The single biggest reason for this is Congress's steady effort, in the 1970's to restrict American covert activities.

If this were the 1950's, we might have awakened one morning to find that Col. Muammar el-Qaddafi had been deposed in a coup or otherwise removed. Now, by contrast, he is still in a position to direct terrorism.

The most common argument against covert activities is the moral argument—that is is unethical for America to intervene secretly in another country. But if Congressional restrictions on covert action effectively leave the President no choice but military action like the air strike against Libya, then the moral argument collapses. Given that no other tactic has worked, is it not morally better to help depose Colonel Qaddafi than to kill an innocent Libyan child with an American bomb? Would it not have been morally justified to assassinate Hitler, if we had had an opportunity to do so?

This is what I thought as the reports of our raid flashed across the television screen. While many Americans might initially cheer our show of force, I wondered how they would feel when they saw the sun rise over Libya, revealing children's bodies and twisted civilian buildings.

That is not to say that the execution of the operations was lacking. The plan was carefully crafted and executed, with every effort made to avoid hurting civilians. Nor do I criticize the President's decision to take this step. My quarrel is with those who have limited the choices available to Presidents dealing with fanatics like Colonel Qaddafi.

Covert action is not the only possibility. Tough economic sanctions might have put enormous pressure on Libya—if our allies had cooperated. But four and a half years of unilateral American sanctions had little impact.

So what about covert action? Congress has required the President to honor a host of reporting requirements before mounting any such operation. All members of the House and Senate intelligence committees must be informed—31 people plus their committee staffs, which adds another 92 people. And any one of these people who does not believe in the operation can appoint him or herself to stop it: all they need to do is pick up the phone and call a reporter.

This might have happened in the case of Libya. There may or may not have been a plan in this case, but a report of one appeared on the front page of The Washington Post. The story, on Nov. 3, cited "informed Government sources" and alleged that President Reagan has authorized a covert operation—it was to be run by the Central Intelligence Agency and include another country or countries in North Africa—to undermine the Qaddafi regime. The story also noted, rather revealingly, that the plan had met some resistance from the House and Senate Select Committees on Intelligence. Whether or not a plan existed, it should never had been disclosed in the media.

No one yet knows how the confrontation with Colonel Qaddafi will play out, and I am not advocating any particular action. But I do believe that careful consideration of the reasons for the first major American bombing raid since those in Laos in 1973 suggests that we reassess our restrictions on covert action. My point is not that every secret

scheme should be indulged but that Congress has imposed such high procedural hurdles that effective covert action has become virtually impossible.

Covert action, judiciously used, can be an important tool of foreign policy. It can help us avoid more costly and destabilizing operations that involve the loss of innocent life. It can also enhance cooperation with other countries that for various reasons require the option of "plausible denial."

Foreign policy rarely involves good choices; usually, the task is choosing the best of several bad choices. Limiting the options may only compel us to take more drastic action than we need to take.

MARTIN ANDERSON ON DEPLOYING STRATEGIC POINT DEFENSES NOW

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. COURTER. Mr. Speaker, Martin Anderson, a former policy development assistant to President Reagan, has published an article in yesterday's Wall Street Journal which my colleagues should read. Mr. Anderson points out that under the current terms of the ABM Treaty, the United States is entitled to deploy an antiballistic missile defense at a single site, Grand Forks, ND.

Since the site was originally designated for the safeguard ABM in 1969, the technology of strategic defense systems has undergone quantum leaps in certainty and accuracy. Mr. Anderson believes the technology of at least a point defense has matured enough for the United States to consider immediate development and deployment.

The modest investment we have made so far in strategic defense research is beginning to demonstrate the feasibility of the SDI approach. As Mr. Anderson argues, the ABM Treaty does not prevent us from going beyond the research phase to the level of development of at least a point defense system at Grand Forks.

The article follows:

[From the Wall Street Journal, May 19, 1986]

THE UNITED STATES CAN BUILD A PINPOINT STRATEGIC DEFENSE NOW

(By Martin Anderson)

Americans are among the most insured people in the world. We have medical insurance, auto-accident insurance, fire insurance, earthquake insurance, burglary insurance, libel insurance, and even life insurance. We are insured up to our chins against almost any calamity that could befall us, except one—accidental annihilation by a nuclear missile.

We all know that the massive and increasing nuclear-missile arsenals of the world have created the small but real possibility that there could be an unauthorized or an accidental launch of a nuclear missile. Adding to that risk is the growing concern that a ruthless radical of the Qadhafi variety will manage someday soon to get his hands on a nuclear bomb and a missile capable of delivering the bomb to a faraway taget.

As the risk of a deliberately planned all-out nuclear war between the two superpowers has receded, we have almost totally disregarded the growing risk of a small nuclear attack on the U.S. Neglect of this danger is unconscionable. The consequences of even one nuclear warhead striking a heavily populated area of this country would be catastrophic. The loss of life would be appalling.

That we choose to live so dangerously is baffling. It is baffling because we could build a limited missile defense today, at low cost, in full accord with the current ABM treaty, that would insure against such a tragedy.

The U.S. Army has already demonstrated conclusively that we have the technology—on our scientific shelves—to build an interceptor missile that can stop and destroy an incoming nuclear missile high above the earth's surface. On June 10, 1984, the Army fired an old Minuteman missile toward a target 4,000 miles away. Once the incoming missile was detected, a new interceptor launched a 70-foot engineering marvel, cobbled up from old missile parts and topped with an ultrasecret, state-of-the art sensing device. The interceptor flew flawlessy and homed in on the incoming Minuteman at a distance of more than 100 miles above the earth. In the brittle cold and near vacuum of outer space, the interceptor collided with the Minuteman missile at a speed of more than 20,000 miles per hour.

What happened was a collision of such power and intensity that both missiles were literally pulverized. We all have a pretty good idea of what happens when two automobiles, each traveling 60 miles per hour, hit head on. The interceptor missile hits its target at least 165 times harder.

And that was the old interceptor missile. By early 1986, the Army had completed plans for a better one. It's called ERIS, which stands for Exoatmospheric Reentry-vehicle Interceptor Subsystem. The new interceptor missile is extremely accurate, carries no explosives in its nose cone, and is only 20 inches in diameter and less than 14 feet long. Utilizing our existing radar system, with some upgrading, we could build a complete limited missile defense system (with 100 missiles) for about $150 million a year, or a total cost of $1.5 billion spread over 10 years. If we started today, the first missile would be standing guard, ready to fire, in the early 1990s.

Under terms of the ABM treaty, both the U.S. and the Soviet Union have the right to deploy as many as 100 interceptor missiles at designated launch sites. The Soviet treaty site is near Moscow; ours is at Grand Forks, N.D., next to the Canadian border. The Soviet ABM missiles are in place, the only operational missile defense system in the world. We started to build such a system in the late 1960s, but stopped and tore it all down in 1975. So we have a nice building site ready and waiting.

The area of earth that can be effectively protected by an interceptor missile is called its "footprint." The size of the protection footprint is determined by how soon we can detect an incoming nuclear missile and the speed of the interceptor missile. Because of the "footprint" phenomenon, the Soviet missle defense site near Moscow actually can provide a limited defense for a large part of the Soviet Union.

The footprint of an interceptor missile based in Grand Forks, N.D., also would be enormous. It would cover the entire continental U.S., all of Mexico and most of Canada. A single site could provide a limited defense against nuclear missiles for virtually all of North America.

Just one interceptor missile could destroy an accidentally launched nuclear missile. One hundred interceptor missiles could effectively insure us against virtually anything but an all-out nuclear attack by the Soviet Union. And, in addition to protecting us from an errant ICBM, this new system also could protect us from an errant missile launched from a Soviet submarine lurking off our coast.

Last February, President Reagan talked of "pushing forward our highly promising Strategic Defense Initiative—a security shield that may one day protect us and our allies from nuclear attack, whether launched by deliberate calculation, freak accident, or the isolated impulse of a madman." And then he asked, "Isn't it better to use our talents and technology to build systems that destroy missiles, not people?"

Most people would answer yes. Missile defense is clearly morally superior to the doctrine of mutually assured destruction. But shouldn't we also ask why we don't now build and deploy what we know we can build, why we don't deploy live interceptor missiles while we press ahead with the futuristic research of SDI?

Or perhaps we should put it this way: What will we say to the people living in an American city who, someday in the future, learn that in 15 or 20 minutes they will be annihilated by a nuclear bomb and ask for help? Will we be able to say "no problem," and quickly fire some interceptor missiles, or will we have to say "sorry" and then live with the knowledge of what we could have done?

The full-scale Strategic Defense Initiative has been the subject of intense debate about its scientific feasibility and its complex implications for military strategy. A missile insurance system is not subject to scientific debate. We have already successfully tested a prototype. A missile insurance system does not complicate military strategy. It simply protects us from accidental annihilation.

We should begin immediately to build, and then deploy, the best interceptor missiles we can create. They could turn out to be the most important insurance program the American people ever had.

THE PERILS OF PROTECTIONISM

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. CRANE. Mr. Speaker, in a 1964 speech before the Senate, Senator Fulbright lamented the fact that, "We are handicapped by policies based on old myths rather than current realities." His words mirror my own sentiments exactly as this body approaches yet another debate and vote on U.S. trade policy. I am afraid that this entire process is still held captive to some anachronistic yet popular myths about what a successful trade policy is. Too many Members, on both sides of the aisle, still seem to believe that protectionism is a viable policy, a policy that will benefit this country, a policy that will bring greater prosperity to a greater number of Americans. Nothing could be further from the truth. Surely history has taught us that much, or at least should have taught us that much.

And yet the Ways and Means Committee has now favorably reported a trade bill that threatens to return us to those dark days following the passage of the Smoot-Hawley tariffs of 1930. The myth seems to persist that what we are doing is protecting jobs in the United States, when in fact protectionism begets protectionism, and retaliation breeds retaliation. Barriers are raised and jobs are lost instead of protected. Domestic industries lose their competitive edge and become even less able to compete, and costs for everyone are raised. The trade imbalance, instead of improving, gets worse, as the economy declines and exports decrease. Yet somehow the protectionist myth lives on.

As this process plays itself out, I sincerely hope that my colleagues will reexamine some of the fundamental premises upon which their assumptions about trade are based. I also hope that they will take a few moments of their time to read the following editorial which appeared last week in the Washington Times. It further describes the dangers of enacting protectionist trade measures like the one which we will soon be asked to consider.

[From the Washington Times, May 15, 1986]

CREATING A TRADE MONSTER

(By William Niskanen, Jr.)

Congress, led by the House Democrats, is in danger of voting for the worst trade legislation since the Smoot-Hawley tariff of 1930. Let me count the ways.

The House is expected to act next week on a Democratic leadership bill whose worst features were recently approved by the Ways and Means Committee, normally an island of sanity on trade issues. The bill defines a number of additional practices in foreign countries as a basis for import restrictions by the United States.

Imports from any country with an "unwarranted" trade surplus with the United States would be subject to U.S. trade restraints sufficient to reduce this surplus by 10 percent each year for four years, unless the government of that country quickly agrees to actions consistent with these targets. Imports from Japan, West Germany, Taiwan, and perhaps other countries would be subject to this provision, which might be dubbed "son of surcharge"—an earlier effort to impose a 25 percent tariff surcharge on imports from countries with whom the United States had a large deficit. A similar bill, specific to Japan, has been approved by the Senate Finance Committee.

This provision would make a substantial bilateral trade surplus with the United States actionable under U.S. trade laws, even in the absence of any specific injury in the United States or specific unfair trade practice by the foreign country.

Imports of telecommunications equipment from any country that does not provide fully competitive market opportunities to U.S. telecommunications products would be subject to U.S. trade restraints sufficient to achieve "reciprocal" market conditions. At present, this provision would apply to almost all other countries, because the telephone and telegraph systems of most other countries are government-owned or restrict purchases from foreign suppliers. A similar bill is pending the Senate.

Imports of products made with subsidized resources would in many cases be subject to countervailing duties. On that basis, most American farm and forest products would be subject to countervailing duties by other governments because they use subsidized water and electric power.

Imports of any product subject to "export targeting" would be subject to mandatory retaliation. On its face, this provision is appealing, but export targeting includes a large number of government and business practices that are difficult even to define, let alone to counter.

The denial of "internationally recognized worker rights" or the toleration of cartels would be defined as an "unreasonable" practice subject to optional retaliatory U.S. trade restraints. In effect, the United States would be saying to the rest of the world that we will reduce our imports from any country that lacks labor and antitrust laws similar to those of the United States.

Each of these provisions involves a unilateral U.S. definition of "fair" trade that is inconsistent with current international trade agreements, and on which there is no basis for new agreement. It is the fairness of an international bully boy, threatening actions that will harm both ourselves and others, not the fairness of the leader of the community of free nations.

This is not all. The Ways and Means bill transfers significant trade authority from the President to the U.S. Trade Representative, who is in no position to weigh the impact on critical foreign relations—or on the U.S. economy is in the same way as the President. The bill also specifies the membership of the Trade Policy Committee, reducing the influence of those agencies that best represent the interests of the consumers, exporters, and our large national interests. And a new "fair trade advocates" branch in the Office of the Trade Representative would assist business in petitioning for countervailing duties. This would transform what has been an effective presidential agency into another "independent" commission more subject to the parochial interests of Congress.

Several other provisions of this bill are dear to the hearts of the House Democrats. At the requests of an industry petitioning for relief from imports under the "escape clause," the government would establish an advisory group with the usual representatives from labor, management, consumers, communities, and the goverment to develop an "industry adjustment" plan. Only those who have not served on such committees, or have nothing better to do, could maintain an enthusiasm for this remnant of the 1983 industrial policy proposals.

One provision would dedicate revenues from tariffs and quotas to a greatly expanded trade Adjustment Assistance Fund and provide expedited access to this fund. Another mischievous provision would make the use of "fast track" trade negotiating authority contingent on calling a conference on international monetary reform.

This bill deserves the title ERISA—in this case standing for "Every Ridiculous Idea Since Adam."

The Democratic leadership is pushing the House to the wall, with an all-out campaign for a tough, election-year; protectionist bill.

The most charitable comment about this process is that the Democratic leadership is allowing its crazies to have their day, with full knowledge that President Reagan will veto the bill. If they are not serious, why go through this charade?

If they *are* serious, however, the Democrats have reaffirmed their incapacity to govern.

AN ORWELLIAN ARGUMENT AGAINST THE TEST BAN

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. MARKEY. Mr. Speaker, in a major departure from the policies of previous administrations, the Reagan administration now argues that a Comprehensive Test Ban (CTB) Treaty might encourage the proliferation of nuclear weapons.

Since the signing of the Nuclear Non-Proliferation Treaty in 1968, U.S. policy has been that the negotiation of a test ban would serve U.S. security interests by strengthening efforts to prevent nuclear proliferation. The Reagan administration has turned that policy on its head. Apparently, their visceral distaste for a CTB is so great that they feel compelled to argue that a test ban will actually encourage proliferation.

In testimony before the Senate Armed Services Committee on April 29, Assistant Secretary of Defense Richard Perle declared that:

Given our reliance of the free world on nuclear weapons to deter aggression, a CTB at this time could encourage the retention and proliferation of nuclear weapons. Nuclear weapons states could be expected to hedge against possible reliability problems by increasing the number and yield of warheads in their respective stockpiles. Non-nuclear weapon states who did not have to address the question of an independent nuclear capability because of U.S. nuclear guarantees, would have to reassess their requirements for national security, should they lose confidence in the U.S. nuclear deterrent. Under these circumstances, the nuclear options cannot (sic) be excluded. Hence, a CTB could lead to a less safe and fare (sic) more dangerous world than we have today.

I have yet to see one shred of evidence that supports this patently ridiculous and Orwellian contention. A simple reading of the final declaration of the recent Non-Proliferation Treaty review conference suggests that the Reagan administration stands alone and isolated in this view. The rest of the world is convinced a CTB would help discourage proliferation.

For over 30 years, every American President until Reagan has sought to negotiate a ban on nuclear testing. President Eisenhower proposed such a halt in 1957, and later remarked that the failure to achieve a CTB was one of the greatest disappointments of his Presidency. In his 1963 American University speech, President Kennedy noted that a test ban "would check the spiralling arms race in one of its most dangerous areas. It would place the nuclear powers in a position to deal more effectively with one of the greatest hazards which man faces, the further spread of nuclear weapons."

This judgment has been shared by Presidents Johnson, Nixon, Ford, and Carter.

Last September, the 127 signatories of the Nuclear Non-Proliferation Treaty of 1968 met in Geneva to review the operation of the treaty. In their final declaration, they noted that CTB negotiations had not been resumed and reaffirmed their determination "to achieve

the discontinuance of all test explosions of nuclear weapons for all time."

A letter from Deputy Assistant Secretary of Defense Frank Gaffney earlier this year declared that a CTB "would not strengthen stability but rather lead to a less secure and more dangerous world as the nuclear nations, unsure of the reliability of their nuclear weapons, increased their stockpiles to compensate for this uncertainty and as some non-nuclear nations, unsure of the reliability of the guarantees of the nuclear states, decided their security required them to build independent nuclear forces."

Surprised by Mr. Gaffney's argument that a CTB would encourage both vertical and horizontal proliferation, I wrote Secretary of State Shultz to find out whether Mr. Gaffney's statements accurately represented official administration policy. The State Department response, dated April 17th, was coordinated by an interagency team and signed by Acting Assistant Secretary of State for Legislative and Intergovernmental Affairs James W. Dyer. It confirms that the administration position is now that a test ban could encourage nuclear both vertical and horizontal proliferation because it might result in less "reliable" nuclear weapons.

I would like to call the attention of my colleagues to this letter, along with a recent letter to the New York Times that disputes its central contentions.

The letters follow:

U.S. DEPARTMENT OF STATE,
Washington, DC, April 17, 1986.

Hon. EDWARD J. MARKEY,
House of Representatives.

DEAR MR. MARKEY: Thank you for your letter of February 14, 1986 to Secretary Shultz concerning US policy regarding a comprehensive test ban (CTB) and non-proliferation. The following information is provided in response to your specific questions.

Question 1: Does the Administration believe that a CTB would encourage the proliferation of nuclear weapons?

Answer 1: While we believe that we must actively investigate technologies that could one day make us less dependent on offensive nuclear arms for our security, nuclear weapons will clearly remain the key element of deterrence for the foreseeable future. During such a period, where both the US and our friends and allies must rely upon nuclear weapons to deter aggression, some level of nuclear testing will continue to be required.

Nonetheless, a comprehensive test ban remains a long term objective of the United States. We believe such a ban must be viewed in the context of a time when we do not need to depend on nuclear deterrence to ensure international security and stability, and when we have achieved broad, deep and verifiable arms reductions, substantially improved verification capabilities, expanded confidence-building measures, and greater balance in conventional forces. For our part, the United States is energetically pursuing negotiations and discussions with the Soviet Union on concrete steps in all of these areas. We have made clear our strong and continuing view that Soviet calls for an immediate and unverifiable nuclear testing moratorium are not a basis for meaningful progress to this end. Our position on the unacceptability of such moratoria remains unchanged.

Our position is that in the absence of the above-noted context, a CTB could encourage inter alia the proliferation of nuclear weapons—"vertical" proliferation—if it led to serious questioning of the US nuclear deterrent. Further, a CTB might actually lead to an increase in the number of nuclear weapons in nuclear weapon states if such states become concerned about stockpile reliability. In the case of the United States, we should not forget that, thanks in part to the lessons learned from a well-structured program of nuclear testing, the United States has been able to reduce considerably the number of nuclear weapons in our stockpile since the 1960's. Weapons states might seek to offset the erosion of confidence in the reliability of their nuclear weapons stockpile. Others might seriously consider expanding their stockpile to compensate for the risks of unreliability over time.

With regard to so-called "horizontal" proliferation, a US-Soviet CTB under present conditions would not necessarily constitute a brake on the plans or intentions of potential nuclear states. Whether to "go nuclear" is a decision of highest national security importance for various states, and ultimately depends on a variety of underlying circumstances—regional tensions, desire for enhanced political influence or prestige, and concern about activities of neighbors—that would not be significantly changed by a CTB. Nor would third party adherence to a CTB prevent such a nation from designing a reliable first-generation weapon; as you know, the device dropped on Hiroshima had not been tested. Whether, in such circumstances, individual states would feel that their security required them to develop national nuclear capabilities is a question which cannot be answered in the abstract. It seems clear, however, that any decrease in the credibility of the US nuclear deterrent would lead other countries to carefully reassess their national security calculations. In that context their adoption of nuclear options cannot be excluded.

Question 2: Has the Administration in fact made this argument to the signatories of the Non-Proliferation Treaty?

Answer 2: Administration officials have discussed issues related to nuclear non-proliferation in the context of briefings on our testing policy with allied governments, some of which are signatories of the NPT.

Question 3: If so, why has the US been unable to convince the signatories of the NPT that this is true?

Answer 3: The question implies that no NPT signatories share this view. We know of no basis for such an assertion.

Question 4: What, if any non-nuclear nations allied to the US have indicated that the conclusion of a CTB Treaty between the United States and the Soviet Union might lead them to build indpendent nuclear deterrent forces?

Answer 4: We are not aware that any US allies have indicated that the conclusion of a CTB Treaty between the US and the Soviet Union might lead them to build independent nuclear deterrent forces. However, inasmuch as the US position vis-a-vis a CTB under present circumstances has been consistently clear, none of our allies has had to address the proposition suggested by your question. As a general rule, they—like we—do not publicly discuss responses to hypothetical situations.

Sincerely,

JAMES W. DYER,
Acting Assistant Secretary,
Legislative and Intergovernmental Affairs.

[From the New York Times, May 5, 1986]

TEST BAN WOULD HELP CONTAIN NUCLEAR PROLIFERATION

To the Editor:

Whatever one may think of the Administration's other arguments for continuing nuclear-weapons testing, trying to justify it on the ground that a comprehensive test ban treaty would increase the risk of proliferation is outrageous (news story, April 22). As one who dedicated his 19-year career in the U.S. Government primarily to heading off the spread of nuclear weapons to additional countries, I am convinced the very opposite is true.

Can the Administration seriously believe that if there were a comprehensive treaty ban our North Atlantic Treaty Organization and Asian allies would decide to abandon the nonproliferation treaty and develop their own nuclear weapons as a consequence? No one seriously versed in this field believes that they would respond in that way. The countries of real current proliferation concern are Pakistan and India, Israel, South Africa and—to a recently lessened degree—Argentina and Brazil. These countries have eschewed the nonproliferation treaty (which they say is discriminator), built sensitive nuclear facilities that they have refused to submit to international safeguards and, in some cases, refused to renounce the option to conduct "peaceful" nuclear explosions that are indistinguishable from weapons tests.

A comprehensive test ban treaty, which would be nondiscriminatory, is one of the most promising vehicles for surmounting these problems. If India and Pakistan joined a test ban, India would gain an assurance that Pakistan would not proceed to a test that could demonstrate a nuclear-explosive capability and give its leaders confidence that what they had developed would work; Pakistan would gain an assurance that India would not resume its nuclear-testing program, and both would be effectively precluded from developing more advanced nuclear explosives, such as thermonuclear, boosted or miniaturized weapons, or explosives that they could claim were for "peaceful" purposes.

It would have even clearer advantages for Argentina and Brazil, where mutual reassurance is the key requirement. It could also help dampen concern about Israel and South Africa, if they joined it, and reduce pressure on their antagonists to go nuclear.

Israel, South Africa, India and Brazil did join the limited-test-ban treaty, in which they expressed their determination to achieve a comprehensive test ban (so did the United States), and in the last two years the heads of India and Argentina have joined in highly publicized declarations urging prompt conclusion of a comprehensive ban.

In addition to these possible direct benefits affecting holdouts from the nonproliferation treaty, a comprehensive ban would be of substantial help in preserving and extending the nonproliferation treaty. It is the measure most persistently demanded by nonnuclear states that are parties to the nonproliferation treaty as a demonstration that the superpowers are fulfilling their part of the bargain under that treaty. And,

to the extent that a comprehensive ban was joined by nonproliferation treaty holdouts, it would reduce the risk of defections from that treaty by parties that feel threatened by the holdouts.

For these reasons, a comprehensive test ban could—as stated in the reports of panels from the United States and Western Europe published in early April by the Council on Foreign Relations—make a significant contribution to containing proliferation.—Charles N. Van Doren, Washington, April 22, 1986.

(The writer was assistant director of the United States Arms Control and Disarmament Agency, 1977–80.)

CAN WE TRUST A STAR WARS SHIELD?

HON. MATTHEW F. McHUGH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. McHUGH. Mr. Speaker, last week the New York Times published an op-ed article by Dr. Kurt Gottfried regarding the strategic defense initiative. In his article, Dr. Gottfried draws a parallel between SDI and the Soviet nuclear plant at Chernobyl, which recently experienced such a catastrophic failure.

In essence, Dr. Gottfried points out that the Chernobyl plant and SDI both represent extremely complex technologies that cannot be assumed to always perform according to design. That is especially true when the system cannot be tested under realistic conditions, as is the case with SDI. Indeed, as Dr. David Parnass has pointed out, the computer software for the SDI can never be tested since we can never know with real assurance how the Soviets would respond to SDI deployments.

I urge our colleagues to carefully consider Dr. Gottfried's comments, particularly his argument that the SDI will not be subject to sufficient internal "checks and balances." Admittedly, the SDI Office has proposed to establish its own "think tank" to provide itself with objective and unbiased analysis. Yet, how unbiased will that analysis be if the think tank is fully funded by the Pentagon and has no responsibility but to the SDI Office? Or if its analysts are chosen by the Director of the SDI Office or his assistants, and if those analysts are required to pass a litmus test of support for the SDI before receiving their jobs?

This is in fact the procedure envisioned by the Pentagon for this so-called think tank, and I have real questions about the procedure. These and other points will be debated by the House when we consider the Defense Department budget for fiscal year 1987. As we begin to give these issues the attention they deserve, Dr. Gottfried's article is a good starting point.

The article follows:

[From the New York Times, May 14, 1986]

TRUST A 'STAR WARS' SHIELD?

(By Kurt Gottfried)

ITHACA, N.Y.—Chernobyl and Challenger. Two distinct tragedies with a common implication: complex technological systems, run by vast organizations, are prone to catastrophic failures that only trial and error can reveal. It is folly to presume that systems of such intricacy will always perform in accordance with design—especially those that cannot undergo real-life tests.

A space-based defense against nuclear missiles is precisely that sort of system. Hence, it cannot provide reliable protection against attack.

No fundamental technical hurdles block the path to safe nuclear power or manned space flight. Their problems are institutional. The thousands of people, scores of companies and web of Government agencies that plan, build and operate the power plants and manned spacecraft are confronted by competing demands of cost, schedules and safety. Often safety does not receive the attention it must have since it is an obstacle to objectives that were irresponsibly bloated to marshall public support. But nuclear power plants operate for years and yield hands-on experience with their problems. The shuttle is flown again and again, until a fatal flaw is tragically revealed.

In this country, furthermore, the nuclear power industry and space program operate in the open. The inevitability of blunder brings their inner workings to light, despite the tendency of all bureaucracies to resist and even hide from their critics. In the Kremlin, astride the most oppressive and Byzantine of bureaucracies, this syndrome finds its most pathological expression.

To err is human. To cover up, is also. We ignore all experience when we suppose a large enterprise, even one as outstanding as the National Aeronautics and Space Administration, will correct its own mistakes. This was well understood by the Founding Fathers who, in a simpler age, designed the Constitution to aid our ability to penetrate official shields.

But the Strategic Defense Initiative will face neither realistic testing nor traditional "checks and balances." The Administration proposes to put a swarm of "battle stations" into space. There they would wait for years, always at the ready to counter a nuclear attack. An automated battle station, with its panoply of lasers, mirrors and targeting instruments, is easily as complicated as a nuclear power plant. In terms of complexity, our "Star Wars" shield would be analogous to a flotilla of orbiting nuclear plants that must cooperate with the precision of a symphony orchestra. With what confidence could a network of nuclear power stations be simultaneously turned on while itself under nuclear attack—stations that had never operated singly, let alone together, in such an environment? That question gives a rough measure of the task faced by the Initiative.

The Pentagon would pursue this mission in secrecy, knowing that its products cannot be put to realistic test short of nuclear war. No human life would be taken by meltdowns or defective O rings. The compulsion to ignore problems and doubts would have a free run. Whistle-blowers would be intimidated, blunders classified. No one would have any idea of how the shield would actually perform under attack.

In short, there is a vast gulf between a technology that is to work in benign surroundings and one that must operate under nuclear attack. No hostile power is spending billions on fiendish schemes for disrupting our nuclear power plants, whose problems are solely our responsibility. But billions of rubles would be devoted to fooling and destroying our shield in space. And what those rubles can do cannot be known until the very first time that shield must protect us, without any last-minute request to Moscow for a postponement if we're not quite ready for World War III.

All this is clear to our military leaders. They will refuse to rely on an untried strategic defense as the first line of defense. They know that a dream cannot dispel the harsh realities that emanate from thermonuclear detonations. They will insist that our defense continue to rest on deterrence by threat of nuclear retaliation.

Future historians will struggle to explain to their incredulous readers how it could be that a president with a whim of iron could have launched this nation on so extravagant a chase after so wispy a mirage.

THE TRADE BILL—AN EXERCISE IN POLITICAL GRANDSTANDING

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. FRENZEL. Mr. Speaker, the Wall Street Journal of today included a forthright editorial on the trade bill, painting it "an exercise in political grandstanding". I couldn't agree more.

I hope my colleagues will read the editorial. It is an accurate portrayal of the trade package. It also reminds us of what happens when a bad bill becomes law by reviewing the 1970–71 wage-price control law which was passed by Democrats in an effort to set a political trap for then President Nixon. When Nixon used the powers, and the economy degenerated, the Democrats may have got their wish, but the whole country suffered. The same thing should not be repeated by passage of this trade bill. I urge my colleagues to oppose it.

The editorial follows:

TRADE-BILL TERPSICHORE

That outrageously protectionist trade bill House Democrats have concocted is described by the Washington Post as a "shin-kicker," intended to make President Reagan pay heed to companies and labor unions protesting about competition from foreign goods.

Rep. Bill Frenzel (R., Minn.) comes closer to the mark in saying that the House leadership "prefers an issue to a law."

In short, this bill, now scheduled for floor debate in the House next week, is an exercise in political grandstanding. With it, House Democrats want to show they are willing to get tough with foreigners who so deviously scheme to sell Americans Sonys and Audis. No president with any regard for the health of the international economy could sign it. But a veto, the progenitors believe, will cost Republicans votes in November.

We would urge them not to be quite so certain. Congressmen spend their time preoccupied with parochial concerns, failing to discern that Americans are becoming more internationalist in their economic thinking. Americans need only look around to see that they derive some very large benefits from internationalized innovation and competition. Moreover, the trade bill's authors have so overplayed their hands that knowledgeable people doubt their seriousness. It's not nice to play games with legislation.

It's not nice partly because it demeans lawmaking, but partly as well because it car-

ries certain dangers. There is always a possibility that events will conspire to allow a bad bill to actually become law.

Something of that sort happened in 1970-71. A Democratic Congress set a political trap for Richard Nixon not unlike the one now being laid for Ronald Reagan. Congress gave Mr. Nixon something he did not want, the discretionary power to control prices and wages, burying it in a veto-resistant defense production bill.

The Democrats then piously proclaimed that Mr. Nixon had all the authority he needed to "control inflation," then 5.5%. Republicans were furious over being set up to be blamed for inflation. They called it "devious Democratic demagoguery."

Almost a year to the day after Mr. Nixon accepted those unwanted powers, the collapse of the Bretton Woods international monetary system prompted him to use them. He applied "temporary" controls. They disrupted U.S. production, helping precipitate, among other things, the first oil "crisis." Underlying inflationary pressures rose and eventually exploded, real incomes fell and the nation's economic policy debate degenerated into confusion and acrimony.

The trade bill is cut from the same cloth. One of its more mindless provisions would require 10% annual reductions in the United States trade deficits with Japan, Taiwan and West Germany. To accomplish that pointless feat would necessitate market interference of the most ham-handed type, disrupting capital flows as well as trade. It would also be a gross violation of international trade rules hard on the heels of Mr. Reagan's success in Tokyo in engendering a new round of trade-liberalization talks.

Still another section would attempt to legislate "workers' rights" in countries shipping goods to the U.S. Every U.S. trading partner will see the hypocrisy. The intent isn't to protect workers abroad but to keep the goods they make out of the U.S. market.

The bill would make it mandatory for the president to retaliate by a certain date against any nation deemed guilty of an "unfair" practice. This, too, is ham-handed. An arbitrary deadline could simply cut off talks on some issue at a crucial point, quite possibly losing some U.S. exporter a sale. To argue that Congress can legislate in advance the outcome of negotiations betrays, among other unattractive qualities, a streak of arrogance.

As we say, these and other exercises in economic demolition in the bill have led us and a good many other people to conclude that the Democratic leadership is not serious. Maybe things look different from inside the Beltway, but from our perspective it's hard to see how playing fast and loose with public policy can be regarded as good politics.

WALL STREET JOURNAL ENDORSES DEFENSE REORGANIZATION LEGISLATION

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. COURTER. Mr. Speaker, as the following Wall Street Journal editorial notes, Congress is finally beginning to move in the direction of a streamlined military command structure and procurement system. By a 95 to 0 vote, the other body passed a defense reorganization bill which effectively adopts the smooth, uncomplicated chain of command in operation during the recent Libya raid, and also reduces Defense Department headquarters and defense agencies staffs by 17,000 personnel.

Uncharacteristically, the bill in the other body also commands the Congress to begin healing itself, by reducing burdensome reporting requirements and exercising restraint in its demands for additional data from Defense Department witnesses. The House will soon have its own opportunity to debate and approve defense reform legislation. All in all, this activity is most welcome, after so many years of inaction and uncertainty.

I urge my colleagues to read the editorial that follows:

[From the Wall Street Journal, May 19, 1986]

UNTANGLING THE COMMAND CHAIN

An untold story about the successful raid on Libya is how well the chain of command worked by contrast, say, to the management of the earlier, trouble-plagued United States "peacekeeping" operation in Lebanon. One factor was the direct involvement of the chairman of the Joint Chiefs of Staff, Adm. William J. Crowe, a command veteran with joint operations experience in Europe, the Mediterranean and the Pacific. Another was the simplified command line, which, in effect, went from Adm. Crowe to Gen. Bernard W. Rogers, Supreme Allied Commander/Europe, and Adm. Frank B. Kelso II, Commander of the Sixth Fleet. As a result, the Air Force and Navy task forces worked together superbly.

That's the way the military is supposed to operate. Unfortunately, that hasn't always been true in the past. Bureaucratic burdens and interservice conflicts and confusion have too often fouled the command chain. A new defense reorganization bill—recently passed by the Senate in a 95-0 vote—tries to codify some of the improvements evidenced in the Libya attack and seems to have a good chance of succeeding.

The legislation's emphasis is on strengthening the Joint Chiefs of Staff, reducing interservice rivalry and cutting bureaucracy—both in the Pentagon and in congressional oversight committees. The bill is the result of several years' work by the Senate Armed Services Committee, beginning with John Tower and the late Scoop Jackson and continuing through Barry Goldwater and Sam Nunn.

As Sen. Goldwater said, the bill recognizes that "our national defense could be substantially strengthened by more effectively integrating the powerful capabilities of the four military services." Added Sen. Nunn: "Military operations stretching over time from the Spanish-American War to the attack at Pearl Harbor to the Iran hostage rescue mission to Grenada have proven that weak interservice cooperation has not been unique to any one presidency or administration. The bill tackles this historic and difficult problem by strengthening those elements of the U.S. defense establishment that are responsible for thinking beyond individual service interests, including the chairman of the Joint Chiefs of Staff and the unified war-fighting commands in the field."

The legislation would reinvigorate the JCS as a source of professional military advice to civilian decision-makers. The JCS chairman would become the principal military adviser to the president, secretary of defense and the National Security Council. He would be required to develop a joint military doctrine and to see whether our equipment, manpower and budgetary resources are sufficient to meet those tasks. The president or the secretary of defense could at any time include the JCS chairman in the chain of command, as was done on an ad hoc basis in the Libya raid.

The measure also stresses the important role of joint operations from the JCS on down. For instance, a requirement for JCS membership would be service in one or more joint duty positions "for a substantial period of time." Commanders in chief (called "CINCs") of unified and specified commands would be given more authority, with the aim of increasing operational flexibility and reducing service conflicts. And the JCS would review the joint service work of all officers of three- and four-star rank.

Bureaucracy would be reduced, including a personnel cut of 17,700 (or 10.4%) at Defense Department headquarters. Congressional micromanagement of the Pentagon would also be reversed, with committee chairmen given more control over requests for data and the number of congressionally required Defense reports sliced by 265, or about two-thirds of the current 400 total.

The trust of the Senate's measure—just as in the recent Packard Commission report—is to move away from the micromanagement installed by the McNamara whiz kids. The new emphasis is on slimming the Pentagon's operations to get it into better fighting shape. The stress on joint efforts is an attempt to stop intersevice battling. The House Armed Services Committee is now considering similar measures, following passage last year of a less sweeping reform bill.

The Senate's plan certainly has a lot to recommend it, but it is still only on paper. As Sen. Nunn commented, today's military is "a group of allstars who are not accustomed to planning together and playing on the same team." What will be needed, of course, will be leadership within the Pentagon to implement reforms and make them stick. Adm. Crowe has already amply demonstrated his ability in the field. If the reforms make it through Congress, he may have a better chance to show that same effectiveness inside the Pentagon itself.

A VOTE IN FAVOR OF REPEALING OUTSIDE INCOME INCREASE

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. WIRTH. Mr. Speaker, I support the action taken by the House on House Resolution 432 on April 23. House Resolution 432 reversed the action taken in the House the preceding day, April 22, which increased the limit on honoraria Members of the House can accept from 30 percent of their salary to 40 percent.

The House action, called by some a pay hike, was highly inappropriate from both a procedural and substantive perspective and I strongly support the repeal effort.

I especially object to the manner in which the proposed income increase was considered by the House. The resolution was

brought to the House floor with no advance notice. Only a handful of Members were present on the floor and the resolution passed by voice vote without debate. As I understand it, copies of the resolution were not even available.

Whether or not Members of Congress need or deserve a pay raise is open to debate—and any proposal altering Members' income ought to be openly debated. This effort to sneak an income increase through the House without the knowledge or consent of the majority of the Members is an affront to the American people.

Even if the proposed income increase were openly brought up and debated, however, I would remain opposed. Congress has no business raising its own earnings at a time when budget cuts are forcing many Americans to get by with less.

Moreover, this particular proposal was defective. While its proponents argued that it simply increased the limit on honoraria from 30 to 40 percent, the measure effectively removed the limitations on all other outside earned income—such as legal fees, corporate directors fees, commissions and other income for personal services.

Mr. Speaker, I applaud your decision to permit prompt reconsideration of the outside income increase. The subsequent vote overwhelmingly repealing the increase sends a strong message to those who would attempt a similar slight of hand in the future.

As one of our colleagues, Mr. DURBIN, so aptly characterized the vote: "This is the wrong thing to do, the wrong time to do it, and the wrong way to approach it."

DR. F. WAYLAND PARSONS, COMMUNITY EDUCATOR, RETIRES

HON. CARLOS J. MOORHEAD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. MOORHEAD. Mr. Speaker, following 52 years' involvement with Glendale public schools—as a student, teacher, and administrator—Dr. Wayland Parsons will retire in June 1986.

He has served the Glendale Unified School District for the past 38 years, since 1960 as deputy superintendent of administration. In this position, he has been responsible for management of all school district budgeting and finance, plus all administrative support services. His leadership has maintained Glendale schools as one of the most efficient and well managed public agencies in California.

SUPERINTENDENTS' ADVISER, HISTORICAL RESOURCE

His broad knowledge covering public education and the development of Glendale schools during the past half-century have earned him deep respect from colleagues statewide. In fact, Wayland's memories of Glendale school district facilities and fiscal history makes him one of the community's key resources on these topics.

Just as important, Dr. Parsons has been an adviser and friend to four district superintendents, more than two dozen elected members of boards of education, and countless Glendale school administrators, teachers, and support staff.

ROOTS IN GLENDALE

Dr. Parsons was born in Glendale and attended Edison Elementary, Roosevelt Junior High and Hoover High, plus Glendale Community College. After serving as a U.S. Naval officer in World War II (1942–46), he completed his studies for a B.A. degree in education and social science from the University of Redlands. In subsequent years, he earned M.S. and doctoral degrees in education from U.S.C.

CAREER IN GLENDALE SCHOOLS

His district service began in 1948 as a teacher at R.D. White Elementary School. In 1951–52 he worked as an elementary school counselor. From 1952–56 he assumed district administrative responsibilities as assistant to Superintendent Normal Hayhurst. Among other accomplishments, he coordinated two successful bond elections for school construction and improvements—each raising $10 million plus—and a general tax override election for increasing district operational funds.

In 1956 he was appointed vice principal of Clark Junior High, becoming Clark's principal in 1957. In 1960 he was named district deputy superintendent, a position he has occupied for the past 26 years.

COMMUNITY, FAMILY AND THE FUTURE

Through the years, Dr. Parsons has been an active member of such community groups as Glendale Rotary club, past president; Glendale Chamber of Commerce; Glendale Red Cross; Verdugo Hills Boy Scout Council; and Glendale First United Methodist Church. His retirement plans include traveling with his wife Lucille, a former teacher, sailing on his 27-foot boat and, just to keep a hand in education, teaching a course in what else? School finance for California State University, Northridge.

TRIBUTE

On June 12, Dr. Parsons will be honored by the Glendale Unified School District and his many, many friends. In paying tribute to him, it is fairly easy to list his credits, his achievements, his associations. It is not easy, however, to quantify his influence, to assess the benefits which have come to so many of us because of his decency and common sense and determined goodwill.

Mr. Speaker, I am grateful to Dr. Parsons for a lifetime of professional and personal giving. May retirement be as good to him as he has been for so many years to us.

WISCONSIN AND THE CONSUMER RAIL EQUITY ACT

HON. STEVE GUNDERSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. GUNDERSON. Mr. Speaker, I am submitting an editorial that appeared in the Wisconsin State Journal last week entitled "State Has Stake in Rail Equity Act." This informative editorial, outlining the Wisconsin perspective, discusses the vital concerns facing many areas, especially rural areas, throughout the United States regarding rail transportation and rates.

As a cosponsor of H.R. 4096, the Consumer Rail Equity Act, this legislation has a broad fiscal impact upon all rail shippers, most notably agricultural and energy shippers in Wisconsin, and will help keep rail rates to captive shippers at reasonable levels. H.R. 4096 would require the railroad companies to prove that their rates are reasonable, not the shippers, as current law states.

During the 96th session of Congress, the Staggers Rail Act was passed to spur the economic well being or railroad companies through regulatory freedom. Congress also directed the Interstate Commerce Commission [ICC] to protect railroad consumers and shippers who might be subject to unusually high rates to move their products.

I urge my colleagues to review the Wisconsin State Journal editorial closely, and consider joining the more than 70 cosponsors in support of H.R. 4096, the Consumer Rail Equity Act.

[From the Wisconsin State Journal, May 13, 1986]

STATE HAS STAKE IN RAIL EQUITY ACT

About two-thirds of the electricity generated in Wisconsin comes from coal-fired utility plants. Four-fifths of the coal used by those plants is hauled into the states by railroads.

In 1982, for example, about 14 million tons of coal were delivered to Wisconsin utilities and 11 million tons arrived by rail. Most of that coal was the low-sulfur Western variety, which helps to reduce sulfur-dioxide emissions.

The state Public Service Commission says state utilities spent more than $150 million on Western coal in 1982, with rail transportation costs accounting for nearly $90 million of the total. Rail transit continues to rise as a percentage of Wisconsin's total coal bill, thanks to five straight years of double-digit increases levied by shippers.

Who pays for the higher rail costs? Utility companies at first, but those costs are quickly passed along to consumers.

That is why Wisconsin has a stake in a piece of legislation pending in Congress called the "Consumer Rail Equity Act." In effect, it would force the Interstate Commerce Commission to assure reasonable rail rates where no effective competitive alternative exists.

Re-regulation? Definitely not. The provisions of the Consumer Rail Equity Act, which has bipartisan support, would simply force the ICC to follow the intent of what has proved to be a largely successful de-regulation effort: the Staggers Rail Act of 1980.

The Staggers Act gave the nation's sagging railroads the economic boost they needed by deregulating competitive rail traffic. It came not a moment too soon, given the sorry state of the U.S. rail industry in the late 1970s.

As part of the Staggers Act, however, Congress recognized the need to protect consumers and businesses that are "captive" to a single railroad for transportation of goods. It directed the ICC to prevent monopolistic practices where the conditions are ripe—an intent the agency seems to have forgotten.

The Consumer Rail Equity Act does not re-regulate anything de-regulated by the Staggers Act. It simply puts teeth in the bill's original intent by providing a more accurate test for determining the revenue needs of a railroad; shifting the burden of proving whether a rate increase is reasona-

ble to the railroads; and codifying the ICC's process for demonstrating market dominance.

Public Service Commissioner Branko Terzic, a staunch defender of an unfettered economy, summed up his support for the Consumer Rail Equity Act when he said: "Where there are truly free markets, you don't need regulation. But where there is a monopoly or something close, regulation becomes necessary."

Congress should pass the Consumer Rail Equity Act.

A TRADE STRATEGY FOR AMERICA

HON. STAN LUNDINE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. LUNDINE. Mr. Speaker, I would like to call attention to an article by a distinguished American, the Governor of Ohio, Richard Celeste. In an essay in the April 26 edition of the New York Times, Mr. Celeste underscores the overriding need for a strong American trade policy.

The effect of the current ambivalent trade strategy has been dramatic. It has resulted in the greatest trade imbalance in U.S. history. Thousands of jobs have been lost. Investment decisions have been put off in the face of a protectionist international marketplace and the future looks no better. In noting these facts, Mr. Celeste raises the very issues that H.R. 4800, the Trade International Economic Policy Reform Act, addresses.

America's trade problem will not solve itself. Governor Celeste's observations lead us to the same conclusion that H.R. 4800 reaches: a strong U.S. trade policy is a necessity. If we do not act, Americans will go on suffering. Mr. Celeste makes that admirably clear. I insert his essay in the RECORD:

[From the New York Times, Apr. 26, 1986]

TRADE, A TWO-WAY STREET

(By Richard F. Celeste)

COLUMBUS, OHIO.—The United States balance sheet with foreign trading partners is shocking. In January, the excess of imports over exports reached a record $16.5 billion. The total value of the products we import hit a monthly record of $33.5 billion. This hemorrhage is continuing despite falling oil prices and a 23 percent drop in the value of the dollar from a year ago.

The trade deficit means that the United States is losing its competitive edge in the global marketplace. It also means that we cannot regain that edge without a coherent trade policy.

What is the problem? The problem is thats trade strategy has been an afterthought under the Reagan Administration. The results have been disastrous. In 1984, the trade deficit reached a record $123 billion, only to be surpassed last year with a $148 billion trade deficit.

Statistics such as these tend to numb the mind. But for more than 1,000 unemployed pottery workers in Harrison County, Ohio, they are very real. These workers, and those who've lost their jobs at a machine tool company in Cincinnati and a shoe manufacturer in Nelsonville, are keenly aware that unrestrained imports, combined with the absence of a national strategy for exports, cost them their jobs.

Governors and state development officials have worked aggressively on their own to promote industrial competitiveness. But the trade deficit continues to neutralize these efforts, devastating our industries and exporting thousands of jobs.

Here in Ohio, for example, my colleagues and I have conducted trade missions to China, India, Africa and Europe, all with tangible results for Ohio-made exports. Yet Ohio remains vulnerable. Ohio has long been one of the top exporting states—third in the nation last year in the dollars value of exports and second in the number of jobs dependent on international trade. So we're hit harder than most states by this growing trade deficit.

More than 176,000 Ohioans filed claims for assistance under the Trade Readjustment Act from the beginning of 1979 through 1985. More than 140,000 of those lost their jobs in the auto industry because of unrestrained foreign competition.

Between 1970 and 1984, Ohio's steel industry lost 46,100 jobs. The Government's unwillingness to act effectively to curb unfair steel imports is partly responsible. Meanwhile, Japanese restrictions on our semiconductor imports have forced a Cincinnati manufacturer to scale back a proposed $39 million expansion. Japan blocks imports of semi-conductors from us while they dump them in our market.

We must fight back, not with knee-jerk protectionist reactions but with firm, fair and consistently administered policies to insure that trade is a two-way street. Here are six steps, recently approved by the Democratic Governors' Association, that would help balance trade more fairly.

1. We should strengthen our industries through public investments such as job training, education, basic and commercial research and economic development programs. These investments are the very ones Washington is reducing.

2. We must do more to promote our own exports. This includes easing licensing restrictions and helping farmers and small- and medium-sized companies improve their export activities.

3. We must enforce existing laws against unfair trade practices and push hard to open foreign markets. The Administration has been preaching free trade. But if trade isn't fair, it's not truly free. Our industries and farmers should have the same access to foreign markets that importers have to ours. If the Administration doesn't recognize this, then Congress should press our trading partners to reinvest favorable trade balances in our marketplace.

4. We must stabilize the dollar. The high trade value of the dollar acts as heavy tax on exports and a costly subsidy for imports. While the dollar has declined against some currencies in recent months, it is still overvalued. We must therefore accelerate efforts to reduce the Federal budget deficit and cooperate with our major trading partners in international currency markets.

5. It is essential for the Administration to recognize its role in resolving the international debt crisis, which has already cost the United States more than a million jobs and it having a terrible effect upon our long-term economic interests.

6. We must address the needs of workers and industries hit hardest by the trade deficit. Managers of American companies, determined to keep their world market share, are moving facilities overseas, leaving unemployed workers here. We are sending away jobs that, in all likelihood, will never return. Congress should therefore increase its assistance to workers, industries and communities swamped by the flood of imports.

In Ohio, we are investing heavily to help our basic industry modernize and to diversify our economy. But Ohio can invest $2.75 million in Armco Steel's new electogalvanizing line—an example of advanced steelmaking technology and a symbol of the steel industry's efforts to renew itself—and still risk losing our investment to unfair foreign competition and destructive price wars.

This nation needs a strong, steady policy—a policy that strikes a middle ground between being simple protectionists and being the patsies of world trade.

BONEHEADED PROTECTIONISM

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. FRENZEL. Mr. Speaker, the Minneapolis Tribune printed an editorial today which challenged Democrats to vote against their trade bill. In one of its critiques of the bill, it labels the section of the bill which would require 10 percent reduction per year in trade surpluses we face with certain countries "a boneheaded protectionist provision".

I commend the article to my colleagues as a good review of the follies of the trade bill:

[From the Minneapolis Star & Tribune, May 20, 1986]

DEMOCRATS SHOULD DEFEAT THEIR HOUSE TRADE BILL

House Democrats are staging a cynical charade this week. They are bringing up for debate and a vote an angry trade bill that has little purpose except to sound tough about foreigners who make things Americans want to buy. The bill would do most Americans great harm. It would torpedo the negotiations for more liberal world trade that President Reagan urged at the Tokyo summit.

But the House bill is not intended to become law. It is put up as a target for the Senate to shoot down or for Reagan to veto if the Senate fails. Then in next fall's election campaigns, Democrats can claim that they tried to save U.S. jobs from foreign competition, but Republicans wouldn't let them.

At least we hope the Republicans won't. Legislators often pretend to favor a bill they know is bad, relying on the bill's eventual defeat by other legislators or by a veto. On small matters that sort of flummery may be forgivable. But large matters are different because mistakes are more dangerous. Trade is a large matter. The House Democrats' bill is truly dangerous.

For instance, it includes a boneheaded protectionist provision that would require West Germany, Taiwan and Japan to reduce their trade surpluses with the United States by 10 percent a year for the next four years. That sounds tough, all right. But so rapid a turnaround in trade with those nations would only be possible if they or this country kept their products out of the United States by high tariffs or low quotas. Either way, U.S. consumers would face higher prices and less choice among those countries' products. And either way, West Ger-

many, Taiwan and Japan might counter U.S. trade restrictions with barriers of their own against U.S. products. That would sound tough, too. But the outcome for all sides would be less trade and lower living standards.

We doubt many Democrats want that result. They probably prefer that the lower-valued dollar and increased competitiveness of U.S. industry be allowed to improve trade balances without clumsy attempts by government to intervene in particular industries. And as long-time internationalists, most Democrats presumably favor multilateral efforts to build trade in a world market, not unilateral protectionist efforts for short-term gains.

Democrats should not leave it up to Republicans to defeat the self-destructive House trade bill. They should drop the charade and do the job themselves.

BOTH U.S. RADIO BROADCASTING FACILITIES IN EUROPE THREATENED

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. COURTER. Mr. Speaker, during the last few weeks the whole world has recognized one of the most cruel features of life under Soviet rule: The Soviet leaders' flat refusal to provide either their own or any other people with meaningful information about immediate threats to their life and health. The unprecedented nuclear catastrophe at Chernobyl is now thought by medical experts to affect 100,000 Russians whose health will have to be monitored for years. Yet for days the Soviet Government remained silent about the ongoing events, using such preposterous excuses as the claim that foreign governments are shut down on weekends.

The need for public information is manifest, in the free world and especially in Soviet-dominated areas. Almost the only news about Chernobyl received behind the Iron Curtain was broadcast by Radio Europe and Radio Liberty. These stations have been providing an essential service to the Russian and other East and Central European peoples for decades. They are one of the most significant demonstrations of our friendship as well as a powerful force for peace, because understanding and knowledge have always been the way to peace.

But now because of budgetary constraints and exchange rate instability, the radio stations are jeopardized and may have to cease broadcasts after July 4. It would be ironic and tragic for this to happen now, when the radios have just shown how essential they are to the information-starved peoples behind Soviet lines.

The following article by Malcolm Forbes Jr. convincingly argues the case for emergency supplemental funding now being considered by Congress. I believe the mutual hopes for peace and friendship between Americans and Russians would be fostered by continuing Radio Liberty and Radio Free Europe broadcasting.

A THREAT TO BOTH U.S. RADIOS IN EUROPE

(By Malcolm S. Forbes Jr.)

Radio Free Europe and Radio Liberty are in jeopardy.

The Chernobyl nuclear disaster emphasized the importance of these stations to the peoples of Eastern Europe and the Soviet Union. As press accounts have confirmed, the stations have been a source of breaking news for audiences in the Soviet bloc and have also provided listeners with the practical advice on survival that one might expect of a radio station in this country at times of national or local emergency.

Despite severe jamming, except in Hungary and Rumania, more than 50 million adults behind the Iron Curtain listen to the stations at least once a week. One clear reason for this is that the stations try to concentrate on local events and trends. They are, in that sense, a surrogate domestic radio service for each of these countries.

Yet Radio Free Europe and Radio Liberty may have to stop broadcasting by July 4.

The immediate problem is this: since the bulk of their operations are in Munich, two-thirds of the radio's costs must be paid in West German marks, not dollars. That's no problem as long as the value of the dollar does not change. But it has—with a vengeance.

The Administration assumed, for buying purposes, a dollar-mark exchange rate of 3.08 marks to the dollar when the 1986 fiscal year began last fall. Since then, of course, the dollar has plunged, and now buys only 2.17 marks. With an operating budget of around $100 million (which comes entirely from funds appropriated by Congress), this means that the stations face a shortfall of more than $22 million. This represents a cut nearly five times larger than the Gramm-Rudman-Hollings reduction that the operation described earlier this year. In a matter of weeks, the stations will run out of cash.

An emergency supplemental measure is before Congress that provides, among other things, for an appropriation that would make up the devastating foreign exchange shortfall. Support for the full $22 million is imperative if the radios are to continue operating. Congress has always given strong bipartisan support in the past. The question is whether it will do so in an era of tight budgets.

Unfortunately, the emergency supplemental appropriation is part of a larger bill that contains numerous items the Reagan Administration opposes. The White House has indicated it may veto the bill in its present form. The Munich operation would then become a victim of a dispute between the executive and legislative branches not of its own making. Delay in funding might prove as deadly as denial.

We have little room for maneuver. During the 1970's, shrinking budgets forced the radios to cut personnel from 2,700 to 1,700.

The falling dollar is the immediate peril. But there is a longer-term danger: many of our transmitting facilities are outmoded. For every dollar we spend on broadcasting, the Soviet Union spends the equivalent of $3 to block the signal. That's why our outdated transmitters must be rehabilitated. There's no point in broadcasting if the message can't get through.

Though the costs are small potatoes by Washington standards, the radios play a vital role for the United States and the West. Change in the totalitarian societies of the Soviet bloc won't come about on the battlefield in this nuclear age. It will come about through internal pressures such as those that brought Solidarity into existence in Poland. Jerzy Urban, the Polish Government spokesman, is on record as saying, "If you would close Radio Free Europe, the underground [Solidarity] would cease to exist."

In the short term, the existence of Radio Free Europe and Radio Liberty is jeopardized by the falling dollar. In the long term, the lack of money to rehabilitate our transmitting facilities poses an equal threat. Congress should pay close attention.

WHY SHOULD WE DECIDE IN THE DARK ABOUT COMPENSATION LAWS AND PROGRAMS?

HON. JOHN E. PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. PORTER. Mr. Speaker, one of the public responsibilities we acknowledge in America today is the provision of very basic help for those who truly cannot help themselves. As a society we believe that no one should be allowed to starve or to suffer needlessly when they have absolutely no means of self help. Fortunately, our society is one with means, both private and public, to respond to many of its compassionate concerns.

One issue which is, therefore, permanently on the agenda of the legislative branch in Congress and state legislatures is the structure and type of assistance and compensation systems that should be funded with taxpayer money. I have been looking particularly into the issue of the public compensation systems that provide help when people are injured, often through no fault of thier own. The perceived gaps in public and private compensation systems are one factor pushing the courts to expand the concept of fault in liability cases, as a means of providing more adequate compensation to injured people. The gaps and overlaps in compensation for injuries also raise fundamental public policy issues of equity and overall fiscal and budgetary responsibility.

I have found, surprisingly, that we lack the most basic data on the incidence of personal injuries and accidential illnesses in the American population. No comprehensive national survey of the way that people get compensation or support themselves in the aftermath of an unexpected accident has ever been done. In Britain a major national study of this type has just been completed at Oxford University under the auspices of the Social Science Research Council and produced some fascinating results.

It is imperative that American legislators and executive branch agencies and private organizations which are major actors in the compensation systems quickly gain a better understanding of what is going on in our own country. Perceptions of the present situation, which may or may not correspond to the unexamined reality, are creating a legislative environment for fundamental shifts in Federal State relations, particularly in the areas of tort and insurance law. These changes may well turn out to be counterproductive. We remain

in the dark, however, in projecting the consequences because we do not even understand the present situation.

I have participated in many discussions on the subject of liability; the need for better understanding of the objective facts of the situation is raised by every party in these discussions. State officials lack data to help guide their decisions on public assistance priorities and tort and insurance regulation. Members of Congress face decisions on more than 100 new legislative initiatives in a virtual information vacuum. Judges, juries, lawyers, businesses, municipal officials, professionals, and the public lack confidence in their judgment of what is reasonable behavior and reasonable compensation.

As we face the broader issues of what Government priorities should be in an era of budgetary austerity and how we can get both efficiency and fairness in the interplay of public and private compensation systems, including the tort system, we simply must have better data. We must have it for intelligent debate on the appropriate targetting and affordable levels of public compensation programs like Social Security Disability Insurance, workers' compensation, Medicare, and Medicaid. We must have it, along with parallel research by legal scholars into changing tort doctrines, to understand how to restore the balance between risk taking and risk avoidance so that liability problems do not continue to slash business innovation and productivity, employment, high-risk medical care, and municipal services.

I have been working with the General Accounting Office and with the Department of Health and Human Services to encourage them to make this study a priority for their research in the coming year. This research project may well merit private support as well, since it will enable both Federal and State Governments to make informed policy choices for the future on compensation matters which are of vital importance to the private sector. Universities and other research organizations should be encouraged to explore the many questions of interactions among the compensation systems which data from such a study could illuminate.

If a national date base can be collected, of sufficient comprehensiveness and detail to show how current sources of compensation and support interact at both national and State levels, it could be a catalyst for future movement beyond the current sterile debates and partial solutions to a more fundamental rethinking of national priorities in the compensation field.

SOUTH AFRICA: ACTIONS SPEAK LOUDER THAN WORDS

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. DOWNEY of New York. Mr. Speaker, actions speak louder than words. That seems to be the motto of South Africa. The South African Government has violated the sovereignty of three of its neighbors, Botswana, Zambia, and Zimbabwe. It has callously murdered three people, and wounded countless others.

The message it has sent to those who are currently attempting to find a peaceful resolution of the crisis in South Africa is: talk all you want, we have the military force and we will use it at will.

South Africa has demonstrated once again its contempt for law, for morality and for its greatest fan—the Reagan administration.

The Reagan administration has bought the Botha regime time because it has argued that given enough time, Mr. Botha will bring about the reforms in apartheid he so passionately seeks.

The administration served as midwife to the Lusaka Agreement and the Nkomati Accord, both of which have failed to produce peace in their time. The South Africans have not ended their support for the rebels seeking to overthrow the Government of Mozambique, as they promised to do in the Nkomati Accord. The attack on Zambia finally puts an end to any hope that the Lusaka Agreement will be carried out.

Why then, Mr. Speaker, does the administration continue to march with Pretoria? We have had the by now customary statement of outrage by a Presidential spokesperson. But that is all. It is still business as usual. Perhaps our Ambassador will be recalled briefly. But just as surely he will return and his return will assure Mr. Botha that he is free to continue the murderous and racist policy of apartheid

Isn't it time to do something more—to rip the cloak of sanctimony from Mr. Botha's claim that he is merely preserving Western values? Isn't it time to do something? The South African Government knows that actions speak louder than words. It is time for the administration to act, not just to speak. It is time for sanctions.

JOSEPH R. MESKO: SMALL BUSINESS PERSON OF THE YEAR FROM PENNSYLVANIA

HON. JOSEPH M. McDADE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. McDADE. Mr. Speaker, I rise today to recognize an outstanding small business owner from the 10th Congressional District of Pennsylvania, Joseph R. Mesko. Mr. Mesko, president of the Mesko Glass & Mirror Co., Inc. in Scranton, PA, is one of the Small Business Persons of the Year. This award is given annually to small business owners whose achievements best exemplify America's entrepreneurial spirit.

Joseph Mesko started the glass business with his brother in 1941. When his brother passed away in 1946, Mr. Mesko quit college and bought the business from his sister-in-law, using all his savings to do so. In 1 year, the company had 10 employees and $30,000 in sales. The business kept increasing in the Scranton area and Mesko saw the need and opportunity to expand his business to nearby communities. Mr. Mesko entered into some new areas of the glass business with greenhouses and commercial store fronts, providing an architect to work with clients on these projects. In 1972, he started Thermolite which manufactures insulated glass, due to customer concern over energy conservation. He also started to supply steel doors. Mr. Mesko is still planning to expand his shop and begin fabrication of store front operations. The firm now, 40 years later, has 104 employees with sales of over $4.5 million. Mesko Glass Co. started as a family business and continues to remain one, with 9 of his 10 children currently working in different areas of the business. Mr. Mesko is also active in the community.

Mr. Speaker, it is a great honor to join with the residents of the 10th Congressional District in congratulating Joseph Mesko on his being chosen one of the Small Business Persons of the Year. I ask my colleagues to please join with me in wishing him every success in the future.

FARM GROUPS OPPOSE TRADE BILL

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. FRENZEL. Mr. Speaker, printed below are letters from the Farm Bureau and from the National Grange which represent many farm groups in opposition to the trade bill. Since agriculture would be the prime target for retaliation by our trading partners should this bill become law, it's easy to see why these groups oppose the bill.

This important industry can't stand much more hard luck, particularly one precipitated by our own Government. I hope that my colleagues will heed their advice.

The two letters follow:

NATIONAL GRANGE,
Washington, DC, May 19, 1986.

Hon. BILL FRENZEL: Many of the legislative proposals to deal with our international trade deficit problems, including major elements of the House "Omnibus Trade" bill (H.R. 4800—The Trade and International Economic Policy Reform Act of 1986), pose serious dangers for our U.S. agricultural export markets. We urge you to weigh these issues carefuly before supporting any measure such as H.R. 4800 which includes undue restriction of Presidential authority to consider all national interests and which has other proposals that would not conform to our obligations under the General Agreement on Tariffs and Trade.

Such proposals to deal with our very serious international trade problems would bring retaliatory action against our agricultural and other exports, would in other ways reduce the ability of our trading partners to purchase U.S. products, and would seriously jeopardize our chances for success in a new round of multilateral trade negotiations aimed at dealing with these problems more appropriately through an improved system of international trading rules.

While we agree that more aggressive action is still needed in the interests of the U.S. trading community to deal with unfair competition, the proposals of H.R. 4800 intended to strengthen Sections 201 and 301 of the Trade Act of 1974 have not been properly designed and would bring more damage than benefits to our national trade interests.

We would be pleased to join with Congressional and other trade leaders in encouraging the Administration to step up still further its Section 301 and other initiatives of recent months, and to hold firm in its expressed intent to gain major improvements and reforms in the GATT through a comprehensive new round of negotiations which puts export subsidies and other critical agricultural concerns on the highest level of priority.

We believe that these issues of such great national importance deserve further consideration, in order to eliminate the dangers that we see in some of the proposals of H.R. 4800.

American Soybean Association.
Farm & Industrial Equipment Institute.
Grain Sorghum Producers' Association.
Millers' National Federation.
National Association of Wheat Growers.
National Grange.
National Soybean Processors' Association.
National Turkey Federation.
The Rice Millers' Assocation.
United Fresh Fruit & Vegetable Association.

AMERICAN FARM BUREAU FEDERATION,
Washington, DC, May 9, 1986.

Hon. WILLIAM FRENZEL,
U.S. House of Representatives, Washington, DC.

DEAR REPRESENTATIVE FRENZEL: Last week the Ways and Means Committee approved an omnibus trade bill that, it adopted in its present form, would represent a major setback for U.S. agricultural export interests.

The American Farm Bureau Federation represents three-fourths of all farmers producing virtually every agricultural product in the United States. Because of the crucial importance of exports to American agriculture, our members have adopted a clear policy opposing protectionist legislation that would result in foreign retaliation against our trade. There are several such measures in the current bill.

The following represents our views on some of the proposals that have surfaced on key elements of the trade bill:

SECTION 201. IMPORT RELIEF FROM FAIR TRADE

Many proposals for improvements to Section 201 stem from unhappiness with the President's refusal to accept the International Trade Commission's [ITC] recommendation for import relief on shoes last year. As a consequence, one proposal would remove the President's override authority in Section 201 cases on the basis of overall national interest. Farm Bureau cannot support this change. Eliminating the President's ability to decide whether import restrictions on fair trade is in the overall national interest would no doubt harm U.S. agricultural trade much more than help it.

Another proposal would allow trade relief if imports are determined to be simply "the cause" of injury to a domestic industry rather than a "substantial cause" of injury. Farm Bureau cannot support this change because it would open the gate to a flood of requests for import protection, which would result in retaliation against U.S. agriculture. It would also result in other countries adopting similar requirements on our trade.

Fast-track emergency procedures for perishable agricultural products have been proposed. Farm Bureau strongly supports fast-track provisions consistent with the General Agreement on Tariffs and Trade (GATT).

Farm Bureau supports the proposal in the bill to require a study by the U.S. Trade Representative (USTR) and the U.S. Department of Agriculture (USDA) on the possible impact on U.S. agricultural exports resulting from import restrictions under Section 201.

SECTION 301 RELIEF FROM FOREIGN UNFAIR TRADE PRACTICES

The most significant proposal for improving Section 301 would establish mandatory deadlines for investigations and retaliatory actions. Farm Bureau supports this concept, consistent with our international obligations, as the most effective means of making the 301 process work to the advantage of U.S. producers. These improvements should be made in conjunction with major changes in the GATT dispute settlement mechanism.

Any measure, such as that contained in the bill, providing for mandatory action against foreign countries having trade surpluses with the United States would be strongly opposed by Farm Bureau.

Farm Bureau also opposes provisions that would bring labor issues into international trade considerations. Such provisions would be unworkable and would result in a large-scale increase in trade disputes and retaliatory actions at a time when the world should be seeking a reduction in such problems.

COUNTERVAILING DUTIES

Among the suggestions for improving the countervailing duty law is one prohibiting foreign export taxes from providing the basis for suspension agreements (i.e. foreign export taxes on subsidized or dumped products cannot be used to avoid U.S. countervailing or antidumping duties). This is clearly consistent with our policy.

Another proposal involves the problem of "producer standing" in trade relief cases where producers of raw farm products have been ineligible to participate in some trade complaints on processed agricultural products. The language contained in the bill, which is supported by Farm Bureau, would represent a major improvement in current ITC procedures.

NEGOTIATING AUTHORITY

The trade bill proposes to grant authority to the Administration to enter into trade negotiations and calls for changes in GATT rules. Farm Bureau can support this as long as agriculture is a top priority, especially with respect to improvements in international rules on subsidies and the dispute settlement mechanism.

Farm Bureau supports legislation that would close the present loophole resulting from the Caribbean Basin Economic Recovery Act that allows the duty-free importation of non-Caribbean ethanol products by essentially transhipping them through Caribbean countries with minimal processing.

Lastly, Farm Bureau will support incorporation of legislation in the trade bill requiring the labeling of imported products according to country of origin, legislation such as that introduced by Congresswoman Bobbi Fiedler (R-CA) (H.R. 4337).

Farm Bureau's trade interests extend well beyond the issues raised in this letter. Our major concern is that U.S. and world economies continue to grow. Increased overall trade is vital to economic growth and, in turn, to U.S. farm income. Any future trade legislation must be weighed, in the final analysis, against its overall contribution to increased trade and growth. Fighting over a fixed or shrinking economic pie is a losing proposition for U.S. agriculture and the nation.

Farm Bureau is not opposed to positive trade legislation. There are areas where we believe U.S. trade statutes could be improved and some of our specific suggestions are, in fact, included in the current bill. On balance, however, the negative elements of this bill make it unsupportable by U.S. agriculture.

We urge you to remove protectionist elements of the legislation and keep it from being what certainly now is an agricultural trade.

Sincerely,

DEAN R. KLECKNER,
President.

KEEP EMBASSY FLOOR PLANS OUT OF THE HANDS OF TERRORISTS

HON. OLYMPIA J. SNOWE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Ms. SNOWE. Mr. Speaker, today I am introducing legislation to close a loophole in the Freedom of Information Act that could allow international terrorists to obtain detailed floor plans for U.S. embassies and other diplomatic facilities. Specifically, the legislation allows the Secretary of State to withhold design and construction plans for a diplomatic facility if disclosure threatens the security of that facility or endangers the lives of those who work there.

I support the Freedom of Information Act, and believe that it both symbolizes our open society and strengthens our democratic political system. But the authors of the act never intended it to be a tool for terrorists, which, as the result of legal precedent, is exactly what it has the potential of being.

The Freedom of Information Act, as currently written and administered, permits the withholding of sensitive classified information. The presumption is, however, that all requests for unclassified materials will be honored. The State Department controls access to blueprints and other sensitive plans during construction, but many of these plans are controlled as proprietary information, not as classified information, due to the magnitude of the embassy construction process. The costs of building an entire embassy as a fully classified project would be prohibitive. It would balloon the cost of building embassies and actually reducing our ability to rebuild or refurbish many of our insecure embassies overseas.

To build an entire embassy as a classified project, every worker on an embassy site, from a bricklayer to those who deliver cement, would have to be Americans with a full security clearance. This would go far beyond even the provision in the Diplomatic Security Act that passed the House last month requiring all contractors and at least 80 percent of all supervisory personnel to be Americans.

Although no one has yet sought the plans for U.S. embassies through the Freedom of Information Act, if requests are made they could not be denied. The time for us to correct this loophole in the legislation is now, before such requests might compromise the

safety of U.S. embassies and diplomats around the world.

I urge all of my colleagues to support this modest adjustment in the Freedom of Information Act. Keeping blueprints for U.S. embassies out of the hands of terrorists is the least we can do to protect those who risk their lives serving U.S. interests overseas.

IS THE ABM TREATY A HOSTAGE?

HON. NORMAN D. DICKS

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. DICKS. Mr. Speaker, I rise to express my deep concern that the administration may be engaged in an act of political terrorism.

Yesterday, the fiscal year 1987 arms control impact statements were released. These annual documents are the most comprehensive statement of administration policies on strategic programs and their implications for arms control.

This year, the statement on the strategic defense initiative includes the following passage:

In October 1985, the President determined that as long as the program receives the support needed to implement its plan it is not necessary to restructure the SDI program toward the boundaries of treaty interpretation which the United States could observe.

Does this mean that compliance with the ABM Treaty is being held hostage to Congressional support for funding the full SDI budget request? Was this the real purpose for the revised Treaty interpretation which suddenly appeared last year?

I hope this is not the case. Adherence to the restrictions of the ABM treaty is a question of utmost importance with immense national security implications. Any decision on the treaty must be made on its own merits, not as an exercise in political arm twisting. Until we know whether SDI can in fact support the introduction of defenses it makes no sense to eliminate the only constraint on an offensive/defensive arms race.

In light of this new statement, I believe it is even more important for the Congress to go on record in support of current policy, to keep meaningful constraints on the Soviets as well as ourselves. I have introduced House Concurrent Resolution 336 to express this Congressional support and urge my colleagues to join as cosponsors.

MAJORITY LEADER SALUTES WORK OF HOUSE SELECT COMMITTEE ON HUNGER AND CHAIRMAN MICKEY LELAND

HON. JIM WRIGHT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. WRIGHT. Mr. Speaker, as the Nation prepares to show its concern for the hungry and homeless through Hands Across America on Sunday, May 25, this body can take pride in the House Select Committee on Hunger for having provided a singularly effective focus on hunger for the past 2 years. It is the only institution in the U.S. Government addressing the specific issue of hunger and malnutrition at home and around the world.

During a period of increasing concern about the human suffering caused by famine and poverty, the committee has been a unique resource for Members of Congress and interested citizens.

The committee is responsible for helping save numerous lives through bipartisan efforts that assured adequate relief funding to famine victims in Ethiopia, Sudan, and 20 African nations. Beyond that, millions of children in poor nations will survive because the committee demonstrated the value of increased support for vitamin A supplementation, immunization, oral rehydration, and other primary health care intervention in the cycle of malnutrition and disease that wipes out the lives of more than 30,000 children every day.

A belief that the great productivity of American farmers should be more effectively used to eliminate hunger has been an operating principle of the House Select Committee on Hunger. Last year, through the farm bill, the committee took the lead in expanding the kinds of quantities of commodities—in the section 416 surplus removal program—available to less developed countries and strengthened the developmental impact of the Food for Peace Program.

The committee has pursued new developmental approaches to assisting small farmers in Africa and throughout the world. Through hearings, reports, and a major study by the Office of Technology Assessment, the committee is also demonstrating the enormous potential of credit availability expansion for the poor and hungry.

The hungry people in the United States have been an equal concern of the committee—particularly children, the homeless, the elderly, and other susceptible to the damaging effects of malnutrition. No nation in which 8 million people are unemployed and 33 million people live below the poverty level can cease to examine the dangers of hunger and malnutrition.

We have a far better understanding of the causes and results of hunger in the world and in our own country because the committee continues to study and analyze the nature of this as yet undefeated enemy of humanity. The committee reflects the commitment of the American people and the Congress to a sustained fight and, as such, the committee should be maintained until success is achieved—and hunger is eradicated.

For all these reasons, then, I offer a salute today to the House Committee on Hunger and its distinguished and hard-working chairman, MICKEY LELAND.

To Mr. LELAND, the task of heading this committee is not just another routine legislative responsibility but further an opportunity to exercise his own deeply held personal commitment to assist those in our world who suffer and die simply for lack of food.

Through Chairman LELAND's strong, compassionate leadership, the Congress has become more sensitive to the problems of poverty and scarcity, and the world has been given an opportunity to view the United States of America in its humanitarian concern for the hungry, both at home and abroad.

CALL TO CONSCIENCE VIGIL FOR SOVIET JEWS

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. HOYER. Mr. Speaker, for 10 years Members of this Chamber have risen in the conscience vigil to remind ourselves and the world of the plight of Soviet Jews. Today I reintroduce the case of a man who has sought to practice his religion, preserve his culture and emigrate to Israel. For seeking to realize these desires, Iosif Begun [pronounced YOsef Beh-GOON] was sent first to internal exile, then to hard labor camp, and now to prison.

Fifteen years ago, in 1971, Iosif Begun first applied to emigrate to Israel. The Soviet authorities' response to his application was to remove him from his post as senior research fellow at the Moscow Central Scientific Research Institute for Economic Problems. He could no longer find work in his field, applied mathematics.

Iosif Begun petitioned the Soviet authorities to allow him and others to teach Hebrew, which he considered a vital means of transmitting Jewish culture. He and his fellow refuseniks were denied permission. So he tutored Hebrew privately—and was arrested for "parasitism," the crime of not working. He spent 1 year in internal exile, and upon attempting to rejoin his family was arrested for violating the internal passport regulations. This time he spent 2 years in internal exile.

In 1982, Iosif Begun was tried for anti-Soviet agitation and sentenced to 7 years of hard labor and 5 years of internal exile. Presently he is serving his sentence in Chistopol Prison, cut off from family and friends. He continues to practice his religion. And he continues to hope to emigrate to a land where faith and teaching Hebrew are not considered crimes against the state.

On April 3 of this year, my colleagues in the Maryland House of Delegates passed a resolution to express support for Iosif Begun as he serves his third term. This commendable action on the part of the Maryland State Legislature indicates the deep commitment lawmakers at every level of government—from city to county to State to national bodies—have made to seek freedom for every Soviet Jew. We will not end our vigil until we have seen the gates of Jewish emigration from the Soviet Union reopen. And we will not be silent as long as Iosif Begun and his fellow believers remain imprisoned. Mr. Speaker, I respectfully request that a copy of the Maryland resolution be made part of the RECORD and appear right after my remarks.

Mr. Speaker, I would like to thank our colleague, Representative TOM KINDNESS, for organizing this year's conscience vigil for Soviet Jews. I am convinced that such appeals as ours are heard not just by the Soviet authorities, but also by those on whose behalf we

rise time and again to say, "Let our people go."

MARYLAND HOUSE OF DELEGATES RESOLUTION

Whereas, it has been brought to the attention of the Maryland House of Delegates that the civil liberties and human rights of Iosif Begun have been repeatedly denied by the Soviet government and,

Whereas, Iosif Begun has been prohibited from expressing his religious beliefs through the teaching of Hebrew and,

Whereas, Iosif Begun has been denied the right to practice and demonstrate his prominence in the field of technical sciences and,

Whereas, Iosif Begun has fought repeatedly for the right to emigrate but has met with resistance and subsequent hardships through incarcerations,

Now, therefore, be it resolved: That the Speaker, Delegate Marilyn Goldwater and the members of the Maryland House of Delegates offer their support and commendations to Iosif Begun for his ability to endure under extreme circumstances and duress,

And directs this resolution be presented on this 3rd day of April, 1986.

BENJAMIN L. CARDIN,
Speaker of the House.

STREAMLINE DEFENSE PROCUREMENT: REPEAL SECTION 917

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. COURTER. Mr. Speaker, many Members of the House and the other body have been effusive in their praise of the Packard Commission's recommendations for defense acquisition reform. However, it is apparent that there is a reluctance to take some of these recommendations to heart, to put the words into action.

Specifically, the Packard Commission made the following observation:

A streamlined organization for defense acquisition is not enough. It must be matched by streamlined procedures. Over the years, Congress and DOD have tried to dictate management improvements in the form of ever more detailed and extensive laws and regulations. As a result, the legal regime for defense acquisition is today impossibly cumbersome * * *. The sheer weight of such requirements often makes well-conceived reform efforts unavailing.

One of the most notorious set of defense procurement requirements is known to most of my colleagues as section 917, or the "Work Measurement Rules." As envisioned by the distinguished Congresswoman from California and the Member of the other body from Iowa, the data provided by defense contractors under these rules would ensure that the defense industry does not bilk the Defense Department and the taxpayers by overcharging for employee labor and related costs.

The objective of section 917 is unassailable, but the actual implementation threatens to become a paperwork nightmare. We all know that with paperwork come production delays and additional costs. Assistant Secretary of Defense James Wade has estimated that the yearly costs of section 917 compliance may be as much as $250 million. One major company in the defense industry estimates its initial implementation costs for section 917 compliance at $25 million, with yearly costs of $8 to $10 million thereafter. These costs will eventually be passed on to the taxpayers.

Section 917 became part of the fiscal year 1986 Defense Authorization Act without the benefit of hearings by any committee of the House. The sales pitch for the requirement on the floor was irresistable: Let's force the unscrupulous, untrustworthy defense industry to provide volumes of historical data on labor and materials costs, production costs, and price quotations for future work by subcontractors, so that we may better judge a contractor's efficiency.

In addition, section 917 requires that this data be recorded and provided in a single, specific format. Even the smallest widget manufacturers must comply with section 917, and spend tens of thousands of dollars in the process.

Another of the most attractive selling points for section 917 was the mistaken notion that the required data would be provided before a contract award, so that costs could be evaluated before taxpayer's dollars were committed. In fact, the important data on contractor pricing and negotiating strategy do not even exist before a contract is awarded and the product design is completed. Section 917 also requires work measurement data for development contracts, but these data are also not available until the development is completed and much of the money is already spent.

Part of the inspiration for section 917 was a desire to apply commercial production standards to a uniquely military enterprise. In many instances, this is a worthy goal, because, in principle, it ensures that the Defense Department will not contract for expensive gold-plated specialty items when available commercial items will do the job for a lower cost. However, it must be understood that the defense industry is like no other industry in the world. it responds to one specific market's demand and, in many respects, it requires unique standards to measure its performance.

However, under section 917, commercial measurement standards will be inappropriately applied to numerous unrelated defense industry tasks. Each of the many separate operations in defense production, from simply picking up an object to machining a part on a computer-controlled lathe, will be subject to a work measurement standard. One New Jersey defense manufacturer told me that even the act of loading defense electronic components onto a transport truck will be covered under section 917. As a way of reducing costs and increasing efficiency in the defense industry, section 917 is clearly self-defeating.

It may also be that those who support section 917 are not aware of the burden that the rules would impose on small businesses interested in defense procurement. Because the rule applies to all negotiated contracts and subcontracts in excess of $100,000, many small businesses will be swept up in a net designed to capture large corporations.

Congress has been trying to encourage more small businesses to join the defense industrial base, in order to increase competitive pressure and broaden expertise in specialized production skills. Implementation of section 917 can only have a chilling effect on this process, as many small businesses, already intimidated by existing procurement regulations, simply give up and stick with more flexible and predictable commercial contracts.

The question that should be applied to all military procurement reforms is: Does this reform improve the procurement process, so that the taxpayers get the best product for the lowest cost in the shortest time? It is not at all apparent that section 917 improves the procurement process, although it most certainly complicates and unduly prolongs it. This would appear to be regulation for its own sake, micromanagement elevated to an art form.

Our obligation, then, seems clear and unambiguous. We should repeal section 917 before its damaging effects radiate out into the defense industry. The repeal of section 917 will still leave in place thousands of regulations and reporting requirements to help us keep a close eye on the defense industry. We will be increasing defense procurement efficiency by eliminating one onerous bureaucratic reporting requirement which, if implemented, would aggravate the near-paralysis that already grips the defense procurement process. I urge my colleagues to give favorable consideration to the section 917 repeal legislation that I am introducing today.

RECENT ADDRESS BY JONAS SAVIMBI, PRESIDENT OF UNITA, TO A GROUP OF BLACK JOURNALISTS

HON. MARK D. SILJANDER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. SILJANDER. Mr. Speaker, my office recently received a copy of a speech which Dr. Jonas Savimbi, president of UNITA, addressed to a group of black journalists.

This speech clearly shows that Dr. Savimbi and UNITA in Angola have the support of black Americans. This speech also demonstrates the sincere and democratic intentions of UNITA.

I would like to share with my colleagues this speech. I believe that it will shed more light on the issues which surround the debate concerning U.S. support for UNITA. I hope it will relieve any apprehensions my colleagues may have in supporting UNITA.

PREPARED REMARKS OF HON. JONAS SAVIMBI, PRESIDENT, NATIONAL UNION FOR THE TOTAL INDEPENDENCE OF ANGOLA

I am very pleased to be with you this afternoon. It is always good to come to the beautiful "Capital City" of the free world.

In my previous travels to the United States, I did not have much of an opportunity to talk with many black journalists. With the exception of Leon Dash of the Washington Post, who spent many days and nights in the bush with us, there have been few opportunities to discuss the Angola issue with black journalists.

Therefore, prior to my visit, I directed my Foreign Secretary, Jeremias Chitunda, to arrange a function for black journalists as well as other special guests such as we have

here today. I think that it is important that black Americans hear my views directly and not have them filtered by various media interpretations and by those who have other interests.

Given some of the misinformation which I have read since my arrival, it is especially important that I have this opportunity today to address black journalists and other members of the black community. You should know that this is the only function during my entire stay in your country that UNITA is sponsoring.

I wanted to tell you my side of the UNITA story—why we do what we do and what we hope to accomplish.

I have been struggling against colonialism and foreign domination for 28 years. It began against the Portuguese. When colonial Africa was being divided by the Europeans, we were not invited to sit at the table. We thought colonialism had ended. But, it has now returned and continues in Angola with the Cubans, the Russians, the North Koreans and Portuguese Mercenaries.
